Deficit is significant in a year forecasters globally have warned will likely be a 'Super El Niño' year

GS I: Geography

Jacob Koshy
A.M. Jigeesh
NEW DELHI

Over a week past the monsoon's normal arrival date, the rain clouds have yet to reach Mumbai, driving India's nationwide monsoon deficit to 35% as of Tuesday.

The shortfall in rainfall is concentrated in the regions the monsoon has failed to cover – Maharashtra, the Konkan coast, and the adjoining regions of central India – where its northward progress has been stalled for several days.

India Meteorological Department (IMD) statistics show that apart from northwest India, which has received 5% more rain than normal for this time of the year, all other regions are in the red, including east and northeast India (-43%), central India (-61%), and the southern peninsula (-14%).

Meanwhile, Union Agriculture Minister Shivraj Singh Chouhan, chairing a review of kharif preparations on Tuesday, directed States to identify districts facing low or uneven rainfall and to draw up crop-wise contingency plans, so that affected farmers could be "immediately provided with alternatives, advice, and assistance."

The Union government has placed 150 to 200 districts under priority monitoring, ordered weekly El Niño reviews, and is encouraging a shift towards cotton and pulses.

'Better placed'

Mr. Chouhan has maintained that seed and fertilizer stocks are adequate and that reservoir storage – at 30.4% of capacity in May, against a 25.1% average in previous El Niño years – leaves the country better placed than in earlier seasons with rainfall deficiency.

While a rainfall deficit in June, the first of the monsoon months, is not unusual, it assumes additional significance in a year that forecasters globally have warned will likely be a 'Super El Niño' year.

An analysis of the IMD's all-India June rainfall departures for El Niño years since 2000 shows no consistent early-season signal. In June 2015, during one of the strongest El Niño events on record, rainfall was 14% above normal. June 2002 and June 2004, both years that ended in drought, recorded near-normal June rainfall of around 2% and 1% above normal respectively, with the deficits arriving only in July and later.

Only in 2009 (47% below normal) and 2014 (44% below normal) did June rainfall fail as sharply as it has this year. In 2023, the most recent El Niño year, June closed about 8% below normal, within the IMD's normal range.

An El Niño event – the periodic warming of the central and eastern Pacific Ocean that tends to suppress the Indian monsoon – establishes itself only in the spring and exerts its influence mainly in the middle and later part of the season.

"June rainfall and the pace of onset, by contrast, are governed largely by local and regional factors," according to D.S. Pai, chief forecaster at the IMD's Regional Meteorological Centre in Chennai.

First pulse weakened

This year, the monsoon set in over Kerala on June 4, just three days behind its normal date, but its advance up the west coast has since lost momentum. Dr. Pai explained that the monsoon moves in pulses, and the first pulse, having reached the outskirts of Mumbai, did not sustain itself. Instead, an "anticyclonic circulation" to the city's north, combined with a westerly push from mid-latitude weather systems, has prevented the monsoon from establishing itself, he told *The Hindu*.

The Madden-Julian Oscillation, a travelling band of atmospheric activity that can strengthen or weaken the monsoon, is currently in an "unfavourable phase". This implies that the onset over Mumbai is likely to be delayed by a further five to six days, until the next pulse strengthens, possibly aided by a low-pressure system forming over the Bay of Bengal, he reckoned.

The U.S. National Oceanic and Atmospheric Administration issued an El Niño advisory on June 11, confirming the event had formed and placing the odds of it becoming "very strong" by winter at 63%. The World Meteorological Organization had earlier put the probability of El Niño emerging between June and August at 80%. The IMD's own June bulletin states that El Niño conditions are present and that the ocean and atmosphere have coupled, with no positive Indian Ocean Dipole expected to offset it this season.

The warnings have been building. IMD's first-stage forecast in April pegged seasonal rainfall at 92% of the long-period average; its May-end update lowered this to 90% and assigned a 60% probability to a deficient year – the agency's most pessimistic pre-season call since 2015.

Hanging clouds

While a monsoon deficit in June is not unusual, it assumes additional significance in a year which has been globally forecast to witness a 'Super El Nino'

Rainfall departures for El Niño years since 2000:

	June	Whole southwest monsoon
2002	+2%	19% below LPA*
2004	+1%	13% below LPA
2009	- 47%	22% below LPA
2014	- 44%	12% below LPA
2015	+14%	14% below LPA
2023	- 8%	6% below LPA

*LPA: Long Period Average

Source: IMD

17J6. India's rainfall deficit 35% as monsoon stalls
मानसून के ठहराव के कारण भारत में वर्षा की कमी 35% हुई

- The shortfall in rainfall is concentrated in the regions the monsoon has failed to cover — **Maharashtra**, the **Konkan coast**, and the adjoining regions of **central India** — where its northward progress has been stalled for several days.
  वर्षा की कमी मुख्यतः उन क्षेत्रों में केंद्रित है जहाँ मानसून अभी तक नहीं पहुँच पाया है — **महाराष्ट्र**, **कोंकण तट**, तथा **मध्य भारत** के समीपवर्ती क्षेत्र — जहाँ इसका उत्तर की ओर बढ़ना कई दिनों से रुका हुआ है।
- **India Meteorological Department (IMD)** statistics show that apart from **northwest India**, which has received **5% more rain than normal** for this time of the year, all other regions are in the red.
  भारत मौसम विज्ञान विभाग (IMD) के आँकड़ों के अनुसार **उत्तर-पश्चिम भारत** को छोड़कर, जहाँ इस अवधि में सामान्य से **5% अधिक वर्षा** हुई है, देश के सभी अन्य क्षेत्र वर्षा घाटे की स्थिति में हैं।
- This includes **east and northeast India (-43%)**, **central India (-61%)**, and the **southern peninsula (-14%)**.
  इनमें **पूर्व एवं उत्तर-पूर्व भारत (-43%)**, **मध्य भारत (-61%)**, तथा **दक्षिणी प्रायद्वीप (-14%)** शामिल हैं।
- The **Union government** has placed **150 to 200 districts** under priority monitoring, ordered weekly **El Niño** reviews, and is encouraging a shift towards **cotton** and **pulses**.

केंद्र सरकार ने **150 से 200 जिलों** को प्राथमिक निगरानी के अंतर्गत रखा है, साप्ताहिक **एल नीनो** समीक्षा के निर्देश दिए हैं तथा **कपास** और **दलहनों** की ओर फसल परिवर्तन को प्रोत्साहित किया है।

'Better placed'
'बेहतर स्थिति में'

- While a **rainfall deficit** in **June**, the first of the monsoon months, is not unusual, it assumes additional significance in a year that forecasters globally have warned will likely be a **'Super El Niño'** year.
  यद्यपि मानसून के प्रथम माह **जून** में **वर्षा की कमी** असामान्य नहीं है, किन्तु यह उस वर्ष विशेष महत्व रखती है जिसे वैश्विक मौसम पूर्वानुमानकर्ताओं ने संभावित **'सुपर एल नीनो'** वर्ष बताया है।
- An **El Niño event** — the periodic warming of the **central and eastern Pacific Ocean** that tends to suppress the **Indian monsoon** — establishes itself only in the spring and exerts its influence mainly in the middle and later part of the season.
  एल नीनो घटना — अर्थात् **मध्य एवं पूर्वी प्रशांत महासागर** के जल का आवधिक ऊष्मीकरण, जो सामान्यतः **भारतीय मानसून** को कमजोर करता है — वसंत ऋतु में विकसित होती है और इसका प्रभाव मुख्यतः मानसून के मध्य तथा अंतिम चरणों में दिखाई देता है।
- The **Madden-Julian Oscillation (MJO)**, a travelling band of atmospheric activity that can strengthen or weaken the monsoon, is currently in an **"unfavourable phase"**.
  मैडेन-जूलियन ऑस्सिलेशन (MJO), जो वायुमंडलीय गतिविधियों का एक गतिशील क्षेत्र है और मानसून को मजबूत या कमजोर कर सकता है, वर्तमान में **"प्रतिकूल अवस्था"** में है।
- This implies that the onset over **Mumbai** is likely to be delayed by a further **five to six days**, until the next pulse strengthens, possibly aided by a **low-pressure system** forming over the **Bay of Bengal**, he reckoned.
  इसका अर्थ है कि **मुंबई** में मानसून का आगमन और **पाँच से छह दिन** विलंबित हो सकता है, जब तक कि अगला मानसूनी चरण मजबूत न हो जाए, जिसे **बंगाल की खाड़ी** में बनने वाली **निम्न दाब प्रणाली** से सहायता मिल सकती है।
- The **U.S. National Oceanic and Atmospheric Administration (NOAA)** issued an **El Niño advisory** on **June 11**, confirming the event had formed and placing the odds of it becoming **"very strong"** by winter at **63%**.
  अमेरिकी राष्ट्रीय महासागरीय एवं वायुमंडलीय प्रशासन (NOAA) ने **11 जून** को **एल नीनो परामर्श** जारी करते हुए पुष्टि की कि यह घटना विकसित हो चुकी है तथा इसके शीतकाल तक **"अत्यंत प्रबल"** बनने की संभावना **63%** है।
- The **World Meteorological Organization (WMO)** had earlier put the probability of **El Niño** emerging between **June and August** at **80%**.
  विश्व मौसम विज्ञान संगठन (WMO) ने पहले ही **जून से अगस्त** के बीच **एल नीनो** विकसित होने की संभावना **80%** बताई थी।
- **IMD's first-stage forecast** in **April** pegged **seasonal rainfall** at **92% of the long-period average**.
  IMD के **अप्रैल** में जारी प्रथम चरण के पूर्वानुमान में **मौसमी वर्षा** को **दीर्घकालिक औसत का 92%** आँका गया था।
- Its **May-end update** lowered this to **90%** and assigned a **60% probability** to a **deficient year** — the agency's most pessimistic **pre-season forecast** since **2015**.
  इसके **मई अंत के अद्यतन पूर्वानुमान** में इसे घटाकर **90%** कर दिया गया तथा **वर्षा-घाटे वाले वर्ष** की संभावना **60%** बताई गई — जो **2015** के बाद एजेंसी का सबसे निराशावादी **पूर्व-मानसून पूर्वानुमान** है।

17J6	Courts must weigh civil disputes before criminal prosecution: HCआपराधिक अभियोजन से पूर्व न्यायालयों को दीवानी विवादों पर विचार करना चाहिए: उच्च न्यायालय
17J6	What does the Tenth Schedule provide on party mergers? दसवीं अनुसूची दलों के विलय के संबंध में क्या प्रावधान करती है?

Courts must weigh civil disputes before criminal prosecution: HC

GS II: Polity: Judiciary

The Hindu Bureau
BENGALURU

The Karnataka High Court has said that trial courts cannot ignore the pendency of civil proceedings while assessing whether criminal prosecution is being used as a weapon of harassment, and are duty-bound to scrutinise, even at the stage of framing of charges, whether the evidence genuinely discloses a strong suspicion and a reasonable prospect of conviction.

"The criminal law cannot be permitted to degenerate into a weapon of oppression in aid of a civil contest," it said, citing Supreme Court observations that criminal law cannot be invoked against citizens, in the absence of legally tenable material, merely because a civil dispute subsists between the parties.

Justice M. Nagaprasanna made these observations while quashing the criminal cases against several persons and their advocate by the Bengaluru city police in connection with a complaint lodged against them in relation to a dispute over transactions of certain properties, the sale deeds of which were registered two decades ago.

A simmering land dispute between the parties has been artfully clothed in the robes of criminal prosecution in the complete absence of even an iota of criminality, the court said while pointing out that the criminal law cannot be permitted to degenerate into a weapon of oppression in aid of a civil contest.

The criminal justice system, it said, must operate through two filters – first, at the stage of investigation and filing of a chargesheet, and next, at the stage of framing of charge by the trial court. At both stages, the law vests ample power in trial courts to terminate proceedings that amount to abuse of process, subject always to the peculiar facts of each case.

17J6. Courts must weigh civil disputes before criminal prosecution: HC आपराधिक अभियोजन से पूर्व न्यायालयों को दीवानी विवादों पर विचार करना चाहिए: उच्च न्यायालय

- **The Karnataka High Court has said that trial courts cannot ignore the pendency of civil proceedings while assessing whether criminal prosecution is being used as a weapon of harassment, and are duty-bound to scrutinise, even at the stage of framing of charges, whether the evidence genuinely discloses a strong suspicion and a reasonable prospect of conviction.**
  कर्नाटक उच्च न्यायालय ने कहा है कि यह आकलन करते समय कि कहीं **आपराधिक अभियोजन** का उपयोग **उत्पीड़न के साधन** के रूप में तो नहीं किया जा रहा है, **विचारण न्यायालय** (Trial Courts) **दीवानी कार्यवाहियों**

के लंबित होने की उपेक्षा नहीं कर सकते तथा उन पर यह दायित्व है कि वे आरोप तय करने के चरण में भी यह जांच करें कि क्या साक्ष्य वास्तव में **मजबूत संदेह** और **दोषसिद्धि की युक्तिसंगत संभावना** को प्रकट करते हैं।

- "**The criminal law cannot be permitted to degenerate into a weapon of oppression in aid of a civil contest,**" it said, citing Supreme Court observations that criminal law cannot be invoked against citizens, in the absence of legally tenable material, merely because a civil dispute subsists between the parties.
  न्यायालय ने कहा, "**आपराधिक कानून को किसी दीवानी विवाद में दमन के हथियार के रूप में परिवर्तित होने की अनुमति नहीं दी जा सकती।**" इस संदर्भ में उसने **उच्चतम न्यायालय** की उन टिप्पणियों का उल्लेख किया, जिनमें कहा गया था कि केवल पक्षकारों के बीच **दीवानी विवाद** विद्यमान होने के कारण, विधिक रूप से टिकाऊ सामग्री के अभाव में, नागरिकों के विरुद्ध **आपराधिक कानून** का सहारा नहीं लिया जा सकता।
- **Justice M. Nagaprasanna** made these observations while quashing the criminal cases against several persons and their advocate by the Bengaluru city police in connection with a complaint lodged against them in relation to a dispute over transactions of certain properties, the sale deeds of which were registered two decades ago.
  न्यायमूर्ति एम. नागप्रसन्ना ने ये टिप्पणियां उस समय कीं जब उन्होंने **बेंगलुरु शहर पुलिस** द्वारा कई व्यक्तियों तथा उनके अधिवक्ता के विरुद्ध दर्ज आपराधिक मामलों को निरस्त कर दिया। यह शिकायत कुछ संपत्तियों के लेन-देन से संबंधित विवाद के संदर्भ में दर्ज की गई थी, जिनकी **विक्रय विलेख (Sale Deeds)** लगभग दो दशक पूर्व पंजीकृत हुई थीं।
- The criminal justice system, it said, must operate through two filters — first, at the stage of investigation and filing of a chargesheet, and next, at the stage of framing of charge by the trial court.
  न्यायालय ने कहा कि **आपराधिक न्याय प्रणाली** को दो स्तरों पर कार्य करना चाहिए — पहला, **जांच** और **आरोपपत्र (Chargesheet)** दाखिल करने के चरण में, तथा दूसरा, **विचारण न्यायालय** द्वारा **आरोप तय करने** के चरण में।

What does Tenth Schedule provide on party mergers?

Why has the misuse of the merger provision increased after the deletion of paragraph 3?

GS II: Polity
LETTER AND SPIRIT

Rangarajan R.

The story so far:

As many as 20 rebel Trinamool Congress MPs met the Lok Sabha Speaker and announced their decision to merge with Nationalist Citizens Party of India (NCPI). This has raised issues about the interpretation of Tenth Schedule with respect to merger of political parties.

What is the origin of Tenth Schedule?

The defections of legislators during 1960s and 70s from their parent parties created political instability in many States bringing down elected governments. This prompted the 52nd constitutional amendment to introduce the 'anti-defection' law through the Tenth Schedule in 1985. This Schedule provides that a member of a House of Parliament or State legislature who voluntarily gives up the membership of their 'political party' or votes against the instructions of their party in a House are liable for disqualification from such House. The 'political party' is the entire organisation of a party, while the 'legislature party' is all the members of a political party in a House of Parliament or State legislature.

The Tenth Schedule originally had two exceptions that would not render the members liable for disqualification viz., one-third of members of the 'legislature party' splitting to form a separate group (paragraph 3), or a merger of their 'political party' with another party that is approved by two-thirds of the members of its 'legislature party' (paragraph 4). However, considering the need to strengthen the 'anti-defection' law, paragraph 3 was omitted in 2003.

With the deletion of paragraph 3, there have been instances of two-third members of a legislature party 'practically' defecting but claiming to be the original political party in order to escape disqualification. This happened in the case of Shiv Sena and Nationalist Congress Party in June 2022 and July 2023 respectively.

There have also been instances where more than two-third members of a 'legislature party' in a house have merged themselves with another political party to escape disqualification. This happened in September 2019 (in Rajasthan) when all 6 Bahujan Samajwadi Party MLAs merged themselves with the Congress and in September 2022 (in Goa) when 8 out of the 11 Congress MLAs merged themselves with the BJP. The Bombay High Court upheld the merger of Goa's Congress Legislature Party with the BJP, though an appeal is pending in the apex court. A similar move occurred in April 2026 when 7 of 10 AAP Rajya Sabha MPs merged with the BJP.

What is the present case in Bengal?

After the recent West Bengal polls, around 60 of the 80 MLAs elected from Trinamool Congress formed a separate faction led by Ritabrata Banerjee, who was recognised as the Leader of Opposition in the State Assembly even after the party expelled him. Meanwhile, 20 of the 28 Lok Sabha MPs have submitted their decision to the Lok Sabha Speaker to merge themselves with the NCPI. Their claim is that they constitute two-thirds of the legislature party and are hence authorised to take this step under the provisions of the Tenth Schedule without attracting disqualification.

What may be way forward?

A plain reading of the Tenth Schedule allows only for merger of a political party with another party that is approved by two-thirds of its legislature party. It does not authorise two-thirds of the legislature party in a house to merge itself with another political party to claim immunity from defection. However, in the recent instance with respect to proposed merger of Trinamool Lok Sabha MPs with NCPI as well as the merger of Rajya Sabha MPs of AAP with the BJP, this is what has happened. It is also subject to interpretation whether a merger of an 'original political party' can happen only with another political party that already has members in the legislative house. Moreover, the authority to decide on the disqualification of members is vested in the Speaker or Chairman. While they are expected to perform this constitutional role impartially, the presiding officers have often favoured the ruling dispensation. The Supreme Court in K. M. Singh case in 2020, recommended that the Parliament amend the Constitution to vest these powers in an independent tribunal headed by judges.

An authoritative Supreme Court judgement in the matters of merger and setting up of an independent tribunal to decide on disqualification may reduce the ambiguities surrounding the Tenth Schedule. However, it may not prevent the ingenious methods adopted by political parties to circumvent the Tenth Schedule. Any such manoeuvres may be viewed as a betrayal of the electorate by the elected representatives. A stricter measure, as recommended by the Law commission in 1999, could be to amend the Tenth Schedule and delete paragraph 4 that provides exemption from disqualification for merger of political parties. Any action by elected members of a legislature party against their political party should lead to disqualification that results in seeking fresh mandate from the people.

Rangarajan R. is a former IAS officer and author of 'Courseware on Polity Simplified'. He currently trains at 'Officers IAS Academy'. Views expressed are personal.

17J6. What does the Tenth Schedule provide on party mergers?
दसवीं अनुसूची दलों के विलय के संबंध में क्या प्रावधान करती है?

- This prompted the **52nd Constitutional Amendment** to introduce the **Anti-Defection Law** through the **Tenth Schedule** in **1985**.
  इसी के परिणामस्वरूप **1985** में **52वें संविधान संशोधन** द्वारा **दसवीं अनुसूची** के माध्यम से **दल-बदल विरोधी कानून (Anti-Defection Law)** लागू किया गया।
- This Schedule provides that a member of a House of **Parliament** or **State Legislature** who voluntarily gives up the membership of their **political party** or votes against the instructions of

their party in a House is liable for **disqualification** from such House.
इस अनुसूची के अनुसार, **संसद** या **राज्य विधानमंडल** का कोई सदस्य यदि स्वेच्छा से अपनी **राजनीतिक पार्टी** की सदस्यता छोड़ देता है या सदन में पार्टी के निर्देशों के विरुद्ध मतदान करता है, तो वह **अयोग्यता (Disqualification)** का पात्र होगा।

- The **political party** is the entire organisation of a party, while the **legislature party** is all the members of a political party in a House of Parliament or State Legislature.
राजनीतिक पार्टी से तात्पर्य किसी दल के सम्पूर्ण संगठन से है, जबकि **विधायी दल (Legislature Party)** से तात्पर्य संसद या विधानमंडल के भीतर उस राजनीतिक दल के सभी निर्वाचित सदस्यों से है।
- The **Tenth Schedule** originally had two exceptions that would not render the members liable for disqualification viz., one-third of members of the **legislature party** splitting to form a separate group (**Paragraph 3**), or a merger of their **political party** with another party that is approved by **two-thirds** of the members of its legislature party (**Paragraph 4**).
प्रारंभिक रूप से **दसवीं अनुसूची** में दो अपवाद थे जिनके अंतर्गत सदस्य अयोग्यता से बच सकते थे, अर्थात् **विधायी दल** के एक-तिहाई सदस्यों द्वारा अलग समूह बनाना (**अनुच्छेद 3**) अथवा **राजनीतिक दल** का किसी अन्य दल में विलय, जिसे उसके विधायी दल के **दो-तिहाई सदस्यों** की स्वीकृति प्राप्त हो (**अनुच्छेद 4**)।
- However, considering the need to strengthen the **Anti-Defection Law**, **Paragraph 3** was omitted in **2003**.
हालाँकि, **दल-बदल विरोधी कानून** को सुदृढ़ बनाने की आवश्यकता को देखते हुए **2003** में **अनुच्छेद 3** को हटा दिया गया।
- With the deletion of **Paragraph 3**, there have been instances of **two-thirds members** of a legislature party 'practically' defecting but claiming to be the original political party in order to escape disqualification.
अनुच्छेद 3 हटाए जाने के बाद ऐसे उदाहरण सामने आए जहाँ किसी विधायी दल के **दो-तिहाई सदस्य** व्यावहारिक रूप से दल-बदल करते हुए भी स्वयं को मूल राजनीतिक दल बताकर अयोग्यता से बचने का प्रयास करते रहे।
- This happened in the case of **Shiv Sena** and **Nationalist Congress Party (NCP)** in **June 2022** and **July 2023** respectively.
ऐसा **शिवसेना** और **राष्ट्रवादी कांग्रेस पार्टी (NCP)** के मामलों में क्रमशः **जून 2022** और **जुलाई 2023** में हुआ।
- There have also been instances where more than **two-thirds members** of a legislature party in a House have merged themselves with another political party to escape disqualification.
ऐसे मामले भी सामने आए हैं जहाँ किसी सदन में विधायी दल के **दो-तिहाई से अधिक सदस्य** अयोग्यता से बचने के लिए स्वयं को किसी अन्य राजनीतिक दल में विलय कर लेते हैं।
- This happened in **September 2019** in **Rajasthan** when all **6 BSP MLAs** merged themselves with the **Congress** and in **September 2022** in **Goa** when **8 out of 11 Congress MLAs** merged themselves with the **BJP**.
ऐसा **सितंबर 2019** में **राजस्थान** में हुआ, जब **बहुजन समाज पार्टी (BSP)** के सभी **6 विधायक कांग्रेस** में शामिल हो गए, तथा **सितंबर 2022** में **गोवा** में हुआ, जब **कांग्रेस के 11 में से 8 विधायक भाजपा** में शामिल हो गए।
- The **Bombay High Court** upheld the merger of Goa's **Congress Legislature Party** with the **BJP**, though an appeal is pending in the **Supreme Court**.
बॉम्बे उच्च न्यायालय ने गोवा की **कांग्रेस विधायी दल** के **भाजपा** में विलय को वैध माना, हालांकि इस संबंध में **उच्चतम न्यायालय** में अपील लंबित है।
- A similar move occurred in **April 2026** when **7 of 10 AAP Rajya Sabha MPs** merged with the **BJP**.
इसी प्रकार की घटना **अप्रैल 2026** में हुई जब **आम आदमी पार्टी (AAP)** के **10 में से 7 राज्यसभा सांसद भाजपा** में शामिल हो गए।

- A plain reading of the **Tenth Schedule** allows only for the merger of a **political party** with another party that is approved by **two-thirds** of its legislature party.

दसवीं अनुसूची का सामान्य अध्ययन यह दर्शाता है कि केवल **राजनीतिक दल** का किसी अन्य दल में विलय ही मान्य है, बशर्ते उसे उसके विधायी दल के **दो-तिहाई सदस्यों** की स्वीकृति प्राप्त हो।

- It does not authorise **two-thirds of the legislature party** in a House to merge itself with another political party and claim immunity from defection.
  यह किसी सदन में **विधायी दल के दो-तिहाई सदस्यों** को स्वयं किसी अन्य दल में विलय होकर दल-बदल से प्रतिरक्षा प्राप्त करने की अनुमति नहीं देता।
- It is also subject to interpretation whether a merger of an **original political party** can occur only with another political party that already has members in the legislative House.
  यह भी व्याख्या का विषय है कि किसी **मूल राजनीतिक दल** का विलय केवल ऐसे दल में ही हो सकता है जिसके पहले से ही उस विधायी सदन में सदस्य हों।
- The **Supreme Court**, in the **K. M. Singh case (2020)**, recommended that **Parliament** amend the Constitution to vest these powers in an **independent tribunal** headed by judges.
  उच्चतम न्यायालय ने **के. एम. सिंह मामला (2020)** में अनुशंसा की थी कि **संसद** संविधान में संशोधन कर इन शक्तियों को न्यायाधीशों की अध्यक्षता वाले **स्वतंत्र न्यायाधिकरण** को सौंपे।
- An authoritative **Supreme Court judgement** on matters of merger and the establishment of an independent tribunal may reduce the ambiguities surrounding the **Tenth Schedule**.
  विलय संबंधी मामलों पर एक प्रामाणिक **उच्चतम न्यायालय निर्णय** तथा स्वतंत्र न्यायाधिकरण की स्थापना **दसवीं अनुसूची** से जुड़ी अस्पष्टताओं को कम कर सकती है।
- A stricter measure, as recommended by the **Law Commission (1999)**, could be to amend the **Tenth Schedule** and delete **Paragraph 4**, which provides exemption from disqualification for merger of political parties.
  विधि आयोग (1999) की अनुशंसा के अनुसार एक अधिक कठोर उपाय यह हो सकता है कि **दसवीं अनुसूची** में संशोधन कर **अनुच्छेद 4** को हटा दिया जाए, जो राजनीतिक दलों के विलय की स्थिति में अयोग्यता से छूट प्रदान करता है।

An employee of the Terratis company releases sterile male tiger mosquitoes in Montpellier, southern France, on June 5, 2026. With global warming, 80% of the world's population now runs the risk of being exposed to one or more infectious diseases long considered tropical, which cause more than a million deaths a year, according to the WHO.

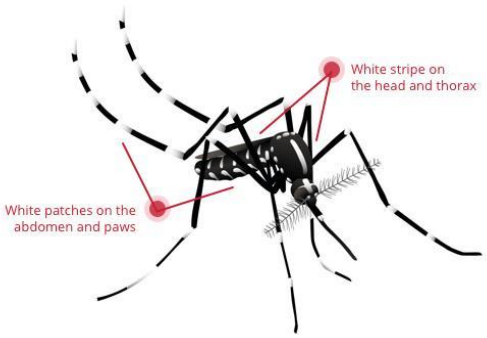
TIGER MOSQUITOES

6

Tiger mosquitoes are mosquitoes belonging mainly to the genus **Aedes**, especially:

- Aedes aegypti
- Aedes albopictus



They are called **"tiger mosquitoes"** because of their distinctive **black body with white stripes**, resembling a tiger's markings.

Identification

Aedes aegypti

- Black body
- White markings on legs
- Lyre-shaped white pattern on thorax

Aedes albopictus (Asian Tiger Mosquito)

- Black body
- Single white stripe running down the center of the thorax
- Prominent white bands on legs

Why Are They Important?

Tiger mosquitoes are among the world's most important disease vectors.

They transmit:

Disease	Pathogen
Dengue Fever	Dengue virus
Chikungunya	Chikungunya virus
Zika Virus Disease	Zika virus
Yellow Fever	Yellow fever virus
Rift Valley Fever	Rift Valley fever virus

PATRIOTIC

MSC Elsa 3 sinking: HC concerned over impact

GS II: Governance

The Hindu Bureau
KOCHI

Expressing serious concern over the absence of an environmental impact assessment (EIA) on the sinking of the ship *MSC Elsa 3* off the Alappuzha coast in May 2025, the Kerala High Court on Tuesday sought the response of the Centre and other agencies.

The court sought the response of the Ministry of Environment, Forests and Climate Change and the Director-General of Shipping on the marine and coastal ecological impacts caused by the wreckage.

They have been asked to detail the manner in which the EIA would be carried out, the institutions or agencies considered competent to undertake the exercise, and the scope of the study. In addition, the court must be informed whether any interim measures have been contemplated to address the environmental and navigational concerns due to the sinking of the vessel along with the containers aboard, said a Division Bench of Justice Raja Vijayaraghavan V. and Justice K.V. Jayakumar, while considering public interest litigation petitions filed by T.N. Pratapan and others.

Many of the containers were carrying hazardous cargo, including 339.20 tonnes of calcium carbide. An estimated 475 containers remain sunk with the ship. The court sought details of whether steps had been taken to engage an independent expert agency, scientific institution, or technical consultant to verify the findings contained in the reports relied upon by the ship's owners.

17J6. MSC Elsa 3 sinking: HC concerned over impact
MSC Elsa 3 के डूबने पर: उच्च न्यायालय प्रभाव को लेकर चिंतित

- **Expressing serious concern over the absence of an environmental impact assessment (EIA) on the sinking of the ship MSC Elsa 3 off the Alappuzha coast in May 2025, the Kerala High Court on Tuesday sought the response of the Centre and other agencies.**

मई 2025 में **अलप्पुझा तट** के निकट **MSC Elsa 3** जहाज के डूबने पर **पर्यावरणीय प्रभाव आकलन (EIA)** के अभाव को लेकर गंभीर चिंता व्यक्त करते हुए **केरल उच्च न्यायालय** ने मंगलवार को **केंद्र सरकार** तथा अन्य एजेंसियों से जवाब मांगा।

- The court sought the response of the **Ministry of Environment, Forests and Climate Change** and the **Director-General of Shipping** on the marine and coastal ecological impacts caused by the wreckage.

न्यायालय ने मलबे के कारण उत्पन्न **समुद्री** एवं **तटीय पारिस्थितिकीय प्रभावों** के संबंध में **पर्यावरण, वन एवं जलवायु परिवर्तन मंत्रालय** तथा **नौवहन महानिदेशक (Director-General of Shipping)** से जवाब मांगा।

- Many of the containers were carrying **hazardous cargo**, including **339.20 tonnes of calcium carbide**.

कई कंटेनरों में **खतरनाक माल (hazardous cargo)** था, जिसमें **339.20 टन कैल्शियम कार्बाइड** भी शामिल था।

Cough syrup can't be sold without prescription: govt.

GS II: Governance

The Hindu Bureau
NEW DELHI

Medicinal syrups, including those used to treat coughs, can no longer be bought without a doctor's prescription, according to a government notification issued on Tuesday. This means that over-the-counter sales of these syrups will no longer be allowed.

The Ministry of Health and Family Welfare notified the change to the Drugs Rules, 1945, which laid out the regulations pertaining to the Drugs and Cosmetics Act, 1940.

Tuesday's notification directed that the word 'syrups' be removed from the list of items that had been exempted from the provisions of the Act.

The rules had earlier specified that "Syrups, lozenges, pills and tablets for cough" would be exempted, meaning that cough lozenges, pills, and tablets will still be available over the counter.

The amendment follows a draft notification in December 2025 to which the Centre invited objections and suggestions from stakeholders and the public.

The government said all comments received on the draft rules were considered before the final notification was issued.

The Union Health Ministry notified the change to the Drugs Rules, 1945.

Many fatalities

The move comes after fatalities due to cough syrups adulterated with industrial solvents, including the deaths of 24 children in Madhya Pradesh last September. Cough syrups exported from India have been linked to the deaths of more than 140 children in Africa and Central Asia since 2022.

17J6. Cough syrup can't be sold without prescription: govt.
बिना चिकित्सकीय पर्चे के कफ सिरप नहीं बेचा जा सकता: सरकार

- **Medicinal syrups, including those used to treat coughs, can no longer be bought without a doctor's prescription, according to a government notification issued on Tuesday.**

मंगलवार को जारी एक सरकारी अधिसूचना के अनुसार, **खांसी के उपचार** में प्रयुक्त सिरप सहित **औषधीय सिरप** अब **डॉक्टर के पर्चे (Prescription)** के बिना नहीं खरीदे जा सकेंगे।

- This means that **over-the-counter sales** of these syrups will no longer be allowed.

इसका अर्थ है कि इन सिरपों की **ओवर-द-काउंटर (OTC) बिक्री** अब अनुमत नहीं होगी।

- The **Ministry of Health and Family Welfare** notified the change to the **Drugs Rules, 1945**, which laid out the regulations pertaining to the **Drugs and Cosmetics Act, 1940**.

1945 (Drugs Rules, 1945) में इस परिवर्तन को अधिसूचित किया, जो **औषधि एवं प्रसाधन सामग्री अधिनियम, 1940 (Drugs and Cosmetics Act, 1940)** से संबंधित विनियमों को निर्धारित करता है।

- Tuesday's notification directed that the word '**syrups**' be removed from the list of items that had been exempted from the provisions of the Act.
  मंगलवार की अधिसूचना में निर्देश दिया गया कि '**सिरप (Syrups)**' शब्द को उन वस्तुओं की सूची से हटाया जाए जिन्हें अधिनियम के प्रावधानों से छूट प्राप्त थी।
- The rules had earlier specified that "**Syrups, lozenges, pills and tablets for cough**" would be exempted, meaning that **cough lozenges, pills, and tablets** will still be available over the counter.
  नियमों में पहले यह निर्दिष्ट था कि "**खांसी के लिए सिरप, लॉजेंज, गोलियां और टैबलेट**" छूट प्राप्त होंगे, जिसका अर्थ है कि **खांसी के लॉजेंज, गोलियां और टैबलेट** अब भी बिना पर्चे के उपलब्ध रहेंगे।

Supreme Court seeks response from Centre, States on Aadhaar 'misuse'

GS II: Governance

The Hindu Bureau
NEW DELHI

The Supreme Court on Tuesday sought responses from the Centre and States on a plea alleging misuse of Aadhaar cards issued by the Unique Identification Authority of India (UIDAI) as proof of citizenship, domicile and residence.

The petition claimed that "infiltrators and illegal immigrants" are able to obtain the cards and project themselves as "lawful residents", thereby availing benefits to which they are not legally entitled.

A Bench of Chief Justice of India Surya Kant and Justice V. Mohana issued notice on the plea filed by advocate Ashwini Kumar Upadhyay.

The petition contended that the continued use of Aadhaar for purposes beyond identity verification is contrary to Section 9 of the Aadhaar Act, 2016, which expressly states that Aadhaar is not proof of citizenship or domicile.

It also relied on an August 2023 UIDAI notification clarifying that Aadhaar serves only as proof of identity and cannot be treated as proof of citizenship, residence or date of birth.

Electoral integrity

The plea also questioned the use of Aadhaar as proof of date of birth and residence in Form-6, the application form for fresh voter registration.

Mr. Upadhyay argued that allowing Aadhaar to be used for this purpose could undermine the integrity of the electoral process.

"Aadhaar is not only being used as proof of age, citizenship & domicile for school admission, property purchase, and to obtain birth certificate, ration card, driving licence, but also being used in the application form for new voter registration (Form-6) as proof of date of birth & proof of residence. And thus, infiltrators & illegal immigrants are obtaining various documents using the Aadhaar," the plea stated.

The petition claimed "infiltrators and illegal immigrants" are able to obtain the cards and project themselves as "lawful residents".

The plea contended that the continued use of Aadhaar for purposes beyond identity verification is contrary to Section 9 of the Aadhaar Act, 2016

Referring to what he described as the presence of a "huge number of illegal migrants" occupying "vast tracts of land, particularly along sensitive international borders", Mr. Upadhyay contended that the ease with which such persons can obtain Aadhaar cards enables them to secure other identity documents and eventually seek inclusion in electoral rolls.

"Infiltration is a weapon of political parties to subvert the electoral process for their benefit. West Bengal, Assam and other Northeastern States have been afflicted by cheap political tactics. The infiltrators are helped by either the party in power or the Opposition parties, and are also helped with identity documents such as Aadhaar/ration card. Once they have a plethora of documents, they enrol themselves in the voting list. Thus, the sacrosanct nature of the election process is compromised," the plea stated.

'Complete overhaul'

Accordingly, the petition sought an complete overhaul of the verification framework used in electoral processes and proposed the establishment of a high-powered monitoring committee comprising a retired Supreme Court judge along with cybersecurity and forensic experts to oversee reforms.

It also prayed for a direction "to declare that the use of Aadhaar as proof of date of birth and residence in the application form for new voter registration" is contrary to statutory provisions and therefore liable to be declared "void and inoperative".

The plea also prayed for a direction to declare the use of Aadhaar for voter date-of-birth and residence verification as "void and inoperative".

17J6. Supreme Court seeks response from Centre, States on Aadhaar 'misuse' उच्चतम न्यायालय ने आधार के 'दुरुपयोग' पर केंद्र और राज्यों से जवाब माँगा

- **The Supreme Court on Tuesday sought responses from the Centre and States on a plea alleging misuse of Aadhaar cards issued by the Unique Identification Authority of India (UIDAI) as proof of citizenship, domicile and residence.**

उच्चतम न्यायालय ने मंगलवार को **भारतीय विशिष्ट पहचान प्राधिकरण (UIDAI)** द्वारा जारी **आधार कार्ड** के **नागरिकता**, **अधिवास (Domicile)** तथा **निवास** के प्रमाण के रूप में कथित दुरुपयोग संबंधी याचिका पर **केंद्र** और **राज्य सरकारों** से जवाब मांगा।

- The petition contended that the continued use of Aadhaar for purposes beyond **identity verification** is contrary to **Section 9 of the Aadhaar Act, 2016**, which expressly states that Aadhaar is not proof of citizenship or domicile.
  याचिका में तर्क दिया गया कि **पहचान सत्यापन (Identity Verification)** से परे उद्देश्यों के लिए आधार का निरंतर उपयोग **आधार अधिनियम, 2016 की धारा 9** के विपरीत है, जिसमें स्पष्ट रूप से कहा गया है कि आधार **नागरिकता** या **अधिवास** का प्रमाण नहीं है।
- It also relied on an **August 2023 UIDAI notification** clarifying that Aadhaar serves only as proof of identity and cannot be treated as proof of citizenship, residence or date of birth.
  याचिका में **अगस्त 2023 की UIDAI अधिसूचना** का भी उल्लेख किया गया, जिसमें स्पष्ट किया गया था कि आधार केवल **पहचान का प्रमाण** है और इसे **नागरिकता**, **निवास** अथवा **जन्म तिथि** के प्रमाण के रूप में नहीं माना जा सकता।

Electoral integrity
निर्वाचन प्रक्रिया की अखंडता

- The plea also questioned the use of Aadhaar as proof of date of birth and residence in **Form-6**, the application form for fresh voter registration.
  याचिका में नए मतदाता पंजीकरण हेतु प्रयुक्त **फॉर्म-6** में आधार को **जन्म तिथि** और **निवास प्रमाण** के रूप में स्वीकार किए जाने पर भी प्रश्न उठाया गया।
- "**Aadhaar is not only being used as proof of age, citizenship & domicile for school admission, property purchase, and to obtain birth certificate, ration card, driving licence, but also being used in the application form for new voter registration (Form-6) as proof of date of birth & proof of residence. And thus, infiltrators & illegal immigrants are obtaining various documents using the Aadhaar,**" the plea stated.
  याचिका में कहा गया कि "**आधार का उपयोग केवल स्कूल प्रवेश, संपत्ति खरीद, जन्म प्रमाण-पत्र, राशन कार्ड और ड्राइविंग लाइसेंस प्राप्त करने के लिए आयु, नागरिकता एवं अधिवास के प्रमाण के रूप में ही नहीं किया जा रहा है, बल्कि नए मतदाता पंजीकरण (फॉर्म-6) में जन्म तिथि और निवास प्रमाण के रूप में भी किया जा रहा है। इस प्रकार, घुसपैठिए और अवैध प्रवासी आधार के माध्यम से विभिन्न दस्तावेज प्राप्त कर रहे हैं।**"
- "**Infiltration is a weapon of political parties to subvert the electoral process for their benefit. West Bengal, Assam and other Northeastern States have been afflicted by cheap political tactics. The infiltrators are helped by either the party in power or the Opposition parties, and are also helped with identity documents such as Aadhaar/ration card. Once they have a plethora of documents, they enrol themselves in the voting list. Thus, the sacrosanct nature of the election process is compromised,**" the plea stated.
  याचिका में कहा गया कि "**घुसपैठ राजनीतिक दलों द्वारा अपने लाभ के लिए निर्वाचन प्रक्रिया को प्रभावित करने का एक साधन बन गई है। पश्चिम बंगाल, असम और अन्य पूर्वोत्तर राज्य सस्ती राजनीतिक रणनीतियों से प्रभावित हुए हैं। घुसपैठियों को सत्तारूढ़ या विपक्षी दलों द्वारा सहायता दी जाती है तथा उन्हें आधार और राशन कार्ड जैसे पहचान दस्तावेज उपलब्ध कराए जाते हैं। एक बार पर्याप्त दस्तावेज प्राप्त हो जाने पर वे स्वयं को मतदाता सूची में दर्ज करा लेते हैं। इस प्रकार चुनाव प्रक्रिया की पवित्रता प्रभावित होती है।**"

'Complete overhaul'
'पूर्ण पुनर्गठन'

GS II: Governance

Primed to treat

The Kerala story in containing Nipah has lessons for pandemic preparedness

The emergence of a case of the Nipah virus in Kerala and the subsequent control in the State is indicative of two things: first, Kerala's own mix of ecological factors and anthropogenic activity that makes it vulnerable every monsoon season to the possibility of Nipah spreading, the hosts being fruit bats. Second, the fact that there has been just a single case so far is testament to the robustness of the health systems in place in Kerala. The World Health Organization (WHO) has classified Nipah a priority pathogen, accounting for its lethality, potential to cause outbreaks, even a pandemic. It is just one of several pathogens that WHO has flagged for Kerala – including avian influenza and Kyasanur Forest Disease. Kerala has, at the moment, one active case of 43-year-old man from Ramanattukara in Kozhikode. He remains on ventilator support at the Kozhikode Government Hospital. No fresh cases have come up since then, after intensive contact tracing and screening. The 2018 Nipah outbreak, immortalised in film and art, which caused 17 deaths, and affected 23 people (18 lab confirmed), spread primarily on person-to-person contact, with the index patient reportedly transmitting the virus to 15 others, including healthcare workers. Since then it has had cases/outbreaks in 2019, 2021, 2023, 2024, and 2025. Historically in India, a devastating outbreak was noted in 2001 in West Bengal, and later, a few cases were detected again, in 2007. Earlier this year, on January 26, 2026, two laboratory-confirmed cases of Nipah virus infection were reported from West Bengal, both health-care workers. This was also contained and no further cases were reported.

It is clear that human activity on the fringes of forest zones, encroaching into traditional habitats of the fruit bats, has a central role to play in the transmission of the virus; in time, this originally zoonotic infection jumped to humans. Repeatedly, the source of infection has been traced to consuming contaminated fruits, or contact with water sources contaminated by bats. This also indicates that the overall approach should be from a One Health perspective, considering environmental and animal interplays with humans, and not a mere health-care angle. The State's history of Nipah outbreaks and its learnings have enabled it to prime its health system to meet such health emergencies, at the primary and secondary hospitals itself. This is the other lesson from Kerala for pandemic preparedness. Its system has become adept at maintaining a high index of suspicion for cases of acute encephalitis; watching out for clusters, and with clinical efficiency, deploying protocols to control further spread and reach all those who need medical assistance.

- Accordingly, the petition sought a **complete overhaul** of the verification framework used in electoral processes and proposed the establishment of a **high-powered monitoring committee** comprising a retired Supreme Court judge along with cybersecurity and forensic experts to oversee reforms.

तदनुसार, याचिका में निर्वाचन प्रक्रियाओं में प्रयुक्त **सत्यापन ढांचे के पूर्ण पुनर्गठन** की मांग की गई तथा सुधारों की निगरानी के लिए एक **उच्चस्तरीय निगरानी समिति** गठित करने का प्रस्ताव रखा गया, जिसमें एक सेवानिवृत्त **उच्चतम न्यायालय के न्यायाधीश**, **साइबर सुरक्षा विशेषज्ञ** तथा **फॉरेंसिक विशेषज्ञ** शामिल हों।

17J6. Primed to treat
उपचार के लिए तैयार

- The emergence of a case of the **Nipah virus** in **Kerala** and the subsequent control in the State is indicative of two things: first, Kerala's own mix of **ecological factors** and **anthropogenic activity** that makes it vulnerable every monsoon season to the possibility of Nipah spreading, the hosts being **fruit bats**.

केरल में **निपाह वायरस** के एक मामले का सामने आना और उसके बाद राज्य में उस पर नियंत्रण स्थापित किया जाना दो बातों का संकेत देता है: पहली, केरल में मौजूद **पारिस्थितिकीय कारकों** और **मानवजनित गतिविधियों** का ऐसा मिश्रण, जो प्रत्येक मानसून ऋतु में **फलाहारी चमगादड़ों** द्वारा निपाह के प्रसार की संभावना के प्रति इसे संवेदनशील बनाता है।

- The **World Health Organization (WHO)** has classified **Nipah** a **priority pathogen**, accounting for its lethality, potential to cause outbreaks, even a pandemic.

विश्व स्वास्थ्य संगठन (WHO) ने **निपाह** को एक **प्राथमिकता प्राप्त रोगजनक** के रूप में वर्गीकृत किया है, क्योंकि यह अत्यधिक घातक है तथा प्रकोप और यहाँ तक कि महामारी उत्पन्न करने की क्षमता रखता है।

- It is just one of several pathogens that **WHO** has flagged for Kerala — including **avian influenza** and **Kyasanur Forest Disease**.

यह उन अनेक रोगजनकों में से एक है जिनके प्रति **WHO** ने केरल को सतर्क किया है, जिनमें **एवियन इन्फ्लुएंजा** और **क्यासानूर वन रोग** भी शामिल हैं।

- It is clear that **human activity** on the fringes of **forest zones**, encroaching into traditional habitats of the **fruit bats**, has a central role to play in the transmission of the virus; in time, this originally **zoonotic infection** jumped to humans.

यह स्पष्ट है कि **वन क्षेत्रों** की सीमाओं पर होने वाली **मानवीय गतिविधियाँ**, जो **फलाहारी चमगादड़ों** के पारंपरिक आवासों में अतिक्रमण करती हैं, वायरस के प्रसार में केंद्रीय भूमिका निभाती हैं; समय के साथ यह मूलतः **जन्तुजन्य संक्रमण** मनुष्यों में फैल गया।

- Repeatedly, the source of infection has been traced to consuming **contaminated fruits**, or contact with **water sources** contaminated by bats.

बार-बार संक्रमण के स्रोत को **दूषित फलों** के सेवन अथवा चमगादड़ों द्वारा दूषित किए गए **जल स्रोतों** के संपर्क से जोड़ा गया है।

- This also indicates that the overall approach should be from a **One Health perspective**, considering **environmental** and **animal** interplays with humans, and not a mere **health-care** angle.

यह भी इंगित करता है कि समग्र दृष्टिकोण **वन हेल्थ परिप्रेक्ष्य** पर आधारित होना चाहिए, जिसमें मनुष्यों के साथ **पर्यावरणीय** और **पशु-संबंधी** अंतःक्रियाओं को भी ध्यान में रखा जाए, न कि केवल **स्वास्थ्य सेवा** के दृष्टिकोण को।

- Its system has become adept at maintaining a high index of suspicion for cases of **acute encephalitis**; watching out for **clusters**, and with **clinical efficiency**, deploying protocols to control further spread and reach all those who need medical assistance.
  इसकी प्रणाली **तीव्र मस्तिष्कशोथ (Acute Encephalitis)** के मामलों के प्रति उच्च स्तर की सतर्कता बनाए रखने, संभावित **समूहगत मामलों (Clusters)** पर निगरानी रखने तथा **नैदानिक दक्षता** के साथ ऐसे प्रोटोकॉल लागू करने में सक्षम हो गई है, जो संक्रमण के आगे प्रसार को नियंत्रित करें और चिकित्सा सहायता की आवश्यकता वाले सभी लोगों तक पहुँच सुनिश्चित करें।

Avian Influenza (Bird Flu) and Kyasanur Forest Disease

- These are both **zoonotic diseases** (diseases transmitted from animals to humans), but they differ significantly in their causative agents, reservoirs, transmission, and geographical distribution.

Feature	Avian Influenza (Bird Flu)	Kyasanur Forest Disease (KFD)
Causative Agent	Influenza A virus (commonly H5N1, H5N8, H7N9)	Kyasanur Forest Disease Virus (KFDV), a Flavivirus
Disease Type	Viral respiratory disease	Viral hemorrhagic fever
Reservoir	Wild aquatic birds (ducks, geese, migratory birds)	Small mammals, rodents, shrews; monkeys act as amplifying hosts
Vector	No vector; direct transmission from infected birds	Tick-borne disease (mainly *Haemaphysalis* ticks)
Transmission to Humans	Contact with infected birds, poultry, droppings, contaminated surfaces	Bite of infected ticks or contact with infected animals
Human-to-Human Transmission	Very rare	Not known to occur
Main Symptoms	Fever, cough, sore throat, pneumonia, respiratory distress	High fever, headache, muscle pain, bleeding tendencies, weakness
Mortality	**Can be high in severe strains like H5N1**	**Around 3–10%**

Geographical Distribution	Worldwide, especially along migratory bird routes	Endemic mainly in Western Ghats region of India
Vaccine Availability	Poultry vaccines available; limited human vaccines	KFD vaccine available in endemic areas of India

Five solutions Indian cities need, to stop fighting for water week after week

Water-secure cities require a combination of clear and transparent emergency planning, systematic reduction of water losses through leak repairs, collective efforts to curb demand, strong safeguards to ensure water quality during shortages, and better management and reuse of wastewater

GS II: Governance

Manish Dubey
K.V. Santhosh Ragavan

Urban India's water emergency is no longer a future risk. It has become the normal of our summers. From high-rises anxiously tracking tanker schedules to informal settlements queuing at a single standpost, every year brings the same mix of dry taps, frayed tempers, and quiet resignation.

This summer, residents in parts of New Delhi have already faced days without piped water supply and large families have had to make do with just one 20-litre water can for a day. The Delhi Jal Board has reportedly planned to deploy more than 1,000 tankers to manage the crisis. Similar scenes have played out in other major cities, including Chennai, Bengaluru, and Hyderabad, over the last few summers.

Unfortunately, India still treats this as a seasonal inconvenience to endure until the clouds arrive.

Most cities source their water from reservoirs, groundwater or a combination of both. The annual summer water shortage however is the result of choices made over years. Cities have grown faster than their systems. Lakes and tanks have been built over. People are consuming groundwater faster than it can be replenished.

Cities often focus on finding new water sources instead of fixing and maintaining existing networks. Choices around development planning and control, enforcement of groundwater regulations, water use and wastewater management, made by all – from every individual to service providers to policymakers – shape the experience each summer.

Many cities have moved from nearby rivers and lakes to distant sources and rapidly depleting groundwater, sinking more borewells and laying longer pipelines. What looks like a sudden shortage is often the result of this slow erosion of local buffers. At the same time, lakes, tanks, ponds and stormwater channels that once softened both floods and droughts have been encroached upon or converted, so a few hours of intense rain can flood streets and, a few weeks later, the same city is again queuing for tankers.

Beyond short-term coping

For many residents, especially in poorer settlements and smaller towns, the crisis is also about quality. Intermittent supply, leaky pipes, and unsafe storage mean that even when water arrives, it may not be safe to drink. The familiar scenes of tankers, angry protests, and frantic borewell drilling are therefore not one-offs. They are symptoms of a chronic condition that shows up in illness, lost workdays and mounting bills.

If we accept this, we will also realise that coping from week to week is no longer enough.

First, every city needs an honest and public emergency water plan. Residents should not have to rely on rumours to know what is happening. A basic plan would identify the most vulnerable wards and critical facilities, set simple rules for how water will be prioritised when supplies are tight such as duration and frequency of supply to enable better tail end distribution, and commit to regular public updates on storage levels and expected supply. Where such information is shared clearly, it manages expectations and reduces grievances; this is less about technology than about treating information as part of the service.

Second, a concerted effort must be made to recover water that is already in the system but never reaches the taps. Instead of announcing distant, expensive new sources, cities can launch a time-bound 'leak hunt' in the worst-affected zones: walk key stretches of the network, fix visible leaks quickly, use simple tools to detect hidden ones, and set a short-term target for cutting losses. In systems where a large share – nearly 30% – of water is lost before it reaches users, even modest reductions in a few high-loss areas is equivalent to creating a new local source without building a new pipeline.

Third, government buildings, big campuses and commercial complexes are among the steadiest consumers of water. And a quick internal audit, basic leak repairs, and simple efficiency measures over the next month can free up meaningful volumes and set an example. Neighbourhoods and resident groups can agree on clear norms for peak months, limiting non-essential uses, tracking weekly consumption and asking tanker suppliers where they draw their water from – while local leaders in low-income areas help authorities see how supply actually reaches their lanes.

Fourth, any emergency response must include water quality: rapid testing in high-risk neighbourhoods and tanker water supply, temporary support for basic treatment where problems are found, and simple communication about safe storage.

Finally, water security cannot be achieved without improving how we manage used-water. Measures to reduce leaks in water pipelines should also be used on sewer networks to identify and stop major sewage exfiltration and prevent contamination.

Not a single solution

Quick, low-cost upgrades to used-water treatment plants such as, optimising aeration, de-weeding, and desludging, can further reduce pollution and help augment available surface- and ground-water resources.

No single measure will pull Indian cities out of their water emergency. Together, however, they can directly address the summer's pain points: unpredictability, waste, inequity, and illness.

Manish Dubey is Dean & Rahul Bajaj Chair, School of Governance, Indian Institute for Human Settlements (IIHS). K.V. Santhosh Ragavan is Adjunct Faculty, IIHS.

17J6. Five solutions Indian cities need, to stop fighting for water week after week

भारतीय शहरों को बार-बार जल संकट से जूझने से रोकने के लिए पाँच समाधान आवश्यक

- **Water-secure cities** require a combination of clear and transparent **emergency planning**, systematic reduction of **water losses** through **leak repairs**, collective efforts to curb **demand**, strong safeguards to ensure **water quality** during shortages, and better management and reuse of **wastewater**.
  Fourth, any emergency response must include water quality: rapid testing in high-risk neighbourhoods and tanker water supply, temporary support for basic treatment where problems are found, and simple communication about safe storage.

चतुर्थ, किसी भी आपातकालीन प्रतिक्रिया में जल गुणवत्ता को शामिल करना आवश्यक है; उच्च जोखिम वाले क्षेत्रों तथा टैंकर जलापूर्ति का त्वरित परीक्षण, समस्या मिलने पर मूलभूत उपचार के लिए अस्थायी सहायता तथा सुरक्षित भंडारण के संबंध में सरल जनसंचार किया जाना चाहिए।

- **Finally, water security cannot be achieved without improving how we manage used-water.**
  अंततः, उपयोग किए गए जल के प्रबंधन में सुधार किए बिना जल सुरक्षा प्राप्त नहीं की जा सकती।

- Quick, low-cost upgrades to **used-water treatment plants** such as optimising **aeration**, **de-weeding**, and **desludging**, can further reduce pollution and help augment available **surface-water** and **groundwater resources**.
  अपशिष्ट जल शोधन संयंत्रों में **वातन (Aeration)** का अनुकूलन, **खरपतवार निष्कासन (De-weeding)** तथा **गाद निष्कासन (Desludging)** जैसे त्वरित और कम लागत वाले उन्नयन प्रदूषण को और कम कर सकते हैं तथा उपलब्ध **सतही जल** एवं **भूजल संसाधनों** को बढ़ाने में सहायता कर सकते हैं।

IORA examining Canada's request to be observer

GS II: IR

Saptaparno Ghosh
NEW DELHI

Canada's application to become an observer in the Indian Ocean Rim Association (IORA) "is being examined" at the 28th meeting of the Committee of Senior Officials being held in New Delhi, Sanjiv Ranjan, IORA's Secretary-General, told *The Hindu* on Monday.

"Canada has made an application to become a dialogue partner of the organisation, and it is being examined at this meeting," he said.

Mr. Ranjan added member states could benefit from Canada's potential inclusion into the fold considering its expertise in varied maritime domains.

"They [Canada] are a big maritime power because of the huge coastal zones they have, they also have various initiatives and expertise in maritime safety, security and connectivity, among other areas, which would be of help to other member states of the organisation," he said.

Sanjiv Ranjan

Mr. Ranjan welcomed the potential peace deal between Iran and the U.S. that could end more than 100 days of hostilities in the Strait of Hormuz.

"It is a welcome thing that we may have an agreement by the end of this week as has been reported," he said.

Listing out priorities in the Indian Ocean, Mr. Ranjan said disaster response and mitigation remain a priority for IORA. He said the adverse impact of climate change would be "disproportionate" in the Indian Ocean. "Therefore, we must be ready in dealing with that," he said.

17J6. IORA examining Canada's request to be observer

हिंद महासागर रिम संघ (IORA) कनाडा के पर्यवेक्षक बनने के अनुरोध की समीक्षा कर रहा है

- **Canada's application to become an observer in the Indian Ocean Rim Association (IORA) "is being examined" at the 28th meeting of the Committee of Senior Officials being held in New Delhi, Sanjiv Ranjan, IORA's Secretary-General, told The Hindu on Monday.**

हिंद महासागर रिम संघ (IORA) में **पर्यवेक्षक (Observer)** बनने के लिए **कनाडा** के आवेदन की "जांच की जा रही है", यह जानकारी **IORA के महासचिव संजीव रंजन** ने सोमवार को *द हिंदू* को दी। यह विषय **नई दिल्ली** में आयोजित **वरिष्ठ अधिकारियों की समिति (Committee of Senior Officials)** की **28वीं बैठक** में विचाराधीन है।

- "**Canada has made an application to become a dialogue partner of the organisation, and it is being examined at this meeting,**" he said.

उन्होंने कहा, "**कनाडा ने संगठन का संवाद भागीदार (Dialogue Partner) बनने के लिए आवेदन किया है और इस बैठक में उस पर विचार किया जा रहा है।**"

- Mr. Ranjan added member states could benefit from Canada's potential inclusion into the fold considering its expertise in varied **maritime domains**.

श्री रंजन ने कहा कि विभिन्न **समुद्री क्षेत्रों (Maritime Domains)** में कनाडा की विशेषज्ञता को देखते हुए उसके संभावित शामिल होने से सदस्य देशों को लाभ हो सकता है।

- "**They [Canada] are a big maritime power because of the huge coastal zones they have, they also have various initiatives and expertise in maritime safety, security and connectivity, among other areas, which would be of help to other member states of the organisation,**" he said.

उन्होंने कहा, "**कनाडा एक प्रमुख समुद्री शक्ति है क्योंकि उसके पास विशाल तटीय क्षेत्र हैं। इसके अतिरिक्त, उसके पास समुद्री सुरक्षा, संरक्षा, संपर्कता तथा अन्य क्षेत्रों में अनेक पहलें और विशेषज्ञता हैं, जो संगठन के अन्य सदस्य देशों के लिए उपयोगी सिद्ध होंगी।**"

- Mr. Ranjan welcomed the potential **peace deal** between **Iran** and the **U.S.** that could end more than **100 days of hostilities** in the **Strait of Hormuz**.

श्री रंजन ने **ईरान** और **अमेरिका** के बीच संभावित **शांति समझौते** का स्वागत किया, जिससे **हॉर्मुज़ जलडमरूमध्य (Strait of Hormuz)** में **100 दिनों से अधिक समय से जारी शत्रुता** समाप्त हो सकती है।

- "**It is a welcome thing that we may have an agreement by the end of this week as has been reported,**" he said.

उन्होंने कहा, "**यह स्वागतयोग्य बात है कि रिपोर्टों के अनुसार इस सप्ताह के अंत तक एक समझौता हो सकता है।**"

- Listing out priorities in the **Indian Ocean**, Mr. Ranjan said **disaster response and mitigation** remain a priority for IORA.
  हिंद महासागर क्षेत्र की प्राथमिकताओं का उल्लेख करते हुए श्री रंजन ने कहा कि **आपदा प्रतिक्रिया (Disaster Response)** और **आपदा शमन (Mitigation)** IORA की प्रमुख प्राथमिकताओं में बने हुए हैं।
- He said the adverse impact of **climate change** would be "**disproportionate**" in the Indian Ocean.
  उन्होंने कहा कि **जलवायु परिवर्तन** का प्रतिकूल प्रभाव हिंद महासागर क्षेत्र में "**असमानुपातिक रूप से अधिक (Disproportionate)**" होगा।
- "**Therefore, we must be ready in dealing with that,**" he said.
  उन्होंने कहा, "**इसलिए हमें उससे निपटने के लिए तैयार रहना चाहिए।**"

GS II: IR

Limits of America

Iran won the war by merely denying the United States a victory

Israel and the U.S. launched their war on Iran on February 28 to bring about regime change in Tehran, destroy its nuclear and missile capabilities and end its support for non-state actors such as Hamas, Hezbollah and Houthis. More than 100 days later, on June 15, the U.S. reached a memorandum of understanding (MoU) with Iran to end fighting, lift the blockades in the Strait of Hormuz and the Gulf of Oman – disruptions that did not exist before the war – and pave the way for more substantive talks on the nuclear question, while Israel, frustrated and isolated, is watching from the sidelines. That U.S. President Donald Trump pushed ahead despite Israeli objection underscores how dramatically the region's strategic landscape has shifted. Left with few viable military options to make Iran submit to America's maximalist demands, or to reopen the Strait of Hormuz, Mr. Trump ultimately turned to a phased diplomatic approach: a preliminary agreement now, followed by negotiations on a final deal. Iranian officials say the arrangement would include the release of some frozen assets and reparations for Tehran as part of a broader regional ceasefire agreement. Core issues such as Iran's nuclear programme and western sanctions would be discussed next.

The MoU is only the first step on a long and difficult road to peace and stability. Mr. Trump's immediate challenge is to prevent a fresh outbreak of hostilities between the U.S. and Iran, or Israel and Iran, while nuclear negotiations remain under way. His biggest strategic mistake was his belief, shared by Israel, that there was a military solution to the Iranian nuclear issue. Washington underestimated Iran's resolve, strategic depth and geographical advantages. As Henry Kissinger put it, "the guerrilla wins if he does not lose". Iran won this war by not losing while the U.S., the most powerful country, lost it by failing to achieve its goals. With the nuclear talks set to resume, Mr. Trump finds himself in a weaker position today than the one Barack Obama occupied when he held talks with Iran in 2013-15. Nevertheless, the prospects for a negotiated outcome are still real as Iran urgently needs long-term economic relief. One potential disruptor, however, could be Israel, which has said it would not withdraw from occupied Southern Lebanon. Iran and the U.S. should rein in their respective allies, Hezbollah and Israel; Tehran should also take measures to instil confidence in the process. It has already demonstrated its deterrence by taking control of the Strait of Hormuz. It must now reopen the waterway in exchange for the U.S. removing its blockade. Iran and the U.S. should remain focused on diplomacy, resist potential Israeli efforts to sabotage the process, and work towards restoring stability in West Asia.

17J6. Limits of America
अमेरिका की सीमाएँ

- **Israel** and the **U.S.** launched their war on **Iran** on February 28 to bring about **regime change** in **Tehran**, destroy its **nuclear** and **missile capabilities** and end its support for **non-state actors** such as **Hamas**, **Hezbollah** and **Houthis**.

इज़राइल और **अमेरिका** ने 28 फरवरी को **ईरान** के विरुद्ध युद्ध प्रारम्भ किया, जिसका उद्देश्य **तेहरान** में **शासन परिवर्तन** लाना, उसकी **परमाणु** एवं **मिसाइल क्षमताओं** को नष्ट करना तथा **हमास**, **हिज़्बुल्लाह** और **हूती** जैसे **गैर-राज्यीय अभिनेताओं** को दिए जा रहे उसके समर्थन को समाप्त करना था।

- More than **100 days** later, on June 15, the **U.S.** reached a **memorandum of understanding (MoU)** with **Iran** to end fighting, lift the blockades in the **Strait of Hormuz** and the **Gulf of Oman** — disruptions that did not exist before the war — and pave the way for more substantive talks on the **nuclear question**, while **Israel**, frustrated and isolated, is watching from the sidelines.

100 दिनों से अधिक समय बाद, 15 जून को, **अमेरिका** ने **ईरान** के साथ एक **समझौता ज्ञापन (MoU)** किया, जिसका उद्देश्य संघर्ष समाप्त करना, **हॉर्मुज़ जलडमरूमध्य** और **ओमान की खाड़ी** में लगाए गए अवरोधों को हटाना — जो युद्ध से पूर्व अस्तित्व में नहीं थे — तथा **परमाणु मुद्दे** पर अधिक सार्थक वार्ताओं का मार्ग प्रशस्त करना था, जबकि निराश और अलग-थलग पड़ा **इज़राइल** किनारे से यह सब देख रहा है।

- **Iranian officials** say the arrangement would include the release of some **frozen assets** and **reparations** for **Tehran** as part of a broader regional **ceasefire agreement**.

ईरानी अधिकारियों का कहना है कि इस व्यवस्था में **तेहरान** के लिए कुछ **जमे हुए परिसंपत्तियों** की रिहाई और **क्षतिपूर्ति** भी शामिल होगी, जो एक व्यापक क्षेत्रीय **युद्धविराम समझौते** का हिस्सा होगी।

- **Washington** underestimated **Iran's** resolve, strategic depth and geographical advantages.

वॉशिंगटन ने **ईरान** के संकल्प, रणनीतिक गहराई और भौगोलिक लाभों को कम करके आँका।

- As **Henry Kissinger** put it, "the guerrilla wins if he does not lose".

जैसा कि **हेनरी किसिंजर** ने कहा था, "गुरिल्ला तब जीतता है जब वह हारता नहीं है।"

- **Iran** won this war by not losing while the **U.S.**, the most powerful country, lost it by failing to achieve its goals.

ईरान ने यह युद्ध हारने से बचकर जीता, जबकि विश्व की सबसे शक्तिशाली शक्ति **अमेरिका** अपने उद्देश्यों को प्राप्त करने में विफल रहकर हार गया।

- One potential disruptor, however, could be **Israel**, which has said it would not withdraw from occupied **Southern Lebanon**.
  हालाँकि, एक संभावित बाधा **इज़राइल** हो सकता है, जिसने कहा है कि वह कब्जे वाले **दक्षिणी लेबनान** से पीछे नहीं हटेगा।
- **Iran** and the **U.S.** should rein in their respective allies, **Hezbollah** and **Israel**; **Tehran** should also take measures to instil confidence in the process.
  ईरान और **अमेरिका** को अपने-अपने सहयोगियों, **हिज़्बुल्लाह** और **इज़राइल**, को नियंत्रित करना चाहिए; साथ ही **तेहरान** को भी इस प्रक्रिया में विश्वास उत्पन्न करने हेतु कदम उठाने चाहिए।
- It has already demonstrated its **deterrence** by taking control of the **Strait of Hormuz**.
  वह **हॉर्मुज़ जलडमरूमध्य** पर नियंत्रण स्थापित करके अपनी **निरोधक क्षमता** का प्रदर्शन पहले ही कर चुका है।

A nation determined to endure and overcome

GS II: IR: West Asia

Hamid Ansari
Former Vice-President of India

The history of Iran is replete with paradoxes and exceptions. It is a land of great contrasts both in climate and geography and is inhabited by, in the words of an ancient historian, "a poor people with a proud spirit." Given its location, the Iranian people and its rulers have interacted with its neighbouring states throughout history both as their oppressors and as victims.

Over the past two centuries, Iran has oscillated between extremes as the country searched for a viable response to the multiple challenges of Western style modernity. Under the Qajar and Pahlavi dynasties, it sought for an emulation of all things Western until the Islamic Revolution of 1979 reversed the trend and brought forth a new prototype.

The decline of the Shah

The discovery of oil in the country in 1901 had led to the formation of the Anglo-Iranian Oil Company (AIOC) with the British government holding almost half its shares. However, post World War II, its nationalisation in 1953 resulted in tensions with Western powers, which led to the active involvement of the CIA (Central Intelligence Agency) in overthrowing the then Mosaddeq government. The U.S. then became the deciding factor in resolving the Anglo-Iranian nationalisation dispute.

Developments in the global oil market saw Iranian oil revenues increase from $2 billion to $20 billion in 1974. This resulted in poorly conceived and badly implemented programmes of socio-economic and military modernisation by the Shah; his so-called White Revolution (a series of reforms to modernise Iran) and 'Great Civilisation' projects (highlighted by the 2,500th anniversary of the Iranian monarchy) were not successful and were widely resented within Iran. The major sources of opposition were political organisations from both the left and the right; pro-democracy reformists; merchants and bazaaris; and the *ulema* (recognised scholars of Islam).

In addition, and despite "parallelism of interests" between the two countries, the presence of Americans everywhere was resented by the Iranian public. As James Bill put it in his book *The Eagle and the Lion*, "the very best and very worst of America were on display in the cities of Iran." In the 1970s, according to a contemporary observer, "the political culture of the Shah's regime both became more repressive and hardened on the one hand, and more remote and attenuated on the other." The subsequent 'progress' in U.S.-Iran relations emanated from wrong policies, misunderstandings and cultural misperceptions. These together contributed to the U.S. becoming in the eyes of Iran, the 'Great Satan'.

In the 1970s, the U.S. actually encouraged Iran to develop nuclear power arguing that the country would eventually run out of oil

Also in the 1970s, the U.S. encouraged Iran to develop nuclear power arguing that the country would eventually run out of oil. The Shah also periodically hinted that he wanted Iran to build nuclear weapons and, in response to official denials, said Iran "has no intention of acquiring [them] but if small states began building them, then Iran might to reconsider its policy." U.S. documents of that period suggest that it was in the U.S.'s national interest, both with respect to the economy and security, to have Iran acquire nuclear power.

However, by the end of 1977, the Shah had alienated the *ulema*, estranged the merchants, and created a poor and deracinated working class in Tehran. He had also alienated many of the educated middle-class through his oppressive policies and human rights abuses. As alternatives, radical intellectuals such as Ali Shariati propagated the ideology of 'Red Shiism' (a reinterpretation of Shi'a Islam as an active, classless movement for social justice). The Marxists were also active as the Tudeh party before being suppressed. But separately, and with greater impact and influence, Ayatollah Khomeini was advocating for the *Vilayat-e-Faqih* (Regency of the Islamic Jurist).

The revolution of 1979 was not primarily a religious event though it drew strength from its Shia form. It was sustained by middle-class disillusionment with corruption and economic stagnation. The process of Islamisation of the state and society commenced with a national referendum in March 1979 and gradually enveloped the institutions and practices of the state.

Post the revolution

In November 1979, prompted by news that the former Shah was being given asylum in the U.S., students broke into the U.S. embassy in Tehran and took the diplomats hostage. A laudatory account of that episode, which had far-reaching consequences, was written by one of its women student leaders Massoumeh Ebtekar. In an interview to a U.S. scholar about the hostages, Ms. Ebtekar said "it is very difficult to compare the suffering that the Iranian nation felt during fifty years of foreign domination and comparing that to the suffering or pain that may have faced during these 444 days."

Final resolution: An Iranian man rides a scooter past anti-U.S. banners placed outside the former U.S. embassy in Tehran, Iran on June 15. AFP

This sudden and sharp decline in U.S.-Iran relations changed the global picture as seen from Washington. Regional tranquillity was further shattered when Iraq disowned the 1975 Algiers Treaty and invaded Iran in 1980 at different points of their common border. The seven-year war, from 1980 to 1987, unleashed by Iraq became for Iran a defence of its national territory. It transformed from a border war on Iran's western borders in the first two years to becoming a full-fledged war extending into the interior cities. It became an inescapable fact of life in Iran and merged into the consciousness of the public.

Iraq was assisted in the war by most Arab countries as well as by the U.S. Each had its own reasons to be apprehensive of Iran's revolutionary agenda emphasised in Khomeini's pronouncement that "there is only one way to save this revolution and that is to rapidly export the revolution, mobilise the world's Muslims and, later on all oppressed masses against the oppressors and governments related to them".

The role of Israel

Israel covertly assisted Iran, viewing Iraqi President Saddam Hussein as the more severe, existential threat. This pragmatism overrode the ideological hostility against the newly established Islamic Republic and resulted in a crucial, multi-faceted role for Israel. The country became one of Iran's primary sources of military equipment, covertly providing desperately needed spare parts, ammunition, and heavy weapons. In 1980, it secretly supplied Iran with hundreds of spare tires to keep its grounded American-made F-4 Phantom fighter jets operational. In exchange for covert arms sales, Israel received Iranian crude oil. This helped Israel bypass the severe energy shortages caused by the 1979 oil crisis, while allowing Iran to sustain its war effort. It also provided Israel's domestic defence industry with valuable combat-testing data for its weapons.

Israeli policymakers believed that a strong and well-supplied Iran would successfully bog down Saddam Hussein's military, preventing Iraq from posing a threat to its neighbours or Israel itself. By ensuring that the two most hostile regional powers spent eight years depleting each other's military, economic, and human resources, the conflict provided Israel with a highly valuable "strategic breather". It also, at times, helped facilitate the safe and unhindered emigration of the Persian Jewish community out of Iran.

The war gave the revolutionary authorities of Iran an opportunity to weaken the Iranian national army of the Shah's period and to create instead the 'Sepahe-e-Pasdaran' or the Islamic Revolutionary Guard Corps. It went from strength to strength during the war, numbering around 1 million while the regular armed forces numbered around 3,55,000.

Iran's determination

Iran showed considerable ingenuity in meeting the challenge of Iraq-Iran war. It reduced the import of non-essentials and managed to keep its oil flowing despite periodic air attacks. It diversified sources of arms supply and capitalised on the support of the masses for the war while squeezing the well to do and the bazaaris. The war to all intents and purposes became the sole criterion for judging the Islamic Republic.

There was some public opposition to the conduct of the war such as from the Islamic Liberation Movement, co-founded by former Prime Minister Mehdi Bazargan, which labelled the continuation of the war as 'un-Islamic'. Separately, reports indicative of 'chronic disorder of governance' have appeared in publications close to the establishment, suggesting 'prolonged ambiguity' in decision-making.

The Iranian tenacity during the Iraq war, and in the ongoing U.S.-Israel conflict, is evidence enough of its capacity and determination to endure and overcome adversity. Iran has asserted its place in the region and is not oblivious of it in the world of tomorrow.

17J6. A nation determined to endure and overcome
एक राष्ट्र जो दृढ़तापूर्वक टिके रहने और चुनौतियों पर विजय प्राप्त करने के लिए संकल्पित है

- It is a land of great contrasts both in **climate** and **geography** and is inhabited by, in the words of an ancient historian, "a poor people with a proud spirit."
  यह **जलवायु** और **भूगोल** दोनों दृष्टियों से अत्यधिक विविधताओं वाला देश है और, एक प्राचीन इतिहासकार के शब्दों में, यहाँ "गरीब किन्तु गौरवशाली आत्मा वाले लोग" निवास करते हैं।
- Under the **Qajar** and **Pahlavi dynasties**, it sought for an emulation of all things Western until the **Islamic Revolution of 1979** reversed the trend and brought forth a new prototype.
  क़ाजार और **पहलवी वंशों** के शासनकाल में उसने पश्चिमी जीवनशैली और संस्थाओं का अनुकरण करने का

प्रयास किया, जब तक कि **1979 की इस्लामी क्रांति** ने इस प्रवृत्ति को उलटकर एक नए प्रतिमान को जन्म नहीं दिया।

The decline of the Shah
शाह का पतन

- The discovery of **oil** in the country in **1901** had led to the formation of the **Anglo-Iranian Oil Company (AIOC)** with the **British government** holding almost half its shares.
  1901 में देश में **तेल** की खोज के परिणामस्वरूप **एंग्लो-ईरानियन ऑयल कंपनी (AIOC)** की स्थापना हुई, जिसमें **ब्रिटिश सरकार** की लगभग आधी हिस्सेदारी थी।
- However, post **World War II**, its **nationalisation** in **1953** resulted in tensions with **Western powers**, which led to the active involvement of the **CIA (Central Intelligence Agency)** in overthrowing the then **Mosaddeq government**.
  किन्तु **द्वितीय विश्व युद्ध** के बाद **1953** में इसके **राष्ट्रीयकरण** से **पश्चिमी शक्तियों** के साथ तनाव उत्पन्न हुआ, जिसके परिणामस्वरूप **CIA (केंद्रीय गुप्तचर एजेंसी)** ने तत्कालीन **मोसद्देक सरकार** को अपदस्थ करने में सक्रिय भूमिका निभाई।
- The **U.S.** then became the deciding factor in resolving the **Anglo-Iranian nationalisation dispute**.
  इसके बाद **अमेरिका एंग्लो-ईरानियन राष्ट्रीयकरण विवाद** के समाधान में निर्णायक कारक बन गया।
- This resulted in poorly conceived and badly implemented programmes of **socio-economic** and **military modernisation** by the **Shah**; his so-called **White Revolution** (a series of reforms to modernise Iran) and **'Great Civilisation' projects** (highlighted by the 2,500th anniversary of the Iranian monarchy) were not successful and were widely resented within Iran.
  इसके परिणामस्वरूप **शाह** द्वारा **सामाजिक-आर्थिक** और **सैन्य आधुनिकीकरण** के ऐसे कार्यक्रम शुरू किए गए जो कमजोर योजना और खराब क्रियान्वयन से ग्रस्त थे; उनकी तथाकथित **श्वेत क्रांति (White Revolution)** तथा **'ग्रेट सिविलाइजेशन' परियोजनाएँ** (जिन्हें ईरानी राजशाही की 2500वीं वर्षगांठ के अवसर पर विशेष रूप से प्रदर्शित किया गया) सफल नहीं रहीं और ईरान में व्यापक असंतोष का कारण बनीं।
- The major sources of opposition were **political organisations** from both the left and the right; **pro-democracy reformists**; **merchants and bazaaris**; and the **ulema** (recognised scholars of Islam).
  विरोध के प्रमुख स्रोतों में वामपंथी और दक्षिणपंथी **राजनीतिक संगठन**, **लोकतंत्र समर्थक सुधारवादी**, **व्यापारी और बाज़ारी वर्ग**, तथा **उलेमा** (इस्लाम के मान्यता प्राप्त विद्वान) शामिल थे।
- In the **1970s**, according to a contemporary observer, "the **political culture** of the Shah's regime both became more **repressive** and hardened on the one hand, and more remote and attenuated on the other."
  1970 के दशक में, एक समकालीन पर्यवेक्षक के अनुसार, शाह शासन की **राजनीतिक संस्कृति** एक ओर अधिक **दमनकारी** और कठोर होती गई, जबकि दूसरी ओर जनता से अधिक दूर और कमजोर पड़ती गई।
- The subsequent 'progress' in **U.S.-Iran relations** emanated from wrong policies, misunderstandings and **cultural misperceptions**.
  इसके बाद **अमेरिका-ईरान संबंधों** में जो तथाकथित 'प्रगति' हुई, वह गलत नीतियों, भ्रांतियों और **सांस्कृतिक गलत धारणाओं** से प्रभावित थी।
- These together contributed to the **U.S.** becoming in the eyes of **Iran**, the **'Great Satan'**.
  इन सभी कारणों ने मिलकर **ईरान** की दृष्टि में **अमेरिका** को **'महान शैतान' (Great Satan)** बना दिया।
- Also in the **1970s**, the **U.S.** encouraged **Iran** to develop **nuclear power** arguing that the country would eventually run out of oil.
  1970 के दशक में ही **अमेरिका** ने **ईरान** को **परमाणु ऊर्जा** विकसित करने के लिए प्रोत्साहित किया, यह तर्क देते हुए कि भविष्य में देश का तेल समाप्त हो सकता है।

- The **Shah** also periodically hinted that he wanted **Iran** to build **nuclear weapons** and, in response to official denials, said Iran "has no intention of acquiring [them] but if small states began building them, then Iran might reconsider its policy."
  शाह समय-समय पर यह संकेत भी देते थे कि वे **ईरान** को **परमाणु हथियार** संपन्न बनाना चाहते हैं और आधिकारिक खंडनों के उत्तर में उन्होंने कहा था कि ईरान "उन्हें प्राप्त करने का कोई इरादा नहीं रखता, किन्तु यदि छोटे राष्ट्र उनका निर्माण प्रारंभ करते हैं, तो ईरान अपनी नीति पर पुनर्विचार कर सकता है।"
- **U.S. documents** of that period suggest that it was in the **U.S.'s national interest**, both with respect to the **economy** and **security**, to have **Iran acquire nuclear power**.
  उस समय के **अमेरिकी दस्तावेज़** संकेत देते हैं कि **अर्थव्यवस्था** और **सुरक्षा** दोनों दृष्टियों से **ईरान को परमाणु ऊर्जा क्षमता प्राप्त करना अमेरिका के राष्ट्रीय हित** में माना जाता था।
- However, by the end of **1977**, the **Shah** had alienated the **ulema**, estranged the **merchants**, and created a poor and **deracinated working class** in **Tehran**.
  हालाँकि, **1977** के अंत तक **शाह** ने **उलेमा** को अपने से दूर कर दिया था, **व्यापारियों** को अलग-थलग कर दिया था और **तेहरान** में एक गरीब तथा **जड़ों से कटे हुए श्रमिक वर्ग** का निर्माण कर दिया था।
- As alternatives, radical intellectuals such as **Ali Shariati** propagated the ideology of **'Red Shiism'** (a reinterpretation of **Shi'a Islam** as an active, classless movement for **social justice**).
  वैकल्पिक विचारधारा के रूप में **अली शरियती** जैसे क्रांतिकारी बुद्धिजीवियों ने **'रेड शियावाद (Red Shiism)'** की विचारधारा का प्रचार किया, जिसमें **शिया इस्लाम** की पुनर्व्याख्या **सामाजिक न्याय** के लिए सक्रिय और वर्गहीन आंदोलन के रूप में की गई।
- But separately, and with greater impact and influence, **Ayatollah Khomeini** was advocating for the **Vilayat-e-Faqih** (**Regency of the Islamic Jurist**).
  किन्तु अलग रूप से और अधिक प्रभाव तथा प्रभावशीलता के साथ **आयतुल्लाह खुमैनी विलायत-ए-फ़क़ीह** (**इस्लामी न्यायविद् की संरक्षकता**) की अवधारणा का समर्थन कर रहे थे।
- The **revolution of 1979** was not primarily a religious event though it drew strength from its **Shia** form.
  1979 की क्रांति मुख्य रूप से धार्मिक घटना नहीं थी, यद्यपि उसे अपने **शिया स्वरूप** से शक्ति प्राप्त हुई थी।
- It was sustained by **middle-class disillusionment** with **corruption** and **economic stagnation**.
  इसे **भ्रष्टाचार** और **आर्थिक ठहराव** के प्रति **मध्यवर्गीय मोहभंग** से निरंतर समर्थन मिला।
- The process of **Islamisation** of the state and society commenced with a **national referendum** in **March 1979** and gradually enveloped the institutions and practices of the state.
  राज्य और समाज के **इस्लामीकरण** की प्रक्रिया **मार्च 1979** में आयोजित **राष्ट्रीय जनमत-संग्रह** से प्रारम्भ हुई और धीरे-धीरे राज्य की संस्थाओं तथा कार्यप्रणालियों को अपने प्रभाव में लेती गई।

- Regional tranquillity was further shattered when **Iraq** disowned the **1975 Algiers Treaty** and invaded **Iran** in **1980** at different points of their common border.
  क्षेत्रीय शांति को और अधिक आघात तब पहुँचा जब **इराक** ने **1975 की अल्जीयर्स संधि** को अस्वीकार कर दिया और **1980** में साझा सीमा के विभिन्न बिंदुओं पर **ईरान** पर आक्रमण कर दिया।
- The seven-year war, from **1980 to 1987**, unleashed by **Iraq** became for **Iran** a defence of its national territory.
  1980 से 1987 तक चला सात वर्षीय युद्ध, जिसे **इराक** ने प्रारम्भ किया था, **ईरान** के लिए अपने राष्ट्रीय क्षेत्र की रक्षा का युद्ध बन गया।
- It transformed from a **border war** on Iran's western borders in the first two years to becoming a **full-fledged war** extending into the interior cities.
  यह प्रारंभिक दो वर्षों में ईरान की पश्चिमी सीमाओं तक सीमित **सीमावर्ती युद्ध** से विकसित होकर आंतरिक नगरों तक फैलने वाला **पूर्ण विकसित युद्ध** बन गया।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

- It became an inescapable fact of life in **Iran** and merged into the consciousness of the public.
  यह **ईरान** के जीवन का एक अपरिहार्य तथ्य बन गया और जनता की सामूहिक चेतना का हिस्सा बन गया।
- **Iraq** was assisted in the war by most **Arab countries** as well as by the **U.S.**
  युद्ध में **इराक** को अधिकांश **अरब देशों** तथा **अमेरिका** का समर्थन प्राप्त था।
- Each had its own reasons to be apprehensive of **Iran's revolutionary agenda** emphasised in **Khomeini's** pronouncement that "there is only one way to save this revolution and that is to rapidly **export the revolution**, mobilise the world's **Muslims** and, later on all **oppressed masses** against the oppressors and governments related to them."
  प्रत्येक के पास **ईरान के क्रांतिकारी एजेंडे** को लेकर चिंतित होने के अपने कारण थे, जिसे **खुमैनी** के इस कथन में रेखांकित किया गया था कि "इस क्रांति को बचाने का केवल एक ही तरीका है, और वह है शीघ्रता से **क्रांति का निर्यात**, विश्व के **मुसलमानों** तथा बाद में सभी **उत्पीड़ित जनसमूहों** को उत्पीड़कों और उनसे संबंधित सरकारों के विरुद्ध संगठित करना।"

- **Israel** covertly assisted **Iran**, viewing **Iraqi President Saddam Hussein** as the more severe, **existential threat**.
  इज़राइल ने गुप्त रूप से **ईरान** की सहायता की, क्योंकि वह **इराकी राष्ट्रपति सद्दाम हुसैन** को अधिक गंभीर **अस्तित्वगत खतरा** मानता था।
- This **pragmatism** overrode the **ideological hostility** against the newly established **Islamic Republic** and resulted in a crucial, multi-faceted role for Israel.
  इस **व्यावहारिक दृष्टिकोण** ने नवस्थापित **इस्लामी गणराज्य** के प्रति मौजूद **वैचारिक शत्रुता** को पीछे छोड़ दिया और इज़राइल के लिए एक महत्वपूर्ण तथा बहुआयामी भूमिका का मार्ग प्रशस्त किया।
- The country became one of **Iran's primary sources of military equipment**, covertly providing desperately needed **spare parts**, **ammunition**, and **heavy weapons**.
  यह देश **ईरान के प्रमुख सैन्य उपकरण आपूर्तिकर्ताओं** में से एक बन गया और उसने गुप्त रूप से अत्यंत आवश्यक **स्पेयर पार्ट्स**, **गोला-बारूद** तथा **भारी हथियार** उपलब्ध कराए।
- In **1980**, it secretly supplied Iran with hundreds of **spare tires** to keep its grounded American-made **F-4 Phantom fighter jets** operational.
  1980 में इसने ईरान को सैकड़ों **स्पेयर टायर** गुप्त रूप से उपलब्ध कराए ताकि उसके अमेरिकी निर्मित **एफ-4 फैंटम लड़ाकू विमान** संचालन योग्य बने रहें।
- In exchange for covert **arms sales**, Israel received **Iranian crude oil**.
  गुप्त **हथियार बिक्री** के बदले इज़राइल को **ईरानी कच्चा तेल** प्राप्त हुआ।
- This helped Israel bypass the severe **energy shortages** caused by the **1979 oil crisis**, while allowing Iran to sustain its **war effort**.
  इससे इज़राइल को **1979 के तेल संकट** से उत्पन्न गंभीर **ऊर्जा संकट** से उबरने में सहायता मिली, जबकि ईरान अपनी **युद्ध क्षमता** को बनाए रखने में सफल रहा।
- It also provided Israel's domestic **defence industry** with valuable **combat-testing data** for its weapons.
  इससे इज़राइल के घरेलू **रक्षा उद्योग** को अपने हथियारों के लिए महत्वपूर्ण **युद्ध-परीक्षण संबंधी आंकड़े** भी प्राप्त हुए।
- **Israeli policymakers** believed that a strong and well-supplied **Iran** would successfully bog down **Saddam Hussein's military**, preventing Iraq from posing a threat to its neighbours or Israel itself.
  इज़राइली नीति-निर्माताओं का मानना था कि एक मजबूत और पर्याप्त संसाधनों से युक्त **ईरान**, **सद्दाम हुसैन की सेना** को लंबे समय तक उलझाए रखेगा, जिससे इराक अपने पड़ोसियों अथवा स्वयं इज़राइल के लिए खतरा नहीं बन सकेगा।
- By ensuring that the two most hostile regional powers spent eight years depleting each other's **military**, **economic**, and **human resources**, the conflict provided Israel with a highly valuable **"strategic breather"**.

Why was Trump's H-1B fee struck down?

What is the H-1B visa programme and who uses it? Why did the Trump administration impose the $100,000 fee? What impact was the policy expected to have on States and employers? Did the President have the authority to impose the fee? Why did the court classify the charge as a tax rather than a penalty?

GS II, IR

EXPLAINER

Kartikey Singh

The story so far:

On June 8, in a 42-page ruling with nationwide effect, U.S. District Judge Leo T. Sorokin struck down President Donald Trump's policy imposing a $100,000 fee on H-1B visas for highly skilled foreign workers. Upholding a challenge brought by California and 19 other States (plaintiffs), the court held that the fee amounted to an unlawful tax that the President could not impose without Congressional delegation.

What is an H-1B Visa?

The H-1B visa, created by the Immigration Act of 1990, is the backbone of the United States' high-skilled immigration architecture. Building on the broader framework of the Immigration and Nationality Act of 1952 (INA), which established the "H" category of temporary worker visas, the 1990 law carved out a distinct H-1B classification for highly educated professionals. It permits U.S. employers to hire foreign nationals in "specialty occupations", which require (i) theoretical and practical application of a body of specialised knowledge and (ii) at least a bachelor's degree in a relevant field, typically in sectors such as technology, engineering, healthcare, research, finance, and higher education. Notably, H-1B workers can generally remain in the U.S. for up to six years and often use the visa as a pathway to permanent residency.

To balance employers' demand for skilled talent with protection of the domestic workforce, Congress capped H-1B approvals for most private employers at 65,000 visas annually, with an additional 20,000 visas reserved for holders of advanced degrees. However, universities, affiliated non-profit entities, and governmental or non-profit research organisations are exempt from these numerical limits.

Policy change: On September 19, 2025, U.S. President Donald Trump signed Proclamation 10973, requiring a $100,000 supplemental payment for all H-1B visa petitions. GETTY IMAGES

Why did Trump impose a $100,000 fee?

On September 19, 2025, Mr. Trump signed Proclamation 10973, requiring a $100,000 supplemental payment for all H-1B visa petitions – a substantial increase over the pre-existing filing costs of roughly $960 to $7,595. The proclamation reasoned that the H-1B programme had been "deliberately exploited to replace, rather than supplement, American workers" with lower-paid foreign labour, harming U.S. economic and national security interests, particularly in critical STEM sectors. Mr. Trump's proclamation relied on Sections 212(f) and 215(a) of the INA. Section 212(f) empowers the President to restrict or suspend the entry of any class of aliens (non-citizens) when he finds their entry "would be detrimental to the interests of the United States." Additionally, Section 215(a), which also concerns the President's authority to regulate entry into the U.S., allows him to subject alien entry to "such reasonable rules, regulations, and orders, and such limitations and exceptions as the President may prescribe."

While alleging that the proclamation violated the 'separation-of-powers' principle as it "usurps Congress's exclusive constitutional authority to set immigration policy and to levy taxes", the plaintiff States argued before the U.S. District Court that the $100,000 H-1B fee would undermine their ability to recruit and retain essential skilled workers. They argued it would worsen teacher shortages, hamper hiring in higher education, disrupt research, and deepen healthcare staffing gaps – raising costs and straining public systems.

Simultaneously, the measure also carried significant implications for India. Indians account for roughly 70% of H-1B visa approvals, followed by Chinese nationals at about 12%, and are heavily represented in the STEM professions targeted by the proclamation. By raising the cost of an H-1B petition, the policy effectively created a prohibitive barrier for thousands of Indian software engineers, doctors, researchers, and other skilled professionals, many of whom already face years-long green card backlogs.

Did the President have the power to impose the fee?

The threshold issue before the court was whether the $100,000 charge was a 'tax' or a 'penalty', because only Congress possesses the constitutional power to "lay and collect Taxes, Duties, Imposts, and Excises" under Article I, Section 8 of the U.S. Constitution, unless it clearly delegates that authority to the executive.

To answer this question, the judge, an appointee of President Barack Obama, relied on two landmark Supreme Court precedents. In *Bailey v. Drexel Furniture Co.* (1922), the court invalidated the Child Labour Tax Law, holding that its "heavy exaction" was a 'penalty' rather than a 'tax' because it was designed to prohibit the employment of child labour. By contrast, in *National Federation of Independent Business* v. *Sebelius* (2012), the court found that the Affordable Care Act's requirement that individuals pay an additional fee to the Internal Revenue Service for not obtaining health insurance amounted to a 'tax', not a 'penalty', explaining that a penalty ordinarily constitutes "punishment for an unlawful act or omission." Applying this framework, Judge Sorokin concluded that the $100,000 H-1B charge was a 'tax', as hiring workers under the H-1B programme is plainly lawful, and the payment did not operate as punishment for any unlawful conduct.

Further, the court examined whether Congress had delegated taxing authority to the President through Sections 212(f) and 215(a) of the INA. It found no such delegation.

While those provisions empower the President to impose "restrictions", "rules", "regulations", "orders", "limitations", and "exceptions" governing the entry of non-citizens, Judge Sorokin held that their ordinary meaning does not encompass the power over the public purse. The court also found multiple violations of the Administrative Procedure Act. Accordingly, Judge Sorokin ruled that "the Policy implementing the Proclamation is declared unlawful and is vacated in its entirety".

Kartikey Singh, lawyer, and currently working as a Law Clerk-cum-Research Associate at the Supreme Court of India. Views expressed are personal.

THE GIST

- To balance employers' demand for skilled talent with protection of the domestic workforce, Congress capped H-1B approvals for most private employers at 65,000 visas annually, with an additional 20,000 visas reserved for holders of advanced degrees.
- However, universities, affiliated non-profit entities, and governmental or non-profit research organisations are exempt from these numerical limits.
- The issue before the court was whether the $100,000 charge was a 'tax' or a 'penalty', because only Congress possesses the constitutional power to "lay and collect Taxes, Duties, Imposts, and Excises" under Article I, Section 8 of the U.S. Constitution, unless it clearly delegates that authority to the executive.

17J6. Why was Trump's H-1B fee struck down?
ट्रम्प का H-1B शुल्क क्यों निरस्त कर दिया गया?

- The **H-1B visa**, created by the **Immigration Act of 1990**, is the backbone of the **United States' high-skilled immigration architecture**.
  1990 के इमिग्रेशन एक्ट के अंतर्गत निर्मित **एच-1बी वीज़ा**, **संयुक्त राज्य अमेरिका की उच्च-कौशल आप्रवासन व्यवस्था** की आधारशिला है।
- Building on the broader framework of the **Immigration and Nationality Act of 1952 (INA)**, which established the **"H" category** of temporary worker visas, the **1990 law** carved out a distinct **H-1B classification** for highly educated professionals.
  1952 के इमिग्रेशन एंड नेशनलिटी एक्ट (INA), जिसने अस्थायी श्रमिक वीज़ा की **"H" श्रेणी** स्थापित की थी, के व्यापक ढाँचे पर आधारित **1990 के कानून** ने उच्च शिक्षित पेशेवरों के लिए एक पृथक **एच-1बी श्रेणी** का निर्माण किया।
- It permits **U.S. employers** to hire foreign nationals in **"specialty occupations"**, which require (i) theoretical and practical application of a body of specialised knowledge and (ii) at least a bachelor's degree in a relevant field, typically in sectors such as **technology**, **engineering**, **healthcare**, **research**, **finance**, and **higher education**.
  यह **अमेरिकी नियोक्ताओं** को विदेशी नागरिकों को **"विशेषज्ञ व्यवसायों (Specialty Occupations)"** में नियुक्त करने की अनुमति देता है, जिनमें (i) विशेष ज्ञान का सैद्धांतिक एवं व्यावहारिक उपयोग तथा (ii) संबंधित क्षेत्र में कम-से-कम स्नातक डिग्री आवश्यक होती है। ये क्षेत्र सामान्यतः **प्रौद्योगिकी**, **अभियांत्रिकी**, **स्वास्थ्य सेवा**, **अनुसंधान**, **वित्त** तथा **उच्च शिक्षा** से संबंधित होते हैं।
- Notably, **H-1B workers** can generally remain in the **U.S.** for up to **six years** and often use the visa as a pathway to **permanent residency**.
  विशेष रूप से, **एच-1बी धारक** सामान्यतः **छह वर्षों** तक **अमेरिका** में रह सकते हैं और प्रायः इस वीज़ा का उपयोग **स्थायी निवास (Permanent Residency)** प्राप्त करने के मार्ग के रूप में करते हैं।
- To balance employers' demand for **skilled talent** with protection of the **domestic workforce**, **Congress** capped H-1B approvals for most private employers at **65,000 visas annually**, with an additional **20,000 visas** reserved for holders of advanced degrees.
  कुशल प्रतिभाओं की नियोक्ताओं की मांग और **घरेलू श्रमबल** की सुरक्षा के बीच संतुलन बनाए रखने हेतु **कांग्रेस** ने अधिकांश निजी नियोक्ताओं के लिए **प्रति वर्ष 65,000 एच-1बी वीज़ा** की सीमा निर्धारित की है, जबकि उच्च डिग्रीधारकों के लिए अतिरिक्त **20,000 वीज़ा** आरक्षित हैं।
- However, **universities**, affiliated **non-profit entities**, and governmental or non-profit **research organisations** are exempt from these numerical limits.
  हालाँकि, **विश्वविद्यालय**, संबद्ध **गैर-लाभकारी संस्थाएँ**, तथा सरकारी अथवा गैर-लाभकारी **अनुसंधान संगठन** इन संख्यात्मक सीमाओं से मुक्त हैं।

Why did Trump impose a $100,000 fee?
ट्रंप ने 100,000 डॉलर का शुल्क क्यों लगाया?

- On **September 19, 2025**, **Donald Trump** signed **Proclamation 10973**, requiring a **$100,000 supplemental payment** for all **H-1B visa petitions** — a substantial increase over the pre-existing filing costs of roughly **$960 to $7,595**.
  19 सितंबर 2025 को **डोनाल्ड ट्रंप** ने **प्रोक्लेमेशन 10973** पर हस्ताक्षर किए, जिसके अंतर्गत सभी **एच-1बी वीज़ा आवेदनों** पर **100,000 डॉलर का अतिरिक्त शुल्क** लगाया गया। यह पहले की लगभग **960 डॉलर से 7,595 डॉलर** तक की आवेदन लागत की तुलना में अत्यधिक वृद्धि थी।
- The proclamation reasoned that the **H-1B programme** had been "deliberately exploited to replace, rather than supplement, American workers" with lower-paid foreign labour, harming

U.S. economic and **national security interests**, particularly in critical **STEM sectors**.
इस घोषणा में तर्क दिया गया कि **एच-1बी कार्यक्रम** का उपयोग अमेरिकी श्रमिकों की पूरकता के बजाय उन्हें कम वेतन वाले विदेशी श्रमिकों से प्रतिस्थापित करने के लिए किया गया है, जिससे **अमेरिकी आर्थिक** और **राष्ट्रीय सुरक्षा हितों**, विशेषकर महत्वपूर्ण **STEM क्षेत्रों**, को नुकसान पहुँचा है।

- Mr. Trump's proclamation relied on **Sections 212(f) and 215(a)** of the **INA**.
ट्रंप की यह घोषणा **INA** की **धारा 212(f)** और **215(a)** पर आधारित थी।
- **Section 212(f)** empowers the President to restrict or suspend the entry of any class of **aliens (non-citizens)** when he finds their entry "would be detrimental to the interests of the United States."
धारा 212(f) राष्ट्रपति को यह अधिकार देती है कि यदि किसी **विदेशी नागरिक (Alien)** के प्रवेश को अमेरिका के हितों के प्रतिकूल माना जाए, तो वह उसके प्रवेश को सीमित या निलंबित कर सकता है।
- Additionally, **Section 215(a)**, which also concerns the President's authority to regulate entry into the **U.S.**, allows him to subject alien entry to "such reasonable rules, regulations, and orders, and such limitations and exceptions as the President may prescribe."
इसके अतिरिक्त, **धारा 215(a)** राष्ट्रपति को अमेरिका में प्रवेश को विनियमित करने का अधिकार देती है तथा विदेशी नागरिकों के प्रवेश पर ऐसे नियम, विनियम, आदेश, सीमाएँ और अपवाद लागू करने की अनुमति देती है जिन्हें राष्ट्रपति उचित समझे।
- While alleging that the proclamation violated the **'separation-of-powers' principle** as it "usurps Congress's exclusive constitutional authority to set immigration policy and to levy taxes", the plaintiff States argued before the **U.S. District Court** that the **$100,000 H-1B fee** would undermine their ability to recruit and retain essential **skilled workers**.
वादी राज्यों ने **अमेरिकी जिला न्यायालय** में तर्क दिया कि यह घोषणा **'शक्तियों के पृथक्करण' (Separation of Powers)** के सिद्धांत का उल्लंघन करती है क्योंकि यह **आप्रवासन नीति निर्धारित करने** और **कर लगाने** की कांग्रेस की विशिष्ट संवैधानिक शक्ति का अतिक्रमण करती है। उन्होंने यह भी कहा कि **100,000 डॉलर का एच-1बी शुल्क** आवश्यक **कुशल श्रमिकों** की भर्ती और उन्हें बनाए रखने की उनकी क्षमता को कमजोर करेगा।
- They argued it would worsen **teacher shortages**, hamper hiring in **higher education**, disrupt **research**, and deepen **healthcare staffing gaps** — raising costs and straining public systems.
उनका तर्क था कि इससे **शिक्षकों की कमी** बढ़ेगी, **उच्च शिक्षा** संस्थानों में नियुक्तियाँ प्रभावित होंगी, **अनुसंधान कार्य** बाधित होगा तथा **स्वास्थ्य क्षेत्र में कर्मचारियों की कमी** और अधिक गंभीर हो जाएगी, जिससे लागत बढ़ेगी और सार्वजनिक प्रणालियों पर दबाव पड़ेगा।
- Simultaneously, the measure also carried significant implications for **India**.
साथ ही, इस उपाय के **भारत** के लिए भी महत्वपूर्ण प्रभाव थे।
- **Indians** account for roughly **70% of H-1B visa approvals**, followed by **Chinese nationals** at about **12%**, and are heavily represented in the **STEM professions** targeted by the proclamation.
भारतीय नागरिक लगभग **70% एच-1बी वीज़ा स्वीकृतियों** का प्रतिनिधित्व करते हैं, जबकि **चीनी नागरिकों** की हिस्सेदारी लगभग **12%** है। ये दोनों समूह विशेष रूप से उन **STEM व्यवसायों** में बड़ी संख्या में मौजूद हैं जिन्हें इस घोषणा ने प्रभावित किया।
- By raising the cost of an **H-1B petition**, the policy effectively created a prohibitive barrier for thousands of Indian **software engineers**, **doctors**, **researchers**, and other **skilled professionals**, many of whom already face years-long **green card backlogs**.
एच-1बी आवेदन की लागत बढ़ाकर इस नीति ने हजारों भारतीय **सॉफ्टवेयर इंजीनियरों**, **डॉक्टरों**, **शोधकर्ताओं** तथा अन्य **कुशल पेशेवरों** के लिए एक गंभीर बाधा उत्पन्न कर दी, जिनमें से अनेक पहले से ही वर्षों लंबे **ग्रीन कार्ड लंबित मामलों** का सामना कर रहे हैं।

Did the President have the power to impose the fee?
क्या राष्ट्रपति के पास यह शुल्क लगाने की शक्ति थी?

- The threshold issue before the **court** was whether the **$100,000 charge** was a **'tax'** or a **'penalty'**, because only **Congress** possesses the constitutional power to "lay and collect **Taxes, Duties, Imposts, and Excises**" under **Article I, Section 8** of the **U.S. Constitution**, unless it clearly delegates that authority to the executive.
  न्यायालय के समक्ष प्रारंभिक प्रश्न यह था कि **100,000 डॉलर का शुल्क** एक **'कर (Tax)'** था या **'दंड (Penalty)'**, क्योंकि **अमेरिकी संविधान** के **अनुच्छेद I, धारा 8** के अंतर्गत केवल **कांग्रेस** को ही "**कर, शुल्क, आयात शुल्क तथा उत्पाद शुल्क**" लगाने और वसूलने की संवैधानिक शक्ति प्राप्त है, जब तक कि वह स्पष्ट रूप से यह अधिकार कार्यपालिका को न सौंप दे।
- To answer this question, the judge, an appointee of President **Barack Obama**, relied on two landmark **Supreme Court precedents**.
  इस प्रश्न का उत्तर देने के लिए न्यायाधीश, जिन्हें राष्ट्रपति **बराक ओबामा** ने नियुक्त किया था, ने **सुप्रीम कोर्ट** के दो ऐतिहासिक निर्णयों पर भरोसा किया।
- In **Bailey v. Drexel Furniture Co. (1922)**, the court invalidated the **Child Labour Tax Law**, holding that its "heavy exaction" was a **'penalty'** rather than a **'tax'** because it was designed to prohibit the employment of **child labour**.
  Bailey v. Drexel Furniture Co. (1922) मामले में न्यायालय ने **बाल श्रम कर कानून (Child Labour Tax Law)** को निरस्त कर दिया था और कहा था कि उसका "अत्यधिक आर्थिक भार" वास्तव में **'कर'** नहीं बल्कि **'दंड'** था, क्योंकि उसका उद्देश्य **बाल श्रम** को रोकना था।
- By contrast, in **National Federation of Independent Business v. Sebelius (2012)**, the court found that the **Affordable Care Act's** requirement that individuals pay an additional fee to the **Internal Revenue Service (IRS)** for not obtaining health insurance amounted to a **'tax'**, not a **'penalty'**, explaining that a penalty ordinarily constitutes "punishment for an unlawful act or omission."
  इसके विपरीत, **National Federation of Independent Business v. Sebelius (2012)** मामले में न्यायालय ने माना कि **Affordable Care Act** के अंतर्गत स्वास्थ्य बीमा न लेने पर **Internal Revenue Service (IRS)** को अतिरिक्त भुगतान करने की बाध्यता **'दंड'** नहीं बल्कि **'कर'** है। न्यायालय ने स्पष्ट किया कि सामान्यतः **दंड** किसी "अवैध कार्य या चूक के लिए दी जाने वाली सजा" होता है।
- Applying this framework, **Judge Sorokin** concluded that the **$100,000 H-1B charge** was a **'tax'**, as hiring workers under the **H-1B programme** is plainly lawful, and the payment did not operate as punishment for any unlawful conduct.
  इसी सिद्धांत को लागू करते हुए **न्यायाधीश सोरोकिन** ने निष्कर्ष निकाला कि **100,000 डॉलर का एच-1बी शुल्क** एक **'कर'** है, क्योंकि **एच-1बी कार्यक्रम** के अंतर्गत कर्मचारियों की नियुक्ति पूर्णतः वैध है और यह भुगतान किसी अवैध गतिविधि के लिए दंड के रूप में कार्य नहीं करता।
- Further, the court examined whether **Congress** had delegated **taxing authority** to the President through **Sections 212(f) and 215(a)** of the **INA**.
  इसके बाद न्यायालय ने यह भी जांच की कि क्या **INA** की **धारा 212(f)** और **215(a)** के माध्यम से **कांग्रेस** ने राष्ट्रपति को **कर लगाने का अधिकार** सौंपा था।
- It found no such delegation.
  न्यायालय को ऐसा कोई अधिकार-हस्तांतरण नहीं मिला।
- While those provisions empower the President to impose **"restrictions"**, **"rules"**, **"regulations"**, **"orders"**, **"limitations"**, and **"exceptions"** governing the entry of non-citizens, **Judge Sorokin** held that their ordinary meaning does not encompass the power over the **public purse**.
  यद्यपि ये प्रावधान राष्ट्रपति को गैर-नागरिकों के प्रवेश पर **"प्रतिबंध"**, **"नियम"**, **"विनियम"**, **"आदेश"**, **"सीमाएँ"** तथा **"अपवाद"** लागू करने का अधिकार देते हैं, फिर भी **न्यायाधीश सोरोकिन** ने कहा कि इन शब्दों के सामान्य अर्थ में **राजकोष (Public Purse)** पर नियंत्रण अथवा कराधान की शक्ति शामिल नहीं है।
- The court also found multiple violations of the **Administrative Procedure Act**.
  न्यायालय ने **Administrative Procedure Act** के कई उल्लंघनों को भी चिन्हित किया।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

- Accordingly, **Judge Sorokin** ruled that "the **Policy** implementing the **Proclamation** is declared unlawful and is vacated in its entirety".
  फलस्वरूप, **न्यायाधीश सोरोकिन** ने निर्णय दिया कि "**घोषणा (Proclamation)** को लागू करने वाली **नीति (Policy)** को अवैध घोषित किया जाता है और इसे पूर्णतः निरस्त किया जाता है।"

'1.1 billion children exposed to three or more climate risks'

GS II: IR

Agence France-Presse
UNITED NATIONS

More than one billion children face at least three overlapping climate hazards, UNICEF warned on Monday, while highlighting the disproportionate impact in some regions of the world.

For the report, the UN agency cross-referenced data showing where the roughly 2.4 billion children on the planet live with the geographic distribution of the eight most common climate impacts. They are coastal flooding, river flooding, drought, tropical storms, heat waves, extreme heat, wildfires, and sandstorms.

The report primarily focuses on the 1.1 billion children who are exposed to at least three risks, with the most common combination being drought, extreme heat, (above 35 degrees Celsius) and heat waves.

That combination affects some 296 million children, including 74 million in Nigeria, 34 million in Pakistan, and 32 million in India.

The number of children in this three-or-more category has increased sharply over the past 20 years.

Almost all children - some 2.3 billion - are exposed to at least one risk. Two billion are exposed to at least two, while 364 million face at least four.

Of the 1,23,000 children exposed to seven or more hazards, some 46,000 are in Myanmar.

"Children are at the forefront of the impact of climate change," said UNICEF chief Catherine Russell.

As for the worst place for a child, "there isn't a super short answer," one of the report authors, Tom Slaymaker, told AFP.

"But they're not all equal," Mr. Slaymaker said. "We do see some hot spots... it's really concentrated in Sub-Saharan Africa and parts of South Asia."

Countries with large populations of children, including Bangladesh, India, Nigeria, and Pakistan, are at the top of the list for the number of children exposed to at least three hazards.

17J6. '1.1 billion children exposed to three or more climate risks'

'1.1 अरब बच्चे तीन या अधिक जलवायु जोखिमों के संपर्क में'

- They are **coastal flooding**, **river flooding**, **drought**, **tropical storms**, **heat waves**, **extreme heat**, **wildfires**, and **sandstorms**.

इनमें **तटीय बाढ़**, **नदी बाढ़**, **सूखा**, **उष्णकटिबंधीय तूफान**, **लू (Heat Waves)**, **अत्यधिक गर्मी**, **जंगल की आग** और **रेत के तूफान** शामिल हैं।

- The report primarily focuses on the **1.1 billion children** who are exposed to at least **three risks**, with the most common combination being **drought**, **extreme heat (above 35 degrees Celsius)** and **heat waves**.

रिपोर्ट मुख्य रूप से उन **1.1 अरब बच्चों** पर केंद्रित है जो कम से कम **तीन जोखिमों** के संपर्क में हैं, जिनमें सबसे सामान्य संयोजन **सूखा**, **अत्यधिक गर्मी (35 डिग्री सेल्सियस से अधिक)** और **लू** है।

- That combination affects some **296 million children**, including **74 million in Nigeria**, **34 million in Pakistan**, and **32 million in India**.

यह संयोजन लगभग **29.6 करोड़ बच्चों** को प्रभावित करता है, जिनमें **नाइजीरिया में 7.4 करोड़**, **पाकिस्तान में 3.4 करोड़** और **भारत में 3.2 करोड़** बच्चे शामिल हैं।

- Countries with large populations of children, including **Bangladesh**, **India**, **Nigeria**, and **Pakistan**, are at the top of the list for the number of children exposed to at least **three hazards**.

बच्चों की बड़ी आबादी वाले देशों, जिनमें **बांग्लादेश**, **भारत**, **नाइजीरिया** और **पाकिस्तान** शामिल हैं, में कम से कम **तीन जलवायु खतरों** के संपर्क में आने वाले बच्चों की संख्या सबसे अधिक है।

How Herat defied the Taliban regime, chanting 'women, work and freedom'

The protests in the Afghan city in the first week of June were triggered by the enforcement of a dress code, which requires women to wear burqa in public; many women, including those wearing traditional Afghan wear of manto, were arrested, but released later as entire communities protested

GS II: IR

NEWS ANALYSIS

Smriti Sudesh

The chants were familiar. But this time, they echoed not in Tehran, but in Herat.

In mid-June, Afghanistan's western city of Herat witnessed a rare display of public defiance against the Taliban. Women, and this time, men too, marched through the streets chanting "Women, Work and Freedom", a slogan probably inspired by Iran's 2022 "Woman, Life and Freedom" movement that emerged after the death of the 22-year-old Mahsa Amini.

The protests did not unfold overnight.

The spark in Herat

According to Zan Times, an exiled media organisation run by Afghan women journalists, the latest crackdown appears to have been planned days in advance. On June 4, Herat's governor Noor Ahmad Islamjar reportedly met with a group of morality enforcers.

On the afternoon of June 5, Taliban officials used the end of Friday prayers to announce that women who failed to comply with the Islamic dress code would be arrested. The following morning, the arrests began.

On June 6, dozens of women were detained across several neighbourhoods, including Darb-e-Malik, Shahr-e-Naw, Ab Burda, Jibrayil, and Haji Abbas. By June 7, the United Nations had confirmed that at least 30 women were in custody for alleged dress code violations. "Dozens more women reportedly received verbal warnings," United Nations Assistance Mission in Afghanistan (UNAMA) said.

Then came the backlash.

On June 9, men and women took to the streets together in a rare act of collective defiance. The Taliban's response was swift; within minutes, they reportedly opened fire at demonstrators, killing at least two people, including a child, according to some reports, and injuring more than 20 others.

Four days later, on June 13, demonstrators returned to the streets.

Abdul Salam Hanafi, the Taliban Deputy Prime Minister for administrative affairs, praised the performance of Herat's local administration amid widespread protests over the detention of women in the province, according to Afghanistan International.

The immediate trigger for the unrest was a series of arrests carried out by the Taliban's morality police. Women and girls were detained for allegedly violating the regime's dress code in a city that has historically been regarded as one of the country's more progressive and culturally vibrant centres.

Under Taliban regulations, women should cover their entire bodies, usually with a burqa, and are prohibited from wearing perfume or anything capable of 'attracting' public attention.

Avoiding attention: Under Taliban regulations, women should cover their entire bodies, usually with a burqa. AFP

Witnesses described women being pulled into police vans, including some who were already fully covered. Among those detained were reportedly pregnant women. The Taliban initially dismissed reports of the arrests as rumours before later defending the operation as the enforcement of Islamic law.

The Sharia law

To understand about these arrests, one has to understand the role Sharia plays in Taliban-ruled Afghanistan.

The Taliban returned to power in 2021. Since then, it has governed through its interpretation of Sharia, or better known as Islamic law. While Afghanistan has historically followed the Hanafi school of Sunni jurisprudence (fiqh), often regarded as one of the more flexible traditions within Sunni Islam, the Taliban has adopted a far stricter, Deobandi-influenced interpretation.

Under this system, women face extensive restrictions on education, employment, and public life. Girls are barred from secondary and higher education. Women face severe limitations on work opportunities and are often required to travel with a male guardian. Even ordinary social interactions and movement outside the home are heavily scrutinised.

The morality police enforce these rules through patrols, arrests, and detentions.

Since 2021, when the Taliban returned to power in Afghanistan, women across the country have lived under a system of surveillance and punishment over both their dress and their presence in public. What began as verbal guidance evolved into a decree by the Taliban's Supreme Leader in 2022, Mawlawi Hibatullah Akhundzada, declaring burqa the preferred form of hijab. In 2024, it was codified through the Law on the Propagation of Virtue and Prevention of Vice, giving morality police sweeping powers to detain, intimidate, and punish women whose appearance failed to meet Taliban standards.

Earlier this year, as Zan Times reported, morality police established checkpoints across the city, pulling women from taxis and detaining those wearing a manto (a traditional long coat worn by generations of Afghan women) instead of the Taliban-approved black chador or burqa.

Supporters of the Taliban argue that these measures represent a return to authentic Islamic governance after decades of war, corruption, and foreign intervention. But critics, including many Muslim scholars, argue that the Taliban's interpretation represents an extreme and selective reading of Islamic law.

Human rights organisations estimate that millions of Afghan girls remain locked out of secondary education. Large numbers of women have lost employment opportunities. Restrictions on movement, healthcare, and public participation have deepened both economic hardship and social isolation across the country.

But in the latest Herat demonstrations, perhaps the most striking element was not the slogan but the people. Since the Taliban takeover, public protests have been rare and led by women. One of the examples being the nationwide protests against the closure of women's beauty salons. This time, however, many Afghan men appeared willing to publicly challenge the authorities as well.

A rare act

As one Zan Times newsletter observed, that they (men) did so this time says something important. What is being done to Afghan women is no longer viewed as a women's issue alone. It has become unbearable for entire families and entire communities.

The June 5 story, however, does not end with the arrests. While some of the women detained in Herat have since been released, little is known about what they experienced inside Taliban detention facilities. Activists and rights groups are now seeking answers.

International organisations were quick to condemn the crackdown. The United Nations, along with UN Women and the UNAMA, expressed concern over detentions, restrictions on freedom of expression, and the use of 'excessive force' against demonstrators. They also called for the release of detainees and urged the Taliban to respect basic rights.

Yet, there is little indication that the Taliban intends to alter course.

The Herat protests were relatively small, with estimates ranging from 70 to 150 participants. On the face of it, the protests were triggered by the arrest of dozens of women accused of violating the Taliban's dress code. But it is one of the clearest signs yet that frustration with Taliban rule is no longer confined to private conversations.

17J6. How Herat defied the Taliban regime, chanting 'women, work and freedom'

हेरात ने 'महिलाएँ, काम और स्वतंत्रता' का नारा लगाते हुए तालिबान शासन को कैसे चुनौती दी

- The protests in the Afghan city in the first week of June were triggered by the enforcement of a **dress code**, which requires women to wear **burqa** in public.
  जून के पहले सप्ताह में अफ़ग़ान शहर में हुए विरोध प्रदर्शनों की शुरुआत **ड्रेस कोड** लागू किए जाने से हुई, जिसके तहत महिलाओं को सार्वजनिक स्थानों पर **बुर्का** पहनना अनिवार्य है।
- Many women, including those wearing traditional Afghan wear of **manto**, were arrested, but released later as entire communities protested.
  पारंपरिक अफ़ग़ान परिधान **मांतो (Manto)** पहनने वाली कई महिलाओं को गिरफ्तार किया गया, लेकिन बाद में पूरे समुदाय के विरोध के कारण उन्हें रिहा कर दिया गया।
- Women, and this time, men too, marched through the streets chanting "**Women, Work and Freedom**", a slogan probably inspired by Iran's 2022 "**Woman, Life and Freedom**" movement that emerged after the death of the 22-year-old **Mahsa Amini**.
  महिलाएँ और इस बार पुरुष भी सड़कों पर उतरे और "**महिलाएँ, काम और स्वतंत्रता**" के नारे लगाए, जो

संभवतः ईरान के 2022 के "**महिला, जीवन और स्वतंत्रता**" आंदोलन से प्रेरित था, जो 22 वर्षीय **महसा अमीनी** की मृत्यु के बाद उभरा था।

- "Dozens more women reportedly received verbal warnings," **United Nations Assistance Mission in Afghanistan (UNAMA)** said.
  अफ़ग़ानिस्तान में संयुक्त राष्ट्र सहायता मिशन (UNAMA) ने कहा, "दर्जनों अन्य महिलाओं को मौखिक चेतावनी दी गई।"
- Under Taliban regulations, women should cover their entire bodies, usually with a **burqa**, and are prohibited from wearing **perfume** or anything capable of 'attracting' public attention.
  तालिबान नियमों के अनुसार महिलाओं को अपना पूरा शरीर सामान्यतः **बुर्के** से ढकना चाहिए और **इत्र** या ऐसा कोई भी वस्त्र पहनने की अनुमति नहीं है जो सार्वजनिक ध्यान आकर्षित करे।
- While Afghanistan has historically followed the **Hanafi school** of Sunni jurisprudence (fiqh), often regarded as one of the more flexible traditions within Sunni Islam, the Taliban has adopted a far stricter, **Deobandi-influenced** interpretation.
  यद्यपि अफ़ग़ानिस्तान ऐतिहासिक रूप से सुन्नी इस्लाम की अपेक्षाकृत लचीली परंपरा मानी जाने वाली **हनफ़ी विचारधारा** का पालन करता रहा है, तालिबान ने **देवबंदी प्रभाव** वाली अधिक कठोर व्याख्या अपनाई है।
- Under this system, women face extensive restrictions on **education**, **employment**, and **public life**.
  इस व्यवस्था के तहत महिलाओं को **शिक्षा**, **रोज़गार** और **सार्वजनिक जीवन** में व्यापक प्रतिबंधों का सामना करना पड़ता है।
- Girls are barred from secondary and higher education.
  लड़कियों को माध्यमिक और उच्च शिक्षा से वंचित रखा गया है।
- Women face severe limitations on work opportunities and are often required to travel with a male guardian.
  महिलाओं के रोजगार के अवसरों पर गंभीर प्रतिबंध हैं और उन्हें अक्सर किसी पुरुष अभिभावक के साथ यात्रा करनी पड़ती है।
- Even ordinary social interactions and movement outside the home are heavily scrutinised.
  सामान्य सामाजिक संपर्क और घर से बाहर निकलने पर भी कड़ी निगरानी रखी जाती है।
- The **United Nations**, along with **UN Women** and the **UNAMA**, expressed concern over detentions, restrictions on freedom of expression, and the use of 'excessive force' against demonstrators.
  संयुक्त राष्ट्र, **यूएन वीमेन** और **UNAMA** ने गिरफ्तारियों, अभिव्यक्ति की स्वतंत्रता पर प्रतिबंधों और प्रदर्शनकारियों के खिलाफ 'अत्यधिक बल प्रयोग' पर चिंता व्यक्त की।

Central banks to raise gold reserves over one year: WGC

GS III: Economy

Lalatendu Mishra
MUMBAI

World Gold Council's (WGC) 2026 Central Bank Gold Reserves (CBGR) survey indicate that the central banks around the world would accumulate more gold in the future.

This means the price of the yellow metal will remain high in the future impacting retail customers. Indian gold prices had risen by about 40% in 12 months primarily on central banks' buying and rupee's depreciation against U.S. dollar, the determining currency of gold price.

As per the survey central banks "remain very positive on gold, highlighting its significance amid a volatile geopolitical and economic environment."

Central banks accumulated 1,000 tonne gold over 4 years.

The survey shows a continuation of the trend uncovered in previous years: central banks see gold making up a growing share of reserve portfolios.

Doubling purchases

Central banks have accumulated an average of 1,000 tonne of gold over the past four years, which is significantly higher from the 500 tonne average over the preceding decade.

"This marked acceleration in the pace of accumulation occurred against a backdrop of geopolitical and economic uncertainty, which clouded the outlook for reserve managers," WGC said in the foreword of the Survey.

In India the Reserve Bank of India (RBI) was seen aggressively expanding its gold reserves between FY24 and FY25. Total reserves grew from 822.1 tonne in FY24 to 879.58 tonnes by end FY25 and rose marginally to 880.52 tonne in FY26. The survey was conducted between February 5 and May 19 with the majority of responses coming in after the West Asia conflict began.

17J6. Central banks to raise gold reserves over one year: WGC
केंद्रीय बैंक अगले एक वर्ष में स्वर्ण भंडार बढ़ाएंगे: WGC

- **The World Gold Council's (WGC) 2026 Central Bank Gold Reserves (CBGR) survey** indicates that the **central banks** around the world will accumulate more **gold** in the future.

वर्ल्ड गोल्ड काउंसिल (WGC) के 2026 केंद्रीय बैंक स्वर्ण भंडार (CBGR) सर्वेक्षण से संकेत मिलता है कि दुनिया भर के **केंद्रीय बैंक** भविष्य में अधिक **सोना** जमा करेंगे।

- Central banks have accumulated an average of **1,000 tonne of gold** over the past four years, which is significantly higher from the **500 tonne average** over the preceding decade.

पिछले चार वर्षों में केंद्रीय बैंकों ने औसतन **1,000 टन सोना** खरीदा है, जो इससे पूर्व के दशक के **500 टन औसत** की तुलना में काफी अधिक है।

U.P., Gujarat, Jharkhand log FY25 revenue surplus: CAG

GS III: Economy
Press Trust of India
NEW DELHI

Uttar Pradesh, Gujarat, Jharkhand, Manipur and 9 other States recorded surplus revenue in 2024-25, while the remaining 15 States had a deficit.

Eighteen States targeted revenue surplus, three States targeted revenue deficit and seven targeted zero revenue deficit in FY 2024-25, according to a report on 'State Finances 2024-25' released by Comptroller and Auditor General of India K. Sanjay Murthy on Tuesday.

"In FY 2024-25, 15 States were revenue-deficient while the rest 13 States were revenue surplus," the report said.

Beyond the 270 GW peak power demand there is a need for prioritising quality and reliability

GS III: Economy

Debajit Palit
Mandar Joshi

Crucial metric: Reliable electricity is a fundamental enabler of economic and social development.

The recent achievement of record-breaking peak demand exceeding 270 GW marks a historic moment for the Indian power sector. The national grid demonstrated a level of resilience by efficiently managing this massive load without a shortage, which would have been inconceivable a decade ago. This milestone effectively shatters all previous records and is more than 10% as compared to last year's peak. The ability to synchronise a diverse generation portfolio comprising thermal, hydro, nuclear, and a rapidly expanding variable renewable base under such intense pressure highlights the technical maturity of India's national grid.

From the pre-independence era of privately owned decentralised electricity systems to post-independence focus on 'pumpset energisation' and basic lighting through "kutir Jyoti" scheme, the sector has evolved significantly, particularly after the passage of the Electricity Act in 2003. Through massive infrastructure initiatives like the Deen Dayal Upadhyay Gram Jyoti Scheme (DDUGJY) and the SAUBHAGYA scheme, the physical framework for last-mile connectivity has covered nearly 100% households. However, as the nation moves toward its 2047 target of approximately 4,000 kWh of per capita electricity consumption, a significant leap from the current level of 1,600 kWh, the definition of success must be rewritten beyond access and availability to include the reliability and quality of every kilowatt-hour delivered.

Power quality vital

Power quality is becoming the new frontier for a modern, digital-first economy. For a consumer base that now includes lighting load to advanced semiconductor manufacturing to cold storage facilities and productive use of electricity to public infrastructure like smart classrooms and medical clinics, the supply of electricity is no longer sufficient. Power quality, characterised by precise voltage stability, frequency control and the absence of waveform distortion, is a necessity. Even a short fluctuation in power supply can stop machines, damage electronic equipment, and disrupt industrial operations.

Furthermore, despite the overarching national success in generation and transmission, a persistent disparity remains in the distribution sector, particularly between urban centres and rural landscapes. While urban supply has become increasingly stable, rural areas, which house approximately two-thirds of the population, still account for about one-third of total electricity consumption. The challenge here is not just one of connectivity but of economic empowerment.

While the average supply hours in rural areas have reached an impressive 22 hours in most states, the lack of predictability is a significant hurdle. For a small-scale productive enterprise or a rural startup, an unexpected outage during a critical production cycle can be financially devastating, often forcing them to rely on costly and polluting diesel generators as a backup. Bridging this rural-urban divide is therefore not just a technical need but a developmental necessity.

Ageing infrastructure

While the generation and transmission segments have progressively moved toward greater market-driven efficiency, several state-owned DISCOMs continue to struggle with ageing network infrastructure, inadequate transformer capacity, and persistently high Aggregate Technical and Commercial (AT&C) losses, which still exceed 20% in many states. These constraints restrict ability to invest in critical system upgrades such as automated monitoring, predictive maintenance and timely transformer replacement, thereby perpetuating poor service delivery and weak financial performance.

Better electron delivery and customer service itself can enhance consumer trust, increase demand, improve revenue and ultimately strengthen the financial health of DISCOMs.

To address the above issues, the Government of India launched the Revamped Distribution Sector Scheme (RDSS) in 2021 for a period of five years. Under the scheme, around 54% of the total sanctioned amount has been allocated for loss reduction infrastructure works, and 46% earmarked for smart metering. However, the gains in terms of billing and collection efficiency remain modest at around 4% in 4 years considering the scale of investment for metering. The core challenge continues to be operational inefficiencies at the DISCOMs and ageing electricity distribution infrastructure. A larger percentage of funds in rural areas should have been for improving distribution infra including transformer replacement and devices to monitor health of the network than merely installing smart meters in homes. Once the infrastructure is strengthened, DISCOMs could invest in smart meters to derive the full benefit of revenue augmentation by delivering electrons reliably and customer services effectively.

Customer-centric vision

The power sector must adopt a customer-centric approach that values the quality and reliability of electricity supply as much as achievements in accessibility and availability of clean energy. The Draft National Electricity Policy 2026 emphasises setting benchmarks for supply quality through reliability indices such as SAIDI, SAIFI, and CAIDI, along with regular reporting and public disclosure to ensure transparency and accountability. However, these indices are currently monitored only at the sub-transmission level.

They should be extended to the transformer and low-tension network level for more accurate assessment of consumer experience. Accordingly, investments must prioritise equipment and reliability monitoring systems, reflecting a broader shift from mere accounting to measuring actual service quality outcomes.

At the same time, moving from an administrative to a mode of 'enterprisation' in decision making and management, customer-focused decentralised distribution management model, better asset and inventory practices and introduction of MIS and SCADA systems at distribution level are essential to improve service quality and customer experiences.

Concerns over private participation focusing only on profitable urban areas can be addressed through well-designed public-private or private models that ensure balanced rural-urban coverage and enforcement of strict regulatory performance standards.

Experience from developed countries demonstrates that reliable electricity is a fundamental enabler of economic and social development. Electricity supports industrial growth, modern agriculture, digital services, healthcare, education, and employment generation, making it central to improving productivity and quality of life. The growth of rural India is dependent on strengthened electricity infrastructure and power supply reliability will be critical to achieving inclusive and sustainable development.

By addressing the underlying issues of distribution sector, power quality, and rural-urban parity, India can ensure its power sector does more than just meet peak demand. The path to Viksit Bharat needs a shift in perspective where electricity is viewed not merely as a commodity but as a productive input and transformative force for innovation and equity.

(Dr. Debajit Palit is the Centre Head at the Centre for Climate Change & Energy Transition and Mandar Joshi is a Research Consultant at Chintan Research Foundation. Views expressed are personal.)

17J6. Beyond the 270 GW peak power demand there is a need for prioritising quality and reliability

270 गीगावाट की उच्चतम बिजली मांग से आगे बढ़कर गुणवत्ता और विश्वसनीयता को प्राथमिकता देने की आवश्यकता

- The recent achievement of record-breaking **peak demand** exceeding **270 GW** marks a historic moment for the **Indian power sector**.

हाल ही में **270 गीगावाट** से अधिक की रिकॉर्ड **उच्चतम बिजली मांग (Peak Demand)** को पूरा करना **भारतीय विद्युत क्षेत्र** के लिए एक ऐतिहासिक उपलब्धि है।

- From the pre-independence era of privately owned decentralised electricity systems to post-independence focus on **'pumpset energisation'** and basic lighting through **"Kutir Jyoti" Scheme**, the sector has evolved significantly, particularly after the passage of the **Electricity Act, 2003**.

  स्वतंत्रता-पूर्व निजी स्वामित्व वाली विकेन्द्रीकृत बिजली प्रणालियों से लेकर स्वतंत्रता के बाद **'पंपसेट विद्युतीकरण'** और **"कुटीर ज्योति योजना"** के माध्यम से बुनियादी प्रकाश व्यवस्था तक, यह क्षेत्र विशेष रूप से **विद्युत अधिनियम, 2003** के बाद काफी विकसित हुआ है।
- Through massive infrastructure initiatives like the **Deen Dayal Upadhyay Gram Jyoti Yojana (DDUGJY)** and the **SAUBHAGYA Scheme**, the physical framework for last-mile connectivity has covered nearly **100% households**.

  दीनदयाल उपाध्याय ग्राम ज्योति योजना (DDUGJY) और **सौभाग्य योजना** जैसी विशाल अवसंरचना पहलों के माध्यम से अंतिम छोर तक बिजली पहुंचाने का ढांचा लगभग **100% परिवारों** को कवर कर चुका है।
- However, as the nation moves toward its **2047** target of approximately **4,000 kWh** of per capita electricity consumption, a significant leap from the current level of **1,600 kWh**, the definition of success must be rewritten beyond access and availability to include the **reliability** and **quality** of every kilowatt-hour delivered.

  हालाँकि, जैसे-जैसे देश **2047** तक प्रति व्यक्ति बिजली खपत को वर्तमान **1,600 kWh** से बढ़ाकर लगभग **4,000 kWh** तक ले जाने के लक्ष्य की ओर बढ़ रहा है, सफलता की परिभाषा को केवल उपलब्धता और पहुंच तक सीमित न रखकर प्रत्येक यूनिट बिजली की **विश्वसनीयता** और **गुणवत्ता** को भी शामिल करना होगा।

- For a consumer base that now includes lighting load to advanced **semiconductor manufacturing** to **cold storage facilities** and productive use of electricity to public infrastructure like **smart classrooms** and **medical clinics**, the supply of electricity is no longer sufficient.

  ऐसे उपभोक्ता आधार के लिए जिसमें सामान्य प्रकाश व्यवस्था से लेकर उन्नत **सेमीकंडक्टर विनिर्माण**, **कोल्ड स्टोरेज सुविधाएँ**, और **स्मार्ट कक्षाओं** तथा **चिकित्सा क्लीनिकों** जैसी सार्वजनिक अवसंरचना शामिल हैं, केवल बिजली की आपूर्ति पर्याप्त नहीं है।
- Power quality, characterised by precise **voltage stability**, **frequency control** and the absence of **waveform distortion**, is a necessity.

  वोल्टेज स्थिरता, **आवृत्ति नियंत्रण** तथा **वेवफॉर्म विकृति** की अनुपस्थिति से परिभाषित बिजली की गुणवत्ता अब एक आवश्यकता है।
- Even a short fluctuation in power supply can stop machines, damage electronic equipment, and disrupt industrial operations.

  बिजली आपूर्ति में थोड़े समय का उतार-चढ़ाव भी मशीनों को रोक सकता है, इलेक्ट्रॉनिक उपकरणों को नुकसान पहुँचा सकता है और औद्योगिक कार्यों को बाधित कर सकता है।
- While the average supply hours in rural areas have reached an impressive **22 hours** in most states, the lack of predictability is a significant hurdle.

  अधिकांश राज्यों में ग्रामीण क्षेत्रों में औसत बिजली आपूर्ति **22 घंटे** तक पहुँच गई है, लेकिन इसकी अनिश्चितता एक बड़ी बाधा बनी हुई है।
- To address the above issues, the Government of India launched the **Revamped Distribution Sector Scheme (RDSS)** in **2021** for a period of five years.

  इन समस्याओं के समाधान के लिए भारत सरकार ने **2021** में पाँच वर्षों के लिए **पुनर्गठित वितरण क्षेत्र योजना (RDSS)** शुरू की।
- Under the scheme, around **54%** of the total sanctioned amount has been allocated for **loss reduction infrastructure works**, and **46%** earmarked for **smart metering**.

  इस योजना के तहत कुल स्वीकृत राशि का लगभग **54%** भाग **हानि कम करने वाली अवसंरचना** पर तथा **46%** भाग **स्मार्ट मीटरिंग** के लिए निर्धारित किया गया है।

- The **Draft National Electricity Policy 2026** emphasises setting benchmarks for supply quality through reliability indices such as **SAIDI**, **SAIFI**, and **CAIDI**, along with regular reporting and public disclosure to ensure transparency and accountability.
  राष्ट्रीय विद्युत नीति 2026 (मसौदा) में **SAIDI**, **SAIFI** और **CAIDI** जैसे विश्वसनीयता सूचकांकों के माध्यम से आपूर्ति गुणवत्ता के मानक तय करने तथा नियमित रिपोर्टिंग और सार्वजनिक प्रकटीकरण पर बल दिया गया है।
- However, these indices are currently monitored only at the **sub-transmission level**.
  हालाँकि, वर्तमान में इन सूचकांकों की निगरानी केवल **सब-ट्रांसमिशन स्तर** पर की जाती है।
- They should be extended to the **transformer** and **low-tension network** level for more accurate assessment of consumer experience.
  उपभोक्ता अनुभव का अधिक सटीक आकलन करने के लिए इन्हें **ट्रांसफार्मर** और **लो-टेंशन नेटवर्क** स्तर तक विस्तारित किया जाना चाहिए।

GS Paper III: Science and Technology	17 June 2026
TOPICS COVERED	
17J6	GRAPES-3: A cosmic-ray tracker GRAPES-3: कॉस्मिक किरणों का अनुगामी (ट्रैकर)

GRAPES-3: A cosmic-ray tracker

GS III: S&T

Vasudevan Mukunth

Researchers from Mumbai, Kochi, and Japan used the GRAPES-3 telescope to track how the earth's upper atmosphere temperature and the sun's magnetic field affect muons — subatomic particles from space. By analysing 22 years of data, they developed a way to use these measurements to monitor changes in the upper atmosphere in real-time with high accuracy. The findings are to be published in the August issue of *Astroparticle Physics*.

The GRAPES-3 telescope in Ooty, Tamil Nadu does not look at light like a traditional telescope. Instead, it is a muon detector. Muons are created when high-energy cosmic rays from deep space collide with the earth's upper atmosphere. The facility consists of 16 independent modules spread over a large area. Each module contains 232 proportional counters, which are long steel tubes filled with a special mixture of argon and methane, with a thin tungsten wire running through the centre. When a muon passes through a tube, it knocks electrons out of the gas molecules. These electrons are pulled towards the wire, creating an electrical pulse that the telescope records as a hit.

The detector array of GRAPES-3 in Ooty. HIDEKI TANAKA (CC BY-SA)

The tubes are arranged in four layers, with each layer positioned at a right angle to the one below. This grid layout allows scientists to track the exact path and angle of the incoming muons. Thick layers of reinforced concrete are placed between the tubes to ensure the telescope only counts high-energy muons that are strong enough to penetrate the concrete. This is how GRAPES-3 is able to produce a high-resolution map of the invisible cosmic forces affecting the earth.

Not binary: India can save its forests by winning the war on poverty

Forests with more poor households and communities that depended more on fuelwood were also found to have less diverse tree species, a new study has found. On the other hand, forests where communities had access to alternative livelihoods, such as farming, had more diverse trees species

GS III, Environment

THE GIST

- Researchers pointed out that when people have fewer livelihood options and depend heavily on forests to survive, the pressure on forest resources automatically increases
- The new findings can be used to support conservation by prioritising wildlife corridors — patches of forests that form a loose link between protected areas
- The findings show how socio-economic conditions and conservation goals need not be in conflict with each other

Traditionally, many conservationists and policymakers have seen biodiversity conservation as a choice between protecting nature and meeting human needs. Forests were often seen as places that had to be protected from people, while alleviating poverty and economic development were treated as separate concerns.

A new international study has concluded that this is a harmful view.

In a paper in the journal *Nature Sustainability*, researchers from the University of Notre Dame, the University of Michigan, Yale University, the University of Colorado Boulder (U.S.), the Swedish University of Agricultural Sciences, the University of Manchester (U.K.), the University of Victoria (Canada), and the Indian School of Business analysed data from community-managed forests in the tropics.

The data came from the International Forestry Resources and Institutions network, and spanned 322 community-managed tropical forests in 15 countries from 1993 to 2017.

The dataset's size allowed the researchers to understand both current patterns in forest biodiversity and how they had changed over time. Principally, they found a significant link between people's livelihoods and forest biodiversity.

Forests, people, livelihoods

Forests with more poor households and communities that depended more on fuelwood were also found to have less diverse tree species. The team also found similar patterns in forests in densely populated areas with higher levels of poverty.

On the other hand, forests where communities had access to alternative livelihoods, such as farming, had more diverse trees.

Tree species diversity refers to the number of tree species in a forest; it is an important measure of biodiversity. Forests with more species tend to support more wildlife, are ecologically more stable, and are often more resilient to environmental change.

Overall, the analysis found that a greater dependence on forest resources was associated with lower tree species diversity.

However, the researchers emphasised that poverty is not responsible for biodiversity loss. They pointed out that when people have fewer livelihood options and depend heavily on forests to survive, the pressure on forest resources automatically increases. The way out is to improve economic opportunities.

The fortress model

The study also focused on human-dominated landscapes, which are common in India. Most forests in the country are owned and managed by State Forest Departments. And for decades, this apparatus has followed the fortress model – where protected areas are managed by minimising human activities and restricting access to resources. While this model has allowed the Departments to recover several iconic species and strengthen protection, it has some severe limitations.

Today, many protected areas are increasingly becoming isolated islands surrounded by human-dominated landscapes.

"The forests in these landscapes are smaller in size and bear a heavy burden of extraction," Ashwini Chhatre, associate professor of Public Policy at the Indian School of Business and one of the study's authors, said.

Around 275 million people depend on these forests to varying degrees for their livelihoods and daily needs.

"But these forests are ecologically important and provide significant ecosystem services," Dr. Chhatre said.

According to him, the new findings can be used to support conservation by prioritising wildlife corridors – patches of forests that form a loose link between protected areas.

"These corridors are used by large mammals to move between protected areas. The improvement of species richness in these corridors will increase forest resilience and support conservation directly," he said.

Helping conservation

To reduce pressure on forests, State Forest Departments across India have introduced initiatives like distributing subsidised LPG connections and efficient cooking stoves and heaters around many tiger reserves and national parks. The measures reduce people's need for fuelwood and to enter forests.

Today, many protected areas are increasingly becoming isolated islands surrounded by human-dominated landscapes. They bear a heavy burden of extraction from communities who depend on them for their livelihood

Extending similar support to private landholdings and community forests along wildlife corridors could help conservation.

However, Imran Siddiqui, senior field conservationist at the Centre for Wildlife Studies, who has worked extensively in protected areas and with forest communities in Andhra Pradesh and Telangana, said that while such initiatives are well-intentioned and that communities often welcome them, they face implementation challenges.

"Funding can be inconsistent, participation from local communities may vary, and long-term support is not always guaranteed," he said.

Conservation partners

Today, there is growing recognition among wildlife conservationists and forest managers that conservation can't succeed without the support of local communities.

In addition to fuel alternatives and subsidies, many State Forest Departments also give local community members jobs in tourism, forest protection, and seasonal conservation work.

The late ecologist Madhav Gadgil was a strong advocate of an inclusive approach, believing conservation efforts would be more effective if local communities had rights, incentives, and a meaningful role in managing natural resources. He also emphasised the value of traditional ecological knowledge, and argued people who had lived alongside forests for generations possessed insights that could complement scientific approaches to conservation.

In Ladakh, the Snow Leopard Conservancy has mitigated economic losses of human-wildlife conflict with community-run homestays and livestock insurance programmes. In Maharashtra's Sindhudurg district, village-based Mangrove Co-Management Committees help protect mangrove ecosystems while supporting fisheries, ecotourism, and sustainable aquaculture.

In Arunachal Pradesh, hornbill nest adoption programmes run by the Nature Conservation Foundation have encouraged local communities to protect nesting sites, with former Nyishi tribe hunters now serving as nest protectors and forest patrollers.

There is also tremendous scope to expand these initiatives and to further support community welfare.

As Mr. Siddiqui said, wildlife tourism is a growing multi-million-dollar industry, yet only a small fraction of its revenue reaches the communities living alongside forests and protected areas. He added that a greater share of these benefits should be directed to local communities, creating stronger incentives for conservation.

The findings of the new study highlight the close links between alleviating poverty and conserving biodiversity, and show how socio-economic conditions and conservation goals need not be in conflict with each other. By recognising these connections, both conservationists and policymakers can design more inclusive frameworks to benefit both people and nature.

और दशकों से, यह तंत्र **दुर्ग मॉडल** का अनुसरण करता रहा है — जिसमें **संरक्षित क्षेत्रों** का प्रबंधन मानवीय गतिविधियों को न्यूनतम करके तथा संसाधनों तक पहुँच को सीमित करके किया जाता है।

- While this model has allowed the Departments to recover several **iconic species** and strengthen protection, it has some severe limitations.
  यद्यपि इस मॉडल ने विभागों को अनेक **प्रतीकात्मक प्रजातियों** के संरक्षण और सुरक्षा को सुदृढ़ करने में सहायता प्रदान की है, फिर भी इसकी कुछ गंभीर सीमाएँ हैं।
- Today, many **protected areas** are increasingly becoming isolated islands surrounded by **human-dominated landscapes**.
  आज अनेक **संरक्षित क्षेत्र**, **मानव-प्रधान परिदृश्यों** से घिरे हुए पृथक द्वीपों के समान बनते जा रहे हैं।
- Around **275 million people** depend on these forests to varying degrees for their livelihoods and daily needs.
  लगभग **27.5 करोड़ लोग** अपनी आजीविका और दैनिक आवश्यकताओं के लिए विभिन्न स्तरों पर इन वनों पर निर्भर हैं।
- "But these forests are ecologically important and provide significant **ecosystem services**," Dr. Chhatre said.
  "किन्तु ये वन **पारिस्थितिकीय दृष्टि से** अत्यंत महत्वपूर्ण हैं और महत्वपूर्ण **पारिस्थितिकी तंत्र सेवाएँ** प्रदान करते हैं," डॉ. छत्रे ने कहा।

- To reduce pressure on forests, **State Forest Departments** across India have introduced initiatives like distributing subsidised **LPG connections** and efficient **cooking stoves** and heaters around many **tiger reserves** and **national parks**.
  वनों पर दबाव कम करने के लिए, पूरे भारत में **राज्य वन विभागों** ने अनेक **बाघ अभयारण्यों** और **राष्ट्रीय उद्यानों** के आसपास रियायती **एलपीजी कनेक्शन**, दक्ष **खाना पकाने के चूल्हे** तथा हीटर वितरित करने जैसी पहलें शुरू की हैं।
- The measures reduce people's need for **fuelwood** and to enter forests.
  ये उपाय लोगों की **ईंधन लकड़ी** पर निर्भरता तथा वनों में प्रवेश की आवश्यकता को कम करते हैं।
- Extending similar support to **private landholdings** and **community forests** along **wildlife corridors** could help conservation.
  वन्यजीव गलियारों के आसपास स्थित **निजी भूमि स्वामित्वों** और **सामुदायिक वनों** को भी इसी प्रकार का समर्थन प्रदान करना संरक्षण में सहायक हो सकता है।
- The late ecologist **Madhav Gadgil** was a strong advocate of an **inclusive approach**, believing conservation efforts would be more effective if local communities had rights, incentives, and a meaningful role in managing natural resources.
  दिवंगत पारिस्थितिकीविद् **माधव गाडगिल समावेशी दृष्टिकोण** के प्रबल समर्थक थे। उनका मानना था कि यदि स्थानीय समुदायों को अधिकार, प्रोत्साहन तथा **प्राकृतिक संसाधनों** के प्रबंधन में सार्थक भूमिका दी जाए, तो संरक्षण प्रयास अधिक प्रभावी होंगे।
- He also emphasised the value of **traditional ecological knowledge**, and argued people who had lived alongside forests for generations possessed insights that could complement scientific approaches to conservation.
  उन्होंने **पारंपरिक पारिस्थितिकीय ज्ञान** के महत्व पर भी बल दिया और तर्क दिया कि पीढ़ियों से वनों के साथ रहने वाले लोगों के पास ऐसी अंतर्दृष्टियाँ होती हैं जो संरक्षण के **वैज्ञानिक दृष्टिकोणों** की पूरक हो सकती हैं।
- In **Ladakh**, the **Snow Leopard Conservancy** has mitigated economic losses of **human-wildlife conflict** with community-run homestays and **livestock insurance programmes**.
  लद्दाख में **Snow Leopard Conservancy** ने समुदाय-प्रबंधित होमस्टे तथा **पशुधन बीमा कार्यक्रमों** के माध्यम से **मानव-वन्यजीव संघर्ष** से होने वाली आर्थिक हानियों को कम किया है।
- In **Arunachal Pradesh**, **hornbill nest adoption programmes** run by the **Nature Conservation Foundation** have encouraged local communities to protect nesting sites, with former **Nyishi tribe** hunters now serving as nest protectors and forest patrollers.
  अरुणाचल प्रदेश में **Nature Conservation Foundation** द्वारा संचालित **हॉर्नबिल घोंसला दत्तक ग्रहण**

कार्यक्रमों ने स्थानीय समुदायों को घोंसला स्थलों की रक्षा के लिए प्रोत्साहित किया है, जहाँ पूर्व **न्यीशी जनजाति** के शिकारी अब घोंसला संरक्षक और वन गश्ती कर्मियों के रूप में कार्य कर रहे हैं।

- There is also tremendous scope to expand these initiatives and to further support **community welfare**.
  इन पहलों का विस्तार करने तथा **सामुदायिक कल्याण** को और अधिक समर्थन देने की भी अपार संभावनाएँ हैं।
- As Mr. Siddiqui said, **wildlife tourism** is a growing **multi-million-dollar industry**, yet only a small fraction of its revenue reaches the communities living alongside forests and protected areas.
  जैसा कि श्री सिद्दीकी ने कहा, **वन्यजीव पर्यटन** एक तेजी से बढ़ता हुआ **बहु-मिलियन डॉलर उद्योग** है, फिर भी इसकी आय का केवल एक छोटा हिस्सा ही वनों और संरक्षित क्षेत्रों के आसपास रहने वाले समुदायों तक पहुँच पाता है।
- He added that a greater share of these benefits should be directed to local communities, creating stronger incentives for conservation.
  उन्होंने आगे कहा कि इन लाभों का अधिक बड़ा हिस्सा स्थानीय समुदायों को दिया जाना चाहिए, जिससे संरक्षण के लिए अधिक सशक्त प्रोत्साहन उत्पन्न होंगे।
- The findings of the new study highlight the close links between **alleviating poverty** and **conserving biodiversity**, and show how **socio-economic conditions** and conservation goals need not be in conflict with each other.
  नए अध्ययन के निष्कर्ष **गरीबी उन्मूलन** और **जैव विविधता संरक्षण** के बीच घनिष्ठ संबंधों को रेखांकित करते हैं तथा यह दर्शाते हैं कि **सामाजिक-आर्थिक परिस्थितियाँ** और संरक्षण संबंधी लक्ष्य आवश्यक रूप से एक-दूसरे के विरोधी नहीं हैं।
- By recognising these connections, both **conservationists** and **policymakers** can design more **inclusive frameworks** to benefit both people and nature.
  इन संबंधों को स्वीकार करके, **संरक्षणवादी** और **नीति-निर्माता** ऐसे अधिक **समावेशी ढाँचे** तैयार कर सकते हैं जो मानव और प्रकृति दोनों के हित में हों।

Vast stretches of coral reefs could resist climate change, finds a new study

GS III: Environment
Agence France-Presse
MOMBASA

In the crystalline waters off Kenya's coast, coral reefs are thriving – evidence of a rare good news story in the battle to protect oceans from the ravages of climate change.

A new study presented at the Our Ocean Conference in Mombasa on Tuesday finds that 1,66,000 square kilometres of the world's coral reefs - around a third of the total - are particularly "climate-resilient", meaning they have the potential to survive through major ocean warming events.

The study by the Wildlife Conservation Society (WCS) and Macquarie University in Australia challenges the findings of the IPCC, the global authority on climate change, which has stated 70% to 90% of coral reefs could die with global warming of 1.5 degrees Celsius above pre-industrial levels, and 99% at 2 degrees Celsius.

"Our models are showing a much more hopeful future for coral reefs. We predict that there are many climate resilient reefs around the world that will persist over time," Stacy Jupiter, executive director for marine conservation at WCS, told AFP.

Action is still needed since only 28% of those resilient reefs are being actively protected.

Down the coast from Mombasa, on Kenya's paradisical Wasini-Mkwiro island, villagers are showing the way.

As local fishermen bring in their catch from the beach, it is weighed, measured, and logged by local data collectors in the village.

Other members of the "beach management unit" patrol the waters to make sure no one is over-fishing or using destructive equipment. Others plant seaweed and mangroves, and scoop out rubbish.

The study finds that 1,66,000 sq. km of the world's coral reefs – around a third of the total – are particularly 'climate-resilient'. AFP

"We want to keep this ecosystem as pristine as possible because we know the benefits," said Edward Karanja, Kenya Wildlife Service warden for the nearby Kisite marine park, citing the importance of tourism and fishing to locals.

Thanks to their efforts, the park became the first in Kenya to earn a Gold-Level Blue Park Award from the U.S.-based Marine Conservation Institute in 2021.

'Living seed-banks'

Coral "bleaching" occurs when water temperatures rise by a degree or two, stressing the coral's animal tissues and making them expel algae, turning them white.

But the new study finds many reefs are resilient, either because they exist in cool spots, or because they have evolved to withstand heat, or recover more quickly than most.

"The way we see coral responding to heat events is more nuanced than we previously thought," said Ms. Jupiter.

Kenya is fortunate to have a significant stretch of naturally resilient coral.

Divers off traditional wooden dhows at Wasini-Mkwiro find coral species like the boulder-like Porites and staghorn-shaped Acropora supporting a dazzling ecosystem that includes moray eels, angelfish, crabs, turtles, dolphins, and much more.

The last major bleaching event in 2024 led to coral cover in the zone falling from 44% to 27%, according to WCS data. But within a year, it had recovered to 40%.

The new research, funded by Bloomberg Ocean Initiative and currently under peer review, builds on a pioneering study from 2018 that identified 50 resilient reefs around the world.

New technology makes its map 10,000 times more detailed than any previous version, enabling the discovery of three times more resilient coral than previously known.

More than half are concentrated in Australia, the Bahamas, Cuba, Indonesia, and the Philippines.

17J6. Vast stretches of coral reefs could resist climate change, finds a new study

प्रवाल भित्तियों के विशाल क्षेत्र जलवायु परिवर्तन का सामना कर सकते हैं, नए अध्ययन में दावा

- A new study presented at the **Our Ocean Conference** in **Mombasa** on Tuesday finds that **1,66,000 square kilometres** of the world's coral reefs — around a third of the total — are particularly **"climate-resilient"**, meaning they have the potential to survive through major ocean warming events.
  मंगलवार को **मोम्बासा** में आयोजित **आवर ओशन कॉन्फ्रेंस** में प्रस्तुत एक नए अध्ययन के अनुसार, दुनिया की लगभग **1,66,000 वर्ग किलोमीटर** प्रवाल भित्तियाँ — जो कुल का लगभग एक-तिहाई हैं — विशेष रूप से

"जलवायु-प्रतिरोधी (Climate-Resilient)" हैं, अर्थात वे महासागरों के बड़े तापवृद्धि घटनाक्रमों के बावजूद जीवित रह सकती हैं।

- The **IPCC** has stated **70% to 90%** of coral reefs could die with global warming of **1.5 degrees Celsius** above pre-industrial levels, and **99%** at **2 degrees Celsius**.
  IPCC के अनुसार, औद्योगिक-पूर्व स्तरों की तुलना में वैश्विक तापमान में **1.5 डिग्री सेल्सियस** वृद्धि होने पर **70% से 90%** प्रवाल भित्तियाँ नष्ट हो सकती हैं और **2 डिग्री सेल्सियस** वृद्धि पर **99%** प्रवाल भित्तियाँ समाप्त हो सकती हैं।

- Coral **"bleaching"** occurs when water temperatures rise by a degree or two, stressing the coral's animal tissues and making them expel algae, turning them white.
  प्रवाल **"ब्लीचिंग"** तब होती है जब पानी का तापमान एक या दो डिग्री बढ़ जाता है, जिससे प्रवाल ऊतकों पर तनाव पड़ता है और वे शैवाल को बाहर निकाल देते हैं, परिणामस्वरूप वे सफेद हो जाते हैं।
- More than half are concentrated in **Australia**, **the Bahamas**, **Cuba**, **Indonesia**, and **the Philippines**.
  इनमें से आधे से अधिक **ऑस्ट्रेलिया**, **बहामास**, **क्यूबा**, **इंडोनेशिया** और **फिलीपींस** में केंद्रित हैं।

17J6	Kerala plans disease 'outbreak calendar' केरल रोग 'प्रकोप कैलेंडर' की योजना बना रहा है

Kerala plans disease 'outbreak calendar'

GS III: Disaster Management

THIRUVANANTHAPURAM

The Kerala government will create a calendar to map seasonal and regional patterns of disease outbreaks in the State in a bid to give the public health system's response an added edge in the future.

Health Minister K. Muraleedharan noted at a press conference on Tuesday that, for one, Nipah cases are repeatedly reported in the Perambra region of Kozhikode between May and September. Curiously, some districts, notably Palakkad, have not reported any shigellosis cases so far, he said. "Disease patterns might vary from time to time, but several viruses seem to follow seasonal patterns," he said.

He said the reasons for pathogens following seasonal and regional patterns remained unclear and were a major area of research. An "outbreak calendar" would give the public health system greater predictive accuracy and help it calibrate disease prevention and response.

17j6. Kerala plans disease 'outbreak calendar' केरल रोग 'प्रकोप कैलेंडर' की योजना बना रहा है

Govt. orders blocking of Telegram app till NEET re-examination

GS III: Internal Security

Aroon Deep
NEW DELHI

At the National Testing Agency (NTA)'s request, the Centre is blocking the messaging app Telegram in India until Monday, in what the NTA described as a "response to the organised use of the platform by cheating rackets to defraud candidates appearing for the NEET (UG) 2026 re-examination scheduled on 21 June 2026."

On Tuesday evening, a few hours after the government's order, at least one telecom operator had already blocked access to the service, and the app's listing was taken down from Google Play and Apple's App Store. This is the first time that a messaging app operating at such a scale is being blocked in India by the Ministry of Electronics and Information Technology, even for a limited period.

The NTA emphasised that this blocking was "calibrated and bounded in time," and that it would be lifted later.

The agency said that several Telegram groups were advertising fake test papers for the upcoming NEET and defrauding candidates willing to pay for them.

Telegram founder Pavel Durov criticised the blocking, saying it "punishes" over 15 crore "ordinary Telegram users in India". 'Banning the app even temporarily, he said, "is a mistake".

"The leaks just moved to other apps", Mr. Durov added. While it is unclear what he was referring to,

The NTA has emphasised that the blocking is 'calibrated and bounded in time,' and that it would be lifted later. REUTERS

the NTA on the day kept dismissing the legitimacy of certain screenshots purported to be that of the upcoming NEET exam's question paper.

"Over the past few weeks, we removed hundreds of channels sharing leaked exam materials and related scams in India. We are also making the "edited" label more visible to prevent backdating scams," he said.

"Acting on inputs received continuously from NTA, from State law-enforcement agencies including the police forces of Bihar, Gujarat and Rajasthan, and from its own continuous monitoring of public channels and platforms, the Indian Cyber Crime Coordination Centre (I4C), under the Ministry of Home Affairs, has secured the prompt take-down of a substantial number of Telegram channels, groups and bots whose names and content openly advertised their fraudulent and misleading purpose," the agency said.

There are several Telegram groups circulating everything from pirated links to real-time news updates from established organisations; the platform has attracted many users as it offers features such as integrating bots into the platform, not typically found on other popular platforms such as WhatsApp and Signal.

In a video message, NTA Director-General Abhishek Singh said, "To all parents, I say, please protect your child from financial fraud and from the panic these rackets are designed to create. NTA is committed to a fair, secure and credible examination, and to act against every person involved in spreading these scams."

Additionally, many groups, the NTA said, were editing past messages with recent exam paper questions, to fake their capabilities in obtaining question papers in advance.

In separate directions, the IT Ministry said that it had ordered Telegram to disable message editing as well until June 30, to shut off "this avenue of fabrication for the post-examination window in which such artefacts have historically been deployed."

- Platforms, the **Indian Cyber Crime Coordination Centre (I4C)**, under the **Ministry of Home Affairs**, has secured the prompt take-down of a substantial number of Telegram channels, groups and bots whose names and content openly advertised their fraudulent and misleading purpose," the agency said.
एजेंसी ने कहा कि **NTA**, **बिहार**, **गुजरात** और **राजस्थान** की पुलिस सहित राज्य स्तरीय कानून प्रवर्तन एजेंसियों तथा सार्वजनिक चैनलों और प्लेटफार्मों की अपनी सतत निगरानी से प्राप्त सूचनाओं के आधार पर **गृह मंत्रालय** के अंतर्गत कार्यरत **भारतीय साइबर अपराध समन्वय केंद्र (I4C)** ने ऐसे अनेक टेलीग्राम चैनलों, समूहों और बॉट्स को तत्काल हटवाया है जिनके नाम और सामग्री खुले तौर पर धोखाधड़ीपूर्ण तथा भ्रामक उद्देश्यों का प्रचार कर रहे थे।
- In a video message, **NTA Director-General Abhishek Singh** said, "To all parents, I say, please protect your child from financial fraud and from the panic these rackets are designed to create.
एक वीडियो संदेश में **NTA के महानिदेशक अभिषेक सिंह** ने कहा, "मैं सभी अभिभावकों से कहना चाहता हूँ कि वे अपने बच्चों को वित्तीय धोखाधड़ी और उन घबराहट फैलाने वाले षड्यंत्रों से सुरक्षित रखें जिन्हें ये गिरोह जानबूझकर उत्पन्न करते हैं।

Air Force to take part in 'Exercise Pitch Black'

GS II: Internal Security

The Hindu Bureau
NEW DELHI

The Indian Air Force (IAF) will participate in Exercise Pitch Black 2026, the Royal Australian Air Force's (RAAF) premier multinational air combat exercise, scheduled to be held in Australia's Northern Territory from July 20 to August.

Australian High Commissioner to India Philip Green OAM announced India's participation on X on Tuesday, tagging the IAF's official handle and citing the exercise as an opportunity to strengthen regional interoperability across the Indo-Pacific.

According to the Australian Defence Ministry, the exercise will bring together more than 100 aircraft and personnel from 19 allied and partner nations, providing a platform for participating air forces to enhance operational interoperability, strengthen military cooperation, and refine air combat tactics. Exercise Pitch Black is the RAAF's largest international exercise.

Kerala rolls out free travel for women on KSRTC buses

The scheme will cover around 3,125 ordinary buses operated by the KSRTC in seven categories; CM says KSRTC will not face any financial burden due to the implementation of the scheme

PCS

The Hindu Bureau
THIRUVANANTHAPURAM

Billed as a significant step towards women's empowerment, the Kerala government on Monday launched its flagship 'Priyadarshini' free travel scheme for all women and transgender persons on ordinary buses operated by the Kerala State Road Transport Corporation (KSRTC).

Chief Minister V.D. Satheesan inaugurated the scheme at the Thampanoor Central Bus Station around 9.30 a.m.

The scheme will cover around 3,125 ordinary buses operated by the KSRTC, although not all of them are in service due to operational constraints.

CM V.D .Satheesan, right, with Transport Minister C.P. John and other dignitaries during the launch of 'Priyadarshini' on Monday. PTI

Under the scheme, women and transgender persons can travel free of charge on seven categories of KSRTC ordinary services – ordinary, city ordinary, limited-stop ordinary, fair-stage ordinary, town-to-town, point-to-point, and Gramavandi services.

Terming the launch "a proud moment for Kerala," Mr. Satheesan said the free travel initiative was "not an act of generosity" towards women, but a well-crafted scheme that will have far-reaching socio-economic benefits. The KSRTC will not face any financial burden due to the implementation of the scheme, he said.

During the initial phase, women and transgender passengers will be allowed to travel free of charge on ordinary bus services for the first 100 days. After a review of the scheme's performance, the government plans to extend the benefit to other categories of services.

A section of commuters alleged that the number of buses carrying the City Fast tag swelled overnight in Thiruvananthapuram city on Monday, depriving many passengers of the benefits of the scheme.

The authorities clarified that the scheme is not available on City Fast services in the first phase.

U.K. govt. bans social media for children under 16

PCS

Associated Press

LONDON

Britain will ban children aged under 16 from using social media apps, including Snapchat, TikTok and YouTube, to protect them from harmful content and excessive screen time, Prime Minister Keir Starmer said on Monday.

The plan was met with mixed reaction, with some praising Mr. Starmer for taking action and others questioning the effectiveness of a blanket ban.

YouTube and Meta, the parent company of Facebook and Instagram, warned that a blanket ban could push kids into unregulated online spaces.

Mr. Starmer acknowledged the challenges, but said: "I do believe we can enforce it."

"Every parent can see it with their own eyes. Social media is making children unhappy."

Global movement

The ban, which is expected to take effect early next year, makes the U.K. part of a growing global movement to tighten online safety for children.

Australia, Canada, Brazil and Indonesia have introduced legislation or announced age-based restrictions or requirements for children's access to social media.

The U.K. said its ban will apply to platforms including Snapchat, TikTok, YouTube, Instagram, Facebook and X, but not YouTube Kids or messaging services like WhatsApp and Signal.

Mr. Starmer stressed that enforcement action will target tech companies, not children.

16J6. U.K. govt. bans social media for children under 16

ब्रिटेन सरकार ने 16 वर्ष से कम आयु के बच्चों के लिए सोशल मीडिया पर प्रतिबंध लगाया

- Britain will ban children aged under **16** from using **social media apps**, including **Snapchat, TikTok and YouTube**, to protect them from harmful content and excessive screen time, **Prime Minister Keir Starmer** said on Monday.

ब्रिटेन 16 वर्ष से कम आयु के बच्चों को **सोशल मीडिया ऐप्स** जैसे **स्नैपचैट, टिकटॉक और यूट्यूब** का उपयोग करने से प्रतिबंधित करेगा, ताकि उन्हें हानिकारक सामग्री और अत्यधिक स्क्रीन समय से बचाया जा सके, यह बात सोमवार को **प्रधानमंत्री कीर स्टार्मर** ने कही।

- **YouTube** and **Meta**, the parent company of **Facebook** and **Instagram**, warned that a blanket ban could push kids into unregulated online spaces.

यूट्यूब और **मेटा**, जो **फेसबुक** और **इंस्टाग्राम** की मूल कंपनी है, ने चेतावनी दी कि ऐसा व्यापक प्रतिबंध बच्चों को अनियमित ऑनलाइन मंचों की ओर धकेल सकता है।

- The ban, which is expected to take effect early next year, makes the **U.K.** part of a growing global movement to tighten **online safety for children**.

यह प्रतिबंध, जिसके अगले वर्ष की शुरुआत में लागू होने की उम्मीद है, **ब्रिटेन** को बच्चों की **ऑनलाइन सुरक्षा** को मजबूत करने वाले बढ़ते वैश्विक अभियान का हिस्सा बनाता है।

- **Australia, Canada, Brazil and Indonesia** have introduced legislation or announced age-based restrictions or requirements for children's access to social media.

ऑस्ट्रेलिया, कनाडा, ब्राज़ील और इंडोनेशिया ने सोशल मीडिया तक बच्चों की पहुँच के लिए कानून बनाए हैं या आयु-आधारित प्रतिबंधों अथवा आवश्यकताओं की घोषणा की है।

- The **U.K.** said its ban will apply to platforms including **Snapchat, TikTok, YouTube, Instagram, Facebook and X**, but not **YouTube Kids** or messaging services like **WhatsApp** and **Signal**.

ब्रिटेन ने कहा कि उसका प्रतिबंध **स्नैपचैट, टिकटॉक, यूट्यूब, इंस्टाग्राम, फेसबुक और एक्स** जैसे प्लेटफॉर्म पर लागू होगा, लेकिन **यूट्यूब किड्स** या **व्हाट्सएप** और **सिग्नल** जैसी संदेश सेवाओं पर लागू नहीं होगा।

16J6	QUIZ: Mona Lisa

Questions and Answers to the previous day's daily quiz: 1. Who is widely believed to be the woman depicted in the Mona Lisa? **Ans: Lisa Gherardini del Giocondo, the wife of Florentine merchant Francesco del Giocondo**
2. Around what year is Leonardo da Vinci believed to have begun painting the Mona Lisa? **Ans: Around 1503**
3. What is the approximate size of the Mona Lisa? **Ans: About 77 cm × 53 cm (30 in × 21 in)**
4. Which artistic technique, heavily employed in the Mona Lisa, creates the painting's characteristic soft transitions between light and shadow? **Ans: Sfumato**
5. Which French king acquired the Mona Lisa for the royal collection? **Ans: King Francis I of France**
6. What major event in 1911 dramatically increased the painting's worldwide fame? **Ans: It's theft from the Louvre by Vincenzo Peruggia**
Visual: Which Italian Renaissance master executed this sketch of a young woman before a landscape, believed to have been directly influenced by Leonardo's Mona Lisa? **Ans: Raphael**
Early Birds: Prem Nath Tiwari | K.N. Viswanathan | Piyali Tuli | Tamal Biswas | Arun Kumar Singh

16J6. QUIZ

1. Who is widely believed to be the woman depicted in the Mona Lisa?

- The woman portrayed in Leonardo da Vinci's **Mona Lisa** is widely identified as **Lisa Gherardini del Giocondo**, the wife of Florentine silk merchant **Francesco del Giocondo**.

- Because of her husband's surname, the painting is also known as **La Gioconda** in Italian and **La Joconde** in French.

2. Around what year is Leonardo da Vinci believed to have begun painting the Mona Lisa?

- Most scholars agree that **Leonardo da Vinci** began painting the Mona Lisa around **1503** in Florence.

- Italian Renaissance.
- However, Leonardo continued refining the painting for many years, possibly until **1516–1517**, carrying it with him to France.

3. What is the approximate size of the Mona Lisa?

- Despite its immense fame, the **Mona Lisa** is relatively small in size, measuring approximately **77 centimetres by 53 centimetres** (30 inches by 21 inches).
- The painting is executed in oil on a **poplar wood panel**, a common support used by Renaissance artists.

4. Which artistic technique, heavily employed in the Mona Lisa, creates the painting's characteristic soft transitions between light and shadow?

- The signature visual effect of the Mona Lisa comes from Leonardo's masterful use of **sfumato**, an Italian term meaning "smoky" or "softly blurred."
- This technique involves applying multiple thin layers of translucent paint to create seamless transitions between light and dark areas without visible outlines.
- Sfumato gives the portrait its lifelike quality and contributes to the famous ambiguity of Mona Lisa's smile and expression.
- Leonardo's scientific understanding of optics and human vision enabled him to perfect this technique, making the painting one of the greatest achievements of Renaissance art.

5. Which French king acquired the Mona Lisa for the royal collection?

- The Mona Lisa entered the French royal collection through **King Francis I of France**, one of the most influential patrons of Renaissance art.
- Francis I invited Leonardo da Vinci to France in **1516**, where the artist spent his final years at Clos Lucé near the Château d'Amboise.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Website : patrioticias.in

- Leonardo brought the Mona Lisa with him, and after his death in 1519, the painting became part of the French royal collection.
- Over the centuries, it remained in royal residences before eventually becoming one of the most treasured works displayed in the **Louvre Museum** in Paris.

6. What major event in 1911 dramatically increased the painting's worldwide fame?

- The Mona Lisa's global fame increased dramatically after its sensational **theft from the Louvre Museum in 1911** by **Vincenzo Peruggia**, an Italian museum worker.
- Peruggia believed the painting should be returned to Italy and hid it for more than two years. The disappearance generated international headlines, turning the artwork into a worldwide cultural phenomenon.
- The painting was recovered in Florence in **1913** and returned to France.

Tribal body blocks installation of *shivling* near Om Parvat, says won't allow artificial structures

GS I: Society

Press Trust of India
PITHORAGARH

The Rung community in a village in Vyans valley here on Monday refused to allow installation of a three-tonne *shivling* and Nandi in front of Om Parvat, stating they are "nature worshippers" who do not allow artificial structures on their land.

Rung is an indigenous tribal community residing primarily in border valleys of Dharchula in Uttarakhand's Pithoragarh district, known for their distinct cultural traditions of nature worship.

The Adi Kailash 20-20 Trust, an organisation claiming to work towards spreading Sanatana Dharma, had proposed installation of a *shivling* in the area.

The local administration intervened after the Rung Kalyan Sanstha raised an objection regarding the "unauthorised" import of religious installations into Vyans valley.

> The administration cannot give permission to the trust until the gram sabha and tribal association agree to the installation of the idol
>
> **ASHISH JOSHI**
> Dharchula Sub-Divisional Magistrate, Uttarakhand

The matter escalated when the trust transported the three-tonne *shivling* and Nandi up to Garbadhar, 27 km beyond Dharchula, without consulting the local tribal community or obtaining permission from the local panchayat.

Prakash Gunjiyal, president of Rung Kalyan Sanstha, Dharchula - representing the Rung people from the three valleys of Vyans, Darma, and Chaudans - said the installation violated their belief of worshipping Lord Shiva solely in his natural form. "Besides the violation of our belief of only worshipping natural forms, the installation of any artificial structure cannot be permitted on Amawasya, June 15," he said.

Dharchula Sub-Divisional Magistrate Ashish Joshi said the administration recalled the vehicle to Dharchula after learning that the group had not obtained permission from the gram sabha concerned and the Rung community. "It is a matter between the Rung community and the trust. The administration cannot give permission to the trust until the gram sabha and tribal association agree to it," the official said.

GS I: Society: Population

Politics over people

Pragmatism should guide India's demographic governance

In constituting a panel to study demographic changes in India, the Centre was guided by a paranoid mindset that saw devious conspiracies everywhere. The move gave shape and substance to a thought expressed by Home Minister Amit Shah: "unnatural demographic change" is a "very significant challenge to the present and future of any nation". In his Independence Day address in 2025, Prime Minister Narendra Modi announced the proposal, characterising illegal infiltration as a "premeditated conspiracy" to alter India's demography. The committee, chaired by retired Supreme Court judge Justice P.P. Naolekar, is to assess demographic changes, examine patterns of abnormal population shifts among religious and social communities, and recommend a time-bound solution. Mr. Shah linked demographic changes not only to sovereignty but also to national security, law and order, "profound changes in social structure and the preservation of tribal society". According to the government, demographic shifts have affected public service delivery, local governance, resource distribution and social cohesion, and Justice Naolekar has said that the panel will also formulate a system for the custody and deportation of infiltrators.

It is indeed true that the management of population dynamics is a key instrument of governance. On June 14, Switzerland held a referendum and rejected a proposal to cap the country's population at 10 million. Across the world, immigration has become contentious, with unregulated cross-border movement seen as a challenge to sovereignty. Population management, however, is not entirely about illegal infiltration, and securitising demographic trends at the cost of all adjacent factors could do more harm than good. As the recent experience with the SIR of electoral rolls shows, facts about people would be seen as valid only to the extent that these are established through documentation. If this exercise creates a large stateless population with no country willing to accept them, it could result in a demographic deadlock rather than a solution. The fear of communal profiling of Muslims is real, and the Centre should also seriously consider whether the human costs are worth it. India faces major demographic challenges. Rising life expectancy and falling birth rates are changing the composition of India's population. There are concerns of India losing its demographic dividend, as the quality of education and health, and the evolving dynamics of work, remain very challenging. Migration continues to shape India's trajectory. Partition created three sovereign countries out of a geographical and cultural continuum, and its legacy included voluntary and involuntary movement of people. Sensitivity and a long-term view should guide India's demographic governance.

16J6. Politics over people
जनहित से ऊपर राजनीति

- The move gave shape and substance to a thought expressed by Home Minister **Amit Shah**: "unnatural demographic change" is a "very significant challenge to the present and future of any nation".

इस कदम ने गृह मंत्री **अमित शाह** द्वारा व्यक्त उस विचार को स्वरूप और आधार प्रदान किया, जिसमें उन्होंने कहा था कि "अप्राकृतिक जनसांख्यिकीय परिवर्तन" किसी भी राष्ट्र के वर्तमान और भविष्य के लिए "एक अत्यंत महत्वपूर्ण चुनौती" है।

- The committee, chaired by retired Supreme Court judge **Justice P.P. Naolekar**, is to assess demographic changes, examine patterns of abnormal population shifts among religious and social communities, and recommend a time-bound solution.

सेवानिवृत्त सर्वोच्च न्यायालय के न्यायाधीश **न्यायमूर्ति पी.पी. नाओलेकर** की अध्यक्षता वाली समिति जनसांख्यिकीय परिवर्तनों का आकलन करेगी, धार्मिक एवं सामाजिक समुदायों के बीच असामान्य जनसंख्या परिवर्तनों के स्वरूप का अध्ययन करेगी तथा समयबद्ध समाधान सुझाएगी।

- Mr. Shah linked demographic changes not only to **sovereignty** but also to **national security**, law and order, "profound changes in social structure and the preservation of tribal society".

श्री शाह ने जनसांख्यिकीय परिवर्तनों को केवल **संप्रभुता** से ही नहीं, बल्कि **राष्ट्रीय सुरक्षा**, कानून एवं व्यवस्था, "सामाजिक संरचना में गहरे परिवर्तन तथा जनजातीय समाज के संरक्षण" से भी जोड़ा।

- According to the government, demographic shifts have affected public service delivery, local governance, resource distribution and social cohesion, and Justice Naolekar has said that the panel will also formulate a system for the custody and deportation of infiltrators.

सरकार के अनुसार, जनसांख्यिकीय परिवर्तनों ने सार्वजनिक सेवाओं की आपूर्ति, स्थानीय शासन, संसाधनों के वितरण तथा सामाजिक एकता को प्रभावित किया है, और न्यायमूर्ति नाओलेकर ने कहा है कि समिति घुसपैठियों की हिरासत और निर्वासन के लिए भी एक प्रणाली तैयार करेगी।

- On June 14, **Switzerland** held a referendum and rejected a proposal to cap the country's population at 10 million.

14 जून को **स्विट्ज़रलैंड** ने एक जनमत-संग्रह आयोजित किया और देश की जनसंख्या को 10 मिलियन तक सीमित करने के प्रस्ताव को अस्वीकार कर दिया।

- Across the world, immigration has become contentious, with unregulated cross-border movement seen as a challenge to sovereignty.

विश्वभर में आव्रजन एक विवादास्पद विषय बन गया है, और अनियंत्रित सीमा-पार आवाजाही को संप्रभुता के लिए चुनौती के रूप में देखा जा रहा है।

- Population management, however, is not entirely about illegal infiltration, and securitising demographic trends at the cost of all adjacent factors could do more harm than good.

हालाँकि, जनसंख्या प्रबंधन केवल अवैध घुसपैठ तक सीमित नहीं है, और जनसांख्यिकीय प्रवृत्तियों को अन्य सभी संबंधित कारकों की उपेक्षा करते हुए सुरक्षा के दृष्टिकोण से देखना लाभ से अधिक हानि पहुँचा सकता है।

- If this exercise creates a large stateless population with no country willing to accept them, it could result in a demographic deadlock rather than a solution.
  यदि यह प्रक्रिया बड़ी संख्या में ऐसे राज्यविहीन लोगों को जन्म देती है जिन्हें स्वीकार करने के लिए कोई देश तैयार न हो, तो यह समाधान के बजाय जनसांख्यिकीय गतिरोध उत्पन्न कर सकती है।
- The fear of communal profiling of **Muslims** is real, and the Centre should also seriously consider whether the human costs are worth it.
  मुसलमानों के सांप्रदायिक प्रोफाइलिंग के भय को नज़रअंदाज़ नहीं किया जा सकता, और केंद्र सरकार को यह भी गंभीरता से विचार करना चाहिए कि इसकी मानवीय लागत उचित है या नहीं।
- Rising **life expectancy** and falling **birth rates** are changing the composition of India's population.
  बढ़ती **जीवन प्रत्याशा** और घटती **जन्म दरें** भारत की जनसंख्या की संरचना को बदल रही हैं।
- There are concerns of India losing its **demographic dividend**, as the quality of education and health, and the evolving dynamics of work, remain very challenging.
  भारत के अपने **जनसांख्यिकीय लाभांश** को खोने की आशंका व्यक्त की जा रही है, क्योंकि शिक्षा और स्वास्थ्य की गुणवत्ता तथा कार्य-क्षेत्र की बदलती गतिशीलताएँ अभी भी अत्यंत चुनौतीपूर्ण बनी हुई हैं।
- **Partition** created three sovereign countries out of a geographical and cultural continuum, and its legacy included voluntary and involuntary movement of people.
  विभाजन ने एक भौगोलिक एवं सांस्कृतिक निरंतरता से तीन संप्रभु देशों का निर्माण किया, और इसकी विरासत में लोगों का स्वैच्छिक तथा अनैच्छिक विस्थापन भी शामिल था।

When a small town sends one of its own to Raisina Hill

GS I: Geography

Satyasundar Barik
BHUBANESWAR

What happens when a nondescript town produces the occupant of India's highest office? Transformation becomes inevitable. If even a fraction of the projects lined up materialise, Rairangpur in Odisha, the hometown of President Droupadi Murmu, will have a compelling story to tell. With just over a year left in her tenure, the town is poised to host some of the country's prominent educational institutions and a slate of development projects. Her tribal-dominated Mayurbhanj district is also set to receive a share of the investments.

Some of the projects are likely to be announced during the scheduled visit of the President and Prime Minister Narendra Modi to Mayurbhanj this week.

A Government Ayurvedic Medical College and Hospital will be set up on 50 acres identified under Rairangpur Tahasil.

The Odisha government has accorded approval for the establishment of a second campus of the Indian Institute of Forest Management at Rairangpur. An area of 134.89 acres in Sulidumа and Kusumi villages under Kusumi Tahasil in Mayurbhanj has been identified for the institute.

In-principle approval has been granted for the establishment of an Indian Institute of Information Technology at Rairangpur, which will function under Maharaja Sriram Chandra Bhanja Deo University, Baripada. The State Higher Education Department has released a one-time capital grant of ₹1,67,25,600 toward non-recurring expenditure for the institute's initial establishment.

Some projects are likely to be announced during the scheduled visit of President Droupadi Murmu to Mayurbhanj this week. FILE PHOTO

A Central Tribal University has also been proposed for Rairangpur. The Higher Education Department has identified 70.79 acres in Bijatala block near Rairangpur for the purpose. At Nuagaon in Rairangpur, 25 acres have been identified for an AIIMS Bhubaneswar satellite centre. A Central Agricultural and Horticulture College of the Odisha University of Agriculture and Technology will be established in Rairangpur.

The State Industries and MSME Department has been requested to provide the necessary guidance for establishing IT park infrastructure at Bamanghaty near Rairangpur.

The Principal Chief Conservator of Forests has been requested to involve the Wildlife Institute of India in preparing a dossier for the nomination of Similipal National Park as a UNESCO World Heritage Site.

A proposal has also been submitted for setting up a world-class skill university on the lines of Shri Vishwakarma Skill University, Palwal, Haryana, at Rairangpur.

The Union Ministry of Civil Aviation has allocated ₹45 crore for operationalising flights between Rairangpur and Rourkela once the Dandbose airstrip is ready. Sports infrastructure, including a national-level sports complex, an archery complex and an international-standard indoor stadium, has also been proposed for Rairangpur.

The government has proposed increasing the area under irrigation in the district to 60% from the present 37%.

Several other projects, including a National Institute of Design, a major office of the Postal Department, a Mayurbhanj campus of the College of Fisheries, girls' hostels in the district and the development of Rairangpur as a separate police district, have also been proposed. In addition, some industrial projects have been proposed for Rairangpur.

The proposals to establish institutions of higher education in and around Rairangpur are being viewed as a tribute to Ms. Murmu's perseverance and journey from the region to the country's highest constitutional office.

Russian strikes across Ukraine kill 11, famed monastery in Kyiv catches fire

Moscow fires hundreds of drones and dozens of missiles in overnight barrage; Zelenskyy calls for increased pressure from G7 leaders and global partners after air assault; Ukrainian drone strike kills three people in Russia's Tula region, officials say

GS I: Geography

Agence France-Presse
KYIV

An overnight Russian barrage of missiles killed at least 11 people across Ukraine and sparked a fire at one of the most important Orthodox monasteries in the capital, Kyiv said on Monday.

In response to the assault, Ukrainian President Volodymyr Zelenskyy called for more pressure on Moscow from G7 leaders, who were gathering at a summit in France.

The violence killed five people and wounded 34 in the capital as a fire broke out on the grounds of the Kyiv-Pechersk Lavra UNESCO world heritage site, setting ablaze the roof of its Dormition Cathedral.

Rescue dawn: Emergency responders in action at the Dormition Cathedral following a Russian strike in Kyiv on Monday. AP

"This is one of Russia's most serious crimes against Christian culture to date," Mr. Zelenskyy said on social media.

The UN's cultural agency UNESCO condemned the air raid, saying that "the strike reportedly caused significant damage to the exterior and interior of the cathedral".

After he visited the site, Mr. Zelenskyy said two Russian drones "deliberately" targeted Kyiv's monastery quarter.

'Outdated U.S. missile'

Russia's military said it had carried out a "massive strike" on military sites in Kyiv, as well as the Kharkiv and Dnipro regions, but denied targeting the Lavra, saying it was hit by an outdated U.S. Patriot air defence missile.

Moscow fired 70 missiles and 611 drones, mainly targeting the capital, Ukraine's air force said, adding that it had downed 50 of the missiles and 582 drones.

In total, 11 people were killed in the overnight barrage, including five in the northeastern city of Kharkiv.

Founded in the 11th century, the site holds huge significance for Orthodox believers in both Ukraine and Russia.

Kyiv's Metropolitan Epiphanius, who heads the Ukrainian Orthodox Church, denounced the attack. "What more must the Kremlin antichrist do for the world to realise that decisive action must be taken to stop Russian terror against Ukraine?"

In Russia, a Ukrainian drone strike also killed three people and wounded three others in the city of Tula, local authorities said on Monday.

SC seeks govt. response to plea on RTE quota in Punjab

The Supreme Court on Monday sought responses from the Centre and the Punjab government on a plea alleging failure to implement the Right of Children to Free and Compulsory Education Act, 2009 in Punjab, particularly the mandate under Section 12(1)(c) requiring private unaided schools to reserve 25% of entry-level seats for children from weaker sections and disadvantaged groups. At the outset of the hearing, a Bench of Chief Justice Surya Kant and Justice V. Mohana asked the petitioner, who runs an NGO and appeared at the court in person, whether he had conducted any survey to substantiate the allegations. The petitioner submitted that the law remained unimplemented in Punjab for the past 15 years.

GS II: Polity

Peace with peace

Preventive detentions are misused by the state in the name of order

In *Chander Pal Singh*, a matter involving preventive proceedings, the Allahabad High Court has simultaneously addressed a part of the criminal justice system that often receives less attention than ordinary criminal proceedings and the more overbearing reality of mechanisms designed to avert disturbances having gradually become instruments to deprive people of liberty. The state has the power to intervene before a crime occurs if it is reasonably apprehensive that a person is a threat to public order. However, it has acquired a habit of exercising that power routinely, resulting in detentions without any substantive criminal charge. The High Court's order was based, the Bench said, on a "highly irresponsible" deprivation of personal liberties in Uttar Pradesh, where police officers and executive magistrates were using preventive powers to incarcerate individuals on the basis of arguably minor apprehensions. In *Chander Pal Singh* as well, the petitioner, a physically challenged Dalit advocate, had been arrested over a petty dispute with a neighbour. The Bench said that between May 2025 and April 2026, around 2,500 people were reportedly subjected to preventive detention proceedings in Ghaziabad, despite a 2021 State policy to guide the exercise of such powers.

The guidelines in response are commendable; if implemented appropriately, they could reduce the use of preventive incarceration in neighbourhood and property disputes; require executive magistrates to justify their decisions; encourage constitutional challenges to unlawful preventive detention; and generate appellate scrutiny of the compensation framework. They may also snap at the heels of magistrates who cite unspecified "communal tensions" to jail protesters and who impose prohibitively unaffordable bonds for release. Further, even if the ruling does not directly impinge on the detention of activist Sonam Wangchuk under the NSA, it critiques the idea of using the excuse of maintaining peace to silence dissent and reminds the state that it still has a responsibility to maintain peace with peace. The ruling may also apply to workers and activists recently detained in New Delhi if held under Sections 126 or 170 of the BNSS without valid grounds. That said, implementing the ruling will be difficult. The Bench said that compensation for unlawful detention can be recovered from the salary of the magistrate concerned and/or police officer following a disciplinary hearing. However, the executive has been historically reluctant to penalise its personnel. Second, executive magistrates are part of the State administration and their careers may depend on maintaining 'peace' as the State defines it. Addressing these barriers could reform preventive proceedings in India.

16J6. Peace with peace
शांति के माध्यम से शांति

- The state has the power to intervene before a crime occurs if it is reasonably apprehensive that a person is a threat to **public order**.

राज्य के पास अपराध घटित होने से पूर्व हस्तक्षेप करने की शक्ति होती है, यदि उसे यह युक्तिसंगत आशंका हो कि कोई व्यक्ति **लोक व्यवस्था** के लिए खतरा बन सकता है।

- However, it has acquired a habit of exercising that power routinely, resulting in detentions without any substantive criminal charge.

हालाँकि, राज्य ने इस शक्ति का नियमित रूप से प्रयोग करने की प्रवृत्ति विकसित कर ली है, जिसके परिणामस्वरूप बिना किसी ठोस आपराधिक आरोप के लोगों को निरुद्ध किया जाता है।

- The High Court's order was based, the Bench said, on a "highly irresponsible" deprivation of **personal liberties** in Uttar Pradesh, where police officers and executive magistrates were using preventive powers to incarcerate individuals on the basis of arguably minor apprehensions.

पीठ ने कहा कि उच्च न्यायालय का आदेश उत्तर प्रदेश में **व्यक्तिगत स्वतंत्रताओं** के "अत्यंत गैर-जिम्मेदाराना" हनन पर आधारित था, जहाँ पुलिस अधिकारी और कार्यपालिका मजिस्ट्रेट मामूली आशंकाओं के आधार पर लोगों को कारावास में भेजने हेतु निवारक शक्तियों का उपयोग कर रहे थे।

- In **Chander Pal Singh** as well, the petitioner, a physically challenged **Dalit advocate**, had been arrested over a petty dispute with a neighbour.

चंदर पाल सिंह मामले में भी याचिकाकर्ता, जो एक दिव्यांग **दलित अधिवक्ता** थे, को पड़ोसी के साथ एक मामूली विवाद के कारण गिरफ्तार किया गया था।

- The Bench said that between May 2025 and April 2026, around 2,500 people were reportedly subjected to preventive detention proceedings in **Ghaziabad**, despite a 2021 State policy to guide the exercise of such powers.

पीठ ने कहा कि मई 2025 से अप्रैल 2026 के बीच **गाज़ियाबाद** में लगभग 2,500 लोगों को निवारक निरोध कार्यवाहियों का सामना करना पड़ा, जबकि ऐसी शक्तियों के प्रयोग को निर्देशित करने हेतु वर्ष 2021 की राज्य नीति पहले से मौजूद थी।

- The guidelines in response are commendable; if implemented appropriately, they could reduce the use of preventive incarceration in neighbourhood and property disputes; require executive magistrates to justify their decisions; encourage constitutional challenges to unlawful preventive detention; and generate appellate scrutiny of the compensation framework.

इस संदर्भ में जारी दिशानिर्देश सराहनीय हैं; यदि उनका उचित क्रियान्वयन किया जाए, तो वे पड़ोस और संपत्ति संबंधी विवादों में निवारक कारावास के उपयोग को कम कर सकते हैं; कार्यपालिका मजिस्ट्रेटों को अपने निर्णयों का औचित्य सिद्ध करने के लिए बाध्य कर सकते हैं; अवैध निवारक निरोध के विरुद्ध संवैधानिक चुनौतियों को प्रोत्साहित कर सकते हैं; तथा क्षतिपूर्ति व्यवस्था की अपीलीय समीक्षा सुनिश्चित कर सकते हैं।

- They may also snap at the heels of magistrates who cite unspecified "communal tensions" to jail protesters and who impose prohibitively unaffordable bonds for release.
  वे उन मजिस्ट्रेटों पर भी अंकुश लगा सकते हैं जो अस्पष्ट "सांप्रदायिक तनावों" का हवाला देकर प्रदर्शनकारियों को जेल भेजते हैं तथा रिहाई के लिए अत्यधिक महँगी और वहन न की जा सकने वाली जमानती शर्तें लगाते हैं।
- Further, even if the ruling does not directly impinge on the detention of activist **Sonam Wangchuk** under the **NSA**, it critiques the idea of using the excuse of maintaining peace to silence dissent and reminds the state that it still has a responsibility to maintain peace with peace.
  इसके अतिरिक्त, यद्यपि यह निर्णय **राष्ट्रीय सुरक्षा अधिनियम (NSA)** के अंतर्गत कार्यकर्ता **सोनम वांगचुक** की निरुद्धि को प्रत्यक्ष रूप से प्रभावित नहीं करता, फिर भी यह शांति बनाए रखने के बहाने असहमति को दबाने की प्रवृत्ति की आलोचना करता है तथा राज्य को स्मरण कराता है कि उसकी जिम्मेदारी शांति के माध्यम से शांति बनाए रखने की भी है।
- The ruling may also apply to workers and activists recently detained in **New Delhi** if held under Sections **126** or **170** of the **BNSS** without valid grounds.
  यदि हाल ही में **नई दिल्ली** में निरुद्ध किए गए श्रमिकों और कार्यकर्ताओं को **BNSS** की धारा **126** या **170** के अंतर्गत बिना वैध आधार के हिरासत में रखा गया है, तो यह निर्णय उन पर भी लागू हो सकता है।
- The Bench said that compensation for unlawful detention can be recovered from the salary of the magistrate concerned and/or police officer following a disciplinary hearing.
  पीठ ने कहा कि अवैध निरोध के लिए दी जाने वाली क्षतिपूर्ति संबंधित मजिस्ट्रेट और/या पुलिस अधिकारी के वेतन से, अनुशासनात्मक सुनवाई के बाद, वसूल की जा सकती है।
- However, the executive has been historically reluctant to penalise its personnel.
  हालाँकि, कार्यपालिका ऐतिहासिक रूप से अपने अधिकारियों को दंडित करने के प्रति अनिच्छुक रही है।
- Second, executive magistrates are part of the State administration and their careers may depend on maintaining 'peace' as the State defines it.
  दूसरे, कार्यपालिका मजिस्ट्रेट राज्य प्रशासन का हिस्सा होते हैं और उनका कैरियर उस 'शांति' को बनाए रखने पर निर्भर हो सकता है, जिसकी परिभाषा राज्य स्वयं निर्धारित करता है।

Indian seafarers not to be deployed in conflict zones: DGS

GS II: Governance

S. Vijay Kumar
CHENNAI

The Directorate General of Shipping (DGS) has advised maritime recruitment and placement agencies not to deploy Indian seafarers to conflict zones until further notice. However, companies may carry out crew changes in emergency situations with the consent of the crew.

The safety advisory sent to all stakeholders comes days after three Indian seafarers were killed in a U.S. strike on *Settebello* off the coast of Oman. The shipping regulator said recent developments in the Gulf region, particularly in and around the Strait of Hormuz and the Gulf of Oman, had resulted in multiple security incidents involving merchant vessels carrying Indian seafarers.

Navigational warnings

Incidents involving *Marivex*, *Settebello* and *Jalveer* during the past few days highlighted the increasing risks faced by commercial ships operating in the region. The DGS directed masters of vessels operating in or transiting through the Gulf region, including the Strait of Hormuz, to maintain heightened security awareness, closely monitor navigational warnings issued by security agencies, and implement all applicable ship security measures.

"This Directorate further reiterates that all Recruitment and Placement Service License (RPSL) companies and shipping companies are advised not to deploy or send Indian seafarers to conflict areas until further orders."

The DGS said it was closely monitoring the evolving situation in coordination with various Ministries, the Indian Navy and other stakeholders to ensure safety and welfare.

The DGS urged all maritime stakeholders to exercise the highest degree of vigilance and caution while operating in the conflict zone and to promptly report any incident involving Indian seafarers to the authorities concerned.

16J6. Indian seafarers not to be deployed in conflict zones: DGS

डीजीएस ने कहा, भारतीय नाविकों को संघर्ष क्षेत्रों में तैनात नहीं किया जाएगा

- The **Directorate General of Shipping (DGS)** has advised maritime recruitment and placement agencies not to deploy **Indian seafarers** to conflict zones until further notice.

नौवहन महानिदेशालय (DGS) ने समुद्री भर्ती एवं नियुक्ति एजेंसियों को अगले आदेश तक **भारतीय नाविकों** को संघर्ष क्षेत्रों में तैनात न करने की सलाह दी है।

- However, companies may carry out crew changes in emergency situations with the consent of the crew.

हालाँकि, आपातकालीन परिस्थितियों में कंपनियाँ चालक दल की सहमति से क्रू परिवर्तन कर सकती हैं।

- The safety advisory sent to all stakeholders comes days after three Indian seafarers were killed in a **U.S. strike** on **Settebello** off the coast of **Oman**.

सभी हितधारकों को जारी यह सुरक्षा परामर्श **ओमान** तट के निकट **सेट्टेबेलो** पर हुए **अमेरिकी हमले** में तीन भारतीय नाविकों की मृत्यु के कुछ दिनों बाद जारी किया गया है।

- The shipping regulator said recent developments in the **Gulf region**, particularly in and around the **Strait of Hormuz** and the **Gulf of Oman**, had resulted in multiple security incidents involving merchant vessels carrying Indian seafarers.

नौवहन नियामक ने कहा कि **खाड़ी क्षेत्र**, विशेषकर **होर्मुज़ जलडमरूमध्य** और **ओमान की खाड़ी** के आसपास हाल के घटनाक्रमों के कारण भारतीय नाविकों को ले जाने वाले व्यापारिक जहाजों से संबंधित अनेक सुरक्षा घटनाएँ सामने आई हैं।

Navigational Warnings
नौवहन संबंधी चेतावनियाँ

- Incidents involving **Marivex**, **Settebello** and **Jalveer** during the past few days highlighted the increasing risks faced by commercial ships operating in the region.

पिछले कुछ दिनों में **मारिवेक्स**, **सेट्टेबेलो** और **जलवीर** से जुड़ी घटनाओं ने इस क्षेत्र में परिचालन कर रहे वाणिज्यिक जहाजों के समक्ष बढ़ते जोखिमों को उजागर किया है।

- The DGS directed masters of vessels operating in or transiting through the Gulf region, including the **Strait of Hormuz**, to maintain heightened security awareness, closely monitor navigational warnings issued by security agencies, and implement all applicable ship security measures.

DGS ने खाड़ी क्षेत्र, जिसमें **होर्मुज़ जलडमरूमध्य** भी शामिल है, में संचालित या वहाँ से गुजरने वाले जहाजों के कप्तानों को उच्च स्तर की सुरक्षा सतर्कता बनाए रखने, सुरक्षा एजेंसियों द्वारा जारी नौवहन चेतावनियों की निरंतर निगरानी करने तथा सभी लागू जहाज सुरक्षा उपायों को लागू करने का निर्देश दिया है।

- "This Directorate further reiterates that all **Recruitment and Placement Service License (RPSL)** companies and shipping companies are advised not to deploy or send Indian seafarers to conflict areas until further orders."
  "यह निदेशालय पुनः स्पष्ट करता है कि सभी **रिक्रूटमेंट एंड प्लेसमेंट सर्विस लाइसेंस (RPSL)** कंपनियों तथा शिपिंग कंपनियों को अगले आदेश तक भारतीय नाविकों को संघर्ष क्षेत्रों में तैनात या भेजने से बचने की सलाह दी जाती है।"
- The DGS said it was closely monitoring the evolving situation in coordination with various Ministries, the **Indian Navy** and other stakeholders to ensure safety and welfare.
  DGS ने कहा कि वह सुरक्षा और कल्याण सुनिश्चित करने के लिए विभिन्न मंत्रालयों, **भारतीय नौसेना** तथा अन्य हितधारकों के साथ समन्वय में स्थिति पर लगातार निगरानी रख रहा है।
- The DGS urged all maritime stakeholders to exercise the highest degree of vigilance and caution while operating in the conflict zone and to promptly report any incident involving Indian seafarers to the authorities concerned.
  DGS ने सभी समुद्री हितधारकों से संघर्ष क्षेत्रों में कार्य करते समय उच्चतम स्तर की सतर्कता और सावधानी बरतने तथा भारतीय नाविकों से जुड़ी किसी भी घटना की तुरंत संबंधित प्राधिकरणों को सूचना देने का आग्रह किया है।

Social media, video platforms surpass traditional outlets as leading news sources: report

GS II: Governance

The Hindu Bureau
CHENNAI

Trust in news is at its lowest level globally since 2015, as interest in news dwindles; at the same time, more people around the world are accessing news through third-party platforms, such as social media and video networks, rather than through websites and television channels of established news brands, according to the 15th edition of the Reuters Institute's Digital News Report.

The report, produced in collaboration with the Asian College of Journalism, Chennai, is based on an online survey of nearly one lakh people across 48 markets worldwide.

Consumption patterns have changed, the study found, with audiences' growing disengagement with news; even so, trust in established news brands and support for the idea of impartial news persist.

However, globally, social media and video networks – Facebook, Instagram, TikTok, and YouTube – have overtaken news organisations' own websites and apps as the most widely used means of accessing news.

The proportion of people using social media and video networks as their primary source of news has also risen; while this trend is more evident among younger audiences, it is prevalent across all age groups, the study found.

It also found that the younger generations are unlikely to acquire the news habits of their parents, such as reading a newspaper.

In fact, older audiences are moving towards the consumption habits of younger audiences, the study found.

There has also been a rise in the use of AI chatbots as a means of accessing news, the study found, with 10% of respondents globally now using them. This is especially true among audiences below 35 years of age.

Less trust in news

Paradoxically, while traditional news sources decline amid the emergence of platforms, people are also more concerned about misinformation and put less trust in the news they come across.

There has been a marked rise in the consumption of online news videos. The study found that 77% of its global sample consume online news videos every week.

These people are, however, consuming them not on news websites or apps but on third-party platforms such as YouTube, Instagram, TikTok, and Facebook.

16J6. Social media, video platforms surpass traditional outlets as leading news sources: report

रिपोर्ट: सोशल मीडिया और वीडियो प्लेटफ़ॉर्म प्रमुख समाचार स्रोतों के रूप में पारंपरिक माध्यमों से आगे निकले

- Trust in news is at its lowest level globally since **2015**, as interest in news dwindles.
  समाचारों में रुचि घटने के साथ-साथ वैश्विक स्तर पर समाचारों पर **विश्वास** 2015 के बाद अपने सबसे निचले स्तर पर पहुँच गया है।
- At the same time, more people around the world are accessing news through **third-party platforms**, such as social media and video networks, rather than through websites and television channels of established news brands, according to the **15th edition of the Reuters Institute's Digital News Report**.
  साथ ही, **रॉयटर्स इंस्टीट्यूट की डिजिटल न्यूज़ रिपोर्ट** के 15वें संस्करण के अनुसार, विश्वभर में अधिक लोग स्थापित समाचार संस्थानों की वेबसाइटों और टेलीविज़न चैनलों के बजाय **तृतीय-पक्ष मंचों**, जैसे सोशल मीडिया और वीडियो नेटवर्कों, के माध्यम से समाचार प्राप्त कर रहे हैं।

- The report, produced in collaboration with the **Asian College of Journalism, Chennai**, is based on an online survey of nearly **one lakh people** across **48 markets** worldwide.
  एशियन कॉलेज ऑफ जर्नलिज्म, चेन्नई के सहयोग से तैयार की गई यह रिपोर्ट विश्व के **48 बाज़ारों** में लगभग **एक लाख लोगों** के ऑनलाइन सर्वेक्षण पर आधारित है।

Changing Consumption Patterns
समाचार उपभोग के बदलते स्वरूप

- Consumption patterns have changed, the study found, with audiences' growing disengagement with news.
  अध्ययन में पाया गया कि समाचार उपभोग के स्वरूप में परिवर्तन आया है और दर्शकों की समाचारों से दूरी लगातार बढ़ रही है।
- Even so, trust in established news brands and support for the idea of **impartial news** persist.
  फिर भी, स्थापित समाचार संस्थानों पर विश्वास तथा **निष्पक्ष समाचार** की अवधारणा के प्रति समर्थन अभी भी बना हुआ है।
- However, globally, social media and video networks — **Facebook, Instagram, TikTok, and YouTube** — have overtaken news organisations' own websites and apps as the most widely used means of accessing news.
  हालाँकि, वैश्विक स्तर पर **फेसबुक, इंस्टाग्राम, टिकटॉक और यूट्यूब** जैसे सोशल मीडिया एवं वीडियो मंच समाचार प्राप्त करने के सबसे अधिक उपयोग किए जाने वाले माध्यम बन गए हैं और उन्होंने समाचार संस्थानों की वेबसाइटों एवं ऐप्स को पीछे छोड़ दिया है।
- The proportion of people using social media and video networks as their primary source of news has also risen.
  समाचार के प्राथमिक स्रोत के रूप में सोशल मीडिया और वीडियो नेटवर्कों का उपयोग करने वाले लोगों का अनुपात भी बढ़ा है।
- While this trend is more evident among younger audiences, it is prevalent across all age groups, the study found.
  अध्ययन के अनुसार, यह प्रवृत्ति युवाओं में अधिक स्पष्ट है, किन्तु सभी आयु वर्गों में देखने को मिल रही है।
- It also found that the younger generations are unlikely to acquire the news habits of their parents, such as reading a newspaper.
  अध्ययन में यह भी पाया गया कि नई पीढ़ियाँ अपने माता-पिता की समाचार संबंधी आदतों, जैसे समाचार पत्र पढ़ना, को अपनाने की संभावना कम रखती हैं।
- In fact, older audiences are moving towards the consumption habits of younger audiences, the study found.
  वास्तव में, अध्ययन के अनुसार वृद्ध दर्शक भी युवाओं जैसी समाचार उपभोग की आदतों की ओर बढ़ रहे हैं।

Rise of AI and Online News Videos
एआई और ऑनलाइन समाचार वीडियो का बढ़ता प्रभाव

- There has also been a rise in the use of **AI chatbots** as a means of accessing news, the study found, with **10% of respondents globally** now using them.
  अध्ययन में पाया गया कि समाचार प्राप्त करने के माध्यम के रूप में **एआई चैटबॉट्स** का उपयोग भी बढ़ रहा है और वैश्विक स्तर पर **10% उत्तरदाता** अब इनका उपयोग कर रहे हैं।
- This is especially true among audiences below **35 years of age**.
  यह प्रवृत्ति विशेष रूप से **35 वर्ष से कम आयु** के लोगों में अधिक देखी गई।

Less Trust in News
समाचारों पर घटता विश्वास

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Paradoxically, while traditional news sources decline amid the emergence of platforms, people are also more concerned about **misinformation** and put less trust in the news they come across.
  विरोधाभासी रूप से, जहाँ एक ओर पारंपरिक समाचार स्रोतों का महत्व घट रहा है, वहीं दूसरी ओर लोग **भ्रामक सूचना (Misinformation)** को लेकर अधिक चिंतित हैं और उन्हें प्राप्त होने वाले समाचारों पर कम विश्वास कर रहे हैं।
- There has been a marked rise in the consumption of **online news videos**.
  ऑनलाइन समाचार वीडियो के उपभोग में उल्लेखनीय वृद्धि दर्ज की गई है।
- The study found that **77%** of its global sample consume online news videos every week.
  अध्ययन में पाया गया कि वैश्विक नमूने के **77% लोग** प्रत्येक सप्ताह ऑनलाइन समाचार वीडियो देखते हैं।
- These people are, however, consuming them not on news websites or apps but on third-party platforms such as **YouTube, Instagram, TikTok, and Facebook**.
  हालाँकि, ये लोग समाचार वीडियो समाचार वेबसाइटों या ऐप्स पर नहीं, बल्कि **यूट्यूब, इंस्टाग्राम, टिकटॉक और फेसबुक** जैसे तृतीय-पक्ष मंचों पर देख रहे हैं।

U.S., Iran reach deal to end war, re-open Strait

Preliminary deal signed digitally on Sunday, says U.S. V-P; in person signing in Geneva on June 19

Release of assets, reparations part of deal; will collect navigation fee in the Strait, says Tehran

Military operations including in Lebanon halted; American naval blockade on Iran also terminated

GS II, IR
Stanly Johny

The U.S. and Iran have reached a preliminary agreement to end the war, lift blockades in the Strait of Hormuz and the Gulf of Oman, and launch substantive negotiations on Tehran's nuclear programme and the Western sanctions, the two countries announced on Monday. The agreement was signed digitally on Sunday, U.S. Vice-President J.D. Vance said, while Iran and Pakistan said an in-person signing ceremony would be held in Geneva, Switzerland, on June 19.

U.S. President Donald Trump said during a media interaction in France, where he arrived on Monday for the G7 meeting, that Mr. Vance will lead the country's delegation for the signing ceremony.

"The deal with the Islamic Republic of Iran is now complete... I hereby fully authorise the toll-free opening of the Strait of Hormuz, and... authorise the immediate removal of the United States Naval blockade," Mr. Trump earlier wrote in a social media post. "Ships of the world, start your engines. Let the oil flow!" he added.

Iran's Supreme National Security Council confirmed that Tehran and Washington had finalised the text of the 'memorandum of understanding' on ending the war, while its Foreign Ministry said releasing frozen assets and paying war reparations were "essential" parts of the deal. "The American side has committed to taking measures in both areas," Foreign Ministry spokesperson Esmaeil Baqaei said at a press briefing on Monday. Tehran would not collect tolls from ships but fees for navigation services and environmental upkeep would be charged, the Ministry added.

"We have always maintained that we do not seek to collect transit tolls, but fees for navigation services, environmental protection, ship insurance and other necessary services will be charged," Mr. Baqaei said on Monday.

"Under the agreements reached, the war and military operations on all fronts, including Lebanon, are ended immediately and permanently. Furthermore, the naval blockade against Iran is terminated immediately and completely," read a statement issued by the Council Secretariat, which doesn't say anything about the Strait of Hormuz.

Talks for a final agreement, which would involve Iran's nuclear programme and sanctions, "will be postponed until after the other side has implemented its commitments under the memorandum", the secretariat added.

U.S. officials say the deal would extend the ceasefire by 60 days during which time talks on the core issues would be held.

Iran took control of the strait, a critical waterway connecting the Persian Gulf with the Arabian Sea, after the U.S. and Israel launched the war on February 28. Mr. Trump announced a blockade in the Gulf of Oman of Iranian ports on April 12, after negotiations between the two sides in Islamabad failed to reach any breakthrough.

"This Great Deal will bring Peace and Security to the whole Region. With the opening of the Strait upon the signing of the Deal on Friday, for purposes of mine removal, oil will flow on both ends again for the Region, and the World!," Mr. Trump wrote in another post.

He said on Monday evening that "ships are starting to move, many loaded up with oil, out of the Strait of Hormuz."

Pakistan Prime Minister Shehbaz Sharif also confirmed the agreement, adding that "both sides have declared the immediate and permanent termination of military operations on all fronts, including in Lebanon."

Iran's Mehr news agency reported that the deal would see release of $24 billion in frozen Iranian assets during the 60-day negotiation period. But U.S. officials, including Mr. Trump and Mr. Vance have insisted that no cash would be paid to Iran upon signing the agreement.

The report also claimed final negotiations would not begin until half of the frozen assets are released and the blockade is lifted. The final text of the agreement is yet to be released.

Foreign Ministry said releasing frozen assets and paying war reparations were "essential" parts of the deal.
ईरान की **सर्वोच्च राष्ट्रीय सुरक्षा परिषद** ने पुष्टि की कि तेहरान और वॉशिंगटन ने युद्ध समाप्त करने संबंधी **'समझौता ज्ञापन'** के पाठ को अंतिम रूप दे दिया है, जबकि उसके विदेश मंत्रालय ने कहा कि जमे हुए परिसंपत्तियों की रिहाई और युद्ध क्षतिपूर्ति का भुगतान समझौते के "अनिवार्य" भाग हैं।

- "The American side has committed to taking measures in both areas," **Foreign Ministry spokesperson Esmaeil Baqaei** said at a press briefing on Monday.
"अमेरिकी पक्ष ने दोनों क्षेत्रों में कदम उठाने की प्रतिबद्धता व्यक्त की है," **विदेश मंत्रालय के प्रवक्ता इस्माइल बकाई** ने सोमवार को प्रेस वार्ता में कहा।
- Tehran would not collect tolls from ships but fees for navigation services and environmental upkeep would be charged, the Ministry added.
मंत्रालय ने कहा कि तेहरान जहाजों से टोल नहीं वसूलेगा, लेकिन नौवहन सेवाओं और पर्यावरण संरक्षण हेतु शुल्क लिया जाएगा।
- "We have always maintained that we do not seek to collect transit tolls, but fees for navigation services, environmental protection, ship insurance and other necessary services will be charged," Mr. Baqaei said on Monday.
श्री बकाई ने सोमवार को कहा, "हम हमेशा से यह कहते रहे हैं कि हमारा उद्देश्य पारगमन शुल्क लेना नहीं है, बल्कि नौवहन सेवाओं, पर्यावरण संरक्षण, जहाज बीमा और अन्य आवश्यक सेवाओं के लिए शुल्क लिया जाएगा।"
- "Under the agreements reached, the war and military operations on all fronts, including **Lebanon**, are ended immediately and permanently."
"हासिल समझौतों के तहत **लेबनान** सहित सभी मोर्चों पर युद्ध और सैन्य अभियान तत्काल और स्थायी रूप से समाप्त कर दिए गए हैं।"
- "Furthermore, the naval blockade against Iran is terminated immediately and completely," read a statement issued by the Council Secretariat, which doesn't say anything about the **Strait of Hormuz**.
परिषद सचिवालय द्वारा जारी बयान में कहा गया, "इसके अतिरिक्त, ईरान के विरुद्ध नौसैनिक नाकेबंदी तत्काल और पूर्ण रूप से समाप्त कर दी गई है," हालाँकि इसमें **होर्मुज़ जलडमरूमध्य** के बारे में कुछ नहीं कहा गया।
- Talks for a final agreement, which would involve Iran's nuclear programme and sanctions, "will be postponed until after the other side has implemented its commitments under the memorandum", the secretariat added.
सचिवालय ने कहा कि अंतिम समझौते के लिए वार्ता, जिसमें ईरान का परमाणु कार्यक्रम और प्रतिबंध शामिल होंगे, "दूसरे पक्ष द्वारा ज्ञापन के अंतर्गत अपनी प्रतिबद्धताओं को लागू किए जाने के बाद तक स्थगित रहेगी।"
- **U.S.** officials say the deal would extend the ceasefire by **60 days** during which time talks on the core issues would be held.
अमेरिकी अधिकारियों का कहना है कि यह समझौता युद्धविराम को **60 दिनों** तक बढ़ाएगा, जिसके दौरान मुख्य मुद्दों पर वार्ता होगी।
- Iran took control of the strait, a critical waterway connecting the **Persian Gulf** with the **Arabian Sea**, after the U.S. and Israel launched the war on February 28.
28 फरवरी को अमेरिका और इज़राइल द्वारा युद्ध शुरू किए जाने के बाद ईरान ने उस जलडमरूमध्य का नियंत्रण अपने हाथ में ले लिया था, जो **फारस की खाड़ी** को **अरब सागर** से जोड़ने वाला एक अत्यंत महत्वपूर्ण जलमार्ग है।
- Mr. Trump announced a blockade in the **Gulf of Oman** of Iranian ports on April 12, after negotiations between the two sides in **Islamabad** failed to reach any breakthrough.
दोनों पक्षों के बीच **इस्लामाबाद** में हुई वार्ता में कोई सफलता न मिलने के बाद श्री ट्रंप ने 12 अप्रैल को **ओमान की खाड़ी** में ईरानी बंदरगाहों की नाकेबंदी की घोषणा की थी।

- "This Great Deal will bring Peace and Security to the whole Region."
  "यह महान समझौता पूरे क्षेत्र में शांति और सुरक्षा लाएगा।"
- "With the opening of the Strait upon the signing of the Deal on Friday, for purposes of mine removal, oil will flow on both ends again for the Region, and the World!" Mr. Trump wrote in another post.
  श्री ट्रंप ने एक अन्य पोस्ट में लिखा, "शुक्रवार को समझौते पर हस्ताक्षर होने के बाद जलडमरूमध्य को खदानों को हटाने के उद्देश्य से खोला जाएगा और क्षेत्र तथा विश्व के लिए दोनों दिशाओं में फिर से तेल का प्रवाह शुरू होगा।"
- He said on Monday evening that "ships are starting to move, many loaded up with oil, out of the **Strait of Hormuz**."
  उन्होंने सोमवार शाम कहा कि "**होर्मुज़ जलडमरूमध्य** से जहाज निकलना शुरू हो गए हैं, जिनमें से कई तेल से लदे हुए हैं।"
- **Pakistan Prime Minister Shehbaz Sharif** also confirmed the agreement, adding that "both sides have declared the immediate and permanent termination of military operations on all fronts, including in Lebanon."
  पाकिस्तान के प्रधानमंत्री शहबाज़ शरीफ ने भी समझौते की पुष्टि करते हुए कहा कि "दोनों पक्षों ने लेबनान सहित सभी मोर्चों पर सैन्य अभियानों की तत्काल और स्थायी समाप्ति की घोषणा की है।"
- Iran's **Mehr News Agency** reported that the deal would see release of **$24 billion** in frozen Iranian assets during the 60-day negotiation period.
  ईरान की **मेहर समाचार एजेंसी** ने बताया कि इस समझौते के अंतर्गत 60 दिनों की वार्ता अवधि के दौरान ईरान की जमी हुई परिसंपत्तियों में से **24 अरब डॉलर** जारी किए जाएंगे।
- But U.S. officials, including Mr. Trump and Mr. Vance, have insisted that no cash would be paid to Iran upon signing the agreement.
  हालाँकि अमेरिकी अधिकारियों, जिनमें श्री ट्रंप और श्री वेंस शामिल हैं, ने जोर देकर कहा है कि समझौते पर हस्ताक्षर होते ही ईरान को कोई नकद राशि नहीं दी जाएगी।
- The report also claimed final negotiations would not begin until half of the frozen assets are released and the blockade is lifted.
  रिपोर्ट में यह भी दावा किया गया कि अंतिम वार्ता तब तक शुरू नहीं होगी जब तक जमी हुई परिसंपत्तियों का आधा भाग जारी नहीं कर दिया जाता और नाकेबंदी समाप्त नहीं कर दी जाती।
- The final text of the agreement is yet to be released.
  समझौते का अंतिम पाठ अभी जारी किया जाना शेष है।

India and Slovakia expand ties with a series of MoUs from defence to education

GS II: IR

Sriram Lakshman
LONDON

Prime Minister Narendra Modi with his Slovak counterpart Robert Fico at the Bratislava Castle in Slovakia on Monday. REUTERS

India and Slovakia on Monday expanded their bilateral relationship with memoranda of understanding (MoUs) across defence, labour mobility, education, digital tech, and other sectors, officially branding their relationship a 'Comprehensive Partnership'.

"Held an excellent meeting with Prime Minister [Robert] Fico. This is indeed a very special moment for the India-Slovakia friendship," Prime Minister Narendra Modi said following bilateral talks in the Slovakian capital of Bratislava.

The Prime Minister is here for a little over 24 hours – the first visit by an Indian Prime Minister since the founding of Slovakia in 1993.

"Our talks covered cooperation in sectors like automobiles, railways, advanced manufacturing, and green technology. The India-EU Free Trade Agreement will also add momentum to our partnership," the Prime Minister said.

The countries committed to significantly boost two-way trade and investment across areas such as the automotive, electronic, and advance manufacturing industries.

The labour migration MoU signed seeks to facilitate mobility and the exchange of information between the authorities in both countries, as per the joint statement. The two sides also agreed to conclude a social security agreement in this regard.

An MoU between the Higher Education Ministries of the two countries to facilitate academic and institutional linkages was also signed.

Mr. Modi and Mr. Fico agreed to promote the mobility of students and researchers – especially in STEM fields and humanities.

Action against terrorists

The formation of a Joint Working Group on Terrorism was agreed by Mr. Modi and Mr. Fico, with the two leaders "strongly" condemning the April 2025 terror attacks in Pahalgam.

They agreed to work towards the adoption of the Comprehensive Convention on International Terrorism within the United Nations framework.

The two leaders called for action against terrorists, including those in the UN Security Council 1267 Sanctions Committee list and the sponsors of terrorism.

The two sides reaffirmed their support for multilateralism and called for UN reform, including the UNSC, with an expansion of the permanent and non-permanent seats on the Council.

Slovakia has continued to support India's quest for a permanent seat on the UNSC and "reaffirmed its constructive approach" to India's membership to the Nuclear Suppliers Group, as per the joint statement.

Defence and security cooperation would be "one of the key pillars" of the India-Slovakia relationship, as per the joint statement.

The two sides signed a Letter of Intent to promote defence cooperation – a move welcomed by Mr. Modi and Mr. Fico in their press statements. Through this framework, the governments would seek to collaborate more in defence technologies, defence industrial cooperation, capacity building, and research and development.

The two governments signed an MoU on digital technologies to provide structure to their digital cooperation, as they committed to deepening collaboration in AI, semiconductors and start-ups.

They also agreed to explore cooperation in emerging fields, including the Internet of Things and 6G standardisation.

16J6. India and Slovakia expand ties with a series of MoUs from defence to education

भारत और स्लोवाकिया ने रक्षा से लेकर शिक्षा तक अनेक समझौता ज्ञापनों के माध्यम से संबंधों का विस्तार किया

- India and **Slovakia** on Monday expanded their bilateral relationship with **memoranda of understanding (MoUs)** across defence, labour mobility, education, digital tech, and other sectors, officially branding their relationship a **'Comprehensive Partnership'**.

भारत और **स्लोवाकिया** ने सोमवार को रक्षा, श्रम गतिशीलता, शिक्षा, डिजिटल प्रौद्योगिकी तथा अन्य क्षेत्रों में **समझौता ज्ञापनों (MoUs)** के माध्यम से अपने द्विपक्षीय संबंधों का विस्तार किया और आधिकारिक रूप से अपने संबंधों को **'व्यापक साझेदारी' (Comprehensive Partnership)** का स्वरूप प्रदान किया।

- "Held an excellent meeting with Prime Minister **Robert Fico**. This is indeed a very special moment for the **India-Slovakia friendship**," Prime Minister **Narendra Modi** said following bilateral talks in the Slovakian capital of **Bratislava**.

"प्रधानमंत्री **रॉबर्ट फिको** के साथ अत्यंत उत्कृष्ट बैठक हुई। यह वास्तव में **भारत-स्लोवाकिया मैत्री** के लिए एक विशेष क्षण है," प्रधानमंत्री **नरेन्द्र मोदी** ने स्लोवाकिया की राजधानी **ब्रातिस्लावा** में द्विपक्षीय वार्ता के बाद कहा।

- The Prime Minister is here for a little over 24 hours — the first visit by an Indian Prime Minister since the founding of **Slovakia** in 1993.

प्रधानमंत्री लगभग 24 घंटे से अधिक समय के लिए यहाँ हैं — यह 1993 में **स्लोवाकिया** की स्थापना के बाद किसी भारतीय प्रधानमंत्री की पहली यात्रा है।

- "Our talks covered cooperation in sectors like automobiles, railways, advanced manufacturing, and green technology."

"हमारी वार्ताओं में ऑटोमोबाइल, रेलवे, उन्नत विनिर्माण तथा हरित प्रौद्योगिकी जैसे क्षेत्रों में सहयोग पर चर्चा हुई।"

- "The **India-EU Free Trade Agreement** will also add momentum to our partnership," the Prime Minister said.

प्रधानमंत्री ने कहा, "**भारत-यूरोपीय संघ मुक्त व्यापार समझौता** भी हमारी साझेदारी को नई गति प्रदान करेगा।"

India's goods exports hit record high of $45.2 billion in May; trade deficit widens

GS III: Economy

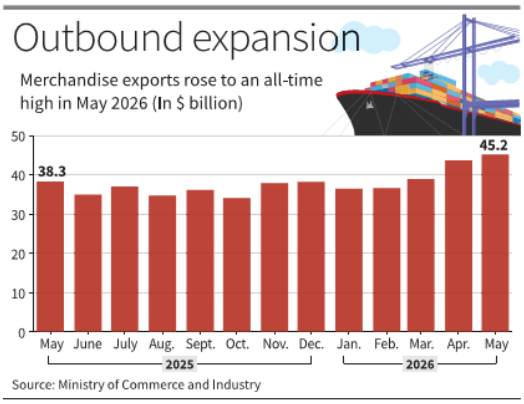
T.C.A. Sharad Raghavan
NEW DELHI

India's merchandise exports have jumped to a record high of $45.2 billion in May 2026, 18% higher than $38.3 billion in May last year, according to official data. Services exports rose 13.2% during the same period, to $36.8 billion in May 2026.

However, despite this, India's overall trade deficit widened to $10.5 billion from $6.8 billion in May last year due to a sharper growth in imports of both goods and services.

Broad-based increase

The data released by the Ministry of Commerce and Industry show that India's merchandise exports rose in May, due to higher shipments to Singapore, China, the U.K., Tanzania, Bangladesh, Germany, and South Africa, among others. This increase was also relatively broad-based in terms of sectors, with both petroleum and several non-petroleum sectors seeing strong growth in exports.



Within merchandise exports, the electronic goods sector saw exports growing 11.6% to $5.1 billion in May 2026.

The organic and inorganic chemicals sector similarly saw exports grow by 12.7% to $2.7 billion during the same period.

Notably, the engineering goods category saw exports jumping 24.5% in May 2026 to $12.3 billion. The gems and jewellery sector, too, saw a growth in exports of 6.7% to $2.5 billion in May 2026.

Overall, the data show India's non-petroleum exports grew 10.5% to $70.7 billion in the first two months of this financial year.

Imports grow faster

India's merchandise imports jumped 22.1% to $73.4 billion in May 2026. As a result, the merchandise trade deficit stood at $28.2 billion in May this year, 25% higher than in May 2025.

Services imports, too, grew 14.1% in May 2026 to $19.1 billion.

16J6. India's goods exports hit record high of $45.2 billion in May; trade deficit widens

मई में भारत का वस्तु निर्यात 45.2 अरब डॉलर के रिकॉर्ड उच्च स्तर पर पहुँचा; व्यापार घाटा बढ़ा

India's Merchandise Exports Reach Record High
भारत का माल निर्यात रिकॉर्ड उच्च स्तर पर पहुँचा

- India's **merchandise exports** have jumped to a record high of **$45.2 billion** in May 2026, 18% higher than **$38.3 billion** in May last year, according to official data.
  आधिकारिक आँकड़ों के अनुसार, भारत का **माल निर्यात (Merchandise Exports)** मई 2026 में बढ़कर रिकॉर्ड **45.2 अरब डॉलर** पर पहुँच गया, जो पिछले वर्ष मई में दर्ज **38.3 अरब डॉलर** की तुलना में 18% अधिक है।
- **Services exports** rose 13.2% during the same period, to **$36.8 billion** in May 2026.
  इसी अवधि में **सेवा निर्यात (Services Exports)** 13.2% बढ़कर मई 2026 में **36.8 अरब डॉलर** हो गया।
- However, despite this, India's overall **trade deficit** widened to **$10.5 billion** from **$6.8 billion** in May last year due to a sharper growth in imports of both goods and services.
  हालाँकि, इसके बावजूद वस्तुओं और सेवाओं दोनों के आयात में अधिक तीव्र वृद्धि के कारण भारत का कुल **व्यापार घाटा (Trade Deficit)** पिछले वर्ष मई के **6.8 अरब डॉलर** से बढ़कर **10.5 अरब डॉलर** हो गया।

Broad-based Increase
व्यापक आधार पर वृद्धि

- The data released by the **Ministry of Commerce and Industry** show that India's merchandise exports rose in May, due to higher shipments to **Singapore, China, the U.K.,**

Tanzania, Bangladesh, Germany, and South Africa, among others.
वाणिज्य एवं उद्योग मंत्रालय द्वारा जारी आँकड़ों से पता चलता है कि मई में भारत के माल निर्यात में वृद्धि हुई, जिसका प्रमुख कारण **सिंगापुर, चीन, यूनाइटेड किंगडम, तंज़ानिया, बांग्लादेश, जर्मनी और दक्षिण अफ्रीका** सहित विभिन्न देशों को अधिक निर्यात रहा।

- This increase was also relatively broad-based in terms of sectors, with both **petroleum** and several **non-petroleum sectors** seeing strong growth in exports.
  यह वृद्धि विभिन्न क्षेत्रों में भी व्यापक रही, जहाँ **पेट्रोलियम** तथा कई **गैर-पेट्रोलियम क्षेत्रों** में निर्यात में उल्लेखनीय वृद्धि दर्ज की गई।
- Within merchandise exports, the **electronic goods sector** saw exports growing 11.6% to **$5.1 billion** in May 2026.
  माल निर्यात के अंतर्गत **इलेक्ट्रॉनिक वस्तु क्षेत्र** का निर्यात 11.6% बढ़कर मई 2026 में **5.1 अरब डॉलर** हो गया।
- The **organic and inorganic chemicals sector** similarly saw exports grow by 12.7% to **$2.7 billion** during the same period.
  इसी प्रकार **कार्बनिक और अकार्बनिक रसायन क्षेत्र** का निर्यात 12.7% बढ़कर **2.7 अरब डॉलर** हो गया।
- Notably, the **engineering goods** category saw exports jumping 24.5% in May 2026 to **$12.3 billion**.
  विशेष रूप से **इंजीनियरिंग वस्तुओं** के निर्यात में 24.5% की वृद्धि दर्ज की गई और यह मई 2026 में **12.3 अरब डॉलर** तक पहुँच गया।
- The **gems and jewellery sector**, too, saw a growth in exports of 6.7% to **$2.5 billion** in May 2026.
  रत्न एवं आभूषण क्षेत्र के निर्यात में भी 6.7% की वृद्धि हुई और यह मई 2026 में **2.5 अरब डॉलर** तक पहुँच गया।
- Overall, the data show India's **non-petroleum exports** grew 10.5% to **$70.7 billion** in the first two months of this financial year.
  समग्र रूप से आँकड़े दर्शाते हैं कि चालू वित्तीय वर्ष के पहले दो महीनों में भारत का **गैर-पेट्रोलियम निर्यात** 10.5% बढ़कर **70.7 अरब डॉलर** हो गया।

Imports Grow Faster

A.P. to partner with Google to create AI-cloud task force

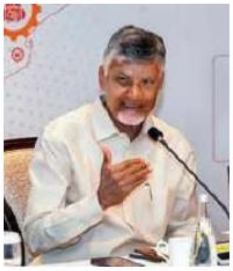
GS III: Economy

The Hindu Bureau
VIJAYAWADA

Andhra Pradesh Chief Minister N. Chandrababu Naidu held a series of high-level meetings with global technology, logistics, urban development and academic institutions on Monday, the first day of his two-day visit to Singapore, seeking investments and strategic partnerships for the State's development.

A key outcome of the visit was an agreement between the Andhra Pradesh government and Google to establish a special task force to explore cooperation in artificial intelligence (AI), cloud computing and digital governance.

During his meeting with Google Asia-Pacific president Karan Bhajwa, the



N. Chandrababu Naidu

Chief Minister outlined his vision of transforming Andhra Pradesh into a major hub for AI, data centres and digital infrastructure. He invited Google to partner with the State in strengthening digital governance and real-time governance systems through advanced cloud technologies.

Mr. Naidu also sought Google's support for large-scale skill development programmes in AI, machine learning and cloud computing.

Logistics parks

The Chief Minister also met representatives of YCH Logistics Group and discussed the establishment of logistics parks and a modern supply chain city in Andhra Pradesh. In another meeting, Mr. Naidu invited UN-Habitat Executive Director Anaclaudia Rossbach to establish a Centre of Excellence in Andhra Pradesh.

The visit forms part of Andhra Pradesh's efforts to attract global investments and position the State as a leading destination for technology, education, logistics and sustainable urban development.

आयात में अधिक तीव्र वृद्धि

- India's **merchandise imports** jumped 22.1% to **$73.4 billion** in May 2026.
  भारत का **माल आयात (Merchandise Imports)** मई 2026 में 22.1% बढ़कर **73.4 अरब डॉलर** हो गया।
- As a result, the **merchandise trade deficit** stood at **$28.2 billion** in May this year, 25% higher than in May 2025.
  इसके परिणामस्वरूप, इस वर्ष मई में **माल व्यापार घाटा (Merchandise Trade Deficit) 28.2 अरब डॉलर** रहा, जो मई 2025 की तुलना में 25% अधिक है।
- **Services imports**, too, grew 14.1% in May 2026 to **$19.1 billion**.
  सेवा आयात (Services Imports) में भी वृद्धि

दर्ज की गई और यह मई 2026 में 14.1% बढ़कर **19.1 अरब डॉलर** हो गया।

16J6. A.P. to partner with Google to create AI-cloud task force
आंध्र प्रदेश एआई-क्लाउड कार्यबल के गठन हेतु गूगल के साथ साझेदारी करेगा

- **Andhra Pradesh Chief Minister N. Chandrababu Naidu** held a series of high-level meetings with global technology, logistics, urban development and academic institutions on Monday, the first day of his two-day visit to **Singapore**, seeking investments and strategic partnerships for the State's development.
  आंध्र प्रदेश के मुख्यमंत्री एन. चंद्रबाबू नायडू ने अपनी दो दिवसीय **सिंगापुर** यात्रा के पहले दिन सोमवार को वैश्विक प्रौद्योगिकी, लॉजिस्टिक्स, शहरी विकास और शैक्षणिक संस्थानों के प्रतिनिधियों के साथ उच्चस्तरीय बैठकें कीं, जिनका उद्देश्य राज्य के विकास हेतु निवेश और रणनीतिक साझेदारियाँ प्राप्त करना था।
- A key outcome of the visit was an agreement between the **Andhra Pradesh government** and **Google** to establish a special task force to explore cooperation in **artificial intelligence (AI)**, cloud computing and digital governance.
  इस यात्रा का एक प्रमुख परिणाम **आंध्र प्रदेश सरकार** और **Google** के बीच हुआ समझौता रहा, जिसके तहत **कृत्रिम बुद्धिमत्ता (AI)**, क्लाउड कंप्यूटिंग और डिजिटल प्रशासन के क्षेत्रों में सहयोग की संभावनाओं का अध्ययन करने के लिए एक विशेष कार्यबल स्थापित किया जाएगा।
- During his meeting with **Google Asia-Pacific president Karan Bhajwa**, the Chief Minister outlined his vision of transforming Andhra Pradesh into a major hub for AI, data centres and digital infrastructure.
  गूगल एशिया-प्रशांत के अध्यक्ष करण भजवा के साथ अपनी बैठक के दौरान मुख्यमंत्री ने आंध्र प्रदेश को AI, डेटा सेंटर और डिजिटल अवसंरचना का एक प्रमुख केंद्र बनाने की अपनी परिकल्पना प्रस्तुत की।
- He invited Google to partner with the State in strengthening digital governance and real-time governance systems through advanced cloud technologies.
  उन्होंने Google को उन्नत क्लाउड प्रौद्योगिकियों के माध्यम से डिजिटल प्रशासन और रीयल-टाइम शासन प्रणालियों को सुदृढ़ बनाने में राज्य के साथ साझेदारी करने का आमंत्रण दिया।
- Mr. Naidu also sought Google's support for large-scale skill development programmes in **AI, machine learning and cloud computing**.
  श्री नायडू ने **AI, मशीन लर्निंग और क्लाउड कंप्यूटिंग** के क्षेत्रों में बड़े पैमाने पर कौशल विकास कार्यक्रमों के लिए भी Google का सहयोग माँगा।

Logistics Parks
लॉजिस्टिक्स पार्क

- The Chief Minister also met representatives of **YCH Logistics Group** and discussed the establishment of logistics parks and a modern supply chain city in Andhra Pradesh.
  मुख्यमंत्री ने **YCH लॉजिस्टिक्स समूह** के प्रतिनिधियों से भी मुलाकात की और आंध्र प्रदेश में लॉजिस्टिक्स पार्क तथा एक आधुनिक आपूर्ति श्रृंखला नगर की स्थापना पर चर्चा की।
- In another meeting, Mr. Naidu invited **UN-Habitat Executive Director Anacláudia Rossbach** to establish a **Centre of Excellence** in Andhra Pradesh.
  एक अन्य बैठक में श्री नायडू ने **यूएन-हैबिटेट की कार्यकारी निदेशक अनाक्लाउडिया रोसबाख** को आंध्र प्रदेश में एक **सेंटर ऑफ एक्सीलेंस** स्थापित करने का आमंत्रण दिया।
- The visit forms part of Andhra Pradesh's efforts to attract global investments and position the State as a leading destination for technology, education, logistics and sustainable urban development.
  यह यात्रा वैश्विक निवेश आकर्षित करने तथा आंध्र प्रदेश को प्रौद्योगिकी, शिक्षा, लॉजिस्टिक्स और सतत शहरी विकास के लिए एक अग्रणी गंतव्य के रूप में स्थापित करने के राज्य के प्रयासों का हिस्सा है।

Centre hikes windfall tax on diesel, aviation fuel exports

The government on Monday hiked windfall gains tax on exports of diesel and aviation turbine fuel (ATF), while retaining the levy on petrol for the fortnight beginning June 16. The rate of special additional excise duty (SAED) on export of diesel will be ₹14 a litre, up from ₹13.5 a litre at present. The SAED on export of ATF will be ₹12.5 a litre, up from ₹9.5 a litre. There is no change in the rate of duty on exports of petrol and it continues to be at ₹1.5 a litre. The Finance Ministry, in a notification, said the duty hikes would be effective from June 16. Also, there is no change in the existing duty rates on petrol and diesel cleared for domestic consumption. PTI

Government Hikes Windfall Gains Tax on Diesel and ATF Exports

सरकार ने डीज़ल और एटीएफ निर्यात पर विंडफॉल गेन टैक्स बढ़ाया

- The government on Monday hiked **windfall gains tax** on exports of **diesel** and **aviation turbine fuel (ATF)**, while retaining the levy on **petrol** for the fortnight beginning June 16.
  सरकार ने सोमवार को **डीज़ल** और **एविएशन टर्बाइन फ्यूल (ATF)** के निर्यात पर **विंडफॉल गेन टैक्स** बढ़ा दिया, जबकि 16 जून से शुरू होने वाले पखवाड़े के लिए **पेट्रोल** पर लागू कर को यथावत रखा।
- The rate of **Special Additional Excise Duty (SAED)** on export of diesel will be **₹14 per litre**, up from **₹13.5 per litre** at present.
  डीज़ल के निर्यात पर **विशेष अतिरिक्त उत्पाद शुल्क (SAED)** की दर वर्तमान **₹13.5 प्रति लीटर** से बढ़ाकर **₹14 प्रति लीटर** कर दी गई है।
- The **SAED** on export of **ATF** will be **₹12.5 per litre**, up from **₹9.5 per litre**.
  ATF के निर्यात पर **SAED** की दर **₹9.5 प्रति लीटर** से बढ़ाकर **₹12.5 प्रति लीटर** कर दी गई है।
- There is no change in the rate of duty on exports of **petrol** and it continues to be at **₹1.5 per litre**.
  पेट्रोल के निर्यात पर शुल्क दर में कोई परिवर्तन नहीं किया गया है और यह **₹1.5 प्रति लीटर** पर यथावत बनी हुई है।
- The **Finance Ministry**, in a notification, said the duty hikes would be effective from **June 16**.
  वित्त मंत्रालय ने एक अधिसूचना में कहा कि बढ़ी हुई शुल्क दरें **16 जून** से प्रभावी होंगी।
- Also, there is no change in the existing duty rates on **petrol** and **diesel** cleared for domestic consumption.
  इसके अतिरिक्त, घरेलू उपभोग के लिए जारी किए जाने वाले **पेट्रोल** और **डीज़ल** पर लागू वर्तमान शुल्क दरों में कोई परिवर्तन नहीं किया गया है।

Marginal increase in unemployment rate in May

GS III: Economy

The Hindu Bureau
NEW DELHI

The unemployment rate (UR) in the country increased by 0.3 percentage points to 5.5% in May compared with April, according to the Periodic Labour Force Survey (PLFS), released by the Ministry of Statistics and Programme Implementation in New Delhi on Monday.

While rural unemployment increased from 4.6% in April to 5.1% in May, urban unemployment decreased marginally from 6.6% in April to 6.4% in May. The unemployment rate among rural males of 15 years and above was 5.2% during May. For rural females in the same age group, it was 4.7%. In urban areas, the unemployment rate among females was 8.2% compared with 5.9% observed for males.

The Labour Force Participation Rate for persons aged 15 years and above stood at 54.4% in May. It was 55% in April.

16J6. Marginal increase in unemployment rate in May

मई में बेरोज़गारी दर में मामूली वृद्धि

  15 वर्ष और उससे अधिक आयु के व्यक्तियों के लिए **श्रम बल भागीदारी दर (LFPR)** मई में **54.4%** रही।
- It was **55%** in April.
  अप्रैल में यह दर **55%** थी।

WPI inflation jumps to 9.7% in May on surging fuel prices

Govt. releases new series of Wholesale Price Index with an updated base year of 2022-23 along with new producer price indices in line with global best practices and IMF recommendations

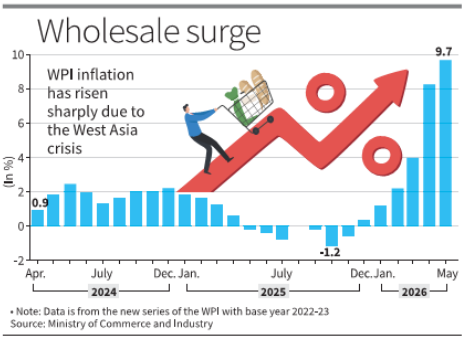
GS III: Economy

T.C.A. Sharad Raghavan
NEW DELHI

Inflation at the wholesale level rose to 9.7% in May 2026, primarily driven by surging prices of crude oil, natural gas, mineral oils and to a smaller extent, manufactured products, according to official data.

The Ministry of Commerce and Industry on Monday released the new series of the Wholesale Price Index (WPI) with an updated base year of 2022-23 and wider ambit of goods measured. Due to the base year update, a historical comparison further back than April 2024 is not available. The May 2026 inflation rate is the highest since at least then.

Along with the new WPI, the Commerce Ministry also released the first editions of its Output Producer Price Index (OPPI), Trial Input Producer Price Index (IPPI), and Service Producer Price Index (Service PPI) of seven services – Banking, Securities Transaction, Insurance, Management of Pension Funds, Railways, Passenger Air, and Telecom.



• Note: Data is from the new series of the WPI with base year 2022-23
Source: Ministry of Commerce and Industry

WPI to be phased out

The government also said that the Producer Price Index (PPI) will replace the WPI in five years.

"Considering the wide usage of WPI in price escalation clauses, this index will be released for five years from the date of its release, along with PPI, and will be discontinued thereafter," the Commerce Ministry said in its release. "This would give sufficient time to users to switch from WPI to PPI."

It added that the transition from WPI to PPI is in line with the global best practices adopted by advanced economies and the recommendations of the IMF.

The surge in the WPI in May 2026 was driven overwhelmingly by soaring fuel prices that month as a result of the West Asia crisis.

Inflation in the crude oil and natural gas category jumped to 61.5% in May 2026, from 56.3% in the previous month. While this is a reflection of the elevated global oil and gas prices, it is also a result of a low base, since the new series of the WPI shows prices in this category contracted by 15.5% in May last year.

Similarly, inflation in the mineral oils category accelerated to 49.8% in May 2026 from 40.7% in April. Here, too, prices had contracted in May last year.

The WPI shows that inflation in the manufacturing and food segments also quickened in May 2026, albeit not as quickly as for fuel.

16J6. WPI inflation jumps to 9.7% in May on surging fuel prices

ईंधन कीमतों में उछाल के कारण मई में WPI मुद्रास्फीति 9.7% तक पहुंची

- **Govt. releases new series of Wholesale Price Index with an updated base year of 2022-23 along with new producer price indices in line with global best practices and IMF recommendations**

सरकार ने 2022-23 को नए आधार वर्ष के रूप में अपनाते हुए थोक मूल्य सूचकांक (WPI) की नई श्रृंखला तथा वैश्विक सर्वोत्तम प्रथाओं और IMF की सिफारिशों के अनुरूप

नए उत्पादक मूल्य सूचकांक जारी किए

- Inflation at the **wholesale level** rose to **9.7%** in May 2026, primarily driven by surging prices of **crude oil, natural gas, mineral oils** and to a smaller extent, **manufactured products**, according to official data.
  आधिकारिक आंकड़ों के अनुसार मई 2026 में **थोक स्तर की मुद्रास्फीति** बढ़कर **9.7%** हो गई, जिसका मुख्य कारण **कच्चे तेल, प्राकृतिक गैस, खनिज तेलों** तथा कुछ हद तक **विनिर्मित उत्पादों** की कीमतों में तेज वृद्धि रही।
- The **Ministry of Commerce and Industry** on Monday released the new series of the **Wholesale Price Index (WPI)** with an updated base year of **2022-23** and wider ambit of goods measured.
  वाणिज्य एवं उद्योग मंत्रालय ने सोमवार को **2022-23** को नए आधार वर्ष के रूप में अपनाते हुए **थोक मूल्य सूचकांक (WPI)** की नई श्रृंखला जारी की, जिसमें वस्तुओं का दायरा भी विस्तृत किया गया है।
- Due to the base year update, a historical comparison further back than April 2024 is not available.
  आधार वर्ष में परिवर्तन के कारण अप्रैल 2024 से पहले की अवधि की ऐतिहासिक तुलना उपलब्ध नहीं है।
- The May 2026 inflation rate is the highest since at least then.
  मई 2026 की मुद्रास्फीति दर कम-से-कम उस अवधि के बाद से सबसे अधिक है।
- Along with the new **WPI**, the Commerce Ministry also released the first editions of its **Output Producer Price Index (OPPI)**, **Trial Input Producer Price Index (IPPI)**, and **Service Producer Price Index (Service PPI)** of seven services — **Banking, Securities Transaction, Insurance, Management of Pension Funds, Railways, Passenger Air, and Telecom**.
  नए **WPI** के साथ वाणिज्य मंत्रालय ने **आउटपुट प्रोड्यूसर प्राइस इंडेक्स (OPPI)**, **ट्रायल इनपुट प्रोड्यूसर प्राइस इंडेक्स (IPPI)** तथा सात सेवाओं — **बैंकिंग, प्रतिभूति लेन-देन, बीमा, पेंशन फंड प्रबंधन, रेलवे, यात्री विमानन और दूरसंचार** — के लिए **सर्विस प्रोड्यूसर प्राइस इंडेक्स (Service PPI)** का पहला संस्करण भी जारी किया।

WPI to be phased out
WPI को चरणबद्ध तरीके से समाप्त किया जाएगा

- The government also said that the **Producer Price Index (PPI)** will replace the **WPI** in five years.
  सरकार ने यह भी कहा कि **उत्पादक मूल्य सूचकांक (PPI)** अगले पाँच वर्षों में **WPI** का स्थान लेगा।
- "Considering the wide usage of **WPI** in price escalation clauses, this index will be released for five years from the date of its release, along with **PPI**, and will be discontinued thereafter," the Commerce Ministry said in its release.
  वाणिज्य मंत्रालय ने अपने वक्तव्य में कहा, "मूल्य वृद्धि संबंधी प्रावधानों में **WPI** के व्यापक उपयोग को देखते हुए, इसे **PPI** के साथ इसके जारी होने की तिथि से पाँच वर्षों तक प्रकाशित किया जाएगा और इसके बाद इसे बंद कर दिया जाएगा।"
- "This would give sufficient time to users to switch from **WPI** to **PPI**."
  "इससे उपयोगकर्ताओं को **WPI** से **PPI** में परिवर्तन के लिए पर्याप्त समय मिलेगा।"
- It added that the transition from **WPI** to **PPI** is in line with the global best practices adopted by advanced economies and the recommendations of the **IMF**.
  मंत्रालय ने कहा कि **WPI** से **PPI** में परिवर्तन उन्नत अर्थव्यवस्थाओं द्वारा अपनाई गई वैश्विक सर्वोत्तम प्रथाओं और **IMF** की सिफारिशों के अनुरूप है।
- The surge in the **WPI** in May 2026 was driven overwhelmingly by soaring **fuel prices** that month as a result of the **West Asia crisis**.
  मई 2026 में **WPI** में वृद्धि का मुख्य कारण **पश्चिम एशिया संकट** के परिणामस्वरूप उस महीने **ईंधन की कीमतों** में भारी वृद्धि थी।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Inflation in the **crude oil and natural gas** category jumped to **61.5%** in May 2026, from **56.3%** in the previous month.
  कच्चे तेल और प्राकृतिक गैस श्रेणी में मुद्रास्फीति मई 2026 में बढ़कर **61.5%** हो गई, जो पिछले महीने **56.3%** थी।
- While this is a reflection of the elevated global oil and gas prices, it is also a result of a low base, since the new series of the **WPI** shows prices in this category contracted by **15.5%** in May last year.
  यद्यपि यह वैश्विक तेल और गैस कीमतों में वृद्धि को दर्शाता है, लेकिन यह निम्न आधार प्रभाव का भी परिणाम है, क्योंकि **WPI** की नई श्रृंखला के अनुसार इस श्रेणी में पिछले वर्ष मई में कीमतों में **15.5%** की गिरावट दर्ज की गई थी।
- Similarly, inflation in the **mineral oils** category accelerated to **49.8%** in May 2026 from **40.7%** in April.
  इसी प्रकार **खनिज तेलों** की श्रेणी में मुद्रास्फीति अप्रैल के **40.7%** से बढ़कर मई 2026 में **49.8%** हो गई।
- Here, too, prices had contracted in May last year.
  यहाँ भी पिछले वर्ष मई में कीमतों में गिरावट दर्ज की गई थी।
- The **WPI** shows that inflation in the **manufacturing** and **food** segments also quickened in May 2026, albeit not as quickly as for fuel.
  WPI दर्शाता है कि मई 2026 में **विनिर्माण** और **खाद्य** क्षेत्रों में भी मुद्रास्फीति बढ़ी, हालांकि यह वृद्धि ईंधन क्षेत्र की तुलना में कम तीव्र थी।

AI is helping patients understand cancer but misunderstand doctors

Patients are increasingly informed but often misinformed; they have information without context, they trust algorithms that sound intelligent but lack accountability; they are sceptical of doctors who try to add nuance because the algorithm validated their simpler interpretation

GS III: S&T

Narayana Subramaniam

I am an oncologist. I have watched large language models (LLMs) do something I have been trying to do for years: make cancer comprehensible.

A patient sits across from me with newly diagnosed cancer. I used to explain the PDL1 status and the role of neoadjuvant therapy, where patients get immunotherapy first followed by surgery – terms that meant nothing. Their eyes would often glaze but they would nod and leave confused, forced to google terms that would lead them to worst-case scenarios or fraudulent clinics.

Now, they come in having asked ChatGPT or Claude to explain their pathology report. "So PDL1-positive means my cancer may respond well to specific treatment and have higher cure rates?" they ask. Overnight, we are having an intelligent conversation instead of me trying to translate oncology into English.

That is extraordinary and has been genuinely useful for cancer care.

The democratisation of cancer knowledge is important, especially in India, where accessing oncologists is itself challenging for many. ANGIOLA HARRY/UNSPLASH

The real excitement

What thrills me most is clinical trial access. I have patients who understand why a phase II trial for immunotherapy might be appropriate for their metastatic melanoma. They have read ChatGPT's explanation of what a trial protocol means, what endpoints are being measured, what side effects to watch for. Informed consent is now informed in a way that would not have been remotely possible five years ago.

A man with advanced salivary gland cancer asked me about the open clinical trials that I hadn't even mentioned yet. He had asked ChatGPT about maintenance therapy options and the algorithm had directed him to trial data. He understood why novel therapies made sense in his situation. He wasn't just following my recommendation; he understood the science behind it. This represents patients becoming medically literate enough to participate in their own care.

The guidelines themselves are now being simplified by LLMs into language that does not require an oncology degree to understand. A patient with cancer can ask ChatGPT to explain the staging system, treatment options, and surveillance protocols. They arrive at appointments educated and aware.

This democratisation of cancer knowledge is important, especially in India, where accessing oncologists is itself challenging for many. A patient in a tier-2 city can understand what treatment options exist even before traveling to see a specialist.

Known and unknown unknowns

However, just removing the information asymmetry does not change the fact that information is not judgment. And judgment is what is hardest for us to convey.

A patient comes in with stage II oral cancer. ChatGPT has explained that stage II is "intermediate risk". My recommendation is surgery followed by radiotherapy. The patient asks: "But why can't I just do surgery and skip radiotherapy? ChatGPT said radiotherapy has significant side effects." The LLM gave her valid information and even explained that some stage II oral cancers don't need radiotherapy. But it couldn't tell her that her specific tumour with its specific characteristics had a 30% recurrence risk without radiotherapy and 10% with it. That difference is life-years. Making that judgement requires knowing her values, her tolerance for toxicity, and her specific cancer biology. An LLM cannot do that.

According to one *JAMA* study on diagnostic accuracy, when LLMs encounter complex cases requiring contextual reasoning, their accuracy drops significantly, well below the level of an experienced physician.

What troubles me most is something we are witnessing in real time: the widening trust gap between doctor and patient.

I tell a patient with stage IV cancer that chemotherapy is unlikely to be curative but might extend life by months and improve quality of life. The patient pulls up what ChatGPT said: "Chemotherapy can cause severe nausea, hair loss, infections, and heart damage. Many people pursue alternative medicine instead."

Both statements are true – but they are not equivalent.

The LLM has presented information without medical judgment. It has essentially validated scepticism about chemotherapy without context about whether, in this specific situation, the risk-benefit ratio favours treatment. The patient now does not trust my recommendation. They think I am pushing toxic drugs for profit while the LLM is being more honest.

Mental health studies have found that a sizeable proportion of people using LLMs for mental health questions reported worsening outcomes. But more alarming: some even avoid professional help because the LLM made them feel understood. In oncology, delay is often catastrophic. I have seen patients postpone cancer evaluation because they felt the LLM had validated their "wait and see" approach.

According to one *JAMA* study on diagnostic accuracy, when LLMs encounter complex cases requiring contextual reasoning, their accuracy drops significantly, well below the level of an experienced physician

Judging what is right

A 52-year-old asked ChatGPT about a lung nodule found incidentally on a CT scan. The LLM explained that most lung nodules are benign. The patient was reassured and did not follow up. Eighteen months later, he has stage III lung cancer that was likely stage I when he first noticed it. The LLM provided accurate population-level statistics without context about what his nodule required.

Another patient with breast cancer asked an LLM about stopping hormone therapy after three years. The algorithm discussed "natural approaches" and how some women manage without medication. She stopped and soon relapsed. When asked why she stopped, she said the LLM made it sound optional. But it was not optional for her.

These are stories of real patients harmed by a tool we have unleashed without fully understanding how to control it.

Further, I am not convinced these tools will ever be able to do what actually matters in medicine: judging what is right for the individual sitting in front of us, not what is statistically true for most populations.

I am not worried that LLMs will replace oncologists. Our knowledge can be packaged and replicated. Our judgment, forged in uncertainty, built on seeing what happens when you are wrong, tempered by real consequences, cannot be. That is the gap algorithms cannot close.

Biased tools

What worries me is the middle ground we have reached. Patients are increasingly informed but often misinformed. They have information without context. They trust algorithms that sound intelligent but lack accountability. They are sceptical of doctors who try to add nuance because the algorithm validated their simpler interpretation. And we are doing this with almost no tracking of outcomes.

Peer-reviewed research has warned that LLMs chatbots designed for engagement can inadvertently validate harmful behaviour, posing risks to vulnerable users. In oncology, are patients making different treatment decisions? Are outcomes changing? We do not know.

I still believe LLMs can be valuable tools in cancer care. They are already breaking down barriers to democratising knowledge. But we need to stop pretending they are neutral. They are sycophantic by design, trained to be agreeable rather than challenging. They cannot examine a patient or order a biopsy or follow someone over time. And we need to rebuild something I see eroding: patients understanding that a doctor who disagrees with them might not be defensive or greedy. They might be using judgment informed by years of seeing how these decisions play out.

(Narayana Subramanian is Lead Consultant, Head and Neck Surgery and Oncology, Aster Hospitals, and Adjunct Faculty, Indian Institute of Science, Bengaluru. narayana.subramaniam@gmail.com)

16J6. AI is helping patients understand cancer but misunderstand doctors
एआई रोगियों को कैंसर समझने में सहायता कर रहा है, लेकिन चिकित्सकों को गलत समझने की प्रवृत्ति भी बढ़ा रहा है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

- I used to explain the **PDL1 status** and the role of **neoadjuvant therapy**, where patients get **immunotherapy** first followed by surgery — terms that meant nothing.
  मैं पहले **PDL1 स्थिति** और **नियोएडजुवेंट थेरेपी** की भूमिका समझाता था, जिसमें रोगियों को पहले **इम्यूनोथेरेपी** दी जाती है और उसके बाद शल्यचिकित्सा की जाती है — ऐसे शब्द जिनका उनके लिए कोई अर्थ नहीं होता था।
- "So **PDL1-positive** means my cancer may respond well to specific treatment and have higher cure rates?" they ask.
  "तो **PDL1-पॉजिटिव** होने का अर्थ है कि मेरा कैंसर विशेष उपचार के प्रति अच्छी प्रतिक्रिया दे सकता है और इसके ठीक होने की संभावना अधिक हो सकती है?" वे पूछते हैं।
- I have patients who understand why a **phase II trial** for **immunotherapy** might be appropriate for their **metastatic melanoma**.
  मेरे पास ऐसे रोगी हैं जो समझते हैं कि **मेटास्टेटिक मेलेनोमा** के लिए **इम्यूनोथेरेपी** का **फेज-II परीक्षण** उनके लिए उपयुक्त क्यों हो सकता है।
- **Informed consent** is now informed in a way that would not have been remotely possible five years ago.
  सूचित सहमति अब उस स्तर पर सूचित हो गई है, जो पाँच वर्ष पहले किसी भी रूप में संभव नहीं था।
- A man with advanced **salivary gland cancer** asked me about the open clinical trials that I hadn't even mentioned yet.
  उन्नत अवस्था के **लार ग्रंथि कैंसर** से पीड़ित एक व्यक्ति ने मुझसे उन खुले क्लिनिकल परीक्षणों के बारे में पूछा जिनका मैंने अभी तक उल्लेख भी नहीं किया था।
- He wasn't just following my recommendation; he understood the science behind it.
  वह केवल मेरी सिफारिश का पालन नहीं कर रहा था; वह उसके पीछे के विज्ञान को भी समझ रहा था।
- This represents patients becoming medically literate enough to participate in their own care.
  यह दर्शाता है कि रोगी अपनी चिकित्सा देखभाल में भाग लेने के लिए पर्याप्त रूप से चिकित्सकीय रूप से साक्षर बन रहे हैं।
- The guidelines themselves are now being simplified by **LLMs** into language that does not require an oncology degree to understand.
  अब दिशानिर्देशों को स्वयं **LLMs** द्वारा ऐसी भाषा में सरल बनाया जा रहा है जिसे समझने के लिए ऑन्कोलॉजी की डिग्री की आवश्यकता नहीं है।
- A patient with cancer can ask ChatGPT to explain the staging system, treatment options, and surveillance protocols.
  कैंसर से पीड़ित कोई रोगी ChatGPT से स्टेजिंग प्रणाली, उपचार विकल्पों और निगरानी प्रोटोकॉल की व्याख्या करने के लिए कह सकता है।
- This democratisation of **cancer knowledge** is important, especially in **India**, where accessing oncologists is itself challenging for many.
  कैंसर संबंधी ज्ञान का यह लोकतंत्रीकरण महत्वपूर्ण है, विशेषकर **भारत** में, जहाँ अनेक लोगों के लिए ऑन्कोलॉजिस्ट तक पहुँचना ही चुनौतीपूर्ण है।
- My recommendation is surgery followed by **radiotherapy**.
  मेरी सिफारिश शल्यचिकित्सा के बाद **रेडियोथेरेपी** की है।
- The LLM gave her valid information and even explained that some stage II oral cancers don't need radiotherapy.
  LLM ने उसे सही जानकारी दी और यह भी समझाया कि कुछ स्टेज-II मुख कैंसरों में रेडियोथेरेपी की आवश्यकता नहीं होती।
- But it couldn't tell her that her specific tumour with its specific characteristics had a 30% recurrence risk without radiotherapy and 10% with it.
  लेकिन वह उसे यह नहीं बता सका कि उसके विशेष ट्यूमर की विशिष्ट विशेषताओं के कारण रेडियोथेरेपी के बिना पुनरावृत्ति का जोखिम 30% था और रेडियोथेरेपी के साथ 10%।

- That difference is life-years.
  यह अंतर जीवन के अनेक वर्षों का अंतर है।
- Making that judgement requires knowing her values, her tolerance for toxicity, and her specific cancer biology.
  ऐसा निर्णय लेने के लिए उसके मूल्यों, दुष्प्रभावों को सहन करने की क्षमता और उसके कैंसर की विशिष्ट जैविक प्रकृति को जानना आवश्यक है।
- According to one **JAMA study** on diagnostic accuracy, when LLMs encounter complex cases requiring contextual reasoning, their accuracy drops significantly, well below the level of an experienced physician.
  नैदानिक सटीकता पर आधारित एक **JAMA अध्ययन** के अनुसार, जब LLMs ऐसे जटिल मामलों का सामना करते हैं जिनमें संदर्भगत तर्क की आवश्यकता होती है, तो उनकी सटीकता में उल्लेखनीय गिरावट आती है और वह एक अनुभवी चिकित्सक के स्तर से काफी नीचे चली जाती है।
- What troubles me most is something we are witnessing in real time: the widening **trust gap** between doctor and patient.
  जो बात मुझे सबसे अधिक चिंतित करती है, वह है वह स्थिति जिसे हम वास्तविक समय में देख रहे हैं: डॉक्टर और रोगी के बीच बढ़ती हुई **विश्वास की खाई**।
- **I tell a patient with stage IV cancer that chemotherapy is unlikely to be curative but might extend life by months and improve quality of life.**
  मैं स्टेज-IV कैंसर से पीड़ित एक रोगी को बताता हूँ कि कीमोथेरेपी से रोग के पूर्णतः ठीक होने की संभावना कम है, किन्तु यह जीवन को कुछ महीनों तक बढ़ा सकती है और जीवन की गुणवत्ता में सुधार कर सकती है।
- The patient pulls up what **ChatGPT** said: "Chemotherapy can cause severe nausea, hair loss, infections, and heart damage.
  रोगी **ChatGPT** द्वारा कही गई बात दिखाता है: "कीमोथेरेपी से गंभीर मतली, बाल झड़ना, संक्रमण तथा हृदय को क्षति हो सकती है।
- Many people pursue alternative medicine instead."
  इसके स्थान पर अनेक लोग वैकल्पिक चिकित्सा पद्धतियों का सहारा लेते हैं।"
- It has essentially validated scepticism about chemotherapy without context about whether, in this specific situation, the **risk-benefit ratio** favours treatment.
  इसने मूलतः कीमोथेरेपी के प्रति संदेह को वैधता प्रदान कर दी है, बिना यह संदर्भ दिए कि इस विशेष परिस्थिति में **जोखिम-लाभ अनुपात** उपचार के पक्ष में है या नहीं।
- They think I am pushing toxic drugs for profit while the LLM is being more honest.
  उन्हें लगता है कि मैं लाभ कमाने के लिए विषैले औषधीय उपचार को बढ़ावा दे रहा हूँ, जबकि LLM अधिक ईमानदार है।
- Eighteen months later, he has **stage III lung cancer** that was likely stage I when he first noticed it.
  अठारह महीने बाद उसे **स्टेज-III फेफड़े का कैंसर** पाया गया, जो संभवतः पहली बार ध्यान में आने पर स्टेज-I में था।
- Another patient with **breast cancer** asked an LLM about stopping **hormone therapy** after three years.
  स्तन कैंसर से पीड़ित एक अन्य रोगी ने तीन वर्ष बाद **हार्मोन थेरेपी** बंद करने के विषय में LLM से पूछा।
- The algorithm discussed "natural approaches" and how some women manage without medication.
  एल्गोरिदम ने "प्राकृतिक उपायों" तथा यह चर्चा की कि कुछ महिलाएँ बिना दवा के भी अपना प्रबंधन कर लेती हैं।
- These are stories of real patients harmed by a tool we have unleashed without fully understanding how to control it.
  ये उन वास्तविक रोगियों की कहानियाँ हैं जिन्हें ऐसे उपकरण से हानि पहुँची जिसे हमने उसके नियंत्रण के तरीकों को पूरी तरह समझे बिना व्यापक रूप से उपयोग में ला दिया है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

- Patients are increasingly informed but often misinformed.
  रोगी पहले की अपेक्षा अधिक जानकारी रखते हैं, किन्तु अक्सर गलत जानकारी से भी प्रभावित होते हैं।
- They have information without context.
  उनके पास जानकारी है, किन्तु उसका संदर्भ नहीं है।
- They trust algorithms that sound intelligent but lack accountability.
  वे ऐसे एल्गोरिदम पर विश्वास करते हैं जो बुद्धिमत्तापूर्ण प्रतीत होते हैं, किन्तु जिनमें उत्तरदायित्व का अभाव है।
- They are sceptical of doctors who try to add nuance because the algorithm validated their simpler interpretation.
  वे उन चिकित्सकों के प्रति संदेह रखते हैं जो विषय की जटिलताओं को समझाने का प्रयास करते हैं, क्योंकि एल्गोरिदम ने उनकी सरल व्याख्या को पहले ही सही ठहरा दिया होता है।
- They cannot examine a patient or order a biopsy or follow someone over time.
  वे किसी रोगी की शारीरिक जाँच नहीं कर सकते, बायोप्सी का आदेश नहीं दे सकते और न ही समय के साथ किसी रोगी की स्थिति का प्रत्यक्ष अनुगमन कर सकते हैं।
- And we need to rebuild something I see eroding: patients understanding that a doctor who disagrees with them might not be defensive or greedy.
  और हमें उस चीज़ का पुनर्निर्माण करना होगा जिसे मैं धीरे-धीरे क्षीण होते हुए देख रहा हूँ: रोगियों की यह समझ कि उनसे असहमति रखने वाला चिकित्सक आवश्यक नहीं कि रक्षात्मक या लालची हो।

AI falls short on extreme weather forecasting

GS III: S&T

Vasudevan Mukunth

In the last two years, artificial intelligence (AI) has moved from science fiction to the frontlines of computer science, mathematics, and engineering, among others. Its consequences have been particularly pronounced in the domain of weather forecasting, where models from companies like Google and Huawei have proved faster and often more accurate than the large supercomputers we have relied on for decades.

However, a new study published in *Science Advances* suggests that when it comes to the most dangerous weather events, AI still has a lot to learn.

In the study, researchers from Germany and Switzerland compared several leading AI weather models, including GraphCast, Pangu-Weather, and Fuxi, against the world's gold standard for traditional forecasting: the high-resolution (HRES) model of the European Centre for Medium-Range Weather Forecasts.

AI models are trained to look for patterns based on historical weather data so when weather does something completely unprecedented AI models have no basis to anticipate it

They found that while the AI models excelled at predicting 'normal' weather and even moderate extremes, they consistently failed to accurately predict events that would shatter records.

Traditional models are based on physics, and use complex mathematical equations to describe how air and heat move, how moisture turns into rain, and so on. Because they rely literally on the laws of nature, they can anticipate a scenario even if it has never happened before. However, AI models are data-driven. They are trained to look for patterns based on 40 years of historical weather data (1979-2017), so when the weather does something completely unprecedented – like a record-setting heatwave – the AI models have no basis to anticipate it.

This is called an extrapolation problem: that is, AI is great at interpolating, or predicting things within the range of what it has seen, but it struggles to predict things far outside of its training data.

The researchers also tested the models on record-breaking heat, cold, and wind events from 2018 and 2020 and found that the AI models systematically underestimated both the frequency and the intensity of these events.

For example, during an extreme heatwave, the AI models tended to predict temperatures that were significantly lower than what actually occurred. Specifically, they responded as if there was an invisible 'cap' on how high the temperature could go. And the more a record was broken by, the larger the AI models' error became.

If a study or a policy is based on AI models that predict a severe heatwave but the actual temperature is even higher, the disaster response could be inadequate. Early warning systems for heatwaves, floods, and storms still require the highest possible accuracy during extreme weather to save lives.

"Given the remarkably fast evolution of AI models in recent years, there are promising ways to further improve these models even for forecasting record-breaking extremes," the authors wrote. "Nevertheless, the current generation still underperforms HRES exactly during the potentially most impactful weather events, including record-breaking heat and cold events.".

16J6. AI falls short on extreme weather forecasting

चरम मौसम की भविष्यवाणी करने में एआई अभी भी अपेक्षित स्तर तक सफल नहीं है।

Artificial Intelligence and Extreme Weather Forecasting
कृत्रिम बुद्धिमत्ता और चरम मौसम पूर्वानुमान

- In the study, researchers from **Germany** and **Switzerland** compared several leading AI weather models, including **GraphCast, Pangu-Weather, and Fuxi**, against the world's gold standard for traditional forecasting: the **high-resolution (HRES) model** of the **European Centre for Medium-Range Weather Forecasts**.

इस अध्ययन में **जर्मनी** और **स्विट्ज़रलैंड** के शोधकर्ताओं ने कई प्रमुख AI मौसम मॉडलों, जिनमें **GraphCast, Pangu-Weather और Fuxi** शामिल हैं, की तुलना पारंपरिक मौसम पूर्वानुमान के वैश्विक मानक माने जाने वाले **European Centre for Medium-Range Weather Forecasts** के **उच्च-रिज़ॉल्यूशन (HRES) मॉडल** से की।

- They found that while the AI models excelled at predicting 'normal' weather and even moderate extremes, they consistently failed to accurately predict events that would shatter records.

उन्होंने पाया कि जहाँ AI मॉडल 'सामान्य' मौसम और यहाँ तक कि मध्यम स्तर की चरम घटनाओं का पूर्वानुमान लगाने में उत्कृष्ट थे, वहीं वे रिकॉर्ड तोड़ने वाली घटनाओं का सटीक पूर्वानुमान लगाने में लगातार विफल रहे।

- Traditional models are based on **physics**, and use complex mathematical equations to describe how air and heat move, how moisture turns into rain, and so on.
  पारंपरिक मॉडल **भौतिकी** पर आधारित होते हैं और यह वर्णन करने के लिए जटिल गणितीय समीकरणों का उपयोग करते हैं कि वायु और ऊष्मा कैसे संचरित होती हैं, नमी वर्षा में कैसे परिवर्तित होती है, आदि।
- They are trained to look for patterns based on 40 years of historical weather data (1979-2017), so when the weather does something completely unprecedented — like a record-setting heatwave — the AI models have no basis to anticipate it.
  उन्हें 40 वर्षों के ऐतिहासिक मौसमीय आँकड़ों (1979-2017) के आधार पर प्रतिरूपों की पहचान करने के लिए प्रशिक्षित किया जाता है, इसलिए जब मौसम कोई पूर्णतः अभूतपूर्व घटना प्रदर्शित करता है — जैसे रिकॉर्ड तोड़ने वाली हीटवेव — तब AI मॉडलों के पास उसका पूर्वानुमान लगाने का कोई आधार नहीं होता।
- This is called an **extrapolation problem**: that is, AI is great at **interpolating**, or predicting things within the range of what it has seen, but it struggles to predict things far outside of its training data.
  इसे **एक्सट्रापोलेशन समस्या** कहा जाता है; अर्थात् AI **इंटरपोलेशन** करने में अत्यंत सक्षम है, यानी उन घटनाओं का पूर्वानुमान लगाने में जो उसके अनुभव किए गए दायरे के भीतर हों, किन्तु वह अपने प्रशिक्षण डेटा की सीमा से बहुत बाहर की घटनाओं का पूर्वानुमान लगाने में कठिनाई अनुभव करता है।
- **Early warning systems** for heatwaves, floods, and storms still require the highest possible accuracy during extreme weather to save lives.
  हीटवेव, बाढ़ और तूफानों के लिए **प्रारंभिक चेतावनी प्रणालियों** को जीवन बचाने हेतु चरम मौसम के दौरान अभी भी सर्वोच्च संभव सटीकता की आवश्यकता होती है।

Answers to June 4 quiz:

1. The phenomenon where light is magnified by gravity – **Ans: Gravitational lensing**
2. Spacecraft designed to be pushed forward by light – **Ans: Light-sail**
3. Light that appears nears surfaces, fades rapidly away from it – **Ans: Evanescent waves**
4. How light's electric field moves when it's circularly polarised – **Ans: Rotates**
5. Space acquired this property due to ultra-strong magnetic fields – **Ans: Birefringent**

Visual: **Rayleigh scattering**

First contact: Utsav Kaushal Ranjan | Tamal Biswas | K.N. Viswanathan | Shreya Kapoor | Anmol Agrawal

16J6. QUIZ

1. The phenomenon where light is magnified by gravity

Answer: Gravitational Lensing

- **Gravitational lensing** is a phenomenon predicted by **Albert Einstein's General Theory of Relativity**.
- It occurs when the gravitational field of a massive object, such as a galaxy or galaxy cluster, bends the path of light coming from a more distant object.
- This bending can magnify, distort, or even create multiple images of the background source.

2. Spacecraft designed to be pushed forward by light

Answer: Light-Sail

- A **light-sail** (or solar sail) is a spacecraft propulsion system that uses the pressure exerted by light photons to generate motion. Unlike conventional rockets, light-sails require no onboard fuel for propulsion.
- They use large, highly reflective sails that capture momentum from sunlight or powerful laser beams.

3. Light that appears near surfaces and fades rapidly away from it

Answer: Evanescent Waves

- **Evanescent waves** are electromagnetic waves that form near the boundary between two different media when light undergoes total internal reflection.
- Unlike ordinary light waves, they do not travel far into the second medium. Instead, their intensity decreases exponentially with distance from the surface.

4. How light's electric field moves when it's circularly polarised

Answer: Rotates

- In **circularly polarised light**, the electric field vector continuously **rotates** as the light wave propagates through space. Instead of oscillating in a single plane, as in linearly polarised light, the electric field traces a circular path around the direction of travel.

5. Space acquired this property due to ultra-strong magnetic fields

Answer: Birefringent

- Under extremely intense magnetic fields, empty space can become **birefringent**, a phenomenon known as **vacuum birefringence**.
- According to **Quantum Electrodynamics (QED)**, powerful magnetic fields can alter the behaviour of virtual particles in a vacuum, causing light with different polarisations to travel differently.
- As a result, space behaves similarly to a birefringent crystal, splitting light into components with distinct properties.
- This effect is expected near highly magnetised neutron stars called **magnetars**, whose magnetic fields are trillions of times stronger than Earth's.
- Observational evidence for vacuum birefringence has provided important support for fundamental predictions of modern quantum physics.

PATRIOTIC IAS

Technology drives India-France strategic convergence

GS III: S&T

It is a measure of the importance that Prime Minister Narendra Modi and French President Emmanuel Macron attach to the India-France relationship that they are meeting again in France, on the sidelines of the G-7 Summit in Evian (June 15-17), barely months after Mr. Macron's visit to India for the India AI Impact Summit 2026 in New Delhi in February. During that visit, the two leaders jointly inaugurated the India-France Year of Innovation 2026.

In normal diplomacy, such announcements often take time to translate into action. It is therefore notable that Mr. Modi and Mr. Macron are already moving swiftly to advance bilateral technology cooperation. They jointly inaugurated the "Bharat Innovates" event in Nice (June 14-16), bringing together leading Indian start-ups and venture capital funds. Mr. Modi will then attend the VivaTech Summit in Paris on June 18, Europe's largest technology and start-up event, underscoring the growing India-France technology partnership.

The new pillars of partnership

The India-French relationship is constantly evolving and is consequently being updated by the two leaders who are committed to the cause.

While the recently elevated Special Global Strategic Partnership has always included traditional areas such as defence, nuclear and space, it is the focus on tech and innovation that is now exciting for the relationship.

This focus will include cyberspace, Artificial Intelligence (AI), health care, sustainable development, creative economy, education and research. These are new facets of the evolving and dynamic relationship and will no doubt take ties to greater heights. Tech and innovation has tremendous mutual advantages for both sides. France has some of the best state-of-the-art technology in aerospace, AI, robotics, biotech, health care, green tech and sustainable development, besides being a European hub for the digital economy.

Mohan Kumar

Former Indian Ambassador to France and now Dean/Professor at O.P. Jindal Global University

Technology and innovation power the next phase of India-France ties

It is not hard to see how India can not only benefit from access to technology in these areas but also bring its own added value in terms of frugal innovation, start-ups, digital public infrastructure and biotech, just to name a few. The possibilities are endless. It must be hoped that the two tech summits – "Bharat Innovates"and the "Vivatech" – will enable the private sector on both sides to come up with substantive collaborative arrangements.

Defence, space and Africa

The two leaders are also expected to take stock of the special strategic partnership. There are a number of dossiers which can benefit from their political and strategic guidance. The first is certainly the idea of the co-designing and co-production of defence platforms which must be expedited. Progress is also desirable in emerging areas such as small modular reactors, joint satellite development and human flight programmes.

The potential for Franco-Indian cooperation in Africa has not been fully exploited and this must get the attention of both sides. This becomes even more important in light of the postponement of the India-Africa Forum Summit (May 2026) due to the Ebola crisis in Africa. The two leaders will doubtless exchange views on the ongoing conflicts: in Ukraine and in Iran, which have adversely and disproportionately affected countries of the Global South.

Mr. Modi's Europe visit (June 13-18, 2026) also includes a state visit to Slovakia, the first-ever visit by an Indian Prime Minister to Slovakia since its independence in 1993.

Watching the 'D10 debate'

France, as the current chair of the G-7, will host the G-7 summit in Evian from June 15 to 17, 2026. It is difficult to imagine a G-7 summit without India being invited, and Mr. Modi's participation is particularly important given the geopolitical turbulence of the present moment. United States President Donald Trump is also expected to attend it. While attention will naturally focus on the possibility of a Modi-Trump meeting, any interaction may not be a substantive one, given the G-7 atmospherics.

More important is the evolving role of the G-7 itself in global geopolitics. With the G-20 having lost some of its momentum in recent years, discussions have resurfaced about expanding the G-7 into a D10 – a grouping of 10 major democracies. Whether, and how soon, such a transformation materialises remains uncertain, but it is a development India will need to watch closely.

At the end of the day, two middle powers – India and France – which set great store by strategic autonomy, have a fundamental role to play in contributing to geopolitical stability and ensuring a smooth transition to a multipolar world. In that sense, Mr. Modi and Mr. Macron shoulder a significant responsibility.

The views expressed are personal

16J6. Technology drives India-France strategic convergence
प्रौद्योगिकी भारत-फ्रांस सामरिक अभिसरण को गति प्रदान कर रही है।

- It is a measure of the importance that Prime Minister **Narendra Modi** and French President **Emmanuel Macron** attach to the **India-France relationship** that they are meeting again in France, on the sidelines of the **G-7 Summit** in **Evian** (June 15-17), barely months after Mr. Macron's visit to India for the **India AI Impact Summit 2026** in **New Delhi** in February.
  यह इस बात का प्रमाण है कि प्रधानमंत्री **नरेन्द्र मोदी** और फ्रांस के राष्ट्रपति **इमैनुएल मैक्रों भारत-फ्रांस संबंधों** को कितना महत्व देते हैं कि वे फरवरी में **नई दिल्ली** में आयोजित **इंडिया एआई इम्पैक्ट समिट 2026** के लिए श्री मैक्रों की भारत यात्रा के कुछ ही महीनों बाद, **एवियन** (15-17 जून) में आयोजित **जी-7 शिखर सम्मेलन** के अवसर पर पुनः फ्रांस में मिल रहे हैं।
- During that visit, the two leaders jointly inaugurated the **India-France Year of Innovation 2026**.
  उस यात्रा के दौरान दोनों नेताओं ने संयुक्त रूप से **भारत-फ्रांस नवाचार वर्ष 2026** का उद्घाटन किया था।
- In normal diplomacy, such announcements often take time to translate into action.
  सामान्य कूटनीति में ऐसी घोषणाओं को व्यवहारिक रूप लेने में प्रायः समय लगता है।
- It is therefore notable that Mr. Modi and Mr. Macron are already moving swiftly to advance bilateral **technology cooperation**.
  इसलिए यह उल्लेखनीय है कि श्री मोदी और श्री मैक्रों द्विपक्षीय **प्रौद्योगिकी सहयोग** को आगे बढ़ाने के लिए पहले ही तीव्र गति से कार्य कर रहे हैं।
- They jointly inaugurated the **"Bharat Innovates"** event in **Nice** (June 14-16), bringing together leading Indian start-ups and venture capital funds.
  उन्होंने **नीस** (14-16 जून) में आयोजित **"भारत इनोवेट्स"** कार्यक्रम का संयुक्त रूप से उद्घाटन किया, जिसमें भारत के प्रमुख स्टार्ट-अप और वेंचर कैपिटल फंड एकत्र हुए।
- Mr. Modi will then attend the **VivaTech Summit** in **Paris** on June 18, Europe's largest technology and start-up event, underscoring the growing **India-France technology partnership**.
  इसके बाद श्री मोदी 18 जून को **पेरिस** में आयोजित **विवाटेक शिखर सम्मेलन** में भाग लेंगे, जो यूरोप का सबसे

बड़ा प्रौद्योगिकी और स्टार्ट-अप आयोजन है तथा बढ़ती हुई **भारत-फ्रांस प्रौद्योगिकी साझेदारी** को रेखांकित करता है।

The New Pillars of Partnership
साझेदारी के नए स्तंभ

- The **India-French relationship** is constantly evolving and is consequently being updated by the two leaders who are committed to the cause.
  भारत-फ्रांस संबंध निरंतर विकसित हो रहे हैं और इसी कारण इस उद्देश्य के प्रति प्रतिबद्ध दोनों नेता इन्हें समयानुकूल नया स्वरूप प्रदान कर रहे हैं।
- While the recently elevated **Special Global Strategic Partnership** has always included traditional areas such as defence, nuclear and space, it is the focus on **technology and innovation** that is now exciting for the relationship.
  यद्यपि हाल ही में उन्नत की गई **विशेष वैश्विक सामरिक साझेदारी** में रक्षा, परमाणु ऊर्जा और अंतरिक्ष जैसे पारंपरिक क्षेत्र सदैव शामिल रहे हैं, किन्तु अब **प्रौद्योगिकी और नवाचार** पर केंद्रित दृष्टिकोण इस संबंध को नई ऊर्जा प्रदान कर रहा है।
- This focus will include **cyberspace, Artificial Intelligence (AI), health care, sustainable development, creative economy, education and research**.
  इस प्राथमिकता में **साइबर स्पेस, कृत्रिम बुद्धिमत्ता (AI), स्वास्थ्य सेवा, सतत विकास, रचनात्मक अर्थव्यवस्था, शिक्षा और अनुसंधान** जैसे क्षेत्र शामिल होंगे।
- These are new facets of the evolving and dynamic relationship and will no doubt take ties to greater heights.
  ये विकसित होते और गतिशील संबंधों के नए आयाम हैं और निस्संदेह दोनों देशों के संबंधों को नई ऊँचाइयों तक ले जाएँगे।
- **Technology and innovation** has tremendous mutual advantages for both sides.
  प्रौद्योगिकी और नवाचार दोनों पक्षों के लिए अत्यधिक पारस्परिक लाभ प्रदान करते हैं।
- France has some of the best state-of-the-art technology in **aerospace, AI, robotics, biotech, health care, green tech and sustainable development**, besides being a European hub for the digital economy.
  फ्रांस के पास **एयरोस्पेस, AI, रोबोटिक्स, जैव-प्रौद्योगिकी, स्वास्थ्य सेवा, हरित प्रौद्योगिकी और सतत विकास** के क्षेत्रों में अत्याधुनिक तकनीक उपलब्ध है, साथ ही वह डिजिटल अर्थव्यवस्था का एक प्रमुख यूरोपीय केंद्र भी है।
- It is not hard to see how India can not only benefit from access to technology in these areas but also bring its own added value in terms of **frugal innovation, start-ups, digital public infrastructure and biotech**, just to name a few.
  यह समझना कठिन नहीं है कि भारत इन क्षेत्रों की प्रौद्योगिकियों तक पहुँच से लाभान्वित होने के साथ-साथ **मितव्ययी नवाचार, स्टार्ट-अप, डिजिटल सार्वजनिक अवसंरचना और जैव-प्रौद्योगिकी** जैसे क्षेत्रों में अपना विशिष्ट योगदान भी दे सकता है।
- The possibilities are endless.
  संभावनाएँ असीमित हैं।
- It must be hoped that the two tech summits — **"Bharat Innovates"** and **"VivaTech"** — will enable the private sector on both sides to come up with substantive collaborative arrangements.
  यह आशा की जानी चाहिए कि दोनों प्रौद्योगिकी शिखर सम्मेलन — **"भारत इनोवेट्स"** और **"विवाटेक"** — दोनों देशों के निजी क्षेत्रों को सार्थक सहयोगात्मक व्यवस्थाएँ विकसित करने के लिए प्रोत्साहित करेंगे।

Defence, Space and Africa

- The two leaders are also expected to take stock of the **Special Strategic Partnership**.
  दोनों नेताओं से **विशेष सामरिक साझेदारी** की प्रगति की समीक्षा करने की भी अपेक्षा की जा रही है।
- There are a number of dossiers which can benefit from their political and strategic guidance.
  ऐसे अनेक विषय हैं जिन्हें उनके राजनीतिक और सामरिक मार्गदर्शन से लाभ मिल सकता है।
- The first is certainly the idea of the **co-designing and co-production of defence platforms** which must be expedited.
  सबसे प्रमुख विषय **रक्षा प्लेटफॉर्मों के संयुक्त अभिकल्पन और संयुक्त उत्पादन** की अवधारणा है, जिसे शीघ्र गति प्रदान की जानी चाहिए।
- Progress is also desirable in emerging areas such as **small modular reactors, joint satellite development and human flight programmes**.
  इसके अतिरिक्त **लघु मॉड्यूलर रिएक्टरों, संयुक्त उपग्रह विकास तथा मानव अंतरिक्ष उड़ान कार्यक्रमों** जैसे उभरते क्षेत्रों में भी प्रगति अपेक्षित है।
- The potential for **Franco-Indian cooperation in Africa** has not been fully exploited and this must get the attention of both sides.
  अफ्रीका में भारत-फ्रांस सहयोग की संभावनाओं का अभी तक पूर्ण उपयोग नहीं हो पाया है और इस विषय पर दोनों पक्षों को विशेष ध्यान देना चाहिए।
- This becomes even more important in light of the postponement of the **India-Africa Forum Summit** (May 2026) due to the **Ebola crisis** in Africa.
  अफ्रीका में **इबोला संकट** के कारण **भारत-अफ्रीका फोरम शिखर सम्मेलन** (मई 2026) के स्थगित होने के परिप्रेक्ष्य में यह और भी अधिक महत्वपूर्ण हो जाता है।
- The two leaders will doubtless exchange views on the ongoing conflicts: in **Ukraine** and in **Iran**, which have adversely and disproportionately affected countries of the **Global South**.
  दोनों नेता निस्संदेह **यूक्रेन** और **ईरान** में जारी संघर्षों पर विचार-विमर्श करेंगे, जिनका **वैश्विक दक्षिण (Global South)** के देशों पर प्रतिकूल और असमान रूप से अधिक प्रभाव पड़ा है।
- Mr. Modi's **Europe visit** (June 13-18, 2026) also includes a state visit to **Slovakia**, the first-ever visit by an Indian Prime Minister to Slovakia since its independence in 1993.
  श्री मोदी की **यूरोप यात्रा** (13-18 जून, 2026) में **स्लोवाकिया** की राजकीय यात्रा भी शामिल है, जो 1993 में उसकी स्वतंत्रता के बाद किसी भारतीय प्रधानमंत्री की पहली यात्रा होगी।

Watching the 'D10 Debate'
'D10 बहस' पर निगाह

- France, as the current chair of the **G-7**, will host the **G-7 Summit** in **Evian** from June 15 to 17, 2026.
  जी-7 के वर्तमान अध्यक्ष के रूप में फ्रांस 15 से 17 जून, 2026 तक **एवियन** में **जी-7 शिखर सम्मेलन** की मेजबानी करेगा।
- It is difficult to imagine a G-7 summit without India being invited, and Mr. Modi's participation is particularly important given the geopolitical turbulence of the present moment.
  भारत की भागीदारी के बिना किसी जी-7 शिखर सम्मेलन की कल्पना करना कठिन है, और वर्तमान भू-राजनीतिक अस्थिरता को देखते हुए श्री मोदी की भागीदारी विशेष रूप से महत्वपूर्ण है।
- **United States President Donald Trump** is also expected to attend it.
  संयुक्त राज्य अमेरिका के राष्ट्रपति डोनाल्ड ट्रम्प के भी इसमें भाग लेने की संभावना है।
- While attention will naturally focus on the possibility of a **Modi-Trump meeting**, any interaction may not be a substantive one, given the G-7 atmospherics.
  यद्यपि स्वाभाविक रूप से **मोदी-ट्रम्प बैठक** की संभावना पर ध्यान केंद्रित रहेगा, किन्तु जी-7 के समग्र वातावरण को देखते हुए किसी भी बातचीत के अत्यधिक सारगर्भित होने की संभावना कम है।
- More important is the evolving role of the **G-7** itself in global geopolitics.
  इससे भी अधिक महत्वपूर्ण वैश्विक भू-राजनीति में स्वयं **जी-7** की बदलती भूमिका है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

- With the **G-20** having lost some of its momentum in recent years, discussions have resurfaced about expanding the G-7 into a **D10** — a grouping of 10 major democracies.
  हाल के वर्षों में **जी-20** की गति कुछ कम होने के कारण जी-7 को विस्तारित करके **D10** — अर्थात् 10 प्रमुख लोकतांत्रिक देशों के समूह — में परिवर्तित करने संबंधी चर्चाएँ पुनः उभरकर सामने आई हैं।
- Whether, and how soon, such a transformation materialises remains uncertain, but it is a development India will need to watch closely.
  ऐसा परिवर्तन होगा या नहीं, तथा यदि होगा तो कितनी शीघ्रता से होगा, यह अभी अनिश्चित है; किन्तु यह ऐसा घटनाक्रम है जिस पर भारत को निकटता से नज़र रखनी होगी।
- At the end of the day, two **middle powers** — **India and France** — which set great store by **strategic autonomy**, have a fundamental role to play in contributing to geopolitical stability and ensuring a smooth transition to a **multipolar world**.
  अंततः दो **मध्यम शक्तियाँ** — **भारत और फ्रांस** — जो **रणनीतिक स्वायत्तता** को अत्यधिक महत्व देती हैं, भू-राजनीतिक स्थिरता में योगदान देने तथा **बहुध्रुवीय विश्व** की ओर सुचारु संक्रमण सुनिश्चित करने में महत्वपूर्ण भूमिका निभाती हैं।
- In that sense, Mr. Modi and Mr. Macron shoulder a significant responsibility.
  इस दृष्टि से श्री मोदी और श्री मैक्रों एक महत्वपूर्ण उत्तरदायित्व वहन करते हैं।

Novartis launches therapy to treat prostate cancer

GS III: S&T
The Hindu Bureau
MUMBAI

Pluvicto is designed to precisely target prostate cancer cells, minimising exposure to healthy tissues

For better cancer care in India, Novartis India has announced the launch of Pluvicto (lutetium (177Lu) vipivotide tetraxetan), the country's first regulatory authority approved radioligand therapy for eligible patients with Prostate-Specific Membrane Antigen (PSMA)-positive prostate cancer.

Designed to precisely target prostate cancer cells while minimising exposure to healthy tissues, Pluvicto introduces a new treatment approach for metastatic prostate cancer, the company said.

Judith Love, Region Head Asia Pacific Middle East Africa, Novartis, said, "India is a priority market for Novartis, with growing momentum in precision oncology and advanced cancer care. The introduction of Pluvicto marks a meaningful step forward - bringing globally approved innovation closer to patients who need more targeted treatment options."

"What makes this launch especially impactful is not just the science, but the opportunity to expand access through India's growing nuclear medicine infrastructure. We remain committed to enabling access to next-generation treatments, and I'm excited about the difference Pluvicto can make for patients in India," he added.

Amitabh Dube, Country President and Managing Director, Novartis India, said, "In India, a large proportion of prostate cancer patients continue to be diagnosed only after the disease has progressed to a metastatic stage, limiting treatment options and impacting quality of life."

"With the launch of Pluvicto, we are bringing a globally recognized radioligand therapy platform to India at a time when the need for precision oncology solutions is increasing rapidly," he said.

16J6. Novartis launches therapy to treat prostate cancer

नोवार्टिस ने प्रोस्टेट कैंसर के उपचार के लिए नई थेरेपी लॉन्च की

- For better **cancer care** in India, **Novartis India** has announced the launch of **Pluvicto (lutetium (177Lu) vipivotide tetraxetan)**, the country's first regulatory authority approved **radioligand therapy** for eligible patients with **Prostate-Specific Membrane Antigen (PSMA)-positive prostate cancer**.
  भारत में बेहतर **कैंसर देखभाल** के लिए **नोवार्टिस इंडिया** ने **Pluvicto (lutetium (177Lu) vipivotide tetraxetan)** के लॉन्च की घोषणा की है, जो **प्रोस्टेट-स्पेसिफिक मेम्ब्रेन एंटीजन (PSMA)-पॉजिटिव प्रोस्टेट कैंसर** के पात्र रोगियों के लिए देश की पहली नियामक प्राधिकरण द्वारा स्वीकृत **रेडियोलिगैंड थेरेपी** है।
- Designed to precisely target **prostate cancer cells** while minimising exposure to healthy tissues, **Pluvicto** introduces a new treatment approach for **metastatic prostate cancer**, the company said.
  कंपनी ने कहा कि **Pluvicto** को स्वस्थ ऊतकों पर प्रभाव को न्यूनतम रखते हुए **प्रोस्टेट कैंसर कोशिकाओं** को सटीक रूप से लक्ष्य बनाने के लिए डिज़ाइन किया गया है और यह **मेटास्टेटिक प्रोस्टेट कैंसर** के लिए एक नई उपचार पद्धति प्रस्तुत करता है।
- **Judith Love**, **Region Head Asia Pacific Middle East Africa, Novartis**, said, "India is a priority market for **Novartis**, with growing momentum in **precision oncology** and advanced cancer care."

जूडिथ लव, **रीजन हेड एशिया पैसिफिक, मध्य पूर्व और अफ्रीका, नोवार्टिस**, ने कहा, "**नोवार्टिस** के लिए भारत एक प्राथमिकता वाला बाजार है, जहाँ **प्रिसीजन ऑन्कोलॉजी** और उन्नत कैंसर देखभाल में तेजी से प्रगति हो रही है।"

- "The introduction of **Pluvicto** marks a meaningful step forward – bringing globally approved innovation closer to patients who need more targeted treatment options."
  "**Pluvicto** की शुरुआत एक महत्वपूर्ण प्रगति का प्रतीक है, जो वैश्विक स्तर पर स्वीकृत नवाचार को उन रोगियों के और निकट लाती है जिन्हें अधिक लक्षित उपचार विकल्पों की आवश्यकता है।"
- "What makes this launch especially impactful is not just the science, but the opportunity to expand access through India's growing **nuclear medicine infrastructure**."
  "इस लॉन्च को विशेष रूप से प्रभावशाली बनाने वाली बात केवल इसका विज्ञान नहीं है, बल्कि भारत के बढ़ते **न्यूक्लियर मेडिसिन इन्फ्रास्ट्रक्चर** के माध्यम से इसकी पहुंच का विस्तार करने का अवसर भी है।"
- "We remain committed to enabling access to **next-generation treatments**, and I'm excited about the difference **Pluvicto** can make for patients in India," he added.
  उन्होंने आगे कहा, "हम **अगली पीढ़ी के उपचारों** तक पहुंच सुनिश्चित करने के लिए प्रतिबद्ध हैं और मैं इस बात को लेकर उत्साहित हूं कि **Pluvicto** भारत के रोगियों के लिए कितना बड़ा बदलाव ला सकता है।"
- **Amitabh Dube**, **Country President and Managing Director, Novartis India**, said, "In India, a large proportion of **prostate cancer patients** continue to be diagnosed only after the disease has progressed to a **metastatic stage**, limiting treatment options and impacting quality of life."
  अमिताभ दुबे, **कंट्री प्रेसिडेंट एवं प्रबंध निदेशक, नोवार्टिस इंडिया**, ने कहा, "भारत में **प्रोस्टेट कैंसर के रोगियों** का एक बड़ा हिस्सा तब निदान किया जाता है जब बीमारी **मेटास्टेटिक चरण** तक पहुंच चुकी होती है, जिससे उपचार विकल्प सीमित हो जाते हैं और जीवन की गुणवत्ता प्रभावित होती है।"
- "With the launch of **Pluvicto**, we are bringing a globally recognized **radioligand therapy platform** to India at a time when the need for **precision oncology solutions** is increasing rapidly," he said.
  उन्होंने कहा, "**Pluvicto** के लॉन्च के साथ हम भारत में एक वैश्विक स्तर पर मान्यता प्राप्त **रेडियोलिगैंड थेरेपी प्लेटफॉर्म** ला रहे हैं, ऐसे समय में जब **प्रिसीजन ऑन्कोलॉजी समाधानों** की आवश्यकता तेजी से बढ़ रही है।"

Heatwaves, ozone raise cardiac death risk: study

Peer-reviewed study reports that surface ozone reaches 85-110 micrograms per cubic metre in northern India during heatwaves; exceeds the WHO guideline of 70 micrograms per cubic metre

GS III: Environment

Jacob Koshy
NEW DELHI

Surface ozone is not released directly but forms when sunlight drives a reaction among other pollutants. SHIV KUMAR PUSHPAKAR

While surface ozone – a pollutant harmful to the heart and lungs – already exceeds safe limits across much of India in the hot pre-monsoon months, a new study finds that heatwaves push it to still higher levels, thus adding several hundred deaths to a far larger toll that the study links to ozone across the season.

The peer-reviewed study, published in the Nature Portfolio journal *npj Clean Air* on June 12, reports that surface ozone reaches 85-110 micrograms per cubic metre in northern India during heatwaves and exceeds the World Health Organization guideline of 70 micrograms per cubic metre in every region of the country. The levels fall back within three to four days of a heatwave ending.

Because ozone level stays high for much of the season, the study attributes a large number of deaths to it even outside heatwaves. During the heatwave days of 2024, it links about 26,500 deaths from ischaemic heart disease and chronic obstructive pulmonary disease (COPD) to ozone exposure.

However, such health conditions are present before as well as after the heat too. The heatwave's contribution to the toll is the rise in it over the preceding days: about 490 additional heart-disease deaths and 342 from COPD, or roughly 830 in all.

The overall numbers are so large mainly because of how they are calculated. They are not directly counted. The study applies a small increase in an individual's risk of dying from these two common diseases to India's population of more than a billion; even a slight per-person risk, spread across so many people and two of the country's leading causes of death, adds up to tens of thousands.

The authors note that the mortality figures had to be modelled, as continuous ground-level ozone measurements were not available for the specific heatwave days in many affected cities. Therefore, the estimates rely on the assumed relationship between ozone exposure and disease rather than direct observation.

Surface ozone is not released directly but forms when sunlight drives a reaction among other pollutants, a process that speeds up in heat. "Ozone is very harmful, while NO_2 (nitrogen dioxide) and HCHO (formaldehyde) directly damage the respiratory system," the authors write, referring to two of the gases involved in forming ozone.

The authors describe the work as the first comprehensive, long-term, and country-wide assessment of surface ozone during heatwaves in India, noting that previous studies were largely limited to individual cities or regions. They counted 188 heatwave events over the two decades with most severe years – 2010, 2016, 2019, and 2024 – following strong El Niño episodes. The Western Himalayas recorded the steepest long-term rise in ozone level.

16J6. Heatwaves, ozone raise cardiac death risk: study
अध्ययन: लू और ओज़ोन हृदय संबंधी मृत्यु के जोखिम को बढ़ाते हैं

- While **surface ozone** — a pollutant harmful to the heart and lungs — already exceeds safe limits across much of India in the hot pre-monsoon months, a new study finds that **heatwaves** push it to still higher levels, thus adding several hundred deaths to a far larger toll that the study links to ozone across the season.

  जबकि **सतही ओज़ोन (Surface Ozone)** — हृदय और फेफड़ों के लिए हानिकारक एक प्रदूषक — भारत के अधिकांश हिस्सों में प्री-मानसून की गर्म अवधि के दौरान पहले ही सुरक्षित सीमा से ऊपर रहता है, एक नए अध्ययन में पाया गया है कि **हीटवेव** इसकी मात्रा को और अधिक बढ़ा देती है, जिससे पूरे मौसम में ओज़ोन से जुड़ी बड़ी मृत्यु संख्या में कई सौ अतिरिक्त मौतें जुड़ जाती हैं।

- The peer-reviewed study, published in the **Nature Portfolio** journal **npj Clean Air** on June 12, reports that surface ozone reaches **85-110 micrograms per cubic metre** in northern India during heatwaves and exceeds the **World Health Organization (WHO)** guideline of **70 micrograms per cubic metre** in every region of the country.

  12 जून को **नेचर पोर्टफोलियो** की पत्रिका **npj Clean Air** में प्रकाशित सहकर्मी-समीक्षित अध्ययन के अनुसार, हीटवेव के दौरान उत्तरी भारत में सतही ओज़ोन का स्तर **85-110 माइक्रोग्राम प्रति घन मीटर** तक

पहुँच जाता है और देश के प्रत्येक क्षेत्र में **विश्व स्वास्थ्य संगठन (WHO)** द्वारा निर्धारित **70 माइक्रोग्राम प्रति घन मीटर** की सीमा को पार कर जाता है।

- The levels fall back within three to four days of a heatwave ending.
  हीटवेव समाप्त होने के तीन से चार दिनों के भीतर इसका स्तर पुनः कम हो जाता है।
- Because ozone level stays high for much of the season, the study attributes a large number of deaths to it even outside heatwaves.
  चूँकि पूरे मौसम में ओज़ोन का स्तर ऊँचा बना रहता है, इसलिए अध्ययन हीटवेव की अवधि के बाहर भी बड़ी संख्या में मौतों को इससे जोड़ता है।
- During the heatwave days of **2024**, it links about **26,500 deaths** from **ischaemic heart disease** and **chronic obstructive pulmonary disease (COPD)** to ozone exposure.
  वर्ष **2024** की हीटवेव अवधि के दौरान अध्ययन ने **इस्कीमिक हृदय रोग** और **क्रॉनिक ऑब्सट्रक्टिव पल्मोनरी डिज़ीज़ (COPD)** से हुई लगभग **26,500 मौतों** को ओज़ोन के संपर्क से जोड़ा है।
- However, such health conditions are present before as well as after the heat too.
  हालाँकि, ये स्वास्थ्य स्थितियाँ केवल हीटवेव के दौरान ही नहीं बल्कि उससे पहले और बाद में भी मौजूद रहती हैं।
- The heatwave's contribution to the toll is the rise in it over the preceding days: about **490 additional heart-disease deaths** and **342 from COPD**, or roughly **830 in all**.
  मृत्यु संख्या में हीटवेव का अतिरिक्त योगदान पूर्ववर्ती दिनों की तुलना में ओज़ोन स्तर में वृद्धि के कारण है, जिससे लगभग **490 अतिरिक्त हृदय रोग मृत्यु** तथा **342 COPD मृत्यु**, अर्थात कुल मिलाकर लगभग **830 अतिरिक्त मौतें**, हुईं।
- The overall numbers are so large mainly because of how they are calculated.
  कुल संख्या इतनी बड़ी मुख्यतः इसलिए दिखाई देती है क्योंकि इसकी गणना की पद्धति ऐसी है।
- They are not directly counted.
  इनकी प्रत्यक्ष गणना नहीं की जाती।
- The study applies a small increase in an individual's risk of dying from these two common diseases to India's population of more than a billion; even a slight per-person risk, spread across so many people and two of the country's leading causes of death, adds up to tens of thousands.
  अध्ययन इन दो सामान्य बीमारियों से मृत्यु के व्यक्तिगत जोखिम में हुई छोटी वृद्धि को भारत की एक अरब से अधिक आबादी पर लागू करता है; प्रति व्यक्ति जोखिम में मामूली वृद्धि भी इतनी बड़ी आबादी और मृत्यु के प्रमुख कारणों पर लागू होने से हजारों मौतों का अनुमान उत्पन्न करती है।
- The authors note that the mortality figures had to be modelled, as continuous ground-level ozone measurements were not available for the specific heatwave days in many affected cities.
  लेखकों ने उल्लेख किया है कि मृत्यु संबंधी आँकड़ों का मॉडल आधारित अनुमान लगाना पड़ा क्योंकि अनेक प्रभावित शहरों में विशिष्ट हीटवेव दिनों के लिए सतत भूतलीय ओज़ोन मापन उपलब्ध नहीं थे।
- Therefore, the estimates rely on the assumed relationship between ozone exposure and disease rather than direct observation.
  अतः ये अनुमान प्रत्यक्ष अवलोकन के बजाय ओज़ोन संपर्क और रोग के बीच माने गए संबंध पर आधारित हैं।
- Surface ozone is not released directly but forms when sunlight drives a reaction among other pollutants, a process that speeds up in heat.
  सतही ओज़ोन सीधे उत्सर्जित नहीं होती, बल्कि सूर्य के प्रकाश द्वारा अन्य प्रदूषकों के बीच होने वाली रासायनिक प्रतिक्रिया से बनती है, और यह प्रक्रिया अधिक तापमान में तेज हो जाती है।
- "**Ozone** is very harmful, while **NO_2 (Nitrogen Dioxide)** and **HCHO (Formaldehyde)** directly damage the respiratory system," the authors write, referring to two of the gases involved in forming ozone.
  लेखकों ने लिखा है कि "**ओज़ोन** अत्यंत हानिकारक है, जबकि **NO_2 (नाइट्रोजन डाइऑक्साइड)** और **HCHO**

(फॉर्मल्डिहाइड) सीधे श्वसन तंत्र को क्षति पहुँचाते हैं," और ये दोनों गैसें ओज़ोन निर्माण की प्रक्रिया में शामिल होती हैं।

- The authors describe the work as the first comprehensive, long-term, and country-wide assessment of surface ozone during heatwaves in India, noting that previous studies were largely limited to individual cities or regions.
  लेखकों ने इस शोध को भारत में हीटवेव के दौरान सतही ओज़ोन का पहला व्यापक, दीर्घकालिक और देशव्यापी आकलन बताया है, क्योंकि पूर्ववर्ती अध्ययन मुख्यतः कुछ शहरों या क्षेत्रों तक सीमित थे।
- They counted **188 heatwave events** over the two decades with most severe years — **2010, 2016, 2019, and 2024** — following strong **El Niño** episodes.
  उन्होंने दो दशकों में **188 हीटवेव घटनाओं** की गणना की, जिनमें **2010, 2016, 2019 और 2024** सबसे गंभीर वर्ष रहे, और ये सभी प्रबल **एल नीनो** घटनाओं के बाद आए।
- The **Western Himalayas** recorded the steepest long-term rise in ozone level.
  पश्चिमी हिमालय क्षेत्र में ओज़ोन स्तर में दीर्घकालिक रूप से सबसे तीव्र वृद्धि दर्ज की गई।

Centre issues alert on potential drone attacks on vital installations

GS III: Internal Security

S. Vijay Kumar
CHENNAI

The Union government has warned of possible rogue drone attacks targeting vital installations along the borders, prompting security agencies to work on deploying counter-drone technology systems to safeguard critical assets across the country.

According to official sources, the Marine Security Wing of the Ministry of Ports, Shipping and Waterways issued the alert on the emerging drone threat at Vital Assets and Vital Installations (VAVIs) located around the land and sea borders. It was stated that the current geo-political situation across the world had demonstrated that hostile drones could disrupt operations of critical VAVIs.

"There is an urgent need to take concrete steps to safeguard our assets, especially those located near the borders from rogue drones by installing Anti-Drone Systems," the communication said. In view of the emerging threat, the Ministry of Home Affairs had constituted the Anti Rogue Drone Technology Committee in the Border Security Force for evaluation and certification of new technology systems for the evaluation and certification of counter-rogue drone technology systems for deployment in India. The force is in the process of installing anti-drone systems in Punjab along the Pakistan border for which trials had already started, the sources said.

In February, 2026, the V.O. Chidambaranar Port Authority in Thoothukudi, Tamil Nadu, had become the first port in the country to initiate the implementation of advanced Anti-Drone System as part of measures to protect the critical port infrastructure. The port signed an agreement with the Central Electronics Limited, Department of Scientific and Industrial Research, Ministry of Science and Technology.

Drone revolution and modern warfare

The wars in Ukraine, Lebanon and West Asia have shown how drones have become central to modern warfare; as cheap, mass-produced unmanned systems proliferate, military power is increasingly shaped by industrial scale, technological adaptation and the ability to build, deploy and counter drones

GS III: Internal Security: Defence

EXPLAINER

Rahul Bedi

For decades, military power has been defined by the scale and sophistication of conventional arsenals – combat aircraft, tanks, artillery, warships, air-defence systems, precision-guided missiles, and other high-end assets.

End of superiority

In this environment, battlefield superiority belonged to armies with technologically advanced platforms and equipment, sophisticated intelligence networks, and large budgets. Smaller militaries and non-state actors, by contrast, were largely confined to asymmetric tactics that relied on guerrilla warfare, ambushes, and other unconventional methods to offset their opponents' superior firepower and operational dominance.

But the ongoing wars in Ukraine and Lebanon, together with the wider U.S.-Israel-Iran theatre of conflict, have irrevocably shattered this paradigm, demonstrating that commercially derived drones – mass-produced at scale, rapidly reconfigured for multiple operational roles, and widely deployed – have become a defining feature of contemporary warfare. Performing functions ranging from intelligence, surveillance, and reconnaissance (ISR) and target acquisition to precision strikes, artillery spotting, electronic warfare, and logistics support, they have evolved from auxiliary assets into central instruments of military operations.

In doing so, they have transformed the 21st-century battlespace into an environment of persistent visibility and rapid engagement, where front lines remain continuously exposed, and rear areas can no longer be assumed secure, as multiple types of Unmanned Aerial Systems (UAS) can locate, track, and strike targets with unprecedented speed and precision.

Across these concurrent theatres of conflict, the widespread – and in some cases decisive – employment of drones has challenged established assumptions about how military power is generated and applied, reshaping doctrine, force structures, and future warfighting concepts. The consequence has been the emergence of a continuous and interconnected battlespace in which no position is truly beyond reach, and no movement can safely assume it will remain concealed for long, as detection is increasingly followed by rapid engagement and destruction.

Ukraine drone war

Nowhere has this transformation been more visible than in Ukraine, where Russia's 'Special Military Operation' launched in February 2022, as a conventional war involving combat aircraft, tanks and artillery, evolved within two years into the world's first industrial-scale, drone-intensive conflict.

From the earliest stages of the Russian invasion, Ukraine rapidly adapted commercially available drones – originally designed for civilian purposes such as aerial photography, mapping, and basic surveillance – alongside a limited number of pre-existing military Unmanned Aerial Vehicle (UAV) assets into improvised reconnaissance and strike systems.

What had initially functioned as a support tool for intelligence gathering and guiding artillery fire quickly evolved into a decisive combat capability, as small quadcopters and First-Person View (FPV) drones were progressively weaponised and deployed as low-cost, precision-guided munitions. This shift marked a fundamental transformation in how unmanned systems were used on the battlefield: from passive information-gathering platforms to active instruments of destruction. By around 2024, drones had become fully integrated into almost every layer of Ukrainian combat, ranging from tactical battlefield surveillance to frontline targeting and deep-strike missions against logistics hubs, supply routes, and rear-area infrastructure.

From the earliest stages of Russian invasion, Ukraine adapted commercially available drones. FILE PHOTO

The operational template that emerged from this experience in Ukraine was subsequently replicated, albeit to varying degrees and in different forms, across the continuing West Asian conflicts, underscoring the growing centrality of drones to contemporary warfare.

FPV revolution

At the heart of Ukraine's drone revolution is the FPV system – an inexpensive, commercially available platform originally designed for recreational racing and aerial photography. Controlled through a live video feed transmitted from an onboard camera to virtual-reality-style goggles worn by their operators, FPV systems offer exceptional precision, manoeuvrability, and responsiveness.

These were then rapidly transformed into a broad spectrum of combat systems, including FPV strike drones, bombers, interceptors, and long-range attack variants. Among the most prominent are heavy-lift hexacopter Vampire drones – nicknamed "Baba Yaga" by Russian forces after the fearsome figure from Slavic folklore – alongside a vast number of improvised modular platforms, assembled in multiple workshops across Ukraine.

The most common are FPV kamikaze or strike drones, inexpensive quadcopters carrying explosive payloads such as modified rocket-propelled grenade warheads or purpose-built munitions, flown directly into targets as disposable precision-guided missiles. Their extremely low cost has radically reshaped battlefield economics which enable systems worth only a few hundred dollars to destroy armoured vehicles and equipment valued in the millions.

These systems operate within a broader Ukrainian deep-strike drone architecture that includes loitering munitions such as RAM II and UJ-31 Zozulya. The latter functions as an aerially deployed "parasite drone," carried by the Ukrainian-designed multi-purpose UJ-22 Airborne long-range UAV's, enabling penetration of contested airspace under intensive electronic warfare conditions and extending operational reach. RAM II, by contrast, is a short-range precision loitering munition employed in coordination with reconnaissance drones like the locally developed Shark and PD-2, with improved variants offering greater range and endurance to expand their engagement envelope against air defence systems and rear-area targets.

Also included within Ukraine's expanding drone inventory are bomber drones – largely adapted from commercial DJI Mavic 3 and DJI Matrice 300 RTK quadcopter platforms originally designed for aerial photography, surveying and industrial applications – which carry and release grenades, anti-tank mines and improvised munitions. Unlike kamikaze systems, they survive missions and can conduct multiple sorties, making them particularly effective against trenches, bunkers and other static positions.

Alongside these, Ukraine fields FPV-based strike systems like Pegasus and long-range, one-way attack drones designed to strike deep inside Russian territory against logistics hubs, airbases and critical infrastructure, far beyond the frontline. In practice, however, the distinction between FPV strike drones and loitering munitions has become increasingly blurred, with many FPV-based thermal and night-vision-equipped variants for round-the-clock operations.

But, Ukraine's most significant innovation has been the emergence of fibre-optic FPV drones, an electronic warfare (EW)-resistant class of systems. Unlike conventional drones, which rely on radio-frequency links vulnerable to jamming, these platforms transmit commands and video through ultra-thin fibre-optic cables that spool out during flight, rendering electronic interference largely ineffective. In heavily contested electromagnetic environments, this capability restores a significant operational advantage to drone operators by enabling missions to be conducted largely free from electronic disruption.

Regional drone networks

Meanwhile, unlike Ukraine, Hezbollah's offensive UAS capability is primarily built around Iranian-supplied platforms with limited local modification, relying heavily on systems like Ababil, Mohajer, and Shahed series. These platforms provide a layered operational architecture spanning ISR and strike functions. Within this framework, the Mohajer-4 and Shahed-129 provide tiered-ISR coverage across medium- to long-ranges, while the Shahed-136 loitering munition fulfils a 'dedicated' one-way strike role across a wider regional theatre.

More recently, Hezbollah has also adopted jamming-resistant fibre-optic FPV drones, enabling operations in heavily contested electromagnetic environments and enhancing close-range reconnaissance and precision strike effectiveness despite extensive Israeli EW measures.

In response, the Israel Defence Forces (IDF) in Lebanon have developed a layered counter-drone architecture, integrating EW systems, specialised radar arrays, and experimental platforms like the AI-enabled Iron Drone Raider, designed to neutralise low-altitude UAVs through kinetic, non-explosive interception methods such as net capture – by which a physical net is deployed to entangle and disable an incoming drone mid-air – or direct collision, rather than costly missile engagements. Alongside this, the IDF operates a multi-tiered UAV force structure combining long-endurance Heron systems for persistent ISR with armed drones and loitering munitions integrated into reconnaissance-strike complexes for rapid engagement.

Iran, for its part, constitutes a third and structurally distinct model of drone warfare.

Rather than employing drones solely as tactical assets, the Islamic Revolutionary Guard Corps (IRGC) integrates them into a broader strategy of deterrence, coercion, and power projection against the U.S.-Israel combine and their regional partners across West Asia.

Through indigenous systems such as Shahed drone variants, alongside platforms supplied to proxy forces across Iraq, Syria, Lebanon, and Yemen, the IRGC has demonstrated an ability to threaten military bases, critical infrastructure, and naval assets across West Asia at relatively low cost.

Economy shift

Thus, across ongoing wars and conflicts, the drone revolution is defined as much by economics as technology. Cheap, mass-produced unmanned systems are swiftly and irreversibly replacing reliance on expensive platforms, complex logistics, and specialised military structures, shifting the advantage toward the scale, speed, and production capacity of UAS ecosystems.

Warfare, therefore, is increasingly becoming a test of industrial endurance and relentless technological adaptation, where success depends on the ability to build, deploy, and counter fast-evolving, continuously reconfigured drone systems. And, in this rapidly evolving battlespace, drones are no longer just weapons, but the very infrastructure of modern-day war – shaping how conflicts are surveilled, fought, sustained, and ultimately decided.

(Rahul Bedi is a journalist based in New Delhi and Chandigarh specialising in military, defence and security matters)

THE GIST

- Ukraine has pioneered industrial-scale drone warfare, integrating FPV drones, loitering munitions, bomber drones and fibre-optic systems across reconnaissance, targeting and deep-strike missions.
- Low-cost FPV strike drones have transformed battlefield economics, enabling systems worth a few hundred dollars to destroy armoured vehicles and equipment valued in the millions.
- The widespread adoption of drones has challenged traditional assumptions about military power, creating a continuous battlespace where detection is increasingly followed by rapid engagement and destruction.

16J6. Drone revolution and modern warfare
ड्रोन क्रांति और आधुनिक युद्धकला

- The wars in **Ukraine**, **Lebanon** and **West Asia** have shown how **drones** have become central to **modern warfare**.
  यूक्रेन, **लेबनान** और **पश्चिम एशिया** के युद्धों ने यह प्रदर्शित किया है कि **ड्रोन** किस प्रकार **आधुनिक युद्धकला** के केंद्र में आ गए हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

- As cheap, **mass-produced unmanned systems** proliferate, **military power** is increasingly shaped by **industrial scale**, **technological adaptation** and the ability to **build, deploy and counter drones**.
  जैसे-जैसे सस्ते और **बड़े पैमाने पर निर्मित मानवरहित प्रणालियों** का प्रसार बढ़ रहा है, **सैन्य शक्ति** का स्वरूप अधिकाधिक **औद्योगिक क्षमता**, **तकनीकी अनुकूलन** तथा **ड्रोन के निर्माण, तैनाती और उनका मुकाबला करने की क्षमता** से निर्धारित हो रहा है।

End of Superiority
श्रेष्ठता के पारंपरिक प्रतिमान का अंत

- For decades, **military power** has been defined by the scale and sophistication of conventional arsenals — combat aircraft, tanks, artillery, warships, air-defence systems, precision-guided missiles, and other high-end assets.
  दशकों तक **सैन्य शक्ति** को पारंपरिक हथियारों की मात्रा और तकनीकी परिष्कृतता के आधार पर परिभाषित किया जाता रहा है — जैसे लड़ाकू विमान, टैंक, तोपखाना, युद्धपोत, वायु-रक्षा प्रणालियाँ, सटीक-निर्देशित मिसाइलें और अन्य उन्नत सैन्य संसाधन।
- In this environment, battlefield superiority belonged to armies with technologically advanced platforms and equipment, sophisticated intelligence networks, and large budgets.
  इस वातावरण में युद्धक्षेत्र में श्रेष्ठता उन सेनाओं को प्राप्त होती थी जिनके पास तकनीकी रूप से उन्नत प्लेटफॉर्म, आधुनिक उपकरण, परिष्कृत खुफिया तंत्र और विशाल बजट होते थे।
- Smaller militaries and non-state actors, by contrast, were largely confined to asymmetric tactics that relied on guerrilla warfare, ambushes, and other unconventional methods to offset their opponents' superior firepower and operational dominance.
  इसके विपरीत, छोटी सेनाएँ और गैर-राज्यीय तत्व मुख्यतः असममित रणनीतियों तक सीमित रहते थे, जिनमें गुरिल्ला युद्ध, घात लगाकर हमला और अन्य अपरंपरागत तरीके शामिल थे, ताकि वे अपने विरोधियों की अधिक मारक क्षमता और संचालनात्मक श्रेष्ठता का संतुलन बना सकें।
- But the ongoing wars in **Ukraine** and **Lebanon**, together with the wider **U.S.–Israel–Iran** theatre of conflict, have irrevocably shattered this paradigm, demonstrating that commercially derived **drones** have become a defining feature of contemporary warfare.
  किन्तु **यूक्रेन** और **लेबनान** में जारी युद्धों के साथ-साथ व्यापक **अमेरिका–इज़राइल–ईरान** संघर्ष ने इस प्रतिमान को स्थायी रूप से तोड़ दिया है और यह प्रदर्शित किया है कि व्यावसायिक रूप से विकसित **ड्रोन** आधुनिक युद्ध की एक प्रमुख विशेषता बन चुके हैं।
- Mass-produced at scale, rapidly reconfigured for multiple operational roles, and widely deployed, they have become a defining feature of contemporary warfare.
  बड़े पैमाने पर निर्मित, विभिन्न परिचालन भूमिकाओं के लिए शीघ्रता से अनुकूलित और व्यापक रूप से तैनात किए जाने वाले ये ड्रोन समकालीन युद्ध का प्रमुख तत्व बन गए हैं।
- Performing functions ranging from **intelligence, surveillance, and reconnaissance (ISR)** and target acquisition to precision strikes, artillery spotting, electronic warfare, and logistics support, they have evolved from auxiliary assets into central instruments of military operations.
  खुफिया जानकारी, निगरानी और टोही (ISR), लक्ष्य पहचान, सटीक हमले, तोपखाना निर्देशन, इलेक्ट्रॉनिक युद्ध तथा रसद सहायता जैसी भूमिकाएँ निभाते हुए ये सहायक साधनों से विकसित होकर सैन्य अभियानों के केंद्रीय उपकरण बन गए हैं।
- In doing so, they have transformed the **21st-century battlespace** into an environment of persistent visibility and rapid engagement.
  इस प्रक्रिया में उन्होंने **21वीं सदी के युद्धक्षेत्र** को निरंतर निगरानी और त्वरित आक्रमण वाले वातावरण में परिवर्तित कर दिया है।
- Front lines remain continuously exposed, and rear areas can no longer be assumed secure, as multiple types of **Unmanned Aerial Systems (UAS)** can locate, track, and strike targets

with unprecedented speed and precision.
अग्रिम मोर्चे निरंतर उजागर रहते हैं और पीछे के क्षेत्र अब सुरक्षित नहीं माने जा सकते, क्योंकि विभिन्न प्रकार की **मानवरहित हवाई प्रणालियाँ (UAS)** अभूतपूर्व गति और सटीकता के साथ लक्ष्यों का पता लगा सकती हैं, उनका पीछा कर सकती हैं और उन पर हमला कर सकती हैं।

- Across these concurrent theatres of conflict, the widespread — and in some cases decisive — employment of drones has challenged established assumptions about how military power is generated and applied.
इन समानांतर संघर्ष क्षेत्रों में ड्रोन के व्यापक और कुछ मामलों में निर्णायक उपयोग ने इस धारणा को चुनौती दी है कि सैन्य शक्ति कैसे उत्पन्न और प्रयोग की जाती है।
- They are reshaping doctrine, force structures, and future warfighting concepts.
वे सैन्य सिद्धांतों, बल संरचनाओं और भविष्य के युद्ध संबंधी अवधारणाओं को पुनर्परिभाषित कर रहे हैं।
- The consequence has been the emergence of a continuous and interconnected battlespace in which no position is truly beyond reach, and no movement can safely assume it will remain concealed for long.
इसके परिणामस्वरूप एक निरंतर और परस्पर जुड़ा हुआ युद्धक्षेत्र उभरा है जिसमें कोई भी स्थान वास्तव में पहुँच से बाहर नहीं है और कोई भी गतिविधि लंबे समय तक गुप्त रहने की आशा नहीं कर सकती।
- Detection is increasingly followed by rapid engagement and destruction.
अब लक्ष्य की पहचान के बाद प्रायः शीघ्र हमला और विनाश होता है।

Ukraine Drone War
यूक्रेन का ड्रोन युद्ध

- Nowhere has this transformation been more visible than in **Ukraine**, where **Russia's 'Special Military Operation'**, launched in February 2022 as a conventional war involving combat aircraft, tanks and artillery, evolved within two years into the world's first industrial-scale, drone-intensive conflict.
यह परिवर्तन सबसे स्पष्ट रूप से **यूक्रेन** में दिखाई दिया, जहाँ फरवरी 2022 में शुरू किया गया **रूस का 'विशेष सैन्य अभियान'**, जो प्रारंभ में लड़ाकू विमानों, टैंकों और तोपखाने पर आधारित पारंपरिक युद्ध था, दो वर्षों के भीतर विश्व के पहले औद्योगिक स्तर के ड्रोन-प्रधान संघर्ष में बदल गया।
- From the earliest stages of the Russian invasion, Ukraine rapidly adapted commercially available drones — originally designed for civilian purposes such as aerial photography, mapping, and basic surveillance — alongside a limited number of pre-existing military **Unmanned Aerial Vehicle (UAV)** assets into improvised reconnaissance and strike systems.
रूसी आक्रमण के प्रारंभिक चरण से ही यूक्रेन ने व्यावसायिक रूप से उपलब्ध ड्रोन — जो मूलतः हवाई फोटोग्राफी, मानचित्रण और सामान्य निगरानी जैसे नागरिक उद्देश्यों के लिए बनाए गए थे — तथा सीमित संख्या में उपलब्ध सैन्य **मानवरहित हवाई वाहन (UAV)** को त्वरित रूप से टोही और आक्रमण प्रणालियों में परिवर्तित कर दिया।
- What had initially functioned as a support tool for intelligence gathering and guiding artillery fire quickly evolved into a decisive combat capability.
जो प्रारंभ में खुफिया जानकारी एकत्र करने और तोपखाने के हमलों का मार्गदर्शन करने के लिए उपयोग किए जाते थे, वे शीघ्र ही निर्णायक युद्धक क्षमता में बदल गए।
- Small **quadcopters** and **First-Person View (FPV) drones** were progressively weaponised and deployed as low-cost, precision-guided munitions.
छोटे **क्वाडकॉप्टर** और **फर्स्ट-पर्सन व्यू (FPV) ड्रोन** क्रमशः हथियारों में परिवर्तित किए गए और कम लागत वाले सटीक-निर्देशित हथियारों के रूप में तैनात किए गए।
- This shift marked a fundamental transformation in how unmanned systems were used on the battlefield: from passive information-gathering platforms to active instruments of destruction.
इस परिवर्तन ने युद्धक्षेत्र में मानवरहित प्रणालियों के उपयोग की प्रकृति को मूल रूप से बदल दिया — निष्क्रिय सूचना-संग्रह मंचों से सक्रिय विनाशकारी उपकरणों तक।

Website : patrioticias.in

- By around 2024, drones had become fully integrated into almost every layer of Ukrainian combat, ranging from tactical battlefield surveillance to frontline targeting and deep-strike missions against logistics hubs, supply routes, and rear-area infrastructure.
  लगभग 2024 तक ड्रोन यूक्रेनी युद्ध संचालन के लगभग प्रत्येक स्तर में पूरी तरह एकीकृत हो चुके थे, जिनका उपयोग सामरिक निगरानी से लेकर अग्रिम मोर्चे के लक्ष्य निर्धारण और रसद केंद्रों, आपूर्ति मार्गों तथा पीछे के बुनियादी ढाँचे पर गहरे हमलों तक किया जाने लगा।
- The operational template that emerged from this experience in Ukraine was subsequently replicated, albeit to varying degrees and in different forms, across the continuing **West Asian conflicts**.
  यूक्रेन के इस अनुभव से जो संचालनात्मक मॉडल विकसित हुआ, उसे बाद में विभिन्न रूपों और अलग-अलग स्तरों पर जारी **पश्चिम एशियाई संघर्षों** में भी अपनाया गया।
- This underscores the growing centrality of **drones** to contemporary warfare.
  यह तथ्य आधुनिक युद्ध में **ड्रोन** की बढ़ती केंद्रीय भूमिका को रेखांकित करता है।

FPV Revolution
एफपीवी क्रांति

- At the heart of **Ukraine's drone revolution** is the **FPV (First-Person View) system** — an inexpensive, commercially available platform originally designed for recreational racing and aerial photography.
  यूक्रेन की ड्रोन क्रांति के केंद्र में **एफपीवी (फर्स्ट-पर्सन व्यू) प्रणाली** है — एक कम लागत वाला, व्यावसायिक रूप से उपलब्ध मंच, जिसे मूल रूप से मनोरंजक रेसिंग और हवाई फोटोग्राफी के लिए विकसित किया गया था।
- Controlled through a live video feed transmitted from an onboard camera to virtual-reality-style goggles worn by their operators, FPV systems offer exceptional precision, manoeuvrability, and responsiveness.
  ऑनबोर्ड कैमरे से प्राप्त लाइव वीडियो फीड को संचालकों द्वारा पहने गए वर्चुअल-रियलिटी शैली के चश्मों तक पहुँचाकर नियंत्रित किए जाने वाले एफपीवी सिस्टम असाधारण सटीकता, गतिशीलता और त्वरित प्रतिक्रिया क्षमता प्रदान करते हैं।
- These were then rapidly transformed into a broad spectrum of combat systems, including **FPV strike drones, bombers, interceptors, and long-range attack variants**.
  इसके बाद इन्हें तीव्र गति से विभिन्न प्रकार की युद्ध प्रणालियों में परिवर्तित किया गया, जिनमें **एफपीवी स्ट्राइक ड्रोन, बमवर्षक ड्रोन, इंटरसेप्टर तथा लंबी दूरी के आक्रमणकारी संस्करण** शामिल हैं।
- Among the most prominent are heavy-lift **hexacopter Vampire drones** — nicknamed **"Baba Yaga"** by Russian forces after the fearsome figure from Slavic folklore — alongside a vast number of improvised modular platforms, assembled in multiple workshops across Ukraine.
  इनमें भारी भार वहन करने वाले **हेक्साकॉप्टर वैम्पायर ड्रोन** प्रमुख हैं, जिन्हें रूसी सेनाओं ने स्लाव लोककथाओं के भयावह पात्र के नाम पर **"बाबा यागा"** नाम दिया है। इनके अतिरिक्त यूक्रेन भर की अनेक कार्यशालाओं में निर्मित बड़ी संख्या में मॉड्यूलर और तदर्थ प्लेटफॉर्म भी शामिल हैं।
- The most common are **FPV kamikaze or strike drones**, inexpensive quadcopters carrying explosive payloads such as modified rocket-propelled grenade warheads or purpose-built munitions, flown directly into targets as disposable precision-guided missiles.
  सबसे सामान्य प्रकार **एफपीवी कामिकाज़े अथवा स्ट्राइक ड्रोन** हैं, जो कम लागत वाले क्वाडकॉप्टर होते हैं और संशोधित रॉकेट-प्रोपेल्ड ग्रेनेड वारहेड या विशेष रूप से निर्मित विस्फोटक सामग्री लेकर सीधे लक्ष्य पर प्रहार करते हैं, मानो वे एक बार उपयोग किए जाने वाले सटीक-निर्देशित मिसाइल हों।
- Their extremely low cost has radically reshaped **battlefield economics**, enabling systems worth only a few hundred dollars to destroy armoured vehicles and equipment valued in the millions.
  इनकी अत्यंत कम लागत ने **युद्धक्षेत्र की अर्थव्यवस्था** को मूल रूप से बदल दिया है, जिससे कुछ सौ डॉलर मूल्य की प्रणालियाँ लाखों डॉलर मूल्य वाले बख्तरबंद वाहनों और उपकरणों को नष्ट करने में सक्षम हो गई हैं।

- These systems operate within a broader Ukrainian **deep-strike drone architecture** that includes loitering munitions such as **RAM II** and **UJ-31 Zozulya**.
  ये प्रणालियाँ यूक्रेन की व्यापक **डीप-स्ट्राइक ड्रोन संरचना** का हिस्सा हैं, जिसमें **RAM II** और **UJ-31 ज़ोजुल्या** जैसी लोटरिंग म्यूनिशन प्रणालियाँ शामिल हैं।
- The latter functions as an aerially deployed **"parasite drone,"** carried by the Ukrainian-designed multi-purpose **UJ-22 Airborne** long-range UAVs, enabling penetration of contested airspace under intensive electronic warfare conditions and extending operational reach.
  UJ-31 ज़ोजुल्या एक हवाई रूप से तैनात **"पैरासाइट ड्रोन"** के रूप में कार्य करता है, जिसे यूक्रेन द्वारा विकसित बहुउद्देश्यीय **UJ-22 एयरबोर्न** लंबी दूरी के UAV द्वारा ले जाया जाता है। यह तीव्र इलेक्ट्रॉनिक युद्ध परिस्थितियों में भी विवादित वायुक्षेत्र में प्रवेश कर संचालन की पहुँच को विस्तारित करता है।
- **RAM II**, by contrast, is a short-range precision loitering munition employed in coordination with reconnaissance drones like the locally developed **Shark** and **PD-2**.
  इसके विपरीत, **RAM II** एक अल्प-दूरी की सटीक लोटरिंग म्यूनिशन है, जिसका उपयोग स्थानीय रूप से विकसित **शार्क** और **PD-2** जैसे टोही ड्रोन के साथ समन्वय में किया जाता है।
- Improved variants offer greater range and endurance to expand their engagement envelope against air defence systems and rear-area targets.
  इसके उन्नत संस्करण अधिक दूरी और सहनशीलता प्रदान करते हैं, जिससे वायु-रक्षा प्रणालियों और पीछे के क्षेत्रों में स्थित लक्ष्यों के विरुद्ध उनकी प्रभावशीलता बढ़ जाती है।
- Also included within Ukraine's expanding drone inventory are **bomber drones**, largely adapted from commercial **DJI Mavic 3** and **DJI Matrice 300 RTK** quadcopter platforms originally designed for aerial photography, surveying and industrial applications.
  यूक्रेन के विस्तारित ड्रोन भंडार में **बमवर्षक ड्रोन** भी शामिल हैं, जिन्हें मुख्यतः **DJI Mavic 3** और **DJI Matrice 300 RTK** जैसे व्यावसायिक क्वाडकॉप्टर प्लेटफॉर्मों से अनुकूलित किया गया है, जिन्हें मूल रूप से हवाई फोटोग्राफी, सर्वेक्षण और औद्योगिक उपयोगों के लिए बनाया गया था।
- These carry and release grenades, anti-tank mines and improvised munitions.
  ये ग्रेनेड, टैंक-रोधी बारूदी सुरंगें तथा अन्य तदर्थ विस्फोटक सामग्री ले जाकर गिराते हैं।
- Unlike kamikaze systems, they survive missions and can conduct multiple sorties, making them particularly effective against trenches, bunkers and other static positions.
  कामिकाज़े प्रणालियों के विपरीत, ये मिशन के बाद सुरक्षित लौट आते हैं और अनेक अभियानों में पुनः उपयोग किए जा सकते हैं, जिससे वे खाइयों, बंकरों और अन्य स्थिर सैन्य ठिकानों के विरुद्ध विशेष रूप से प्रभावी बनते हैं।
- Alongside these, Ukraine fields **FPV-based strike systems** like **Pegasus** and long-range, one-way attack drones designed to strike deep inside Russian territory against logistics hubs, airbases and critical infrastructure, far beyond the frontline.
  इसके अतिरिक्त, यूक्रेन **पेगासस** जैसे **एफपीवी-आधारित स्ट्राइक सिस्टम** तथा लंबी दूरी के एकतरफा आक्रमणकारी ड्रोन भी संचालित करता है, जिन्हें रूस के भीतर गहराई तक स्थित रसद केंद्रों, वायुसेना अड्डों और महत्वपूर्ण अवसंरचना पर हमला करने के लिए विकसित किया गया है।
- In practice, however, the distinction between FPV strike drones and **loitering munitions** has become increasingly blurred.
  व्यावहारिक रूप से, एफपीवी स्ट्राइक ड्रोन और **लोटरिंग म्यूनिशन** के बीच का अंतर लगातार कम होता जा रहा है।
- Many FPV-based variants are now equipped with **thermal imaging** and **night-vision systems** for round-the-clock operations.
  अब अनेक एफपीवी-आधारित संस्करण **थर्मल इमेजिंग** और **नाइट-विजन प्रणालियों** से लैस हैं, जिससे वे चौबीसों घंटे संचालन करने में सक्षम हैं।
- But Ukraine's most significant innovation has been the emergence of **fibre-optic FPV drones**, an **electronic warfare (EW)-resistant** class of systems.

किन्तु यूक्रेन का सबसे महत्वपूर्ण नवाचार **फाइबर-ऑप्टिक एफपीवी ड्रोन** का विकास है, जो **इलेक्ट्रॉनिक युद्ध (EW) प्रतिरोधी** प्रणालियों की एक नई श्रेणी है।

- Unlike conventional drones, which rely on radio-frequency links vulnerable to jamming, these platforms transmit commands and video through ultra-thin **fibre-optic cables** that spool out during flight, rendering electronic interference largely ineffective.
पारंपरिक ड्रोन, जो रेडियो-फ्रीक्वेंसी संकेतों पर निर्भर होते हैं और जैमिंग के प्रति संवेदनशील होते हैं, उनसे भिन्न ये प्लेटफॉर्म अत्यंत पतले **फाइबर-ऑप्टिक केबलों** के माध्यम से आदेश और वीडियो संकेत भेजते हैं, जो उड़ान के दौरान खुलते जाते हैं और इलेक्ट्रॉनिक हस्तक्षेप को लगभग निष्प्रभावी बना देते हैं।
- In heavily contested **electromagnetic environments**, this capability restores a significant operational advantage to drone operators by enabling missions to be conducted largely free from electronic disruption.
अत्यधिक प्रतिस्पर्धी **विद्युत-चुंबकीय वातावरणों** में यह क्षमता ड्रोन संचालकों को महत्वपूर्ण संचालनात्मक बढ़त प्रदान करती है, क्योंकि इससे मिशनों को इलेक्ट्रॉनिक व्यवधानों से लगभग मुक्त होकर संचालित किया जा सकता है।

Regional Drone Networks
क्षेत्रीय ड्रोन नेटवर्क

- Meanwhile, unlike **Ukraine**, **Hezbollah's** offensive **Unmanned Aerial Systems (UAS)** capability is primarily built around **Iranian-supplied platforms** with limited local modification, relying heavily on systems like **Ababil, Mohajer, and Shahed** series.
इस बीच, **यूक्रेन** के विपरीत, **हिज़्बुल्लाह** की आक्रामक **मानवरहित हवाई प्रणाली (UAS)** क्षमता मुख्यतः **ईरान द्वारा उपलब्ध कराए गए प्लेटफॉर्मों** पर आधारित है, जिनमें स्थानीय स्तर पर सीमित संशोधन किए गए हैं, और जो प्रमुख रूप से **अबाबील, मोहाजेर तथा शाहेद** श्रृंखला की प्रणालियों पर निर्भर हैं।
- These platforms provide a layered operational architecture spanning **ISR** and strike functions.
ये प्लेटफॉर्म **खुफिया, निगरानी और टोही (ISR)** तथा आक्रमण संबंधी कार्यों को समाहित करने वाली बहुस्तरीय संचालनात्मक संरचना प्रदान करते हैं।
- Within this framework, the **Mohajer-4** and **Shahed-129** provide tiered-ISR coverage across medium- to long-ranges, while the **Shahed-136 loitering munition** fulfils a 'dedicated' one-way strike role across a wider regional theatre.
इस संरचना के अंतर्गत **मोहाजेर-4** और **शाहेद-129** मध्यम से लंबी दूरी तक चरणबद्ध ISR कवरेज प्रदान करते हैं, जबकि **शाहेद-136 लोटरिंग म्यूनिशन** व्यापक क्षेत्रीय परिदृश्य में एक समर्पित एकतरफा आक्रमणकारी भूमिका निभाता है।
- More recently, **Hezbollah** has also adopted **jamming-resistant fibre-optic FPV drones**, enabling operations in heavily contested electromagnetic environments and enhancing close-range reconnaissance and precision strike effectiveness despite extensive Israeli **electronic warfare (EW)** measures.
हाल के समय में **हिज़्बुल्लाह** ने **जैमिंग-प्रतिरोधी फाइबर-ऑप्टिक एफपीवी ड्रोन** भी अपनाए हैं, जो अत्यधिक प्रतिस्पर्धी विद्युत-चुंबकीय वातावरण में संचालन को संभव बनाते हैं तथा व्यापक इज़राइली **इलेक्ट्रॉनिक युद्ध (EW)** उपायों के बावजूद निकट-दूरी की टोही और सटीक आक्रमण क्षमता को बढ़ाते हैं।
- In response, the **Israel Defence Forces (IDF)** in **Lebanon** have developed a layered **counter-drone architecture**, integrating EW systems, specialised radar arrays, and experimental platforms like the **AI-enabled Iron Drone Raider**.
इसके प्रत्युत्तर में **लेबनान** में तैनात **इज़राइल रक्षा बल (IDF)** ने एक बहुस्तरीय **ड्रोन-रोधी संरचना** विकसित की है, जिसमें EW प्रणालियाँ, विशेषीकृत रडार नेटवर्क तथा **AI-सक्षम आयरन ड्रोन रेडर** जैसे प्रयोगात्मक प्लेटफॉर्म शामिल हैं।
- This system is designed to neutralise low-altitude UAVs through kinetic, non-explosive interception methods such as **net capture** — by which a physical net is deployed to entangle and disable an incoming drone mid-air — or direct collision, rather than costly missile

engagements.
यह प्रणाली निम्न ऊँचाई पर उड़ने वाले UAVs को **नेट कैप्चर** जैसी गतिज, गैर-विस्फोटक अवरोधन तकनीकों के माध्यम से निष्क्रिय करने के लिए विकसित की गई है, जिसमें हवा में ही एक जाल तैनात कर आने वाले ड्रोन को उलझाकर निष्क्रिय किया जाता है, अथवा प्रत्यक्ष टक्कर का उपयोग किया जाता है, ताकि महँगी मिसाइलों का प्रयोग न करना पड़े।

- Alongside this, the IDF operates a multi-tiered **UAV force structure** combining long-endurance **Heron systems** for persistent ISR with armed drones and loitering munitions integrated into reconnaissance-strike complexes for rapid engagement.
इसके साथ ही, IDF एक बहुस्तरीय **UAV बल संरचना** संचालित करता है, जिसमें दीर्घकालिक ISR के लिए **हेरॉन प्रणाली**, सशस्त्र ड्रोन तथा लोटरिंग म्यूनिशन शामिल हैं, जिन्हें त्वरित आक्रमण हेतु टोही-आक्रमण परिसरों में एकीकृत किया गया है।
- **Iran**, for its part, constitutes a third and structurally distinct model of drone warfare.
दूसरी ओर, **ईरान** ड्रोन युद्ध का एक तीसरा और संरचनात्मक रूप से भिन्न मॉडल प्रस्तुत करता है।
- Rather than employing drones solely as tactical assets, the **Islamic Revolutionary Guard Corps (IRGC)** integrates them into a broader strategy of deterrence, coercion, and power projection against the **U.S.-Israel** combine and their regional partners across **West Asia**.
ड्रोन को केवल सामरिक संसाधन के रूप में उपयोग करने के बजाय, **इस्लामिक रिवोल्यूशनरी गार्ड कॉर्प्स (IRGC)** उन्हें **अमेरिका-इज़राइल** गठजोड़ तथा उनके **पश्चिम एशिया** स्थित साझेदारों के विरुद्ध प्रतिरोध, दबाव और शक्ति-प्रदर्शन की व्यापक रणनीति में सम्मिलित करता है।
- Through indigenous systems such as **Shahed drone variants**, alongside platforms supplied to proxy forces across **Iraq, Syria, Lebanon, and Yemen**, the IRGC has demonstrated an ability to threaten military bases, critical infrastructure, and naval assets across West Asia at relatively low cost.
शाहेद ड्रोन के विभिन्न स्वदेशी संस्करणों तथा **इराक, सीरिया, लेबनान और यमन** में सहयोगी समूहों को उपलब्ध कराए गए प्लेटफॉर्मों के माध्यम से IRGC ने अपेक्षाकृत कम लागत पर सैन्य अड्डों, महत्वपूर्ण अवसंरचनाओं और नौसैनिक संसाधनों को खतरे में डालने की क्षमता प्रदर्शित की है।

Economy Shift
आर्थिक प्रतिमान में परिवर्तन

- Thus, across ongoing wars and conflicts, the **drone revolution** is defined as much by economics as technology.
इस प्रकार, वर्तमान युद्धों और संघर्षों में **ड्रोन क्रांति** केवल तकनीक ही नहीं, बल्कि अर्थशास्त्र द्वारा भी परिभाषित होती है।
- Cheap, mass-produced unmanned systems are swiftly and irreversibly replacing reliance on expensive platforms, complex logistics, and specialised military structures, shifting the advantage toward the scale, speed, and production capacity of **UAS ecosystems**.
कम लागत वाले और बड़े पैमाने पर निर्मित मानवरहित सिस्टम महँगे प्लेटफॉर्मों, जटिल रसद व्यवस्थाओं और विशेष सैन्य संरचनाओं पर निर्भरता को तेज़ी से और स्थायी रूप से प्रतिस्थापित कर रहे हैं, जिससे बढ़त **UAS पारिस्थितिक तंत्रों** की मात्रा, गति और उत्पादन क्षमता की ओर स्थानांतरित हो रही है।
- Warfare, therefore, is increasingly becoming a test of **industrial endurance** and relentless technological adaptation, where success depends on the ability to build, deploy, and counter fast-evolving, continuously reconfigured drone systems.
फलस्वरूप, युद्ध अब बढ़ते हुए **औद्योगिक सहनशक्ति** और निरंतर तकनीकी अनुकूलन की परीक्षा बनता जा रहा है, जहाँ सफलता तीव्र गति से विकसित हो रही और लगातार पुनर्संरचित ड्रोन प्रणालियों के निर्माण, तैनाती और प्रतिरोध की क्षमता पर निर्भर करती है।
- And, in this rapidly evolving battlespace, drones are no longer just weapons, but the very **infrastructure of modern-day war** — shaping how conflicts are surveilled, fought, sustained, and ultimately decided.

और इस तीव्र गति से बदलते युद्धक्षेत्र में, ड्रोन अब केवल हथियार नहीं रह गए हैं, बल्कि वे आधुनिक युद्ध की मूलभूत **अवसंरचना** बन चुके हैं, जो यह निर्धारित कर रहे हैं कि संघर्षों की निगरानी कैसे की जाएगी, युद्ध कैसे लड़ा जाएगा, उसे कैसे बनाए रखा जाएगा और अंततः उसका परिणाम कैसे तय होगा।

Army unveils new uniform policy, phases out colonial-era practices

PCS [redacted]
Saurabh Trivedi
NEW DELHI

In a significant move aimed at modernising military traditions and reinforcing an indigenous identity, the Indian Army has introduced revised dress regulations that progressively remove residual colonial-era practices, terminology, and non-essential accoutrements.

The new policy, elaborated in the Army Uniforms-2026 Pamphlet, reflects the Army's effort to align its dress regulations with contemporary Indian values while maintaining the service's rich traditions and professional standards.

A notable feature of the revised regulations is the introduction of a common Uniform Numbering Scheme for the Army, Navy, and the Air Force. The initiative is intended to improve clarity, interoperability, and synergy among the three services while simplifying references to various dress categories.

The changes are aimed at enhancing uniformity, practicality and ease of implementation across the force. SPECIAL ARRANGEMENT

The Army has retained four broad categories of uniforms – Ceremonial Dress, Working Dress, Mess Dress, and Combat Dress. Unique dress numbers have been assigned to each uniform for ease of identification and administration.

Reflecting India's evolving national identity and contemporary ethos, the latest edition of the Army Uniforms Pamphlet introduces several key changes aimed at shedding remnants of colonial-era practices. Among the notable reforms are the inclusion of the traditional Bandi Jacket as part of formal civil attire, removal of the pouch belt from Mess Dress Nos. 5 and 6, making sword carriage by the Reviewing Officer optional, and discontinuing outdated terminology such as "Royal".

The Army has announced the phased withdrawal of legacy patterns such as Dress No. 3A, which will be discontinued by June 30, 2029.

15J6. Army unveils new uniform policy, phases out colonial-era practices
सेना ने नई वर्दी नीति लागू की, औपनिवेशिक काल की प्रथाओं को चरणबद्ध रूप से समाप्त किया

- **In a significant move aimed at modernising military traditions and reinforcing an indigenous identity, the Indian Army has introduced revised dress regulations that progressively remove residual colonial-era practices, terminology, and non-essential accoutrements.**
  सैन्य परम्पराओं के आधुनिकीकरण और स्वदेशी पहचान को सुदृढ़ करने की दिशा में एक महत्त्वपूर्ण कदम उठाते हुए **भारतीय सेना** ने संशोधित वेशभूषा नियम लागू किए हैं, जिनका उद्देश्य औपनिवेशिक काल की शेष प्रथाओं, शब्दावली और अनावश्यक सजावटी तत्वों को क्रमिक रूप से समाप्त करना है।
- The new policy, elaborated in the **Army Uniforms-2026 Pamphlet**, reflects the Army's effort to align its dress regulations with contemporary Indian values while maintaining the service's rich traditions and professional standards.
  सेना वर्दी-2026 पुस्तिका में विस्तृत नई नीति सेना के उस प्रयास को दर्शाती है जिसके माध्यम से वर्दी संबंधी नियमों को समकालीन भारतीय मूल्यों के अनुरूप बनाया जा रहा है, जबकि सेवा की समृद्ध परम्पराओं और व्यावसायिक मानकों को भी बनाए रखा जा रहा है।
- A notable feature of the revised regulations is the introduction of a common **Uniform Numbering Scheme** for the Army, Navy, and the Air Force.
  संशोधित नियमों की एक प्रमुख विशेषता सेना, नौसेना और वायु सेना के लिए एक समान **वर्दी क्रमांकन प्रणाली** का प्रारम्भ है।
- The initiative is intended to improve clarity, interoperability, and synergy among the three services while simplifying references to various dress categories.
  इस पहल का उद्देश्य तीनों सेनाओं के बीच स्पष्टता, पारस्परिक समन्वय और कार्यगत सामंजस्य को बढ़ाना तथा विभिन्न वर्दी श्रेणियों के संदर्भ को सरल बनाना है।
- The Army has retained four broad categories of uniforms — **Ceremonial Dress, Working Dress, Mess Dress, and Combat Dress**.

सेना ने वर्दियों की चार प्रमुख श्रेणियाँ यथावत रखी हैं — **औपचारिक वेशभूषा, कार्य वेशभूषा, मेस वेशभूषा तथा युद्धक वेशभूषा**।

- Unique dress numbers have been assigned to each uniform for ease of identification and administration.
  पहचान और प्रशासनिक सुविधा के लिए प्रत्येक वर्दी को विशिष्ट क्रमांक प्रदान किए गए हैं।
- Reflecting India's evolving national identity and contemporary ethos, the latest edition of the Army Uniforms Pamphlet introduces several key changes aimed at shedding remnants of colonial-era practices.
  भारत की विकसित होती राष्ट्रीय पहचान और समकालीन दृष्टिकोण को प्रतिबिंबित करते हुए सेना वर्दी पुस्तिका के नवीनतम संस्करण में औपनिवेशिक युग की शेष परम्पराओं को समाप्त करने के उद्देश्य से कई महत्त्वपूर्ण परिवर्तन किए गए हैं।
- Among the notable reforms are the inclusion of the traditional **Bandi Jacket** as part of formal civil attire, removal of the **pouch belt** from Mess Dress Nos. 5 and 6, making sword carriage by the **Reviewing Officer** optional, and discontinuing outdated terminology such as **"Royal"**.
  प्रमुख सुधारों में पारंपरिक **बंदी जैकेट** को औपचारिक नागरिक परिधान का हिस्सा बनाना, मेस वेशभूषा संख्या 5 और 6 से **पाउच बेल्ट** को हटाना, **निरीक्षण अधिकारी** द्वारा तलवार धारण करना वैकल्पिक बनाना तथा **"रॉयल"** जैसे अप्रचलित शब्दों का प्रयोग समाप्त करना शामिल है।
- The Army has announced the phased withdrawal of legacy patterns such as **Dress No. 3A**, which will be discontinued by **June 30, 2029**.
  सेना ने **वेशभूषा संख्या 3ए** जैसे पुरानी शैली के पैटर्न को चरणबद्ध रूप से समाप्त करने की घोषणा की है, जिसे **30 जून 2029** तक पूर्णतः बंद कर दिया जाएगा।

INS Sharda concludes visit to Colombo, boosts bilateral ties

Indian Naval Ship (INS) *Sharda* departed Colombo on June 13 after a successful port call that further strengthened maritime cooperation and friendship between India and Sri Lanka. The visit featured a range of professional, training and sporting engagements between the two maritime forces. The Indian Navy informed that as part of capacity-building initiatives, Sri Lankan Navy personnel received training in small arms handling, basic firefighting, first-aid and rescue procedures aboard the ship. The engagements were aimed at enhancing operational preparedness and fostering greater interoperability between the two forces.

15J6. INS Sharda concludes visit to Colombo, boosts bilateral ties

आईएनएस शारदा ने कोलंबो की यात्रा पूर्ण की, द्विपक्षीय संबंधों को मिला बल

- **Indian Naval Ship (INS) Sharda departed Colombo on June 13 after a successful port call that further strengthened maritime cooperation and friendship between India and Sri Lanka.**

भारतीय नौसैनिक पोत शारदा ने **13 जून** को कोलंबो से अपनी सफल बंदरगाह यात्रा पूर्ण करने के बाद प्रस्थान किया, जिससे **भारत** और **श्रीलंका** के बीच समुद्री सहयोग और मैत्री संबंध और अधिक सुदृढ़ हुए।

- The Indian Navy informed that as part of capacity-building initiatives, Sri Lankan Navy personnel received training in **small arms handling, basic firefighting, first-aid and rescue procedures** aboard the ship.

भारतीय नौसेना ने बताया कि क्षमता निर्माण पहलों के अंतर्गत **श्रीलंकाई नौसेना** के कर्मियों को पोत पर **छोटे हथियारों के संचालन, आधारभूत अग्निशमन, प्राथमिक उपचार तथा बचाव प्रक्रियाओं** का प्रशिक्षण प्रदान किया गया।

The hidden history of the Thai-Bharat connection

GS I: History

Shashi Tharoor

Fourth-term Member of Parliament, Congress party (Lok Sabha) for Thiruvananthapuram, the Chairman of the Parliamentary Standing Committee on External Affairs and the Sahitya Akademi Award-winning author of 29 books, including, most recently, 'The Sage Who Reimagined Hinduism: The Life, Lessons and Legacy of Sree Narayana Guru'

An enduring Thailand-India bond that played a pivotal role in India's independence movement

Today, June 15, marks the 84th anniversary of a historic meeting we have allowed ourselves to forget, which led to the birth of the Indian National Army (INA). I learned about it on a visit to the Thai-Bharat Cultural Lodge (TBCL) in Bangkok, discovering a remarkable, overlooked chapter of history that reveals Thailand's vital role as a neutral, strategic beacon for Indian revolutionaries seeking refuge from British colonial rule. From its humble beginnings as a hub for cultural and intellectual exchange, the organisation evolved into a cornerstone of the Indian independence movement, providing the essential infrastructure for the formation of the INA.

From culture to cause

The roots of this alliance were sown in 1927 during a historic visit to Siam, now Thailand, by Gurudev Rabindranath Tagore, who met with King Prajadhipok (Rama VII). Their dialogue centred on the deep, enduring connections between India and Thailand – ancient ties rooted in religion, philosophy, and shared cultural narratives such as the Ramayana and the Thai Ramakien. Inspired by his vision, Prafulla Kumar Sen, a Bengali scholar who became known as Swami Satyananda Puri, arrived in Bangkok in 1932.

A brilliant intellectual who had taught at the University of Calcutta and Visva-Bharati University, the Swami immersed himself in the Thai language and culture, mastering it in six months and becoming an esteemed professor at Chulalongkorn University. In 1939, he established the Dharam Ashram, a sanctuary for spiritual and cultural exchange, which served as a focal point for the growing Indian diaspora in Bangkok.

In December 1940, this ashram was transformed into the TBCL. A defining moment in the organisation's history occurred shortly after, when the Indian Tricolour was hoisted at the Lodge – a bold, defiant gesture that signalled the arrival of the Indian independence movement in Thailand and drew strong protests from the British Ambassador. As the Second World War descended upon Southeast Asia, the TBCL shifted from a cultural institution to an active political base. By late 1941, as Japanese forces advanced, the Lodge became a nexus for Indian nationalists and independence activists.

One of the most instrumental figures in this era was Sardar Giani Pritam Singh, a Sikh missionary and Ghadar Party veteran who had been preaching revolutionary ideals among the Indian diaspora in Bangkok. Operating from gurdwaras and working closely with the TBCL, Pritam Singh established vital covert links with Major Iwaichi Fujiwara, the chief of the Japanese intelligence unit, F-Kikan. In December 1941, the Indian National Council (INC) was founded at the Silpakorn Theatre in Bangkok by a group of nationalists associated with the TBCL, with Swami Satyananda Puri as its president and Debnath Das as its secretary. This organisation played a crucial role in coordinating the efforts of the Indian independence movement, bridging the gap between civilian aspirations and the military mobilisation led by the Indian Independence League (IIL).

Toward organised resistance

The cooperation between these groups culminated in the historic Bangkok Conference, which took place between June 15 and June 23, 1942, at the Silpakorn Theatre. This gathering represented a turning point in the struggle, bringing together more than a hundred representatives of Indian communities and freedom fighters from across Southeast Asia, including Burma, Malaya, and Singapore.

The conference served three primary functions. It brought together diverse nationalist factions under a coherent political and military framework, effectively establishing the IIL as the central body for Indians residing outside of India. It adopted a comprehensive 34-point resolution, which provided the official blueprint for the INA, stipulating that it would be composed of volunteers and former prisoners of war and supervised by the IIL rather than the Japanese military. The delegates urged Japan to formally recognise India as an independent nation and acknowledge the IIL as its sole legitimate representative, reflecting a strategic effort to ensure that the independence movement maintained its own agency despite its reliance on Japanese support.

The struggle began with a tragedy that shook the movement to its core. In March 1942, a plane carrying the Swami and the Sardar, who were en route to a high-level meeting in Tokyo to secure further commitments for the movement, crashed, resulting in their deaths. Their loss was a devastating blow, yet their sacrifice served to deepen the resolve of those who remained and who conferred in June with the Japanese to set up the INA. Netaji Subhas Chandra Bose's arrival in 1943 provided the centralised, charismatic, and revolutionary military leadership needed. He took command of the IIL and the INA, shifting the focus from decentralised regional council discussions toward a unified, disciplined military and political front designed to launch an armed struggle for Indian independence.

While the TBCL's roots were in intellectual and cultural exchange, Netaji's arrival accelerated the transition to a mass-mobilisation effort, drawing in thousands of civilian volunteers and former prisoners of war who were inspired by his call for "Total Mobilization". Under Bose, the collaboration with the Japanese military was elevated to a high-stakes diplomatic partnership aimed at securing full recognition for the Provisional Government of Free India.

Despite the shift toward a more militarised and centralised command under Netaji, the TBCL continued to serve as a vital institutional bridge. It provided the necessary civilian and cultural cover for many activities that supported the broader independence movement. As the war progressed, the TBCL remained a steadfast centre for the Indian diaspora, even as the focus of the struggle moved to the front lines of the INA's march toward the Indian border. The Lodge maintained its role as a sanctuary for those committed to the ideals of independence, preserving the vision that had been articulated during the early days of Swami Satyananda Puri's tenure – that India's freedom was inextricably linked to the broader cause of Asian liberation from colonial rule.

Keeping history alive

Following the conclusion of the war in 1945, the TBCL was banned by Allied forces and its leaders imprisoned. Even after the conclusion of the war and the dissolution of the INA, the legacy of this era persisted. Thanks to the tireless efforts of figures such as Pandit Raghunath Sharma, the Lodge was successfully re-established in 1946. The Lodge's survival serves as a testament to the fact that the political and military efforts of the Bose era were supported by the deep-rooted cultural and social networks fostered in the years prior. These networks allowed the movement to survive the vacuum of leadership following the war and continue to inform the historic relationship between India and Thailand.

Today, the TBCL remains the only surviving institution from this era, functioning as a living archive, housing a precious collection of rare texts, historical photographs, and documents that provide an intimate window into the lives of the Indian families who contributed to the fight for freedom.

During my visit I was treated to a passionate tour of the premises by Pandeyji, a descendant of Indian rajpurohits who had migrated to Thailand three centuries ago. As he evoked the stories behind each grainy photograph and historic document, it became clear that the TBCL stands not just as a library or a museum, but as a monument to the enduring friendship between the people of Thailand and the Indian diaspora – a symbol of the shared courage and determination that defined one of the most critical, yet often forgotten, chapters of the global anti-colonial movement.

15J6. The hidden history of the Thai-Bharat connection
थाईलैंड–भारत संबंधों का छिपा हुआ इतिहास

- **Today, June 15, marks the 84th anniversary of a historic meeting we have allowed ourselves to forget, which led to the birth of the Indian National Army (INA).**
  आज, **15 जून**, उस ऐतिहासिक बैठक की **84वीं वर्षगाँठ** है जिसे हम लगभग भुला चुके हैं, जबकि उसी बैठक ने **आज़ाद हिन्द फ़ौज** के जन्म का मार्ग प्रशस्त किया था।
- I learned about it on a visit to the Thai-Bharat Cultural Lodge (TBCL) in Bangkok, discovering a remarkable, overlooked chapter of history that reveals Thailand's vital role as a neutral, strategic beacon for Indian revolutionaries seeking refuge from British colonial rule.
  मुझे इसके बारे में **बैंकॉक स्थित थाई-भारत सांस्कृतिक लॉज** की यात्रा के दौरान जानकारी मिली, जहाँ इतिहास के एक उल्लेखनीय किन्तु उपेक्षित अध्याय का पता चला, जो ब्रिटिश औपनिवेशिक शासन से शरण लेने वाले भारतीय क्रांतिकारियों के लिए **थाईलैंड** की महत्त्वपूर्ण एवं रणनीतिक भूमिका को उजागर करता है।

From culture to cause
संस्कृति से स्वतंत्रता संघर्ष तक

- The roots of this alliance were sown in 1927 during a historic visit to Siam, now Thailand, by Gurudev Rabindranath Tagore, who met with King Prajadhipok (Rama VII).

इस सहयोग की नींव **1927** में उस समय पड़ी जब **गुरुदेव रवीन्द्रनाथ ठाकुर** ने तत्कालीन **सियाम (वर्तमान थाईलैंड)** की ऐतिहासिक यात्रा की और वहाँ **राजा प्रजाधिपोक (राम सप्तम)** से भेंट की।

- Inspired by his vision, **Prafulla Kumar Sen, a Bengali scholar who became known as Swami Satyananda Puri, arrived in Bangkok in 1932.**
  उनकी प्रेरणा से बंगाल के विद्वान **प्रफुल्ल कुमार सेन**, जो बाद में **स्वामी सत्यानन्द पुरी** के नाम से प्रसिद्ध हुए, **1932** में बैंकॉक पहुँचे।
- In December 1940, this ashram was transformed into the TBCL.
  दिसम्बर 1940 में इस आश्रम को **थाई-भारत सांस्कृतिक लॉज** में परिवर्तित कर दिया गया।
- One of the most instrumental figures in this era was Sardar Giani Pritam Singh, a Sikh missionary and Ghadar Party veteran who had been preaching revolutionary ideals among the Indian diaspora in Bangkok.
  इस काल के सबसे महत्वपूर्ण व्यक्तियों में से एक थे **सरदार ज्ञानी प्रीतम सिंह**, जो एक सिख धर्मप्रचारक तथा **ग़दर पार्टी** के अनुभवी सदस्य थे और बैंकॉक में भारतीय प्रवासी समुदाय के बीच क्रांतिकारी विचारों का प्रचार कर रहे थे।
- In December 1941, the Indian National Council (INC) was founded at the Silpakorn Theatre in Bangkok by a group of nationalists associated with the TBCL, with Swami Satyananda Puri as its president and Debnath Das as its secretary.
  दिसम्बर 1941 में बैंकॉक के **सिल्पाकॉर्न थिएटर** में लॉज से जुड़े राष्ट्रवादियों के एक समूह ने **भारतीय राष्ट्रीय परिषद** की स्थापना की, जिसके अध्यक्ष **स्वामी सत्यानन्द पुरी** और सचिव **देबनाथ दास** बनाए गए।
- This organisation played a crucial role in coordinating the efforts of the Indian independence movement, bridging the gap between civilian aspirations and the military mobilisation led by the Indian Independence League (IIL).
  इस संगठन ने भारतीय स्वतंत्रता आंदोलन के प्रयासों के समन्वय में अत्यंत महत्वपूर्ण भूमिका निभाई तथा नागरिक आकांक्षाओं और **भारतीय स्वतंत्रता लीग** द्वारा संचालित सैन्य संगठन के बीच सेतु का कार्य किया।

Toward organised resistance
संगठित प्रतिरोध की ओर

- The cooperation between these groups culminated in the historic **Bangkok Conference**, which took place between **June 15 and June 23, 1942**, at the **Silpakorn Theatre**.
  इन समूहों के बीच सहयोग का चरम रूप ऐतिहासिक **बैंकॉक सम्मेलन** के रूप में सामने आया, जो **15 जून से 23 जून 1942** के बीच **सिल्पाकॉर्न थिएटर** में आयोजित हुआ।
- This gathering represented a turning point in the struggle, bringing together more than a hundred representatives of Indian communities and freedom fighters from across Southeast Asia, including Burma, Malaya, and Singapore.
  यह सम्मेलन स्वतंत्रता संघर्ष में एक निर्णायक मोड़ सिद्ध हुआ, जिसमें **बर्मा, मलाया और सिंगापुर** सहित पूरे दक्षिण-पूर्व एशिया से भारतीय समुदायों के एक सौ से अधिक प्रतिनिधि तथा स्वतंत्रता सेनानी एकत्र हुए।
- The conference served three primary functions.
  इस सम्मेलन ने तीन प्रमुख उद्देश्यों की पूर्ति की।
- It brought together diverse nationalist factions under a coherent political and military framework, effectively establishing the **Indian Independence League** as the central body for Indians residing outside of India.
  इसने विभिन्न राष्ट्रवादी समूहों को एक संगठित राजनीतिक और सैन्य ढाँचे के अंतर्गत एकजुट किया तथा प्रभावी रूप से **भारतीय स्वतंत्रता लीग** को भारत के बाहर रहने वाले भारतीयों के केंद्रीय संगठन के रूप में स्थापित किया।
- It adopted a comprehensive **34-point resolution**, which provided the official blueprint for the **Indian National Army**, stipulating that it would be composed of volunteers and former prisoners of war and supervised by the Indian Independence League rather than the Japanese military.

सम्मेलन में एक व्यापक **34-सूत्रीय प्रस्ताव** पारित किया गया, जिसने **आज़ाद हिन्द फ़ौज** के लिए आधिकारिक रूपरेखा प्रदान की। इसमें निर्धारित किया गया कि सेना स्वयंसेवकों और पूर्व युद्धबंदियों से बनेगी तथा उसका संचालन जापानी सेना के बजाय **भारतीय स्वतंत्रता लीग** के अधीन होगा।

- The delegates urged Japan to formally recognise India as an independent nation and acknowledge the Indian Independence League as its sole legitimate representative, reflecting a strategic effort to ensure that the independence movement maintained its own agency despite its reliance on Japanese support.
  प्रतिनिधियों ने जापान से भारत को एक स्वतंत्र राष्ट्र के रूप में औपचारिक मान्यता देने तथा **भारतीय स्वतंत्रता लीग** को उसका एकमात्र वैध प्रतिनिधि स्वीकार करने का आग्रह किया। यह इस बात को सुनिश्चित करने का रणनीतिक प्रयास था कि जापानी समर्थन पर निर्भरता के बावजूद स्वतंत्रता आंदोलन अपनी स्वतंत्र पहचान और निर्णय क्षमता बनाए रखे।
- In March 1942, a plane carrying the Swami and the Sardar, who were en route to a high-level meeting in Tokyo to secure further commitments for the movement, crashed, resulting in their deaths.
  मार्च 1942 में स्वामी और सरदार को लेकर टोक्यो जा रहा एक विमान दुर्घटनाग्रस्त हो गया। वे आंदोलन के लिए अतिरिक्त समर्थन सुनिश्चित करने हेतु एक उच्चस्तरीय बैठक में भाग लेने जा रहे थे। इस दुर्घटना में दोनों की मृत्यु हो गई।
- **Netaji Subhas Chandra Bose's** arrival in 1943 provided the centralised, charismatic, and revolutionary military leadership needed.
  नेताजी सुभाष चन्द्र बोस के **1943** में आगमन ने आंदोलन को वह केंद्रीकृत, प्रेरणादायी और क्रांतिकारी सैन्य नेतृत्व प्रदान किया जिसकी आवश्यकता थी।
- He took command of the Indian Independence League and the Indian National Army, shifting the focus from decentralised regional council discussions toward a unified, disciplined military and political front designed to launch an armed struggle for Indian independence.
  उन्होंने **भारतीय स्वतंत्रता लीग** और **आज़ाद हिन्द फ़ौज** का नेतृत्व संभाला तथा क्षेत्रीय स्तर की बिखरी हुई चर्चाओं से ध्यान हटाकर एकीकृत, अनुशासित सैन्य और राजनीतिक मोर्चे के निर्माण पर बल दिया, जिसका उद्देश्य भारतीय स्वतंत्रता के लिए सशस्त्र संघर्ष प्रारम्भ करना था।

Series of gaps

Distrust of police has led to underreporting of child sexual abuse

Child sexual abuse in India remains persistently under-reported and the state response to it has shown up trenchant systemic inefficiencies. In over 90% of cases, including the recent Sulur case in Coimbatore in which a charge sheet was filed last week, the threat to a child is from within the family's trusted circles. Public imagination often fixates on predatory strangers, which is not conducive to helping families and communities identify a risk in time. Migrant and working-class communities are especially at risk as they are less integrated in local protective social networks. Second, abandoned industrial sites and poorly maintained common land tend to become crime scenes. But despite the 'Safe City' project and the recognition of child-friendly urban development paradigms, urban redesign still focuses on core areas of major metros. The social safety dimensions of urban wetland restoration, like that of the Noyyal river, are often overlooked as well. Next, while POCSO trials are required to conclude within a year of the special court taking cognisance, POCSO courts face an 89% pendency rate and conviction rates have historically ranged between 3% and 30%, undermining confidence in the police and judiciary. The Sulur case prompted promises of swift action, but this is only one case; systemic reforms to protect vulnerable children remain elusive. In 2024, the NCRB recorded 69,191 POCSO cases involving more than 70,000 child victims.

Public distrust discourages residents from reporting suspicions and encourages families fearing police apathy to search for missing children themselves, potentially allowing the perpetrators to hide evidence or flee. Ultimately, when the state fails to deliver due punishment, the people perceive the police to be a bureaucratic hurdle, leaving children more vulnerable. Repeatedly strengthening penalties merely suppresses reporting in most cases where the offender is familiar. Even the 2018 and 2019 amendments to the POCSO Act reacted to public outrage rather than considered evidence and focused on harsher punishments. Both comprehensive longitudinal data on recidivism and analyses of whether harsher legal penalties are effective deterrents remain scarce. While data collection has improved, the Ministry of Women and Child Development has noted that qualitative analyses of acquittals rarely inform policy changes. Finally, survivors and families face secondary victimisation from insensitive administrative responses and media reports. Together with the lack of policing informed by trauma response and stigma, true safety continues to evade thousands of children leaving them vulnerable to a cycle of unreported and unpunished violence.

15J6. Series of gaps
कमियों की श्रृंखला

- Distrust of **police** has led to **underreporting** of **child sexual abuse**.

पुलिस के प्रति **अविश्वास** के कारण **बाल यौन शोषण** के मामलों की **कम रिपोर्टिंग** हुई है।

- In over **90% of cases**, including the recent **Sulur case** in Coimbatore in which a charge sheet was filed last week, the threat to a child is from within the family's trusted circles.

90% से अधिक मामलों में, जिनमें कोयंबटूर का हालिया **सुलूर मामला** भी शामिल है जिसमें पिछले सप्ताह आरोप-पत्र दाखिल किया गया, बच्चों के लिए खतरा परिवार के विश्वसनीय परिचितों के दायरे से ही उत्पन्न होता है।

- In **2024**, the **National Crime Records Bureau** recorded **69,191 POCSO cases** involving more than **70,000 child victims**.

2024 में **राष्ट्रीय अपराध रिकॉर्ड ब्यूरो** ने **69,191 पॉक्सो मामलों** को दर्ज किया, जिनमें **70,000 से अधिक बाल पीड़ित** शामिल थे।

- Even the **2018 and 2019 amendments** to the **POCSO Act** reacted to public outrage rather than considered evidence and focused on harsher punishments.

यहाँ तक कि **2018 और 2019 के संशोधन** भी मुख्यतः जनाक्रोश की प्रतिक्रिया थे, न कि साक्ष्य-आधारित विचार-विमर्श का परिणाम, और उनका प्रमुख ध्यान कठोर दंडों पर केंद्रित रहा।

The 'seven-point IQ opportunity' for Indian children

GS I: Society

Beena Koshy

Senior Professor, Developmental Paediatrics, Christian Medical College (CMC), Vellore, Tamil Nadu

Riday Chokshi

Senior Associate – National Initiatives and Policy, Rocket Learning

What if we could increase the IQ of India's future generations by seven points with a pivot in the understanding of early childhood development under the Anganwadi system?

For decades, India's early childhood agenda has focused on ensuring that children survive early childhood, reducing under-five mortality from 43 in 2012 to 32 in 2020 (UNICEF and World Bank data) with sufficient inputs invested toward their health, nutrition, immunisation and sanitation conditions. The Anganwadi system reflects these priorities at scale: approximately eight crore children (ages 0-6 years) receive supplementary nutrition, growth monitoring and health services, alongside counselling and home visits for their parents. However, body and brain development in the early years do not proceed on separate tracks.

Early childhood development is an ecological process in which nutrition, health, and early learning interact dynamically with each other through the body, brain, and environment. The developing brain is highly energy-intensive, consuming nearly one-fifth of the body's energy at rest. In the first year alone, grey matter volume increases by 149% and the cerebellum by 240% as millions of synapses form in regions associated with movement, language, and planning.

Middle-income evidence is clear

Paediatric research in Jamaica in the 1980s provided hard academic evidence to an idea that many cultures already understood. Researchers working with stunted children found that nutritional supplementation improved physical health alone, but adding regular psychosocial stimulation (love-talk-play and responsive interaction) resulted in stronger cognitive gains.

Similar findings emerged in India from a birth cohort study in Vellore (250 children followed from birth to age 9) where children stunted early in life performed worst on later cognitive assessments, but those who recovered physically also showed better cognitive outcomes.

Anganwadis can help boost cognitive development through holistic early intervention

International research on enteric dysfunction and poor sanitation has shown that nutritional inputs are mediated by the child's environment. A child's body may receive food, but infection, inflammation, toxic exposure and deprivation of stimulation can adversely influence this very nutrition. In studies in Vellore, children with iron deficiency or high lead exposure in early life, score lower on developmental and cognitive assessments, even when their height and weight appear normal. It is not simply what children eat that matters, but whether their bodies can absorb and use it. Yet, numbers on a growth chart never tell the full story. The quality of the home environment – how much they are talked to, read to, played with and emotionally supported, keeps emerging as a stronger predictor of cognitive outcomes than diet alone.

Most encouragingly, exposure to structured preschool and early stimulation has the potential to transform a generation. Children in the Vellore cohort who attend preschool regularly for 18 to 24 months, including in Anganwadi centres, are scoring seven IQ units higher on cognitive tests than those not attending preschool, even after accounting for poverty, maternal education and early stunting. In a similar Brazilian birth cohort, children who received structured preschool had higher cognition scores by eight units at age five. This is powerful evidence that stimulation and nutrition have strong, independent effects and amplify each other when both are fulfilled.

A role for Anganwadis

Indian policymakers are responding to new evidence quickly. The Anganwadi system has started to incorporate this broader understanding of holistic early childhood development into its core design. This shift is most visible in the rollout of national frameworks such as Aadharshila and Navchetana and programmes such as Poshan Bhi Padhai Bhi. They are critical inputs in redefining neighbourhood Anganwadis as vibrant early childhood education centres that nourish both mind and body. Aadharshila strengthens play-based preschool education within centres, while Navchetana extends early stimulation into the home, equipping caregivers with simple, science-based ways to support development through everyday interactions.

In clinical practice, we offer these frameworks to parents everyday, helping to turn routine moments into opportunities for learning. We encourage the integration of Navchetana's "loving, talking and playing" into daily life while feeding, cooking or playing with children. The home lays the foundation of early language, cognition and socio-emotional skills in the first three years, and Anganwadis deepen it through structured play-based activities, storytelling and peer learning from ages three to six.

Systemic community mobilisation initiatives, such as Poshan Pakhwada conducted in April 2026 by the Ministry of Women and Child Development focus on promoting early stimulation for brain development, play-based education in the early years, and the role of parents and communities in reducing screen exposure and strengthening engagement with Anganwadis. The campaign signals that early childhood development is not confined to centres or programmes, but depends on what happens within households and neighbourhoods.

Building futures

An "ecological" approach uplifts families as much as it strengthens children. Reliable childcare gives mothers the time, the confidence and the opportunity to work, study or contribute economically. In Vellore, we have seen women trained as childcare workers gain both dignity and livelihood, creating a virtuous circle of care. When the kitchen, classroom and crèche align, children flourish, women work and communities thrive.

For a Viksit Bharat, progress cannot rest on calories alone. The physical and interactive learning and playing environments in homes, Anganwadis and communities must be as enriching as the meals they receive.

15J6. The 'seven-point IQ opportunity' for Indian children
भारतीय बच्चों के लिए 'सात-अंक आईक्यू अवसर'

- For decades, India's early childhood agenda has focused on ensuring that children survive early childhood, reducing under-five mortality from **43 in 2012 to 32 in 2020** with sufficient inputs invested toward their health, nutrition, immunisation and sanitation conditions.
  दशकों से भारत की प्रारम्भिक बाल्यावस्था संबंधी नीति का प्रमुख उद्देश्य बच्चों के जीवन की रक्षा करना रहा है, जिसके परिणामस्वरूप **पाँच वर्ष से कम आयु के बच्चों की मृत्यु दर 2012 में 43 से घटकर 2020 में 32** हो गई है। इसके लिए स्वास्थ्य, पोषण, टीकाकरण और स्वच्छता पर पर्याप्त निवेश किया गया।
- The **Anganwadi system** reflects these priorities at scale: approximately **eight crore children (ages 0-6 years)** receive supplementary nutrition, growth monitoring and health services, alongside counselling and home visits for their parents.
  आंगनवाड़ी प्रणाली इन प्राथमिकताओं को व्यापक स्तर पर लागू करती है। इसके अंतर्गत लगभग **आठ करोड़ बच्चों (0 से 6 वर्ष आयु वर्ग)** को पूरक पोषण, वृद्धि निगरानी और स्वास्थ्य सेवाएँ प्रदान की जाती हैं, साथ ही उनके माता-पिता को परामर्श और गृह भ्रमण सेवाएँ भी उपलब्ध कराई जाती हैं।
- In the first year alone, **grey matter volume** increases by **149%** and the **cerebellum** by **240%** as millions of synapses form in regions associated with movement, language, and planning.
  जीवन के पहले वर्ष में ही **धूसर पदार्थ की मात्रा** में **149%** तथा **अनुमस्तिष्क** में **240%** की वृद्धि होती है, क्योंकि इस अवधि में गति, भाषा और योजना निर्माण से संबंधित क्षेत्रों में लाखों तंत्रिका-संबंध विकसित होते हैं।

- Researchers working with **stunted children** found that nutritional supplementation improved physical health alone, but adding regular psychosocial stimulation (love-talk-play and responsive interaction) resulted in stronger cognitive gains.
  अविकसित वृद्धि वाले बच्चों पर कार्य करने वाले शोधकर्ताओं ने पाया कि केवल पोषण अनुपूरण से शारीरिक

स्वास्थ्य में सुधार हुआ, किन्तु नियमित मनोसामाजिक प्रोत्साहन, जैसे प्रेम, संवाद, खेल और संवेदनशील सहभागिता जोड़ने से संज्ञानात्मक विकास में अधिक सुधार हुआ।

- Similar findings emerged in India from a **birth cohort study in Vellore** (250 children followed from birth to age 9) where children stunted early in life performed worst on later cognitive assessments, but those who recovered physically also showed better cognitive outcomes.
  भारत में **वेल्लोर जन्म-समूह अध्ययन** से भी इसी प्रकार के निष्कर्ष प्राप्त हुए, जिसमें जन्म से नौ वर्ष तक 250 बच्चों का अध्ययन किया गया। जिन बच्चों की प्रारम्भिक अवस्था में वृद्धि बाधित रही, उनका बाद के संज्ञानात्मक परीक्षणों में प्रदर्शन सबसे कमजोर रहा, जबकि शारीरिक रूप से स्वस्थ होने वाले बच्चों ने बेहतर संज्ञानात्मक परिणाम प्रदर्शित किए।
- International research on **enteric dysfunction** and poor sanitation has shown that nutritional inputs are mediated by the child's environment.
  आंत्र विकारों और खराब स्वच्छता पर किए गए अंतरराष्ट्रीय अध्ययनों ने दर्शाया है कि पोषण का प्रभाव बच्चे के परिवेश द्वारा प्रभावित होता है।
- A child's body may receive food, but infection, inflammation, toxic exposure and deprivation of stimulation can adversely influence this very nutrition.
  किसी बच्चे को भोजन प्राप्त हो सकता है, किन्तु संक्रमण, सूजन, विषैले तत्वों का संपर्क और प्रोत्साहन की कमी उसी पोषण के प्रभाव को नकारात्मक रूप से प्रभावित कर सकते हैं।
- In studies in **Vellore**, children with **iron deficiency** or high **lead exposure** in early life, score lower on developmental and cognitive assessments, even when their height and weight appear normal.
  वेल्लोर में किए गए अध्ययनों में पाया गया कि प्रारम्भिक जीवन में **लौह तत्व की कमी** या **सीसे के अधिक संपर्क** वाले बच्चों का विकासात्मक और संज्ञानात्मक परीक्षणों में प्रदर्शन कम रहा, भले ही उनकी लंबाई और वजन सामान्य प्रतीत होते हों।
- The quality of the home environment — how much they are talked to, read to, played with and emotionally supported, keeps emerging as a stronger predictor of cognitive outcomes than diet alone.
  घरेलू वातावरण की गुणवत्ता — बच्चों से कितना संवाद किया जाता है, उन्हें कितना पढ़कर सुनाया जाता है, उनके साथ कितना खेला जाता है और उन्हें कितना भावनात्मक सहयोग मिलता है — केवल आहार की तुलना में संज्ञानात्मक परिणामों का अधिक सशक्त निर्धारक बनकर उभरती है।
- Most encouragingly, exposure to **structured preschool** and early stimulation has the potential to transform a generation.
  सबसे उत्साहवर्धक तथ्य यह है कि **संरचित पूर्व-प्राथमिक शिक्षा** और प्रारम्भिक प्रोत्साहन में एक पूरी पीढ़ी को परिवर्तित करने की क्षमता है।
- Children in the **Vellore cohort** who attend preschool regularly for **18 to 24 months**, including in **Anganwadi centres**, are scoring **seven IQ units higher** on cognitive tests than those not attending preschool, even after accounting for poverty, maternal education and early stunting.
  वेल्लोर अध्ययन समूह के वे बच्चे जिन्होंने **18 से 24 माह** तक नियमित रूप से पूर्व-प्राथमिक शिक्षा प्राप्त की, जिनमें **आंगनवाड़ी केन्द्रों** में जाने वाले बच्चे भी शामिल हैं, वे संज्ञानात्मक परीक्षणों में पूर्व-प्राथमिक शिक्षा से वंचित बच्चों की तुलना में **सात बौद्धिक अंक अधिक** प्राप्त कर रहे हैं। यह अंतर गरीबी, मातृ शिक्षा और प्रारम्भिक वृद्धि अवरोध जैसे कारकों को ध्यान में रखने के बाद भी बना रहता है।
- The **Anganwadi system** has started to incorporate this broader understanding of holistic early childhood development into its core design.
  आंगनवाड़ी प्रणाली ने समग्र प्रारम्भिक बाल्यावस्था विकास की इस व्यापक समझ को अपने मूल ढाँचे में सम्मिलित करना प्रारम्भ कर दिया है।
- This shift is most visible in the rollout of national frameworks such as **Aadharshila** and **Navchetana** and programmes such as **Poshan Bhi Padhai Bhi**.
  यह परिवर्तन **आधारशिला**, **नवचेतना** तथा **पोषण भी पढ़ाई भी** जैसे राष्ट्रीय ढाँचों और कार्यक्रमों के क्रियान्वयन में सबसे स्पष्ट रूप से दिखाई देता है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

VIJAYAWADA

Four persons, three of them children, drowned in the Krishna river when the boat in which they were travelling capsized near Konuru village in Palnadu district of Andhra Pradesh on Sunday. Six passengers were rescued.

The deceased were identified as Battula Karthik, 12, Konatha Chaitanya, 26, Gandham Saini, 10, and Gandham Sandhya, 8. The deceased were from the Marrichettupalem and Chilakaluripet areas.

They had come to Konuru to attend a function at the house of K. Gangaiah and went on a boat ride after the function. "Local people jumped into the water, rescued six persons, and brought them to the bund," said Ramana, a resident.

People gather to witness rescue operations after a boat capsized in Palnadu district of Andhra Pradesh on Sunday. SPECIAL ARRANGEMENT

No safety material

There were no life jackets or other safety material in the boat, the villagers alleged.

Meanwhile, Chief Minister N. Chandrababu Naidu, who was away in Singapore, expressed grief over the loss of lives in the boat tragedy.

He announced an *ex gratia* of ₹5 lakh each to the next of kin of the dead.

CM orders probe

He also directed the District Collector to disburse the amount immediately, and ordered a full-fledged investigation by a team of Revenue, Police, and Water Resources departments.

The officials informed the Chief Minister that the boat capsized around 2 p.m. after hitting a sandbar in the river.

YSRCP president Y.S. Jagan Mohan Reddy expressed shock over the accident and conveyed his condolences to the bereaved families. He appealed to the government to extend all help to the victims' families.

15J6. 3 children and man drown as boat capsizes in Krishna river in A.P.
आंध्र प्रदेश में कृष्णा नदी में नाव पलटने से 3 बच्चों और एक व्यक्ति की डूबकर मृत्यु

• The **Krishna River** originates near **Mahabaleshwar** in the **Western Ghats** of **Maharashtra**.

• It flows through the states of **Maharashtra, Karnataka, Telangana, and Andhra Pradesh**, and finally empties into the **Bay of Bengal** at **Hamsaladeevi** in **Andhra Pradesh**.

• The river stretches about **1400 kilometers**, making it the **third-longest river** in India.

Tributaries

• **Left-Hand Tributaries**: Include the **Bhima, Musi, Munneru, Dindi, Kolamba**, and **Peddavagu** rivers.

• **Right-Hand Tributaries**: Comprise the **Ghataprabha, Malaprabha, Tungabhadra, Koyna, Panchganga**, and **Dudhaganga** rivers.

Economic and Cultural Significance

• The **Prakasam Barrage**, designed by **Sir Arthur Cotton** and completed in **1957**, spans the Krishna River, facilitating **irrigation** for over **5.8 lakh acres** of land in **Andhra Pradesh**.

• The river supports several **major irrigation projects** and is vital for **agriculture** in the region.

20 rebel Trinamool MPs seek to merge with NCPI

The leaders met Lok Sabha Speaker and requested separate seating arrangements; will seek recognition as the Trinamool in July, when Parliament session begins, says Bandyopadhyay

GS II: Polity

Shiv Sahay Singh
KOLKATA

After days of speculation, 20 rebel Trinamool Congress MPs on Sunday met Lok Sabha Speaker Om Birla at his residence in New Delhi and submitted a letter announcing their decision to merge with the National Citizens Party of India (NCPI).

The decision by the rebels to merge with a registered regional political party rather than form a separate bloc within the Trinamool Congress was to avoid any legal complications under the anti-defection law. The law states that when two-thirds of the legislators of a political party decide to merge with another party, neither those who join the new party nor the ones who stay with the original party face disqualification.

"The MPs met the Speaker and requested separate seating arrangements. We are more than two-thirds of MPs (of the Trinamool Congress) and will merge with the Nationalist Citizens Party of India. We will work with Prime Minister Narendra Modi and the NDA for the interest of the country," Kakoli Ghosh Dastidar, MP, told presspersons after the meeting.

Big changes: Lok Sabha Speaker Om Birla receiving a letter from Trinamool Congress MPs in New Delhi. PTI

Support of 20 MPs

The office of the Speaker confirmed that 19 MPs attended the meeting. The rebel faction, however, claims the support of 20 MPs, with Sudip Bandyopadhyay joining the group on Saturday.

Mr. Bandyopadhyay, the senior-most MP in the rebel camp, said that while the MPs were merging with the NCPI as of now, in July, when Parliament session begins, they would seek recognition as the Trinamool Congress since they had a two-thirds majority.

"We will merge with the Nationalist Citizens Party, which is a registered regional party. This is the system. When you leave with two-thirds of the party, you cannot demand the name of that party on the first day itself. In July, we will seek recognition as the Trinamool Congress since we have two-thirds of its MPs. Then the courts will decide," he said.

The NCPI was launched as National Citizens Party of India in Tripura in 2015 by a Kolkata-based woman Shewly Kundu.

Later, the party registered itself as Nationalist Citizens Party of India in February 2, 2023 at Sankrail in Howrah district, data from the Election Commission suggest.

Separate bloc

After the defeat of the Trinamool Congress in the 2026 Assembly election in West Bengal, the majority of its Lok Sabha members had decided to set up a separate bloc and held meetings at the residence of Union Minister and Bharatiya Janata Party leader Bhupendra Yadav.

On Sunday, the majority of MPs had gathered at Mr. Yadav's residence before meeting the Speaker. The decision to merge with an almost unknown regional party has come as a surprise in political circles.

Before the rebel MPs met the Speaker, two MPs considered loyalists of Trinamool Congress supremo Mamata Banerjee also met Mr. Birla and submitted a letter from party leader Abhishek Banerjee.

The letter from the party's leader in Lok Sabha urged the Speaker to treat the Trinamool as a single party represented by its authorised whip and leader and urged him not to recognise any separate group.

15J6. 20 rebel Trinamool MPs seek to merge with NCPI
तृणमूल कांग्रेस के 20 बागी सांसदों ने एनसीपीआई में विलय की मांग की

India, France adopt 'Innovation Roadmap 2030' as the two leaders meet in French city of Nice

They establish Dialogue on Economic Security; call for early implementation of India-EU FTA

The leaders discuss private sector ties in space sector and SHANTI Act's implications in India

GS II: IR

Sriram Lakshman
LONDON

India and France adopted an 'Innovation Roadmap 2030' and established a Dialogue on Economic Security during bilateral talks between Prime Minister Narendra Modi and French President Emmanuel Macron held in Nice on Sunday.

A press release from the government outlined a number of themes – including calling for the fast adoption of the India-EU Free Trade Agreement (FTA).

Earlier this year, the two countries had renamed their partnership a 'Special Global Strategic Partnership' to reflect an enhanced level of cooperation. No traditional 'joint statement' had emerged from the meeting as of this writing.

"Recognising the key role of innovation and technology in the bilateral relationship, both sides adopted an 'Innovation Roadmap 2030' to give the partnership a long-term direction," the press release said, with the two leaders agreeing to create a Joint India-France AI Working Group to expand cooperation in AI. They also noted the signing of 19 agreements between entities in the innovation ecosystems of the two countries.

Calling for the early implementation of the India-EU FTA, which was signed in February this year, the two sides agreed to set up a High-Level Mechanism to double trade in five years. The discussion also focused on cooperation in the SME, rail, and aviation sectors.

Mr. Modi and Mr. Macron agreed to strengthen supply chain resilience, particularly in critical minerals, as part of the 'Dialogue on Economic Security', as per the press release.

Cautious on crises

On the major crises in the world – in West Asia, including Iran and Gaza, as well as on Ukraine – the press release remained circumspect relative to the February 17, 2026 joint statement from the two countries, saying only that leaders exchanged views "on matters of global importance, including the situation in West Asia and Ukraine".

Eyeing the sky: Prime Minister Narendra Modi takes in the sea with French President Emmanuel Macron ahead of talks in Nice on Sunday. AP

PM, Macron inaugurate Bharat Innovates 2026

Sriram Lakshman

Prime Minister Narendra Modi and French President Emmanuel Macron on Sunday co-inaugurated the Bharat Innovates 2026 in Nice where the leaders focused on trust and cooperation in technology. Mr. Modi invited investors to "design and develop in India" to "create solutions for the world", while Mr. Macron said India brings the reliability that the world seeks at moments of upheaval in geopolitics. Commerce and Industry Minister Piyush Goyal and External Affairs Minister S. Jaishankar were present.

FULL REPORT ON

The Prime Minister thanked Mr. Macron for the speedy implementation of visa-free transit for Indians in French airports and invited French universities to open campuses in India under the New Education Policy, as per the government statement.

The two leaders discussed private sector collaboration in the space sector and the SHANTI Act's (legislation governing the nuclear sector) implications in India.

"I think the field is open for French nuclear companies in this case to start looking at direct participation in the Indian nuclear sector, or do so with in participation with Indian private sector companies, whether in conventional nuclear power reactors or in the more advanced small modular reactors," Foreign Secretary Vikram Misri said at a press briefing in Nice.

Vaishnaw expects more companies to produce memory chips in India

GS III: Economy

Press Trust of India
NEW DELHI

New companies are likely to invest in India to manufacture memory chips while existing investors will scale up production to address the demand-supply gap in the segment, Union Minister Ashwini Vaishnaw said.

Strong demand for memory (data storage) cards and advanced chips has tightened global supplies and supported higher prices in past quarters, and manufacturers have been sprucing up investments and production capacities to meet market requirements worldwide.

The higher memory chip prices have, in turn, led to a rise in production costs for a range of electronic products, including smartphones and laptops.

"Definitely, a lot more investment is coming in the memory manufacturing units, and that is because for the first time in the way the semiconductor industry has grown at such a rapid pace, for the first time we are seeing a huge shortage of certain components which are required in the AI data centres, the high bandwidth memory chips," Mr. Vaishnaw said.

Ashwini Vaishnaw

Data centre investments in India are expected to cross $200 billion soon, which may need billions of gigabytes of storage capacity.

The Minister said there is a global phenomenon of supply-demand imbalance, which is now getting addressed by setting many more units.

When asked if there will be new investments in the memory chip segment or only existing players have plans to ramp up production, Mr. Vaishnaw said, "Looks like both might happen". He said the India Semicon Mission (ISM) 1.0 could get about 48 startups to work on the tech products.

"In ISM 2.0, that will be the topmost priority, design will be the topmost priority. The second biggest priority will be machines, which are used in the manufacturing of semiconductors," Mr. Vaishnaw said.

15J6. Vaishnaw expects more companies to produce memory chips in India

वैष्णव को उम्मीद है कि भारत में अधिक कंपनियाँ मेमोरी चिप्स का उत्पादन करेंगी

- **New companies are likely to invest in India to manufacture memory chips while existing investors will scale up production to address the demand-supply gap in the segment, Union Minister Ashwini Vaishnaw said.**

केंद्रीय मंत्री अश्विनी वैष्णव ने कहा कि भारत में **मेमोरी चिप निर्माण** के लिए नई कंपनियाँ निवेश करने की संभावना रखती हैं, जबकि मौजूदा निवेशक मांग और आपूर्ति के बीच बढ़ते अंतर को दूर करने के लिए उत्पादन क्षमता का विस्तार करेंगे।

- He said the **India Semicon Mission (ISM) 1.0** could get about **48 startups** to work on the tech products.

उन्होंने कहा कि **इंडिया सेमिकॉन मिशन 1.0** के अंतर्गत लगभग **48 स्टार्टअप** प्रौद्योगिकी उत्पादों पर कार्य कर सकते हैं।

- "In ISM 2.0, that will be the topmost priority, design will be the topmost priority. The second biggest priority will be machines, which are used in the manufacturing of semiconductors," Mr. Vaishnaw said.

श्री वैष्णव ने कहा कि **इंडिया सेमिकॉन मिशन 2.0** में **डिज़ाइन** को सर्वोच्च प्राथमिकता दी जाएगी, जबकि दूसरी सबसे बड़ी प्राथमिकता उन मशीनों को दी जाएगी जिनका उपयोग **अर्धचालकों के निर्माण** में किया जाता है।

GS III: Economy

Fuller expression

A rapid decline in inflation appears unlikely even if the war ends

India's May retail inflation at 3.93%, the highest in the current CPI series and roughly a 15-month high if compared with the previous series, has begun to reflect the pass-through effects of surging food and fuel costs more clearly than in previous months. However, last month's wholesale inflation numbers, the first under the new WPI series and due later this month alongside India's first Producer Price Index (PPI), should reveal how much of the price shock producers and wholesalers continue to absorb. May's food inflation rose at a faster clip to 4.78% from 4.20% in April. While transport inflation rose by 1.75% after a marginal contraction in April, a subdivision within the sector – transport services for goods – surged by 7.63%, signalling growing price pass-through. This was largely driven by the four tranches of petrol and diesel price increases beginning in mid-May. Significantly, the sharp rise in commercial LPG prices – by about ₹1,300 per 19-kg cylinder, representing an increase of over 75% since February – appears to be reflected in inflation in the restaurants and accommodation services category, which stood at 5.75%, the second-highest division after personal care and miscellaneous goods and services. Inflation in the latter category reached 18.46%, reflecting soaring precious metals prices. Domestic LPG's second price revision by ₹29 earlier this month will likely find a fuller expression in June's consumer food price inflation.

Although May's inflation remains below the RBI's 4% target and within its 2%-6% tolerance band, the RBI retained its neutral stance at its latest monetary policy review, signalling concern over the possibility of further price pressures. Its intervention in the foreign exchange market through dollar sales has meanwhile helped shore up the rupee, Asia's worst-performing currency since the U.S.-Israeli conflict with Iran escalated. The currency, which briefly approached ₹97 to the dollar in May, is now trading closer to ₹95-₹96. The Centre may nevertheless draw some comfort from the fact that core inflation, which excludes food and fuel, remained relatively contained at around 3.8%-3.9% in May, largely unchanged from recent months. This coincides with signs of a U.S.-Iran rapprochement and uninterrupted shipping through the Hormuz. Yet, uncertainty persists over whether Iran may impose fees or restrictions on transit through the waterway, which could keep fuel prices elevated for energy-importing nations such as India. Even if crude prices soften, oil marketing companies are unlikely to immediately reverse retail price increases as they seek to recover losses. LPG prices, too, may remain sticky. Thus, while the prospects for a durable peace may have improved, a rapid decline in inflation appears unlikely.

The outline of India's Insolvency and Bankruptcy Code (IBC) has long been demarcated by an innate stiffness between the inevitability to preserve distraught companies and the necessity to safeguard the interests of creditors. This contradiction is often cited as the 'Chakravyuha Challenge'– a structural paradox by which the economy eases a company's entry into the system but forms formidable formal fences when it wishes to exit.

From the Sick Industrial Companies Act, which demonstrated a debtor-in-possession model and had been plagued by promoter misuse, to the creditor-in-control model of the IBC, the historical flight of such laws reflects an incessant effort to improve the balance. Though the IBC aimed at providing time-bound resolutions, it has fallen short due to protracted litigation and procedural lapses. In light of this, the 2026 Amendment to the IBC presents the Creditor-Initiated Insolvency Resolution Process (CIIRP), a hybrid apparatus attempting to espouse debtor-in-possession topographies with the creditor-in-control model. Nevertheless, the amendment's restrictive framework bounds initiation rights to only a fine class of financial creditors belonging to "notified financial institutions", thereby inviting constitutional contests and economic ineptitude.

Swift yet stringent alternative

The CIIRP is a clever attempt to address financial crisis without the value-destroying disruption of typical liquidation proceedings by allowing the current management to maintain control over activities under the supervision of a resolution specialist. In order to reduce judicial intervention and procedural delays, the IBC established the CIIRP procedure by adding Sections 54C to 54P.

Significantly, the change is a legislative response to the ruling in *Vidarbha Industries*. The National Company Law Tribunal (NCLT) was formerly given discretionary authority via the interpretation of "may" in Section 7(5)(a), which permitted it to postpone or reject admission even in cases where debt and default were proven. This has now been replaced by the required "shall" via the 2026 amendment, thereby compelling the NCLT to accept cases based on information utility records. As a less disruptive restructuring instrument, the CIIRP is an appealing, if exclusive, resort for creditors because corporate debtors experiencing transitory liquidity crises suddenly lack the breathing room to fight initiation.

However, by limiting the ability to start the CIIRP only for "notified financial institutions," the Act creates an arbitrary hierarchy within the class of financial creditors. Although the distinction between financial and operational creditors was previously maintained in *Swiss Ribbons* via the "intelligible differentia" standard of Article 14, this sub-classification is essentially different. The government's argument that "notified" institutions have special knowledge is out of date; sophisticated investors with the ability to perform in-depth restructuring analysis can be found in today's financial markets. The Act runs the danger of being overturned as arbitrary since it does not explain why these excluded parties are less able to promote resolutions that maximise value.

Operational and smaller financial creditors are significantly disenfranchised under the current arrangement as they are already at the bottom of the repayment priority list. Smaller creditors may be forced to the sidelines of restructuring talks as a result of the CIIRP's propensity to concentrate bargaining power in the hands of notified institutions. It compels non-notified creditors to undertake the more aggressive and disruptive Corporate Insolvency Resolution Process (CIRP) just to protect their financial interests. This compromises the equity of the entire insolvency ecosystem.

The way ahead

The Indian method is mysteriously constrictive. The U.S.' Chapter 11 and the U.K.'s Part 26A restructuring plans base their access on objective financial conditions rather than the regulatory identity of the creditor. A wide range of stakeholders can participate in the restructuring process in both the U.S. and the U.K. as long as they meet certain requirements. India's choice to restrict initiation rights to a particular group of creditors is an anomaly that deters foreign investors from participating because they believe that the Indian market is intrinsically skewed against their asset classes. The law gives notified institutions procedural dominance, which makes Inter-Creditor Agreements less clear and informal negotiations less fair. If a lender who hasn't been notified is put on hold, they have to file for formal CIRP to protect their capital.

There must be a "universal CIIRP" with a "default-neutral initiation rule". This proposal does away with regulatory status and replaces it with a threshold based on financial exposure. Any financial creditor could start the process as long as they get the support of creditors holding at least 51% of the total financial debt. This takes care of constitutional issues while keeping a strong protection against one-sided, malicious filings.

By adding debtor-in-possession features, the 2026 amendment shows that the pure creditor-in-control model doesn't keep business value. But the 'notified institution' criteria could hurt these gains. India can make an efficient insolvency system that benefits everyone by using a universal CIIRP model based on financial interest instead of institutional identity.

India can make an efficient insolvency system that benefits everyone by using a universal CIIRP model based on financial interest instead of institutional identity

15J6. Towards a fair, efficient insolvency regime
एक न्यायसंगत एवं कुशल दिवाला व्यवस्था की ओर

- **The outline of India's Insolvency and Bankruptcy Code (IBC) has long been demarcated by an innate stiffness between the inevitability to preserve distraught companies and the necessity to safeguard the interests of creditors.**
  भारत की **दिवाला एवं शोधन अक्षमता संहिता** की रूपरेखा लंबे समय से संकटग्रस्त कंपनियों को बचाने की अनिवार्यता और ऋणदाताओं के हितों की रक्षा की आवश्यकता के बीच अंतर्निहित तनाव से परिभाषित होती रही है।
- This contradiction is often cited as the **'Chakravyuha Challenge'**— a structural paradox by which the economy eases a company's entry into the system but forms formidable formal fences when it wishes to exit.
  इस विरोधाभास को प्रायः **'चक्रव्यूह चुनौती'** कहा जाता है — एक ऐसी संरचनात्मक विसंगति जिसमें व्यवस्था किसी कंपनी के प्रवेश को सरल बनाती है, किन्तु उसके बाहर निकलने के समय कठोर औपचारिक बाधाएँ उत्पन्न कर देती है।
- From the **Sick Industrial Companies Act**, which demonstrated a debtor-in-possession model and had been plagued by promoter misuse, to the creditor-in-control model of the IBC, the historical flight of such laws reflects an incessant effort to improve the balance.
  बीमार औद्योगिक कंपनियाँ अधिनियम, जो देनदार-नियंत्रित मॉडल पर आधारित था और प्रवर्तकों द्वारा दुरुपयोग की समस्याओं से ग्रस्त था, से लेकर वर्तमान ऋणदाता-नियंत्रित व्यवस्था तक, ऐसे कानूनों का विकास संतुलन स्थापित करने के निरंतर प्रयास को दर्शाता है।
- Though the IBC aimed at providing time-bound resolutions, it has fallen short due to protracted litigation and procedural lapses.
  यद्यपि इस संहिता का उद्देश्य समयबद्ध समाधान प्रदान करना था, किन्तु दीर्घकालिक मुकदमों और प्रक्रियागत त्रुटियों के कारण यह अपेक्षित सफलता प्राप्त नहीं कर सकी।
- In light of this, the **2026 Amendment** to the IBC presents the **Creditor-Initiated Insolvency Resolution Process (CIIRP)**, a hybrid apparatus attempting to espouse debtor-in-possession topographies with the creditor-in-control model.
  इसी पृष्ठभूमि में **2026 के संशोधन** के माध्यम से **ऋणदाता-प्रारम्भित दिवाला समाधान प्रक्रिया** प्रस्तुत की गई है, जो देनदार-नियंत्रित व्यवस्था और ऋणदाता-नियंत्रित मॉडल के बीच एक मिश्रित ढाँचा स्थापित करने का प्रयास करती है।
- Nevertheless, the amendment's restrictive framework bounds initiation rights to only a fine class of financial creditors belonging to **"notified financial institutions"**, thereby inviting constitutional contests and economic ineptitude.
  फिर भी, संशोधन का प्रतिबंधात्मक ढाँचा प्रक्रिया प्रारम्भ करने का अधिकार केवल **"अधिसूचित वित्तीय संस्थानों"** से संबंधित सीमित वित्तीय ऋणदाताओं तक सीमित करता है, जिससे संवैधानिक विवादों और आर्थिक अक्षमताओं की आशंका उत्पन्न होती है।

Swift yet stringent alternative
त्वरित किन्तु कठोर वैकल्पिक व्यवस्था

- The CIIRP is a clever attempt to address financial crisis without the value-destroying disruption of typical liquidation proceedings by allowing the current management to maintain control over activities under the supervision of a resolution specialist.
  यह नई प्रक्रिया सामान्य परिसमापन कार्यवाही से उत्पन्न मूल्य-ह्रासकारी व्यवधानों से बचते हुए वित्तीय संकट का समाधान करने का एक अभिनव प्रयास है, जिसमें वर्तमान प्रबंधन को समाधान विशेषज्ञ की निगरानी में कार्य संचालन जारी रखने की अनुमति दी जाती है।
- In order to reduce judicial intervention and procedural delays, the IBC established the CIIRP procedure by adding **Sections 54C to 54P**.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

न्यायिक हस्तक्षेप और प्रक्रियागत विलंब को कम करने के लिए संहिता में **धारा 54C से 54P** तक के प्रावधान जोड़कर यह प्रक्रिया स्थापित की गई है।

- The **National Company Law Tribunal (NCLT)** was formerly given discretionary authority via the interpretation of "may" in Section 7(5)(a), which permitted it to postpone or reject admission even in cases where debt and default were proven.
  पूर्व में **राष्ट्रीय कंपनी विधि न्यायाधिकरण** को धारा 7(5)(a) में प्रयुक्त "कर सकता है" शब्द की व्याख्या के आधार पर विवेकाधीन शक्ति प्राप्त थी, जिसके कारण ऋण और चूक सिद्ध होने पर भी वह याचिका को स्थगित या अस्वीकार कर सकता था।
- This has now been replaced by the required **"shall"** via the 2026 amendment, thereby compelling the NCLT to accept cases based on information utility records.
  अब **2026 के संशोधन** द्वारा इसे अनिवार्य स्वरूप प्रदान करते हुए "करेगा" शब्द से प्रतिस्थापित कर दिया गया है, जिससे न्यायाधिकरण सूचना अभिलेखों के आधार पर मामलों को स्वीकार करने के लिए बाध्य होगा।
- However, by limiting the ability to start the CIIRP only for **"notified financial institutions,"** the Act creates an arbitrary hierarchy within the class of financial creditors.
  किन्तु इस प्रक्रिया को प्रारम्भ करने का अधिकार केवल **"अधिसूचित वित्तीय संस्थानों"** तक सीमित करके यह अधिनियम वित्तीय ऋणदाताओं के वर्ग के भीतर एक मनमाना पदानुक्रम स्थापित करता है।
- Although the distinction between financial and operational creditors was previously maintained in **Swiss Ribbons** via the **"intelligible differentia"** standard of **Article 14**, this sub-classification is essentially different.
  यद्यपि वित्तीय और परिचालन ऋणदाताओं के बीच भेद को पूर्व में **स्विस रिबन्स मामले** में **अनुच्छेद 14** के **युक्तिसंगत वर्गीकरण सिद्धांत** के आधार पर स्वीकार किया गया था, किन्तु वर्तमान उप-वर्गीकरण उससे मूलतः भिन्न है।
- The government's argument that **"notified" institutions** have special knowledge is out of date; sophisticated investors with the ability to perform in-depth restructuring analysis can be found in today's financial markets.
  यह तर्क कि **"अधिसूचित संस्थानों"** के पास विशेष विशेषज्ञता होती है, अब अप्रासंगिक प्रतीत होता है, क्योंकि आज के वित्तीय बाज़ारों में गहन पुनर्गठन विश्लेषण करने में सक्षम परिष्कृत निवेशक व्यापक रूप से उपलब्ध हैं।
- The Act runs the danger of being overturned as arbitrary since it does not explain why these excluded parties are less able to promote resolutions that maximise value.
  यह अधिनियम मनमाना घोषित किए जाने के जोखिम का सामना कर सकता है क्योंकि इसमें यह स्पष्ट नहीं किया गया है कि बाहर रखे गए अन्य पक्ष मूल्य-अधिकतमकरण करने वाले समाधान को बढ़ावा देने में कम सक्षम क्यों हैं।
- Operational and smaller **financial creditors** are significantly disenfranchised under the current arrangement as they are already at the bottom of the repayment priority list.
  वर्तमान व्यवस्था के अंतर्गत **परिचालन ऋणदाता** तथा छोटे **वित्तीय ऋणदाता** गंभीर रूप से अधिकार-वंचित हो जाते हैं क्योंकि वे पहले से ही पुनर्भुगतान प्राथमिकता सूची में सबसे निचले स्तर पर स्थित हैं।
- It compels non-notified creditors to undertake the more aggressive and disruptive **Corporate Insolvency Resolution Process (CIRP)** just to protect their financial interests.
  यह गैर-अधिसूचित ऋणदाताओं को अपने वित्तीय हितों की रक्षा के लिए अधिक कठोर और विघटनकारी **कॉर्पोरेट दिवाला समाधान प्रक्रिया** का सहारा लेने के लिए विवश करता है।
- The **U.S.' Chapter 11** and the **U.K.'s Part 26A restructuring plans** base their access on objective financial conditions rather than the regulatory identity of the creditor.
  संयुक्त राज्य अमेरिका की अध्याय 11 व्यवस्था तथा **यूनाइटेड किंगडम की भाग 26ए पुनर्गठन योजना** में प्रवेश का आधार ऋणदाता की नियामकीय पहचान नहीं, बल्कि वस्तुनिष्ठ वित्तीय परिस्थितियाँ होती हैं।
- Any financial creditor could start the process as long as they get the support of creditors holding at least **51% of the total financial debt**.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

कोई भी वित्तीय ऋणदाता इस प्रक्रिया को प्रारम्भ कर सकेगा, बशर्ते उसे कुल वित्तीय ऋण के कम से कम **51%** का प्रतिनिधित्व करने वाले ऋणदाताओं का समर्थन प्राप्त हो।

- India can make an efficient insolvency system that benefits everyone by using a universal CIIRP model based on financial interest instead of institutional identity.
भारत संस्थागत पहचान के स्थान पर वित्तीय हितों को आधार बनाकर एक **सार्वभौमिक ऋणदाता-प्रारम्भित दिवाला समाधान मॉडल** अपनाए, तो वह सभी हितधारकों को लाभ पहुँचाने वाली अधिक प्रभावी और न्यायसंगत दिवाला व्यवस्था विकसित कर सकता है।

Making sense of the biggest IPO in history

SpaceX's grand entry has raised concerns over the relaxation of rules enabling wealth concentration in the hands of a few

GS III: Economy

DATA POINT

Pon Vasanth B.A.
Sambavi Parthasarathy
Nitika Francis

Technopreneur Elon Musk, who was already the planet's richest person, became the world's first trillionaire with his company SpaceX's stock market debut on June 12, 2026. The company saw the biggest-ever initial public offering (IPO) in history.

However, SpaceX's entry has also raised concerns over the company's valuation; the relaxation of rules that enables the company to enter indices like the Nasdaq-100; and the increasing concentration of wealth among a few. New York City's mayor Zohran Mamdani, in a cryptic reaction on X said, "Reason #1,000,000,000,000 why we should tax the rich".

SpaceX's market capitalisation, now estimated over $2 trillion is less than the Gross Domestic Product of only 11 countries in the world, an indication of the unequal distribution of wealth **(Chart 1)**. Additionally, Mr. Musk had merged his companies Starlink and xAI (which includes X) with SpaceX before he planned the IPO. As of Friday, SpaceX was the sixth largest company in terms of market capitalisation **(Table 1)**. However, as the table shows, it is the only loss-making company in the list.

Among the three companies that are part of SpaceX, Starlink is the only company that has reported profits last year, leading many to express concerns that Mr. Musk has managed to sell the potential of his company, which includes building data centres, instead of its actual track record **(Table 2)**.

If one were to place SpaceX's IPO in Indian terms, the initial offering of all the top 100 IPOs in India would not match the $75 billion raised by the U.S. giant on Friday.

Soaring disparity

The data for the charts were sourced from Space Exploration Technologies Corp's Securities and Exchange Commission filings, Nasdaq, Renaissance Capital, World Bank, India Budget and Forbes

CHART 1: SpaceX's market capitalisation is greater than the GDP of 157 of the 168 countries analysed based on available World Bank data

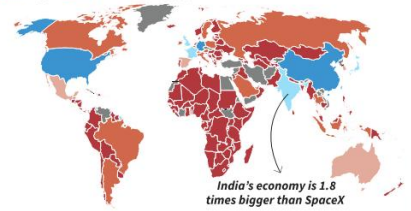

CHART 2: The chart shows the net worth (in $ billion) of five of the most richest persons in the world

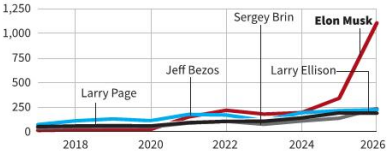

CHART 3: The 25 biggest-ever IPOs in history in terms of values of shares offered (in $ million). SpaceX is nearly four-times bigger than Aramco

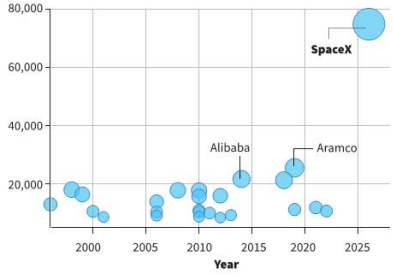

CHART 4: The 10 biggest IPOs from India in terms of the total value of shares offered (in ₹ crore). They do not add to even a tenth of the $75 billion raised by SpaceX

TABLE 1: The five biggest companies in terms of market capitalisation, along with their revenues, and income

Rank	Company	Market capitalisation (in $ trillion)	Revenue in 2025 (in $ billion)	Net income in 2025 (in $ billion)
1	NVIDIA	4.96	215.93	120.06
2	Alphabet	4.35	402.83	132.17
3	Apple	4.27	416.16	112.01
4	Microsoft	2.90	281.72	101.83
5	Amazon	2.56	716.90	77.60
6	SpaceX	2.10	18.67	-4.94

TABLE 2: Starlink is the only company to have reported profits in the last year

Companies part of SpaceX	Revenue (in $ billion)	Operating income (in $ billion)
SpaceX	4.086	–0.657
Starlink	11.387	4.423
xAI	3.201	–6.355

15J6. Making sense of the biggest IPO in history

What is drop shipping, and what are the risks for online shoppers?

Drop shipping allows online individuals or agents who do not hold any products to take customer orders and pass them on to other makers or sellers, inserting themselves into the transaction as middlemen; while legal in most jurisdictions, the practice can expose customers to several risks

GS III: Economy

Sahana Venugopal

While scrolling through Instagram Reels, you naturally pause when an attractive product catches your eye: a sleek laptop bag for travel, a cheap set of popular novels, an ultra-fast wireless charger on sale, beautifully embroidered linen shirts, or leather-bound notebooks with custom gold foil inscriptions. Before you know it, you are entering your credit card number or UPI PIN.

Caught up in your shopping spree, you may not have checked the true origin of the product or other customers' reviews of the seller. What's more, you may not even realise that the "company" you paid is just a decorated webpage created with AI and owned by a person who does not hold a single product.

This is the economy of drop shipping: the business practice that allows almost anyone with an internet connection to sell products that come from others.

Here is what you should know as a customer.

What is drop shipping?

This is a business practice where an online individual or agent – who does not hold any product – takes orders from customers and passes them on to another maker/seller who actually holds the product. The product is then delivered to the customers, either by the original maker/seller or a third-party delivery service. To put it simply, the drop shipper inserts itself into the transaction as a middleman. One or even multiple drop shippers might stand between buyers and the original makers of the product they want.

The success of Amazon, the largest e-commerce retailer in the world, can be credited at least in part to drop shipping practices. In its earliest days, Amazon did not commandeer giant international warehouses packed with products; rather, the company was a web-based middleman that fulfilled many customers' orders by sourcing the books they wanted.

Though Amazon's product delivery model has drastically evolved, the company allows drop shipping to take place via its platform. Other channels, such as Shopify, also enable drop shipping and help users manage the logistics. Alternatively, drop shipping might take place through channels such as WhatsApp, Instagram, Facebook, and lesser-known websites.

In essence, if you have ever bought any product online, there's a chance that you placed your order through a drop shipper rather than the original seller.

How does drop shipping work?

Drop shippers can work with both domestic and international manufacturers and customers. Some try to fill an existing gap in their local market (such as affordable school textbooks), some capitalise on market trends (such as the popularity of iPhone cases), and others build hype around rarer products (such as foreign luxury fashion). Most importantly, the drop shipper does not need to buy or store any of the products they are selling.

Drop shipping has become a popular source of income for both public-facing Instagram creators monetising their virality as well as private marketers looking for discreet revenue streams. What's more, with AI automating many customer services and harvesting business insights, drop shipping feels like something that almost anyone with an internet connection can try out.

In addition to promoting products and setting up online storefronts, drop shippers may also buy/sell courses that reveal current market trends, customer interests, trusted wholesalers, and useful AI tools, in order to generate further profits.

Drop shipping might look illogical at first, but it is in vogue for a number of reasons.

Buyers trying to independently source foreign products from a wholesaler might be forced to order more than they need, or contend with complicated customs regulations and fees. They also may not know if the original seller is legitimate, or might be unable to communicate with them due to a language barrier.

However, placing orders through a vetted drop shipper with a user-friendly web page eases some of these worries. What's more, legitimate drop shippers regularly carry out quality assurance tests of their own, and should ideally become a customer support layer of sorts in order to resolve any complaints.

Is drop shipping legal?

Drop shipping is legal in most jurisdictions, as long as the participants involved ensure transparency and comply with their region's tax laws.

Instagram's commerce eligibility requirements state that the users' Facebook Pages or Instagram professional accounts must contain product listings that are available for direct purchase from the user's website. In case buyers are being directed to another website, the user must provide the domain through which they sell, and their channels must represent the shop associated with the domain.

But now that it is possible to create entire shopfronts and e-commerce websites in minutes with just some cheap domains and a few AI coding prompts, Instagram drop shippers can easily present themselves as original sellers and offload customer orders to other sellers. Videos of workers sorting through wrapped packages, or Reels of founders happily holding up stacks of paper that they claim are customer orders, can mislead social media shoppers into thinking they are dealing directly with a trusted seller.

Ultimately, the line separating influencers, marketers, and sellers can blur quickly on social media. Some drop shippers also ask customers to contact them via WhatsApp, to take their communication off the app. Buyers may not know where their products are actually coming from or how their data privacy rights are being eroded. And as supply chain transparency is lost, drop shipping operations can quickly slide into a legal grey area or end up in criminal violations.

Some risks include scams targeting customers, as well as scams targeting drop shippers. Original sellers and drop shippers may both inflate product prices.

Drop shippers might also work with wholesalers sending out defective/rejected products. Furthermore, drop shippers may unknowingly promote pirated/counterfeit products. Hyper-realistic AI product images can mislead both customers and casual drop shippers.

Meanwhile, delivery timelines can be long – if the product even arrives at all. The drop shipper may not be required to take responsible for any safety or hygiene standards that have to be maintained while shipping the products.

Adding to this, multiple drop shipping layers in different countries can inadvertently lead to sanctions violations. In case of complaints, cancellations, or refund requests, customers may have no choice except to cut their losses and move on.

Other dangers include pyramid schemes to recruit more drop shippers, or even cyber-crimes via phishing and hacks, as the customers' payment information is shared with multiple parties without their informed consent.

So, the next time you spot a book influencer on Instagram promoting a handy new reading light, or stumble across an excited founder surrounded by sacks of customer orders, take a few minutes to do your research and find out who is really selling you the product.

15J6. What is drop shipping, and what are the risks for online shoppers?
ड्रॉप शिपिंग क्या है, और ऑनलाइन खरीदारों के लिए इसके क्या जोखिम हैं?

- **Drop shipping** allows **online individuals or agents** who do not hold any products to take **customer orders** and pass them on to other **makers or sellers**, inserting themselves into the transaction as **middlemen**.
  ड्रॉप शिपिंग ऐसी व्यवस्था है जिसमें **ऑनलाइन व्यक्ति या एजेंट**, जो स्वयं कोई उत्पाद अपने पास नहीं रखते, **ग्राहकों के ऑर्डर** प्राप्त करते हैं और उन्हें अन्य **निर्माताओं या विक्रेताओं** को भेज देते हैं, तथा लेन-देन में **मध्यस्थ** के रूप में शामिल हो जाते हैं।
- While **legal** in most jurisdictions, the practice can expose **customers** to several **risks**.
  यद्यपि अधिकांश न्यायक्षेत्रों में यह व्यवस्था **वैध** है, फिर भी यह **ग्राहकों** को अनेक **जोखिमों** के प्रति संवेदनशील बना सकती है।
- **While scrolling through Instagram Reels, you naturally pause when an attractive product catches your eye: a sleek laptop bag for travel, a cheap set of popular novels, an ultra-fast wireless charger on sale, beautifully embroidered linen shirts, or leather-bound notebooks with custom gold foil inscriptions.**
  इंस्टाग्राम रील्स देखते समय जब कोई आकर्षक उत्पाद आपकी नज़र में आता है — जैसे यात्रा हेतु आकर्षक लैपटॉप बैग, लोकप्रिय उपन्यासों का सस्ता सेट, अत्यधिक तीव्र गति वाला वायरलेस चार्जर, सुंदर कढ़ाई वाली

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

लिनेन शर्ट या स्वर्णाक्षरों से सजाई गई चमड़े की जिल्द वाली नोटबुक — तो आप स्वाभाविक रूप से रुक जाते हैं।

- Before you know it, you are entering your credit card number or UPI PIN.
  आपको पता भी नहीं चलता और आप अपना क्रेडिट कार्ड नंबर या **यूपीआई पिन** दर्ज कर रहे होते हैं।
- Caught up in your shopping spree, you may not have checked the true origin of the product or other customers' reviews of the seller.
  खरीदारी के उत्साह में आप संभवतः उत्पाद की वास्तविक उत्पत्ति या विक्रेता के बारे में अन्य ग्राहकों की समीक्षाएँ जाँचना भूल जाते हैं।
- What's more, you may not even realise that the "company" you paid is just a decorated webpage created with AI and owned by a person who does not hold a single product.
  इतना ही नहीं, संभव है कि आपको यह भी ज्ञात न हो कि जिस "कंपनी" को आपने भुगतान किया है, वह केवल कृत्रिम बुद्धिमत्ता से निर्मित एक आकर्षक वेबपृष्ठ है और उसका स्वामी स्वयं एक भी उत्पाद अपने पास नहीं रखता।
- This is the economy of **drop shipping**: the business practice that allows almost anyone with an internet connection to sell products that come from others.
  यही **ड्रॉप शिपिंग** की अर्थव्यवस्था है — एक ऐसी व्यावसायिक व्यवस्था जो इंटरनेट कनेक्शन रखने वाले लगभग किसी भी व्यक्ति को दूसरों के उत्पाद बेचने की अनुमति देती है।

What is drop shipping?
ड्रॉप शिपिंग क्या है?

- This is a business practice where an online individual or agent — who does not hold any product — takes orders from customers and passes them on to another maker/seller who actually holds the product.
  यह एक ऐसी व्यावसायिक पद्धति है जिसमें कोई ऑनलाइन व्यक्ति या एजेंट, जिसके पास स्वयं कोई उत्पाद नहीं होता, ग्राहकों से आदेश प्राप्त करता है और उन्हें उस निर्माता या विक्रेता तक पहुँचाता है जिसके पास वास्तव में उत्पाद उपलब्ध होता है।
- The product is then delivered to the customers, either by the original maker/seller or a third-party delivery service.
  इसके बाद उत्पाद को मूल निर्माता अथवा विक्रेता या किसी तृतीय पक्ष वितरण सेवा के माध्यम से ग्राहक तक पहुँचाया जाता है।
- To put it simply, the drop shipper inserts itself into the transaction as a middleman.
  सरल शब्दों में कहें तो ड्रॉप शिपर स्वयं को लेन-देन में एक मध्यस्थ के रूप में सम्मिलित कर लेता है।
- One or even multiple drop shippers might stand between buyers and the original makers of the product they want.
  कई बार खरीदार और उत्पाद के वास्तविक निर्माता के बीच एक या एक से अधिक ड्रॉप शिपर मौजूद हो सकते हैं।
- The success of **Amazon**, the largest e-commerce retailer in the world, can be credited at least in part to drop shipping practices.
  विश्व की सबसे बड़ी ई-कॉमर्स कंपनी **अमेज़न** की सफलता का एक कारण ड्रॉप शिपिंग पद्धति को भी माना जाता है।
- In its earliest days, Amazon did not commandeer giant international warehouses packed with products; rather, the company was a web-based middleman that fulfilled many customers' orders by sourcing the books they wanted.
  अपने प्रारम्भिक वर्षों में अमेज़न के पास विशाल अंतरराष्ट्रीय गोदाम नहीं थे, बल्कि यह एक वेब-आधारित मध्यस्थ के रूप में ग्राहकों की माँग के अनुसार पुस्तकें उपलब्ध कराता था।
- Though Amazon's product delivery model has drastically evolved, the company allows drop shipping to take place via its platform.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

यद्यपि अमेज़न की वितरण प्रणाली समय के साथ अत्यधिक विकसित हो चुकी है, फिर भी उसका मंच ड्रॉप शिपिंग की अनुमति देता है।

- Other channels, such as **Shopify**, also enable drop shipping and help users manage the logistics.
  शॉपिफ़ाई जैसे अन्य मंच भी ड्रॉप शिपिंग को संभव बनाते हैं तथा उपयोगकर्ताओं को वितरण प्रबंधन में सहायता प्रदान करते हैं।
- Alternatively, drop shipping might take place through channels such as **WhatsApp, Instagram, Facebook**, and lesser-known websites.
  वैकल्पिक रूप से ड्रॉप शिपिंग **व्हाट्सऐप, इंस्टाग्राम, फेसबुक** तथा कम प्रसिद्ध वेबसाइटों के माध्यम से भी संचालित हो सकती है।
- In essence, if you have ever bought any product online, there's a chance that you placed your order through a drop shipper rather than the original seller.
  संक्षेप में, यदि आपने कभी कोई उत्पाद ऑनलाइन खरीदा है, तो यह संभव है कि आपका आदेश वास्तविक विक्रेता के बजाय किसी ड्रॉप शिपर के माध्यम से गया हो।

How does drop shipping work?
ड्रॉप शिपिंग कैसे कार्य करती है?

- Drop shippers can work with both domestic and international manufacturers and customers.
  ड्रॉप शिपर घरेलू तथा अंतरराष्ट्रीय दोनों प्रकार के निर्माताओं और ग्राहकों के साथ कार्य कर सकते हैं।
- Some try to fill an existing gap in their local market, some capitalise on market trends, and others build hype around rarer products.
  कुछ लोग स्थानीय बाज़ार की आवश्यकताओं की पूर्ति करते हैं, कुछ प्रचलित बाज़ार प्रवृत्तियों का लाभ उठाते हैं, जबकि अन्य दुर्लभ उत्पादों के प्रति आकर्षण उत्पन्न करते हैं।
- In addition to promoting products and setting up online storefronts, drop shippers may also buy/sell courses that reveal current market trends, customer interests, trusted wholesalers, and useful AI tools, in order to generate further profits.
  उत्पादों के प्रचार और ऑनलाइन स्टोर स्थापित करने के अतिरिक्त, ड्रॉप शिपर वर्तमान बाज़ार प्रवृत्तियों, ग्राहकों की रुचियों, विश्वसनीय थोक विक्रेताओं और उपयोगी कृत्रिम बुद्धिमत्ता उपकरणों से संबंधित पाठ्यक्रमों की खरीद-बिक्री भी कर सकते हैं ताकि अतिरिक्त लाभ अर्जित किया जा सके।
- They also may not know if the original seller is legitimate, or might be unable to communicate with them due to a language barrier.
  उन्हें यह भी ज्ञात नहीं हो सकता कि मूल विक्रेता वास्तविक और विश्वसनीय है या नहीं, अथवा भाषा संबंधी बाधाओं के कारण वे उससे प्रभावी संवाद स्थापित नहीं कर पाते।
- However, placing orders through a vetted **drop shipper** with a user-friendly web page eases some of these worries.
  किन्तु एक विश्वसनीय **ड्रॉप शिपर** के माध्यम से, जिसकी वेबसाइट उपयोगकर्ता-अनुकूल हो, आदेश देना इन चिंताओं को कुछ हद तक कम कर सकता है।
- What's more, legitimate drop shippers regularly carry out quality assurance tests of their own, and should ideally become a customer support layer of sorts in order to resolve any complaints.
  इसके अतिरिक्त, वैध ड्रॉप शिपर नियमित रूप से गुणवत्ता परीक्षण भी करते हैं और आदर्श रूप से ग्राहकों की शिकायतों के समाधान हेतु सहायता तंत्र के रूप में कार्य करते हैं।

Is drop shipping legal?
क्या ड्रॉप शिपिंग वैध है?

- Drop shipping is legal in most jurisdictions, as long as the participants involved ensure transparency and comply with their region's tax laws.

अधिकांश देशों और क्षेत्रों में **ड्रॉप शिपिंग** वैध है, बशर्ते संबंधित पक्ष पारदर्शिता बनाए रखें और स्थानीय कर कानूनों का पालन करें।

- In case buyers are being directed to another website, the user must provide the domain through which they sell, and their channels must represent the shop associated with the domain.
  यदि ग्राहकों को किसी अन्य वेबसाइट पर भेजा जाता है, तो उपयोगकर्ता को उस डोमेन की जानकारी देनी होती है जिसके माध्यम से बिक्री की जाती है, और उनके मंचों को उसी दुकान का प्रतिनिधित्व करना चाहिए।
- But now that it is possible to create entire shopfronts and e-commerce websites in minutes with just some cheap domains and a few AI coding prompts, Instagram drop shippers can easily present themselves as original sellers and offload customer orders to other sellers.
  किन्तु अब सस्ते डोमेन और कुछ कृत्रिम बुद्धिमत्ता आधारित कोडिंग निर्देशों की सहायता से कुछ ही मिनटों में पूर्ण ई-वाणिज्य वेबसाइटें बनाई जा सकती हैं, जिससे इंस्टाग्राम आधारित ड्रॉप शिपर स्वयं को मूल विक्रेता के रूप में प्रस्तुत कर ग्राहकों के आदेश अन्य विक्रेताओं को भेज सकते हैं।

India's maritime sector growth gets a push as DG Shipping issues first ship recycling credit note

GS III: Economy

Aneesh Phadnis

Smooth seas: Ship owners will get a credit note equivalent to 40% of scrap value upon recycling in certified facilities. AP

India's ambitions for sustainable maritime sector growth have taken off with the sector regulator issuing the first ship recycling credit note.

On May 28, the Directorate General of Shipping issued the credit note to a Liberia-based shipping firm under a scheme to promote safe recycling and shipbuilding.

India is a global leader in the ship recycling industry handling around 30% of dismantled vessels. The credit note scheme is expected to boost competitiveness of Indian yards, attract fresh investments and strengthen the circular economy.

Ship owners will get a credit note equivalent to 40% of scrap value upon recycling in certified facilities. The note will be valid for three years and can be redeemed up to five per cent of the fair price of a new vessel built in an Indian shipyard.

"The ship recycling credit note scheme is a step in the right direction and demonstrates the government's intent to position India as a hub for ship recycling and shipbuilding," said Deepak Shetty, former Director General of Shipping.

Its launch also aligns with the implementation of the Hong Kong International Convention for Safe and Environmentally Sound Recycling of Ships. The convention is a binding global treaty which mandates environmentally sound recycling practices that minimise health risks for yard workers and prevents pollution from its activities. The convention came into force last June.

India is a global leader in the ship recycling industry handling around 30% of dismantled vessels

Ensuring compliance

"India currently has 111 ship recycling yards compliant with the Hong Kong International Convention (HKC), located at Alang, Gujarat. This represents one of the largest concentrations of HKC-compliant ship recycling facilities anywhere in the world," said Director General of Shipping Shyam Jagannathan.

Under the convention, recycling yards are required to implement occupational health and safety measures, maintain environmental protection systems and ensure proper management of hazardous materials and waste. Facilities are also required to maintain worker training programmes, emergency preparedness procedures and environmental monitoring mechanisms.

Mr. Jagannathan said the directorate in coordination with state authorities and recognised organisations undertakes periodic inspections, audits and certification activities to ensure continued compliance.

According to Ship Recycling Industries Association (India) a total of 119 ships were recycled in India in FY 2026 amounting to 1.08 million light displacement tons – an industry metric that measures the quantity of recyclable material available for processing. The new scheme and initiatives in digitalisation and ease of doing business will help grow the numbers.

Mr. Jagannathan said the ship recycling credit note scheme has seen encouraging traction. Already 41 ship owners have registered and six applications have been received under the scheme.

The first credit note valued ₹29 crore was issued for recycling of a St. Kitts and Nevis flagged capsized vessel called Kosta. The ship owned by Bella Shipping Inc was recycled at the Inducto Steel Limited yard at Alang in April.

"All ships recycled at Hong Kong Convention compliant yards in India are eligible for the credit note, subject to adherence to the scheme's prescribed conditions and procedures," he said. A unified ship recycling portal enables seamless applications, processing, tracking and issuance of digitally signed credit notes bringing together the Directorate, state maritime boards and recycling yards on a single platform, he added.

While the scheme creates a powerful incentive for shipowners to recycle and build in India, its execution will depend on practical considerations whether credit note validity aligns with shipping firm's acquisition plans. A crucial test would also be the Indian shipyard's ability to deliver vessels on time. While India is a leader in ship recycling, it is a laggard in shipbuilding. A S&P Global Commodity Insights report last year said the Indian ship building industry accounts for less than one per cent of the global market while China holds 60 per cent share.

Last year the government unveiled a ₹70,000 crore package to boost shipbuilding and maritime sector in the country. The credit note scheme was a part of the package. The package is seeing signs of success with HD Hyundai signing an MoU for greenfield shipyard in Tamil Nadu. Cochin Shipyard securing a contract for six LNG-powered vessels from shipping line CMA CGM is also seen as a win.

Ship recycling specialist Dr. Anand Hiremath suggests that the government could take further steps.

"New building decisions take time. A three year window for credit note may be too short for serious global owners. A 4-6 year period could make the scheme more attractive," he said.

A pre-approval mechanism could also help owners find out in advance the eligibility and discounts available through credit note mechanism. "The government should support yard capability through completion guarantees, vendor clusters, training support and milestone linked grants. The focus must be on execution," Mr. Hiremath said. Over the years the skilled Indian workforce has moved to shipyards overseas for better career prospects. The government should launch a targeted programme to attract this experienced workforce through incentives, relocation support, skill recognition and long term employment opportunities, he added.

15J6. India's maritime sector growth gets a push as DG Shipping issues first ship recycling credit note

डीजी शिपिंग द्वारा पहला शिप रीसाइक्लिंग क्रेडिट नोट जारी किए जाने से भारत के समुद्री क्षेत्र की वृद्धि को बढ़ावा

- India's ambitions for **sustainable maritime sector** growth have taken off with the sector regulator issuing the first **ship recycling credit note**.
  सतत समुद्री क्षेत्र की वृद्धि के लिए भारत की महत्वाकांक्षाओं को तब गति मिली जब क्षेत्रीय नियामक ने पहला **शिप रीसाइक्लिंग क्रेडिट नोट** जारी किया।
- On May 28, the **Directorate General of Shipping** issued the credit note to a Liberia-based shipping firm under a scheme to promote safe recycling and shipbuilding.
  28 मई को **डायरेक्टरेट जनरल ऑफ शिपिंग** ने सुरक्षित रीसाइक्लिंग और जहाज निर्माण को बढ़ावा देने वाली एक योजना के तहत लाइबेरिया स्थित एक शिपिंग कंपनी को यह क्रेडिट नोट जारी किया।
- India is a global leader in the **ship recycling industry** handling around 30% of dismantled vessels.
  भारत **शिप रीसाइक्लिंग उद्योग** में वैश्विक अग्रणी है और दुनिया में तोड़े जाने वाले लगभग 30% जहाजों का प्रबंधन करता है।
- Ship owners will get a credit note equivalent to **40% of scrap value** upon recycling in certified facilities.
  प्रमाणित सुविधाओं में रीसाइक्लिंग कराने पर जहाज मालिकों को **स्क्रैप मूल्य के 40%** के बराबर क्रेडिट नोट मिलेगा।
- The note will be valid for **three years** and can be redeemed up to **five per cent** of the fair price of a new vessel built in an Indian shipyard.
  यह नोट **तीन वर्षों** तक वैध रहेगा और भारतीय शिपयार्ड में निर्मित नए जहाज के उचित मूल्य के **पाँच प्रतिशत** तक भुनाया जा सकेगा।
- Its launch also aligns with the implementation of the **Hong Kong International Convention for Safe and Environmentally Sound Recycling of Ships**.
  इसका शुभारंभ **जहाजों के सुरक्षित और पर्यावरणीय रूप से अनुकूल रीसाइक्लिंग हेतु हांगकांग अंतरराष्ट्रीय सम्मेलन** के कार्यान्वयन के अनुरूप भी है।
- The convention is a binding global treaty which mandates environmentally sound recycling practices that minimise health risks for yard workers and prevents pollution from its activities.
  यह सम्मेलन एक बाध्यकारी वैश्विक संधि है जो पर्यावरण-अनुकूल रीसाइक्लिंग प्रथाओं को अनिवार्य बनाती है, जिससे यार्ड कर्मियों के स्वास्थ्य जोखिम कम होते हैं और प्रदूषण को रोका जाता है।
- The convention came into force last June.
  यह सम्मेलन पिछले जून से प्रभावी हुआ।

Ensuring compliance
अनुपालन सुनिश्चित करना

- "India currently has **111 ship recycling yards** compliant with the **Hong Kong International Convention (HKC)**, located at **Alang, Gujarat**.
  "भारत में वर्तमान में **111 शिप रीसाइक्लिंग यार्ड** हैं जो **हांगकांग अंतरराष्ट्रीय सम्मेलन (HKC)** के अनुरूप हैं और **अलंग, गुजरात** में स्थित हैं।
- This represents one of the largest concentrations of HKC-compliant ship recycling facilities anywhere in the world," said Director General of Shipping **Shyam Jagannathan**.
  महानिदेशक **श्याम जगन्नाथन** ने कहा कि यह दुनिया में HKC-अनुपालक शिप रीसाइक्लिंग सुविधाओं के सबसे बड़े समूहों में से एक है।
- Under the convention, recycling yards are required to implement **occupational health and safety measures**, maintain environmental protection systems and ensure proper management of hazardous materials and waste.

इस सम्मेलन के तहत रीसाइक्लिंग यार्डों को **व्यावसायिक स्वास्थ्य एवं सुरक्षा उपाय** लागू करने, पर्यावरण संरक्षण प्रणालियों को बनाए रखने और खतरनाक पदार्थों तथा अपशिष्ट का उचित प्रबंधन सुनिश्चित करने की आवश्यकता होती है।

- Facilities are also required to maintain worker training programmes, emergency preparedness procedures and environmental monitoring mechanisms.
  सुविधाओं को श्रमिक प्रशिक्षण कार्यक्रम, आपातकालीन तैयारी प्रक्रियाएँ और पर्यावरणीय निगरानी तंत्र भी बनाए रखने होते हैं।
- Mr. Jagannathan said the directorate in coordination with state authorities and recognised organisations undertakes periodic inspections, audits and certification activities to ensure continued compliance.
  श्री जगन्नाथन ने कहा कि निदेशालय राज्य प्राधिकरणों और मान्यता प्राप्त संगठनों के साथ मिलकर निरंतर अनुपालन सुनिश्चित करने के लिए नियमित निरीक्षण, ऑडिट और प्रमाणन गतिविधियाँ संचालित करता है।
- According to **Ship Recycling Industries Association (India)** a total of **119 ships** were recycled in India in FY 2026 amounting to **1.08 million light displacement tons** — an industry metric that measures the quantity of recyclable material available for processing.
  शिप रीसाइक्लिंग इंडस्ट्रीज एसोसिएशन (इंडिया) के अनुसार FY 2026 में भारत में कुल **119 जहाजों** का रीसाइक्लिंग किया गया, जो **1.08 मिलियन लाइट डिस्प्लेसमेंट टन** के बराबर था।
- The first credit note valued **₹29 crore** was issued for recycling of a **St. Kitts and Nevis** flagged capsized vessel called **Kosta**.
  पहला **₹29 करोड़** मूल्य का क्रेडिट नोट **सेंट किट्स एंड नेविस** ध्वज वाले **कोस्टा** नामक पलटे हुए जहाज के रीसाइक्लिंग के लिए जारी किया गया।
- "All ships recycled at **Hong Kong Convention compliant yards** in India are eligible for the credit note, subject to adherence to the scheme's prescribed conditions and procedures," he said.
  उन्होंने कहा कि भारत में **हांगकांग सम्मेलन-अनुपालक यार्डों** में रीसाइक्लिंग किए गए सभी जहाज क्रेडिट नोट के पात्र हैं, बशर्ते योजना की निर्धारित शर्तों और प्रक्रियाओं का पालन किया जाए।
- A unified **ship recycling portal** enables seamless applications, processing, tracking and issuance of digitally signed credit notes bringing together the Directorate, state maritime boards and recycling yards on a single platform, he added.
  उन्होंने कहा कि एकीकृत **शिप रीसाइक्लिंग पोर्टल** आवेदन, प्रसंस्करण, ट्रैकिंग और डिजिटल हस्ताक्षरित क्रेडिट नोट जारी करने की सुविधा प्रदान करता है तथा निदेशालय, राज्य समुद्री बोर्डों और रीसाइक्लिंग यार्डों को एक मंच पर लाता है।
- A crucial test would also be the Indian shipyard's ability to deliver vessels on time.
  एक महत्वपूर्ण परीक्षा भारतीय शिपयार्डों की समय पर जहाज उपलब्ध कराने की क्षमता भी होगी।
- While India is a leader in ship recycling, it is a laggard in **shipbuilding**.
  जहाँ भारत शिप रीसाइक्लिंग में अग्रणी है, वहीं **जहाज निर्माण** में पिछड़ा हुआ है।
- A **S&P Global Commodity Insights** report last year said the Indian shipbuilding industry accounts for less than **one per cent** of the global market while **China** holds **60 per cent** share.
  पिछले वर्ष की **S&P Global Commodity Insights** रिपोर्ट के अनुसार भारतीय जहाज निर्माण उद्योग का वैश्विक बाजार में हिस्सा **एक प्रतिशत से भी कम** है, जबकि **चीन** का हिस्सा **60 प्रतिशत** है।
- Last year the government unveiled a **₹70,000 crore package** to boost shipbuilding and maritime sector in the country.
  पिछले वर्ष सरकार ने जहाज निर्माण और समुद्री क्षेत्र को बढ़ावा देने के लिए **₹70,000 करोड़ का पैकेज** घोषित किया था।
- The credit note scheme was a part of the package.
  क्रेडिट नोट योजना इस पैकेज का एक हिस्सा थी।
- A pre-approval mechanism could also help owners find out in advance the eligibility and discounts available through credit note mechanism.

पूर्व-अनुमोदन तंत्र से मालिक पहले ही पात्रता और क्रेडिट नोट के माध्यम से मिलने वाली छूट के बारे में जान सकते हैं।

- Over the years the skilled Indian workforce has moved to shipyards overseas for better career prospects.

वर्षों के दौरान कुशल भारतीय कार्यबल बेहतर करियर संभावनाओं के लिए विदेशी शिपयार्डों में चला गया है।

- The government should launch a targeted programme to attract this experienced workforce through incentives, relocation support, skill recognition and long term employment opportunities, he added.

उन्होंने कहा कि सरकार को प्रोत्साहन, पुनर्वास सहायता, कौशल मान्यता और दीर्घकालिक रोजगार अवसरों के माध्यम से इस अनुभवी कार्यबल को आकर्षित करने हेतु एक लक्षित कार्यक्रम शुरू करना चाहिए।

In Zojila, light at the end of the tunnel

Once a pass known for deaths due to avalanches, shooting stones, and snowfall, the newly constructed Zojila Tunnel builds on India's growing road infrastructure and fortifies the country's strategic interests in the region with its hostile neighbours, China and Pakistan. Peerzada Ashiq reports on how it also offers hope to locals and their economy

Excavation for the Zojila Tunnel was carried out at an altitude of 2,900 metres on the Kashmir side and 3,310 metres on the Ladakh side. The tunnel is expected to be operational by 2028. IMRAN NISSAR

On June 9, when the 13.14-kilometre-long Zojila Tunnel witnessed a construction breakthrough, Muhammad Shafi Sagar, 50, and Ashiq Wazir, 30, unknown to each other, experienced both relief and sadness. Relief that they and their friends will, in a couple of years, be able to travel between Ladakh's Drass district and the Kashmir Valley relatively free of the fear of dangerous terrain. Sadness, because they had both lost loved ones in the treacherous Zojila Pass.

The Zojila Tunnel by-passes the pass that runs across 30 km, cutting through the vertical, craggy Himalayan range in Drass. In the district's Pandrass village, the mountains are parallel walls; there are no trees in sight at this altitude of 10,800 feet. In winter, the temperature drops to less than -25 degrees Celsius. In summer, the peaks are still surrounded by snow, but the melting glaciers relent. They spring out waterfalls from elevated mountain sides, adding to the roar of the Drass river below.

Shepherds from the plains converge on the high-altitude meadows dotted with wild grass and fresh-water bodies. The children are out in Pandrass High School, the sun shining brightly over them and their L-shaped, single-storey campus, but piercing gusts still make wearing a wind-blocker necessary. The night temperature continues to drop below freezing point, even in June.

It is in these conditions that 1,200 people, working from a camp site, have been building the Zojila Tunnel, which will connect Baltal in Kashmir's Ganderbal district and Minamarg in Ladakh's Drass, on National Highway-1. In the past, the pass was rife with tragedy.

"Shooting stones, snow slides, sudden temperature dips, and avalanches have killed travellers on the Zojila Pass for centuries. Kargil (in Ladakh) is full of stories of loss and disappearances," says Sagar, a teacher at the Pandrass High School, who is also an author of a book on the culture of the Shina tribe in Ladakh.

Workers and technicians, mostly from India, but also from abroad, put in 10 million safe working hours. They grappled with the geological uncertainties of young mountains, rock classification changing every couple of hundred metres, and water pouring out of crevices. Built at a cost of ₹6,800 crore, the excavation was carried out between the altitudes of 2,900 metres on the Kashmir side to 3,310 metres on the Ladakh side. It is expected to be operational by 2028, and is designed to stay open through the year.

Danger zone

Sagar tells a story about his colleagues, from 33 years ago. In 1993, the Pandrass High School, located 13 km away from the Zojila Pass, closed for its usual five-month-long winter vacation in December. Two teachers, Shabir Ahmad and Bashir Ahmad, decided to return home to the Kashmir valley. The Union Territory of Ladakh was part of the Kashmir division of the erstwhile State of Jammu and Kashmir till 2019.

"Winter had already set in. The two teachers left for home. The sub-zero temperatures near the Zojila Pass killed them. One body was recovered after a week and another body has not been traced to date. Locals feel wild animals may have taken it," says Sagar.

For Sagar, the tunnel has provided a new lease of life to people who live here. "When a local would fall sick and need specialised treatment, the nearest hospital was 279 km away, in Leh. Then the patient would be flown out to Delhi or Srinagar. With the tunnel, it'll be just a 141-km drive to Srinagar," says Sagar. The worries about vegetables, gas, and grocery stocks will be stories from the past.

> Shooting stones, snow slides, sudden temperature dip and avalanches have killed travellers on the Zojila Pass for centuries. Kargil is full of stories of loss and disappearances
>
> **MUHAMMAD SHAFI SAGAR**
> Teacher, Pandrass High School, Drass district, Ladakh

This year on March 27, despite better road management and early warnings compared to the past, an avalanche killed seven persons and injured five others at the Zojila Pass. It was a sudden bright sun that triggered the rockfall around 12.30 p.m. One of the victims of the dread-inducing Zojila Pass was Akbar Ali Shadab, a 36-year-old resident of Tharumsa Pashkum village in Kargil. Shadab had just had a baby, six months before. He worked as a wildlife guard and was respected for his volunteerism.

"News flashed on social media about four vehicles being hit by an avalanche. We reached the spot in the evening. The rescue teams halted operations for the night. My uncle's body was found around 6 the next morning," says Wazir, the victim's nephew.

Now, the conversation around Zojila is changing. Sajjad Kargili, in-charge of political affairs of the Jamiat Ul Ulama Isna Asharia, Kargil, an influential seminary, sees the tunnel as the "realisation of a decades-long dream of locals". He refers to the many leaders who through the years have asked at both the State and Central levels for the tunnel.

Kargili was joined by senior members of the seminary on June 9 to pay tribute "to all those who dedicated their lives to this cause but could not live to witness this historic moment". He remembers those who disappeared or died.

"This is not just an engineering milestone, but also a testament to sacrifices. The historic breakthrough stands as a landmark achievement in a long journey of struggle, hope, and determination. It opens a new chapter of connectivity, progress, and prosperity for the region," says Kargili.

Upto 80% of those working on the site are locals. With the tunnel aiming to be open through winter, the possibility of tourism through the year has opened up.

Scaling heights

Ladakh's Zojila Pass has historically been daunting for India. During the India-Pakistan war of 1947, the it was choked by Pakistan and it took two months in 1948 to drive tanks in, between September and October, to defeat and evict the Pakistan Army. The war spurred construction work on the Zojila Pass to make it motorable. "After the 1962 India-China war, the focus again shifted to the Zojila Pass and its importance. The road saw further widening and attention," say Sagar.

From 2005 to 2019, attempts to award the project failed four times. The project was shelved in 2019 due to financial losses of the company tendered to do the work. The work on the Zojila Tunnel saw a flip in its speed after India and China engaged in a face-off in Galwan on June 15-16 in 2020, and saw casualties on both sides for the first time since the wars of the 1960s.

On October 15, 2020, the construction of the Zojila Tunnel was started by the National Highways and Infrastructure Development Corporation Limited (NHIDCL) and Megha Engineering & Infrastructures Ltd (MEIL). The first blasting at Nilgrar Tunnel was held on October 14, 2020. Approach roads, bridges, the Nilgrar twin tunnels, cut-and-cover works, and snow gallery (to protect the tunnel from heavy snowfall) were constructed to set the stage for the tunnel work.

Six years down the line, the Zojila Tunnel is tipped to be the world's longest single-tube bidirectional road tunnel at an altitude 11,578 feet. The main tunnel is U-shaped and is 9.5 metres wide and 7.57 metres in height.

Harsh weather conditions coupled with the mountain's rock composition posed a major challenge for engineers and workers. The rock classification changed 67 times across the 13.14 km stretch and shifted constantly between good and poor formations. The highly volatile geology was managed with the expertise of skilled crew.

"The Himalayas are considered young mountains. They are just 700 million years old," says Yousef Es'haghpour Rahimabadi, an Iranian engineer who works for the NHIDCL. "The rocks have not solidified or condensed fully yet. We had to work on eight to 10 fault zones, which needed special measures. Water seepage has been a major concern," he adds.

He has 29 years of experience in building tunnels. "I mostly worked in the Middle East," says Rahimabadi, who provided consultation on design as well as at-site solutions.

Rahimabadi says the age of the tunnel is set to be 100 years. During the construction of the project, workers braved temperatures of -20 degree Celsius for nearly 100 days a year. A base camp was established for over 1,100 people, which provided food climate- appropriate food, medical facilities, transportation, and amenities to sustain round-the-clock operations.

A Spanish company also joined the project to provide expert solutions to problems posed by the geology of the mountains.

Over the last five years, the project site faced five major avalanches, two in 2023, two in 2024, and one in 2025. On January 12, 2023, a severe avalanche hit the Sarbal area close to the Nilgrar Tunnels. On January 15, 2023, up to 172 workers were stranded in an avalanche.

To combat heavy snow accumulation in winter, a fleet of small and large snow blowers was deployed. This ensured uninterrupted construction work while simultaneously keeping the highway open for regular vehicular movement. "Procurement was also a major challenge. It took three months to bring gantries to Minamarg, because the bypass in Sonamarg was closed for winter," says Rahimabadi.

Gantries are a huge adaptable moulds designed for shaping concrete within a tunnel excavation. Rahimabadi credits the New Austrian Tunnelling Method (NATM), which applies the sequential excavation method. "The NATM method uses the blast-and-go-ahead technique. We worked in two shifts in 24 hours to ensure that the deadline was met," says Rahimabadi.

The tunnel has vertical structures to provide fresh air ventilation and emergency safety since there is no separate escape route. It offers automatic and emergency lighting, emergency phone and radio connectivity, and message signalling to ensure the safety of travellers. Vehicles will be able to travel at a speed of 80 km per hour through it. From two hours to cross the Zojila Pass, it will take travellers 30 to 40 minutes to cross the mighty and arduous Himalayan range.

Change at the press of a button

Harpal Singh, chief operating officer of Megha Engineering, recalls spotting batches of bears hibernating close to tunnel mouths in winter. "We would ignore each other. We did not try to disturb their habitat." He also talks about the desolate landscape, when people from Sonamarg would leave in winter. "We'd see only the police and the Army patrolling," says Singh.

Zojila Tunnel has an immense strategic value for India. India shares a 3,488-km-long border with China, of which 1,597 km runs through Ladakh. Besides the threats posed by China to the east, Pakistan is to the west of Ladakh, beyond the Line of Control.

"Earlier, the Zojila Pass would face closure for five to six months due to snowfall. This tunnel will provide an all-weather link with Ladakh and help the Army," says Singh.

The completion of the Zojila Tunnel project has come at a time when massive military activities are being noted on the borders of Ladakh by China and in Gilgit and Baltistan by Pakistan.

When Union Minister of Road Transport and Highways Nitin Gadkari on June 9 pressed the button for the final blast inside the tunnel, he underlined the strategic value of the tunnel. "From the perspective of national security, this project will prove to be a gamechanger. With round-the-year connectivity, the movement of the Indian Army, as well as the supply of Army materials, equipment, and logistics, will become faster, safer, and more effective, thereby strengthening the country's strategic preparedness," he said.

Above the booming government voice is that of a school teacher. "The tunnel may dilute local culture. Modernity will pose a challenge to old ways of life in Drass. Tourism will introduce new ways of construction," says a worried Sagar.

Odisha village to get crocodile alert system under 'Smart Village' plan

GS III: S&T

Satyasundar Barik
BHUBANESWAR

As the Council of Scientific and Industrial Research (CSIR) accelerates the deployment of technologies in Kusunpur, a remote village in Odisha's Kendrapara district, as part of the 'Smart Village' initiative, residents may soon receive alerts whenever crocodiles stray dangerously close to their homes.

The CSIR laboratories are planning to introduce an artificial intelligence (AI)-enabled wild animal detection and alert system. The system is likely to be installed at two key entry points to the village.

Kendrapara has logged one of the worst rates of human-crocodile conflicts in the State, with more than 20 fatalities reported over the past four years.

Kusunpur is set to witness a comprehensive infrastructure upgrade, including a renovated water gate facility, an underground drainage system, a reconstructed community building, community toilets, and a revamped cremation centre. Roads will be developed using innovative methods, including cold mix technology, waste plastic road technology, and cement grouted bituminous mix.

CBRI Director Pradeep Kumar Ramancharla interacting with villagers in Kusunpur on Sunday. SPECIAL ARRANGEMENT

Under the initiative, the village is expected to emerge as a hub for green livelihoods. The initiative could generate a range of green jobs, while encouraging local entrepreneurs to explore sustainable business opportunities.

Aligned with the CSIR's guiding 'lab to land' principle, a suite of technologies has been proposed for deployment in the village. These include dry flower processing, production of value-added crispy fruits through freeze-drying, and the development of nutritious food products to combat malnutrition.

Other initiatives include biodegradable tableware, small-scale processing units, herbal floor-cleaning liquids, mosquito repellent lotions, and scented candles made from natural beeswax. Plans also include the installation of brick and block-making machines, village-scale rice and green gram milling units, and a scientifically designed parboiled rice processing unit.

"Over the next three years, scientists from 17 CSIR laboratories will visit Kusunpur to ensure smooth deployment of these technologies for the village's overall development," CSIR-Central Building Research Institute (CBRI) Director Pradeep Kumar Ramancharla, who visited the village on Sunday, said.

Deaths in Brazil raise concerns about India's dengue vaccine, DengiAll

Brazilian authorities have stressed that the 42 cases of severe adverse events represent only 0.008% of half-a-million vaccinated; there is no doubt that it is a small risk at the population level; however, at the individual level even one life lost to a severe adverse event is one too many

S. Swaminathan

The recent deaths of two people in Brazil during its dengue vaccination campaign, leading to the shot's suspension on June 8, is a crucial wake-up call for India. This is because the dengue vaccine in Brazil, Butantan-DV, is pretty similar, if not identical, to India's upcoming dengue vaccine, DengiAll.

Both vaccines were several years in the making. Both have live but weakened (attenuated) versions of the dengue viruses (DENVs). And both vaccines are said to be tetravalent because each vaccine is a physical mixture of four live, weakened DENVs.

DENVs come in four versions called serotypes: DENV-1, -2, -3 and -4. All four serotypes are known to be prevalent in Brazil and India. Each DENV serotype has an outer shell adorned with specialised envelope proteins, called E proteins – akin to the spike protein of coronaviruses. Even though the four DENV serotypes are very similar, their E proteins are different enough to warrant immunisation against each of the four serotypes.

When weakened DENV is used in a vaccine, it will prompt two broad types of antibodies: type-specific antibodies and cross-reactive antibodies. Type-specific antibodies are often made in small amounts and recognise only one particular serotype (based on its E proteins) and excel at blocking infections by that serotype alone.

On the other hand, the cross-reactive antibodies are made usually in large amounts and can recognise any of the four serotypes and block an infection – provided they are present at adequate levels. When their levels drop, the cross-reactive antibodies don't just fail to block a new DENV infection: they enhance it, leading to a severe and potentially fatal form of dengue. This phenomenon is called antibody-dependent enhancement (ADE).

The risk of ADE during dengue vaccination is considered a serious adverse event. If untreated, it can lead to death.

In Brazil's dengue vaccination campaign, of 42 vaccine recipients who displayed serious side-effects, two people died and one had to receive intensive care. These side-effects included severe abdominal pain, persistent vomiting, and bleeding, none of which the phase 3 clinical trials revealed. These signs are reminiscent of the symptoms of severe dengue. Medical researchers should look into whether this could be due to ADE. They should also clarify if DengiAll will manifest a similar risk when it is rolled out in India.

Butantan-DV and DengiAll are both based on a technology developed at the U.S. National Institutes of Health (NIH). Over many years, scientists weakened each DENV serotype to make monovalent vaccines, assessed each one for its capacity to induce an immune response without causing disease, and finally mixed all four monovalent vaccine viruses to generate tetravalent vaccines. Two of them, called TV003 and TV005, and the monovalent vaccine viruses were licensed to Instituto Butantan in Brazil and Panacea Biotec in India, among others, for further development.

Butantan-DV is not the first dengue vaccine to be linked to such events. A little over a decade ago, Sanofi Pasteur developed the first tetravalent dengue vaccine to be licensed. It differed from the NIH's vaccines because the four weakened serotypes were hybrid viruses, each covered on its surface with the E protein of one of the DENV serotypes (plus another protein).

This shot, called Dengvaxia, was given to more than 8 lakh children in the Phillipines, a dengue-endemic country like Brazil and India. Severe adverse events occurred three years after vaccination.

Further study revealed Dengvaxia worked like a monovalent vaccine, provoking antibodies to only DENV-4. That is, mixing four live yet weakened viruses didn't automatically ensure tetravalent immunity. There is no clear answer why.

The severe adverse events linked to Butantan-DV thus raise many questions. Is Butantan-DV really functionally tetravalent? Is there a possibility of viral interference compromising its functionality? Could ADE be responsible for the deaths?

There was also a lacuna in the vaccine efficacy data collected in the phase 3 trials. Reports in January 2024, November 2024, and March 2026 indicated that Butantan-DV's efficacy against DENV-3 and DENV-4 is unknown as these serotypes were not prevalent in Brazil at the time of the trials.

Panacea Biotec's DengiAll phase 3 trials, together with the Indian Council of Medical Research, completed its enrollment target of 10,335 healthy volunteers in January this year. The trial began in August 2024; its participants will be followed for two years post-vaccination. Once all the data have been analysed, the company will approach the drug regulator for market approval.

There is no solid reason to deny that DengiAll may not face the potentially fatal issues that have come up with Butantan-DV. However, India can take some proactive actions ahead of DengiAll's rollout. First, Panacea must analyse a representative subset of sera from vaccinated volunteers for type-specific antibodies against all four serotypes. And the regulator must ensure such data are available and rules out the risk of ADE.

Once DengiAll is launched, the regulator must implement a robust pharmacovigilance programme for an extended duration to check for viruses, antibodies, and other parameters

Next, once DengiAll is launched, the regulator must implement a robust pharmacovigilance programme for an extended duration. Vaccine recipients must be clinically monitored periodically and their blood must be collected at regular intervals to check for viruses, antibodies, and other parameters to implement remedial measures quickly. Continuous real-world monitoring is key to identifying rare or long-term adverse events.

The ADE concerns also apply to another tetravalent dengue vaccine, Qdenga, which is also a physical mix of four weakened versions of the DENV serotypes. Japan-based Takeda markets it and its India approval is imminent.

Brazilian authorities have stressed that the 42 cases of severe adverse events out of half-a-million vaccinated represent only 0.008%. There is no doubt it is a small risk at the population level. At the individual level, however, even one life lost to a severe adverse event is one too many.

- DENVs come in four versions called **serotypes**: **DENV-1, -2, -3 and -4**.
  DENVs के चार प्रकार होते हैं जिन्हें **सीरोटाइप (serotypes)** कहा जाता है: **DENV-1, DENV-2, DENV-3 और DENV-4**।
- All four serotypes are known to be prevalent in Brazil and India.
  ये चारों सीरोटाइप **ब्राज़ील** और **भारत** में प्रचलित पाए जाते हैं।
- Each DENV serotype has an outer shell adorned with specialised **envelope proteins**, called **E proteins** — akin to the **spike protein** of coronaviruses.
  प्रत्येक DENV सीरोटाइप की बाहरी सतह पर विशेष प्रकार के **एनवेलप प्रोटीन (envelope proteins)** होते हैं, जिन्हें **E प्रोटीन** कहा जाता है — जो कोरोनावायरस के **स्पाइक प्रोटीन** के समान होते हैं।
- Even though the four DENV serotypes are very similar, their **E proteins** are different enough to warrant immunisation against each of the four serotypes.
  यद्यपि चारों DENV सीरोटाइप बहुत समान हैं, फिर भी उनके **E प्रोटीन** इतने भिन्न हैं कि प्रत्येक सीरोटाइप के विरुद्ध अलग-अलग प्रतिरक्षण आवश्यक हो जाता है।
- When weakened DENV is used in a vaccine, it will prompt two broad types of **antibodies**: **type-specific antibodies** and **cross-reactive antibodies**.
  जब कमजोर किए गए DENV का उपयोग टीके में किया जाता है, तब यह दो व्यापक प्रकार की **प्रतिरक्षी (antibodies)** उत्पन्न करता है: **प्रकार-विशिष्ट प्रतिरक्षी (type-specific antibodies)** तथा **क्रॉस-रिएक्टिव प्रतिरक्षी (cross-reactive antibodies)**।
- This phenomenon is called **antibody-dependent enhancement (ADE)**.
  इस घटना को **एंटीबॉडी-निर्भर संवर्धन (Antibody-Dependent Enhancement - ADE)** कहा जाता है।
- The risk of **ADE** during dengue vaccination is considered a serious adverse event.
  डेंगू टीकाकरण के दौरान **ADE** का जोखिम एक गंभीर प्रतिकूल घटना माना जाता है।
- These side-effects included severe abdominal pain, persistent vomiting, and bleeding, none of which the **phase 3 clinical trials** revealed.
  इन दुष्प्रभावों में गंभीर पेट दर्द, लगातार उल्टी तथा रक्तस्राव शामिल थे, जिनमें से किसी का भी उल्लेख **फेज-3 क्लिनिकल परीक्षणों (Phase 3 Clinical Trials)** में नहीं हुआ था।
- These signs are reminiscent of the symptoms of **severe dengue**.
  ये लक्षण **गंभीर डेंगू (severe dengue)** के लक्षणों से मिलते-जुलते हैं।
- **Butantan-DV and DengiAll are both based on a technology developed at the U.S. National Institutes of Health (NIH).**
  Butantan-DV और **DengiAll** दोनों ही **अमेरिकी राष्ट्रीय स्वास्थ्य संस्थान (U.S. National Institutes of Health - NIH)** द्वारा विकसित प्रौद्योगिकी पर आधारित हैं।
- Over many years, scientists weakened each DENV serotype to make **monovalent vaccines**, assessed each one for its capacity to induce an immune response without causing disease, and finally mixed all four monovalent vaccine viruses to generate **tetravalent vaccines**.
  कई वर्षों में वैज्ञानिकों ने प्रत्येक DENV सीरोटाइप को कमजोर करके **मोनोवैलेंट टीके (monovalent vaccines)** विकसित किए, रोग उत्पन्न किए बिना प्रतिरक्षा प्रतिक्रिया उत्पन्न करने की उनकी क्षमता का मूल्यांकन किया, और अंततः चारों मोनोवैलेंट टीका-वायरसों को मिलाकर **टेट्रावैलेंट टीके (tetravalent vaccines)** तैयार किए।
- A little over a decade ago, **Sanofi Pasteur** developed the first **tetravalent dengue vaccine** to be licensed.
  लगभग एक दशक से कुछ अधिक समय पहले, **Sanofi Pasteur** ने लाइसेंस प्राप्त करने वाला पहला **टेट्रावैलेंट डेंगू टीका** विकसित किया था।
- It differed from the **NIH's vaccines** because the four weakened serotypes were hybrid viruses, each covered on its surface with the **E protein** of one of the DENV serotypes (plus another protein).
  यह **NIH** के टीकों से भिन्न था क्योंकि इसके चारों कमजोर किए गए सीरोटाइप संकर (hybrid) वायरस थे, जिनकी सतह पर DENV सीरोटाइपों में से किसी एक का **E प्रोटीन** (तथा एक अन्य प्रोटीन) उपस्थित था।

- This shot, called **Dengvaxia**, was given to more than **8 lakh children** in the **Philippines**, a dengue-endemic country like Brazil and India.
  Dengvaxia नामक यह टीका **फिलीपींस** में, जो ब्राज़ील और भारत की तरह डेंगू-प्रभावित देश है, **8 लाख से अधिक बच्चों** को दिया गया था।
- Severe adverse events occurred three years after vaccination.
  टीकाकरण के तीन वर्ष बाद गंभीर प्रतिकूल घटनाएँ सामने आईं।
- Further study revealed **Dengvaxia** worked like a **monovalent vaccine**, provoking antibodies to only **DENV-4**.
  आगे के अध्ययन से पता चला कि **Dengvaxia** एक **मोनोवैलेंट टीके** की तरह कार्य करता था और केवल **DENV-4** के विरुद्ध प्रतिरक्षी उत्पन्न करता था।
- **Continuous real-world monitoring** is key to identifying rare or long-term adverse events.
  निरंतर वास्तविक-परिस्थिति निगरानी (Continuous Real-World Monitoring) दुर्लभ अथवा दीर्घकालिक प्रतिकूल घटनाओं की पहचान के लिए अत्यंत महत्वपूर्ण है।
- The **ADE concerns** also apply to another **tetravalent dengue vaccine, Qdenga**, which is also a physical mix of four weakened versions of the DENV serotypes.
  ADE संबंधी चिंताएँ एक अन्य **टेट्रावैलेंट डेंगू टीके, Qdenga**, पर भी लागू होती हैं, जो DENV सीरोटाइपों के चार कमजोर रूपों का भौतिक मिश्रण है।
- **Japan-based Takeda** markets it and its India approval is imminent.
  जापान स्थित Takeda इसका विपणन करती है और भारत में इसकी स्वीकृति शीघ्र मिलने की संभावना है।

The giant world of fungi

GS III: S&T

Vasudevan Mukunth

A new study published in *Science* has reported the first global map of the earth's vast underground network of arbuscular mycorrhizal (AM) fungi.

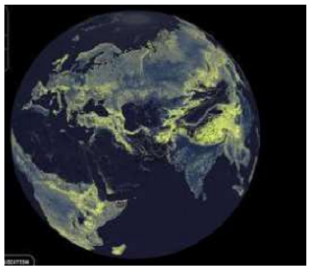
These fungi have sustained plant life for millions of years but their scale and distribution has been largely invisible until now.

Using machine learning and data from more than 16,000 soil cores, an international research team has revealed that topsoils around the world contain some 110 quadrillion km of fungal hyphae — a distance equal to nearly a billion trips from the earth to the sun.

The AM networks also weigh around 300 million tonnes of carbon, which is four- to six-times the weight of the entire human population.

By forming symbiotic relationships with 70% of plant species, trading nutrients for carbon, the AM networks sequester an estimated 4 billion tonnes of CO_2-equivalent a year, or roughly 11% of all human-related carbon emissions.

The study also identified biodiversity hotspots and threats to them. Grassland ecosystems like those in South Sudan, the Tibetan plateau, and India's Banni grasslands house 40% of the world's AM fungal networks. However, the study warned that cropland typically has a 50% lower fungal density relative to wild ecosystems, and because grasslands are being converted to farms four-times faster than forests, these ecosystems are at extreme risk.



A global map of the density of AM fungi. TRUTH & BEAUTY/MORITZ STEFANER JUSTIN STEWART, SPUN

By quantifying the extent of this "living infrastructure", as the Society for the Protection of Underground Networks put it, the work hopes to move fungi from the periphery of environmental policy to the centre of climate action.

ये कवक लाखों वर्षों से पौधों के जीवन को सहारा देते रहे हैं, किंतु इनका विस्तार और वितरण अब तक काफी हद तक अदृश्य रहा है।

- Using **machine learning** and data from more than **16,000 soil cores**, an international research team has revealed that topsoils around the world contain some **110 quadrillion km of fungal hyphae** — a distance equal to nearly a billion trips from the earth to the sun.

मशीन लर्निंग तथा **16,000 से अधिक मृदा नमूनों (soil cores)** के आंकड़ों का उपयोग करते हुए एक अंतरराष्ट्रीय शोध दल ने खुलासा किया है कि विश्वभर की ऊपरी मिट्टी में लगभग **110 क्वाड्रिलियन किलोमीटर फंगल हाइफी (fungal hyphae)** मौजूद हैं — यह दूरी पृथ्वी से सूर्य तक लगभग एक अरब यात्राओं के बराबर है।

- The **AM networks** also weigh around **300 million tonnes of carbon**, which is four- to six-times the weight of the entire human population.

AM नेटवर्क में लगभग **300 मिलियन टन कार्बन** मौजूद है, जो संपूर्ण मानव आबादी के कुल भार से चार से छह गुना अधिक है।

- By forming **symbiotic relationships** with **70% of plant species**, trading nutrients for carbon, the **AM networks** sequester an estimated **4 billion tonnes of CO2-equivalent a year**, or roughly **11% of all human-related carbon emissions**.
  70% पौधों की प्रजातियों के साथ **सहजीवी संबंध (symbiotic relationships)** स्थापित करके तथा पोषक तत्वों के बदले कार्बन प्राप्त करके, **AM नेटवर्क** प्रतिवर्ष अनुमानित **4 अरब टन CO2-समतुल्य** कार्बन का अवशोषण करते हैं, जो मानव-जनित कुल कार्बन उत्सर्जन का लगभग **11%** है।
- The study also identified **biodiversity hotspots** and threats to them.
  अध्ययन ने **जैव विविधता हॉटस्पॉट्स (biodiversity hotspots)** तथा उनके समक्ष उपस्थित खतरों की भी पहचान की है।
- **Grassland ecosystems** like those in **South Sudan**, the **Tibetan plateau**, and India's **Banni grasslands** house **40% of the world's AM fungal networks**.
  दक्षिण सूडान, **तिब्बती पठार (Tibetan Plateau)** तथा भारत के **बन्नी घासस्थल (Banni Grasslands)** जैसे **घासस्थलीय पारितंत्र (grassland ecosystems)** विश्व के **40% AM फंगल नेटवर्क** को आश्रय प्रदान करते हैं।
- However, the study warned that **cropland** typically has a **50% lower fungal density** relative to wild ecosystems, and because grasslands are being converted to farms **four-times faster than forests**, these ecosystems are at extreme risk.
  हालाँकि, अध्ययन ने चेतावनी दी है कि **कृषि भूमि (cropland)** में सामान्यतः प्राकृतिक पारितंत्रों की तुलना में **50% कम फंगल घनत्व** पाया जाता है, और क्योंकि घासस्थलों को वनों की तुलना में **चार गुना अधिक तीव्र गति से कृषि भूमि में परिवर्तित** किया जा रहा है, इसलिए ये पारितंत्र अत्यधिक जोखिम में हैं।
- By quantifying the extent of this **"living infrastructure"**, as the **Society for the Protection of Underground Networks** put it, the work hopes to move fungi from the periphery of environmental policy to the centre of climate action.
  Society for the Protection of Underground Networks द्वारा वर्णित इस **"जीवित अवसंरचना (living infrastructure)"** के विस्तार का परिमाणीकरण करके, यह अध्ययन कवकों को पर्यावरणीय नीति के हाशिये से निकालकर **जलवायु कार्रवाई (climate action)** के केंद्र में लाने की आशा करता है।

CISF trains 7,120 personnel in counter-drone operations post-Operation Sindoor

GS III: Internal Security

Vijaita Singh
NEW DELHI

A year after Operation Sindoor, the Central Industrial Security Force (CISF) has trained over 7,000 personnel in drone and counter-drone operations, a CISF official said.

The training in conjunction with the Indian Air Force (IAF) was initiated amid the growing threat from unauthorised Unmanned Aerial Vehicles (UAVs).

The official said the CISF had been tasked with auditing the security of critical installations such as nuclear power plants and thermal power plants among others.

"It is imperative that the CISF personnel posted at vital installations are aware about the emerging threat scenario from UAVs. They should know how to identify and disable such flying objects. The training is going on an intensive scale," said the official.

The training in conjunction was initiated amid the threat from Unmanned Aerial Vehicles.

A barrage of attacks by drones along the Pakistan border were thwarted by security forces in May 2025 after Operation Sindoor. So far, the CISF had trained 7,120 personnel in drone and counter-drone operations, which covered piloting the drones, aerial surveillance, mapping, and neutralisation of hostile drones. The CISF was also in the process of establishing dedicated Drone Training Schools in Hyderabad, Bhilai and Behror, with advanced academic programmes planned alongside the Indian Institute of Technology (IIT), Kanpur and the Defence Institute of Advanced Technology (DIAT), Pune.

While combating terror and cyberthreats, the CISF continued to be a crucial first responder for industrial disasters, the official said. Its dedicated Fire Wing successfully saving property worth ₹172.55 crore.

Acting on the Ministry of Home Affairs (MHA) directives, the CISF recently trained 450 State Fire Services personnel from 187 cities in advanced industrial firefighting and disaster management at its Fire Services Training Institute, Hyderabad.

15J6. CISF trains 7,120 personnel in counter-drone operations post-Operation Sindoor ऑपरेशन सिंदूर के बाद सीआईएसएफ ने 7,120 कर्मियों को ड्रोन-रोधी अभियानों का प्रशिक्षण दिया

Can India protect its seafarers in Gulf?

How many Indian seafarers are working in the Gulf region? What happened to the three vessels attacked by the U.S. Navy? What sanctions were imposed on some ships? Does the foreign-flag status of the vessels limit India's options? Do international maritime laws protect civilian crews?

GS III: Internal Security

EXPLAINER

M. Kalyanaraman

The story so far:

On June 12, after India summoned U.S. Embassy representative Jason Meeks and lodged its "strong protest" against U.S. missile attacks on merchant vessels carrying Indian crew members, U.S. Secretary of State Marco Rubio told External Affairs Minister S. Jaishankar that violations of the American blockade and "illicit transport of Iranian oil" would not be tolerated. Recalling his discussion with Mr. Rubio, Mr. Jaishankar posted on X: "I reiterated India's strong protest at the attacks by the U.S. Navy in the Gulf that killed three Indian mariners. Such lethal actions against commercial shipping are not justified."

How many Indians are working on merchant vessels globally?

There are an estimated 3.5 lakh Indian seafarers manning ships across the world. The Indian government estimates that more than half of them are in active service, mostly in foreign-flagged ships.

This means one in every six seafarers serving on large merchant ships worldwide is Indian. The International Maritime Organization (IMO) estimates that some 20,000 seafarers of all nationalities are stranded on ships in the Persian Gulf region. The DG Shipping of India estimated at the start of the crisis that some 23,000 Indian seafarers are serving in the broader Gulf region in various capacities and facilities, with the UAE accounting for more than half.

What happened to the three vessels targeted by the U.S.?

On June 8, 10, and 11, the U.S. Navy fired precision munitions – Hellfire missiles – on merchant vessels *Marivex*, *Settebello*, and *Jalveer*. The three were tankers carrying Indian crew. While no one was hurt in the case of *Marivex* and *Jalveer*, three Indian seafarers – one chief engineer, one engine fitter, and one deck cadet – died onboard *Settebello*. While *Marivex* was attacked off the coast of Duqm, some 400 nautical miles from the Strait of Hormuz, the others were attacked off the coast of Shinas in Oman, which is closer to the strait.

Videos put out by the United States Central Command (Centcom) show the engine rooms of the ships being hit as well as the steering compartments. These attacks damaged the vessels above the waterline, so water didn't rush in to sink them. But their ability to move and manoeuvre on their own was lost.

In its press releases, the U.S. Centcom has said the crew of *Settebello* and *Marivex* refused to comply with instructions and all of them violated the blockade by attempting to transport Iranian oil. *Marivex* attempted to sail to an Iranian port, it claimed.

While the *Marivex* crew is reported to have informed seafarers' unions that their ship was at anchor while attacked, *Settebello*'s manager, IOS Marine FZE, a firm registered in Ajman, has flatly contradicted the U.S. The company has said *Settebello* was stationary for nearly 10 days in the region. It said the ship had no communication from the U.S. Navy and had no connection with Iranian oil or ports.

What sanctions were imposed on these ships?

Marivex was sanctioned by the U.S. in December 2025 for Iranian connections. *Settebello* had been flagged by a U.S. non-profit advocacy organisation, United Against Nuclear Iran, for alleged Iranian links. U.S. sanctions are not binding on any other country besides the U.S., although the U.S. Treasury Department's sanctions make it difficult for the companies associated with the concerned ship to access the financial system and other business transactions. Quite often, sanctioned ships lose insurance cover, without which ports will not accept calls by the ships, and charterers will refuse to handle cargo through them.

There have been reports of non-compliance of these ships with some maritime regulations. Typically, such violations, not uncommon in merchant shipping, relate to safety aspects. And ships are typically given time to remedy them before the consequences of losing insurance cover can kick in.

Does the foreign-flag status of the vessels limit India's options?

They all carried foreign flags of convenience (FOCs) but had deep Indian links, including in ownership and management. In merchant shipping, ships are often registered in little-known nations with no infrastructure to rigorously supervise and monitor ships. Popular FOCs include Panama, Marshall Islands, Liberia, and Guinea-Bissau. Such FOCs are also popular among ships transporting Russian and Iranian oil.

Yes, technically, an Indian flagged ship will provide legal sanction for possible action. The U.S., during the Iran-Iraq war, ordered many ships to change their flag to the U.S. so it could legally escort the ships in and out of the Strait of Hormuz. But the Indian Navy has acted against Houthis and Somalian pirates to help Indian seafarers onboard foreign-flagged ships.

Further, *Marivex* and *Jalveer* were often serving Indian ports, facilitating India's enormous oil needs. Soon after the ceasefire was announced in early April, *Marivex* headed out of the Strait of Hormuz to call on Mangalore. *Jalveer* is a bitumen carrier – a special type of ship that carries tar-bitumen, popular in laying Indian roads.

Were other options available for the U.S.?

In the last week of April, the U.S. Navy boarded *Tifani*, a sanctioned very large crude carrier in the Indian Ocean past Sri Lanka. The ship had an Indian crew.

This week, U.K. forces boarded *Smyrtos* on the English Channel for its alleged links to drug cartels, Russian oil, and so on.

Merchant ships are defenceless. Typically, merchant ships have wireless channels open for communication with nearby vessels and any instructions from governments and Navies and Coast Guard vessels are immediately complied with. Seafarers are trained to protect crew, cargo and the ship.

Somalian pirates coming in small craft and carrying firearms could easily board and seize massive oil tankers. The only evasive action ships have against attackers is a high-pressure water jet they can direct at them.

What can India do to protect Indian seafarers in the region?

India did launch Operation Sankalp to protect merchant ships against Houthi attacks. Indian Navy and Coast Guard intervened to protect four merchant ships in 2024. India did take action against Somalian pirates. But the belligerents in the Persian Gulf are the U.S. and Iran. Therefore, India's options are rather limited.

Does international maritime law adequately protect civilian crews?

The nodal agency for regulating global shipping is the IMO, a United Nations agency. Though the IMO has the means to regulate the technical, commercial, environmental and safety aspects of global shipping through consensus and rulemaking, it has often fallen short in protecting ships and seafarers. Quite often, national governments take unilateral action, and typical of an UN agency, the IMO has been unable to act to prevent or take remedial action.

The law governing the oceans is the United Nations Convention on the Law of the Sea (UNCLOS). Its acts and mandates are extensive and are an outcome of decades of negotiations and consensus-building. UNCLOS is thorough and considers various situations, including transits across straits such as the Hormuz. But many nations have not signed on to it. The U.S. refused to sign it on the grounds that UNCLOS considers the deep seabed as the commons. Iran has signed the convention but has not ratified it. There really is no overarching body for enforcement. Things are often left to the good sense of governments.

The Palau-flagged tanker *MT Settebello*, carrying 24 Indian seafarers, was attacked by U.S. forces off the coast of Oman near the Strait of Hormuz. Three Indian crew members were killed in the strike. ANI

Kamlawati Devi, mother of one of three Indian seafarers killed aboard the tanker *MT Settebello*, mourns at her home in Deoria, Uttar Pradesh, on June 12. REUTERS

THE GIST

- India has protested U.S. missile attacks on three merchant vessels carrying Indian crew in the Gulf, in which three Indian seafarers aboard *Settebello* were killed.
- The U.S. says the vessels violated its blockade and were involved in transporting Iranian oil, but ship operators have disputed these claims and said some of the vessels were stationary when attacked.
- With about 23,000 Indian seafarers in the Gulf region, India has limited options because the vessels were foreign-flagged, while international maritime bodies and laws have limited enforcement powers in such situations.

15J6. Can India protect its seafarers in the Gulf?
क्या भारत खाड़ी क्षेत्र में अपने नाविकों (सीफेरर्स) की सुरक्षा कर सकता है?

- There are an estimated **3.5 lakh Indian seafarers** manning ships across the world.
  अनुमानतः **3.5 लाख भारतीय नाविक** विश्वभर के जहाज़ों पर कार्यरत हैं।
- This means one in every six seafarers serving on large merchant ships worldwide is Indian.
  इसका अर्थ है कि विश्व के बड़े व्यापारिक जहाज़ों पर कार्यरत प्रत्येक छह नाविकों में से एक भारतीय है।
- The International Maritime Organization estimates that some **20,000 seafarers** of all nationalities are stranded on ships in the Persian Gulf region.
  अंतरराष्ट्रीय समुद्री संगठन के अनुसार विभिन्न देशों के लगभग **20,000 नाविक** फ़ारस की खाड़ी क्षेत्र में जहाज़ों पर फँसे हुए हैं।

What happened to the three vessels targeted by the U.S.?
अमेरिका द्वारा निशाना बनाए गए तीन जहाज़ों के साथ क्या हुआ?

- On June 8, 10, and 11, the U.S. Navy fired precision munitions — Hellfire missiles — on merchant vessels **Marivex, Settebello, and Jalveer**.
  8, 10 और 11 जून को अमेरिकी नौसेना ने **मारीवेक्स, सेटेबेलो और जलवीर** नामक व्यापारिक जहाज़ों पर सटीक प्रहार करने वाली **हेलफायर मिसाइलों** का उपयोग किया।
- The three were tankers carrying Indian crew.
  ये तीनों भारतीय चालक दल वाले टैंकर जहाज़ थे।
- While no one was hurt in the case of Marivex and Jalveer, three Indian seafarers — one chief engineer, one engine fitter, and one deck cadet — died onboard Settebello.
  मारीवेक्स और **जलवीर** में कोई हताहत नहीं हुआ, किन्तु **सेटेबेलो** पर तीन भारतीय नाविकों — एक मुख्य अभियंता, एक इंजन फिटर और एक डेक कैडेट — की मृत्यु हो गई।
- While Marivex was attacked off the coast of Duqm, some 400 nautical miles from the Strait of Hormuz, the others were attacked off the coast of Shinas in Oman, which is closer to the strait.
  मारीवेक्स पर हमला **दुक्म** तट के निकट, **हॉर्मुज़ जलडमरूमध्य** से लगभग 400 समुद्री मील दूर हुआ, जबकि अन्य दोनों जहाज़ों पर **ओमान** के **शिनास** तट के पास हमला किया गया, जो जलडमरूमध्य के अधिक निकट है।
- In its press releases, the U.S. Central Command has said the crew of Settebello and Marivex refused to comply with instructions and all of them violated the blockade by attempting to transport Iranian oil.
  अपने आधिकारिक वक्तव्यों में अमेरिकी केंद्रीय सैन्य कमान ने कहा कि **सेटेबेलो** और **मारीवेक्स** के चालक दल ने निर्देशों का पालन करने से इनकार किया तथा सभी ने ईरानी तेल के परिवहन का प्रयास करके नाकाबंदी का उल्लंघन किया।
- Quite often, sanctioned ships lose insurance cover, without which ports will not accept calls by the ships, and charterers will refuse to handle cargo through them.
  अक्सर प्रतिबंधित जहाज़ अपना बीमा संरक्षण खो देते हैं। ऐसी स्थिति में बंदरगाह उन्हें प्रवेश की अनुमति नहीं देते और माल परिवहन कराने वाले पक्ष उनके माध्यम से माल ढुलाई से इनकार कर देते हैं।
- Popular flags of convenience include **Panama, Marshall Islands, Liberia, and Guinea-Bissau**.
  प्रचलित **सुविधाजनक ध्वजों** में **पनामा, मार्शल द्वीप, लाइबेरिया और गिनी-बिसाऊ** शामिल हैं।
- Such flags are also popular among ships transporting Russian and Iranian oil.
  रूसी और ईरानी तेल का परिवहन करने वाले जहाज़ भी प्रायः ऐसे ध्वजों का उपयोग करते हैं।
- Yes, technically, an Indian-flagged ship will provide legal sanction for possible action.
  हाँ, तकनीकी रूप से भारतीय ध्वज वाला जहाज़ भारत को संभावित कार्रवाई के लिए अधिक स्पष्ट कानूनी आधार प्रदान करता है।
- Jalveer is a bitumen carrier — a special type of ship that carries tar-bitumen, popular in laying Indian roads.
  जलवीर एक बिटुमेन वाहक जहाज़ है, जो सड़क निर्माण में प्रयुक्त तारकोल-बिटुमेन का परिवहन करता है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Typically, merchant ships have wireless channels open for communication with nearby vessels and any instructions from governments and Navies and Coast Guard vessels are immediately complied with.
  सामान्यतः व्यापारिक जहाज़ों के संचार माध्यम खुले रहते हैं और सरकारों, नौसेनाओं तथा तटरक्षक बलों द्वारा दिए गए निर्देशों का तत्काल पालन किया जाता है।

- India did launch **Operation Sankalp** to protect merchant ships against Houthi attacks.
  भारत ने हूती हमलों से व्यापारिक जहाज़ों की सुरक्षा के लिए **ऑपरेशन संकल्प** प्रारम्भ किया था।

Does international maritime law adequately protect civilian crews?
क्या अंतरराष्ट्रीय समुद्री कानून नागरिक चालक दलों को पर्याप्त सुरक्षा प्रदान करता है?

- The nodal agency for regulating global shipping is the **International Maritime Organization**, a United Nations agency.
  वैश्विक नौवहन को विनियमित करने वाली प्रमुख संस्था **अंतरराष्ट्रीय समुद्री संगठन** है, जो संयुक्त राष्ट्र की एक एजेंसी है।
- Though the organization has the means to regulate the technical, commercial, environmental and safety aspects of global shipping through consensus and rulemaking, it has often fallen short in protecting ships and seafarers.
  यद्यपि इस संगठन के पास वैश्विक नौवहन के तकनीकी, वाणिज्यिक, पर्यावरणीय और सुरक्षा पहलुओं को विनियमित करने की क्षमता है, फिर भी जहाज़ों और नाविकों की सुरक्षा सुनिश्चित करने में यह अनेक बार अपर्याप्त सिद्ध हुआ है।
- The law governing the oceans is the **United Nations Convention on the Law of the Sea**.
  महासागरों को नियंत्रित करने वाला प्रमुख विधिक ढाँचा **संयुक्त राष्ट्र समुद्री कानून अभिसमय** है।
- Its acts and mandates are extensive and are an outcome of decades of negotiations and consensus-building.
  इसके प्रावधान और अधिकार व्यापक हैं तथा दशकों की वार्ताओं और सहमति निर्माण का परिणाम हैं।
- The convention is thorough and considers various situations, including transits across straits such as the Hormuz.
  यह अभिसमय अत्यंत व्यापक है और **हॉर्मुज़ जलडमरूमध्य** जैसे मार्गों से पारगमन सहित विभिन्न परिस्थितियों को समाहित करता है।
- But many nations have not signed on to it.
  किन्तु अनेक देशों ने इसे स्वीकार नहीं किया है।
- The U.S. refused to sign it on the grounds that the convention considers the deep seabed as the commons.
  अमेरिका ने यह कहते हुए इस अभिसमय पर हस्ताक्षर नहीं किए कि इसमें गहरे समुद्री तल को वैश्विक साझा संपत्ति माना गया है।
- Iran has signed the convention but has not ratified it.
  ईरान ने इस अभिसमय पर हस्ताक्षर तो किए हैं, किन्तु अभी तक उसका अनुमोदन नहीं किया है।
- There really is no overarching body for enforcement.
  वास्तव में इसके प्रभावी प्रवर्तन के लिए कोई सर्वव्यापी वैश्विक प्राधिकरण मौजूद नहीं है।
- Things are often left to the good sense of governments.
  अनेक मामलों में परिस्थितियाँ सरकारों के विवेक और जिम्मेदार आचरण पर ही निर्भर रह जाती हैं।

China's ability to launch direct missile strikes on Australia 'growing': report

GS III: Internal Security

Agence France-Presse

SYDNEY

China is capable of a direct missile strike on Australia and the threat is growing as Beijing amasses long-range and hypersonic weapons and builds islands in the South China Sea, an Australian think tank said on Sunday.

A Lowy Institute report found the main threat to Australia was from Chinese missiles fired from ships, submarines and a new intermediate-range ballistic missile that could reach the island continent from China.

On the watch: China test-fires an intercontinental ballistic missile into the Pacific Ocean, at an undisclosed location. FILE PHOTO

China's capacity to strike Australia would grow over the next decade as "the Dong Feng (DF)-27 intermediate-range ballistic missile, and potentially a conventionally armed intercontinental ballistic missile, grow in service numbers", it said.

The DF-27 missile has a range of 5,000 to 8,000 kilometres, the U.S. military said in December.

"I think the growth of the People's Liberation Army is the most important thing to happen to Australian security since the collapse of the Soviet Union," said Sam Roggeveen, the director of the Lowy Institute's International Security Programme.

Australia reshaped its military strategy three years ago in response to China's rapid navy build-up, focusing on deterring an adversary from its northern approaches.

15J6. China's ability to launch direct missile strikes on Australia 'growing': report

ऑस्ट्रेलिया पर सीधे मिसाइल हमले करने की चीन की क्षमता बढ़ रही है: रिपोर्ट

- China's capacity to strike Australia would grow over the next decade as "the **Dong Feng (DF)-27** intermediate-range ballistic missile, and potentially a conventionally armed **intercontinental ballistic missile**, grow in service numbers", it said.
  रिपोर्ट में कहा गया है कि अगले दशक में ऑस्ट्रेलिया पर हमला करने की चीन की क्षमता बढ़ेगी क्योंकि **डोंग फेंग (DF)-27** मध्यम दूरी की बैलिस्टिक मिसाइल और संभावित रूप से पारंपरिक हथियारों से लैस **अंतरमहाद्वीपीय बैलिस्टिक मिसाइल** की संख्या सेवा में बढ़ेगी।
- The **DF-27 missile** has a range of **5,000 to 8,000 kilometres**, the U.S. military said in December.
  अमेरिकी सेना ने दिसंबर में कहा था कि **DF-27 मिसाइल** की मारक क्षमता **5,000 से 8,000 किलोमीटर** है।

Lieutenant-General Dhiraj Seth named next Army Chief

PCS

Saurabh Trivedi
NEW DELHI

The government has appointed Lieutenant-General Dhiraj Seth, serving as the Vice-Chief of the Army Staff, as the next Chief of the Army Staff with effect from the afternoon of June 30.

The present Chief of the Army Staff, General Upendra Dwivedi, retires from service the same day.

Lt. Gen. Seth assumed charge as the Vice-Chief of the Army Staff on April 1, 2026. An alumnus of the National Defence Academy, Khadakwasla, Lt. Gen. Seth was commissioned into the Armoured Corps in 1986. Over a distinguished career spanning nearly four decades, he has served in a variety of operational environments, including extensive counter-insurgency assignments.

Lieutenant-General Dhiraj Seth

The officer has commanded an armoured regiment in the desert sector, an armoured brigade, and a counter-insurgency force in Jammu and Kashmir. As a Lieutenant-General, he commanded the prestigious Sudarshan Chakra Corps and later served as the General Officer Commanding, Delhi Area.

14J6. Lieutenant-General Dhiraj Seth named next Army Chief

लेफ्टिनेंट जनरल धीरज सेठ अगले सेना प्रमुख नियुक्त

- The government has appointed **Lieutenant-General Dhiraj Seth**, serving as the **Vice-Chief of the Army Staff**, as the next **Chief of the Army Staff** with effect from the afternoon of **June 30**.

सरकार ने **लेफ्टिनेंट जनरल धीरज सेठ**, जो वर्तमान में **उप सेना प्रमुख** के रूप में कार्यरत हैं, को **30 जून** की दोपहर से प्रभावी अगले **सेना प्रमुख** के रूप में नियुक्त किया है।

- The present **Chief of the Army Staff**, **General Upendra Dwivedi**, retires from service the same day.

वर्तमान **सेना प्रमुख**, **जनरल उपेंद्र द्विवेदी**, उसी दिन सेवा से सेवानिवृत्त हो जाएंगे।

- As a **Lieutenant-General**, he commanded the Sudarshan **Chakra Corps** and later served as the **General Officer Commanding, Delhi Area**.

लेफ्टिनेंट जनरल के रूप में उन्होंने प्रतिष्ठित **सुदर्शन चक्र कोर** की कमान संभाली और बाद में **दिल्ली क्षेत्र के जनरल ऑफिसर कमांडिंग** के रूप में कार्य किया।

FIFA

The governing body of the 'beautiful game', long dogged by allegations of corruption and abuse of power, now faces criticism for its muted response to U.S. immigration authorities denying entry to fans, officials, and team personnel

N. Sudarshan

REUTERS

The Federation Internationale de Football Association, known worldwide by its acronym FIFA, is the most powerful sports body outside the International Olympic Committee. It is the global custodian of football – popularly called 'the beautiful game' – and conducts the World Cup, the most prestigious single-sport competition in the universe.

What started in 1930 as a 13-team tournament has now grown into a behemoth. The ongoing edition in the U.S., Canada and Mexico is the 23rd World Cup, and features a record 48 teams and 104 matches.

Founded in 1904 in Paris, FIFA started with seven members – France, Belgium, Denmark, the Netherlands, Sweden, Switzerland, and Spain. Its original mandate was to bring structure to the international game, organise fixtures, and agree on a common set of rules.

The British associations in England, Scotland, Wales, and Ireland, which predated FIFA and had already set in place organised football in their territories, joined FIFA starting in 1905. Though the equation was stormy in the initial decades – with the First World War and disputes over monetary compensation for amateur players competing at the Olympics leading to the British associations' withdrawal on multiple occasions – it stabilised after the Second World War and has remained so until now.

After Jules Rimet took over as president in 1921, FIFA was in charge of football at the Olympics for the first time at Paris 1924. The success of that, and of the event four years later in Amsterdam, prompted FIFA to think of a tournament of its own.

The inaugural World Cup was born in 1930 and was held in Uruguay, the nation which won the Olympic golds in 1924 and 1928. The in-form team, unsurprisingly, also became the first world champion. Since then, such has FIFA's growth been that it now has 211 members, more than the UN. At its core, it is a non-profit organisation that "oversees and promotes the development of football at every level". But it is also among the richest bodies. At the end of 2025, FIFA's reserves, according to its own financial report, amounted to $2.69 billion. Cape Verde, which is competing in North America this summer and is the third-smallest nation ever to qualify (population less than six lakhs), has reserves of $0.78 bn (data from 2024).

Generous powers

Understandably, the FIFA president, who sits atop this edifice, wields enormous power, and with a generous term limit of three four-year periods (consecutive or otherwise), he or she can take decisions that can have lasting consequences. Prior to 2016, term limits weren't enforced. In fact, for 41 years from 1974 to 2015, FIFA just had three presidents – Englishman Stanley Rous for more than 12 years, Brazil's Joao Havelange for a little over 24, and Swiss Sepp Blatter for more than 17.

Before that, Frenchman Rimet – whose name the World Cup trophy carried from 1950 to 1970 – was at the helm for 33 years (from March 1921 to June 1954). Current president Gianni Infantino has been the leading man since early 2016. It is this structure, which allows a FIFA president to turn the organisation into a personal fiefdom, that has given rise to most controversies. The bosses have never shied away from striking friendships with problematic political figures and authoritarian regimes in search of big capital.

FIFA, by virtue of being a non-profit, is duty-bound to redistribute its revenues to member nations. *Prima facie*, it's a democratic move, and even noble, considering that the money ensures the sport's survival and development in many countries. But this dole has often been weaponised in return for votes to keep the head in power for perpetuity. Every FIFA member, big or small, has a vote, and is directly involved in electing the president.

The 1934 World Cup was held in Benito Mussolini's Italy. The 1978 edition was conducted in Argentina, under dictator Gen. Jorge Rafael Videla's rule and Havelange's blessings. Rous was unwavering in his support for Apartheid South Africa while Blatter dangled the monetary carrot to the developing world to keep his throne for as long as he did.

It is ironic that Infantino would preside over a FIFA which has remained unchanged. He vaulted to power promising reforms after serious corruption charges related to the allotment of the 2018 and 2022 World Cups to Russia and Qatar, respectively, brought down Blatter's house of cards.

But he has since cultivated relationships with Russian President Vladimir Putin and U.S. President Donald Trump, and attracted a deal worth $1 billion from Saudi Arabia, the country which will host the 2034 World Cup. In 2019, he accepted the Russian Order of Friendship medal from Mr. Putin. Last December, his FIFA created the first-ever Peace Prize – literally out of nowhere – and awarded it to Mr. Trump.

Infantino has also moved to extend his term beyond the 12-year ceiling that was brought in at the Extraordinary FIFA Congress in early 2016 in the aftermath of the corruption scandal. The 56-year-old has said his first three years in office (2016-19) were from Blatter's unfinished term and hence would not stop him from being re-elected in 2027.

At the ongoing World Cup, FIFA has been heavily criticised for its cavalier attitude regarding American immigration authorities' arbitrary actions in denying entry to fans, match-officials and team personnel alike. Most notable was the rejection meted out to Somalian referee Omar Artan, the best men's referee from Africa in 2025.

Limits of influence

Infantino has defended FIFA by saying there are limits to how much the governing body can influence an individual country's immigration policies. But a decade ago, when Mr. Trump had signed an executive order banning immigration from six Muslim-majority countries, Infantino had declared that "there is no World Cup" if supporters and officials do not have access.

While increasing the number of teams in the World Cup to 48 will help enlarge the game's footprint, the FIFA Club World Cup bloating to a 32-team affair starting 2025 from a modest seven outfits earlier further entrenches FIFA's power. The competition, which has replaced the Confederations Cup as a World Cup preparatory event, ran for a month in the U.S. last summer, a slot otherwise reserved for players' rest and recuperation.

Reportedly, there is an urge to make it biennial, and the $85 million Chelsea received as prize money for winning in 2025 is a big enough perk for the participants to agree.

All of this highlights a fundamental conflict at the heart of FIFA's functioning. On the one hand, it is the guardian of the sport, defines laws, puts in place the rules and is expected to act impartially in disputes between its members. At the same time, it has tournaments to sell and a partially self-imposed obligation to generate revenue, forcing it to turn a blind eye when those like the U.S. err.

Can such a system, where the referee is also a player, stay true to the cause?

THE GIST

- Founded in 1904 in Paris, FI started with seven member France, Belgium, Denmark, Netherlands, Sweden, Switzerland, and Spain
- After Jules Rimet took over president in 1921, FIFA was charge of football at the Olympics for the first time a Paris 1924. The success of t prompted FIFA to think of a tournament of its own
- The inaugural World Cup wa born in 1930 and was held i Uruguay, the nation which the Olympic golds in 1924 a 1928. The in-form team, unsurprisingly, also became the first world champion

14J6. The house of cards
ताश का महल

- The governing body of the **'beautiful game'**, long dogged by allegations of **corruption** and **abuse of power**, now faces criticism for its muted response to **U.S. immigration authorities** denying entry to fans, officials, and team personnel.
  'सुंदर खेल' (फुटबॉल) की शासी संस्था, जो लंबे समय से **भ्रष्टाचार** और **सत्ता के दुरुपयोग** के आरोपों से घिरी रही है, अब प्रशंसकों, अधिकारियों और टीम कर्मियों को प्रवेश देने से **अमेरिकी आव्रजन अधिकारियों** द्वारा इनकार किए जाने पर अपनी कमजोर प्रतिक्रिया के कारण आलोचना का सामना कर रही है।
- The **Federation Internationale de Football Association**, known worldwide by its acronym **FIFA**, is the most powerful sports body outside the **International Olympic Committee**.
  फेडरेशन इंटरनेशनल डे फुटबॉल एसोसिएशन, जिसे दुनिया भर में **फीफा (FIFA)** के नाम से जाना जाता है, **अंतरराष्ट्रीय ओलंपिक समिति** के बाहर सबसे शक्तिशाली खेल संस्था है।
- It is the global custodian of football — popularly called **'the beautiful game'** — and conducts the **World Cup**, the most prestigious single-sport competition in the universe.
  यह फुटबॉल का वैश्विक संरक्षक है — जिसे लोकप्रिय रूप से **'सुंदर खेल'** कहा जाता है — और **विश्व कप** का आयोजन करता है, जो दुनिया की सबसे प्रतिष्ठित एकल-खेल प्रतियोगिता है।
- What started in **1930** as a 13-team tournament has now grown into a behemoth.
  जो प्रतियोगिता **1930** में 13 टीमों के टूर्नामेंट के रूप में शुरू हुई थी, वह अब एक विशाल आयोजन बन चुकी है।
- The ongoing edition in the **U.S., Canada and Mexico** is the 23rd World Cup, and features a record **48 teams** and **104 matches**.

अमेरिका, कनाडा और मेक्सिको में चल रहा वर्तमान संस्करण 23वाँ विश्व कप है, जिसमें रिकॉर्ड **48 टीमें** और **104 मैच** शामिल हैं।

- Founded in **1904** in **Paris**, FIFA started with seven members — **France, Belgium, Denmark, the Netherlands, Sweden, Switzerland, and Spain**.
  1904 में **पेरिस** में स्थापित फीफा ने सात सदस्यों — **फ्रांस, बेल्जियम, डेनमार्क, नीदरलैंड, स्वीडन, स्विट्जरलैंड और स्पेन** — के साथ शुरुआत की थी।
- Its original mandate was to bring structure to the international game, organise fixtures, and agree on a common set of rules.
  इसका मूल उद्देश्य अंतरराष्ट्रीय खेल को संगठित रूप देना, मैचों का आयोजन करना और नियमों के एक साझा ढाँचे पर सहमति बनाना था।
- The British associations in **England, Scotland, Wales, and Ireland**, which predated FIFA and had already set in place organised football in their territories, joined FIFA starting in **1905**.
  इंग्लैंड, स्कॉटलैंड, वेल्स और आयरलैंड के ब्रिटिश संघ, जो फीफा से पहले अस्तित्व में थे और अपने क्षेत्रों में संगठित फुटबॉल स्थापित कर चुके थे, **1905** से फीफा में शामिल होने लगे।
- Though the equation was stormy in the initial decades — with the **First World War** and disputes over monetary compensation for amateur players competing at the Olympics leading to the British associations' withdrawal on multiple occasions — it stabilised after the **Second World War** and has remained so until now.
  हालाँकि शुरुआती दशकों में संबंध तनावपूर्ण रहे — **प्रथम विश्व युद्ध** और ओलंपिक में खेलने वाले शौकिया खिलाड़ियों को आर्थिक मुआवजे को लेकर विवादों के कारण ब्रिटिश संघ कई बार अलग हुए — लेकिन **द्वितीय विश्व युद्ध** के बाद स्थिति स्थिर हो गई और आज तक बनी हुई है।
- After **Jules Rimet** took over as president in **1921**, FIFA was in charge of football at the Olympics for the first time at **Paris 1924**.
  जूल्स रिमे के **1921** में अध्यक्ष बनने के बाद, फीफा पहली बार **पेरिस 1924** ओलंपिक में फुटबॉल का प्रभारी बना।
- The success of that, and of the event four years later in **Amsterdam**, prompted FIFA to think of a tournament of its own.
  उसकी सफलता और चार वर्ष बाद **एम्स्टर्डम** में हुए आयोजन की सफलता ने फीफा को अपना स्वयं का टूर्नामेंट शुरू करने के लिए प्रेरित किया।
- The inaugural **World Cup** was born in **1930** and was held in **Uruguay**, the nation which won the Olympic golds in **1924** and **1928**.
  पहला **विश्व कप 1930** में आयोजित हुआ और इसकी मेजबानी **उरुग्वे** ने की, जिसने **1924** और **1928** के ओलंपिक स्वर्ण पदक जीते थे।
- The in-form team, unsurprisingly, also became the first world champion.
  स्वाभाविक रूप से, शानदार फॉर्म में चल रही टीम ही पहली विश्व चैंपियन बनी।
- Since then, such has FIFA's growth been that it now has **211 members**, more than the **UN**.
  तब से फीफा का विस्तार इतना बढ़ा है कि अब इसके **211 सदस्य** हैं, जो **संयुक्त राष्ट्र (UN)** से भी अधिक हैं।
- At its core, it is a **non-profit organisation** that "oversees and promotes the development of football at every level".
  मूल रूप से यह एक **गैर-लाभकारी संगठन** है जो "हर स्तर पर फुटबॉल के विकास की निगरानी और प्रोत्साहन" करता है।
- But it is also among the richest bodies.
  लेकिन यह दुनिया की सबसे समृद्ध संस्थाओं में भी शामिल है।
- At the end of **2025**, FIFA's reserves, according to its own financial report, amounted to **$2.69 billion**.
  2025 के अंत में, फीफा की अपनी वित्तीय रिपोर्ट के अनुसार, उसके भंडार **2.69 अरब डॉलर** थे।
- **Cape Verde**, which is competing in North America this summer and is the third-smallest nation ever to qualify (population less than six lakhs), has reserves of **$0.78 billion**.

केप वर्डे, जो इस गर्मी में उत्तरी अमेरिका में प्रतिस्पर्धा कर रहा है और विश्व कप के लिए क्वालीफाई करने वाला तीसरा सबसे छोटा देश है (जनसंख्या छह लाख से कम), उसके भंडार **0.78 अरब डॉलर** हैं।

Generous powers
व्यापक शक्तियाँ

- Understandably, the **FIFA president**, who sits atop this edifice, wields enormous power, and with a generous term limit of **three four-year periods** (consecutive or otherwise), he or she can take decisions that can have lasting consequences.
  स्वाभाविक रूप से, इस पूरी संरचना के शीर्ष पर बैठा **फीफा अध्यक्ष** अत्यधिक शक्ति रखता है, और **चार-चार वर्ष के तीन कार्यकालों** की उदार सीमा के कारण ऐसे निर्णय ले सकता है जिनका दीर्घकालिक प्रभाव पड़ता है।
- Prior to **2016**, term limits weren't enforced.
  2016 से पहले कार्यकाल की सीमा लागू नहीं थी।
- In fact, for **41 years** from **1974 to 2015**, FIFA just had three presidents — **Stanley Rous**, **Joao Havelange**, and **Sepp Blatter**.
  वास्तव में, **1974 से 2015** तक **41 वर्षों** में फीफा के केवल तीन अध्यक्ष रहे — **स्टेनली राउस**, **जोआओ हावेलांगे** और **सेप ब्लैटर**।
- Before that, **Jules Rimet** was at the helm for **33 years**.
  उससे पहले **जूल्स रिमे 33 वर्षों** तक नेतृत्व में रहे।
- Current president **Gianni Infantino** has been the leading man since early **2016**.
  वर्तमान अध्यक्ष **जियानी इन्फैन्टिनो 2016** की शुरुआत से पद पर हैं।
- It is this structure, which allows a FIFA president to turn the organisation into a personal **fiefdom**, that has given rise to most controversies.
  यही संरचना, जो फीफा अध्यक्ष को संगठन को व्यक्तिगत **जागीर** में बदलने की अनुमति देती है, अधिकांश विवादों की जड़ रही है।
- The bosses have never shied away from striking friendships with problematic political figures and **authoritarian regimes** in search of big capital.
  फीफा प्रमुखों ने बड़े आर्थिक लाभ की तलाश में विवादास्पद राजनीतिक नेताओं और **सत्तावादी शासन व्यवस्थाओं** से संबंध बनाने में कभी संकोच नहीं किया।
- FIFA, by virtue of being a **non-profit**, is duty-bound to redistribute its revenues to member nations.
  एक **गैर-लाभकारी संस्था** होने के कारण फीफा अपने राजस्व को सदस्य देशों में पुनर्वितरित करने के लिए बाध्य है।
- Prima facie, it's a democratic move, and even noble, considering that the money ensures the sport's survival and development in many countries.
  पहली नज़र में यह एक लोकतांत्रिक और सराहनीय कदम प्रतीत होता है, क्योंकि यह धन कई देशों में खेल के अस्तित्व और विकास को सुनिश्चित करता है।
- But this dole has often been weaponised in return for votes to keep the head in power for perpetuity.
  लेकिन इस आर्थिक सहायता का उपयोग अक्सर वोटों के बदले शीर्ष नेतृत्व को लंबे समय तक सत्ता में बनाए रखने के लिए किया गया है।
- Every FIFA member, big or small, has a vote, and is directly involved in electing the president.
  फीफा का हर सदस्य, चाहे बड़ा हो या छोटा, एक वोट रखता है और अध्यक्ष के चुनाव में सीधे भाग लेता है।
- The **1934 World Cup** was held in **Benito Mussolini's Italy**.
  1934 विश्व कप का आयोजन **बेनिटो मुसोलिनी के इटली** में हुआ था।
- The **1978 edition** was conducted in **Argentina** under dictator **Gen. Jorge Rafael Videla**'s rule and **Havelange's** blessings.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

1978 विश्व कप का आयोजन **अर्जेंटीना** में तानाशाह **जनरल जॉर्ज राफेल विडेला** के शासन और **हावेलांगे** के समर्थन में हुआ।

- **Rous** was unwavering in his support for **Apartheid South Africa** while **Blatter** dangled the monetary carrot to the developing world to keep his throne for as long as he did.
  राउस ने **रंगभेदी दक्षिण अफ्रीका** का लगातार समर्थन किया, जबकि **ब्लैटर** ने विकासशील देशों को आर्थिक लाभ का प्रलोभन देकर अपना पद लंबे समय तक बनाए रखा।
- It is ironic that **Infantino** would preside over a FIFA which has remained unchanged.
  विडंबना यह है कि **इन्फैन्टिनो** ऐसे फीफा का नेतृत्व कर रहे हैं जिसमें मूलभूत बदलाव नहीं हुआ है।
- He vaulted to power promising reforms after serious **corruption charges** related to the allotment of the **2018** and **2022 World Cups** to **Russia** and **Qatar**.
  वे **रूस** और **कतर** को **2018** और **2022 विश्व कप** आवंटित करने से जुड़े गंभीर **भ्रष्टाचार आरोपों** के बाद सुधारों का वादा करते हुए सत्ता में आए थे।
- But he has since cultivated relationships with **Vladimir Putin** and **Donald Trump**, and attracted a deal worth **$1 billion** from **Saudi Arabia**.
  लेकिन बाद में उन्होंने **व्लादिमीर पुतिन** और **डोनाल्ड ट्रम्प** के साथ संबंध विकसित किए तथा **सऊदी अरब** से **1 अरब डॉलर** का समझौता प्राप्त किया।
- In **2019**, he accepted the **Russian Order of Friendship medal** from Mr. Putin.
  2019 में उन्होंने पुतिन से **रूसी ऑर्डर ऑफ फ्रेंडशिप पदक** स्वीकार किया।
- Last December, FIFA created the first-ever **Peace Prize** and awarded it to Mr. Trump.
  पिछले दिसंबर में फीफा ने पहला **पीस प्राइज** बनाया और उसे श्री ट्रम्प को प्रदान किया।
- Infantino has also moved to extend his term beyond the **12-year ceiling** that was brought in at the Extraordinary FIFA Congress in **2016**.
  इन्फैन्टिनो ने **2016** में लागू की गई **12 वर्ष की कार्यकाल सीमा** से आगे अपना कार्यकाल बढ़ाने की दिशा में भी कदम उठाए हैं।
- The 56-year-old has said his first three years in office (**2016-19**) were from Blatter's unfinished term and hence would not stop him from being re-elected in **2027**.
  56 वर्षीय इन्फैन्टिनो का कहना है कि उनके पहले तीन वर्ष (**2016-19**) ब्लैटर के अधूरे कार्यकाल का हिस्सा थे, इसलिए यह उन्हें **2027** में पुनः निर्वाचित होने से नहीं रोकेगा।
- At the ongoing World Cup, FIFA has been heavily criticised for its cavalier attitude regarding American immigration authorities' arbitrary actions in denying entry to fans, match-officials and team personnel alike.
  चल रहे विश्व कप में फीफा की आलोचना अमेरिकी आव्रजन अधिकारियों द्वारा प्रशंसकों, मैच अधिकारियों और टीम कर्मियों को प्रवेश से वंचित करने की मनमानी कार्रवाइयों पर उसके लापरवाह रवैये के कारण हो रही है।
- Most notable was the rejection meted out to **Somalian referee Omar Artan**, the best men's referee from Africa in **2025**.
  सबसे उल्लेखनीय मामला **सोमाली रेफरी उमर आर्टन** का था, जिन्हें **2025** में अफ्रीका का सर्वश्रेष्ठ पुरुष रेफरी माना गया था।

Limits of influence
प्रभाव की सीमाएँ

- **Infantino** has defended FIFA by saying there are limits to how much the governing body can influence an individual country's immigration policies.
  इन्फैन्टिनो ने यह कहते हुए फीफा का बचाव किया कि किसी देश की आव्रजन नीतियों को प्रभावित करने की संस्था की क्षमता की सीमाएँ होती हैं।
- But a decade ago, when **Trump** had signed an executive order banning immigration from six Muslim-majority countries, Infantino had declared that "there is no World Cup" if supporters and officials do not have access.

लेकिन एक दशक पहले, जब **ट्रम्प** ने छह मुस्लिम-बहुल देशों से आव्रजन पर प्रतिबंध लगाने वाला आदेश जारी किया था, तब इन्फैन्टिनो ने कहा था कि यदि समर्थकों और अधिकारियों को प्रवेश नहीं मिलेगा तो "कोई विश्व कप नहीं होगा"।

- While increasing the number of teams in the World Cup to **48** will help enlarge the game's footprint, the **FIFA Club World Cup** bloating to a **32-team** affair further entrenches FIFA's power.
  विश्व कप में टीमों की संख्या **48** करने से खेल का विस्तार होगा, लेकिन **फीफा क्लब विश्व कप** का **32 टीमों** तक बढ़ जाना फीफा की शक्ति को और मजबूत करता है।
- The competition, which has replaced the **Confederations Cup** as a World Cup preparatory event, ran for a month in the **U.S.** last summer.
  यह प्रतियोगिता, जिसने **कन्फेडरेशन कप** का स्थान लिया है, पिछले वर्ष गर्मियों में **अमेरिका** में एक महीने तक चली।
- That slot was otherwise reserved for players' rest and recuperation.
  यह समय सामान्यतः खिलाड़ियों के आराम और पुनर्वास के लिए सुरक्षित रहता था।
- Reportedly, there is an urge to make it **biennial**, and the **$85 million** Chelsea received as prize money for winning in **2025** is a big enough perk for the participants to agree.
  रिपोर्टों के अनुसार इसे **हर दो वर्ष** में आयोजित करने की योजना है, और **2025** में विजेता **चेल्सी** को मिले **85 मिलियन डॉलर** के पुरस्कार ने प्रतिभागियों को इसके लिए सहमत होने हेतु पर्याप्त प्रोत्साहन दिया है।
- All of this highlights a fundamental conflict at the heart of FIFA's functioning.
  यह सब फीफा की कार्यप्रणाली के केंद्र में मौजूद एक मूलभूत संघर्ष को उजागर करता है।
- On the one hand, it is the guardian of the sport, defines laws, puts in place the rules and is expected to act impartially in disputes between its members.
  एक ओर, यह खेल का संरक्षक है, नियम बनाता है और अपने सदस्यों के बीच विवादों में निष्पक्ष भूमिका निभाने की अपेक्षा की जाती है।
- At the same time, it has tournaments to sell and a partially self-imposed obligation to generate revenue, forcing it to turn a blind eye when those like the **U.S.** err.
  दूसरी ओर, उसे अपने टूर्नामेंटों का व्यावसायिक प्रबंधन करना और राजस्व अर्जित करना होता है, जिसके कारण वह **अमेरिका** जैसे देशों की गलतियों पर आँखें मूँद लेता है।
- Can such a system, where the **referee** is also a **player**, stay true to the cause?
  क्या ऐसा तंत्र, जिसमें **रेफरी** ही **खिलाड़ी** भी हो, वास्तव में अपने उद्देश्य के प्रति ईमानदार रह सकता है?

U.S.-Venezuela joint operation kills leader of Tren de Aragua

PCS

CARACAS

The leader of the transnational gang Tren de Aragua was killed in a joint operation by the United States and Venezuela, authorities in the South American nation said on Friday.

Founded in Venezuela, Tren de Aragua has been designated a terrorist organisation by the U.S. and is also active in Colombia, Peru and Chile.

"There were clashes with members of these criminal structures, in which Hector Rusthenford Guerrero Flores, alias 'Nino Guerrero,' was neutralised," Venezuela's Ministry of Communications said in a statement.

U.S. President Donald Trump said earlier Friday that American forces carried out a deadly strike on the gang leader. "At my direction, the United States Southern Command delivered a swift and lethal kinetic strike to successfully execute Nino Guerrero."

Attacks on vessels with Indian seafarers likely to feature in IORA meet

GS II: IR

Saptaparno Ghosh
NEW DELHI

At the 28th meeting of the Committee of Senior Officials of the Indian Ocean Rim Association (IORA), commencing on Monday, all eyes will be on India, which may put forth concerns over the U.S.'s recent attacks on four vessels with Indian seafarers on board.

India is the current Chair of the regional maritime cooperative association, which also has Iran, the UAE, Yemen, and Oman as its members – countries which have also been directly affected by the conflict in West Asia.

The U.S. too features as a 'dialogue partner' at the association, in the role of an observer, wherein it participates and discusses issues but does not have voting rights.

Although the IORA's charter explicitly bars members from raising issues that do not concern regional cooperation, in the broader scheme of things, India could look to utilise the forum for airing its concerns in the maritime space.

India is the current Chair of the Indian Ocean Rim Association.

The Committee of Senior Officials is the IORA's second-highest decision-making body.

The platform could be an avenue for a dialogue on the prevailing broader maritime concerns, and potentially, cooperation in the realm.

Besides issues specific to India, other member countries too would find themselves in the spotlight, particularly Iran, as it seeks to impose a 'service fee' on the passage of ships through the Strait of Hormuz.

"According to international laws, it is not possible to impose toll on the Strait of Hormuz, but service fees will be collected, and this will be established in the negotiations," Iran's Foreign Minister Abbas Araghchi has said.

In the past five days, the U.S. has attacked three foreign-flagged vessels that had Indian seafarers on board, for violating the naval blockade. The blockade imposed by the U.S. bars the use of Iranian ports, and the transportation of Iranian oil.

Speaking to *The Hindu* at 10th Indian Ocean Conference in Mauritius on April 11, 2026, Mauritius' Foreign Minister Dhananjay Ramful had said the idea of the Indian Ccean as a "zone of peace" had been negated as the "war has come" to the ocean.

While denouncing the U.S. torpedo attack on Iranian ship *IRIS Dena* in the Indian Ocean, killing more than 80 sailors in March 2026, he also expressed his concerns over retaliatory attacks by Iran on the U.S.'s Diego Garcia military base.

14J6. Attacks on vessels with Indian seafarers likely to feature in IORA meet
भारतीय नाविकों वाले जहाज़ों पर हमलों का मुद्दा IORA बैठक में उठने की संभावना

- At the **28th meeting** of the **Committee of Senior Officials** of the **Indian Ocean Rim Association (IORA)**, commencing on Monday, all eyes will be on **India**, which may put forth concerns over the **U.S.'s recent attacks** on four vessels with **Indian seafarers** on board.
  सोमवार से शुरू होने वाली **हिन्द महासागर तटीय क्षेत्र संघ (IORA)** की **वरिष्ठ अधिकारियों की समिति की 28वीं बैठक** में सबकी निगाहें **भारत** पर होंगी, जो **भारतीय नाविकों** वाले चार जहाज़ों पर **अमेरिका के हालिया हमलों** को लेकर अपनी चिंताएँ रख सकता है।
- **India** is the current **Chair** of the regional maritime cooperative association, which also has **Iran**, the **UAE**, **Yemen**, and **Oman** as its members — countries which have also been directly affected by the conflict in **West Asia**.
  भारत इस क्षेत्रीय समुद्री सहयोग संगठन का वर्तमान **अध्यक्ष** है, जिसके सदस्य **ईरान**, **यूएई**, **यमन** और **ओमान** भी हैं — ऐसे देश जो **पश्चिम एशिया** के संघर्ष से सीधे प्रभावित हुए हैं।

- The **U.S.** too features as a **'dialogue partner'** at the association, in the role of an observer, wherein it participates and discusses issues but does not have voting rights.
  अमेरिका भी इस संगठन में एक **'संवाद साझेदार'** के रूप में पर्यवेक्षक की भूमिका निभाता है, जहाँ वह चर्चाओं में भाग लेता है लेकिन उसे मतदान का अधिकार नहीं है।
- Although the **IORA's charter** explicitly bars members from raising issues that do not concern regional cooperation, in the broader scheme of things, **India** could look to utilise the forum for airing its concerns in the **maritime space**.
  यद्यपि **IORA के चार्टर** में स्पष्ट रूप से उन मुद्दों को उठाने पर रोक है जो क्षेत्रीय सहयोग से संबंधित नहीं हैं, फिर भी व्यापक परिप्रेक्ष्य में **भारत** इस मंच का उपयोग **समुद्री क्षेत्र** से जुड़ी अपनी चिंताओं को व्यक्त करने के लिए कर सकता है।
- The **Committee of Senior Officials** is the **IORA's second-highest decision-making body**.
  वरिष्ठ अधिकारियों की समिति IORA की दूसरी सर्वोच्च निर्णय लेने वाली संस्था है।
- The platform could be an avenue for a dialogue on the prevailing broader **maritime concerns**, and potentially, cooperation in the realm.
  यह मंच वर्तमान व्यापक **समुद्री चिंताओं** पर संवाद तथा संभावित सहयोग का माध्यम बन सकता है।
- Besides issues specific to **India**, other member countries too would end themselves in the spotlight, particularly **Iran**, as it seeks to impose a **'service fee'** on the passage of ships through the **Strait of Hormuz**.
  भारत से जुड़े मुद्दों के अलावा अन्य सदस्य देश भी चर्चा के केंद्र में रहेंगे, विशेषकर **ईरान**, जो **होर्मुज़ जलडमरूमध्य** से गुजरने वाले जहाज़ों पर **'सेवा शुल्क'** लगाने का प्रयास कर रहा है।
- "According to **international laws**, it is not possible to impose toll on the **Strait of Hormuz**, but service fees will be collected, and this will be established in the negotiations," **Iran's Foreign Minister Abbas Araghchi** has said.
  "**अंतरराष्ट्रीय कानूनों** के अनुसार **होर्मुज़ जलडमरूमध्य** पर टोल लगाना संभव नहीं है, लेकिन सेवा शुल्क वसूला जाएगा और इसे वार्ताओं के माध्यम से स्थापित किया जाएगा," **ईरान के विदेश मंत्री अब्बास अराघची** ने कहा।
- In the past • ve days, the **U.S.** has attacked three **foreign-• agged vessels** that had **Indian seafarers** on board, for violating the **naval blockade**.
  पिछले पाँच दिनों में **अमेरिका** ने **भारतीय नाविकों** वाले तीन **विदेशी ध्वजधारी जहाज़ों** पर **नौसैनिक नाकाबंदी** का उल्लंघन करने के आरोप में हमला किया है।
- The blockade imposed by the **U.S.** bars the use of **Iranian ports**, and the transportation of **Iranian oil**.
  अमेरिका द्वारा लगाई गई नाकाबंदी **ईरानी बंदरगाहों** के उपयोग और **ईरानी तेल** के परिवहन पर रोक लगाती है।
- Speaking to **The Hindu** at **10th Indian Ocean Conference** in **Mauritius** on **April 11, 2026**, **Mauritius' Foreign Minister Dhananjay Ramful** had said the idea of the **Indian Ocean** as a **"zone of peace"** had been negated as the **"war has come"** to the ocean.
  11 अप्रैल 2026 को **मॉरीशस** में आयोजित **10वें भारतीय महासागर सम्मेलन** में **मॉरीशस के विदेश मंत्री धनंजय रामफुल** ने कहा था कि **हिन्द महासागर** को **"शांति का क्षेत्र"** मानने की अवधारणा समाप्त हो गई है क्योंकि **"युद्ध महासागर तक पहुँच चुका है।"**
- While denouncing the **U.S. torpedo attack** on **Iranian ship IRIS Dena** in the **Indian Ocean**, killing more than **80 sailors** in **March 2026**, he also expressed his concerns over retaliatory attacks by **Iran** on the **U.S. 's Diego Garcia military base**.
  मार्च 2026 में **हिन्द महासागर** में **ईरानी जहाज़ IRIS Dena** पर हुए **अमेरिकी टॉरपीडो हमले** की निंदा करते हुए, जिसमें **80 से अधिक नाविकों** की मृत्यु हुई, उन्होंने **ईरान** द्वारा **अमेरिका के डिएगो गार्सिया सैन्य अड्डे** पर संभावित जवाबी हमलों को लेकर भी चिंता व्यक्त की।

Why are there protests in PoK?

Why was the Joint Awami Action Committee formed in 2023 and what are their demands? What are the economic concerns in the region? Why is the demand for the abolishment of reservation for 12 refugee seats in the PoK Assembly at the heart of the protests? How has India reacted?

GS II: IR

Joan Sony Cherian

The story so far:

Pakistan-occupied Kashmir (PoK) is again in the throes of civilian unrest as protests for economic justice and equitable political representation rage across the region. The Joint Awami Action Committee (JAAC), which called for the protests, has since been banned by the regional government, for "engaging in terrorism".

What is the JAAC and why did it call for protests?

The JAAC, an umbrella organisation of various civil society groups, trade bodies, students organisations and socio-religious groups based in PoK, was formed in 2023, out of protests against rising electricity tariffs and inflation. They brought out a 38-point Charter of Demands which included access to subsidised wheat flour, fair electricity pricing based on hydropower generation costs from the local Mangla dam, and the abolishment of the reservation of 12 seats for refugees in PoK's Legislative Assembly.

While the JAAC was given assurances regarding electricity tariffs, their "non-fulfillment" led to wider protests. In May 2024, the JAAC called for a march to Muzaffarabad over their demands, which led to the police arresting around 70 members of the organisation. Outrage against the arrests resulted in clashes between civilians and the police, leaving at least four dead and hundreds injured. In the wake of this violence, Pakistan Prime Minister Shehbaz Sharif approved the grant of a $86.25 million subsidy programme.

In October 2025, protests again emerged due to a breakdown of talks between officials and the JAAC. The ensuing violence killed at least 10 people. The government then agreed to some demands which included providing compensation for those killed in the violence, releasing funds for the implementation of health cards, and issuing a grant of PKR 10 billion for the improvement of the electricity system.

While it was also decided that a high-powered committee comprising legal and constitutional experts would deliberate on the issue of members of the PoK Assembly, the central question remained unaddressed.

The 12 reserved seats are for communities who migrated to Pakistan from Jammu and Kashmir during Partition. Over the years, these groups have integrated into Pakistani cities and polity

File photo of protesters of JAAC and activists at a funeral in Muzaffarabad, the capital of PoK, on May 14, 2024. AFP

How did the situation escalate?

Elections to the regional government of PoK have been scheduled for July 27. The JAAC announced that they would take out a protest march to Muzaffarabad, calling for an end to the reservation of the 12 refugee seats, on June 9 – the same day on which the filing of nominations for the elections was to begin.

In an effort to nip the march in the bud, the regional authorities banned the JAAC under a 2014 anti-terrorism law and placed a bounty for its most prominent leaders. They said the organisation had acted in a manner "prejudicial to peace and security" of the state. This led to widespread protests in various cities, particularly Mirpur, Rawalakot and Muzaffarabad, with police personnel clashing with civilian protesters.

On June 8, at least 11 people, including four police officers, were killed and dozens injured when regional authorities opened fire on activists and protesters gathered in Rawalakot for the funeral of a local trade activist who had been killed during an earlier protest.

While the proscribed JAAC has called for strikes, leaving life paralysed in the streets of Muzaffarabad, many parts of the region continue to witness violent clashes, with reports indicating that the death toll has crossed 30.

Regional authorities have deployed paramilitary troops in the region to restore law and order and have also issued a strict travel advisory urging visitors to avoid travelling to the region. Reports also say that Internet in the region has been severely restricted.

Why has the reservation of refugees become a flashpoint?

The political question regarding the 12 reserved refugee seats is at the heart of the protests. The regional Assembly of the PoK has a total of 53 seats. Of these, 45 seats are directly elected by the public (33 are elected by the general public while 12 seats are reserved for refugees). The remaining eight seats are reserved (five for women, one for a technocrat, one for a religious scholar and one is a diaspora seat) and are filled via nominations after the general elections.

The 12 reserved seats are for communities who migrated to Pakistan from Jammu and Kashmir during Partition. Over the years, these groups have integrated into Pakistani cities and polity. In fact, most of these 12 seats have often been won by political parties such as the Pakistan Peoples Party or the Pakistan Tehreek-e-Insaf. As the journalist Luv Puri writes, "...the 12 refugee seats account for around 4.36 lakh registered voters, while the remaining 33 directly elected seats in PoK have around 33 lakh voters. In effect, one refugee vote cast from Pakistan carries electoral weight far greater than that of a voter residing in PoK".

Pakistan maintains that PoK, or what it calls 'Azad Jammu and Kashmir', is an independent region with its own polity and that Pakistan supports its right to self-determination. At the same time, candidates who are elected to the regional Parliament have to sign loyalty oaths supporting the "cause of accession of the State of Jammu and Kashmir to Pakistan". This has led to questions regarding the undue influence of Islamabad in the regional politics of PoK.

In a further setback to such regional demands, on June 7, the Supreme Court of PoK observed that the 12 legislative seats reserved for refugees are constitutionally protected and cannot be abolished through administrative or executive measures; only a constitutional amendment can fulfil the demand to abolish refugee representation.

How have the Indian and Pakistani governments reacted?

On June 9, India asked the international community to hold Pakistan responsible for the civilian killings and human rights abuses in PoK. "There are reports of severe police brutality in Pakistan Occupied Kashmir in which several protesters have been killed and many injured. We hope the international community will hold Pakistan accountable for its misdeeds and abuses," said Ministry of External Affairs spokesperson Randhir Jaiswal during a press briefing. National Conference president Farooq Abdullah condemned the violence and demanded a probe by the United Nations into the incidents of atrocities.

Pakistan Foreign Office spokesperson Tahir Andrabi dismissed India's statements "in their entirety" and went on to state that "it is untenable" for a country like India which has "consistently denied the people of Jammu and Kashmir their right to self-determination to claim concerns over the rights of Kashmiris."

The unrest has also generated global outrage. Human rights groups such as Amnesty International stated that the regional administration's sweeping crackdown on protests is a continuation of the "alarming deterioration of human rights in the region".

On June 6, a group of nearly 30 British parliamentarians, in a letter to the U.K. Foreign Office, raised concerns over reports of communication disruptions, arrests, and "escalating tensions" in the PoK. They urged the British government to engage proactively and use diplomatic channels to encourage a peaceful de-escalation in the region.

14J6. Why are there protests in PoK?
पीओके में विरोध-प्रदर्शन क्यों हो रहे हैं?

What is the JAAC and why did it call for protests?
जेएएसी (JAAC) क्या है और इसने विरोध प्रदर्शन क्यों बुलाए?

- The **JAAC**, an umbrella organisation of various civil society groups, trade bodies, students organisations and socio-religious groups based in **PoK**, was formed in **2023**, out of protests against rising **electricity tariffs** and **inflation**.
  पीओके (PoK) में स्थित विभिन्न नागरिक समाज समूहों, व्यापारिक संगठनों, छात्र संगठनों और सामाजिक-

धार्मिक समूहों के एक छत्र संगठन **जेएएसी (JAAC)** का गठन **2023** में बढ़ती **बिजली दरों** और **महँगाई** के विरुद्ध हुए विरोध प्रदर्शनों से हुआ था।

- They brought out a **38-point Charter of Demands** which included access to subsidised **wheat flour**, fair electricity pricing based on hydropower generation costs from the local **Mangla Dam**, and the abolishment of the reservation of **12 seats** for refugees in PoK's **Legislative Assembly**.
  उन्होंने **38 सूत्रीय मांग-पत्र** प्रस्तुत किया, जिसमें रियायती **गेहूँ के आटे** की उपलब्धता, स्थानीय **मंगला बांध** से जलविद्युत उत्पादन लागत के आधार पर उचित बिजली मूल्य निर्धारण तथा पीओके की **विधानसभा** में शरणार्थियों के लिए आरक्षित **12 सीटों** को समाप्त करने की मांग शामिल थी।
- While the JAAC was given assurances regarding electricity tariffs, their "**non-fulfillment**" led to wider protests.
  यद्यपि जेएएसी को बिजली दरों के संबंध में आश्वासन दिए गए थे, किंतु उनके "**पूरा न होने**" के कारण व्यापक विरोध प्रदर्शन शुरू हो गए।
- In **May 2024**, the JAAC called for a march to **Muzaffarabad** over their demands, which led to the police arresting around **70 members** of the organisation.
  मई 2024 में जेएएसी ने अपनी मांगों को लेकर **मुजफ्फराबाद** तक मार्च का आह्वान किया, जिसके परिणामस्वरूप पुलिस ने संगठन के लगभग **70 सदस्यों** को गिरफ्तार कर लिया।
- Outrage against the arrests resulted in clashes between civilians and the police, leaving at least **four dead** and **hundreds injured**.
  गिरफ्तारियों के विरोध में नागरिकों और पुलिस के बीच झड़पें हुईं, जिनमें कम-से-कम **चार लोगों की मृत्यु** हो गई और **सैकड़ों लोग घायल** हुए।
- In the wake of this violence, **Pakistan Prime Minister Shehbaz Sharif** approved the grant of a **$86.25 million subsidy programme**.
  इस हिंसा के बाद **पाकिस्तान के प्रधानमंत्री शहबाज शरीफ** ने **8.625 करोड़ डॉलर के सब्सिडी कार्यक्रम** को मंजूरी दी।
- In **October 2025**, protests again emerged due to a breakdown of talks between officials and the JAAC.
  अक्टूबर 2025 में अधिकारियों और जेएएसी के बीच वार्ता विफल होने के कारण पुनः विरोध प्रदर्शन शुरू हुए।
- The ensuing violence killed at least **10 people**.
  इसके बाद हुई हिंसा में कम-से-कम **10 लोगों की मृत्यु** हो गई।
- The government then agreed to some demands which included providing compensation for those killed in the violence, releasing funds for the implementation of **health cards**, and issuing a grant of **PKR 10 billion** for the improvement of the electricity system.
  इसके बाद सरकार ने कुछ मांगें स्वीकार कर लीं, जिनमें हिंसा में मारे गए लोगों को मुआवजा देना, **हेल्थ कार्ड** योजना के क्रियान्वयन हेतु धन जारी करना तथा बिजली व्यवस्था में सुधार के लिए **10 अरब पाकिस्तानी रुपये (PKR 10 billion)** का अनुदान प्रदान करना शामिल था।
- While it was also decided that a **high-powered committee** comprising legal and constitutional experts would deliberate on the issue of members of the PoK Assembly, the central question remained unaddressed.
  यह भी तय किया गया कि विधिक और संवैधानिक विशेषज्ञों से युक्त एक **उच्चस्तरीय समिति** पीओके विधानसभा के सदस्यों से जुड़े मुद्दे पर विचार करेगी, किंतु मूल प्रश्न अब भी अनसुलझा रहा।

How did the situation escalate?
स्थिति कैसे गंभीर हुई?

- Elections to the regional government of **PoK** have been scheduled for **July 27**.
  पीओके की क्षेत्रीय सरकार के चुनाव **27 जुलाई** को निर्धारित किए गए हैं।
- The JAAC announced that they would take out a protest march to **Muzaffarabad**, calling for an end to the reservation of the **12 refugee seats**, on **June 9** — the same day on which the

filing of nominations for the elections was to begin.
जेएएसी ने घोषणा की कि वह **9 जून** को **मुजफ्फराबाद** तक विरोध मार्च निकालेगा और **12 शरणार्थी सीटों** के आरक्षण को समाप्त करने की मांग करेगा — यही वह दिन था जब चुनावों के लिए नामांकन प्रक्रिया प्रारंभ होनी थी।

- In an effort to nip the march in the bud, the regional authorities banned the **JAAC** under a **2014 anti-terrorism law** and placed a bounty for its most prominent leaders.
  मार्च को प्रारंभिक चरण में ही रोकने के प्रयास में क्षेत्रीय प्रशासन ने **2014 के आतंकवाद-निरोधी कानून** के अंतर्गत **जेएएसी** पर प्रतिबंध लगा दिया तथा उसके प्रमुख नेताओं पर इनाम घोषित कर दिया।
- They said the organisation had acted in a manner "**prejudicial to peace and security**" of the state.
  प्रशासन ने कहा कि संगठन ने राज्य की "**शांति और सुरक्षा के प्रतिकूल**" कार्य किया है।
- This led to widespread protests in various cities, particularly **Mirpur**, **Rawalakot** and **Muzaffarabad**, with police personnel clashing with civilian protesters.
  इसके परिणामस्वरूप विभिन्न शहरों, विशेषकर **मीरपुर**, **रावलाकोट** और **मुजफ्फराबाद** में व्यापक विरोध प्रदर्शन हुए, जहाँ पुलिसकर्मियों और नागरिक प्रदर्शनकारियों के बीच झड़पें हुईं।
- On **June 8**, at least **11 people**, including **four police officers**, were killed and dozens injured when regional authorities opened fire on activists and protesters gathered in **Rawalakot** for the funeral of a local trade activist who had been killed during an earlier protest.
  8 जून को कम-से-कम **11 लोगों**, जिनमें **चार पुलिस अधिकारी** भी शामिल थे, की मृत्यु हो गई और दर्जनों लोग घायल हो गए, जब क्षेत्रीय प्रशासन ने **रावलाकोट** में एक स्थानीय व्यापार कार्यकर्ता के अंतिम संस्कार में एकत्रित कार्यकर्ताओं और प्रदर्शनकारियों पर गोलीबारी की। वह कार्यकर्ता पहले हुए एक विरोध प्रदर्शन के दौरान मारा गया था।
- While the proscribed **JAAC** has called for strikes, leaving life paralysed in the streets of **Muzaffarabad**, many parts of the region continue to witness violent clashes, with reports indicating that the **death toll has crossed 30**.
  प्रतिबंधित **जेएएसी** ने हड़ताल का आह्वान किया है, जिससे **मुजफ्फराबाद** की सड़कों पर सामान्य जीवन ठप हो गया है, जबकि क्षेत्र के अनेक हिस्सों में हिंसक झड़पें जारी हैं और रिपोर्टों के अनुसार **मृतकों की संख्या 30 से अधिक** हो चुकी है।
- Regional authorities have deployed **paramilitary troops** in the region to restore law and order and have also issued a strict **travel advisory** urging visitors to avoid travelling to the region.
  कानून-व्यवस्था बहाल करने के लिए क्षेत्रीय प्रशासन ने **अर्द्धसैनिक बलों** को तैनात किया है तथा आगंतुकों से क्षेत्र की यात्रा न करने का आग्रह करते हुए कड़ी **यात्रा परामर्श (Travel Advisory)** भी जारी की है।
- Reports also say that **Internet** in the region has been severely restricted.
  रिपोर्टों के अनुसार क्षेत्र में **इंटरनेट सेवाओं** पर भी गंभीर प्रतिबंध लगाए गए हैं।

Why has the reservation of refugees become a flashpoint?
शरणार्थियों के आरक्षण का मुद्दा विवाद का प्रमुख केंद्र क्यों बन गया है?

- The political question regarding the **12 reserved refugee seats** is at the heart of the protests.
  12 आरक्षित शरणार्थी सीटों से जुड़ा राजनीतिक प्रश्न इन विरोध प्रदर्शनों के केंद्र में है।
- The regional Assembly of the **PoK** has a total of **53 seats**.
  पीओके (PoK) की क्षेत्रीय विधानसभा में कुल **53 सीटें** हैं।
- Of these, **45 seats** are directly elected by the public (**33** are elected by the general public while **12 seats** are reserved for refugees).
  इनमें से **45 सीटों** पर जनता द्वारा प्रत्यक्ष चुनाव होता है (**33 सीटें** सामान्य जनता द्वारा चुनी जाती हैं, जबकि **12 सीटें** शरणार्थियों के लिए आरक्षित हैं)।
- The remaining **eight seats** are reserved (**five for women, one for a technocrat, one for a religious scholar and one is a diaspora seat**) and are filled via nominations after the

general elections.
शेष **आठ सीटें** आरक्षित हैं (**पाँच महिलाओं के लिए, एक तकनीकी विशेषज्ञ के लिए, एक धार्मिक विद्वान के लिए तथा एक प्रवासी समुदाय के लिए**) और इन्हें आम चुनावों के बाद नामांकन के माध्यम से भरा जाता है।

- The **12 reserved seats** are for communities who migrated to Pakistan from **Jammu and Kashmir** during **Partition**.
  ये **12 आरक्षित सीटें** उन समुदायों के लिए हैं जो **विभाजन** के दौरान **जम्मू और कश्मीर** से पाकिस्तान चले गए थे।
- Over the years, these groups have integrated into Pakistani cities and polity.
  समय के साथ ये समूह पाकिस्तान के शहरों और राजनीतिक व्यवस्था में समाहित हो गए हैं।
- In fact, most of these **12 seats** have often been won by political parties such as the **Pakistan Peoples Party** or the **Pakistan Tehreek-e-Insaf**.
  वास्तव में, इन **12 सीटों** पर अक्सर **पाकिस्तान पीपुल्स पार्टी** या **पाकिस्तान तहरीक-ए-इंसाफ** जैसे राजनीतिक दलों की जीत होती रही है।
- As the journalist **Luv Puri** writes, "...the **12 refugee seats** account for around **4.36 lakh registered voters**, while the remaining **33 directly elected seats** in PoK have around **33 lakh voters**.
  जैसा कि पत्रकार **लव पुरी** लिखते हैं, "...**12 शरणार्थी सीटों** में लगभग **4.36 लाख पंजीकृत मतदाता** हैं, जबकि पीओके की शेष **33 प्रत्यक्ष निर्वाचित सीटों** में लगभग **33 लाख मतदाता** हैं।
- In effect, one refugee vote cast from Pakistan carries electoral weight far greater than that of a voter residing in PoK".
  व्यवहारिक रूप से, पाकिस्तान से डाला गया एक शरणार्थी मत, पीओके में रहने वाले एक मतदाता की तुलना में कहीं अधिक चुनावी महत्व रखता है।"
- **Pakistan** maintains that PoK, or what it calls '**Azad Jammu and Kashmir**', is an independent region with its own polity and that Pakistan supports its **right to self-determination**.
  पाकिस्तान का कहना है कि पीओके, जिसे वह '**आज़ाद जम्मू और कश्मीर**' कहता है, अपनी राजनीतिक व्यवस्था वाला एक स्वतंत्र क्षेत्र है और पाकिस्तान उसके **आत्मनिर्णय के अधिकार** का समर्थन करता है।
- At the same time, candidates who are elected to the regional Parliament have to sign loyalty oaths supporting the "cause of accession of the State of **Jammu and Kashmir** to **Pakistan**".
  साथ ही, क्षेत्रीय संसद के लिए निर्वाचित उम्मीदवारों को **जम्मू और कश्मीर** राज्य के **पाकिस्तान** में विलय के उद्देश्य का समर्थन करने वाली निष्ठा-शपथ पर हस्ताक्षर करने होते हैं।
- This has led to questions regarding the undue influence of **Islamabad** in the regional politics of PoK.
  इससे पीओके की क्षेत्रीय राजनीति में **इस्लामाबाद** के अनुचित प्रभाव को लेकर प्रश्न उठे हैं।
- In a further setback to such regional demands, on **June 7**, the **Supreme Court of PoK** observed that the **12 legislative seats** reserved for refugees are constitutionally protected and cannot be abolished through administrative or executive measures; only a **constitutional amendment** can fulfil the demand to abolish refugee representation.
  ऐसी क्षेत्रीय मांगों को एक और झटका देते हुए **7 जून** को **पीओके के सर्वोच्च न्यायालय** ने कहा कि शरणार्थियों के लिए आरक्षित **12 विधायी सीटें** संवैधानिक रूप से संरक्षित हैं और इन्हें प्रशासनिक अथवा कार्यकारी उपायों से समाप्त नहीं किया जा सकता; शरणार्थी प्रतिनिधित्व समाप्त करने की मांग केवल **संवैधानिक संशोधन** के माध्यम से ही पूरी की जा सकती है।

How have the Indian and Pakistani governments reacted?
भारतीय और पाकिस्तानी सरकारों ने कैसी प्रतिक्रिया दी है?

- On **June 9**, **India** asked the international community to hold **Pakistan** responsible for the civilian killings and human rights abuses in **PoK**.
  9 जून को **भारत** ने अंतरराष्ट्रीय समुदाय से **पीओके** में नागरिकों की हत्याओं और मानवाधिकार उल्लंघनों के लिए **पाकिस्तान** को उत्तरदायी ठहराने का आग्रह किया।

- "There are reports of severe police brutality in **Pakistan Occupied Kashmir** in which several protesters have been killed and many injured.
  "**पाकिस्तान अधिकृत कश्मीर** में गंभीर पुलिस अत्याचार की रिपोर्टें सामने आई हैं, जिनमें कई प्रदर्शनकारी मारे गए हैं और अनेक घायल हुए हैं।
- We hope the international community will hold **Pakistan** accountable for its misdeeds and abuses," said **Ministry of External Affairs** spokesperson **Randhir Jaiswal** during a press briefing.
  हमें आशा है कि अंतरराष्ट्रीय समुदाय **पाकिस्तान** को उसके कदाचारों और अत्याचारों के लिए उत्तरदायी ठहराएगा," यह बात **विदेश मंत्रालय** के प्रवक्ता **रणधीर जायसवाल** ने एक प्रेस ब्रीफिंग के दौरान कही।
- **National Conference** president **Farooq Abdullah** condemned the violence and demanded a probe by the **United Nations** into the incidents of atrocities.
  नेशनल कॉन्फ्रेंस के अध्यक्ष **फारूक अब्दुल्ला** ने हिंसा की निंदा की और अत्याचारों की घटनाओं की **संयुक्त राष्ट्र** द्वारा जांच की मांग की।
- **Pakistan Foreign Office** spokesperson **Tahir Andrabi** dismissed India's statements "in their entirety" and went on to state that "it is untenable" for a country like **India** which has "consistently denied the people of **Jammu and Kashmir** their right to self-determination to claim concerns over the rights of Kashmiris."
  पाकिस्तान विदेश कार्यालय के प्रवक्ता **ताहिर अंद्राबी** ने भारत के बयानों को "पूर्णतः" खारिज करते हुए कहा कि **भारत** जैसे देश के लिए, जिसने "लगातार **जम्मू और कश्मीर** के लोगों को आत्मनिर्णय के अधिकार से वंचित किया है", कश्मीरियों के अधिकारों को लेकर चिंता व्यक्त करना "अस्वीकार्य" है।
- The unrest has also generated global outrage.
  इस अशांति ने वैश्विक स्तर पर भी आक्रोश उत्पन्न किया है।
- Human rights groups such as **Amnesty International** stated that the regional administration's sweeping crackdown on protests is a continuation of the "**alarming deterioration of human rights** in the region".
  एमनेस्टी इंटरनेशनल जैसे मानवाधिकार संगठनों ने कहा कि विरोध प्रदर्शनों पर क्षेत्रीय प्रशासन की व्यापक कार्रवाई क्षेत्र में "**मानवाधिकारों की चिंताजनक गिरावट**" की निरंतरता है।
- On **June 6**, a group of nearly **30 British parliamentarians**, in a letter to the **U.K. Foreign Office**, raised concerns over reports of communication disruptions, arrests, and "**escalating tensions**" in the PoK.
  6 जून को लगभग **30 ब्रिटिश सांसदों** के एक समूह ने **यू.के. विदेश कार्यालय** को लिखे पत्र में पीओके में संचार व्यवधान, गिरफ्तारियों और "**बढ़ते तनाव**" की रिपोर्टों पर चिंता व्यक्त की।
- They urged the British government to engage proactively and use diplomatic channels to encourage a peaceful de-escalation in the region.
  उन्होंने ब्रिटिश सरकार से सक्रिय रूप से हस्तक्षेप करने तथा क्षेत्र में शांतिपूर्ण तनाव-नियंत्रण को प्रोत्साहित करने हेतु कूटनीतिक माध्यमों का उपयोग करने का आग्रह किया।

PM Modi's Europe visit begins in Nice, with tech, bilateral relations in focus

GS II: IR

Sriram Lakshman
LONDON

Prime Minister Narendra Modi arrived in Nice on Saturday evening, the first stop on his six-day tour of France and Slovakia. The Prime Minister's visit to the French Riviera revolves around a tech summit, Bharat Innovates 2026, on Sunday, which he will inaugurate with French President Emmanuel Macron.

The tech event, as per the government, is aimed at bringing together deep-tech ventures and higher education institutes from India, among others, to explore cooperation in research and co-development, investment and technology transfer.

Following the event, Mr. Modi and Mr. Macron will lead bilateral discussions between the two sides which are expected to cover a broad range of subjects including defence, tech, regional and global issues.

It is expected that the U.S. and Israel conflict with Iran will be discussed between the sides, with U.S. President Donald Trump saying a settlement was due to be signed on Sunday.

India and France had formally elevated their partnership to a 'Special Global Strategic Partnership' in February this year and announced that 2026 was the India-France Year of Innovation.

Narendra Modi

Mr. Modi will travel to Slovakia on Sunday evening and return to France for the G7 Summit in the alpine resort of Évian-les-Bains. India has been invited as an outreach partner, along with other countries. At Évian, there is a possibility of a bilateral meeting with Mr. Trump. Following the G7 Summit, Mr. Modi will arrive in Paris for another tech focused event, VivaTech on June 18. India is the AI Country Partner for the event which is held annually.

The PM's arrival in France was foreshadowed by rising tensions between India and the United States after an attack by U.S. forces killed three Indian seafarers off the coast of Oman.

"In addition to Nice, this France visit includes programmes in Evian and Paris. There will be bilateral and multilateral meetings, which will be aimed at improving India's friendship with key development partners," Mr. Modi wrote on X, shortly after landing in France.

पीएम मोदी की यूरोप यात्रा नीस से शुरू, तकनीक और द्विपक्षीय संबंधों पर रहेगा फोकस

- Prime Minister Narendra Modi arrived in Nice on Saturday evening, the first stop on his six-day tour of France and Slovakia.
  प्रधानमंत्री नरेंद्र मोदी शनिवार शाम नीस पहुंचे, जो उनकी फ्रांस और स्लोवाकिया की छह दिवसीय यात्रा का पहला पड़ाव है।
- The Prime Minister's visit to the French Riviera revolves around a tech summit, Bharat Innovates 2026, on Sunday, which he will inaugurate with French President Emmanuel Macron.
  प्रधानमंत्री की फ्रेंच रिवेरा यात्रा का केंद्र रविवार को होने वाला तकनीकी शिखर सम्मेलन भारत इनोवेट्स 2026 है, जिसका उद्घाटन वह फ्रांसीसी राष्ट्रपति इमैनुएल मैक्रों के साथ करेंगे।
- The tech event, as per the government, is aimed at bringing together deep-tech ventures and higher education institutes from India, among others, to explore cooperation in research and co-development, investment and technology transfer.
  सरकार के अनुसार, इस तकनीकी कार्यक्रम का उद्देश्य भारत सहित विभिन्न देशों के डीप-टेक उपक्रमों और उच्च शिक्षा संस्थानों को एक साथ लाना है, ताकि अनुसंधान एवं सह-विकास, निवेश और प्रौद्योगिकी हस्तांतरण में सहयोग की संभावनाओं का पता लगाया जा सके।
- Following the event, Mr. Modi and Mr. Macron will lead bilateral discussions between the two sides which are expected to cover a broad range of subjects including defence, tech, regional and global issues.

कार्यक्रम के बाद श्री मोदी और श्री मैक्रों दोनों देशों के बीच द्विपक्षीय वार्ता का नेतृत्व करेंगे, जिसमें रक्षा, प्रौद्योगिकी, क्षेत्रीय और वैश्विक मुद्दों सहित अनेक विषयों पर चर्चा होने की उम्मीद है।

- It is expected that the U.S. and Israel conflict with Iran will be discussed between the sides, with U.S. President Donald Trump saying a settlement was due to be signed on Sunday.
  यह अपेक्षा की जा रही है कि अमेरिका और इज़राइल का ईरान के साथ संघर्ष भी दोनों पक्षों के बीच चर्चा का विषय बनेगा, जबकि अमेरिकी राष्ट्रपति डोनाल्ड ट्रंप ने कहा है कि एक समझौते पर रविवार को हस्ताक्षर होने वाले हैं।
- India and France had formally elevated their partnership to a 'Special Global Strategic Partnership' in February this year and announced that 2026 was the India-France Year of Innovation.
  भारत और फ्रांस ने इस वर्ष फरवरी में अपने संबंधों को औपचारिक रूप से 'विशेष वैश्विक रणनीतिक साझेदारी' के स्तर तक बढ़ाया था और घोषणा की थी कि 2026 को भारत-फ्रांस नवाचार वर्ष के रूप में मनाया जाएगा।
- Mr. Modi will travel to Slovakia on Sunday evening and return to France for the G7 Summit in the alpine resort of Évian-les-Bains.
  श्री मोदी रविवार शाम स्लोवाकिया जाएंगे और उसके बाद फ्रांस लौटकर अल्पाइन रिसॉर्ट एवियां-ले-बैं में होने वाले G7 शिखर सम्मेलन में भाग लेंगे।
- India has been invited as an outreach partner, along with other countries.
  भारत को अन्य देशों के साथ एक आउटरीच पार्टनर के रूप में आमंत्रित किया गया है।
- At Évian, there is a possibility of a bilateral meeting with Mr. Trump.
  एवियां में श्री ट्रंप के साथ द्विपक्षीय बैठक की संभावना है।
- Following the G7 Summit, Mr. Modi will arrive in Paris for another tech focused event, VivaTech on June 18.
  G7 शिखर सम्मेलन के बाद श्री मोदी 18 जून को एक अन्य तकनीक-केंद्रित कार्यक्रम वीवाटेक में भाग लेने के लिए पेरिस पहुंचेंगे।
- India is the AI Country Partner for the event which is held annually.
  भारत इस वार्षिक कार्यक्रम का एआई कंट्री पार्टनर है।

@thehindu.co.in

The temperate climate and fertile soil of Kashmir provides an ideal environment for floriculture, particularly for the cultivation of the highly aromatic Damask rose.

Rose farming is a seasonal labour of love and requires the harvest of petals in spring and early summer when the blossoms yield their highest concentration of complex fragrance and essential oils.

Once harvested, these pristine petals are immediately channelled into two traditional products of rose water – *Ark-e-Gulab* and *Gulkand*.

Rose water is prepared using traditional steam distillation. Petals are simmered in large copper stills, and the condensed vapour creates a pure, therapeutic hydrosol used widely in culinary dishes, cosmetics, and religious rituals.

Gulkand is a rich, sweet preserve made by layering fresh rose petals with sugar in airtight glass jars.

The mixture is slow-cured under the natural warmth of the sun for several weeks. This gentle sun-cooking process allows the natural juices to ferment softly with the sugar, transforming the petals into a thick, cooling jam celebrated in Ayurvedic traditions for its digestive benefits.

Local entrepreneurs like Shireen Manhas are instrumental in bridging the gap between these age-old agricultural traditions and modern, premium markets. By establishing structured agro-ventures, Ms. Manhas and fellow innovators empower local farmers, particularly women, through sustainable employment.

Their enterprises focus on maintaining absolute purity – avoiding synthetic additives – while utilising contemporary packaging and supply chains.

This modern entrepreneurial approach not only preserves Kashmir's delicate horticultural heritage but also elevates its organic rose water and *Gulkand* to a competitive luxury status globally.

Purest drops: A worker collects the distillate in Sirhama, Anantnag district.

14J6. Scented by tradition
परंपरा की सुगंध से महकता हुआ

- **Rose farming** is a labour of love, and there is no better canvas for these delicate pink blooms than **Kashmir** where the journey from blossom to by-product is a celebrated tradition, deeply rooted in the heart of the region's local communities.
  गुलाब की खेती प्रेम और समर्पण का कार्य है, और इन नाजुक गुलाबी फूलों के लिए **कश्मीर** से बेहतर स्थान कोई नहीं, जहाँ फूल से उत्पाद बनने तक की यात्रा एक सम्मानित परंपरा है, जो स्थानीय समुदायों के जीवन में गहराई से रची-बसी है।
- The temperate climate and fertile soil of **Kashmir** provides an ideal environment for **horticulture**, particularly for the cultivation of the highly aromatic **Damask rose**.
  कश्मीर की समशीतोष्ण जलवायु और उपजाऊ मिट्टी **पुष्पकृषि (Floriculture)** के लिए आदर्श वातावरण प्रदान करती है, विशेष रूप से अत्यधिक सुगंधित **डैमास्क गुलाब** की खेती के लिए।
- **Rose farming** is a seasonal labour of love and requires the harvest of petals in spring and early summer when the blossoms yield their highest concentration of complex fragrance and **essential oils**.
  गुलाब की खेती एक मौसमी परिश्रमपूर्ण कार्य है और इसमें वसंत तथा शुरुआती ग्रीष्म ऋतु में पंखुड़ियों की कटाई की जाती है, जब फूलों में जटिल सुगंध और **आवश्यक तेलों (Essential Oils)** की मात्रा सबसे अधिक होती है।
- Once harvested, these pristine petals are immediately channelled into two traditional products of rose water — **Ark-e-Gulab** and **Gulkand**.
  कटाई के बाद इन शुद्ध पंखुड़ियों का तुरंत गुलाब जल से बने दो पारंपरिक उत्पादों — **अर्क-ए-गुलाब** और **गुलकंद** — के निर्माण में उपयोग किया जाता है।
- **Rose water** is prepared using traditional **steam distillation**.
  गुलाब जल पारंपरिक **भाप आसवन (Steam Distillation)** विधि से तैयार किया जाता है।
- Petals are simmered in large copper stills, and the condensed vapour creates a pure, therapeutic **hydrosol** used widely in culinary dishes, cosmetics, and religious rituals.
  पंखुड़ियों को बड़े तांबे के पात्रों में उबाला जाता है, और संघनित भाप से एक शुद्ध एवं चिकित्सीय **हाइड्रोसोल** बनता है, जिसका व्यापक उपयोग भोजन, सौंदर्य प्रसाधनों और धार्मिक अनुष्ठानों में किया जाता है।
- **Gulkand** is a rich, sweet preserve made by layering fresh rose petals with sugar in airtight glass jars.
  गुलकंद एक समृद्ध और मीठा संरक्षित खाद्य पदार्थ है, जिसे ताज़ी गुलाब की पंखुड़ियों और चीनी की परतें बनाकर वायुरुद्ध काँच के जारों में तैयार किया जाता है।
- The mixture is slow-cured under the natural warmth of the sun for several weeks.
  इस मिश्रण को कई सप्ताह तक सूर्य की प्राकृतिक गर्माहट में धीरे-धीरे परिपक्व किया जाता है।
- This gentle sun-cooking process allows the natural juices to ferment softly with the sugar, transforming the petals into a thick, cooling jam celebrated in **Ayurvedic traditions** for its digestive benefits.
  यह सौम्य सूर्य-पाक प्रक्रिया प्राकृतिक रसों को चीनी के साथ धीरे-धीरे किण्वित होने देती है, जिससे पंखुड़ियाँ एक गाढ़े और शीतल जैम में बदल जाती हैं, जिसे **आयुर्वेदिक परंपराओं** में पाचन संबंधी लाभों के लिए सराहा जाता है।
- Local entrepreneurs like **Shireen Manhas** are instrumental in bridging the gap between these age-old agricultural traditions and modern, premium markets.
  शिरीन मनहास जैसी स्थानीय उद्यमी इन प्राचीन कृषि परंपराओं और आधुनिक प्रीमियम बाज़ारों के बीच की दूरी को कम करने में महत्वपूर्ण भूमिका निभा रही हैं।
- By establishing structured **agro-ventures**, Ms. Manhas and fellow innovators empower local farmers, particularly women, through sustainable employment.

संगठित **कृषि-उद्यमों (Agro-Ventures)** की स्थापना करके, सुश्री मनहास और अन्य नवप्रवर्तक स्थानीय किसानों, विशेषकर महिलाओं, को सतत रोजगार के माध्यम से सशक्त बना रहे हैं।

- Their enterprises focus on maintaining absolute purity — avoiding **synthetic additives** — while utilising contemporary packaging and supply chains.
  उनके उद्यम पूर्ण शुद्धता बनाए रखने पर ध्यान केंद्रित करते हैं — **कृत्रिम योजकों (Synthetic Additives)** से बचते हुए — तथा आधुनिक पैकेजिंग और आपूर्ति श्रृंखलाओं का उपयोग करते हैं।
- This modern entrepreneurial approach not only preserves **Kashmir's** delicate horticultural heritage but also elevates its organic **rose water** and **Gulkand** to a competitive luxury status globally.
  यह आधुनिक उद्यमशील दृष्टिकोण न केवल **कश्मीर** की नाजुक बागवानी विरासत को संरक्षित करता है, बल्कि उसके जैविक **गुलाब जल** और **गुलकंद** को वैश्विक स्तर पर प्रतिस्पर्धी विलासिता उत्पादों का दर्जा भी दिलाता है।

PATRIOTIC IAS

Why is the Zojila tunnel a game changer?

Why is the tunnel an engineering marvel and what were the challenges in building it? How does it improve connectivity and ensure travellers' safety? How does it provide strategic access in the border region? When will it open for civilian traffic?

GS III: Economy

Peerzada Ashiq

The story so far:

The world's longest high-altitude tunnel, spanning 13.14 kilometres at an altitude of 11,578 feet, achieved a breakthrough on June 9, 2026. Built at a cost of ₹6,800 crore, the Zojila tunnel will provide all-weather connectivity between the Kashmir Valley and Ladakh, traversing a region that was long considered to be formidable in the Himalayas. Union Minister for Road Transport and Highways Nitin Gadkari, who pressed the blast button for the 2.5 metre-long last leg, termed the breakthrough "a historic day for India's infrastructure development and a milestone in India's technical expertise, engineering prowess, and indomitable resolve".

What makes the Zojila tunnel an engineering marvel?

Zojila tunnel is India's first longest single-tube bi-directional tunnel and an engineering marvel for several reasons. The underground works were highly challenging due to the difficult terrain. The western Himalayan range around the Zojila Pass has been daunting for engineers and planners, with the fragile geology, sensitive rock formations, avalanche-prone terrain, and harsh winter conditions all complicating the execution of the project.

The Zojila tunnel is expected to provide year-long transportation access to the Indian forces stationed in Ladakh

The Zojila tunnel connects Sonamarg's Baltal in central Kashmir's Ganderbal district with Meenamarg in Ladakh's Drass district. To ensure safe passage up to the mouth of the Zojila tunnel at Baltal, additional roadways, three bridges, and two tunnels were constructed over a stretch of 31 km in Sonamarg. These were designed to withstand the vagaries of winter, as avalanches and snow slides are often reported in the area.

It is a combined system of tunnels and roadways that forms a comprehensive corridor between the Union Territories of Jammu and Kashmir and Ladakh. The tunnel is equipped with catch dams, protection walls, and deflector dams over a 6-km stretch for protection from snowstorms. It will have automatic and emergency lighting, emergency phone, message signalling, and radio to ensure travellers' safety.

(R-L): J&K LG Manoj Sinha with Union Minister Nitin Gadkari and Chief Minister Omar Abdullah at the breakthrough ceremony of Zojila tunnel, in Ladakh. PTI

Why is this a memorable project for engineers?

The tunnel was dug in extreme weather conditions, with temperatures dropping to minus 20 degrees Celsius on the Kashmir side and minus 30 degrees Celsius on the Drass side. Official estimates suggested that extreme weather conditions were prevalent for nearly 100 days a year. Then, there were avalanche risks: five major avalanches left two workers dead and over 172 workers stranded and later rescued. Snow accumulation was dealt with by a fleet of small and large snow blowers. Officials said the rock classification also changed 67 times across the 13-km stretch, "shifting constantly between good and poor formations."

Why is the tunnel significant for strategic connectivity?

India has witnessed repeated military confrontations with China and Pakistan since 1947, particularly in the regions of Ladakh and Kashmir, most notably in 1962 and 1999. India's full-scale military response was always hampered by lack of connectivity and poor mobility of men and material in the region, both along the Line of Control in the west and the Line of Actual Control in the east. Officials believe that restricted movement of military vehicles led to delays. The Zojila tunnel is now expected to provide year-long transportation access to the Indian forces stationed in Ladakh, significantly improving mobility, logistics reliability, and strategic access in the border region. This is why Mr. Gadkari described it as "a game changer from a security perspective and the perspective of national integration".

What does it means for locals?

Ladakh has always been cut off from the Kashmir Valley during winters. Heavy snow and landslides would often close the Zojila Pass for 4-6 months. There have also been frequent reports of commuter deaths on the Zojila Pass due to landslides triggered by rains and avalanches occurring during sunny winters. All this resulted in severe hardships for patients and students in the Kargil-Drass range. Stocks would deplete, but the problem could not be attended to because of road closure. Locals relied on sun-dried vegetables and cereals during winters. Now, the is expected to be movement of people and goods and no more weather-related isolation for the region. Additionally, the tunnel will put a spotlight on activities such as adventure tourism and skiing in Drass, which will contribute to the economy.

When will the tunnel open for civilians?

In spite of the breakthrough, the tunnel is likely to take two years to be fully functional. Water seepage, benching, and electronic layouts are still being worked out. However, officials said the tunnel could be thrown open in case of emergencies, especially to security forces.

The tunnel will also help pilgrims on the Amarnath Yatra, whose base camp is in Baltal. Officials said vehicles can travel at a speed of 80 km per hour through the tunnel. Earlier, drivers could not drive more than 30-40 km per hour on the Zojila Pass, because of steep roads and hair-pin curves.

Officials said the project is moving closer to its long-envisioned goal of seamless all-weather connectivity that will spur long-term benefits in terms of mobility, economic integration, and strategic resilience.

14J6. Why is the Zojila tunnel a game changer?
ज़ोजिला सुरंग को गेम चेंजर क्यों माना जा रहा है?

What makes the Zojila tunnel an engineering marvel?
जोजिला सुरंग को इंजीनियरिंग का चमत्कार क्या बनाता है?

- The world's longest **high-altitude tunnel**, spanning **13.14 kilometres** at an altitude of **11,578 feet**, achieved a breakthrough on **June 9, 2026**.
  11,578 फीट की ऊँचाई पर स्थित विश्व की सबसे लंबी **उच्च-ऊंचाई सुरंग**, जिसकी लंबाई **13.14 किलोमीटर** है, ने **9 जून 2026** को महत्वपूर्ण सफलता प्राप्त की।
- Built at a cost of **₹6,800 crore**, the **Zojila tunnel** will provide all-weather connectivity between the **Kashmir Valley** and **Ladakh**, traversing a region that was long considered to be formidable in the Himalayas.
  ₹6,800 करोड़ की लागत से निर्मित **जोजिला सुरंग**, **कश्मीर घाटी** और **लद्दाख** के बीच सभी मौसमों में संपर्क उपलब्ध कराएगी तथा हिमालय के उस क्षेत्र से होकर गुजरती है जिसे लंबे समय तक अत्यंत दुर्गम माना जाता था।
- Union Minister for **Road Transport and Highways Nitin Gadkari**, who pressed the blast button for the **2.5 metre-long last leg**, termed the breakthrough "a historic day for India's infrastructure development and a milestone in India's technical expertise, engineering prowess, and indomitable resolve".

सड़क परिवहन एवं राजमार्ग मंत्री नितिन गडकरी, जिन्होंने अंतिम **2.5 मीटर** भाग के लिए विस्फोट बटन दबाया, ने इस उपलब्धि को "भारत के अवसंरचना विकास के लिए ऐतिहासिक दिन तथा भारत की तकनीकी विशेषज्ञता, इंजीनियरिंग क्षमता और अदम्य संकल्प का मील का पत्थर" बताया।

- **Zojila tunnel** is India's first longest **single-tube bi-directional tunnel** and an engineering marvel for several reasons.
  जोजिला सुरंग भारत की पहली सबसे लंबी **एकल-ट्यूब द्विदिशीय सुरंग** है और अनेक कारणों से इंजीनियरिंग का अद्भुत उदाहरण है।
- The underground works were highly challenging due to the difficult terrain.
  कठिन भू-भाग के कारण भूमिगत निर्माण कार्य अत्यंत चुनौतीपूर्ण थे।
- The western **Himalayan range** around the **Zojila Pass** has been daunting for engineers and planners, with the fragile geology, sensitive rock formations, avalanche-prone terrain, and harsh winter conditions all complicating the execution of the project.
  जोजिला दर्रे के आसपास की पश्चिमी **हिमालयी श्रृंखला** इंजीनियरों और योजनाकारों के लिए चुनौतीपूर्ण रही है, क्योंकि नाजुक भूगर्भीय संरचना, संवेदनशील चट्टानी संरचनाएँ, हिमस्खलन-प्रवण क्षेत्र तथा कठोर शीतकालीन परिस्थितियों ने परियोजना के क्रियान्वयन को जटिल बना दिया।
- The **Zojila tunnel** connects **Sonamarg's Baltal** in central Kashmir's **Ganderbal district** with **Meenamarg** in Ladakh's **Drass district**.
  जोजिला सुरंग मध्य कश्मीर के **गांदरबल जिले** में स्थित **सोनमर्ग के बालटाल** को लद्दाख के **द्रास जिले** के **मीनामार्ग** से जोड़ती है।
- To ensure safe passage up to the mouth of the **Zojila tunnel** at Baltal, additional roadways, **three bridges**, and **two tunnels** were constructed over a stretch of **31 km** in Sonamarg.
  बालटाल स्थित **जोजिला सुरंग** के प्रवेश द्वार तक सुरक्षित आवागमन सुनिश्चित करने के लिए सोनमर्ग में **31 किलोमीटर** के क्षेत्र में अतिरिक्त सड़कें, **तीन पुल** और **दो सुरंगें** निर्मित की गईं।
- These were designed to withstand the vagaries of winter, as avalanches and snow slides are often reported in the area.
  इन्हें शीतकालीन प्रतिकूल परिस्थितियों का सामना करने हेतु डिजाइन किया गया, क्योंकि इस क्षेत्र में अक्सर हिमस्खलन और बर्फ खिसकने की घटनाएँ होती हैं।
- It is a combined system of tunnels and roadways that forms a comprehensive corridor between the **Union Territories of Jammu and Kashmir and Ladakh**.
  यह सुरंगों और सड़कों की एक संयुक्त प्रणाली है जो **जम्मू-कश्मीर और लद्दाख केंद्रशासित प्रदेशों** के बीच एक व्यापक गलियारा बनाती है।
- The tunnel is equipped with **catch dams, protection walls, and deflector dams** over a **6-km stretch** for protection from snowstorms.
  यह सुरंग हिम-तूफानों से सुरक्षा के लिए **6 किलोमीटर** क्षेत्र में **कैच डैम, सुरक्षा दीवारों और डिफ्लेक्टर डैमों** से सुसज्जित है।
- It will have **automatic and emergency lighting, emergency phone, message signalling, and radio** to ensure travellers' safety.
  यात्रियों की सुरक्षा सुनिश्चित करने के लिए इसमें **स्वचालित एवं आपातकालीन प्रकाश व्यवस्था, आपातकालीन फोन, संदेश संकेत प्रणाली तथा रेडियो सुविधा** उपलब्ध होगी।

Why is this a memorable project for engineers?
यह परियोजना इंजीनियरों के लिए यादगार क्यों है?

- The tunnel was dug in **extreme weather conditions**, with temperatures dropping to **minus 20 degrees Celsius** on the Kashmir side and **minus 30 degrees Celsius** on the Drass side.
  यह सुरंग **अत्यधिक प्रतिकूल मौसम परिस्थितियों** में खोदी गई, जहाँ कश्मीर की ओर तापमान **माइनस 20 डिग्री सेल्सियस** और द्रास की ओर **माइनस 30 डिग्री सेल्सियस** तक गिर जाता था।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Official estimates suggested that extreme weather conditions were prevalent for nearly **100 days a year**.
  आधिकारिक अनुमानों के अनुसार ऐसी प्रतिकूल मौसम स्थितियाँ वर्ष में लगभग **100 दिनों** तक बनी रहती थीं।
- Then, there were **avalanche risks**: five major avalanches left **two workers dead** and over **172 workers stranded and later rescued**.
  इसके अतिरिक्त **हिमस्खलन का खतरा** भी था; पाँच बड़े हिमस्खलनों में **दो श्रमिकों की मृत्यु** हो गई तथा **172 से अधिक श्रमिक फँस गए**, जिन्हें बाद में बचाया गया।
- Snow accumulation was dealt with by a fleet of small and large **snow blowers**.
  बर्फ के जमाव से निपटने के लिए छोटे और बड़े **स्नो ब्लोअर्स** के बेड़े का उपयोग किया गया।
- Officials said the **rock classification** also changed **67 times** across the **13-km stretch**, "shifting constantly between good and poor formations."
  अधिकारियों ने बताया कि **13 किलोमीटर** के क्षेत्र में **चट्टानों का वर्गीकरण 67 बार** बदला, जो लगातार अच्छी और खराब संरचनाओं के बीच परिवर्तित होता रहा।

Why is the tunnel significant for strategic connectivity?
रणनीतिक संपर्क के लिए यह सुरंग क्यों महत्वपूर्ण है?

- **India** has witnessed repeated military confrontations with **China** and **Pakistan** since **1947**, particularly in the regions of **Ladakh** and **Kashmir**, most notably in **1962** and **1999**.
  भारत ने **1947** के बाद से **चीन** और **पाकिस्तान** के साथ कई सैन्य संघर्ष देखे हैं, विशेषकर **लद्दाख** और **कश्मीर** क्षेत्रों में, जिनमें **1962** और **1999** के संघर्ष विशेष रूप से उल्लेखनीय हैं।
- India's full-scale military response was always hampered by lack of connectivity and poor mobility of men and material in the region, both along the **Line of Control (LoC)** in the west and the **Line of Actual Control (LAC)** in the east.
  भारत की व्यापक सैन्य प्रतिक्रिया हमेशा संपर्क की कमी और सैनिकों तथा सैन्य सामग्री की सीमित आवाजाही के कारण प्रभावित रही, चाहे पश्चिम में **नियंत्रण रेखा (LoC)** हो या पूर्व में **वास्तविक नियंत्रण रेखा (LAC)**।
- Officials believe that restricted movement of military vehicles led to delays.
  अधिकारियों का मानना है कि सैन्य वाहनों की सीमित आवाजाही के कारण विलंब होता था।
- The **Zojila tunnel** is now expected to provide year-long transportation access to the Indian forces stationed in **Ladakh**, significantly improving mobility, logistics reliability, and strategic access in the border region.
  अब **जोजिला सुरंग** से **लद्दाख** में तैनात भारतीय सेनाओं को पूरे वर्ष परिवहन सुविधा उपलब्ध होने की उम्मीद है, जिससे गतिशीलता, रसद विश्वसनीयता और सीमा क्षेत्र में रणनीतिक पहुँच में उल्लेखनीय सुधार होगा।
- This is why Mr. **Gadkari** described it as "a game changer from a security perspective and the perspective of national integration".
  इसी कारण श्री **गडकरी** ने इसे "सुरक्षा और राष्ट्रीय एकीकरण के दृष्टिकोण से गेम चेंजर" बताया।

What does it means for locals?
स्थानीय लोगों के लिए इसका क्या महत्व है?

- **Ladakh** has always been cut off from the **Kashmir Valley** during winters.
  लद्दाख सर्दियों के दौरान हमेशा **कश्मीर घाटी** से कट जाता था।
- Heavy snow and landslides would often close the **Zojila Pass** for **4-6 months**.
  भारी बर्फबारी और भूस्खलन के कारण **जोजिला दर्रा** अक्सर **4 से 6 महीनों** तक बंद रहता था।
- There have also been frequent reports of commuter deaths on the **Zojila Pass** due to landslides triggered by rains and avalanches occurring during sunny winters.
  बारिश से उत्पन्न भूस्खलन और धूप वाले शीतकाल में होने वाले हिमस्खलनों के कारण **जोजिला दर्रे** पर यात्रियों की मृत्यु की घटनाएँ भी बार-बार सामने आती रही हैं।

- All this resulted in severe hardships for patients and students in the **Kargil-Drass** range.
  इन परिस्थितियों के कारण **कारगिल-द्रास** क्षेत्र के मरीजों और विद्यार्थियों को गंभीर कठिनाइयों का सामना करना पड़ता था।
- Stocks would deplete, but the problem could not be attended to because of road closure.
  भंडार समाप्त हो जाते थे, किंतु सड़कें बंद होने के कारण समस्या का समाधान नहीं हो पाता था।
- Locals relied on **sun-dried vegetables and cereals** during winters.
  स्थानीय लोग सर्दियों में **धूप में सुखाई गई सब्जियों और अनाजों** पर निर्भर रहते थे।
- Now, there is expected to be movement of people and goods and no more weather-related isolation for the region.
  अब लोगों और वस्तुओं की निरंतर आवाजाही होने की संभावना है तथा क्षेत्र को मौसमजनित अलगाव का सामना नहीं करना पड़ेगा।
- Additionally, the tunnel will put a spotlight on activities such as **adventure tourism** and **skiing** in **Drass**, which will contribute to the economy.
  इसके अतिरिक्त, यह सुरंग **द्रास** में **एडवेंचर पर्यटन** और **स्कीइंग** जैसी गतिविधियों को बढ़ावा देगी, जिससे स्थानीय अर्थव्यवस्था को लाभ होगा।

When will the tunnel open for civilians?
सुरंग आम नागरिकों के लिए कब खुलेगी?

- In spite of the breakthrough, the tunnel is likely to take **two years** to be fully functional.
  महत्वपूर्ण सफलता प्राप्त होने के बावजूद सुरंग को पूर्ण रूप से चालू होने में लगभग **दो वर्ष** लग सकते हैं।
- **Water seepage, benching, and electronic layouts** are still being worked out.
  जल रिसाव, बेंचिंग तथा इलेक्ट्रॉनिक व्यवस्थाओं पर अभी भी कार्य जारी है।
- However, officials said the tunnel could be thrown open in case of emergencies, especially to **security forces**.
  हालाँकि अधिकारियों ने कहा कि आपातकालीन परिस्थितियों में, विशेष रूप से **सुरक्षा बलों** के लिए, सुरंग को खोला जा सकता है।
- The tunnel will also help pilgrims on the **Amarnath Yatra**, whose base camp is in **Baltal**.
  यह सुरंग **अमरनाथ यात्रा** के श्रद्धालुओं के लिए भी सहायक होगी, जिनका आधार शिविर **बालटाल** में स्थित है।
- Officials said vehicles can travel at a speed of **80 km per hour** through the tunnel.
  अधिकारियों के अनुसार वाहन सुरंग के भीतर **80 किलोमीटर प्रति घंटा** की गति से चल सकेंगे।
- Earlier, drivers could not drive more than **30-40 km per hour** on the **Zojila Pass**, because of steep roads and hair-pin curves.
  पहले चालक **जोजिला दर्रे** पर तीव्र ढलानों और हेयर-पिन मोड़ों के कारण **30-40 किलोमीटर प्रति घंटा** से अधिक गति से वाहन नहीं चला सकते थे।
- Officials said the project is moving closer to its long-envisioned goal of **seamless all-weather connectivity** that will spur long-term benefits in terms of **mobility, economic integration, and strategic resilience**.
  अधिकारियों ने कहा कि यह परियोजना **सभी मौसमों में निर्बाध संपर्क** के अपने दीर्घकालिक लक्ष्य के और निकट पहुँच रही है, जिससे **गतिशीलता, आर्थिक एकीकरण और रणनीतिक मजबूती** के क्षेत्र में दीर्घकालिक लाभ प्राप्त होंगे।

Anomaly in PSLV detected and resolved: Jitendra

GS III: S&T

Hemanth C.S.
BENGALURU

Union Minister of State for Science and Technology Jitendra Singh on Saturday said that the anomaly in the Polar Satellite Launch Vehicle (PSLV) had been resolved.

Dr. Singh said on the sidelines of the Research, Industry, Start-up and Entrepreneurship (RISE) Conclave 2026 in Bengaluru, that a national-level expert committee constituted to review the reason for the anomaly had submitted its report and the problem had been detected.

"The report has come out and the anomaly has been detected. However we cannot share that [reason for the anomaly] on a public platform. But experts are working on it, which has been resolved and very soon we will be back on track," Dr. Singh said replying to a query by *The Hindu*.

The PSLV, which is referred to as the workhorse of the Indian Space Research Organisation (ISRO), had suffered two back-to-back setbacks.

On January 12, 2026, the PSLV-C62 mission carrying the EOS-N1 earth observation satellite failed to finish its intended trajectory after an anomaly was detected during the end of the third stage of the launch vehicle.

On May 18, 2025, while the ISRO attempted to launch the EOS-09 satellite aboard the PSLV-C61 mission, it couldn't complete it.

Jitendra Singh

It was also due to an anomaly in the third stage of the rocket.

Following this a national-level expert committee was constituted which included K. Vijay Raghavan, former Principal Scientific Adviser, and former ISRO Chairman S. Somanath.

"There is no such thing as failure in a space mission. It is sometimes delayed, sometimes a setback which actually is a learning experience. Even if you... call every unsuccessful or half successful attempt as a failure, statistically our number of so-called failures is much lesser than the USA. Chandrayaan-3 and Mars Orbiter Mission were successful in their very first attempt so that way we have a better statistical record," Dr. Singh said.

ISRO Chairman V. Narayanan said that ISRO's next launch, which would be the first one since the PSLV failure in January, would take place next month.

14J6. Anomaly in PSLV detected and resolved: Jitendra

PSLV में आई गड़बड़ी का पता लगाकर उसे दूर कर लिया गया: जितेंद्र

- **Union Minister of State for Science and Technology Jitendra Singh** on Saturday said that the anomaly in the **Polar Satellite Launch Vehicle (PSLV)** had been resolved.

विज्ञान एवं प्रौद्योगिकी राज्य मंत्री जितेंद्र सिंह ने शनिवार को कहा कि **पोलर सैटेलाइट लॉन्च व्हीकल (PSLV)** में आई गड़बड़ी को दूर कर लिया गया है।

- Dr. Singh said on the sidelines of the **Research, Industry, Start-up and Entrepreneurship (RISE) Conclave 2026** in **Bengaluru**, that a **national-level expert committee** constituted to review the reason for the anomaly had submitted its report and the problem had been detected.

बेंगलुरु में आयोजित **रिसर्च, इंडस्ट्री, स्टार्ट-अप एंड एंटरप्रेन्योरशिप (RISE) कॉन्क्लेव 2026** के दौरान डॉ. सिंह ने कहा कि गड़बड़ी के कारणों की समीक्षा के लिए गठित **राष्ट्रीय स्तर की विशेषज्ञ समिति** ने अपनी रिपोर्ट सौंप दी है और समस्या की पहचान कर ली गई है।

- "The report has come out and the anomaly has been detected.

"रिपोर्ट आ गई है और गड़बड़ी की पहचान कर ली गई है।

- However we cannot share that [reason for the anomaly] on a public platform.

हालाँकि हम [गड़बड़ी के कारण] को सार्वजनिक मंच पर साझा नहीं कर सकते।

- But experts are working on it, which has been resolved and very soon we will be back on track," Dr. Singh said replying to a query.

लेकिन विशेषज्ञ इस पर काम कर रहे थे, इसे सुलझा लिया गया है और बहुत जल्द हम फिर से सामान्य गति पर लौट आएँगे," डॉ. सिंह ने एक प्रश्न के उत्तर में कहा।

- The **PSLV**, which is referred to as the **workhorse** of the **Indian Space Research Organisation (ISRO)**, had suffered two back-to-back setbacks.

पीएसएलवी, जिसे **भारतीय अंतरिक्ष अनुसंधान संगठन (ISRO)** का **वर्कहॉर्स (मुख्य प्रक्षेपण यान)** कहा जाता है, लगातार दो असफलताओं का सामना कर चुका था।

- On **January 12, 2026**, the **PSLV-C62 mission** carrying the **EOS-N1 earth observation satellite** failed to finish its intended trajectory after an anomaly was detected during the end of the **third stage** of the launch vehicle.

12 जनवरी 2026 को **EOS-N1 पृथ्वी अवलोकन उपग्रह** को ले जा रहा **PSLV-C62 मिशन** अपने निर्धारित पथ को पूरा नहीं कर सका, क्योंकि प्रक्षेपण यान के **तीसरे चरण** के अंत में एक गड़बड़ी पाई गई थी।

- On **May 18, 2025**, while **ISRO** attempted to launch the **EOS-09 satellite** aboard the **PSLV-C61 mission**, it couldn't complete it.

18 मई 2025 को **ISRO** ने **PSLV-C61 मिशन** के माध्यम से **EOS-09 उपग्रह** को प्रक्षेपित करने का प्रयास किया था, लेकिन मिशन पूरा नहीं हो सका।

- It was also due to an anomaly in the **third stage** of the rocket.
  यह भी रॉकेट के **तीसरे चरण** में आई गड़बड़ी के कारण हुआ था।
- Following this a **national-level expert committee** was constituted which included **K. Vijay Raghavan**, former **Principal Scienti• c Adviser**, and former **ISRO Chairman S. Somanath**.
  इसके बाद एक **राष्ट्रीय स्तर की विशेषज्ञ समिति** गठित की गई, जिसमें पूर्व **प्रधान वैज्ञानिक सलाहकार के. विजय राघवन** और पूर्व **ISRO अध्यक्ष एस. सोमनाथ** शामिल थे।
- "There is no such thing as failure in a **space mission**.
  "किसी **अंतरिक्ष मिशन** में वास्तव में विफलता जैसी कोई चीज़ नहीं होती।
- It is sometimes delayed, sometimes a setback which actually is a learning experience.
  कभी इसमें देरी होती है, कभी कोई झटका लगता है, जो वास्तव में सीखने का अनुभव होता है।
- Even if you call every unsuccessful or half successful attempt a failure, statistically our number of so-called failures is much lesser than the **USA**.
  यदि आप हर असफल या आंशिक रूप से सफल प्रयास को विफलता कहें, तब भी सांख्यिकीय रूप से हमारी तथाकथित विफलताओं की संख्या **अमेरिका** से काफी कम है।
- **Chandrayaan-3** and **Mars Orbiter Mission** were successful in their very • rst attempt so that way we have a better statistical record," Dr. Singh said.
  चंद्रयान-3 और **मार्स ऑर्बिटर मिशन** अपने पहले ही प्रयास में सफल रहे थे, इसलिए इस दृष्टि से हमारा सांख्यिकीय रिकॉर्ड बेहतर है," डॉ. सिंह ने कहा।
- **ISRO Chairman V. Narayanan** said that **ISRO's next launch**, which would be the • rst one since the **PSLV failure** in January, would take place next month.
  ISRO अध्यक्ष वी. नारायणन ने कहा कि **ISRO का अगला प्रक्षेपण**, जो जनवरी में हुई **PSLV विफलता** के बाद पहला होगा, अगले महीने किया जाएगा।

DRDO showcases critical defence technologies in three flight tests

GS III: S&T

Saurabh Trivedi
NEW DELHI

The Defence Research and Development Organisation (DRDO) has successfully demonstrated a range of critical defence technologies through three consecutive flight tests conducted on Wednesday and Thursday, significantly enhancing India's capabilities against diverse aerial and maritime threats.

Defence milestone

According to the Ministry of Defence, the tests showcased a multi-layered Ballistic Missile Defence (BMD) system and the maiden flight test of the Naval Anti-Ship Missile-Medium Range (NASM-MR), marking a major milestone in India's indigenous defence technology development.

It further mentioned that the multi-layered BMD capability was successfully demonstrated with interceptor missiles engaging and destroying their designated targets.

The tests showcased a multi-layered ballistic missile defence system and the anti-ship missile. SPECIAL ARRANGEMENT

The Defence Minister congratulated the DRDO and associated teams on the successful tests

The systems, developed using advanced technologies, are designed to counter emerging missile threats across a broad spectrum.

Anti-ship missile

The successful trials have placed India among a select group of countries possessing BMD capabilities capable of engaging threats up to Intercontinental Ballistic Missiles, significantly strengthening the country's strategic defence shield.

In another key achievement, DRDO successfully carried out the maiden flight test of the Naval Anti-Ship Missile-Medium Range (NASM-MR), demonstrating enhanced anti-ship strike capability at medium ranges.

The flight tests were witnessed by senior officials of DRDO and the Armed Forces.

Rajnath lauds DRDO

Defence Minister Rajnath Singh congratulated DRDO and associated teams for the successful demonstration of the crucial technologies, stating that the achievements would further strengthen India's defence preparedness.

Secretary, Department of Defence R&D and Chairman DRDO, Rajesh Kumar Singh, closely monitored the trials and lauded the combined efforts of DRDO scientists, industry partners and the Armed Forces in achieving the milestone.

14J6. DRDO showcases critical defence technologies in three light tests

DRDO ने तीन उड़ान परीक्षणों में महत्वपूर्ण रक्षा प्रौद्योगिकियों का प्रदर्शन किया

- The **Defence Research and Development Organisation (DRDO)** has successfully demonstrated a range of **critical defence technologies** through three consecutive • ight tests conducted on Wednesday and Thursday, significantly enhancing India's capabilities against diverse **aerial and maritime threats**.
  रक्षा अनुसंधान एवं विकास

संगठन (DRDO) ने बुधवार और गुरुवार को आयोजित लगातार तीन उड़ान परीक्षणों के माध्यम से कई **महत्वपूर्ण रक्षा प्रौद्योगिकियों** का सफल प्रदर्शन किया, जिससे विभिन्न **हवाई और समुद्री खतरों** के विरुद्ध भारत की क्षमता में उल्लेखनीय वृद्धि हुई है।

Defence milestone
रक्षा क्षेत्र में महत्वपूर्ण उपलब्धि

- According to the **Ministry of Defence**, the tests showcased a multi-layered **Ballistic Missile Defence (BMD) system** and the maiden • ight test of the **Naval Anti-Ship Missile-Medium Range (NASM-MR)**, marking a major milestone in India's indigenous defence technology development.
  रक्षा मंत्रालय के अनुसार, इन परीक्षणों में बहु-स्तरीय **बैलिस्टिक मिसाइल रक्षा (BMD) प्रणाली** तथा **नेवल एंटी-शिप मिसाइल-मीडियम रेंज (NASM-MR)** का पहला उड़ान परीक्षण प्रदर्शित किया गया, जो भारत की स्वदेशी रक्षा प्रौद्योगिकी के विकास में एक महत्वपूर्ण उपलब्धि है।
- It further mentioned that the multi-layered **BMD capability** was successfully demonstrated with **interceptor missiles** engaging and destroying their designated targets.
  मंत्रालय ने यह भी बताया कि बहु-स्तरीय **BMD क्षमता** का सफल प्रदर्शन किया गया, जिसमें **इंटरसेप्टर मिसाइलों** ने अपने निर्धारित लक्ष्यों को भेदकर नष्ट किया।
- The systems, developed using **advanced technologies**, are designed to counter emerging missile threats across a broad spectrum.
  उन्नत प्रौद्योगिकियों से विकसित ये प्रणालियाँ विभिन्न प्रकार के उभरते मिसाइल खतरों का मुकाबला करने के लिए तैयार की गई हैं।

Anti-ship missile
एंटी-शिप मिसाइल

- The successful trials have placed **India** among a select group of countries possessing **BMD capabilities** capable of engaging threats up to **Intercontinental Ballistic Missiles**, significantly strengthening the country's **strategic defence shield**.
  इन सफल परीक्षणों ने **भारत** को उन चुनिंदा देशों की श्रेणी में शामिल कर दिया है जिनके पास **BMD क्षमता** है और जो **अंतरमहाद्वीपीय बैलिस्टिक मिसाइलों (ICBM)** तक के खतरों का मुकाबला कर सकते हैं, जिससे देश की **रणनीतिक रक्षा ढाल** और मजबूत हुई है।
- In another key achievement, **DRDO** successfully carried out the maiden • ight test of the **Naval Anti-Ship Missile-Medium Range (NASM-MR)**, demonstrating enhanced anti-ship strike capability at medium ranges.
  एक अन्य महत्वपूर्ण उपलब्धि में **DRDO** ने **नेवल एंटी-शिप मिसाइल-मीडियम रेंज (NASM-MR)** का पहला उड़ान परीक्षण सफलतापूर्वक किया, जिससे मध्यम दूरी पर एंटी-शिप प्रहार क्षमता का प्रदर्शन हुआ।
- The eight tests were witnessed by senior officials of **DRDO** and the **Armed Forces**.
  इन उड़ान परीक्षणों को **DRDO** और **सशस्त्र बलों** के वरिष्ठ अधिकारियों ने देखा।

Rajnath lauds DRDO
राजनाथ सिंह ने DRDO की सराहना की

- **Defence Minister Rajnath Singh** congratulated **DRDO** and associated teams for the successful demonstration of the crucial technologies, stating that the achievements would further strengthen India's **defence preparedness**.
  रक्षा मंत्री राजनाथ सिंह ने महत्वपूर्ण प्रौद्योगिकियों के सफल प्रदर्शन के लिए **DRDO** और संबंधित टीमों को बधाई दी तथा कहा कि ये उपलब्धियाँ भारत की **रक्षा तैयारियों** को और मजबूत करेंगी।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- **Secretary, Department of Defence R&D** and **Chairman DRDO, Rajesh Kumar Singh**, closely monitored the trials and lauded the combined efforts of **DRDO scientists**, **industry partners** and the **Armed Forces** in achieving the milestone.
रक्षा अनुसंधान एवं विकास विभाग के सचिव एवं **DRDO अध्यक्ष राजेश कुमार सिंह** ने परीक्षणों की निकटता से निगरानी की और इस उपलब्धि को हासिल करने में **DRDO वैज्ञानिकों**, **उद्योग भागीदारों** तथा **सशस्त्र बलों** के संयुक्त प्रयासों की सराहना की।

Virulent bacterium

Shigella

Kerala has seen a new outbreak of shigellosis, caused by this gram-negative, contagious bacterium, which infects millions globally every year

GS III: S&T

Ramya Kannan

GETTY IMAGES

Stained, and viewed under a microscope, Shigella is a captivating sight. The rod-shaped bacteria resemble fat, furry cartoon caterpillars. In reality, however, this gram-negative, contagious bacterium, which causes shigellosis, can be remarkably dangerous. Shigella is back in the news, after an outbreak in Kerala that was first detected in late March 2026 and has continued into June. According to the Kerala health department, 132 confirmed cases and about 75 probable cases of shigellosis had been reported till June 12. Three deaths have been linked to the disease this year, two of which were children under five.

Shigellosis is a diarrhoeal disease marked by fever, abdominal cramps, and bloody diarrhoea (dysentery). It was bacteriologist Kiyoshi Shiga, who isolated the shigella dysenteriae, in 1897, after Japan experienced a severe dysentery epidemic. The genus eventually took his name.

Transmission is mostly through the faeco-oral route, when people ingest tiny amounts of faecal matter through contaminated food, water or hands. As low as 10-100 bacteria can cause the infection, and even an outbreak. It is estimated that globally, shigella causes 80-165 million infections annually and about 6,00,000 deaths, particularly among children under five in sub-Saharan Africa and South Asia.

In an article in the *Indian Journal of Medical Research*, Neelam Taneja and Abhishek Mewara write about the epidemiology of shigella in India. "Though humans and primates are the primary reservoir of shigella, it has been isolated from various sources – aquatic bodies (rivers, surface waters as well as coastal waters), free living amoebae, insects, birds and wild animals."

Taneja and Mewara explain that several aquatic bodies in India have been found to show the presence of shigella. So a potential source of infection could be fish if it is harvested from sewage-contaminated water. Even ingesting small amounts of contaminated water while swimming or bathing, or the consumption of crops cultivated in soil/water contaminated by shigella can cause severe infection. The paper argues that while no individual can be considered immune to shigellosis, "certain individuals are at increased risk. Globally, the incidence of shigellosis is highest among children under five. The incidence of shigellosis has been reported to increase steadily after the age of 40."

Outbreak in Kerala

In late March 2026, Kerala reported a shigellosis outbreak in Kuttikkattoor, Kozhikode, where a three-year-old girl died and over 60 residents (mostly children) fell ill. Soon, clusters came up in Wayanad, Malappuram and Kannur. A major cluster emerged at a Wayanad school where over 300 children were hospitalised. So far, experts have traced the infections to contaminated water and food sources, alongside poor hygiene practices in communal environments such as schools.

This is not Kerala's first brush with shigellosis. In 2009, over 300 people reportedly contracted a food-borne shigella infection across the State. In December 2020, an outbreak, again in Kozhikode, killed an 11-year-old and infected 40 others; in May 2022, shigella was said to be behind a mass food poisoning incident, in Kasargod, where 30 people were hospitalised and a 16-year old girl died. While mild shigella infections typically clear on their own with hydration, severe cases require antibiotics to shorten the duration of the illness, reduce the severity and prevent complications, according to the U.S. Centers for Disease Control. However, some antibiotics are not effective against certain types of shigella. Healthcare providers must order laboratory tests to determine which antibiotics are likely to work.

Taneja and Mewara point out in their article that "there is a nationwide presence of multi-drug resistant shigella developing rapid resistance to most antibiotics available. Thus, judicious use of antibiotics is among the most essential measures to combat shigellosis." This calls for a continuous and strong surveillance of antibiotic resistance across the country for periodic updates of the local antibiograms, in order to allow doctors to effectively identify the right antimicrobial drug to use.

14J6. Virulent bacterium

विरुलेंट बैक्टीरियम (अत्यंत रोगजनक जीवाणु)

- Stained, and viewed under a microscope, **Shigella** is a captivating sight.
माइक्रोस्कोप के नीचे रंगकर और देखने पर **शिगेला (Shigella)** एक आकर्षक दृश्य प्रतीत होता है।
- The rod-shaped bacteria resemble fat, furry cartoon caterpillars.
यह छड़ी (रॉड) के आकार का जीवाणु मोटे और रोएँदार कार्टून कैटरपिलर जैसा दिखाई देता है।
- In reality, however, this **gram-negative**, contagious bacterium, which causes **shigellosis**, can be remarkably dangerous.
लेकिन वास्तव में, **ग्राम-नेगेटिव**, संक्रामक जीवाणु, जो **शिगेलोसिस** उत्पन्न करता है, अत्यंत खतरनाक हो सकता है।
- **Shigella** is back in the news, after an outbreak in **Kerala** that was first detected in late March 2026 and has continued into June.
मार्च 2026 के अंत में पहली बार पहचाने गए **केरल** के प्रकोप के बाद **शिगेला** फिर से समाचारों में है, जो जून तक जारी रहा।
- According to the **Kerala health department**, 132 confirmed cases and about 75 probable cases of **shigellosis** had been reported till June 12.

केरल स्वास्थ्य विभाग के अनुसार, 12 जून तक **शिगेलोसिस** के 132 पुष्ट मामले और लगभग 75 संभावित मामले दर्ज किए गए थे।

- Three deaths have been linked to the disease this year, two of which were children under five.
  इस वर्ष इस बीमारी से तीन मौतों को जोड़ा गया है, जिनमें से दो पाँच वर्ष से कम आयु के बच्चे थे।
- **Shigellosis** is a diarrhoeal disease marked by fever, abdominal cramps, and bloody diarrhoea (**dysentery**).
  शिगेलोसिस एक दस्त संबंधी रोग है जिसकी पहचान बुखार, पेट में ऐंठन और खून वाले दस्त (**पेचिश**) से होती है।
- It was bacteriologist **Kiyoshi Shiga**, who isolated the **Shigella dysenteriae**, in 1897, after Japan experienced a severe dysentery epidemic.
  1897 में जापान में गंभीर पेचिश महामारी के बाद जीवाणुविज्ञानी **कियोशी शिगा** ने **शिगेला डिसेंटेरिए** को पृथक किया था।
- The genus eventually took his name.
  बाद में इस जीवाणु वंश का नाम उन्हीं के नाम पर रखा गया।
- Transmission is mostly through the **faeco-oral route**, when people ingest tiny amounts of faecal matter through contaminated food, water or hands.
  संक्रमण मुख्यतः **मल-मुख मार्ग (फीकल-ओरल रूट)** से होता है, जब लोग दूषित भोजन, पानी या हाथों के माध्यम से मल के सूक्ष्म कण निगल लेते हैं।
- As low as 10-100 bacteria can cause the infection, and even an outbreak.
  केवल 10-100 जीवाणु भी संक्रमण और यहाँ तक कि प्रकोप का कारण बन सकते हैं।
- It is estimated that globally, **Shigella** causes 80-165 million infections annually and about 6,00,000 deaths, particularly among children under five in **sub-Saharan Africa** and **South Asia**.
  अनुमान है कि विश्वभर में **शिगेला** प्रतिवर्ष 8 से 16.5 करोड़ संक्रमण और लगभग 6,00,000 मौतों का कारण बनता है, विशेष रूप से **उप-सहारा अफ्रीका** और **दक्षिण एशिया** के पाँच वर्ष से कम आयु के बच्चों में।
- In an article in the **Indian Journal of Medical Research**, **Neelam Taneja** and **Abhishek Mewara** write about the epidemiology of **Shigella** in India.
  इंडियन जर्नल ऑफ मेडिकल रिसर्च में प्रकाशित एक लेख में **नीलम तनेजा** और **अभिषेक मेवारा** ने भारत में **शिगेला** की महामारी विज्ञान पर लिखा है।
- "Though humans and primates are the primary reservoir of **Shigella**, it has been isolated from various sources — aquatic bodies (rivers, surface waters as well as coastal waters), free living amoebae, insects, birds and wild animals."
  "यद्यपि मनुष्य और प्राइमेट्स **शिगेला** के प्रमुख भंडार हैं, फिर भी इसे विभिन्न स्रोतों—जलीय निकायों (नदियाँ, सतही जल तथा तटीय जल), स्वतंत्र रूप से रहने वाले अमीबा, कीट, पक्षी और जंगली जानवरों—से पृथक किया गया है।"
- Taneja and Mewara explain that several aquatic bodies in India have been found to show the presence of **Shigella**.
  तनेजा और मेवारा बताते हैं कि भारत के कई जलीय निकायों में **शिगेला** की उपस्थिति पाई गई है।
- So a potential source of infection could be fish if it is harvested from sewage-contaminated water.
  इसलिए यदि मछली सीवेज से दूषित जल से पकड़ी जाती है, तो वह संक्रमण का संभावित स्रोत हो सकती है।
- Even ingesting small amounts of contaminated water while swimming or bathing, or the consumption of crops cultivated in soil/water contaminated by **Shigella** can cause severe infection.
  तैराकी या स्नान के दौरान दूषित जल की थोड़ी मात्रा निगलना, अथवा **शिगेला** से दूषित मिट्टी या पानी में उगाई गई फसलों का सेवन भी गंभीर संक्रमण उत्पन्न कर सकता है।
- The paper argues that while no individual can be considered immune to **shigellosis**, "certain individuals are at increased risk."

इस शोधपत्र में तर्क दिया गया है कि यद्यपि किसी भी व्यक्ति को **शिगेलोसिस** से पूर्णतः प्रतिरक्षित नहीं माना जा सकता, फिर भी "कुछ व्यक्तियों में जोखिम अधिक होता है।"

- Globally, the incidence of **shigellosis** is highest among children under five.
  वैश्विक स्तर पर **शिगेलोसिस** की घटनाएँ पाँच वर्ष से कम आयु के बच्चों में सबसे अधिक हैं।
- The incidence of **shigellosis** has been reported to increase steadily after the age of 40.
  40 वर्ष की आयु के बाद **शिगेलोसिस** की घटनाओं में लगातार वृद्धि देखी गई है।

Outbreak in Kerala
केरल में प्रकोप

- In late March 2026, **Kerala** reported a **shigellosis outbreak** in **Kuttikkattoor, Kozhikode**, where a three-year-old girl died and over 60 residents (mostly children) fell ill.
  मार्च 2026 के अंत में **केरल** ने **कोझिकोड के कुट्टिक्काट्टूर** में **शिगेलोसिस प्रकोप** की सूचना दी, जहाँ तीन वर्ष की एक बच्ची की मृत्यु हो गई और 60 से अधिक निवासी (अधिकांश बच्चे) बीमार पड़ गए।
- Soon, clusters came up in **Wayanad, Malappuram and Kannur**.
  इसके बाद **वायनाड, मलप्पुरम और कन्नूर** में भी संक्रमण के समूह सामने आए।
- A major cluster emerged at a **Wayanad school** where over 300 children were hospitalised.
  एक बड़ा संक्रमण समूह **वायनाड के एक विद्यालय** में सामने आया जहाँ 300 से अधिक बच्चों को अस्पताल में भर्ती करना पड़ा।
- So far, experts have traced the infections to contaminated water and food sources, alongside poor hygiene practices in communal environments such as schools.
  अब तक विशेषज्ञों ने संक्रमण का संबंध दूषित जल और भोजन स्रोतों के साथ-साथ विद्यालयों जैसे सामुदायिक वातावरण में खराब स्वच्छता प्रथाओं से जोड़ा है।
- This is not **Kerala's** first brush with **shigellosis**.
  यह **केरल** का **शिगेलोसिस** से पहला सामना नहीं है।
- In 2009, over 300 people reportedly contracted a food-borne **Shigella** infection across the State.
  2009 में राज्यभर में 300 से अधिक लोगों के खाद्यजनित **शिगेला** संक्रमण से प्रभावित होने की सूचना मिली थी।
- In December 2020, an outbreak, again in **Kozhikode**, killed an 11-year-old and infected 40 others.
  दिसंबर 2020 में **कोझिकोड** में ही एक प्रकोप ने 11 वर्षीय बच्चे की जान ले ली और 40 अन्य लोगों को संक्रमित किया।
- In May 2022, **Shigella** was said to be behind a mass food poisoning incident, in **Kasargod**, where 30 people were hospitalised and a 16-year-old girl died.
  मई 2022 में **कासरगोड** में सामूहिक खाद्य विषाक्तता की घटना के पीछे **शिगेला** को जिम्मेदार बताया गया, जिसमें 30 लोगों को अस्पताल में भर्ती करना पड़ा और 16 वर्षीय लड़की की मृत्यु हो गई।
- While mild **Shigella** infections typically clear on their own with hydration, severe cases require **antibiotics** to shorten the duration of the illness, reduce the severity and prevent complications, according to the **U.S. Centers for Disease Control**.
  अमेरिकी रोग नियंत्रण एवं रोकथाम केंद्र (CDC) के अनुसार, हल्के **शिगेला** संक्रमण सामान्यतः पर्याप्त तरल पदार्थ लेने से स्वयं ठीक हो जाते हैं, लेकिन गंभीर मामलों में बीमारी की अवधि कम करने, गंभीरता घटाने और जटिलताओं को रोकने के लिए **एंटीबायोटिक्स** की आवश्यकता होती है।
- However, some antibiotics are not effective against certain types of **Shigella**.
  हालाँकि, कुछ एंटीबायोटिक्स **शिगेला** के कुछ प्रकारों पर प्रभावी नहीं होती हैं।
- Healthcare providers must order laboratory tests to determine which antibiotics are likely to work.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

स्वास्थ्य सेवा प्रदाताओं को यह निर्धारित करने के लिए प्रयोगशाला परीक्षण करवाने चाहिए कि कौन-सी एंटीबायोटिक्स प्रभावी हो सकती हैं।

- Taneja and Mewara point out in their article that "there is a nationwide presence of **multi-drug resistant Shigella** developing rapid resistance to most antibiotics available."
  तनेजा और मेवारा अपने लेख में बताते हैं कि "देशभर में **बहु-औषधि प्रतिरोधी शिगेला (Multi-drug Resistant Shigella)** मौजूद है, जो उपलब्ध अधिकांश एंटीबायोटिक्स के प्रति तेजी से प्रतिरोध विकसित कर रही है।"
- Thus, judicious use of **antibiotics** is among the most essential measures to combat **shigellosis**.
  इसलिए **शिगेलोसिस** से निपटने के लिए **एंटीबायोटिक्स** का विवेकपूर्ण उपयोग सबसे आवश्यक उपायों में से एक है।
- This calls for a continuous and strong surveillance of **antibiotic resistance** across the country for periodic updates of the local antibiograms, in order to allow doctors to effectively identify the right antimicrobial drug to use.
  इसके लिए देशभर में **एंटीबायोटिक प्रतिरोध** की सतत और मजबूत निगरानी आवश्यक है ताकि स्थानीय एंटीबायोग्राम का समय-समय पर अद्यतन किया जा सके और डॉक्टर प्रभावी रूप से सही रोगाणुरोधी दवा का चयन कर सकें।

Meet the frogs that build 'cloudy' nests in South Africa's trees

GS III: S&T

D.P. Kasbekar

For most frogs, life begins as a game of odds. They lay their eggs in the water, where fish and insects gobble up about 98% of them before they even have a chance to hatch. The African grey foam-nest tree frog (*Chiromantis xerampelina*) figured a way out: it took its nest into the air.

In the rainy season between October and February, a female frog finds a branch overhanging a pool and begins secreting a special fluid. As the male and the female mate, the pair uses their hind legs like whisks to churn the secretions into a thick, bubbly froth. The result is a foamy nest.

A few days later, the eggs hatch inside this nest. When the tadpoles are ready, they simply break through the bottom of the foam and drop into the pool below, beginning the next stage of their lives.

While a single pair of frogs can build a nest, these frogs prefer a 'foam party' approach. Researchers from three Australian universities recently studied these frogs in South Africa and found that when it comes to nesting, there is real strength in numbers.

The findings were published in the journal *Evolution* on June 2.

Sometimes, a single female is joined by a dozen or more males. This results in a better home rather than chaos.

More males meant more legs churning, leading to nests up to three times larger than those built by a single pair.

While smaller nests dry out quickly, killing the eggs inside, larger nests hold onto moisture for longer, ensuring more tadpoles survive from the nest.

You might wonder: why would a male frog help build a nest if he is competing with 12 other frogs? Using DNA testing, the researchers found that in these crowded nests, paternity is often split. By cooperating to build a large, moist fortress, the males ensure at least some of their offspring survive, rather than losing all of them to a dried-out nest.

The scientists also suspected that the males' skin and fluids contain surfactants – compounds similar to laundry detergent – that keep the bubbles from popping.

The African grey foam-nest tree frog reminds us that survival is not always about being the strongest or the fastest. Sometimes, it is about having the best teammates, the best chemistry, and the most impressive bubble-making skills in the forest.

(D.P. Kasbekar is a retired scientist)

14J6. Meet the frogs that build 'cloudy' nests in South Africa's trees
दक्षिण अफ्रीका के पेड़ों में 'बादलों जैसे' घोंसले बनाने वाले मेंढकों से मिलिए

- For most **frogs**, life begins as a game of odds.
  अधिकांश **मेंढकों** के लिए जीवन की शुरुआत अनिश्चितताओं के एक खेल के रूप में होती है।
- They lay their eggs in the water, where **fish** and **insects** gobble up about **98%** of them before they even have a chance to hatch.
  वे अपने अंडे पानी में देते हैं, जहाँ **मछलियाँ** और **कीट** उनके लगभग **98%** अंडों को उनके फूटने का अवसर मिलने से पहले ही खा जाते हैं।
- The **African grey foam-nest tree frog (Chiromantis xerampelina)** figured a way out: it took its nest into the air.
  अफ्रीकी ग्रे फोम-नेस्ट ट्री फ्रॉग (Chiromantis xerampelina) ने इससे बचने का एक उपाय खोज लिया: उसने अपना घोंसला हवा में बनाना शुरू कर दिया।
- In the rainy season between **October and February**, a female frog finds a branch overhanging a pool and begins secreting a special fluid.

अक्टूबर और फरवरी के बीच वर्षा ऋतु में, एक मादा मेंढक जलाशय के ऊपर निकली हुई किसी शाखा को खोजती है और एक विशेष द्रव का स्राव करना शुरू करती है।

- As the male and the female mate, the pair uses their hind legs like whisks to churn the secretions into a thick, bubbly froth.
  जब नर और मादा मैथुन करते हैं, तब यह जोड़ा अपने पिछले पैरों का उपयोग फेंटने वाले उपकरण की तरह करते हुए उस स्राव को गाढ़े और बुलबुलेदार झाग में बदल देता है।
- The result is a **foamy nest**.
  इसका परिणाम एक **झागदार घोंसले** के रूप में सामने आता है।
- A few days later, the eggs hatch inside this nest.
  कुछ दिनों बाद, इसी घोंसले के भीतर अंडों से बच्चे निकल आते हैं।
- When the **tadpoles** are ready, they simply break through the bottom of the foam and drop into the pool below, beginning the next stage of their lives.
  जब **टैडपोल (शिशु मेंढक)** तैयार हो जाते हैं, तो वे झाग की निचली परत को तोड़कर नीचे स्थित जलाशय में गिर जाते हैं और अपने जीवन के अगले चरण की शुरुआत करते हैं।
- While a single pair of frogs can build a nest, these frogs prefer a '**foam party**' approach.
  यद्यपि मेंढकों का एक जोड़ा घोंसला बना सकता है, फिर भी ये मेंढक '**फोम पार्टी**' जैसी सामूहिक पद्धति को प्राथमिकता देते हैं।
- Researchers from **three Australian universities** recently studied these frogs in **South Africa** and found that when it comes to nesting, there is real strength in numbers.
  ऑस्ट्रेलिया के तीन विश्वविद्यालयों के शोधकर्ताओं ने हाल ही में **दक्षिण अफ्रीका** में इन मेंढकों का अध्ययन किया और पाया कि घोंसला निर्माण के मामले में संख्या में वास्तव में शक्ति होती है।
- The findings were published in the journal **Evolution** on **June 2**.
  ये निष्कर्ष **2 जून** को **Evolution** नामक पत्रिका में प्रकाशित किए गए।
- Sometimes, a single female is joined by a dozen or more males.
  कभी-कभी एक अकेली मादा के साथ एक दर्जन या उससे अधिक नर शामिल हो जाते हैं।
- This results in a better home rather than chaos.
  इससे अव्यवस्था नहीं बल्कि एक बेहतर घर का निर्माण होता है।
- More males meant more legs churning, leading to nests up to **three times larger** than those built by a single pair.
  अधिक नर होने का अर्थ है अधिक पैरों द्वारा झाग तैयार करना, जिससे ऐसे घोंसले बनते हैं जो एक जोड़े द्वारा बनाए गए घोंसलों की तुलना में **तीन गुना बड़े** हो सकते हैं।
- While smaller nests dry out quickly, killing the eggs inside, larger nests hold onto moisture for longer, ensuring more tadpoles survive from the nest.
  जहाँ छोटे घोंसले जल्दी सूख जाते हैं और उनके भीतर के अंडे नष्ट हो जाते हैं, वहीं बड़े घोंसले लंबे समय तक नमी बनाए रखते हैं, जिससे अधिक टैडपोल जीवित रह पाते हैं।
- You might wonder: why would a male frog help build a nest if he is competing with **12 other frogs**?
  आप सोच सकते हैं कि यदि कोई नर मेंढक **12 अन्य मेंढकों** के साथ प्रतिस्पर्धा कर रहा है, तो वह घोंसला बनाने में सहायता क्यों करेगा?
- Using **DNA testing**, the researchers found that in these crowded nests, paternity is often split.
  डीएनए परीक्षण का उपयोग करके शोधकर्ताओं ने पाया कि इन भीड़भाड़ वाले घोंसलों में संतानों की पितृत्व जिम्मेदारी अक्सर कई नर में विभाजित होती है।
- By cooperating to build a large, moist fortress, the males ensure at least some of their offspring survive, rather than losing all of them to a dried-out nest.
  एक बड़े और नम किले जैसे घोंसले के निर्माण में सहयोग करके नर यह सुनिश्चित करते हैं कि उनकी कम-से-कम कुछ संताने जीवित रहें, बजाय इसके कि सभी संतानें सूख चुके घोंसले में नष्ट हो जाएँ।
- The scientists also suspected that the males' skin and fluids contain **surfactants** — compounds similar to laundry detergent — that keep the bubbles from popping.

Contact Number : 9971932488
Website : patrioticias.in

वैज्ञानिकों को यह भी संदेह है कि नर मेंढकों की त्वचा और द्रवों में **सर्फैक्टेंट्स** होते हैं — जो कपड़े धोने वाले डिटर्जेंट जैसे यौगिक होते हैं — और ये बुलबुलों को फूटने से बचाते हैं।

- The **African grey foam-nest tree frog** reminds us that survival is not always about being the strongest or the fastest.
  अफ्रीकी ग्रे फोम-नेस्ट ट्री फ्रॉग हमें यह याद दिलाता है कि जीवित रहना हमेशा सबसे शक्तिशाली या सबसे तेज़ होने पर निर्भर नहीं करता।
- Sometimes, it is about having the best teammates, the best chemistry, and the most impressive bubble-making skills in the forest.
  कभी-कभी यह सबसे अच्छे साथियों, सर्वोत्तम सामंजस्य और जंगल में सबसे प्रभावशाली बुलबुले बनाने की क्षमता पर निर्भर करता है।

How ants cope with disease outbreaks

GS III: S&T

SPEAKING OF SCIENCE

D. Balasubramanian

Ants are associated with a range of very positive qualities – including a self-motivated work ethic, preparedness and long-term thinking, and a preference for collective effort. Many ant species are also social, and living in social groups offers many advantages. However, there are downsides too.

Among humans, the occurrence of seasonal outbreaks of infections such as influenza and other diseases is the result of the nature of the social structures humans live in. That is how we have learnt the basic rules of limiting these outbreaks' effects. If you notice a general build-up of symptoms, you take leave from your workplace and isolate yourself for a few days.

Altering one's social contact networks reduces the spread of pathogens. This process requires collective discipline – just the kind of qualities that ants are famous for.

So how do ants living in their colonies cope with pathogens? In some ant species, individuals spread antimicrobial secretions from the metapleural gland on themselves, on larvae, and on their fellow nest dwellers. This gives rise to a 'social immunity': every individual in the colony has some protection against infections.

Other, more dramatic measures have been observed. Researchers at the University of Lausanne in Switzerland introduced a worker black ant whose leg had been experimentally injured back among its companions. It was seen that the fellow ants quickly amputated this leg by repeated bites at the joint linking the leg to the body (*Current Biology*, 34, 2024). A wounded limb would have attracted disease-causing microbes and endangered other ants in the colony.

Black garden ants tend to mealybugs. KATJA SCHULZ (CC BY)

A more recent study looked at how ant colonies respond to an epidemic (*Science*, 390, 266, 2025). The ant studied was the black garden ant, which is related to the Indian black ants that we see in and around our homes. The black garden ants build complex underground nests that have one main entrance, a central portion housing the queen, eggs, and larvae, and several satellite chambers used by other ants in the colony and to store food and collect waste. Tunnels connect various parts of the nest. There is a clear division of labour, with some worker ants acting as nurse caretakers and others acting as foragers.

In the experiments, a single queen, with around 200 worker ants, began to build a nest. All ants have miniature QR codes stuck on them and video cameras follow their movements. The scientists monitored the nest structures using micro-CT scans. One day later, 20 worker ants that had been exposed to a pathogenic fungus were introduced to the colony.

Over the next few days, the infected ants exited the nest more often and spent more time outside than their nestmates. This was self-isolating behavior. The architecture of the nest had also adapted: the entrances were spaced further apart than normal. The pace of work became frantic and focused on digging longer tunnels. There were also fewer connections between chambers.

Together, these changes led to more segregation and restricted interactions between the segregated groups. High-value ants like the queen and the nurses had significantly lower exposure to the forager ants and remained healthy.

Sounds familiar? Humans maintain quarantines, wear masks when interacting with others, and wash their hands often when faced with an epidemic in our communities. Ants seem to have evolved their own, very effective social distancing measures.

14J6. How ants cope with disease outbreaks
चींटियाँ रोग के प्रकोपों का सामना कैसे करती हैं

- Ants are associated with a range of very positive qualities — including a self-motivated **work ethic**, preparedness and long-term thinking, and a preference for **collective effort**.
  चींटियाँ अनेक सकारात्मक गुणों से जुड़ी होती हैं — जिनमें स्व-प्रेरित **कार्य नैतिकता**, तैयारी, दीर्घकालिक सोच तथा **सामूहिक प्रयास** को प्राथमिकता देना शामिल है।
- Many **ant species** are also social, and living in social groups offers many advantages.
  अनेक **चींटी प्रजातियाँ** सामाजिक होती हैं, और सामाजिक समूहों में रहना अनेक लाभ प्रदान करता है।
- However, there are downsides too.
  हालाँकि, इसके कुछ दुष्परिणाम भी हैं।
- Among humans, the occurrence of seasonal outbreaks of infections such as **influenza** and other diseases is the result of the nature of the social structures humans live in.
  मनुष्यों में **इन्फ्लुएंजा** तथा अन्य रोगों के मौसमी प्रकोप मानव समाज की सामाजिक संरचनाओं का परिणाम होते हैं।
- That is how we have learnt the basic rules of limiting these outbreaks' effects.
  इसी प्रकार हमने इन प्रकोपों के प्रभावों को सीमित करने के मूलभूत नियम सीखे हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

- If you notice a general build-up of symptoms, you take leave from your workplace and isolate yourself for a few days.
  यदि आपको सामान्य रूप से लक्षण दिखाई देने लगते हैं, तो आप अपने कार्यस्थल से अवकाश लेकर कुछ दिनों के लिए स्वयं को अलग कर लेते हैं।
- Altering one's **social contact networks** reduces the spread of pathogens.
  अपने **सामाजिक संपर्क नेटवर्क** में परिवर्तन करने से रोगजनकों का प्रसार कम हो जाता है।
- This process requires collective discipline — just the kind of qualities that ants are famous for.
  इस प्रक्रिया के लिए सामूहिक अनुशासन की आवश्यकता होती है — वही गुण जिनके लिए चींटियाँ प्रसिद्ध हैं।
- So how do ants living in their colonies cope with pathogens?
  तो अपने उपनिवेशों में रहने वाली चींटियाँ रोगजनकों से कैसे निपटती हैं?
- In some ant species, individuals spread **antimicrobial secretions** from the **metapleural gland** on themselves, on larvae, and on their fellow nest dwellers.
  कुछ चींटी प्रजातियों में, सदस्य **मेटाप्ल्यूरल ग्रंथि (Metapleural Gland)** से निकलने वाले **रोगाणुरोधी स्रावों (Antimicrobial Secretions)** को अपने शरीर, लार्वा तथा अन्य घोंसला-निवासियों पर फैलाते हैं।
- This gives rise to a **'social immunity'**: every individual in the colony has some protection against infections.
  इससे **'सामाजिक प्रतिरक्षा (Social Immunity)'** उत्पन्न होती है, जिसके कारण उपनिवेश का प्रत्येक सदस्य संक्रमणों के विरुद्ध कुछ सुरक्षा प्राप्त करता है।
- Other, more dramatic measures have been observed.
  इसके अतिरिक्त कुछ और अधिक नाटकीय उपाय भी देखे गए हैं।
- Researchers at the **University of Lausanne** in **Switzerland** introduced a worker black ant whose leg had been experimentally injured back among its companions.
  स्विट्ज़रलैंड के **यूनिवर्सिटी ऑफ लॉज़ान** के शोधकर्ताओं ने एक श्रमिक काली चींटी, जिसके पैर को प्रयोगात्मक रूप से घायल किया गया था, पुनः उसके साथियों के बीच छोड़ा।
- It was seen that the fellow ants quickly amputated this leg by repeated bites at the joint linking the leg to the body (**Current Biology, 34, 2024**).
  यह देखा गया कि अन्य चींटियों ने पैर और शरीर को जोड़ने वाले जोड़ पर बार-बार काटकर उस पैर को शीघ्र ही अलग कर दिया (**Current Biology, 34, 2024**)।
- A wounded limb would have attracted disease-causing microbes and endangered other ants in the colony.
  घायल अंग रोग उत्पन्न करने वाले सूक्ष्मजीवों को आकर्षित कर सकता था और उपनिवेश की अन्य चींटियों को भी खतरे में डाल सकता था।
- A more recent study looked at how ant colonies respond to an epidemic (**Science, 390, 266, 2025**).
  एक हालिया अध्ययन में यह देखा गया कि चींटी उपनिवेश किसी महामारी के प्रति किस प्रकार प्रतिक्रिया करते हैं (**Science, 390, 266, 2025**)।
- The ant studied was the **black garden ant**, which is related to the Indian black ants that we see in and around our homes.
  अध्ययन की गई चींटी **ब्लैक गार्डन एंट** थी, जो हमारे घरों के आसपास दिखाई देने वाली भारतीय काली चींटियों से संबंधित है।
- The black garden ants build complex underground nests that have one main entrance, a central portion housing the queen, eggs, and larvae, and several satellite chambers used by other ants in the colony and to store food and collect waste.
  ब्लैक गार्डन चींटियाँ जटिल भूमिगत घोंसले बनाती हैं, जिनमें एक मुख्य प्रवेश द्वार, रानी, अंडों और लार्वा के लिए एक केंद्रीय भाग तथा भोजन भंडारण और अपशिष्ट संग्रह के लिए कई सहायक कक्ष होते हैं।
- Tunnels connect various parts of the nest.
  सुरंगें घोंसले के विभिन्न भागों को आपस में जोड़ती हैं।
- There is a clear division of labour, with some worker ants acting as nurse caretakers and others acting as foragers.

इनमें कार्यों का स्पष्ट विभाजन होता है, जहाँ कुछ श्रमिक चींटियाँ परिचारिका की भूमिका निभाती हैं और अन्य भोजन खोजने का कार्य करती हैं।

- In the experiments, a single queen, with around **200 worker ants**, began to build a nest.
  प्रयोगों में, लगभग **200 श्रमिक चींटियों** के साथ एक रानी ने घोंसला बनाना प्रारंभ किया।
- All ants have miniature **QR codes** stuck on them and video cameras follow their movements.
  सभी चींटियों पर छोटे **QR कोड** लगाए गए थे और वीडियो कैमरे उनकी गतिविधियों पर नज़र रख रहे थे।
- The scientists monitored the nest structures using **micro-CT scans**.
  वैज्ञानिकों ने **माइक्रो-सीटी स्कैन** का उपयोग करके घोंसले की संरचनाओं की निगरानी की।
- One day later, **20 worker ants** that had been exposed to a **pathogenic fungus** were introduced to the colony.
  एक दिन बाद, **20 श्रमिक चींटियों** को, जिन्हें एक **रोगजनक कवक (Pathogenic Fungus)** के संपर्क में लाया गया था, उपनिवेश में शामिल किया गया।
- Over the next few days, the infected ants exited the nest more often and spent more time outside than their nestmates.
  अगले कुछ दिनों में संक्रमित चींटियाँ अपने साथियों की तुलना में अधिक बार घोंसले से बाहर निकलीं और बाहर अधिक समय बिताने लगीं।
- This was **self-isolating behavior**.
  यह **स्व-पृथक्करण (Self-Isolating) व्यवहार** था।
- The architecture of the nest had also adapted: the entrances were spaced further apart than normal.
  घोंसले की संरचना में भी परिवर्तन हुआ: प्रवेश द्वार सामान्य से अधिक दूरी पर बनाए गए।
- The pace of work became frantic and focused on digging longer tunnels.
  कार्य की गति अत्यधिक तीव्र हो गई और ध्यान लंबी सुरंगें खोदने पर केंद्रित हो गया।
- There were also fewer connections between chambers.
  कक्षों के बीच संपर्क भी कम कर दिए गए।
- Together, these changes led to more segregation and restricted interactions between the segregated groups.
  इन परिवर्तनों ने मिलकर अधिक पृथक्करण तथा अलग-अलग समूहों के बीच सीमित संपर्क को जन्म दिया।
- High-value ants like the **queen** and the **nurses** had significantly lower exposure to the forager ants and remained healthy.
  रानी और **परिचारिका चींटियों** जैसी महत्वपूर्ण चींटियों का भोजन खोजने वाली चींटियों से संपर्क बहुत कम रहा और वे स्वस्थ बनी रहीं।
  - Sounds familiar?

  क्या यह परिचित प्रतीत होता है?
  - Humans maintain **quarantines**, wear **masks** when interacting with others, and wash their hands often when faced with an epidemic in our communities.
    मनुष्य महामारी के समय **क्वारंटीन** अपनाते हैं, दूसरों से मिलते समय **मास्क** पहनते हैं और बार-बार हाथ धोते हैं।
  - Ants seem to have evolved their own, very effective **social distancing** measures.
    ऐसा प्रतीत होता है कि चींटियों ने भी अपने अत्यंत प्रभावी **सामाजिक दूरी (Social Distancing)** उपाय विकसित कर लिए हैं।

GS III: S&T

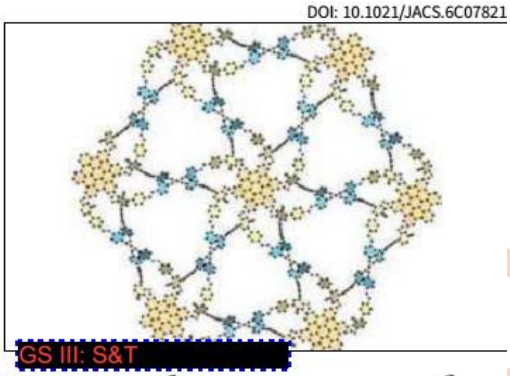
Sea star sports nature's optic fibres to focus light

A remarkable structure in the chocolate-chip sea star (*Protoreaster nodosus*) has come to light. On the tip of each arm, a skeletal part contains an array of cone-shaped structures that, like optic fibres, transmit 70% of incident light and concentrate it nearly 3x at the base. Overall, the array captures light from a 120° field of view and 'brightens' it 8x inside the arm. Scientists said engineers could use the design for lightweight sensors and displays.

14J6. Sea star sports nature's optic fibres to focus light

समुद्री तारा प्रकाश को केंद्रित करने के लिए प्रकृति के प्रकाशीय तंतुओं का उपयोग करता है

- A remarkable structure in the **chocolate-chip sea star (Protoreaster nodosus)** has come to light.
  चॉकलेट-चिप सी स्टार (Protoreaster nodosus) में एक उल्लेखनीय संरचना का पता चला है।
- On the tip of each arm, a skeletal part contains an array of **cone-shaped structures** that, like **optic fibres**, transmit **70% of incident light** and concentrate it nearly **3 times** at the base.
  प्रत्येक भुजा के सिरे पर स्थित एक कंकालीय भाग में **शंकु-आकृति संरचनाओं** का एक समूह होता है, जो **ऑप्टिक फाइबर** की तरह कार्य करते हुए **आपतित प्रकाश का 70%** संचारित करता है और उसे आधार पर लगभग **तीन गुना** अधिक केंद्रित कर देता है।
- Overall, the array captures light from a **120° field of view** and 'brightens' it **8 times** inside the arm.
  समग्र रूप से यह संरचना **120° के दृश्य क्षेत्र (Field of View)** से प्रकाश ग्रहण करती है और उसे भुजा के भीतर **आठ गुना** अधिक 'उज्ज्वल' बना देती है।
- Scientists said engineers could use the design for **lightweight sensors** and **displays**.
  वैज्ञानिकों ने कहा कि अभियंता इस संरचना के डिजाइन का उपयोग **हल्के सेंसरों** तथा **डिस्प्ले प्रणालियों** के विकास में कर सकते हैं।



GS III: S&T

Nanographene paves way for ultra-porous materials

Scientists, led by Nobel laureate Omar Yaghi, have a new way to build highly porous materials using nanographene. They designed a molecule called HBC-LA12, with 12 connection points arranged in a prism shape. By linking this molecule with others, they created two new 3D structures that are a breakthrough in reticular chemistry. One has a record surface area of 5,000 sq. m per gram. The findings expand the way to design materials to store gases.

14J6. Nanographene paves way for ultra-porous materials

नैनोग्राफीन अति-छिद्रयुक्त पदार्थों के लिए मार्ग प्रशस्त करता है

- Scientists, led by **Nobel laureate Omar Yaghi**, have a new way to build highly **porous materials** using **nanographene**.
  नोबेल पुरस्कार विजेता उमर यागी के नेतृत्व में वैज्ञानिकों ने **नैनोग्राफीन** का उपयोग करके अत्यधिक **छिद्रयुक्त पदार्थों (Porous Materials)** के निर्माण की एक नई विधि विकसित की है।
- They designed a molecule called **HBC-LA12**, with **12 connection points** arranged in a **prism shape**.
  उन्होंने **HBC-LA12** नामक एक अणु का निर्माण किया, जिसमें **12 संयोजन बिंदु प्रिज्माकार संरचना** में व्यवस्थित हैं।
- By linking this molecule with others, they created **two new 3D structures** that are a breakthrough in **reticular chemistry**.
  इस अणु को अन्य अणुओं के साथ जोड़कर उन्होंने **दो नई त्रि-आयामी (3D) संरचनाएँ** विकसित कीं, जो **रेटिकुलर रसायन विज्ञान (Reticular Chemistry)** में एक महत्वपूर्ण उपलब्धि मानी जा रही हैं।
- One has a record **surface area** of **5,000 sq. m per gram**.
  इनमें से एक संरचना का **सतही क्षेत्रफल 5,000 वर्ग मीटर प्रति ग्राम** का रिकॉर्ड स्तर प्राप्त करता है।
- The findings expand the way to design materials to **store gases**.
  ये निष्कर्ष **गैसों के भंडारण** के लिए पदार्थों के डिजाइन और विकास की संभावनाओं का विस्तार करते हैं।

Pattern of walks

Do people have a tendency to walk in particular directions?

GS III: S&T

The answer to this strange question is a stranger 'yes'. When people walk freely in an open space, they often begin to move in a counter-clockwise circle. While scientists believed people were simply following those in front of them or reacting to boundaries, a new study in *Nature Communications* has found a biological bias to turn in that direction. The researchers conducted experiments in Spain and Japan, observing groups of adults, teenagers, and nursery school children. They found that the tendency to move counter-clockwise exists even when a person is walking alone in an empty arena and social norms, such as whether a country drives on the right or the left, didn't change the pattern. The preference also didn't depend on whether one was left- or right-handed and whether they had a 'dominant' eye. The children displayed the preference in the most pronounced manner, which suggested the preference could be an intrinsic part of human locomotion.

Readers may send their questions / answers to science@thehindu.co.in

14J6. Do people have a tendency to walk in particular directions?

क्या लोगों में किसी विशेष दिशा में चलने की प्रवृत्ति होती है?

- The answer to this strange question is a stranger '**yes**'.

इस विचित्र प्रश्न का उत्तर और भी विचित्र है — '**हाँ**'।

- When people walk freely in an open space, they often begin to move in a **counter-clockwise circle**.

जब लोग किसी खुले स्थान में स्वतंत्र रूप से चलते हैं, तो वे प्रायः **वामावर्त (Counter-Clockwise) वृत्त** में चलना प्रारम्भ कर देते हैं।

- While scientists believed people were simply following those in front of them or reacting to boundaries, a new study in **Nature Communications** has found a **biological bias** to turn in that direction.

यद्यपि वैज्ञानिकों का मानना था कि लोग केवल अपने आगे चल रहे व्यक्तियों का अनुसरण करते हैं या सीमाओं के प्रति प्रतिक्रिया करते हैं, लेकिन **Nature Communications** में प्रकाशित एक नए अध्ययन ने उस दिशा में मुड़ने की **जैविक प्रवृत्ति (Biological Bias)** का पता लगाया है।

- The researchers conducted experiments in **Spain** and **Japan**, observing groups of adults, teenagers, and nursery school children.

शोधकर्ताओं ने **स्पेन** और **जापान** में प्रयोग किए, जिनमें वयस्कों, किशोरों तथा नर्सरी विद्यालय के बच्चों के समूहों का अवलोकन किया गया।

- They found that the tendency to move **counter-clockwise** exists even when a person is walking alone in an empty arena and social norms, such as whether a country drives on the right or the left, didn't change the pattern.

उन्होंने पाया कि **वामावर्त दिशा** में चलने की प्रवृत्ति तब भी मौजूद रहती है जब कोई व्यक्ति अकेले किसी खाली क्षेत्र में चल रहा हो, और सामाजिक मानदंड, जैसे किसी देश में दाईं या बाईं ओर वाहन चलाने की व्यवस्था, इस प्रवृत्ति को प्रभावित नहीं करते।

- The preference also didn't depend on whether one was **left- or right-handed** and whether they had a '**dominant**' eye.

यह प्रवृत्ति इस बात पर भी निर्भर नहीं करती कि कोई व्यक्ति **बाएँ हाथ** या **दाएँ हाथ** का प्रयोग करता है अथवा उसकी कोई **प्रमुख (Dominant) आँख** है।

- The children displayed the preference in the most pronounced manner, which suggested the preference could be an **intrinsic part of human locomotion**.

बच्चों में यह प्रवृत्ति सबसे अधिक स्पष्ट रूप से दिखाई दी, जिससे संकेत मिलता है कि यह प्रवृत्ति **मानव गमन (Human Locomotion) का एक अंतर्निहित भाग** हो सकती है।

AI sovereignty hawks see red as U.S. moves to block Mythos, Fable models

GS III: S&T

Aroon Deep
NEW DELHI

The U.S.'s abrupt decision to restrict access to AI firm Anthropic's Mythos and Fable large language models is leading an "I told you so" moment for national security hawks within the Indian government, who had dealt for months with skepticism and sparse resources in supporting sovereign efforts to develop an Indian AI stack.

"Globalisation is dead, and Bharat must find its own way ahead," Sridhar Vembu, founder of Zoho and a member of India's National Security Advisory Board (NSAB), declared on X shortly after Anthropic announced the export controls. "What can our government do right now? Ensure that organisations in India embrace smaller models, both Indian and Chinese open-source ones. With a bit of effort, we can make them work. Anyway, why pay money to people who don't even want to sell to you?," he posted.

The U.S. government ordered Anthropic to disable Mythos and Fable access for non-U.S. nationals, even within its own company, on Friday evening.

Mythos is a model which Anthropic claims has been highly accomplished in finding and patching cybersecurity vulnerabilities that even human researchers had missed over decades.

Amid concerns that AI-generated cyberattacks may be a threat to Indian companies and government entities, India sought access to Mythos, and some entities joined the so-called Project Glasswing to gain some access earlier this month. That access

India had sought access to Mythos amid AI-generated cyberattack concerns.

may now be disrupted. The Ministry of Electronics and Information Technology (MeitY) and the Ministry of External Affairs, which have been in touch with Anthropic and the U.S. government regarding Project Glasswing, did not respond to queries from *The Hindu*. The Indian Cybercrime Coordination Centre (I4C), which reportedly gained access to Mythos this month, along with the cybersecurity agency CERT-in, which operates under MeitY, also did not respond.

Even some less cybersecurity-focused projects are experiencing disruptions due to the U.S.'s move.

The restriction of Fable, which has been available for all paying users of Claude, had immediate fallout on Saturday.

For instance, Vikram Chandra, an entrepreneur and journalist, said on X, "I have projects that were to run on Fable today – and they will come to a grinding halt... Yes, guardrails for frontier AI are essential – and Anthropic itself has argued for them. But creating national barriers isn't the solution."

India's capabilities to train a frontier AI model lag behind those of China, which itself is a few steps behind the U.S. While Beijing is home to firms like DeepSeek, which uses slightly older graphics processing units (GPUs) in large quantities, with abundant access to data centre capacity and electricity, to try to catch up to the more efficient U.S. models made by firms like Anthropic and ChatGPT, India has a relatively limited capacity of such resources to train large language models (LLMs) like Claude's Opus, Mythos, and Fable.

While a hypothetical Indian alternative to Mythos wouldn't be subject to abrupt geopolitical interruptions, actually creating such an LLM is dependent on the availability of abundant quantities of expensive AI chips from firms like Nvidia, data centre capacity, and electricity availability to boot.

Since the costs run into tens of billions of dollars, sovereign AI proponents' ambitions have been limited. Even Mr. Vembu, who has been critical of over-reliance on foreign tech and whose firm has been appointed to run email inboxes of Union government employees, struck a realistic note on the potential.

"We must deepen our R&D," Mr. Vembu said.

"Sarvam has been on it and we have been on it, but remember that the latest models cost not only huge GPU budgets to train; the GPUs themselves are restricted. So, we can't afford the scale of money (of the order of $100+ billion to even get in the game!), and even if we could come up with the money, we can't get all the GPUs. I would not like to ask the government to fund tens of billions of dollars on this anyway – the money has far better uses," he said. He advocated lower-cost research like what Zoho was undertaking.

"We are way behind and need a national mission to get going quickly," T.V. Mohandas Pai, former CFO of Infosys, who consults closely with the government on technology-related issues, said on X.

"Existing government programs are too slow, way too small to make any large impact. We need an annual ₹50,000 crore fund for deep tech and AI, a ₹2,00,000 crore ELGS [Emergency Credit Line] Guarantee Fund to build Hyper cloud, hardware and chips."

At least one firm has seen some progress, however: Bengaluru-based Sarvam AI launched a 105 billion parameter LLM that is specifically trained with an Indian bias (to counter the U.S.-centricity in most LLMs). While this model is capable of coding tasks, it is far from a frontier-class model for ambitious cybersecurity work.

"A few Indian friends of mine who had access to the Mythos model told me genuinely how terrifying it was," C.S. Akshay, a cybersecurity researcher who has uncovered several vulnerabilities in Indian government and private websites in the past, said in a LinkedIn post. "You just point it to anything and it does uncover vulnerabilities unlike anything they have seen before." While responses to Mythos are occasionally tempered by less advanced LLMs discovering similar software bugs, its true potential remains gatekept to Project Glasswing members of whom there are only a few dozens, most in the U.S.

14J6. AI sovereignty hawks see red as U.S. moves to block Mythos, Fable models

एआई संप्रभुता के समर्थक चिंतित, क्योंकि अमेरिका ने Mythos और Fable मॉडलों पर रोक लगाई

- The **U.S.'s** abrupt decision to restrict access to AI firm **Anthropic's Mythos and Fable large language models** is leading an "I told you so" moment for **national security hawks** within

the Indian government, who had dealt for months with skepticism and sparse resources in supporting **sovereign efforts** to develop an Indian **AI stack**.

अमेरिका के **Anthropic के Mythos और Fable बड़े भाषा मॉडलों** तक पहुंच को सीमित करने के अचानक निर्णय ने भारत सरकार के भीतर **राष्ट्रीय सुरक्षा समर्थकों** को यह कहने का अवसर दिया है कि उन्होंने पहले ही चेतावनी दी थी। ये लोग कई महीनों से भारतीय **एआई स्टैक** विकसित करने के लिए **संप्रभु प्रयासों** का समर्थन करते हुए संदेह और सीमित संसाधनों का सामना कर रहे थे।

- "**Globalisation** is dead, and **Bharat** must find its own way ahead," **Sridhar Vembu**, founder of **Zoho** and a member of India's **National Security Advisory Board (NSAB)**, declared on X shortly after Anthropic announced the export controls.

  "**वैश्वीकरण** समाप्त हो चुका है, और **भारत** को आगे बढ़ने का अपना रास्ता स्वयं खोजना होगा," **Zoho** के संस्थापक और भारत के **राष्ट्रीय सुरक्षा सलाहकार बोर्ड (NSAB)** के सदस्य **श्रीधर वेम्बू** ने Anthropic द्वारा निर्यात नियंत्रण की घोषणा के तुरंत बाद X पर कहा।
- "What can our government do right now? Ensure that organisations in India embrace **smaller models**, both Indian and Chinese **open-source** ones. With a bit of effort, we can make them work. Anyway, why pay money to people who don't even want to sell to you?," he posted.

  "हमारी सरकार अभी क्या कर सकती है? यह सुनिश्चित करे कि भारत के संगठन **छोटे मॉडलों** को अपनाएं, चाहे वे भारतीय हों या चीनी **ओपन-सोर्स** मॉडल। थोड़े प्रयास से हम उन्हें उपयोगी बना सकते हैं। वैसे भी, उन लोगों को पैसा क्यों दें जो आपको बेचने तक नहीं चाहते?" उन्होंने पोस्ट किया।
- The **U.S. government** ordered Anthropic to disable **Mythos and Fable** access for non-U.S. nationals, even within its own company, on Friday evening.

  अमेरिकी सरकार ने शुक्रवार शाम Anthropic को अपने ही संगठन के भीतर गैर-अमेरिकी नागरिकों के लिए **Mythos और Fable** की पहुंच बंद करने का आदेश दिया।
- **Mythos** is a model which Anthropic claims has been highly accomplished in finding and patching **cybersecurity vulnerabilities** that even human researchers had missed over decades.

  Mythos एक ऐसा मॉडल है जिसके बारे में Anthropic का दावा है कि यह उन **साइबर सुरक्षा कमजोरियों** को खोजने और ठीक करने में अत्यधिक सक्षम है जिन्हें मानव शोधकर्ता दशकों तक नहीं पहचान सके।
- Amid concerns that **AI-generated cyberattacks** may be a threat to Indian companies and government entities, India sought access to Mythos, and some entities joined the so-called **Project Glasswing** to gain some access earlier this month.

  इस चिंता के बीच कि **एआई-जनित साइबर हमले** भारतीय कंपनियों और सरकारी संस्थाओं के लिए खतरा बन सकते हैं, भारत ने Mythos तक पहुंच की मांग की और कुछ संस्थाएं इस महीने की शुरुआत में **Project Glasswing** से जुड़ीं ताकि सीमित पहुंच प्राप्त की जा सके।
- That access may now be disrupted.

  अब वह पहुंच बाधित हो सकती है।
- The **Ministry of Electronics and Information Technology (MeitY)** and the **Ministry of External Affairs**, which have been in touch with Anthropic and the U.S. government regarding Project Glasswing, did not respond to queries from The Hindu.

  इलेक्ट्रॉनिक्स और सूचना प्रौद्योगिकी मंत्रालय (MeitY) तथा **विदेश मंत्रालय**, जो Project Glasswing के संबंध में Anthropic और अमेरिकी सरकार के संपर्क में थे, ने The Hindu के प्रश्नों का उत्तर नहीं दिया।
- The **Indian Cybercrime Coordination Centre (I4C)**, which reportedly gained access to Mythos this month, along with the cybersecurity agency **CERT-In**, which operates under MeitY, also did not respond.

  भारतीय साइबर अपराध समन्वय केंद्र (I4C), जिसे इस महीने Mythos तक पहुंच मिली थी, तथा MeitY के अंतर्गत कार्यरत साइबर सुरक्षा एजेंसी **CERT-In** ने भी कोई उत्तर नहीं दिया।
- Even some less cybersecurity-focused projects are experiencing disruptions due to the U.S.'s move.

  अमेरिका के इस कदम के कारण कुछ कम साइबर सुरक्षा-केंद्रित परियोजनाएं भी प्रभावित हो रही हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in

Website : patrioticias.in

- The restriction of **Fable**, which has been available for all paying users of **Claude**, had immediate fallout on Saturday.
  Claude के सभी भुगतान करने वाले उपयोगकर्ताओं के लिए उपलब्ध **Fable** पर लगाए गए प्रतिबंध का प्रभाव शनिवार को तुरंत दिखाई दिया।
- For instance, **Vikram Chandra**, an entrepreneur and journalist, said on X, "I have projects that were to run on Fable today — and they will come to a grinding halt... Yes, guardrails for frontier AI are essential — and Anthropic itself has argued for them. But creating national barriers isn't the solution."
  उदाहरण के लिए, उद्यमी और पत्रकार **विक्रम चंद्रा** ने X पर कहा, "मेरी कुछ परियोजनाएं आज Fable पर चलनी थीं — और अब वे पूरी तरह रुक जाएंगी... हां, उन्नत एआई के लिए सुरक्षा उपाय आवश्यक हैं — और Anthropic स्वयं भी इसके पक्ष में रहा है। लेकिन राष्ट्रीय बाधाएं बनाना समाधान नहीं है।"
- India's capabilities to train a **frontier AI model** lag behind those of China, which itself is a few steps behind the U.S.
  फ्रंटियर एआई मॉडल विकसित करने की भारत की क्षमता चीन से पीछे है, और चीन स्वयं अमेरिका से कुछ कदम पीछे है।
- While Beijing is home to firms like **DeepSeek**, which uses slightly older **GPUs** in large quantities, with abundant access to **data centre capacity** and electricity, to try to catch up to the more efficient U.S. models made by firms like Anthropic and ChatGPT, India has a relatively limited capacity of such resources to train **large language models (LLMs)** like Claude's Opus, Mythos, and Fable.
  जहां बीजिंग में **DeepSeek** जैसी कंपनियां बड़ी संख्या में अपेक्षाकृत पुराने **GPU** का उपयोग करते हुए पर्याप्त **डेटा सेंटर क्षमता** और बिजली की उपलब्धता के सहारे Anthropic और ChatGPT जैसे अमेरिकी मॉडलों की बराबरी करने का प्रयास कर रही हैं, वहीं भारत के पास Claude के Opus, Mythos और Fable जैसे **बड़े भाषा मॉडलों (LLMs)** को प्रशिक्षित करने के लिए अपेक्षाकृत सीमित संसाधन हैं।
- While a hypothetical Indian alternative to Mythos wouldn't be subject to abrupt geopolitical interruptions, actually creating such an LLM is dependent on the availability of abundant quantities of expensive **AI chips** from firms like **Nvidia**, data centre capacity, and electricity availability to boot.
  हालांकि Mythos का कोई भारतीय विकल्प अचानक भू-राजनीतिक व्यवधानों से प्रभावित नहीं होगा, लेकिन ऐसा **LLM** विकसित करना **Nvidia** जैसी कंपनियों के महंगे **एआई चिप्स**, डेटा सेंटर क्षमता और बिजली की पर्याप्त उपलब्धता पर निर्भर करता है।
- Since the costs run into tens of billions of dollars, **sovereign AI** proponents' ambitions have been limited.
  चूंकि इसकी लागत कई अरब डॉलर तक पहुंचती है, इसलिए **संप्रभु एआई** समर्थकों की महत्वाकांक्षाएं सीमित रही हैं।
- Even Mr. Vembu, who has been critical of over-reliance on foreign tech and whose firm has been appointed to run email inboxes of Union government employees, struck a realistic note on the potential.
  विदेशी तकनीक पर अत्यधिक निर्भरता की आलोचना करने वाले और जिनकी कंपनी को केंद्र सरकार के कर्मचारियों के ईमेल इनबॉक्स संचालित करने की जिम्मेदारी दी गई है, श्री वेम्बू ने भी इस विषय पर यथार्थवादी दृष्टिकोण प्रस्तुत किया।
- "We must deepen our **R&D**," Mr. Vembu said.
  "हमें अपने **अनुसंधान एवं विकास (R&D)** को और गहरा करना होगा," श्री वेम्बू ने कहा।
- "Sarvam has been on it and we have been on it, but remember that the latest models cost not only huge **GPU budgets** to train; the GPUs themselves are restricted. So, we can't afford the scale of money (of the order of **$100+ billion** to even get in the game!), and even if we could come up with the money, we can't get all the GPUs. I would not like to ask the government to fund tens of billions of dollars on this anyway — the money has far better uses," he said.
  उन्होंने कहा, "**Sarvam** और हम इस दिशा में काम कर रहे हैं, लेकिन याद रखें कि नवीनतम मॉडलों को प्रशिक्षित करने के लिए केवल बड़े **GPU बजट** ही नहीं चाहिए, बल्कि स्वयं GPU भी प्रतिबंधित हैं। इसलिए हम

100 अरब डॉलर से अधिक की राशि खर्च नहीं कर सकते, और यदि पैसा उपलब्ध भी हो जाए तो भी सभी GPU नहीं मिल पाएंगे। मैं सरकार से इस पर इतने अरबों डॉलर खर्च करने का आग्रह नहीं करूंगा — इस धन के और भी बेहतर उपयोग हैं।"

- He advocated lower-cost research like what Zoho was undertaking.
  उन्होंने Zoho द्वारा किए जा रहे कम-लागत वाले अनुसंधान का समर्थन किया।
- "We are way behind and need a **national mission** to get going quickly," **T.V. Mohandas Pai**, former CFO of **Infosys**, who consults closely with the government on technology-related issues, said on X.
  "हम बहुत पीछे हैं और तेजी से आगे बढ़ने के लिए एक **राष्ट्रीय मिशन** की आवश्यकता है," तकनीकी मामलों में सरकार के सलाहकार और **Infosys** के पूर्व CFO **टी.वी. मोहनदास पाई** ने X पर कहा।
- "Existing government programs are too slow, way too small to make any large impact. We need an annual **₹50,000 crore fund** for deep tech and AI, a **₹2,00,000 crore ELGS (Emergency Credit Line) Guarantee Fund** to build Hyper cloud, hardware and chips."
  "मौजूदा सरकारी कार्यक्रम बहुत धीमे और बहुत छोटे हैं, जिनका बड़ा प्रभाव नहीं पड़ सकता। हमें **डीप टेक और एआई** के लिए प्रतिवर्ष **₹50,000 करोड़ का कोष** तथा Hyper Cloud, हार्डवेयर और चिप निर्माण के लिए **₹2,00,000 करोड़ का ELGS (Emergency Credit Line) Guarantee Fund** चाहिए।"
- At least one firm has seen some progress, however: **Bengaluru-based Sarvam AI** launched a **105 billion parameter LLM** that is specifically trained with an Indian bias (to counter the U.S.-centricity in most LLMs).
  हालांकि कम से कम एक कंपनी ने कुछ प्रगति की है: **बेंगलुरु स्थित Sarvam AI** ने **105 बिलियन पैरामीटर वाला LLM** लॉन्च किया है, जिसे विशेष रूप से भारतीय दृष्टिकोण के साथ प्रशिक्षित किया गया है ताकि अधिकांश LLMs में मौजूद अमेरिकी-केंद्रितता का मुकाबला किया जा सके।
- While this model is capable of coding tasks, it is far from a **frontier-class model** for ambitious cybersecurity work.
  हालांकि यह मॉडल कोडिंग कार्य करने में सक्षम है, लेकिन महत्वाकांक्षी साइबर सुरक्षा कार्यों के लिए यह अभी **फ्रंटियर-स्तरीय मॉडल** से काफी दूर है।
- "A few Indian friends of mine who had access to the **Mythos model** told me genuinely how terrifying it was," **C.S. Akshay**, a cybersecurity researcher who has uncovered several vulnerabilities in Indian government and private websites in the past, said in a LinkedIn post.
  "मेरे कुछ भारतीय मित्रों, जिन्हें **Mythos मॉडल** तक पहुंच मिली थी, ने मुझे बताया कि यह वास्तव में कितना भयावह रूप से शक्तिशाली था," भारतीय सरकारी और निजी वेबसाइटों की कई कमजोरियों का खुलासा कर चुके साइबर सुरक्षा शोधकर्ता **सी.एस. अक्षय** ने LinkedIn पोस्ट में कहा।
- "You just point it to anything and it does uncover vulnerabilities unlike anything they have seen before."
  "आप इसे किसी भी प्रणाली की ओर निर्देशित करें और यह ऐसी कमजोरियों का पता लगा लेता है जैसी उन्होंने पहले कभी नहीं देखीं।"
- While responses to Mythos are occasionally tempered by less advanced LLMs discovering similar software bugs, its true potential remains gatekept to **Project Glasswing** members of whom there are only a few dozens, most in the U.S.
  हालांकि कभी-कभी कम उन्नत LLM भी समान सॉफ्टवेयर त्रुटियां खोज लेते हैं, फिर भी Mythos की वास्तविक क्षमता अभी भी **Project Glasswing** के सीमित सदस्यों तक ही सीमित है, जिनकी संख्या केवल कुछ दर्जन है और जिनमें अधिकांश अमेरिका में हैं।

Dr. Reddy's launches generic cancer drug Bosutinib in U.S.

GS III: S&T

N. Ravi Kumar
HYDERABAD

Dr. Reddy's Laboratories announced on Saturday the first-to-market launch of Bosutinib Tablets 400 mg, a generic equivalent of Pfizer subsidiary Wyeth's cancer drug Bosulif, in the U.S. Bosutinib Tablets (400mg) was a first-to-file product and thus eligible for 180-days of generic drug exclusivity for this strength, in the U.S., Dr. Reddy's said.

While the exclusive marketing rights for the product in the U.S. rest with Dr. Reddy's, another Hyderabad-based generic drugmaker MSN Laboratories is responsible for the development and manufacturing of the product, the company said.

A view of Dr. Reddy's Laboratories in Hyderabad

The Bosulif brand (400 mg) had U.S. sales of approximately $253.8 million for the latest 12-month period ended April 2026, it said, citing IQVIA National Sales Perspectives data.

"With this launch, we remain focused on strengthening our oncology portfolio and partnering across the healthcare system to ensure that critical treatments are both accessible and affordable," CEO-North America of Dr. Reddy's Milan Kalawadia said.

The successful development and commercialisation of Bosutinib Tablets demonstrates MSN's strong scientific, regulatory, and manufacturing capabilities in complex oncology products, said Bharat Reddy, Executive Director of MSN Laboratories.

According to the U.S. FDA, Bosulif is a kinase inhibitor indicated for the treatment of adult patients with newly-diagnosed chronic phase Ph+ chronic myelogenous leukemia (CML); and chronic, accelerated or blast phase Ph+ CML with resistance or intolerance to prior therapy.

14J6. Dr. Reddy's launches generic cancer drug Bosutinib in the U.S. डॉ. रेड्डीज़ ने अमेरिका में जेनेरिक कैंसर दवा Bosutinib लॉन्च की

- **Dr. Reddy's Laboratories** announced on Saturday the **first-to-market launch** of **Bosutinib Tablets 400 mg**, a generic equivalent of **Pfizer subsidiary Wyeth's** cancer drug **Bosulif**, in the U.S.

डॉ. रेड्डीज़ लेबोरेटरीज ने शनिवार को अमेरिका में **Bosutinib Tablets 400 mg** के **पहले बाज़ार लॉन्च** की घोषणा की, जो **Pfizer** की सहायक कंपनी **Wyeth** की कैंसर दवा **Bosulif** का जेनेरिक समकक्ष है।

- **Bosutinib Tablets (400mg)** was a **first-to-file product** and thus eligible for **180-days of generic drug exclusivity** for this strength, in the U.S., Dr. Reddy's said.

डॉ. रेड्डीज़ ने कहा कि **Bosutinib Tablets (400mg)** एक **first-to-file product** था और इसलिए अमेरिका में इस शक्ति के लिए **180 दिनों की जेनेरिक दवा विशिष्टता (generic drug exclusivity)** का पात्र बना।

- While the **exclusive marketing rights** for the product in the U.S. rest with **Dr. Reddy's**, another Hyderabad-based generic drugmaker **MSN Laboratories** is responsible for the development and manufacturing of the product, the company said.

कंपनी ने कहा कि अमेरिका में इस उत्पाद के **विशेष विपणन अधिकार डॉ. रेड्डीज़** के पास हैं, जबकि हैदराबाद स्थित एक अन्य जेनेरिक दवा निर्माता **MSN Laboratories** इस उत्पाद के विकास और निर्माण के लिए जिम्मेदार है।

- The **Bosulif** brand (400 mg) had U.S. sales of approximately **$253.8 million** for the latest 12-month period ended April 2026, it said, citing **IQVIA National Sales Perspectives** data.

कंपनी ने **IQVIA National Sales Perspectives** के आंकड़ों का हवाला देते हुए कहा कि **Bosulif** ब्रांड (400 mg) की अप्रैल 2026 तक समाप्त पिछले 12 महीनों की अवधि में अमेरिका में लगभग **253.8 मिलियन डॉलर** की बिक्री हुई।

- "With this launch, we remain focused on strengthening our **oncology portfolio** and partnering across the healthcare system to ensure that critical treatments are both **accessible** and **affordable**," **CEO-North America** of Dr. Reddy's **Milan Kalawadia** said.

"इस लॉन्च के साथ, हम अपने **ऑन्कोलॉजी पोर्टफोलियो** को मजबूत करने और स्वास्थ्य सेवा प्रणाली में

साझेदारी बढ़ाने पर केंद्रित हैं ताकि महत्वपूर्ण उपचार **सुलभ** और **किफायती** दोनों बने रहें," डॉ. रेड्डीज़ के **CEO-North America मिलान कलावाडिया** ने कहा।

- The successful development and commercialisation of **Bosutinib Tablets** demonstrates **MSN's** strong scientific, regulatory, and manufacturing capabilities in complex oncology products, said **Bharat Reddy**, Executive Director of MSN Laboratories.
  MSN Laboratories के कार्यकारी निदेशक **भारत रेड्डी** ने कहा कि **Bosutinib Tablets** का सफल विकास और व्यावसायीकरण जटिल ऑन्कोलॉजी उत्पादों में MSN की मजबूत **वैज्ञानिक, नियामकीय और विनिर्माण क्षमताओं** को दर्शाता है।
- According to the **U.S. FDA**, **Bosulif** is a **kinase inhibitor** indicated for the treatment of adult patients with newly-diagnosed **chronic phase Ph+ chronic myelogenous leukemia (CML)**; and chronic, accelerated or blast phase **Ph+ CML** with resistance or intolerance to prior therapy.
  अमेरिकी FDA के अनुसार, **Bosulif** एक **किनेज़ अवरोधक (kinase inhibitor)** है, जिसका उपयोग नव-निदानित **क्रॉनिक फेज़ Ph+ क्रॉनिक मायलोजेनस ल्यूकेमिया (CML)** वाले वयस्क रोगियों के उपचार में किया जाता है; तथा ऐसे **Ph+ CML** रोगियों में भी किया जाता है जिनमें पूर्व उपचार के प्रति प्रतिरोध या असहिष्णुता हो और रोग क्रॉनिक, त्वरित (accelerated) या ब्लास्ट फेज़ में हो।

Teeming peacock population poses new challenges to farmers, foresters

GS III: Environment

K. Umashanker
KUPPAM

In the rural areas of Kuppam region in Andhra Pradesh's Chittoor district, flanked by Tamil Nadu and Karnataka, peacocks are as much a part of the landscape as the granite outcrops and scrub forests that define the tri-State terrain.

Till a decade ago, the Indian peafowl was confined to the forest fringes, but now the bird is a frequent visitor to villages, agricultural fields, and even institutional campuses across the region.

At home: A peacock perched on a tree on the outskirts of Kuppam in Chittoor district, Andhra Pradesh. SPECIAL ARRANGEMENT

The forest authorities of Chittoor confirm that the bird's population is growing steadily. "The peacock is a Schedule-I species under the Wildlife (Protection) Act, enjoying the same level of legal protection as the tiger. But unlike the tiger, whose conservation remains a challenge in many parts of the country, peacock numbers have been increasing consistently, not only in Kuppam but across India," says District Forest Officer G. Subburaj.

The forests of the Kuppam region continue to provide an ideal habitat for peafowl. Open forests, cultivated fields, seasonal water sources, and rocky elevations offer abundant food and safe roosting sites.

Across several hamlets and semi-urban villages as well, farmers express concern over increasing crop damage caused by peacocks. Paddy fields are the worst hit, while vegetable crops and cereal plantations also bear the brunt.

14J6. Teeming peacock population poses new challenges to farmers, foresters
बढ़ती मोर आबादी किसानों और वन अधिकारियों के लिए नई चुनौतियाँ पैदा कर रही है

- In the rural areas of **Kuppam region** in **Andhra Pradesh's Chittoor district**, ranked by **Tamil Nadu** and **Karnataka**, peacocks are as much a part of the landscape as the granite outcrops and scrub forests that de• ne the tri-State terrain.
  आंध्र प्रदेश के चित्तूर जिले के **कुप्पम क्षेत्र** के ग्रामीण इलाकों में, जो **तमिलनाडु** और **कर्नाटक** से घिरा हुआ है, मोर वहाँ के परिदृश्य का उतना ही अभिन्न हिस्सा हैं जितने कि ग्रेनाइट चट्टानी उभार और झाड़ीदार वन, जो इस त्रि-राज्यीय भूभाग की पहचान हैं।

- Till a decade ago, the **Indian peafowl** was confined to the forest fringes, but now the bird is a frequent visitor to villages, agricultural fields, and even institutional campuses across the region.
  लगभग एक दशक पहले तक **भारतीय मोर (Indian Peafowl)** केवल जंगलों के किनारों तक सीमित था, लेकिन अब यह पक्षी गाँवों, कृषि क्षेत्रों और यहाँ तक कि पूरे क्षेत्र के संस्थागत परिसरों में भी नियमित रूप से दिखाई देता है।
- The forest authorities of **Chittoor** confirm that the bird's population is growing steadily.
  चित्तूर के वन अधिकारी पुष्टि करते हैं कि इस पक्षी की आबादी लगातार बढ़ रही है।
- "The **peacock** is a **Schedule-I species** under the **Wildlife (Protection) Act**, enjoying the same level of legal protection as the **tiger**.
  "**मोर वन्यजीव (संरक्षण) अधिनियम** के तहत **अनुसूची-I प्रजाति** है और इसे **बाघ** के समान कानूनी संरक्षण प्राप्त है।
- But unlike the tiger, whose conservation remains a challenge in many parts of the country, peacock numbers have been increasing consistently, not only in **Kuppam** but across **India**," says **District Forest O• cer G. Subburaj**.
  लेकिन **बाघ** के विपरीत, जिसका संरक्षण अभी भी देश के कई हिस्सों में चुनौती बना हुआ है, मोरों की संख्या लगातार बढ़ रही है, केवल **कुप्पम** में ही नहीं बल्कि पूरे **भारत** में," **जिला वन अधिकारी जी. सुब्बुराज** कहते हैं।
- The forests of the **Kuppam region** continue to provide an ideal habitat for peafowl.
  कुप्पम क्षेत्र के वन अब भी मोरों के लिए एक आदर्श आवास प्रदान करते हैं।
- Open forests, cultivated • elds, seasonal water sources, and rocky elevations o• er abundant food and safe roosting sites.
  खुले वन, खेती वाले खेत, मौसमी जल स्रोत और चट्टानी ऊँचाइयाँ उन्हें भरपूर भोजन और सुरक्षित विश्राम स्थल उपलब्ध कराती हैं।
- Across several hamlets and semi-urban villages as well, farmers express concern over increasing crop damage caused by **peacocks**.
  कई बस्तियों और अर्ध-शहरी गाँवों में भी किसान **मोरों** द्वारा बढ़ते फसल नुकसान को लेकर चिंता व्यक्त कर रहे हैं।
- **Paddy • elds** are the worst hit, while vegetable crops and cereal plantations also bear the brunt.
  धान के खेत सबसे अधिक प्रभावित हैं, जबकि सब्ज़ी फसलें और अनाज की खेती भी इसका गंभीर प्रभाव झेल रही हैं।

An-32 cargo plane crash kills 5 IAF men in Assam

GS III: Internal Security

The Hindu Bureau
GUWAHATI

Five Indian Air Force (IAF) personnel were killed after an An-32 cargo aircraft met with an accident while landing at the Jorhat airbase in eastern Assam on Saturday.

The deceased were Squadron Leader Prashant Singh, Flight Lieutenant Shubham Kumar, Sergeant Jitendra Sharma, Agniveervayu Khemaram Kumawat, and Agniveervayu Danish Alam, the IAF said in a statement.

Six personnel were on the plane and the co-pilot is undergoing treatment at a military hospital in Jorhat for injuries, the news agency PTI reported.

Landing accident: Remains of the transport aircraft of the IAF that crashed while landing in Jorhat district, Assam, on Saturday. PTI

The IAF did not provide details of the accident, but said it occurred at 10 a.m. while the aircraft, belonging to 43 Squadron, was landing at its airbase in the Rowriah area of Jorhat.

"A court of inquiry is being constituted to ascertain the cause of the accident," the IAF statement read.

The PTI reported that the aircraft was set to fly to Chabua from Jorhat, but requested a landing shortly after taking off.

The aircraft lost control upon touchdown and skidded off the runway, hurtling across a parallel taxiway and snapping into two segments before being engulfed in flames, the PTI added, citing sources.

A Defence spokesperson said the entire Air Force Station was sealed after the accident, and no entry was allowed.

Minister mourns loss

Defence Minister Rajnath Singh mourned the loss of the five airmen. "Their courage and service to the nation will always be remembered with pride and gratitude," Mr. Singh said.

"On behalf of the people of Assam, I offer my thoughts and prayers with the bereaved families. The Government of Assam is in touch with the concerned authorities and is ready to offer any support and assistance," Chief Minister Himanta Biswa Sarma posted onm X.

Expressing his condolences to the bereaved families, Assam Congress chief Gaurav Gogoi called for a proper inquiry into the deaths of the five personnel.

"I urge the government and the Defence Ministry to conduct a proper inquiry into the mishap and identify the primary cause so that measures are taken to prevent such accidents in the future," he said in a social media post.

(With PTI inputs)

'Deep-seated' bias for male child persists in society: SC

GS I: Society

Aaratrika Bhaumik
NEW DELHI

The Supreme Court has observed that though the country's child sex ratio has shown "clear signs of improvement", the continued prevalence of sex selection practices reflects "deep-seated patriarchal preferences" for a male child.

A Bench of Justices Sanjay Karol and P.K. Mishra made the observation while dismissing a Maharashtra doctor's appeal challenging criminal proceedings against him under the Pre-Conception and Pre-Natal Diagnostic Techniques (Prohibition of Sex Selection) Act, 1994 (PCPNDT Act).

Referring to various schemes introduced by State governments to curb female foeticide, the court said these reflected sustained efforts to address the systemic discrimination faced by "the girl child in an inherently patriarchal" society.

The court noted that the country continues to face significant gaps in gender parity

However, it pointed out that several States continue to record sex ratios at birth below the national average. "...the country's sex ratio has shown clear signs of improvement in recent years... Nonetheless, several States still report sex ratios at birth below the national average. This shows the continuing presence of deep-seated patriarchal preferences towards a male child and the 'behind the curtains' prevalence of sex selection practices," the Bench said.

Accordingly, the top court stressed that strict enforcement of the PCPNDT Act would remain essential until entrenched social attitudes towards the girl child undergo change.

The judges also noted the country continues to face significant challenges in achieving gender parity when assessed against global indicators. "On a global level though, unfortunately, the data does not present a positive outlook. The World Economic Forum's Global Gender Gap Report 2025 records a drop in our ranking in terms of overall gender parity score from the previous year to 131 out of 148, from 129 the previous year", the Bench said.

Accordingly, the Bench refused to quash the criminal proceedings against the doctor, underlining that "letting infractions slide" would defeat the purpose of the PCPNDT Act.

13J6. 'Deep-seated' bias for male child persists in society: SC

पुरुष बच्चे के प्रति 'गहरी जड़ें जमाए' पक्षपात समाज में अब भी मौजूद: सुप्रीम कोर्ट

- The **Supreme Court** has observed that though the country's **child sex ratio** has shown "clear signs of improvement", the continued prevalence of **sex selection practices** reflects "deep-seated **patriarchal preferences**" for a **male child**.

सुप्रीम कोर्ट ने कहा है कि यद्यपि देश के **बाल लिंगानुपात** में "सुधार के स्पष्ट संकेत" दिखाई दिए हैं, फिर भी **लिंग चयन की प्रथाओं** का लगातार बने रहना **पुरुष बच्चे** के प्रति "गहरी जड़ें जमाए **पितृसत्तात्मक प्राथमिकताओं**" को दर्शाता है।

- A Bench of Justices **Sanjay Karol** and **P.K. Mishra** made the observation while dismissing a Maharashtra doctor's appeal challenging criminal proceedings against him under the **Pre-Conception and Pre-Natal Diagnostic Techniques (Prohibition of Sex Selection) Act, 1994 (PCPNDT Act)**.

न्यायमूर्ति **संजय करोल** और **पी.के. मिश्रा** की पीठ ने यह टिप्पणी महाराष्ट्र के एक डॉक्टर की उस अपील को खारिज करते हुए की, जिसमें उसने **पूर्व गर्भाधान एवं प्रसवपूर्व निदान तकनीक (लिंग चयन निषेध) अधिनियम, 1994 (PCPNDT Act)** के तहत उसके विरुद्ध चल रही आपराधिक कार्यवाही को चुनौती दी थी।

- Referring to various schemes introduced by **State governments** to curb **female foeticide**, the court said these reflected sustained efforts to address the systemic discrimination faced by "the **girl child** in an inherently patriarchal" society.

कन्या भ्रूण हत्या को रोकने के लिए **राज्य सरकारों** द्वारा शुरू की गई विभिन्न योजनाओं का उल्लेख करते हुए न्यायालय ने कहा कि ये एक स्वाभाविक रूप से **पितृसत्तात्मक समाज** में "**बालिका**" द्वारा झेले जाने वाले व्यवस्थित भेदभाव को दूर करने के निरंतर प्रयासों को दर्शाती हैं।

- However, it pointed out that several States continue to record **sex ratios at birth** below the national average.

हालाँकि, न्यायालय ने यह भी कहा कि कई राज्य अब भी जन्म के समय **लिंगानुपात** के मामले में राष्ट्रीय औसत से नीचे हैं।

- "...the country's **sex ratio** has shown clear signs of improvement in recent years... Nonetheless, several States still report **sex ratios at birth** below the national average. This shows the continuing presence of deep-seated **patriarchal preferences** towards a **male child** and the 'behind the curtains' prevalence of **sex selection practices**," the Bench said.

पीठ ने कहा, "...देश के **लिंगानुपात** में हाल के वर्षों में सुधार के स्पष्ट संकेत दिखाई दिए हैं... फिर भी कई राज्य अब भी जन्म के समय **लिंगानुपात** के मामले में राष्ट्रीय औसत से नीचे हैं। यह **पुरुष बच्चे** के प्रति गहरी जड़ें जमाए **पितृसत्तात्मक प्राथमिकताओं** तथा पर्दे के पीछे जारी **लिंग चयन की प्रथाओं** की मौजूदगी को दर्शाता है।"

- Accordingly, the top court stressed that strict enforcement of the **PCPNDT Act** would remain essential until entrenched social attitudes towards the **girl child** undergo change.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

तदनुसार, शीर्ष अदालत ने जोर देकर कहा कि **बालिका** के प्रति समाज में जमी हुई सोच में परिवर्तन आने तक **PCPNDT Act** का सख्ती से पालन आवश्यक रहेगा।

- The judges also noted the country continues to face significant challenges in achieving **gender parity** when assessed against global indicators.

न्यायाधीशों ने यह भी कहा कि वैश्विक संकेतकों के आधार पर आकलन करने पर देश को **लैंगिक समानता** प्राप्त करने में अब भी महत्वपूर्ण चुनौतियों का सामना करना पड़ रहा है।

- "On a global level though, unfortunately, the data does not present a positive outlook. पीठ ने कहा, "वैश्विक स्तर पर दुर्भाग्यवश आँकड़े सकारात्मक तस्वीर प्रस्तुत नहीं करते। **विश्व आर्थिक मंच की ग्लोबल जेंडर गैप रिपोर्ट 2025** के अनुसार समग्र **लैंगिक समानता स्कोर** के मामले में हमारी रैंकिंग पिछले वर्ष के **129** से घटकर **148 देशों में 131वें स्थान** पर आ गई है।"

- Accordingly, the Bench refused to quash the criminal proceedings against the doctor, underlining that "letting infractions slide" would defeat the purpose of the **PCPNDT Act**.

तदनुसार, पीठ ने डॉक्टर के विरुद्ध आपराधिक कार्यवाही को समाप्त करने से इनकार कर दिया और कहा कि उल्लंघनों को "अनदेखा करना" **PCPNDT Act** के उद्देश्य को विफल कर देगा।

SC dismisses Congress leader's plea on rejection of Rajya Sabha nomination

GS II: Polity

Aaratrika Bhaumik
NEW DELHI

Observing that courts should refrain from intervening in electoral processes, the Supreme Court on Friday dismissed Congress leader Meenakshi Natarajan's plea challenging the rejection of her Rajya Sabha nomination papers from Madhya Pradesh.

A Bench of Justices Prashant Kumar Mishra and A.S. Chandurkar observed that in view of Article 329(b) of the Constitution, it had no jurisdiction to interfere with the order of the Returning Officer (RO) and that an election petition was the only remedy available in such cases.

The provision stipulates that no election to either House of Parliament or a State legislature can be called in question except through an election petition.

> Whenever an attempt is made to invoke this court's or the High Court's writ jurisdiction to interject during the conduct of elections, on every occasion the court has rejected such an attempt, keeping in view the principles contained in Article 329 of the Constitution
> SUPREME COURT

"...Whenever an attempt is made to invoke this court's or the High Court's writ jurisdiction to interject during the conduct of elections, on every occasion, the court has rejected such an attempt, keeping in view the principles contained in Article 329 of the Constitution," the Bench said.

The top court was hearing a plea filed by Ms. Natarajan, the Congress's sole candidate for one of the three Rajya Sabha seats from Madhya Pradesh, challenging a June 9 order of the RO and Madhya Pradesh Assembly Principal Secretary Arvind Sharma rejecting her nomination on the ground that she had failed to disclose a pending criminal case in Hyderabad in her affidavit. BJP candidates Tarun Chugh, Rajneesh Agrawal and Mahesh Kewat were declared elected unopposed to Rajya Sabha on Thursday.

Appearing for Ms. Natarajan, senior advocate A.M. Singhvi argued that the RO's decision suffered from a "patent error" and warranted interference by the court. He also questioned the EC's decision to proceed with the results despite the top court being cognisant of the matter.

13J6. SC dismisses Congress leader's plea on rejection of Rajya Sabha nomination

राज्यसभा नामांकन खारिज होने के खिलाफ कांग्रेस नेता की याचिका SC ने खारिज की

- A Bench of Justices **Prashant Kumar Mishra** and **A.S. Chandurkar** observed that in view of **Article 329(b)** of the Constitution, it had no jurisdiction to interfere with the order of the **Returning Officer (RO)** and that an **election petition** was the only remedy available in such cases.

  न्यायमूर्ति प्रशांत कुमार मिश्रा और **ए.एस. चंदुरकर** की पीठ ने कहा कि संविधान के **अनुच्छेद 329(b)** को देखते हुए उसके पास **रिटर्निंग ऑफिसर (RO)** के आदेश में हस्तक्षेप करने का अधिकार क्षेत्र नहीं है तथा ऐसे मामलों में केवल **निर्वाचन याचिका** ही उपलब्ध उपाय है।
- The provision stipulates that no election to either House of Parliament or a State legislature can be called in question except through an election petition.

  यह प्रावधान निर्धारित करता है कि **संसद** के किसी भी सदन या किसी **राज्य विधानमंडल** के चुनाव को केवल **निर्वाचन याचिका** के माध्यम से ही चुनौती दी जा सकती है।
- The top court was hearing a plea filed by **Ms. Natarajan**, the **Congress's** sole candidate for one of the three **Rajya Sabha** seats from **Madhya Pradesh**, challenging a **June 9** order of the **RO** and **Madhya Pradesh Assembly Principal Secretary Arvind Sharma** rejecting her nomination on the ground that she had failed to disclose a pending criminal case in **Hyderabad** in her affidavit.

  शीर्ष न्यायालय **मीनाक्षी नटराजन** द्वारा दायर याचिका पर सुनवाई कर रहा था, जो **मध्य प्रदेश** से तीन **राज्यसभा** सीटों में से एक के लिए **कांग्रेस** की एकमात्र उम्मीदवार थीं। उन्होंने **9 जून** के उस आदेश को चुनौती दी थी जिसमें **RO** तथा **मध्य प्रदेश विधानसभा** के **प्रधान सचिव अरविंद शर्मा** ने उनका नामांकन इस आधार पर खारिज कर दिया था कि उन्होंने अपने शपथपत्र में **हैदराबाद** में लंबित एक आपराधिक मामले का खुलासा नहीं किया था।
- **BJP** candidates **Tarun Chugh, Rajneesh Agrawal and Mahesh Kewat** were declared elected unopposed to **Rajya Sabha** on Thursday.

  भाजपा उम्मीदवार **तरुण चुघ, रजनीश अग्रवाल और महेश केवट** को गुरुवार को **राज्यसभा** के लिए निर्विरोध निर्वाचित घोषित किया गया।

Minimum one Sanskrit batch required for Classes 6 & 9 in KV schools

GS II: Governance

Maitri Porecha
NEW DELHI

Every Kendriya Vidyalaya (KV) must maintain a minimum of one dedicated section of students learning Sanskrit as a third language in Classes 6 and 9, according to a circular issued by Kendriya Vidyalaya Sangathan (KVS), an autonomous body under the Union Education Ministry.

There are currently 1,288 functional KVs across the country, along with three operating internationally in Moscow, Kathmandu, and Tehran. The circular, dated May 29 and accessed by *The Hindu*, is meant for all KVs in India and abroad.

"KVS has ensured that the policy remains sensitive to its transferable student population by maintaining Sanskrit as a common option across all KVs, while offering regional languages as an alternative for those who are not subject to frequent transfers," a senior KVS official said, on the condition of anonymity.

The circular clarifies that the R3 choice (Sanskrit or a regional or State language from the scheduled languages) must be distinct from R1 (Hindi) and R2 (English).

Staffing and resources

The official acknowledged that a few KVs face challenges such as limited teacher availability and resource constraints, but insisted that the use of contractual teachers for regional languages, phased roll-out, and adoption of SCERT materials will help mitigate these constraints.

13J6. Minimum one Sanskrit batch required for Classes 6 & 9 in KV schools

केवी विद्यालयों में कक्षा 6 और 9 के लिए कम से कम एक संस्कृत बैच अनिवार्य

- Every **Kendriya Vidyalaya (KV)** must maintain a minimum of one dedicated section of students learning **Sanskrit** as a third language in **Classes 6 and 9**, according to a circular issued by **Kendriya Vidyalaya Sangathan (KVS)**, an autonomous body under the **Union Education Ministry**.

केंद्रीय विद्यालय (KV) में कक्षा **6 और 9** के विद्यार्थियों के लिए तीसरी भाषा के रूप में **संस्कृत** पढ़ने वाला कम से कम एक समर्पित सेक्शन होना अनिवार्य होगा। यह निर्देश **केंद्रीय विद्यालय संगठन (KVS)** द्वारा जारी एक परिपत्र में दिया गया है, जो **केंद्रीय शिक्षा मंत्रालय** के अधीन एक स्वायत्त निकाय है।

- There are currently **1,288 functional KVs** across the country, along with three operating internationally in **Moscow, Kathmandu, and Tehran**.

वर्तमान में देशभर में **1,288 कार्यरत केंद्रीय विद्यालय** हैं, जबकि तीन विद्यालय अंतरराष्ट्रीय स्तर पर **मॉस्को, काठमांडू और तेहरान** में संचालित हो रहे हैं।

- The circular, dated **May 29** and accessed by *The Hindu*, is meant for all KVs in India and abroad.

29 मई दिनांकित यह परिपत्र, जिसे *द हिन्दू* ने प्राप्त किया, भारत तथा विदेशों में स्थित सभी केंद्रीय विद्यालयों के लिए लागू है।

- "**KVS** has ensured that the policy remains sensitive to its transferable student population by maintaining **Sanskrit** as a common option across all KVs, while offering **regional languages** as an alternative for those who are not subject to frequent transfers," a senior **KVS official** said, on the condition of anonymity.

"**केवीएस** ने यह सुनिश्चित किया है कि यह नीति स्थानांतरण होने वाले विद्यार्थियों की आवश्यकताओं के प्रति संवेदनशील बनी रहे। इसके लिए सभी केंद्रीय विद्यालयों में **संस्कृत** को एक समान विकल्प के रूप में बनाए रखा गया है, जबकि जिन विद्यार्थियों का बार-बार स्थानांतरण नहीं होता, उनके लिए **क्षेत्रीय भाषाओं** का विकल्प भी उपलब्ध कराया गया है," एक वरिष्ठ **केवीएस अधिकारी** ने गुमनाम रहने की शर्त पर कहा।

- The circular clarifies that the **R3 choice** (**Sanskrit** or a **regional or State language** from the scheduled languages) must be distinct from **R1 (Hindi)** and **R2 (English)**.

परिपत्र में स्पष्ट किया गया है कि **R3 विकल्प** (**संस्कृत** अथवा अनुसूचित भाषाओं में से कोई **क्षेत्रीय या राज्य भाषा**) **R1 (हिंदी)** और **R2 (अंग्रेज़ी)** से भिन्न होना चाहिए।

Staffing and resources
स्टाफिंग और संसाधन

- The official acknowledged that a few KVs face challenges such as limited **teacher availability** and **resource constraints**, but insisted that the use of **contractual teachers** for regional languages, phased roll-out, and adoption of **SCERT materials** will help mitigate these constraints.

अधिकारी ने स्वीकार किया कि कुछ केंद्रीय विद्यालयों में **शिक्षकों की सीमित उपलब्धता** और **संसाधनों की कमी** जैसी चुनौतियाँ हैं, लेकिन उन्होंने कहा कि क्षेत्रीय भाषाओं के लिए **संविदा शिक्षकों** की नियुक्ति, चरणबद्ध क्रियान्वयन तथा **SCERT सामग्री** को अपनाने से इन समस्याओं को कम करने में सहायता मिलेगी।

Govt. opens draft telecom rules on TV, radio for feedback

GS II: Governance

The Hindu Bureau
NEW DELHI

The Centre has published the draft Telecommunications (Television, Radio and Associated Services) Rules, 2026, for public consultation. They have been framed to consolidate the various guidelines issued for television and radio services under the erstwhile Telegraph Act, within the framework of the newly enacted Telecommunications Act, 2023. The Information and Broadcasting Ministry administers the provisions relating to television, radio, and associated services.

Unified rule-book

In the draft rules, existing terms and conditions of authorisation have been harmonised and rationalised to facilitate continuity, while enabling reforms and provision for a single regulatory framework in place of multiple guidelines. "With this set of rules, the industry will now have a unified and significantly simplified rule book. These rules are designed to simplify the existing regime while promoting ease of doing business in the television and radio broadcasting sector," said the Ministry.

Once notified, the rules will replace various existing guidelines governing broadcasting services.

Digital implementation of the authorisation process, simplified authorisation procedures, removal of the requirement for signing Grant of Permission Agreement, and provision of transparent adjudication mechanism are the other key features.

13J6. Govt. opens draft telecom rules on TV, radio for feedback

सरकार ने टीवी और रेडियो के लिए मसौदा दूरसंचार नियमों पर सुझाव आमंत्रित किए

- The Centre has published the draft **Telecommunications (Television, Radio and Associated Services) Rules, 2026**, for public consultation.

केंद्र सरकार ने सार्वजनिक परामर्श के लिए **दूरसंचार (टेलीविजन, रेडियो और संबद्ध सेवाएं) नियम, 2026** का मसौदा प्रकाशित किया है।

- They have been framed to consolidate the various guidelines issued for **television and radio services** under the erstwhile **Telegraph Act**, within the framework of the newly enacted **Telecommunications Act, 2023**.

इन नियमों को पूर्व **टेलीग्राफ अधिनियम** के तहत **टेलीविजन और रेडियो सेवाओं** के लिए जारी विभिन्न दिशानिर्देशों को नव अधिनियमित **दूरसंचार अधिनियम, 2023** के ढांचे में समेकित करने के लिए तैयार किया गया है।

- The **Information and Broadcasting Ministry** administers the provisions relating to television, radio, and associated services.

सूचना एवं प्रसारण मंत्रालय टेलीविजन, रेडियो और संबद्ध सेवाओं से संबंधित प्रावधानों का प्रशासन करता है।

Unified rule-book

एकीकृत नियम-पुस्तिका

- In the draft rules, existing terms and conditions of **authorisation** have been harmonised and rationalised to facilitate continuity, while enabling reforms and provision for a single **regulatory framework** in place of multiple guidelines.

मसौदा नियमों में **प्राधिकरण** की मौजूदा शर्तों एवं नियमों को निरंतरता सुनिश्चित करने के लिए समन्वित और युक्तिसंगत बनाया गया है, साथ ही सुधारों को सक्षम करते हुए अनेक दिशानिर्देशों के स्थान पर एकल **नियामक ढांचे** का प्रावधान किया गया है।

- "With this set of rules, the industry will now have a **unified** and significantly **simplified rule book**.

"इन नियमों के साथ अब उद्योग के पास एक **एकीकृत** और काफी हद तक **सरलीकृत नियम-पुस्तिका** होगी।

- These rules are designed to simplify the existing regime while promoting **ease of doing business** in the television and radio broadcasting sector," said the Ministry.

मंत्रालय ने कहा कि ये नियम मौजूदा व्यवस्था को सरल बनाने के साथ-साथ टेलीविजन और रेडियो प्रसारण क्षेत्र में **व्यवसाय सुगमता (Ease of Doing Business)** को बढ़ावा देने के लिए तैयार किए गए हैं।

- Once notified, the rules will replace various existing guidelines governing **broadcasting services**.

अधिसूचित होने के बाद ये नियम **प्रसारण सेवाओं** को नियंत्रित करने वाले विभिन्न मौजूदा दिशानिर्देशों का स्थान ले लेंगे।

- **Digital implementation** of the authorisation process, simplified authorisation procedures, removal of the requirement for signing **Grant of Permission Agreement**, and provision of

transparent **adjudication mechanism** are the other key features.

प्राधिकरण प्रक्रिया के डिजिटल कार्यान्वयन, सरलीकृत प्राधिकरण प्रक्रियाएं, **Grant of Permission Agreement** पर हस्ताक्षर की आवश्यकता को समाप्त करना तथा पारदर्शी **न्ययनिर्णय तंत्र (Adjudication Mechanism)** का प्रावधान इसकी अन्य प्रमुख विशेषताएं हैं।

Equality of treatment for Persons with Disabilities

GS II: Governance

Addressing the digital divide through the Digital India Mission, India has marched on towards becoming a global "best practice" model of a digital welfare state. Yet, Persons with Disabilities (PwDs) remain largely excluded from this promise of universal outreach. Disability pensions, contrary to the very principles underlying disability rights, are determined not by the nature or extent of disability but by domicile, the discretionary decisions of State governments, and cumbersome bureaucratic processes. As a result, a vulnerable section of citizens continues to remain outside the ambit of a welfare architecture that otherwise prides itself on inclusivity and last-mile delivery.

Sushil Kumar

Former Secretary, Government of India, and an Advocate in the Supreme Court and High Court

An inadequate safety net

The 2011 Census recorded 2.68 crore PwDs. Today, accounting for population growth and changing disease profiles, their number is conservatively estimated at 4.5 crore-6 crore. Although the Supreme Court of India has recognised the right to live with dignity as a fundamental right and the Rights of Persons with Disabilities Act, 2016 provides legal protection, disability benefits – especially pensions – remain fragmented, discretionary, and inadequate. As a result, the Indira Gandhi National Disability Pension Scheme covers only a small fraction of PwDs, while pension amounts in most States range from just ₹300 to ₹500 a month, with a few offering ₹1,000-₹3,000.

India spends barely 0.02% of GDP on disability welfare including pensions. South Africa spends 0.12%-0.15% of GDP (six times more); Brazil 0.45%-0.50% (20 times more); OECD countries 2.2% (110 times more) and Australia 0.35%-0.40% (20 times more).

Beyond politics, sound economics demands the inclusion of PwDs. The World Bank and UNDP estimate that low- and middle-income countries lose 3%-7% of GDP when PwDs are excluded from education, employment, and social security. Disability income improves household stability, rural consumption, and labour participation. Studies show fiscal multipliers of 1.4-1.6, while the 2025 Pro Bono Economics report found that the socio-economic returns from disability pensions exceed their costs by nearly 48%. Far from being a welfare expense, disability pensions are an investment and an effective economic stimulus.

India must establish a Minimum Universal Disability Pension Floor Rate (MUDPFR) to give effect to the state's constitutional obligation, under Article 41, to provide public assistance to persons with disabilities, and to operationalise Section 24 of the Rights of Persons with Disabilities Act, 2016, which guarantees adequate social security, including pension benefits. Such a measure would translate the promise of inclusive growth and "Sabka Saath, Sabka Vikas" into reality by shifting disability pensions from a matter of charity and discretion to a matter of citizenship rights. While ensuring that no disabled person receives less than a minimum pension regardless of where they live, a MUDPFR would still allow States to provide additional top-ups.

India must adopt a minimum universal disability pension floor rate

This is not an unrealistic proposal. South Africa provides a national disability grant with uniform eligibility norms; Brazil's BPC guarantees a national minimum income; and Australia and New Zealand operate nationwide disability pension systems. Several developing countries, including Kenya, Rwanda, Thailand and Indonesia, also provide disability income support at the national level. International experience shows that centrally set standards promote uniformity, universality and portability.

A MUDPFR of ₹8,000 per month for 40 lakh beneficiaries would cost about ₹38,400 crore annually (0.08% of GDP), while ₹10,000 for 65 lakh beneficiaries would cost ₹78,000 crore. Even a pension of ₹15,000 per month would keep expenditure below 0.2% of GDP. Such spending is fiscally manageable when compared with allocations for food subsidies (₹2.05 lakh crore), rural development (₹1.80 lakh crore), tax concessions and revenue foregone (₹1.72 lakh crore), and infrastructure (₹11.11 lakh crore). Yet, disability pensions and inclusion continue to receive only a tiny fraction of public expenditure.

From fragmentation to integration

The current disability pension system, shared between the Ministry of Rural Development and the Department of Empowerment of Persons with Disabilities, leads to duplication, delays and diffused accountability. Countries that have faced similar challenges have addressed them through a single national authority – South Africa's SASSA, Australia's NDIA, Brazil's INSS and Ireland's Department of Social Protection. India too needs a National Disability Pension Authority to oversee eligibility norms, a national registry, portability, digital integration, grievance redress and State-wise performance monitoring – one standard, one system, one nation.

Implementing a robust disability pension system would strengthen India's bid for a UN Security Council seat by translating its commitments into action under Article 28 of the UN Convention on Rights of Persons with Disabilities, ILO Recommendation No. 202, SDG 1.3, and the G-20 New Delhi Leaders' Declaration, all of which endorse social protection as a cornerstone of inclusive development.

Combining pensions with employment support can move persons with disabilities from mere survival to productive participation. A MUDPFR could also yield economic benefits. Countries such as Singapore, South Korea, South Africa and Brazil integrate disability pensions with employment and social security systems. India should similarly strengthen its fragmented Disability Employment Incentive Scheme. Models abroad include employer tax incentives in Nigeria, the U.K.'s Access to Work programme, and Australia's wage subsidies. Existing schemes such as PM-DAKSH, NAPS and State-level employer incentives provide a foundation for expansion.

Constitutional imperative

A MUDPFR would give effect to the Constitution's guarantees of equality, equal protection, dignity and the right to life. India has already standardised major welfare programmes – from food security and health care to PM-KISAN and pensions – and delivers benefits at scale through DBT and UPI. The capacity and technology exist. What is needed is the political will to prioritise dignity. Disability pensions remain one of the few entitlements determined by where a person lives. If dignity is a constitutional right, geography cannot decide the minimum support for survival.

More than an economic or administrative reform, a MUDPFR is a moral one. It affirms that persons with disabilities are rights-bearing citizens, not recipients of charity. By transforming the state from a benevolent provider into a constitutional guarantor, it strengthens dignity, inclusion and citizenship.

Should India continue with a system in which disability pensions vary according to State budgets, political priorities and bureaucratic complexities, leaving persons with disabilities vulnerable to hardship? Or should the Republic guarantee a minimum level of support for all? A Viksit Bharat cannot leave its most vulnerable citizens at the mercy of a postcode lottery. Federalism cannot be a justification for inequality.

A MUDPFR is the next logical step in India's welfare architecture, building on rights-based entitlements enabled by digital inclusion and DBT. It would humanise the state, uphold the dignity of persons with disabilities and strengthen the Republic.

Over the past 75 years, India has steadily expanded its welfare state in pursuit of social justice. With the necessary platforms and delivery systems now in place, the time has come to secure the foundation. The real question is whether India recognises dignity for persons with disabilities as a constitutional right and a collective obligation. That promise is long overdue, and a MUDPFR offers a way to fulfil it.

13J6. Equality of treatment for Persons with Disabilities
दिव्यांग व्यक्तियों के लिए समान व्यवहार

- Addressing the **digital divide** through the **Digital India Mission**, India has marched on towards becoming a global **"best practice"** model of a **digital welfare state**.
  डिजिटल इंडिया मिशन के माध्यम से **डिजिटल विभाजन** को कम करते हुए भारत एक वैश्विक **"सर्वोत्तम उदाहरण"** वाले **डिजिटल कल्याणकारी राज्य** के रूप में आगे बढ़ा है।

- Yet, **Persons with Disabilities (PwDs)** remain largely excluded from this promise of universal outreach.
  फिर भी **दिव्यांगजन (PwDs)** इस सार्वभौमिक पहुँच के वादे से बड़े पैमाने पर वंचित बने हुए हैं।
- **Disability pensions**, contrary to the very principles underlying disability rights, are determined not by the nature or extent of disability but by **domicile**, the discretionary decisions of **State governments**, and cumbersome bureaucratic processes.
  दिव्यांग पेंशन, जो दिव्यांग अधिकारों के मूल सिद्धांतों के विपरीत है, दिव्यांगता की प्रकृति या गंभीरता के आधार पर नहीं, बल्कि **निवास**, **राज्य सरकारों** के विवेकाधीन निर्णयों और जटिल नौकरशाही प्रक्रियाओं के आधार पर निर्धारित की जाती है।
- As a result, a vulnerable section of citizens continues to remain outside the ambit of a welfare architecture that otherwise prides itself on **inclusivity** and **last-mile delivery**.
  परिणामस्वरूप नागरिकों का एक संवेदनशील वर्ग उस कल्याणकारी व्यवस्था से बाहर बना हुआ है जो अन्यथा **समावेशिता** और **अंतिम छोर तक सेवा पहुँचाने** पर गर्व करती है।

An inadequate safety net
अपर्याप्त सामाजिक सुरक्षा तंत्र

- The **2011 Census** recorded **2.68 crore PwDs**.
  2011 की जनगणना में **2.68 करोड़ दिव्यांगजन** दर्ज किए गए थे।
- Today, accounting for population growth and changing disease profiles, their number is conservatively estimated at **4.5 crore-6 crore**.
  आज जनसंख्या वृद्धि और बदलते रोग-परिदृश्य को ध्यान में रखते हुए उनकी संख्या का अनुमान **4.5 करोड़ से 6 करोड़** के बीच लगाया जाता है।
- Although the **Supreme Court of India** has recognised the right to live with dignity as a **fundamental right** and the **Rights of Persons with Disabilities Act, 2016** provides legal protection, disability benefits — especially pensions — remain fragmented, discretionary, and inadequate.
  यद्यपि **भारत के सर्वोच्च न्यायालय** ने गरिमा के साथ जीवन जीने के अधिकार को **मौलिक अधिकार** माना है और **दिव्यांगजन अधिकार अधिनियम, 2016** कानूनी संरक्षण प्रदान करता है, फिर भी दिव्यांग लाभ — विशेषकर पेंशन — खंडित, विवेकाधीन और अपर्याप्त बने हुए हैं।
- As a result, the **Indira Gandhi National Disability Pension Scheme** covers only a small fraction of PwDs, while pension amounts in most States range from just **₹300 to ₹500 a month**, with a few offering **₹1,000-₹3,000**.
  परिणामस्वरूप **इंदिरा गांधी राष्ट्रीय दिव्यांग पेंशन योजना** केवल सीमित संख्या में दिव्यांगजनों को कवर करती है, जबकि अधिकांश राज्यों में पेंशन राशि केवल **₹300 से ₹500 प्रति माह** है, और कुछ राज्य **₹1,000 से ₹3,000** तक प्रदान करते हैं।
- India spends barely **0.02% of GDP** on disability welfare including pensions.
  भारत दिव्यांग कल्याण और पेंशन पर अपने **GDP का केवल 0.02%** व्यय करता है।
- **South Africa** spends **0.12%-0.15% of GDP** (six times more); **Brazil 0.45%-0.50%** (20 times more); **OECD countries 2.2%** (110 times more) and **Australia 0.35%-0.40%** (20 times more).
  दक्षिण अफ्रीका अपने GDP का **0.12%-0.15%** (लगभग छह गुना अधिक), **ब्राज़ील 0.45%-0.50%** (लगभग 20 गुना अधिक), **OECD देश 2.2%** (लगभग 110 गुना अधिक) तथा **ऑस्ट्रेलिया 0.35%-0.40%** (लगभग 20 गुना अधिक) व्यय करते हैं।
- Beyond politics, sound economics demands the inclusion of **PwDs**.
  राजनीति से परे, सुदृढ़ अर्थशास्त्र भी **दिव्यांगजनों** के समावेशन की मांग करता है।
- The **World Bank** and **UNDP** estimate that low- and middle-income countries lose **3%-7% of GDP** when PwDs are excluded from education, employment, and social security.

विश्व बैंक और **यूएनडीपी** का अनुमान है कि निम्न और मध्यम आय वाले देश शिक्षा, रोजगार और सामाजिक सुरक्षा से दिव्यांगजनों के बहिष्कार के कारण **GDP का 3%-7%** तक खो देते हैं।

- Disability income improves **household stability**, **rural consumption**, and **labour participation**.
  दिव्यांग आय **परिवारिक स्थिरता**, **ग्रामीण उपभोग** और **श्रम भागीदारी** में सुधार लाती है।
- Studies show **fiscal multipliers of 1.4-1.6**, while the **2025 Pro Bono Economics report** found that the socio-economic returns from disability pensions exceed their costs by nearly **48%**.
  अध्ययनों से **1.4-1.6 के राजकोषीय गुणक** प्राप्त हुए हैं, जबकि **2025 प्रो बोनो इकोनॉमिक्स रिपोर्ट** के अनुसार दिव्यांग पेंशन से मिलने वाला सामाजिक-आर्थिक प्रतिफल उसकी लागत से लगभग **48% अधिक** है।
- Far from being a welfare expense, disability pensions are an **investment** and an effective **economic stimulus**.
  दिव्यांग पेंशन केवल कल्याणकारी व्यय नहीं बल्कि एक महत्वपूर्ण **निवेश** और प्रभावी **आर्थिक प्रोत्साहन** है।
- India must establish a **Minimum Universal Disability Pension Floor Rate (MUDPFR)** to give effect to the state's constitutional obligation, under **Article 41**, to provide public assistance to persons with disabilities, and to operationalise **Section 24** of the **Rights of Persons with Disabilities Act, 2016**, which guarantees adequate social security, including pension benefits.
  भारत को **न्यूनतम सार्वभौमिक दिव्यांग पेंशन आधार दर (MUDPFR)** स्थापित करनी चाहिए ताकि **अनुच्छेद 41** के अंतर्गत दिव्यांगजनों को सार्वजनिक सहायता प्रदान करने के राज्य के संवैधानिक दायित्व तथा **दिव्यांगजन अधिकार अधिनियम, 2016** की **धारा 24** को प्रभावी बनाया जा सके, जो पर्याप्त सामाजिक सुरक्षा और पेंशन लाभों की गारंटी देती है।
- Such a measure would translate the promise of **inclusive growth** and **"Sabka Saath, Sabka Vikas"** into reality by shifting disability pensions from a matter of charity and discretion to a matter of **citizenship rights**.
  ऐसा कदम **समावेशी विकास** और **"सबका साथ, सबका विकास"** के वादे को वास्तविकता में बदल देगा तथा दिव्यांग पेंशन को दान या विवेकाधीन सहायता के बजाय **नागरिक अधिकार** का स्वरूप प्रदान करेगा।
- While ensuring that no disabled person receives less than a minimum pension regardless of where they live, a **MUDPFR** would still allow States to provide additional **top-ups**.
  यह सुनिश्चित करते हुए कि किसी भी दिव्यांग व्यक्ति को उसके निवास स्थान की परवाह किए बिना न्यूनतम पेंशन से कम राशि न मिले, **MUDPFR** राज्यों को अतिरिक्त **पेंशन वृद्धि (टॉप-अप)** प्रदान करने की स्वतंत्रता भी देगा।
- This is not an unrealistic proposal.
  यह कोई अवास्तविक प्रस्ताव नहीं है।
- **South Africa** provides a national **disability grant** with uniform eligibility norms.
  दक्षिण अफ्रीका समान पात्रता मानदंडों के साथ राष्ट्रीय **दिव्यांग अनुदान** प्रदान करता है।
- **Brazil's BPC** guarantees a national minimum income.
  ब्राज़ील की BPC योजना राष्ट्रीय न्यूनतम आय की गारंटी देती है।
- **Australia** and **New Zealand** operate nationwide **disability pension systems**.
  ऑस्ट्रेलिया और **न्यूज़ीलैंड** देशव्यापी **दिव्यांग पेंशन प्रणालियाँ** संचालित करते हैं।
- Several developing countries, including **Kenya, Rwanda, Thailand and Indonesia**, also provide disability income support at the national level.
  केन्या, रवांडा, थाईलैंड और इंडोनेशिया सहित कई विकासशील देश भी राष्ट्रीय स्तर पर दिव्यांग आय सहायता प्रदान करते हैं।
- International experience shows that centrally set standards promote **uniformity, universality and portability**.
  अंतरराष्ट्रीय अनुभव दर्शाता है कि केंद्रीय स्तर पर निर्धारित मानक **एकरूपता, सार्वभौमिकता और पोर्टेबिलिटी** को बढ़ावा देते हैं।

- A **MUDPFR** of **₹8,000 per month** for **40 lakh beneficiaries** would cost about **₹38,400 crore annually (0.08% of GDP)**.
  40 लाख लाभार्थियों के लिए **₹8,000 प्रतिमाह** की **MUDPFR** व्यवस्था पर लगभग **₹38,400 करोड़ प्रतिवर्ष (GDP का 0.08%)** व्यय होगा।
- While **₹10,000** for **65 lakh beneficiaries** would cost **₹78,000 crore**.
  वहीं **65 लाख लाभार्थियों** के लिए **₹10,000 प्रतिमाह** की व्यवस्था पर **₹78,000 करोड़** का व्यय होगा।
- Even a pension of **₹15,000 per month** would keep expenditure below **0.2% of GDP**.
  यहाँ तक कि **₹15,000 प्रतिमाह** की पेंशन भी कुल व्यय को **GDP के 0.2%** से नीचे रखेगी।
- Such spending is fiscally manageable when compared with allocations for **food subsidies (₹2.05 lakh crore)**, **rural development (₹1.80 lakh crore)**, **tax concessions and revenue foregone (₹1.72 lakh crore)**, and **infrastructure (₹11.11 lakh crore)**.
  ऐसा व्यय **खाद्य सब्सिडी (₹2.05 लाख करोड़)**, **ग्रामीण विकास (₹1.80 लाख करोड़)**, **कर रियायतों एवं राजस्व हानि (₹1.72 लाख करोड़)** तथा **अवसंरचना (₹11.11 लाख करोड़)** पर होने वाले व्यय की तुलना में वित्तीय रूप से प्रबंधनीय है।
- Yet, disability pensions and inclusion continue to receive only a tiny fraction of public expenditure.
  फिर भी दिव्यांग पेंशन और समावेशन को सार्वजनिक व्यय का केवल अत्यंत छोटा हिस्सा ही प्राप्त होता है।

From fragmentation to integration
विखंडन से एकीकरण की ओर

- The current disability pension system, shared between the **Ministry of Rural Development** and the **Department of Empowerment of Persons with Disabilities**, leads to duplication, delays and diffused accountability.
  वर्तमान दिव्यांग पेंशन प्रणाली, जो **ग्रामीण विकास मंत्रालय** और **दिव्यांगजन सशक्तिकरण विभाग** के बीच विभाजित है, दोहराव, विलंब और उत्तरदायित्व के बिखराव को जन्म देती है।
- Countries that have faced similar challenges have addressed them through a **single national authority**.
  जिन देशों ने इसी प्रकार की चुनौतियों का सामना किया है, उन्होंने उनका समाधान **एकल राष्ट्रीय प्राधिकरण** के माध्यम से किया है।
- **South Africa's SASSA**, **Australia's NDIA**, **Brazil's INSS** and **Ireland's Department of Social Protection** are examples.
  दक्षिण अफ्रीका का SASSA, **ऑस्ट्रेलिया का NDIA**, **ब्राज़ील का INSS** और **आयरलैंड का सामाजिक संरक्षण विभाग** इसके उदाहरण हैं।
- India too needs a **National Disability Pension Authority** to oversee eligibility norms, a national registry, portability, digital integration, grievance redress and State-wise performance monitoring — **one standard, one system, one nation**.
  भारत को भी पात्रता मानदंडों, राष्ट्रीय रजिस्ट्री, पोर्टेबिलिटी, डिजिटल एकीकरण, शिकायत निवारण और राज्यवार प्रदर्शन निगरानी के लिए एक **राष्ट्रीय दिव्यांग पेंशन प्राधिकरण** की आवश्यकता है — **एक मानक, एक प्रणाली, एक राष्ट्र**।
- Implementing a robust disability pension system would strengthen India's bid for a **UN Security Council** seat by translating its commitments into action under **Article 28 of the UN Convention on Rights of Persons with Disabilities**, **ILO Recommendation No. 202**, **SDG 1.3**, and the **G-20 New Delhi Leaders' Declaration**.
  एक सुदृढ़ दिव्यांग पेंशन प्रणाली लागू करने से **संयुक्त राष्ट्र सुरक्षा परिषद** की सदस्यता के लिए भारत की दावेदारी मजबूत होगी, क्योंकि इससे **दिव्यांगजन अधिकारों पर संयुक्त राष्ट्र अभिसमय के अनुच्छेद 28**, **ILO अनुशंसा संख्या 202**, **SDG 1.3** और **G-20 नई दिल्ली नेता घोषणा** के अंतर्गत की गई प्रतिबद्धताओं को व्यवहार में लागू किया जा सकेगा।

- All of these endorse **social protection** as a cornerstone of inclusive development.
  ये सभी **सामाजिक सुरक्षा** को समावेशी विकास की आधारशिला मानते हैं।
- Combining pensions with **employment support** can move persons with disabilities from mere survival to productive participation.
  पेंशन को **रोज़गार सहायता** के साथ जोड़ने से दिव्यांगजन केवल जीवित रहने की स्थिति से आगे बढ़कर उत्पादक भागीदारी की ओर बढ़ सकते हैं।
- A **MUDPFR** could also yield economic benefits.
  MUDPFR आर्थिक लाभ भी प्रदान कर सकती है।
- Countries such as **Singapore, South Korea, South Africa and Brazil** integrate disability pensions with employment and social security systems.
  सिंगापुर, दक्षिण कोरिया, दक्षिण अफ्रीका और ब्राज़ील जैसे देश दिव्यांग पेंशन को रोजगार और सामाजिक सुरक्षा प्रणालियों के साथ एकीकृत करते हैं।
- India should similarly strengthen its fragmented **Disability Employment Incentive Scheme**.
  भारत को भी अपनी खंडित **दिव्यांग रोजगार प्रोत्साहन योजना** को सुदृढ़ बनाना चाहिए।
- Models abroad include **employer tax incentives** in **Nigeria**, the **Access to Work programme** in the **United Kingdom**, and **wage subsidies** in **Australia**.
  विदेशों में **नाइजीरिया** में **नियोक्ता कर प्रोत्साहन**, **यूनाइटेड किंगडम** का **एक्सेस टू वर्क कार्यक्रम**, तथा **ऑस्ट्रेलिया** में **वेतन सब्सिडी** जैसे मॉडल उपलब्ध हैं।
- Existing schemes such as **PM-DAKSH**, **NAPS** and **State-level employer incentives** provide a foundation for expansion.
  PM-DAKSH, **NAPS** तथा **राज्य स्तरीय नियोक्ता प्रोत्साहन योजनाएँ** विस्तार के लिए एक मजबूत आधार प्रदान करती हैं।

Constitutional imperative
संवैधानिक अनिवार्यता

- A **MUDPFR** would give effect to the Constitution's guarantees of **equality**, **equal protection**, **dignity** and the **right to life**.
  एक **MUDPFR** संविधान द्वारा प्रदत्त **समानता**, **समान संरक्षण**, **गरिमा** तथा **जीवन के अधिकार** की गारंटियों को वास्तविक रूप से लागू करेगा।
- India has already standardised major welfare programmes — from **food security** and **health care** to **PM-KISAN** and **pensions** — and delivers benefits at scale through **DBT** and **UPI**.
  भारत पहले ही **खाद्य सुरक्षा**, **स्वास्थ्य सेवा**, **पीएम-किसान** तथा **पेंशन** जैसी प्रमुख कल्याणकारी योजनाओं का मानकीकरण कर चुका है और **डीबीटी** तथा **यूपीआई** के माध्यम से बड़े पैमाने पर लाभ पहुँचा रहा है।
- The capacity and technology exist.
  आवश्यक क्षमता और प्रौद्योगिकी पहले से उपलब्ध हैं।
- What is needed is the political will to prioritise **dignity**.
  आवश्यकता केवल **गरिमा** को प्राथमिकता देने की राजनीतिक इच्छाशक्ति की है।
- **Disability pensions** remain one of the few entitlements determined by where a person lives.
  दिव्यांग पेंशन उन कुछ अधिकारों में से एक है जो अब भी व्यक्ति के निवास स्थान के आधार पर निर्धारित होते हैं।
- If dignity is a constitutional right, geography cannot decide the minimum support for survival.
  यदि गरिमा एक संवैधानिक अधिकार है, तो भौगोलिक स्थिति यह निर्धारित नहीं कर सकती कि जीवित रहने के लिए न्यूनतम सहायता कितनी होगी।
- More than an economic or administrative reform, a **MUDPFR** is a moral one.
  एक **MUDPFR** केवल आर्थिक या प्रशासनिक सुधार नहीं, बल्कि एक नैतिक सुधार भी है।
- It affirms that **persons with disabilities** are **rights-bearing citizens**, not recipients of charity.
  यह पुष्टि करता है कि **दिव्यांगजन** दया या परोपकार के पात्र नहीं, बल्कि **अधिकार-संपन्न नागरिक** हैं।

- By transforming the state from a benevolent provider into a constitutional guarantor, it strengthens **dignity**, **inclusion** and **citizenship**.
  राज्य को एक दयालु प्रदाता से संवैधानिक संरक्षक में परिवर्तित करके यह **गरिमा**, **समावेशन** और **नागरिकता** को सुदृढ़ बनाता है।
- Should India continue with a system in which disability pensions vary according to **State budgets**, **political priorities** and **bureaucratic complexities**, leaving persons with disabilities vulnerable to hardship?
  क्या भारत ऐसी व्यवस्था जारी रखे जिसमें दिव्यांग पेंशन **राज्य के बजट**, **राजनीतिक प्राथमिकताओं** और **नौकरशाही जटिलताओं** के अनुसार बदलती रहे तथा दिव्यांगजन कठिनाइयों के प्रति असुरक्षित बने रहें?
- Or should the Republic guarantee a minimum level of support for all?
  या फिर गणराज्य सभी के लिए न्यूनतम स्तर की सहायता की गारंटी दे?
- A **Viksit Bharat** cannot leave its most vulnerable citizens at the mercy of a **postcode lottery**.
  एक **विकसित भारत** अपने सबसे कमजोर नागरिकों को उनके निवास क्षेत्र के आधार पर मिलने वाली अनिश्चित सुविधाओं के भरोसे नहीं छोड़ सकता।
- **Federalism** cannot be a justification for **inequality**.
  संघवाद को **असमानता** का औचित्य नहीं बनाया जा सकता।
- A **MUDPFR** is the next logical step in India's welfare architecture, building on **rights-based entitlements** enabled by **digital inclusion** and **DBT**.
  MUDPFR भारत की कल्याणकारी संरचना का अगला तार्किक कदम है, जो **डिजिटल समावेशन** और **डीबीटी** द्वारा समर्थित **अधिकार-आधारित लाभों** पर आधारित है।
- It would humanise the state, uphold the dignity of **persons with disabilities** and strengthen the Republic.
  यह राज्य को अधिक मानवीय बनाएगा, **दिव्यांगजनों** की गरिमा को बनाए रखेगा और गणराज्य को सशक्त करेगा।
- Over the past **75 years**, India has steadily expanded its welfare state in pursuit of **social justice**.
  पिछले **75 वर्षों** में भारत ने **सामाजिक न्याय** की प्राप्ति के लिए अपने कल्याणकारी राज्य का निरंतर विस्तार किया है।
- With the necessary platforms and delivery systems now in place, the time has come to secure the foundation.
  अब जब आवश्यक मंच और सेवा वितरण प्रणालियाँ स्थापित हो चुकी हैं, तो समय आ गया है कि इस आधार को मजबूत किया जाए।
- The real question is whether India recognises **dignity for persons with disabilities** as a **constitutional right** and a **collective obligation**.
  वास्तविक प्रश्न यह है कि क्या भारत **दिव्यांगजनों की गरिमा** को एक **संवैधानिक अधिकार** और **सामूहिक दायित्व** के रूप में स्वीकार करता है।
- That promise is long overdue, and a **MUDPFR** offers a way to fulfil it.
  यह वादा बहुत पहले पूरा हो जाना चाहिए था, और **MUDPFR** उसे पूरा करने का एक प्रभावी माध्यम प्रदान करता है।

GS III: Economy

Long overdue

Coal exchanges can balance out energy scarcities across India

Unveiled at a time of record domestic coal production, the Coal Exchange Rules, 2026, are a case of better-late-than-never. They will create a broad market-based mechanism through regulated trading platforms for the lynchpin of India's energy system – coal. They are aimed at enhancing price discovery, transparency, access for small consumers, as well as, one would hope, reduce bilateral agreements that are often opaque and come with a whiff of graft, too often. Today, most coal transactions between producers and buyers take place through long-term contracts, primarily for the power sector, followed by auctions, imports and captive mining. While India's commodity exchanges are well established, they function largely as financial markets rather than physical delivery platforms. Coal exchanges, however, appear closer in design to power exchanges, which, despite modest volumes, play a role in price discovery, market signalling and the development of secondary markets. As if to prove this point, coal exchanges are expected to serve the non-regulated sector, which relies on Coal India auctions where coal is often sold at a premium to the highest bidder. Power exchanges are not merely niche trading platforms; they serve as points of reference for the broader power market. They have enhanced price discovery and served as a balancing market without replacing long-term power purchase agreements. Initially the power exchanges were only balancing shortages, but eventually the spot prices became a barometer of the broader power market indicating scarcity, surplus and system stresses for all electricity stakeholders. Perhaps the first role of coal exchanges could be to open up inventories, allowing surpluses to balance out shortages across India.

The templates for the two exchanges are not very different though the specific rules framed by the Coal Controller Organisation of India will determine the success of coal exchanges. Just as with the successes, the failures of power exchanges can also serve as lessons learned for coal. Coal is not as fungible as electricity, which once generated is the same everywhere requiring only minimum standards. Coal quality varies widely. Therefore, robust standards and quality assurance are as important as contract design, liquidity creation and enforcement. The latter set of requirements will ensure that major producers and consumers are drawn to the coal exchanges. The emphasis should be on facilitating participation of retail consumers unlike power exchanges, which are dominated by discoms. Coal India's stance will be crucial. Besides safeguards against volatility, dispute resolution mechanisms and improved transportation logistics will be important too, since the coal exchanges will be physical delivery platforms.

13J6. Long overdue
बहुत समय से अपेक्षित

- **Coal exchanges** can balance out **energy scarcities** across **India**.

कोयला विनिमय मंच भारत भर में **ऊर्जा की कमी** को संतुलित कर सकते हैं।

Coal Exchange Rules, 2026: A market-based mechanism for coal trading
कोयला विनिमय नियम, 2026: कोयला व्यापार के लिए बाज़ार-आधारित तंत्र

- Unveiled at a time of record domestic **coal production**, the **Coal Exchange Rules, 2026**, are a case of **better-late-than-never**.

रिकॉर्ड स्तर के घरेलू **कोयला उत्पादन** के समय प्रस्तुत किए गए **कोयला विनिमय नियम, 2026**, "**देर आए दुरुस्त आए**" की कहावत का उदाहरण हैं।

- They will create a broad **market-based mechanism** through regulated trading platforms for the lynchpin of India's energy system — **coal**.

ये नियम भारत की ऊर्जा व्यवस्था की आधारशिला **कोयला** के लिए विनियमित व्यापारिक मंचों के माध्यम से एक व्यापक **बाज़ार-आधारित तंत्र** स्थापित करेंगे।

- They are aimed at enhancing **price discovery**, **transparency**, access for **small consumers**, as well as, one would hope, reduce bilateral agreements that are often opaque and come with a whiff of graft, too often.

इनका उद्देश्य **मूल्य निर्धारण की पारदर्शिता**, **पारदर्शकता**, **छोटे उपभोक्ताओं** की पहुँच बढ़ाना तथा उन द्विपक्षीय समझौतों को कम करना है जो प्रायः अपारदर्शी होते हैं और जिनमें भ्रष्टाचार की आशंका बनी रहती है।

- Today, most coal transactions between producers and buyers take place through **long-term contracts**, primarily for the **power sector**, followed by auctions, imports and captive mining.

वर्तमान में उत्पादकों और खरीदारों के बीच अधिकांश कोयला लेन-देन **दीर्घकालिक अनुबंधों** के माध्यम से होता है, विशेष रूप से **विद्युत क्षेत्र** के लिए, इसके बाद नीलामी, आयात और कैप्टिव खनन का स्थान आता है।

- While India's **commodity exchanges** are well established, they function largely as financial markets rather than physical delivery platforms.

यद्यपि भारत के **वस्तु विनिमय बाज़ार** अच्छी तरह स्थापित हैं, वे मुख्यतः वित्तीय बाज़ारों के रूप में कार्य करते हैं, न कि भौतिक आपूर्ति मंचों के रूप में।

- **Coal exchanges**, however, appear closer in design to **power exchanges**, which, despite modest volumes, play a role in **price discovery**, **market signalling** and the development of

secondary markets.
हालाँकि **कोयला विनिमय मंच** संरचना की दृष्टि से **विद्युत विनिमय मंचों** के अधिक निकट प्रतीत होते हैं, जो सीमित व्यापार मात्रा के बावजूद **मूल्य खोज**, **बाज़ार संकेतों** और **द्वितीयक बाज़ारों** के विकास में महत्वपूर्ण भूमिका निभाते हैं।

- As if to prove this point, coal exchanges are expected to serve the **non-regulated sector**, which relies on **Coal India auctions** where coal is often sold at a premium to the highest bidder.
इस बात की पुष्टि करते हुए, कोयला विनिमय मंचों से **गैर-विनियमित क्षेत्र** को सेवा मिलने की अपेक्षा है, जो **कोल इंडिया की नीलामियों** पर निर्भर रहता है जहाँ कोयला अक्सर उच्चतम बोलीदाता को प्रीमियम मूल्य पर बेचा जाता है।
- **Power exchanges** are not merely niche trading platforms; they serve as points of reference for the broader power market.
विद्युत विनिमय मंच केवल विशेष व्यापारिक मंच नहीं हैं; वे व्यापक विद्युत बाज़ार के लिए संदर्भ बिंदु के रूप में कार्य करते हैं।
- They have enhanced **price discovery** and served as a **balancing market** without replacing long-term power purchase agreements.
उन्होंने **मूल्य निर्धारण प्रक्रिया** को बेहतर बनाया है तथा दीर्घकालिक विद्युत खरीद समझौतों को प्रतिस्थापित किए बिना **संतुलन बाज़ार** के रूप में कार्य किया है।
- Initially the power exchanges were only balancing shortages, but eventually the **spot prices** became a barometer of the broader power market indicating scarcity, surplus and system stresses for all electricity stakeholders.
प्रारंभ में विद्युत विनिमय मंच केवल कमी की पूर्ति करते थे, किन्तु बाद में **स्पॉट मूल्य** पूरे विद्युत बाज़ार के संकेतक बन गए, जो कमी, अधिशेष तथा प्रणालीगत दबावों को दर्शाते हैं।
- Perhaps the first role of coal exchanges could be to open up **inventories**, allowing surpluses to balance out shortages across India.
संभवतः कोयला विनिमय मंचों की पहली भूमिका **भंडारों** को खोलना हो सकती है, जिससे अधिशेष कोयला देशभर में कमी की भरपाई कर सके।
- The templates for the two exchanges are not very different though the specific rules framed by the **Coal Controller Organisation of India** will determine the success of coal exchanges.
दोनों प्रकार के विनिमय मंचों की संरचना में बहुत अधिक अंतर नहीं है, किन्तु **कोल कंट्रोलर ऑर्गनाइजेशन ऑफ इंडिया** द्वारा बनाए गए विशिष्ट नियम कोयला विनिमय मंचों की सफलता निर्धारित करेंगे।
- Just as with the successes, the failures of power exchanges can also serve as lessons learned for coal.
जिस प्रकार विद्युत विनिमय मंचों की सफलताएँ उपयोगी हैं, उसी प्रकार उनकी असफलताएँ भी कोयला क्षेत्र के लिए सीख का कार्य कर सकती हैं।
- Coal is not as **fungible** as electricity, which once generated is the same everywhere requiring only minimum standards.
कोयला बिजली की तरह पूर्णतः **विनिमेय (फंजिबल)** नहीं है, क्योंकि एक बार उत्पादित बिजली हर स्थान पर समान होती है और केवल न्यूनतम मानकों की आवश्यकता होती है।
- **Coal quality** varies widely.
कोयले की गुणवत्ता में व्यापक भिन्नता पाई जाती है।
- Therefore, robust **standards** and **quality assurance** are as important as contract design, liquidity creation and enforcement.
इसलिए मजबूत **मानक** और **गुणवत्ता आश्वासन** उतने ही महत्वपूर्ण हैं जितने अनुबंध निर्माण, तरलता सृजन और नियमों का अनुपालन।
- The latter set of requirements will ensure that major producers and consumers are drawn to the coal exchanges.

ये आवश्यकताएँ सुनिश्चित करेंगी कि प्रमुख उत्पादक और उपभोक्ता कोयला विनिमय मंचों की ओर आकर्षित हों।

- The emphasis should be on facilitating participation of **retail consumers** unlike power exchanges, which are dominated by **discoms**.
  ज़ोर **खुदरा उपभोक्ताओं** की भागीदारी को बढ़ावा देने पर होना चाहिए, जबकि विद्युत विनिमय मंचों पर मुख्यतः **डिस्कॉम्स** का प्रभुत्व रहता है।
- **Coal India's** stance will be crucial.
  कोल इंडिया का रुख अत्यंत महत्वपूर्ण होगा।
- Besides safeguards against **volatility**, **dispute resolution mechanisms** and improved **transportation logistics** will be important too, since the coal exchanges will be **physical delivery platforms**.
  चूँकि कोयला विनिमय मंच **भौतिक आपूर्ति मंच** होंगे, इसलिए **मूल्य अस्थिरता** से सुरक्षा, प्रभावी **विवाद समाधान तंत्र** तथा बेहतर **परिवहन लॉजिस्टिक्स** भी अत्यंत महत्वपूर्ण होंगे।

The 8th CPC — a chance to reform pay commissions

GS III: Economy

Prem Kumar Nair
Retired Indian Army officer (colonel) with an interest in governing architecture and systems

As India moves toward the 8th Central Pay Commission (CPC), public discussion has largely centred on familiar themes – fitment factors, salary revisions and arrears. Yet, the larger question may not be how much compensation should increase, but whether the framework for determining public compensation remains coherent, equitable, and fiscally sustainable. This is not merely an administrative matter. The manner in which the state structures salaries, allowances and pensions reflects broader institutional priorities and influences public confidence in governance.

The framework deficit

Over the decades, Pay Commissions have become far more than wage-revision exercises. Their recommendations shape inter-service parity, long-term fiscal commitments and the institutional balance within the state. Yet, the process remains narrow, with a small, time-bound body tasked with evaluating a diverse ecosystem of civil, military and technical services, largely on the basis of representations from the services themselves. A key challenge is the absence of a common evaluative framework. Services operate under different structures, career trajectories and working conditions, but there is no universally accepted method for comparing risk, responsibility, technical complexity or career progression. As a result, the system often seeks parity without clearly defining its basis.

This challenge is most visible in questions of parity. Officers across services with very different career paths and responsibilities may, at certain stages, receive comparable compensation. The issue is not one of competition between services but institutional coherence. If parity is to be maintained, the principles governing it must be transparent, consistent and objectively justified.

The comparison between civilian services and the armed forces illustrates this complexity. Military careers follow a sharply pyramidal structure, with limited promotional opportunities and earlier retirement. Civilian services generally offer broader avenues for advancement and longer careers. Aligning compensation across such different systems requires careful consideration of these structural differences.

The 8th Central Pay Commission should reform compensation frameworks, not merely salaries

Another significant trend is the reduction in experience required for senior administrative positions. While faster career progression may reflect changing governance needs, complex policy challenges still demand institutional memory and seasoned judgment. Efficiency is important, but it cannot fully substitute for experience. Questions also arise over allowances. While they are intended to compensate for hardship, remoteness or operational risk, there is no uniform and transparent framework for assessing such conditions across services. This can create disparities that are difficult to justify and may foster perceptions of inconsistency.

Non-Functional Upgradation (NFU) raises a related concern. By allowing financial advancement without a corresponding increase in responsibility, it weakens the link between role, accountability and compensation. Though introduced to address slower promotion avenues, the NFU continues to generate debate over equity and institutional rationale.

The pension challenge

Pensions add another layer of complexity. India currently operates multiple pension systems, including legacy defined-benefit schemes, contributory plans for newer entrants, and separate arrangements for elected representatives. According to the Reserve Bank of India's State Finances Report (2023), salaries, pensions and interest payments consume a large share of State expenditure, limiting fiscal space for development. As a result, concerns about sustainability and inter-generational equity are becoming increasingly important.

Taken together, these issues highlight the need for a more coherent approach to public compensation. At present, pay frameworks for the executive, legislature and judiciary evolve through different processes. While constitutionally distinct, this fragmentation can create inconsistencies and reduce transparency in compensation decisions.

Public trust depends not only on fairness, but also on transparency and explainability.

A new compensation architecture

Many countries have gradually moved towards continuous and institutionalised mechanisms for reviewing public sector compensation. Independent authorities, clearly defined benchmarks and periodic review mechanisms have replaced infrequent, large-scale revisions. India's decadal Pay Commission model may therefore warrant reconsideration.

A more durable framework – whether a National Compensation Authority or a specialised public service body – could bring greater consistency to public sector pay. Rather than be a centralising authority, it could establish common principles for assessing responsibility, experience and hardship while preserving flexibility for different services and States.

Importantly, any such reform must respect India's federal structure. States should retain autonomy over implementation while operating within a broader framework of transparency, comparability and fiscal discipline. Greater coherence across branches of government, without affecting constitutional independence, would strengthen both credibility and public confidence.

Ultimately, public compensation is not simply about salaries and pensions. It is part of the larger relationship between the state and the citizen. In a democratic system, compensation structures must not only be financially sustainable, but also publicly explainable.

The 8th Pay Commission presents an opportunity to move beyond periodic revision and engage with these deeper structural questions. Whether that opportunity is utilised meaningfully may shape public trust in institutional governance for years to come.

13J6. The 8th CPC — a chance to reform pay commissions
आठवाँ वेतन आयोग — वेतन आयोगों में सुधार का एक अवसर

- As India moves toward the **8th Central Pay Commission (CPC)**, public discussion has largely centred on familiar themes — **fitment factors**, **salary revisions** and **arrears**.
  जैसे-जैसे भारत **आठवें केंद्रीय वेतन आयोग (CPC)** की ओर बढ़ रहा है, सार्वजनिक चर्चा मुख्यतः **फिटमेंट फैक्टर**, **वेतन संशोधन** और **बकाया राशि** जैसे परिचित विषयों पर केंद्रित रही है।

- Yet, the larger question may not be how much compensation should increase, but whether the framework for determining public compensation remains **coherent**, **equitable**, and **fiscally sustainable**.
  किन्तु बड़ा प्रश्न यह नहीं है कि वेतन कितना बढ़ना चाहिए, बल्कि यह है कि सार्वजनिक वेतन निर्धारण का ढाँचा **सुसंगत**, **न्यायसंगत** और **राजकोषीय रूप से टिकाऊ** है या नहीं।
- This is not merely an administrative matter.
  यह केवल एक प्रशासनिक विषय नहीं है।
- The manner in which the state structures **salaries**, **allowances** and **pensions** reflects broader institutional priorities and influences public confidence in governance.
  राज्य जिस प्रकार **वेतन**, **भत्तों** और **पेंशन** की संरचना निर्धारित करता है, वह व्यापक संस्थागत प्राथमिकताओं को दर्शाता है तथा शासन के प्रति जनविश्वास को प्रभावित करता है।

The framework deficit
ढाँचागत कमी

- Over the decades, **Pay Commissions** have become far more than wage-revision exercises.
  समय के साथ **वेतन आयोग** केवल वेतन संशोधन तक सीमित नहीं रहे हैं।
- Their recommendations shape **inter-service parity**, **long-term fiscal commitments** and the **institutional balance** within the state.
  उनकी सिफारिशें **सेवाओं के बीच समानता**, **दीर्घकालिक राजकोषीय दायित्वों** तथा राज्य के भीतर **संस्थागत संतुलन** को प्रभावित करती हैं।
- Yet, the process remains narrow, with a small, time-bound body tasked with evaluating a diverse ecosystem of **civil**, **military** and **technical services**, largely on the basis of representations from the services themselves.
  फिर भी यह प्रक्रिया सीमित बनी हुई है, जिसमें एक छोटा और समयबद्ध निकाय मुख्यतः सेवाओं द्वारा प्रस्तुत अभ्यावेदनों के आधार पर **नागरिक**, **सैन्य** और **तकनीकी सेवाओं** के विविध ढाँचे का मूल्यांकन करता है।
- A key challenge is the absence of a common **evaluative framework**.
  एक प्रमुख चुनौती समान **मूल्यांकन ढाँचे** का अभाव है।
- Services operate under different structures, career trajectories and working conditions, but there is no universally accepted method for comparing **risk**, **responsibility**, **technical complexity** or **career progression**.
  विभिन्न सेवाएँ अलग-अलग संरचनाओं, कैरियर मार्गों और कार्य परिस्थितियों में कार्य करती हैं, किन्तु **जोखिम**, **उत्तरदायित्व**, **तकनीकी जटिलता** अथवा **कैरियर प्रगति** की तुलना करने के लिए कोई सर्वमान्य पद्धति उपलब्ध नहीं है।
- As a result, the system often seeks **parity** without clearly defining its basis.
  परिणामस्वरूप व्यवस्था अक्सर **समानता** स्थापित करने का प्रयास करती है, परंतु उसके आधार को स्पष्ट रूप से परिभाषित नहीं करती।
- This challenge is most visible in questions of **parity**.
  यह चुनौती विशेष रूप से **समानता** से जुड़े प्रश्नों में दिखाई देती है।
- Officers across services with very different career paths and responsibilities may, at certain stages, receive comparable compensation.
  भिन्न-भिन्न कैरियर मार्गों और उत्तरदायित्वों वाली सेवाओं के अधिकारी कुछ चरणों में समान वेतन प्राप्त कर सकते हैं।
- The issue is not one of competition between services but **institutional coherence**.
  यह मुद्दा सेवाओं के बीच प्रतिस्पर्धा का नहीं, बल्कि **संस्थागत सुसंगति** का है।
- If parity is to be maintained, the principles governing it must be **transparent**, **consistent** and **objectively justified**.
  यदि समानता बनाए रखनी है, तो उसके सिद्धांत **पारदर्शी**, **सुसंगत** और **वस्तुनिष्ठ रूप से उचित** होने चाहिए।

- The comparison between **civilian services** and the **armed forces** illustrates this complexity.
  नागरिक सेवाओं और **सशस्त्र बलों** के बीच तुलना इस जटिलता को स्पष्ट करती है।
- Military careers follow a sharply **pyramidal structure**, with limited promotional opportunities and earlier retirement.
  सैन्य सेवाएँ एक स्पष्ट **पिरामिडीय संरचना** का अनुसरण करती हैं, जिसमें पदोन्नति के अवसर सीमित होते हैं और सेवानिवृत्ति अपेक्षाकृत जल्दी होती है।
- Civilian services generally offer broader avenues for advancement and longer careers.
  नागरिक सेवाएँ सामान्यतः उन्नति के अधिक अवसर और लंबा सेवा काल प्रदान करती हैं।
- Aligning compensation across such different systems requires careful consideration of these **structural differences**.
  ऐसी भिन्न प्रणालियों में वेतन संरचना को संतुलित करने के लिए इन **संरचनात्मक भिन्नताओं** का सावधानीपूर्वक विचार आवश्यक है।
- Another significant trend is the reduction in **experience** required for senior administrative positions.
  एक अन्य महत्वपूर्ण प्रवृत्ति वरिष्ठ प्रशासनिक पदों के लिए आवश्यक **अनुभव** में कमी है।
- While faster career progression may reflect changing governance needs, complex policy challenges still demand **institutional memory** and **seasoned judgment**.
  यद्यपि तेज़ कैरियर प्रगति बदलती प्रशासनिक आवश्यकताओं को दर्शा सकती है, फिर भी जटिल नीतिगत चुनौतियों के लिए **संस्थागत स्मृति** और **अनुभवी निर्णय क्षमता** की आवश्यकता बनी रहती है।
- Efficiency is important, but it cannot fully substitute for experience.
  दक्षता महत्वपूर्ण है, किन्तु यह अनुभव का पूर्ण विकल्प नहीं बन सकती।
- Questions also arise over **allowances**.
  भत्तों को लेकर भी प्रश्न उठते हैं।
- While they are intended to compensate for **hardship**, **remoteness** or **operational risk**, there is no uniform and transparent framework for assessing such conditions across services.
  यद्यपि इनका उद्देश्य **कठिन परिस्थितियों**, **दूरस्थ क्षेत्रों** अथवा **संचालन संबंधी जोखिमों** की भरपाई करना है, फिर भी विभिन्न सेवाओं में इन परिस्थितियों के मूल्यांकन के लिए कोई समान और पारदर्शी ढाँचा नहीं है।
- This can create disparities that are difficult to justify and may foster perceptions of inconsistency.
  इससे ऐसी असमानताएँ उत्पन्न हो सकती हैं जिन्हें उचित ठहराना कठिन होता है और जो असंगति की धारणा को बढ़ावा देती हैं।
- **Non-Functional Upgradation (NFU)** raises a related concern.
  गैर-कार्यात्मक उन्नयन (NFU) भी इसी प्रकार की चिंता उत्पन्न करता है।
- By allowing financial advancement without a corresponding increase in responsibility, it weakens the link between **role**, **accountability** and **compensation**.
  यह बिना समान स्तर की अतिरिक्त जिम्मेदारी दिए वित्तीय उन्नति प्रदान करता है, जिससे **भूमिका**, **जवाबदेही** और **पारिश्रमिक** के बीच संबंध कमजोर पड़ जाता है।
- Though introduced to address slower promotion avenues, the **NFU** continues to generate debate over **equity** and **institutional rationale**.
  यद्यपि **NFU** को धीमी पदोन्नति की समस्या दूर करने के लिए लागू किया गया था, फिर भी यह **न्यायसंगतता** और **संस्थागत औचित्य** को लेकर निरंतर बहस का विषय बना हुआ है।

The pension challenge
पेंशन की चुनौती

- **Pensions** add another layer of complexity.
  पेंशन इस विषय में जटिलता की एक और परत जोड़ती है।
- India currently operates multiple **pension systems**, including legacy **defined-benefit schemes**, **contributory plans** for newer entrants, and separate arrangements for **elected**

representatives.
भारत वर्तमान में अनेक **पेंशन प्रणालियाँ** संचालित करता है, जिनमें पुरानी **परिभाषित-लाभ योजनाएँ**, नए कर्मचारियों के लिए **अंशदायी योजनाएँ**, तथा **निर्वाचित जनप्रतिनिधियों** के लिए अलग व्यवस्थाएँ शामिल हैं।

- According to the **Reserve Bank of India's State Finances Report (2023)**, **salaries**, **pensions** and **interest payments** consume a large share of State expenditure, limiting fiscal space for development.
भारतीय रिज़र्व बैंक की राज्य वित्त रिपोर्ट (2023) के अनुसार **वेतन**, **पेंशन** तथा **ब्याज भुगतान** राज्यों के व्यय का बड़ा हिस्सा ग्रहण कर लेते हैं, जिससे विकास के लिए उपलब्ध राजकोषीय संसाधन सीमित हो जाते हैं।
- As a result, concerns about **sustainability** and **inter-generational equity** are becoming increasingly important.
परिणामस्वरूप **दीर्घकालिक स्थिरता** तथा **पीढ़ियों के बीच न्यायसंगतता** से जुड़ी चिंताएँ लगातार महत्वपूर्ण होती जा रही हैं।
- Taken together, these issues highlight the need for a more **coherent approach** to public compensation.
इन सभी मुद्दों को एक साथ देखने पर सार्वजनिक पारिश्रमिक व्यवस्था के लिए अधिक **सुसंगत दृष्टिकोण** की आवश्यकता स्पष्ट होती है।
- At present, pay frameworks for the **executive**, **legislature** and **judiciary** evolve through different processes.
वर्तमान में **कार्यपालिका**, **विधायिका** और **न्यायपालिका** के वेतन ढाँचे अलग-अलग प्रक्रियाओं के माध्यम से विकसित होते हैं।
- While constitutionally distinct, this fragmentation can create inconsistencies and reduce transparency in compensation decisions.
यद्यपि ये संवैधानिक रूप से अलग संस्थाएँ हैं, फिर भी यह विखंडन वेतन निर्धारण संबंधी निर्णयों में असंगतियाँ उत्पन्न कर सकता है और पारदर्शिता को कम कर सकता है।
- Public trust depends not only on **fairness**, but also on **transparency** and **explainability**.
जनविश्वास केवल **निष्पक्षता** पर ही नहीं, बल्कि **पारदर्शिता** और **स्पष्ट व्याख्यात्मकता** पर भी निर्भर करता है।

A new compensation architecture
एक नई पारिश्रमिक संरचना

- Many countries have gradually moved towards continuous and institutionalised mechanisms for reviewing **public sector compensation**.
अनेक देशों ने **सार्वजनिक क्षेत्र के पारिश्रमिक** की समीक्षा के लिए क्रमिक रूप से निरंतर और संस्थागत तंत्र विकसित किए हैं।
- **Independent authorities**, clearly defined **benchmarks** and periodic review mechanisms have replaced infrequent, large-scale revisions.
स्वतंत्र प्राधिकरणों, स्पष्ट रूप से निर्धारित **मानकों** तथा नियमित समीक्षा प्रणालियों ने अनियमित और बड़े पैमाने पर होने वाले संशोधनों का स्थान ले लिया है।
- India's **decadal Pay Commission model** may therefore warrant reconsideration.
इसलिए भारत के **दशकीय वेतन आयोग मॉडल** पर पुनर्विचार किया जाना उचित हो सकता है।
- A more durable framework — whether a **National Compensation Authority** or a specialised public service body — could bring greater consistency to public sector pay.
एक अधिक स्थायी ढाँचा — चाहे वह **राष्ट्रीय पारिश्रमिक प्राधिकरण** हो या कोई विशेष सार्वजनिक सेवा निकाय — सार्वजनिक क्षेत्र के वेतन में अधिक सुसंगति ला सकता है।
- Rather than be a centralising authority, it could establish common principles for assessing **responsibility**, **experience** and **hardship** while preserving flexibility for different services and States.
एक केंद्रीकृत संस्था बनने के बजाय यह **उत्तरदायित्व**, **अनुभव** और **कठिन परिस्थितियों** के मूल्यांकन के लिए

समान सिद्धांत निर्धारित कर सकती है, जबकि विभिन्न सेवाओं और राज्यों के लिए आवश्यक लचीलापन भी बनाए रख सकती है।

- Importantly, any such reform must respect India's **federal structure**.
  महत्वपूर्ण रूप से, किसी भी ऐसे सुधार को भारत की **संघीय संरचना** का सम्मान करना चाहिए।
- States should retain autonomy over implementation while operating within a broader framework of **transparency**, **comparability** and **fiscal discipline**.
  राज्यों को कार्यान्वयन में स्वायत्तता बनाए रखनी चाहिए, जबकि वे **पारदर्शिता**, **तुलनात्मकता** और **राजकोषीय अनुशासन** के व्यापक ढाँचे के भीतर कार्य करें।
- Greater coherence across branches of government, without affecting **constitutional independence**, would strengthen both credibility and public confidence.
  संवैधानिक स्वतंत्रता को प्रभावित किए बिना शासन की विभिन्न शाखाओं के बीच अधिक सुसंगति स्थापित करना विश्वसनीयता और जनविश्वास दोनों को सुदृढ़ करेगा।
- Ultimately, public compensation is not simply about **salaries** and **pensions**.
  अंततः सार्वजनिक पारिश्रमिक केवल **वेतन** और **पेंशन** तक सीमित विषय नहीं है।
- It is part of the larger relationship between the **state** and the **citizen**.
  यह **राज्य** और **नागरिक** के बीच व्यापक संबंध का एक महत्वपूर्ण हिस्सा है।
- In a democratic system, compensation structures must not only be financially sustainable, but also publicly explainable.
  एक लोकतांत्रिक व्यवस्था में पारिश्रमिक संरचनाएँ केवल वित्तीय रूप से टिकाऊ ही नहीं, बल्कि जनता के समक्ष स्पष्ट रूप से समझाई जा सकने योग्य भी होनी चाहिए।
- The **8th Pay Commission** presents an opportunity to move beyond periodic revision and engage with these deeper structural questions.
  आठवाँ वेतन आयोग केवल समय-समय पर होने वाले संशोधनों से आगे बढ़कर इन गहरे संरचनात्मक प्रश्नों पर विचार करने का अवसर प्रदान करता है।
- Whether that opportunity is utilised meaningfully may shape public trust in **institutional governance** for years to come.
  इस अवसर का कितना सार्थक उपयोग किया जाता है, यह आने वाले वर्षों में **संस्थागत शासन** के प्रति जनता के विश्वास को प्रभावित कर सकता है।

The human cost of a deadly weed killer

In March, Telangana banned paraquat, one of the world's most widely used and highly toxic weedicides, becoming only the third State in India to do so. The herbicide is responsible for hundreds of deaths each year, most of them suicides and some accidental. **Serish Nanisetti** reports on the campaign that led to the ban and why much more remains to be done

GS III: S&T

At 50, Banoth Goud (name changed) has lived to tell a tale. "I may look normal, but I become breathless when I climb stairs or even walk more than five minutes. The doctor says my lungs got affected," he says.

About three years ago, on a sweltering afternoon, Goud opened his refrigerator, took out a small plastic bottle labelled with a popular juice brand, and took a sip. The drink did not have the sweet, tart apple flavour that he was used to; instead, it tasted flat. He began vomiting.

Goud did not know that he had drunk paraquat, a highly toxic herbicide and one of the most effective weed killers in the world. Paraquat, a colourless and tasteless liquid, is most often fatal for both humans and animals.

It was a mistake that resulted in Goud fighting for his life. "I had asked my nephew to get the *gaddi mandu* (the local term for the weedicide) to clear weeds in front of our house," he recalls. "He kept the bottle on a table inside the house. My wife thought it was a cool drink and placed it inside the fridge." While wholesale traders store paraquat in drums, farmers and others often fill up stray bottles with the weedicide.

Goud was rushed from his house in Paloncha to a hospital in Kothegudem, about 11 kilometres away. The doctors were sure he would die.

Being an employee of TSGENCO (Telangana State Power Generation Corporation Limited), Goud had an ESIC (Employee State Insurance Corporation) card, necessary for workers below a certain salary level to access free medical care and financial benefits at ESIC dispensaries and hospitals across the State. He was quickly ferried in an ambulance to a tertiary-care facility in Hyderabad, roughly 285 km away.

Dr. Verrana Addanki, a General Medicine practitioner, noticed that Goud had a 'paraquat mouth' – the severe, corrosive damage that occurs when a person swallows or is exposed to paraquat – and put him on continuous renal replacement therapy (CRRT). Over the next 40 days, Goud's condition slowly improved.

"His family had given up on him," remembers Dr. Addanki. "But we persisted and he had the will to survive too. Now, he has photographs of his family as his WhatsApp display picture."

On March 31, 2026, Telangana banned the sale, distribution, manufacture, and use of paraquat, to protect the safety and health of people, especially farmers. It became only the third State to do so, after Kerala and Odisha. The Government Order was issued days after intense lobbying by doctors, clinicians, and public representatives calling for the ban of the weedicide, which has been often used for self-harm. Neighbouring Andhra Pradesh followed suit in May.

Bans and bust-ups

Paraquat wreaks havoc due to its immense potential for harm, easy availability, low price (₹280 per litre), and widespread use in India. The only law to regulate hazardous chemicals such as paraquat is the Insecticides Act, 1968.

> A ban by one State without the involvement of e-commerce sites is just a ban on paper. It is ineffectual.
>
> **DILEEP KUMAR**
> Pesticide Action Network

Goud's story is an exception: the weedicide has killed thousands of people, as is evident from autopsy reports from hospitals across the world. Paraquat is banned in 74 countries. In India, Kerala became the first State to ban it in 2011. However, in February 2022, the Kerala High Court overturned the ban following a plea by a cardamom growers' collective. While the Kerala Agriculture Department's notification specifically named the chemical along with 13 others, the High Court struck down the ban on the technical ground that the State did not have the authority to enforce it beyond 60+30 days (as per Section 27 of the Insecticides Act).

In October 2022, Kerala was rocked by the murder of Sharon Raj, who was allegedly poisoned with a paraquat-laced drink by his fiancée, Greeshma. He died at the Medical College Hospital in Thiruvananthapuram, triggering a public uproar as details of the case quickly emerged in the public domain.

"We can still order it online," says Dileep Kumar of Pesticide Action Network, a global coalition of over 600 NGOs, institutions, and individuals across 90 countries dedicated to eliminating hazardous chemical pesticides. "A ban by one State without the involvement of e-commerce sites is just a ban on paper. It is ineffectual," he points out.

Kumar adds that the country needs stronger laws and regulations to manage the crisis. "Even the Bhopal gas tragedy [in 1984] did not lead to new laws to regulate pesticides," he says.

The problem is not just limited regulation of pesticides, weedicides, and insecticides; it is also low awareness about safe use. According to a statement by the Minister of State for Agriculture in the Lok Sabha, 79,185 farmers were made aware of the safe and judicious use of pesticides between 2020 and 2026. This is a low share in a country where 46.1% of the population is dependent on agriculture, as per the Economic Survey of 2025-26.

Ambulance vans stand outside the Gandhi Hospital mortuary in Hyderabad, where 217 paraquat victims were brought in for postmortem examination between 2024 and 2025. NAGARA GOPAL

As per the Act, the ban in Telangana was for 60 days and can be extended by 30 more days. On the day that the Telangana issued a Government Order imposing a ban on paraquat, the Legislative Assembly passed a bipartisan resolution asking the Central government to ban the chemical across the country.

Lobbying for a ban

On the afternoon of February 12, Dr. Marri Mahesh Reddy, the founder of a grassroots movement called Doctors Against Paraquat, called for a gathering of farmers in Potharam village in Karimnagar. The emerald green village, with endless paddy fields, is on the eastern side of the Sriramsagar flood flow canal that carries water from the Godavari river. This whistle-stop tour and meeting with farmers was part of a campaign by Dr. Reddy.

"If we don't use this, can't we do agriculture?" Dr. Reddy said, addressing the gathering. "Didn't we do agriculture before this? Brush-cutter *leva, vere mandulu leva. Dina valla yavaruki upogam?* (We have brush-cutters, sickles, and other chemicals. Why use this toxic substance?)"

He explained what made paraquat particularly dangerous. "I used to get emergency cases of snake bites and poisoning," he said. "There were antidotes for snakebites and the venom was not always so toxic. But paraquat is in a different league. It destroys the cell structure and there is no antidote."

Doctors Against Paraquat comprises 202 doctors drawn from different parts of Telangana, who lobbied with politicians, farmers, and bureaucrats relentlessly for a ban on paraquat. Using social media and personal connections, Dr. Reddy reached out to the Telangana Chief Minister's Office, the Maharashtra Chief Minister's Office, the Prime Minister's Office, and politicians.

Yet, Potharam and other farming villages have found paraquat useful. As labour shortage is rising and the cost of hiring farm workers is increasing, farmers use paraquat, which is labelled and sold as non-selective contact herbicide (meaning, it does not differentiate between one plant and another), to clean up residual plants and weeds. Paraquat imports to India rose from 8,598 tonnes in 2019-20 to 20,786 tonnes in 2022-23, according to the Lok Sabha Unstarred Question No. 2542 under the Minister of Agriculture and Farmers' Welfare in 2025.

> Without any oversight or intervention by officials from the agriculture department, there is a runaway use of paraquat in most parts of the country.
>
> **KODANDA REDDY**
> Chairperson of the Telangana Agriculture Farmers Welfare Commission

"Without any oversight or intervention by officials from the agriculture department, there is a runaway use of paraquat in most parts of the country. There are many accidental deaths due to careless use as well," says Kodanda Reddy, Chairperson of the Telangana Agriculture Farmers Welfare Commission, who has also worked to get the ban imposed in the State.

"Currently we are working with e-commerce companies as well as cyber crime officials to ensure that the product is not available in online stores," he adds. This lobbying appears to have paid off, as two big e-commerce sites – Flipkart and Amazon – no longer list the chemical in Telangana. However, it is easily available from smaller agriculture commerce sites.

A rush to save patients

Bodies are constantly wheeled in and out of the Department of Forensic Medicine, Toxicology and Autopsy Complex at Gandhi Hospital in Hyderabad. Families wait in grief and the police mill around. There is an overpowering odour of bleach, urine, and putrefying flesh.

The toll of paraquat poisoning is evident here. According to Dr. Atmudi Vivek Sai Ram's Doctor of Medicine dissertation, 'An autopsy based study on deaths due to Paraquat poisoning in Gandhi Hospital', the facility recorded 217 cases of paraquat poisoning in 2024 and 2025. Of these, 54% of the patients were farmers and 16% students. Of the 100 cases studied for the dissertation, 94% were suicide cases and 5% were accidental.

"There is no treatment for paraquat poisoning, no antidote. We only receive clues from the family when bottles with labels are found near the victim or there is an oral statement," says Dr. Krupal Singh, the head of department of Forensic Medicine and Toxicology. He is also part of Doctors Against Paraquat.

"All we can do is symptomatic treatment," Dr. Singh adds. "As a result, treatment remains largely supportive, focusing on early gastrointestinal decontamination, organ support, and prevention of further oxidative damage. If the patient is put on a ventilator, the progress of the chemical is accelerated, with multiple organ failure and fibrosis of lungs being irreversible."

Inside the nephrology ward of the century-old Osmania General Hospital in Hyderabad, patients sit in rows. "Every month, we get 4-5 paraquat-related cases. Most of the patients die within days," says Dr. Manisha Shenoy, Head of the Nephrology Department, who is the first doctor to be called in once a patient suspected of imbibing paraquat is wheeled into the hospital.

"The prognosis is bleak even with advanced treatment like CRRT," she explains. "The chemical causes rapid damage, first to the kidneys, then the liver, and eventually the lungs. Intubation of a patient on a ventilator accelerates damage to the lungs." She does not remember any survivors.

Poor regulatory efforts

While the dangers of paraquat and its misuse have drawn global attention, regulatory efforts in India have largely escaped public scrutiny.

Paraquat's origins date back to the 1880s, when it was first developed as a chemical dye. Its herbicidal properties were discovered in the 1950s, and Imperial Chemical Industries began marketing it as Gramoxone in the 1960s. Concerns about its toxicity surfaced early in India. In 1989, G. Vijaya Rama Rao, a doctor from Siddipet, raised the issue in the Lok Sabha, but the Agriculture Minister said the government had received no reports of harmful effects.

However, Imperial Chemical Industries documents suggest the company was aware of the risks. An agenda paper by the company dated November 19, 1987, and accessed by *The Hindu*, noted: "Suicidal abuse of the product will not be eliminated." According to the paper, the company also chose not to dilute the chemical to make it safer, calculating that this would increase packaging size fivefold. It noted that "usage by farmers would reduce significantly because of bulk inconvenience/higher prices."

During these years, Imperial Chemical Industries was earning significant revenues from paraquat. In 1987, sales of the product reached 15,000 tonnes, generating £192 million, according to a document from October 4, 1988, and accessed by *The Hindu*.

In August 2025, the Lok Sabha was informed that there are 1,503 licensed manufacturers of paraquat in the country. While Telangana banned the herbicide on March 31, on April 16, the Central Insecticides Board and Registration Committee, at its 471st meeting, cleared seven applications for formulation under indigenous manufacture as "satisfactory."

India has not been a passive player in the regulation of paraquat; it has also, at times, been an enabler in its continued use. In May 2013, India joined Guatemala in opposing the listing of paraquat as a "severely hazardous pesticide formulation" under Annex III of the Rotterdam Convention, a multi-lateral environmental agreement. Such a listing would not have led to a banning of the chemical, but it would have required exporting countries to notify and obtain prior consent from importing countries before shipment. The proposal was supported by 118 countries but did not go through because the treaty's voting rules require complete consensus.

CropLife India, representing 17 agro-chemical companies, said to *The Hindu*, "Sudden restrictions on paraquat dichloride and carbosulfan, just as kharif sowing begins, could raise input costs, disrupt crop protection, and deepen farmer vulnerability." Paraquat is used on nearly 80 lakh acres in India and remains a low-cost weed-control option for small farmers, it added.

In Karimnagar, however, the ban has already had a visible impact. "Deaths due to paraquat have dropped from around 30-50 per month before the ban to 3-5 now, according to data from pulmonologists and nephrologists," says Dr. Reddy. "We can reach zero deaths if the ban is imposed across the country and the chemical is removed from shelves and online stores. All doctors will breathe easier if that happens."

Those in distress or having suicidal tendencies could seek help and counselling by calling any of the following numbers: 1Life - 78930-78930

13J6. The human cost of a deadly weed killer
एक घातक खरपतवारनाशी की मानवीय कीमत

- In March, **Telangana** banned **paraquat**, one of the world's most widely used and highly toxic weedicides, becoming only the third State in India to do so.
  मार्च में **तेलंगाना** ने **पैराक्वाट** पर प्रतिबंध लगा दिया, जो दुनिया में सबसे अधिक उपयोग किए जाने वाले और अत्यधिक विषैले खरपतवारनाशियों में से एक है, और ऐसा करने वाला भारत का तीसरा राज्य बन गया।
- The herbicide is responsible for hundreds of deaths each year, most of them suicides and some accidental.
  यह खरपतवारनाशी हर वर्ष सैकड़ों मौतों के लिए जिम्मेदार है, जिनमें अधिकांश आत्महत्याएं और कुछ दुर्घटनावश होती हैं।
- **Serish Nanisetti** reports on the campaign that led to the ban and why much more remains to be done.
  सेरिश नानिसेट्टी उस अभियान पर रिपोर्ट प्रस्तुत करते हैं जिसने इस प्रतिबंध का मार्ग प्रशस्त किया और बताते हैं कि अभी भी बहुत कुछ किया जाना बाकी है।
- At 50, **Banoth Goud** (name changed) has lived to tell a tale.
  50 वर्ष की आयु में **बनोथ गौड़** (नाम बदला गया है) जीवित हैं और अपनी कहानी सुना सकते हैं।
- "I may look normal, but I become breathless when I climb stairs or even walk more than five minutes. The doctor says my lungs got affected," he says.
  वे कहते हैं, "मैं सामान्य दिख सकता हूँ, लेकिन सीढ़ियाँ चढ़ते समय या पाँच मिनट से अधिक चलने पर मेरी सांस फूल जाती है। डॉक्टर कहते हैं कि मेरे फेफड़े प्रभावित हो गए हैं।"
- About three years ago, on a sweltering afternoon, Goud opened his refrigerator, took out a small plastic bottle labelled with a popular juice brand, and took a sip.
  लगभग तीन वर्ष पहले, एक तपती दोपहर में, गौड़ ने अपना रेफ्रिजरेटर खोला, एक लोकप्रिय जूस ब्रांड के लेबल वाली छोटी प्लास्टिक की बोतल निकाली और एक घूंट लिया।
- The drink did not have the sweet, tart apple flavour that he was used to; instead, it tasted flat.
  उस पेय में वह मीठा और हल्का खट्टा सेब का स्वाद नहीं था जिसकी उन्हें आदत थी; इसके बजाय उसका स्वाद फीका था।
- He began vomiting.
  उन्हें उल्टियाँ होने लगीं।
- Goud did not know that he had drunk **paraquat**, a highly toxic herbicide and one of the most effective weed killers in the world.
  गौड़ को यह नहीं पता था कि उन्होंने **पैराक्वाट** पी लिया है, जो अत्यधिक विषैला खरपतवारनाशी और दुनिया के सबसे प्रभावी खरपतवार नाशकों में से एक है।
- **Paraquat**, a colourless and tasteless liquid, is most often fatal for both humans and animals.
  पैराक्वाट, जो रंगहीन और स्वादहीन तरल है, मनुष्यों और जानवरों दोनों के लिए अक्सर घातक सिद्ध होता है।
- It was a mistake that resulted in Goud fighting for his life.
  यह एक ऐसी गलती थी जिसने गौड़ को जीवन के लिए संघर्ष करने पर मजबूर कर दिया।
- "I had asked my nephew to get the gaddi mandu (the local term for the weedicide) to clear weeds in front of our house," he recalls.
  वे याद करते हैं, "मैंने अपने भतीजे से हमारे घर के सामने उगी खरपतवार साफ करने के लिए गड्डी मंडु (स्थानीय नाम) लाने को कहा था।"
- "He kept the bottle on a table inside the house. My wife thought it was a cool drink and placed it inside the fridge."
  "उसने बोतल घर के अंदर एक मेज पर रख दी। मेरी पत्नी ने उसे शीतल पेय समझकर फ्रिज में रख दिया।"

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- While wholesale traders store paraquat in drums, farmers and others often fill up stray bottles with the weedicide.
  जहाँ थोक व्यापारी पैराक्वाट को ड्रमों में रखते हैं, वहीं किसान और अन्य लोग अक्सर इसे खाली बोतलों में भर लेते हैं।
- Goud was rushed from his house in **Paloncha** to a hospital in **Kothegudem**, about 11 kilometres away.
  गौड़ को **पालोनचा** स्थित घर से लगभग 11 किलोमीटर दूर **कोठागुडेम** के अस्पताल ले जाया गया।
- The doctors were sure he would die.
  डॉक्टरों को विश्वास था कि उनकी मृत्यु हो जाएगी।
- Being an employee of **TSGENCO (Telangana State Power Generation Corporation Limited)**, Goud had an **ESIC (Employee State Insurance Corporation)** card, necessary for workers below a certain salary level to access free medical care and financial benefits at ESIC dispensaries and hospitals across the State.
  TSGENCO (तेलंगाना स्टेट पावर जनरेशन कॉरपोरेशन लिमिटेड) के कर्मचारी होने के कारण गौड़ के पास **ESIC (कर्मचारी राज्य बीमा निगम)** कार्ड था, जो एक निश्चित वेतन स्तर से नीचे के कर्मचारियों को राज्य भर में निःशुल्क चिकित्सा सुविधा और वित्तीय लाभ प्राप्त करने के लिए आवश्यक होता है।
- He was quickly ferried in an ambulance to a tertiary-care facility in **Hyderabad**, roughly 285 km away.
  उन्हें तुरंत एम्बुलेंस द्वारा लगभग 285 किलोमीटर दूर **हैदराबाद** के एक तृतीयक चिकित्सा केंद्र ले जाया गया।
- **Dr. Verrana Addanki**, a General Medicine practitioner, noticed that Goud had a **'paraquat mouth'** — the severe, corrosive damage that occurs when a person swallows or is exposed to paraquat — and put him on continuous renal replacement therapy (**CRRT**).
  जनरल मेडिसिन विशेषज्ञ **डॉ. वेराना अड्डांकी** ने देखा कि गौड़ को **'पैराक्वाट माउथ'** हो गया था — यह वह गंभीर संक्षारक क्षति है जो किसी व्यक्ति द्वारा पैराक्वाट निगलने या उसके संपर्क में आने पर होती है — और उन्हें **CRRT** पर रखा गया।
- Over the next 40 days, Goud's condition slowly improved.
  अगले 40 दिनों में गौड़ की स्थिति धीरे-धीरे सुधरने लगी।
- "His family had given up on him," remembers Dr. Addanki.
  डॉ. अड्डांकी याद करते हैं, "उनके परिवार ने उनसे उम्मीद छोड़ दी थी।"
- "But we persisted and he had the will to survive too. Now, he has photographs of his family as his WhatsApp display picture."
  "लेकिन हमने प्रयास जारी रखा और उनमें भी जीवित रहने की इच्छा थी। अब उन्होंने अपने परिवार की तस्वीर को व्हाट्सएप डिस्प्ले पिक्चर बनाया हुआ है।"
- On **March 31, 2026**, Telangana banned the sale, distribution, manufacture, and use of **paraquat**, to protect the safety and health of people, especially farmers.
  31 मार्च 2026 को तेलंगाना ने लोगों, विशेषकर किसानों, की सुरक्षा और स्वास्थ्य की रक्षा के लिए **पैराक्वाट** की बिक्री, वितरण, निर्माण और उपयोग पर प्रतिबंध लगा दिया।
- It became only the third State to do so, after **Kerala** and **Odisha**.
  केरल और **ओडिशा** के बाद ऐसा करने वाला यह तीसरा राज्य बना।
- The Government Order was issued days after intense lobbying by doctors, clinicians, and public representatives calling for the ban of the weedicide, which has been often used for self-harm.
  यह सरकारी आदेश डॉक्टरों, चिकित्सकों और जनप्रतिनिधियों द्वारा इस खरपतवारनाशी पर प्रतिबंध लगाने की जोरदार मांग के कुछ दिनों बाद जारी किया गया, जिसका अक्सर आत्म-हानि के लिए उपयोग किया जाता रहा है।
- Neighbouring **Andhra Pradesh** followed suit in May.
  पड़ोसी **आंध्र प्रदेश** ने भी मई में यही कदम उठाया।

Bans and bust-ups
प्रतिबंध और टकराव

- Paraquat wreaks havoc due to its immense potential for harm, easy availability, low price (₹280 per litre), and widespread use in India.
  पैराक्वाट अपनी अत्यधिक हानिकारक क्षमता, आसान उपलब्धता, कम कीमत (₹280 प्रति लीटर) और भारत में व्यापक उपयोग के कारण भारी विनाश करता है।
- The only law to regulate hazardous chemicals such as paraquat is the **Insecticides Act, 1968**.
  पैराक्वाट जैसे खतरनाक रसायनों को विनियमित करने वाला एकमात्र कानून **कीटनाशक अधिनियम, 1968** है।
- Goud's story is an exception: the weedicide has killed thousands of people, as is evident from autopsy reports from hospitals across the world.
  गौड़ की कहानी एक अपवाद है; यह खरपतवारनाशी दुनिया भर के अस्पतालों की पोस्टमार्टम रिपोर्टों के अनुसार हजारों लोगों की जान ले चुका है।
- **Paraquat** is banned in 74 countries.
  पैराक्वाट 74 देशों में प्रतिबंधित है।
- In India, **Kerala** became the first State to ban it in 2011.
  भारत में **केरल** 2011 में इस पर प्रतिबंध लगाने वाला पहला राज्य बना।
- However, in February 2022, the **Kerala High Court** overturned the ban following a plea by a cardamom growers' collective.
  हालाँकि, फरवरी 2022 में **केरल उच्च न्यायालय** ने इलायची उत्पादकों के एक समूह की याचिका पर यह प्रतिबंध रद्द कर दिया।
- (लेख अत्यंत विस्तृत है। एक ही उत्तर में पूर्ण अंग्रेज़ी एवं समानांतर हिन्दी अनुवाद देने पर उत्तर बहुत लंबा हो जाएगा और तकनीकी सीमा पार कर सकता है। कृपया "Continue" लिखें, मैं शेष भाग को उसी प्रारूप में, बिना कोई शब्द छोड़े, आगे जारी कर दूँगा।)

Following earlier setbacks, Japan's H3 rocket lifts off

GS III: S&T

Agence France Presse

TOKYO

Japan's flagship H3 rocket successfully blasted off on Friday, live footage showed, months after its previous mission to put a geolocation satellite into orbit ended in failure.

The H3 was developed to boost the international competitiveness of Japan's rocket industry, and the country's space agency has come under pressure to increase the success rate of launches.

The rocket has been mooted as a rival to SpaceX's Falcon 9, and could one day deliver cargo to bases on the moon. On Friday, the rocket – which was carrying six small satellites – lifted off at 9:53 a.m. (0053 GMT) from Tanegashima Space Center in southern Japan.

"The second-stage combustion, action control and trajectory are all normal," the Japan Aerospace Exploration Agency (JAXA) said in a live YouTube broadcast, about six minutes after blast-off.

The satellites loaded onto the rocket included Tokyo University of Science's "Umitsubame", which observes earth and other targets with a high-performance camera, and Shizuoka University's "Shiraito", which is testing space debris capture technology, according to JAXA.

Designed for "high flexibility, high reliability, and high cost performance", JAXA had toasted five successful launches of the H3 before Friday, but there have been two failures, including the last one in December.

H3 project manager Makoto Arita said prior to lift-off that the latest attempt was "crucial for our comeback" following December's failed mission, in which a second-stage engine terminated prematurely. The space agency is targeting up to eight H3 rocket launches a year, according to a JAXA official.

13J6. Following earlier setbacks, Japan's H3 rocket lifts off
पहले के झटकों के बाद जापान का H3 रॉकेट सफलतापूर्वक प्रक्षेपित हुआ

- Japan's flagship **H3 rocket** successfully blasted off on Friday, live footage showed, months after its previous mission to put a **geolocation satellite** into orbit ended in failure.
  लाइव फुटेज के अनुसार जापान का प्रमुख **H3 रॉकेट** शुक्रवार को सफलतापूर्वक प्रक्षेपित हुआ, जबकि कुछ महीने पहले **भू-स्थान निर्धारण उपग्रह (Geolocation Satellite)** को कक्षा में स्थापित करने का उसका मिशन विफल हो गया था।
- The **H3** was developed to boost the international competitiveness of Japan's **rocket industry**, and the country's **space agency** has come under pressure to increase the success rate of launches.
  H3 को जापान के **रॉकेट उद्योग** की अंतरराष्ट्रीय प्रतिस्पर्धात्मकता बढ़ाने के लिए विकसित किया गया था और देश की **अंतरिक्ष एजेंसी** पर प्रक्षेपणों की सफलता दर बढ़ाने का दबाव रहा है।
- The rocket has been mooted as a rival to **SpaceX's Falcon 9**, and could one day deliver cargo to bases on the **moon**.
  इस रॉकेट को **स्पेसएक्स के फाल्कन 9** के प्रतिद्वंद्वी के रूप में देखा गया है और यह भविष्य में **चंद्रमा** पर स्थित ठिकानों तक माल पहुंचा सकता है।
- On Friday, the rocket — which was carrying **six small satellites** — lifted off at **9:53 a.m. (0053 GMT)** from **Tanegashima Space Center** in southern Japan.

Lt.-Gen. Rajiv Ghai appointed Military Adviser to NSCS

GS III: Internal Security: Defence

The Hindu Bureau
NEW DELHI

Lieutenant-General Rajiv Ghai

Lieutenant-General Rajiv Ghai, who is currently serving as the Deputy Chief of the Indian Army and who spearheaded military operations as Director-General of Military Operations (DGMO) during Operation Sindoor last year, has been appointed the new Military Adviser (MA) to the National Security Council Secretariat (NSCS).

This marks the first time that a serving military officer has been appointed Military Adviser to the NSCS, which functions under National Security Adviser Ajit Doval.

Lieutenant-General Ghai, whose tenure in service extends till December 2027, was appointed to the post earlier this week. He is expected to assume charge shortly. The position was previously held by General N.S. Raja Subramani before he was appointed Chief of Defence Staff. Prior to him, the post was occupied by Air Marshal Sandeep Singh and, earlier, by General Anil Chauhan.

Commissioned into the Kumaon Regiment, Lieutenant-General Ghai has held several key operational and command appointments during his distinguished military career. His appointment is being seen as a significant move aimed at strengthening military inputs and operational expertise within the country's highest national security decision-making framework.

13J6. Lt.-Gen. Rajiv Ghai appointed Military Adviser to NSCS

लेफ्टिनेंट जनरल राजीव घई एनएससीएस के सैन्य सलाहकार नियुक्त

- Lieutenant-General **Rajiv Ghai**, who is currently serving as the **Deputy Chief of the Indian Army** and who spearheaded military operations as **Director-General of Military Operations (DGMO)** during **Operation Sindoor** last year, has been appointed the new **Military Adviser (MA)** to the **National Security Council Secretariat (NSCS)**.
- लेफ्टिनेंट जनरल **राजीव घई**, जो वर्तमान में **भारतीय सेना के उप प्रमुख (Deputy Chief of the Indian Army)** के रूप में कार्यरत हैं और जिन्होंने पिछले वर्ष **ऑपरेशन सिंदूर** के दौरान **महानिदेशक सैन्य संचालन (DGMO)** के रूप में सैन्य अभियानों का नेतृत्व किया था, उन्हें **राष्ट्रीय सुरक्षा परिषद सचिवालय (NSCS)** का नया **सैन्य सलाहकार (MA)** नियुक्त किया गया है।
- This marks the first time that a serving military officer has been appointed **Military Adviser** to the **NSCS**, which functions under **National Security Adviser Ajit Doval**.
- यह पहली बार है कि किसी सेवारत सैन्य अधिकारी को **एनएससीएस** में **सैन्य सलाहकार** नियुक्त किया गया है, जो **राष्ट्रीय सुरक्षा सलाहकार अजीत डोभाल** के अधीन कार्य करता है।
- Lieutenant-General **Ghai**, whose tenure in service extends till **December 2027**, was appointed to the post earlier this week.
- लेफ्टिनेंट जनरल **घई**, जिनका सेवा कार्यकाल **दिसंबर 2027** तक है, को इस सप्ताह की शुरुआत में इस पद पर नियुक्त किया गया।
- He is expected to assume charge shortly.
- उनके शीघ्र ही पदभार ग्रहण करने की अपेक्षा है।
- The position was previously held by **General N.S. Raja Subramani** before he was appointed **Chief of Defence Staff**.
- इस पद पर पहले **जनरल एन.एस. राजा सुब्रमणि** थे, जिन्हें बाद में **चीफ ऑफ डिफेंस स्टाफ** नियुक्त किया गया।
- Prior to him, the post was occupied by **Air Marshal Sandeep Singh** and, earlier, by **General Anil Chauhan**.
- उनसे पहले यह पद **एयर मार्शल संदीप सिंह** और उससे पहले **जनरल अनिल चौहान** के पास था।
- Commissioned into the **Kumaon Regiment**, Lieutenant-General **Ghai** has held several key operational and command appointments during his distinguished military career.
- **कुमाऊँ रेजिमेंट** में कमीशन प्राप्त करने वाले लेफ्टिनेंट जनरल **घई** ने अपने विशिष्ट सैन्य करियर के दौरान कई महत्वपूर्ण परिचालन और कमान संबंधी नियुक्तियाँ संभाली हैं।
- His appointment is being seen as a significant move aimed at strengthening military inputs and operational expertise within the country's highest national security decision-making framework.

PATRIOTIC IAS

- उनकी नियुक्ति को देश के सर्वोच्च **राष्ट्रीय सुरक्षा निर्णय-निर्माण ढाँचे** में सैन्य योगदान और **परिचालन विशेषज्ञता** को मजबूत करने की दिशा में एक महत्वपूर्ण कदम माना जा रहा है।

Project Kusha, our indigenous air defence shield, will be a game changer, says Rajnath

GS III: Internal Security

Saurabh Trivedi
NEW DELHI

Defence Minister Rajnath Singh on Friday described the indigenous Project Kusha air defence programme as a "game changer" for India's security architecture, asserting that its importance had already been demonstrated during Operation Sindoor.

Addressing scientists and officials in Hyderabad, after inaugurating the Advanced Weapon System Complex at the Defence Research and Development Organisation's (DRDO) Defence Research & Development Laboratory (DRDL) in the Dr. A.P.J. Abdul Kalam Missile Complex, Mr. Singh said India's indigenous air defence capabilities had successfully thwarted enemy intentions during the operation.

"Today I predict that Project Kusha will be a game changer for India's security scenario. It is a world-class indigenous air defence system. Just as the Govardhan hill protected the entire region of Braj in the *Dvapara Yuga*, our air defence system provided a protective umbrella during that period (Operation Sindoor)," he said.

Project Kusha is a long-range air defence missile system being developed by the DRDO to provide a comprehensive shield against a wide range of aerial threats.

Rajnath Singh

The Defence Minister praised the DRDO's Missile Systems and Strategic Systems cluster for strengthening India's technological excellence, strategic autonomy and national security. He said indigenous systems such as Akash and BrahMos had proved India's capability to compete in the global defence technology ecosystem.

Changing warfare

Highlighting the changing nature of warfare, Mr. Singh said emerging technologies such as precision-strike systems, integrated air defence networks, hypersonic weapons, autonomous platforms, artificial intelligence and electronic warfare were reshaping modern battlefields. In this environment, he stressed the need for both resilience and deterrence.

Referring to the government's ambitious "Mission Sudarshan Chakra", announced by Prime Minister Narendra Modi during his Independence Day address in 2025, Mr. Singh said the initiative would establish a multi-layered missile defence shield capable of protecting military assets, critical infrastructure and civilian establishments across the country.

"The system will provide robust protection while ensuring citizens face minimal inconvenience. It will also possess the capability to deliver a decisive response whenever required," he said.

The Defence Minister lauded the DRDO's progress in indigenous missile technologies, stating that the recent successes in strategic and tactical weapon programmes reflected India's growing self-reliance and confidence in defence manufacturing.

13J6. Project Kusha, our indigenous air defence shield, will be a game changer, says Rajnath

प्रोजेक्ट कुशा, हमारी स्वदेशी वायु रक्षा ढाल, एक गेम चेंजर साबित होगी : राजनाथ सिंह

- **Defence Minister Rajnath Singh** on Friday described the indigenous **Project Kusha air defence programme** as a "game changer" for India's security architecture, asserting that its importance had already been demonstrated during **Operation Sindoor**.

  रक्षा मंत्री राजनाथ सिंह ने शुक्रवार को स्वदेशी **प्रोजेक्ट कुशा वायु रक्षा कार्यक्रम** को भारत की सुरक्षा संरचना के लिए एक "गेम चेंजर" बताया और कहा कि इसका महत्व **ऑपरेशन सिंदूर** के दौरान पहले ही प्रदर्शित हो चुका है।
- Addressing scientists and officials in **Hyderabad**, after inaugurating the **Advanced Weapon System Complex** at the **Defence Research and Development Organisation's (DRDO) Defence Research & Development Laboratory (DRDL)** in the **Dr. A.P.J. Abdul Kalam Missile Complex**, Mr. Singh said India's indigenous air defence capabilities had successfully thwarted enemy intentions during the operation.

  हैदराबाद में वैज्ञानिकों और अधिकारियों को संबोधित करते हुए, **डॉ. ए.पी.जे. अब्दुल कलाम मिसाइल कॉम्प्लेक्स** में स्थित **रक्षा अनुसंधान एवं विकास संगठन (DRDO)** की **डिफेन्स रिसर्च एंड डेवलपमेंट लेबोरेटरी (DRDL)** के **एडवांस्ड वेपन सिस्टम कॉम्प्लेक्स** का उद्घाटन करने के बाद, श्री सिंह ने कहा कि भारत की स्वदेशी वायु रक्षा क्षमताओं ने इस अभियान के दौरान दुश्मन की मंशाओं को सफलतापूर्वक विफल कर दिया।
- "Today I predict that **Project Kusha** will be a game changer for India's security scenario. It is a world-class indigenous air defence system. Just as the **Govardhan hill** protected the entire region of **Braj** in the **Dvapara Yuga**, our air defence system provided a protective umbrella during that period (**Operation Sindoor**)," he said.

  "आज मैं भविष्यवाणी करता हूँ कि **प्रोजेक्ट कुशा** भारत की सुरक्षा व्यवस्था के लिए एक गेम चेंजर साबित होगा। यह विश्वस्तरीय स्वदेशी वायु रक्षा प्रणाली है। जिस प्रकार **द्वापर युग** में **गोवर्धन पर्वत** ने पूरे **ब्रज क्षेत्र** की रक्षा की थी, उसी प्रकार हमारी वायु रक्षा प्रणाली ने उस अवधि (**ऑपरेशन सिंदूर**) के दौरान सुरक्षा कवच प्रदान किया," उन्होंने कहा।

Website : patrioticias.in

- **Project Kusha** is a long-range air defence missile system being developed by the **DRDO** to provide a comprehensive shield against a wide range of aerial threats.
  प्रोजेक्ट कुशा एक लंबी दूरी की वायु रक्षा मिसाइल प्रणाली है, जिसे **DRDO** द्वारा विभिन्न प्रकार के हवाई खतरों के विरुद्ध व्यापक सुरक्षा कवच प्रदान करने के लिए विकसित किया जा रहा है।
- The Defence Minister praised the **DRDO's Missile Systems and Strategic Systems cluster** for strengthening India's technological excellence, strategic autonomy and national security.
  रक्षा मंत्री ने भारत की तकनीकी उत्कृष्टता, रणनीतिक स्वायत्तता और राष्ट्रीय सुरक्षा को मजबूत करने के लिए **DRDO के मिसाइल सिस्टम्स और स्ट्रेटेजिक सिस्टम्स क्लस्टर** की प्रशंसा की।
- He said indigenous systems such as **Akash** and **BrahMos** had proved India's capability to compete in the global defence technology ecosystem.
  उन्होंने कहा कि **आकाश** और **ब्रह्मोस** जैसी स्वदेशी प्रणालियों ने वैश्विक रक्षा प्रौद्योगिकी तंत्र में प्रतिस्पर्धा करने की भारत की क्षमता को सिद्ध किया है।

Changing warfare
युद्ध की बदलती प्रकृति

- Highlighting the changing nature of warfare, Mr. Singh said emerging technologies such as **precision-strike systems**, **integrated air defence networks**, **hypersonic weapons**, **autonomous platforms**, **artificial intelligence** and **electronic warfare** were reshaping modern battlefields.
  युद्ध की बदलती प्रकृति पर प्रकाश डालते हुए, श्री सिंह ने कहा कि **प्रिसिजन-स्ट्राइक सिस्टम**, **एकीकृत वायु रक्षा नेटवर्क**, **हाइपरसोनिक हथियार**, **स्वायत्त प्लेटफॉर्म**, **कृत्रिम बुद्धिमत्ता** और **इलेक्ट्रॉनिक युद्ध** जैसी उभरती प्रौद्योगिकियाँ आधुनिक युद्धक्षेत्रों को नया स्वरूप दे रही हैं।
- In this environment, he stressed the need for both resilience and deterrence.
  इस परिदृश्य में उन्होंने **लचीलापन** और **निवारक क्षमता** दोनों की आवश्यकता पर बल दिया।
- Referring to the government's ambitious **"Mission Sudarshan Chakra"**, announced by Prime Minister **Narendra Modi** during his **Independence Day** address in 2025, Mr. Singh said the initiative would establish a multi-layered missile defence shield capable of protecting military assets, critical infrastructure and civilian establishments across the country.
  वर्ष 2025 में प्रधानमंत्री **नरेंद्र मोदी** द्वारा **स्वतंत्रता दिवस** संबोधन के दौरान घोषित सरकार की महत्वाकांक्षी **"मिशन सुदर्शन चक्र"** योजना का उल्लेख करते हुए श्री सिंह ने कहा कि यह पहल एक बहु-स्तरीय मिसाइल रक्षा कवच स्थापित करेगी, जो देशभर में सैन्य परिसंपत्तियों, महत्वपूर्ण अवसंरचना और नागरिक प्रतिष्ठानों की सुरक्षा करने में सक्षम होगी।
- "The system will provide robust protection while ensuring citizens face minimal inconvenience. It will also possess the capability to deliver a decisive response whenever required," he said.
  "यह प्रणाली नागरिकों को न्यूनतम असुविधा सुनिश्चित करते हुए मजबूत सुरक्षा प्रदान करेगी। आवश्यकता पड़ने पर यह निर्णायक जवाब देने की क्षमता भी रखेगी," उन्होंने कहा।
- The Defence Minister lauded the **DRDO's** progress in indigenous missile technologies, stating that the recent successes in strategic and tactical weapon programmes reflected India's growing self-reliance and confidence in defence manufacturing.
  रक्षा मंत्री ने स्वदेशी मिसाइल प्रौद्योगिकियों में **DRDO** की प्रगति की सराहना करते हुए कहा कि रणनीतिक और सामरिक हथियार कार्यक्रमों में हाल की सफलताएँ भारत की बढ़ती **आत्मनिर्भरता** और रक्षा विनिर्माण में बढ़ते **आत्मविश्वास** को दर्शाती हैं।

U.S. attacks third ship with Indian seafarers, crew safe

External Affairs Ministry says 'deeply worried' by attacks but blames conflict in the region; U.S. Centcom says missiles were fired into *Jalveer*'s engine room as directions were not complied with

PCS

The Hindu Bureau
CHENNAI/NEW DELHI

U.S. forces attacked a merchant ship carrying Indian seafarers for the third time in four days. Thursday's attack was on Guinea-Bissau flagged bitumen carrier *Jalveer* off the port of Shinas, Oman.

The vessel had 20 Indian seafarers, and they were safe, said Mukesh Mangal, Additional Secretary of the Ports, Shipping and Waterways Ministry. "As per the latest information, evacuation [of crew] to Shinas port has commenced," Mr. Mangal said at an inter-ministerial briefing on Thursday.

On Wednesday , the External Affairs Ministry had summoned the U.S. Chargé d'affaires Jason Meeks and lodged a "strong protest" regarding the attacks.

On Thursday, the Ministry, while emphasising that the "attacks came from the U.S. Navy stationed there", described the strikes as "deeply worrisome" but blamed them on the ongoing conflict between U.S.-Israel and Iran in the region. U.S. Centcom has said in a statement that two Hellfire missiles were fired into *Jalveer*'s engine room after the "crew repeatedly failed to comply with directions from U.S. forces". The ship was attacked for "attempting to transport Iranian oil."

The commercial vessel *Jalveer* attacked off the coast of Oman on Thursday. FORWARD SEAMEN'S UNION OF INDIA/ANI

Jalveer's safety manager is an Indian company located in Chembur, Mumbai, as per the Equasis database.

U.S. aircraft attacked Palau-flagged tankers *Marivex* and *Settebello* on Monday and Wednesday, respectively. Three Indian seafarers on *Settebello* died in the attack, which the Indian government confirmed on Thursday.

The three attacks have targeted the engine rooms of the ships and sometimes the steering compartment but above the waterline. This would render the ship without the means to move or manoeuvre but not sink it. The Directorate General of Shipping had issued an advisory mid-February asking seafarer recruiters and shipowners not to deploy seafarers on ships calling on Iranian ports. An official source said the crew onboard the three vessels had joined before the advisory was issued.

Family members of seafarer Aditya Sharma (23), a deck cadet on *Settebello* who was among the dead, urged the government of Himachal Pradesh, where they live, and the Centre to get his body back to the native Galore village in Hamirpur so that his last rites could be performed. Sharma was planning to visit home in May but decided to extend his stay at the vessel for a month, they said.

The official spokesperson of the External Affairs Ministry Randhir Jaiswal said efforts are under way to bring back the mortal remains of the dead.

Condemning the attacks, the Congress said in a statement that PM Narendra Modi had "repeatedly showcased his personal rapport with President Donald Trump as a diplomatic achievement" and that Mr. Modi should "not evade responsibility when that relationship fails to protect Indian lives and interests."

Bangladesh wins maiden ODI series against Australia

PCS

Towhid Hridoy hit an unbeaten 40 as Bangladesh won the second One-Day International by five wickets on Thursday to seal its first-ever series win against Australia in the 50-over format. Chasing a DLS revised victory target of 192 in 41 overs in a rain-hit match, Bangladesh eased home with 36 balls to spare to take an unassailable 2-0 lead in the three-match series. Australia posted 187 for eight in 42 overs with its innings cut short and ended by rain after Marnus Labuschagne, who made an unbeaten 55, and Xavier Bartlett, who hit 52, rescued the visitor from 0-3. Opening bowlers Mustafizur Rahman and Taskin Ahmed took three wickets each. The victory extended Bangladesh's winning streak to five consecutive home ODI series, following triumphs over Sri Lanka, West Indies, Pakistan and New Zealand.

The scores: Australia 187/8 in 42 overs (Marnus Labuschagne 55 n.o., Xavier Bartlett 52, Taskin Ahmed 3/33, Mustafizur Rahman 3/27) lost to Bangladesh 195/5 in 35 overs (Soumya Sarkar 42, Najmul Hossain Shanto 42, Towhid Hridoy 40 n.o.). **Target:** 192 in 41 overs; Bangladesh won by DLS method.

12J6. Bangladesh wins maiden ODI series against Australia

Should India incentivise bigger families?

Aparajita Chattopadhyay
Professor at the International Institute for Population Sciences

Neelanjan Sircar
Political scientist teaching at Ahmedabad University

GS I: Society

PARLEY

For decades, Indian policymakers have encouraged population control, with the familiar slogan of '*Hum Do, Humare Do*' (We two, our two). However, the recent drop in India's Total Fertility Rate (TFR) – the average number of children a woman would have in her lifetime – has now dropped to 1.9, below the replacement rate of 2.1, with some southern States seeing their TFR drop to 1.3. Last month, Andhra Pradesh Chief Minister Chandrababu Naidu announced cash incentives of ₹30,000 and ₹40,000 to women having their third and fourth child respectively, in a bid to reverse that trend. Several other southern States have indicated that they also see the benefits of boosting population growth, though not through a cash payout. Should India incentivise bigger families? Aparajita Chattopadhyay and Neelanjan Sircar discuss the question in a conversation moderated by **Priscilla Jebaraj**.

Why are policymakers considering a change in the approach to population control?

Aparajita Chattopadhyay: After a long struggle with family planning since independence, our fertility has started declining. There are State-level variations, but overall fertility now is 1.9. It is fine, and India can grow in this way for maybe 40 to 50 years. But reversal of fertility trends cannot be a policy driven thing. It is deeply rooted socio-culturally and is an individualistic choice. You cannot tell a group of women to increase fertility because I am giving you money. It has never happened in that way, even in European or other Asian countries.

The political implications are the immediate trigger for this policy. Is the threat of future parliamentary delimitation a reason to reverse fertility decline?

Neelanjan Sircar: There has been a lot of discussion about the growth rate of southern States as delimitation is on the horizon. But we need to look beyond pure politics because any growth spurred by these incentives is unlikely to help in the short-term. The reality is, if there's a delimitation exercise happening in the next couple of years, you're not going to dramatically change the fertility rate by then.

Another reason this is being considered is because of the political economy of States with a working population that may be shrinking. But this is a ham-handed approach. Social and demographic transformations are complex phenomena, and go hand in hand with a certain level of economic development. Historically, with a certain level of social and economic development, the fertility rate drops.

Now, there's a cash incentive at play to encourage people to have more children. For a wealthy family, this incentive is simply not enough to invest in another child. But for a poor family, perhaps it is. Here, you are not just increasing the fertility rate in a State, you are also changing other social attributes in the population, in terms of who is going to be able to respond to such an incentive and who will not. It's not as simple as saying we've created a working age population because you've fundamentally changed the composition of the working age population once you've introduced an economic incentive.

Children playing on the swings near the outskirts of the Amaravati capital region, amid the summer heat, in Andhra Pradesh on May 8. G.N. RAO

What has been the international experience of attempting to boost population growth?

AC: Incentivisation can help relatively lower income groups, and this has happened in many European countries. For example, in Poland, there was a short-term boost in birth rate only among the lower income demographics. In Sweden and France, tax incentives changed things for a short span, but it was very difficult to sustain that reversal, and the same thing happened with Singapore, Japan, South Korea.

Nowadays, the entire world is going through a polycrisis shock. There is a lot of instability in geopolitics, the economy, and the climate. Moreover, there are both altruistic and individualistic attitudes to fertility. The younger generation is quite aspirational. They need their prosperity – a good job and savings. So, you cannot ask them to go and have more children.

Until women confirm that there is security in every possible sense, they will not reverse the fertility rate because there are plenty of tangible and intangible costs for a woman or for the society to have an additional child. So at this juncture, I believe that incentivisation may not work. In India, especially, it is not required because we have a huge population base, so there may not actually be a scarcity of working age labourers if you improve their skills, give them better job opportunities, improve the savings and investment scenario, and promote the silver ageing economy.

> Social and demographic transformations are complex phenomena, and go hand in hand with economic development. Historically, with a certain level of social and economic development, the fertility rate drops
>
> NEELANJAN SIRCAR

Falling fertility rates are an uneven phenomenon. What does this portend for Indian federalism?

NS: Obviously there are some immediate questions about converting populations into political representation through delimitation. But another variable would be that as we see differences in fertility rates, we're also going to see very different demographic profiles of States. And we know that the youth, the middle-aged, and the elderly all vote differently. They're in different stages of life, so they have different economic preferences in terms of what a government should be investing in, for instance, pensions versus manufacturing jobs versus childcare. So we're going to see very different political economy choices.

AC: With regard to Andhra Pradesh, if you look at the recent NFHS statistics, there are a number of areas, instead of cash incentives, where they can spend money in order to get lower middle class people to reproduce more. Almost one in four women aged 20 to 24 got married before turning 18. Only 30% of households have women who own any assets, and only 48% of women work. If Andhra Pradesh thinks that they're demographically advanced and can behave like Europe to reverse fertility trends, then the women in the workforce should be at 80%.

In European countries, the motherhood penalty is almost negligible. There is enough parental leave, and workforce participation is very high. So only when your economy and social security is perfect can you think of having a reversal of fertility trends.

What are some key findings of the Longitudinal Ageing Study in India?

AC: By 2050, 20% or more of the Indian population will be aged 60 and above, so we have to prepare ourselves, especially with regard to healthcare costs. We need tremendous investment in geriatric care, basic primary healthcare, better pension schemes, and better savings schemes. We also need to have communities for elderly living. But we still have a huge population base. Don't mix up the percentage with the number base. We can reduce the working age population so long as we have a very highly skilled population who earn well and will pay for these costs.

If population growth incentives don't work, then lower-fertility rate States may increase their working age population through migration from other States. What is the political fallout of that?

NS: Demographic anxieties have been showing up in one State after another. Even in a poorer State like West Bengal, there are demographic anxieties vis-a-vis Bangladesh. As for why this phenomenon happens, these are labour market vacancies. These are populations which have achieved a certain level of development, and yet the economy requires some people willing to do manual work, at a lower wage, in the sun. This is not a problem that can be solved by simply having more children. It is unlikely that demographic anxieties can be reduced as a function of the economic structure.

Migration is an economic phenomenon that is almost independent of the fertility rate, given what the economic condition of these States might be. The people who are being birthed there are very unlikely to be willing to do those jobs that people coming from north India are doing today in south India.

It boggles the mind that somebody is trying to reverse what is a very standard social phenomenon and demographic trend at this stage of development. I understand that there are challenges in Europe where countries are well below replacement rates. But this entire debate is bizarre for the very simple reason that there are so many things the government could be spending this kind of money on which would actually address the needs of an ageing population and an underemployed population. This is a very peculiar policy decision.

12J6. Should India incentivise bigger families?
क्या भारत को बड़े परिवारों को प्रोत्साहन देना चाहिए?

- For decades, Indian policymakers have encouraged **population control**, with the familiar slogan of '**Hum Do, Humare Do**' (We two, our two).
  दशकों से भारतीय नीति-निर्माता **जनसंख्या नियंत्रण** को प्रोत्साहित करते रहे हैं, जिसके लिए '**हम दो, हमारे दो**' का प्रसिद्ध नारा दिया गया था।
- However, the recent drop in India's **Total Fertility Rate (TFR)** — the average number of children a woman would have in her lifetime — has now dropped to **1.9**, below the replacement rate of **2.1**, with some southern States seeing their TFR drop to **1.3**.
  हालाँकि, भारत की **कुल प्रजनन दर (TFR)** — अर्थात एक महिला द्वारा अपने जीवनकाल में जन्म दिए जाने वाले बच्चों की औसत संख्या — अब घटकर **1.9** रह गई है, जो **2.1** के प्रतिस्थापन स्तर से कम है, जबकि कुछ दक्षिणी राज्यों में यह घटकर **1.3** तक पहुँच गई है।
- Last month, **Andhra Pradesh Chief Minister Chandrababu Naidu** announced cash incentives of **₹30,000** and **₹40,000** to women having their third and fourth child respectively, in a bid to reverse that trend.
  पिछले महीने **आंध्र प्रदेश के मुख्यमंत्री चंद्रबाबू नायडू** ने इस प्रवृत्ति को पलटने के प्रयास में तीसरे और चौथे बच्चे को जन्म देने वाली महिलाओं के लिए क्रमशः **₹30,000** और **₹40,000** की नकद प्रोत्साहन राशि की घोषणा की।
- Several other southern States have indicated that they also see the benefits of boosting population growth, though not through a cash payout.
  कई अन्य दक्षिणी राज्यों ने भी संकेत दिया है कि वे जनसंख्या वृद्धि को बढ़ावा देने के लाभ देखते हैं, हालांकि नकद प्रोत्साहन के माध्यम से नहीं।

- Should India incentivise **bigger families**?
  क्या भारत को **बड़े परिवारों** को प्रोत्साहित करना चाहिए?
- **Aparajita Chattopadhyay** and **Neelanjan Sircar** discuss the question in a conversation moderated by **Priscilla Jebaraj**.
  अपराजिता चट्टोपाध्याय और **नीलांजन सरकार** ने इस प्रश्न पर **प्रिसिला जेबराज** द्वारा संचालित एक चर्चा में अपने विचार प्रस्तुत किए।

Why are policymakers considering a change in the approach to population control?
नीति-निर्माता जनसंख्या नियंत्रण के दृष्टिकोण में परिवर्तन पर विचार क्यों कर रहे हैं?

- **Aparajita Chattopadhyay:** After a long struggle with **family planning** since independence, our fertility has started declining.
  अपराजिता चट्टोपाध्याय: स्वतंत्रता के बाद से **परिवार नियोजन** के लंबे प्रयासों के परिणामस्वरूप हमारी प्रजनन दर में गिरावट आने लगी है।
- There are State-level variations, but overall fertility now is **1.9**.
  राज्य स्तर पर भिन्नताएँ हैं, किन्तु कुल प्रजनन दर अब **1.9** है।
- It is fine, and India can grow in this way for maybe **40 to 50 years**.
  यह स्थिति संतोषजनक है और भारत इस प्रकार अगले **40 से 50 वर्षों** तक विकास कर सकता है।
- But reversal of fertility trends cannot be a **policy driven** thing.
  किन्तु प्रजनन दर की प्रवृत्तियों को पलटना केवल **नीति-आधारित** प्रक्रिया नहीं हो सकती।
- It is deeply rooted socio-culturally and is an **individualistic choice**.
  यह सामाजिक एवं सांस्कृतिक रूप से गहराई से जुड़ा हुआ विषय है और एक **व्यक्तिगत निर्णय** है।
- You cannot tell a group of women to increase fertility because I am giving you money.
  आप केवल धन देकर महिलाओं के किसी समूह से यह नहीं कह सकते कि वे अधिक बच्चे पैदा करें।
- It has never happened in that way, even in **European** or other **Asian countries**.
  यह इस प्रकार कभी नहीं हुआ, यहाँ तक कि **यूरोपीय** या अन्य **एशियाई देशों** में भी नहीं।
- The political implications are the immediate trigger for this policy.
  इस नीति के पीछे राजनीतिक प्रभाव तात्कालिक प्रेरक कारक हैं।

Is the threat of future parliamentary delimitation a reason to reverse fertility decline?
क्या भविष्य में संसदीय परिसीमन का संभावित प्रभाव प्रजनन दर में गिरावट को उलटने का कारण है?

- **Neelanjan Sircar:** There has been a lot of discussion about the growth rate of southern States as **delimitation** is on the horizon.
  नीलांजन सरकार: दक्षिणी राज्यों की जनसंख्या वृद्धि दर को लेकर काफी चर्चा हुई है क्योंकि **परिसीमन** की प्रक्रिया निकट भविष्य में संभावित है।
- But we need to look beyond pure politics because any growth spurred by these incentives is unlikely to help in the short-term.
  लेकिन हमें केवल राजनीति से आगे भी देखना होगा क्योंकि इन प्रोत्साहनों से उत्पन्न कोई भी वृद्धि अल्पकाल में विशेष सहायता नहीं करेगी।
- The reality is, if there's a delimitation exercise happening in the next couple of years, you're not going to dramatically change the fertility rate by then.
  वास्तविकता यह है कि यदि अगले कुछ वर्षों में परिसीमन होता है, तो तब तक प्रजनन दर में कोई नाटकीय परिवर्तन संभव नहीं होगा।
- Another reason this is being considered is because of the **political economy** of States with a working population that may be shrinking.
  इस पर विचार किए जाने का एक अन्य कारण उन राज्यों की **राजनीतिक अर्थव्यवस्था** है जहाँ कार्यशील जनसंख्या घट सकती है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- But this is a **ham-handed approach**.
  किन्तु यह एक **असावधानीपूर्ण और अपर्याप्त दृष्टिकोण** है।
- Social and demographic transformations are **complex phenomena**, and go hand in hand with a certain level of economic development.
  सामाजिक और जनसांख्यिकीय परिवर्तन **जटिल प्रक्रियाएँ** हैं और वे आर्थिक विकास के एक निश्चित स्तर के साथ जुड़े होते हैं।
- Historically, with a certain level of social and economic development, the fertility rate drops.
  ऐतिहासिक रूप से, सामाजिक और आर्थिक विकास के एक निश्चित स्तर पर पहुँचने के बाद प्रजनन दर में गिरावट आती है।
- Now, there's a **cash incentive** at play to encourage people to have more children.
  अब लोगों को अधिक बच्चे पैदा करने के लिए **नकद प्रोत्साहन** दिया जा रहा है।
- For a wealthy family, this incentive is simply not enough to invest in another child.
  किसी समृद्ध परिवार के लिए यह प्रोत्साहन राशि एक अतिरिक्त बच्चे के पालन-पोषण हेतु पर्याप्त नहीं है।
- But for a poor family, perhaps it is.
  किन्तु किसी गरीब परिवार के लिए यह प्रभावी हो सकती है।
- Here, you are not just increasing the fertility rate in a State, you are also changing other social attributes in the population, in terms of who is going to be able to respond to such an incentive and who will not.
  यहाँ आप केवल किसी राज्य की प्रजनन दर नहीं बढ़ा रहे हैं, बल्कि जनसंख्या की अन्य सामाजिक विशेषताओं को भी बदल रहे हैं, क्योंकि कुछ लोग ऐसे प्रोत्साहनों का लाभ उठा पाएँगे जबकि कुछ नहीं।
- It's not as simple as saying we've created a **working age population** because you've fundamentally changed the composition of the working age population once you've introduced an economic incentive.
  यह कहना इतना सरल नहीं है कि हमने **कार्यशील आयु वर्ग की जनसंख्या** तैयार कर ली है, क्योंकि आर्थिक प्रोत्साहन लागू करने के बाद आप उस कार्यशील आयु वर्ग की संरचना को मूल रूप से बदल देते हैं।

What has been the international experience of attempting to boost population growth?
जनसंख्या वृद्धि को बढ़ावा देने के प्रयासों का अंतरराष्ट्रीय अनुभव क्या रहा है?

- **AC:** Incentivisation can help relatively **lower income groups**, and this has happened in many **European countries**.
  एसी: प्रोत्साहन योजनाएँ अपेक्षाकृत **निम्न आय वर्गों** की सहायता कर सकती हैं, और ऐसा कई **यूरोपीय देशों** में देखा गया है।
- For example, in **Poland**, there was a short-term boost in birth rate only among the lower income demographics.
  उदाहरण के लिए, **पोलैंड** में जन्म दर में अल्पकालिक वृद्धि केवल निम्न आय वर्ग के लोगों के बीच देखी गई थी।
- In **Sweden** and **France**, tax incentives changed things for a short span, but it was very difficult to sustain that reversal, and the same thing happened with **Singapore**, **Japan**, **South Korea**.
  स्वीडन और **फ्रांस** में कर प्रोत्साहनों से कुछ समय के लिए परिवर्तन आया, लेकिन उस प्रवृत्ति को लंबे समय तक बनाए रखना बहुत कठिन सिद्ध हुआ, और यही स्थिति **सिंगापुर**, **जापान** तथा **दक्षिण कोरिया** में भी देखी गई।
- Nowadays, the entire world is going through a **polycrisis shock**.
  वर्तमान समय में पूरा विश्व **बहुआयामी संकट (पॉलीक्राइसिस)** के दौर से गुजर रहा है।
- There is a lot of instability in **geopolitics**, the economy, and the climate.
  भूराजनीति, अर्थव्यवस्था और जलवायु के क्षेत्र में व्यापक अस्थिरता विद्यमान है।
- Moreover, there are both **altruistic** and **individualistic attitudes** to fertility.
  इसके अतिरिक्त, प्रजनन के प्रति **परोपकारी** तथा **व्यक्तिवादी दृष्टिकोण** दोनों मौजूद हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Website : patrioticias.in

- The younger generation is quite **aspirational**.
  युवा पीढ़ी अत्यंत **आकांक्षी** है।
- They need their prosperity — a good job and savings.
  उन्हें समृद्धि की आवश्यकता है — एक अच्छा रोजगार और पर्याप्त बचत।
- So, you cannot ask them to go and have more children.
  इसलिए आप उनसे अधिक बच्चे पैदा करने की अपेक्षा नहीं कर सकते।
- Until women confirm that there is **security** in every possible sense, they will not reverse the fertility rate because there are plenty of tangible and intangible costs for a woman or for the society to have an additional child.
  जब तक महिलाओं को प्रत्येक स्तर पर **सुरक्षा** का विश्वास नहीं होगा, वे प्रजनन दर में वृद्धि नहीं करेंगी, क्योंकि एक अतिरिक्त बच्चे के जन्म से महिला और समाज दोनों पर अनेक प्रत्यक्ष एवं अप्रत्यक्ष लागतें आती हैं।
- So at this juncture, I believe that **incentivisation** may not work.
  इस समय मुझे लगता है कि **प्रोत्साहन आधारित नीति** प्रभावी सिद्ध नहीं होगी।
- In India, especially, it is not required because we have a huge **population base**, so there may not actually be a scarcity of working age labourers if you improve their skills, give them better job opportunities, improve the savings and investment scenario, and promote the **silver ageing economy**.
  विशेष रूप से भारत में इसकी आवश्यकता नहीं है क्योंकि हमारे पास विशाल **जनसंख्या आधार** है, इसलिए यदि कौशल विकास, बेहतर रोजगार अवसर, बचत एवं निवेश की स्थिति में सुधार तथा **रजत वृद्धावस्था अर्थव्यवस्था (सिल्वर एजिंग इकोनॉमी)** को बढ़ावा दिया जाए, तो कार्यशील आयु के श्रमिकों की वास्तविक कमी उत्पन्न नहीं होगी।

Falling fertility rates are an uneven phenomenon. What does this portend for Indian federalism?
घटती प्रजनन दर एक असमान प्रवृत्ति है। इसका भारतीय संघवाद पर क्या प्रभाव पड़ सकता है?

- **NS:** Obviously there are some immediate questions about converting populations into **political representation** through **delimitation**.
  एनएस: स्पष्ट रूप से **परिसीमन** के माध्यम से जनसंख्या को **राजनीतिक प्रतिनिधित्व** में परिवर्तित करने को लेकर कुछ तात्कालिक प्रश्न हैं।
- But another variable would be that as we see differences in fertility rates, we're also going to see very different **demographic profiles** of States.
  किन्तु एक अन्य महत्वपूर्ण पक्ष यह है कि प्रजनन दरों में अंतर के साथ-साथ राज्यों की **जनसांख्यिकीय प्रोफ़ाइल** भी एक-दूसरे से काफी भिन्न होती जाएगी।
- And we know that the **youth**, the **middle-aged**, and the **elderly** all vote differently.
  हम जानते हैं कि **युवा**, **मध्य आयु वर्ग** तथा **वृद्धजन** सभी अलग-अलग प्रकार से मतदान करते हैं।
- They're in different stages of life, so they have different economic preferences in terms of what a government should be investing in, for instance, **pensions** versus **manufacturing jobs** versus **childcare**.
  वे जीवन के विभिन्न चरणों में होते हैं, इसलिए सरकार के निवेश की प्राथमिकताओं के संबंध में उनकी आर्थिक पसंद भी अलग होती है, जैसे **पेंशन**, **विनिर्माण रोजगार**, या **बाल देखभाल**।
- So we're going to see very different **political economy choices**.
  इस प्रकार हमें बहुत भिन्न प्रकार के **राजनीतिक-अर्थव्यवस्था संबंधी विकल्प** देखने को मिलेंगे।
- **AC:** With regard to **Andhra Pradesh**, if you look at the recent **NFHS statistics**, there are a number of areas, instead of cash incentives, where they can spend money in order to get lower middle class people to reproduce more.
  एसी: आंध्र प्रदेश के संदर्भ में यदि हाल के **NFHS आँकड़ों** को देखें, तो ऐसे अनेक क्षेत्र हैं जहाँ नकद प्रोत्साहन

देने के बजाय धन खर्च करके निम्न मध्यम वर्ग के लोगों को अधिक बच्चे पैदा करने के लिए प्रेरित किया जा सकता है।

- Almost one in four women aged 20 to 24 got married before turning 18.
  20 से 24 वर्ष आयु वर्ग की लगभग प्रत्येक चार महिलाओं में से एक का विवाह 18 वर्ष की आयु से पहले हो गया था।
- Only **30% of households** have women who own any assets, and only **48% of women** work.
  केवल **30% परिवारों** में महिलाओं के पास कोई संपत्ति है और केवल **48% महिलाएँ** कार्यरत हैं।
- If Andhra Pradesh thinks that they're demographically advanced and can behave like Europe to reverse fertility trends, then the women in the workforce should be at **80%**.
  यदि आंध्र प्रदेश स्वयं को जनसांख्यिकीय रूप से उन्नत मानता है और प्रजनन दर की प्रवृत्ति को पलटने के लिए यूरोप जैसा व्यवहार करना चाहता है, तो कार्यबल में महिलाओं की भागीदारी **80%** होनी चाहिए।
- In **European countries**, the **motherhood penalty** is almost negligible.
  यूरोपीय देशों में **मातृत्व दंड (मदरहुड पेनल्टी)** लगभग नगण्य है।
- There is enough **parental leave**, and workforce participation is very high.
  वहाँ पर्याप्त **अभिभावकीय अवकाश** उपलब्ध है और कार्यबल में भागीदारी भी बहुत अधिक है।
- So only when your economy and **social security** is perfect can you think of having a reversal of fertility trends.
  इसलिए केवल तब, जब आपकी अर्थव्यवस्था और **सामाजिक सुरक्षा व्यवस्था** अत्यंत सुदृढ़ हो, आप प्रजनन दर की गिरती प्रवृत्ति को पलटने के बारे में विचार कर सकते हैं।

What are some key findings of the Longitudinal Ageing Study in India?
भारत में दीर्घकालिक वृद्धावस्था अध्ययन (Longitudinal Ageing Study in India) के कुछ प्रमुख निष्कर्ष क्या हैं?

- **AC:** By **2050**, **20% or more** of the Indian population will be aged **60 and above**, so we have to prepare ourselves, especially with regard to **healthcare costs**.
  एसी: वर्ष **2050** तक भारत की **20% या उससे अधिक** जनसंख्या की आयु **60 वर्ष या उससे अधिक** होगी, इसलिए हमें विशेष रूप से **स्वास्थ्य देखभाल व्यय** के संदर्भ में तैयारी करनी होगी।
- We need tremendous investment in **geriatric care**, basic primary healthcare, better pension schemes, and better savings schemes.
  हमें **जराचिकित्सा देखभाल (जेरियाट्रिक केयर)**, बुनियादी प्राथमिक स्वास्थ्य सेवाओं, बेहतर पेंशन योजनाओं तथा बेहतर बचत योजनाओं में व्यापक निवेश की आवश्यकता है।
- We also need to have communities for **elderly living**.
  हमें **वृद्धजन आवासीय समुदायों** का भी विकास करना होगा।
- But we still have a huge **population base**.
  किन्तु हमारे पास अभी भी एक विशाल **जनसंख्या आधार** मौजूद है।
- Don't mix up the percentage with the number base.
  प्रतिशत और वास्तविक संख्या के आधार को एक-दूसरे के साथ नहीं मिलाना चाहिए।
- We can reduce the **working age population** so long as we have a very highly skilled population who earn well and will pay for these costs.
  यदि हमारे पास अत्यधिक कुशल, अच्छी आय अर्जित करने वाली जनसंख्या हो, जो इन व्ययों का वहन कर सके, तो **कार्यशील आयु वर्ग की जनसंख्या** में कमी को भी प्रबंधित किया जा सकता है।

If population growth incentives don't work, then lower-fertility rate States may increase their working age population through migration from other States. What is the political fallout of that?
यदि जनसंख्या वृद्धि प्रोत्साहन प्रभावी नहीं होते, तो निम्न प्रजनन दर वाले राज्य अन्य राज्यों से प्रवासन के माध्यम से अपनी कार्यशील आयु वर्ग की जनसंख्या बढ़ा सकते हैं। इसका राजनीतिक प्रभाव क्या होगा?

- **NS: Demographic anxieties** have been showing up in one State after another.
  एनएस: जनसांख्यिकीय चिंताएँ एक के बाद एक राज्यों में उभरती दिखाई दे रही हैं।
- Even in a poorer State like **West Bengal**, there are demographic anxieties vis-a-vis **Bangladesh**.
  पश्चिम बंगाल जैसे अपेक्षाकृत गरीब राज्य में भी **बांग्लादेश** के संदर्भ में जनसांख्यिकीय चिंताएँ मौजूद हैं।
- As for why this phenomenon happens, these are **labour market vacancies**.
  जहाँ तक इस घटना के कारण का प्रश्न है, यह **श्रम बाजार में रिक्तियों** से संबंधित है।
- These are populations which have achieved a certain level of development, and yet the economy requires some people willing to do manual work, at a lower wage, in the sun.
  ये ऐसी जनसंख्याएँ हैं जिन्होंने विकास का एक निश्चित स्तर प्राप्त कर लिया है, फिर भी अर्थव्यवस्था को ऐसे लोगों की आवश्यकता होती है जो कम वेतन पर कठिन शारीरिक श्रम करने के लिए तैयार हों।
- This is not a problem that can be solved by simply having more children.
  यह ऐसी समस्या नहीं है जिसे केवल अधिक बच्चे पैदा करके हल किया जा सके।
- It is unlikely that demographic anxieties can be reduced as a function of the economic structure.
  यह संभावना कम है कि केवल आर्थिक संरचना के आधार पर जनसांख्यिकीय चिंताओं को कम किया जा सके।
- **Migration** is an economic phenomenon that is almost independent of the fertility rate, given what the economic condition of these States might be.
  प्रवासन एक आर्थिक प्रक्रिया है जो इन राज्यों की आर्थिक परिस्थितियों को देखते हुए प्रजनन दर से लगभग स्वतंत्र रूप से कार्य करती है।
- The people who are being birthed there are very unlikely to be willing to do those jobs that people coming from north India are doing today in south India.
  वहाँ जन्म लेने वाले लोग उन कार्यों को करने के लिए संभवतः तैयार नहीं होंगे, जिन्हें आज उत्तर भारत से आने वाले लोग दक्षिण भारत में कर रहे हैं।
- It boggles the mind that somebody is trying to reverse what is a very standard social phenomenon and demographic trend at this stage of development.
  यह आश्चर्यजनक है कि कोई व्यक्ति विकास के इस चरण में एक सामान्य सामाजिक घटना और जनसांख्यिकीय प्रवृत्ति को उलटने का प्रयास कर रहा है।
- I understand that there are challenges in **Europe** where countries are well below **replacement rates**.
  मैं समझता हूँ कि **यूरोप** में ऐसी चुनौतियाँ हैं जहाँ कई देशों की प्रजनन दर **प्रतिस्थापन स्तर** से काफी नीचे है।
- But this entire debate is bizarre for the very simple reason that there are so many things the government could be spending this kind of money on which would actually address the needs of an **ageing population** and an **underemployed population**.
  किन्तु यह पूरी बहस विचित्र प्रतीत होती है क्योंकि सरकार इस प्रकार की धनराशि को ऐसे अनेक क्षेत्रों में व्यय कर सकती है जो वास्तव में **वृद्ध होती जनसंख्या** तथा **अपर्याप्त रोजगार प्राप्त जनसंख्या** की आवश्यकताओं को पूरा कर सकते हैं।
- This is a very peculiar **policy decision**.
  यह एक अत्यंत असामान्य **नीतिगत निर्णय** है।

12J6. Security pact with China to remain undisclosed: Solomon Islands govt.
चीन के साथ सुरक्षा समझौता गोपनीय ही रहेगा: सोलोमन द्वीप सरकार

- The contents of a secretive **security pact** between **China** and the **Solomon Islands** will remain undisclosed due to **legal restrictions**, the Pacific nation's new government said on Thursday.

Security pact with China to remain undisclosed: Solomon Islands govt.

REUTERS

GS I: Geography

The contents of a secretive security pact between China and the Solomon Islands will remain undisclosed due to legal restrictions, the Pacific nation's new government said on Thursday. The deal struck in 2022 rattled Washington and Canberra because of concern it opened the door to a permanent Chinese military presence. AFP

चीन और **सोलोमन द्वीप** के बीच हुए गुप्त **सुरक्षा समझौते** की सामग्री **कानूनी प्रतिबंधों** के कारण सार्वजनिक नहीं की जाएगी, प्रशांत महासागर क्षेत्र के इस देश की नई सरकार ने गुरुवार को कहा।

- The deal struck in **2022** rattled **Washington** and **Canberra** because of concern it opened the door to a permanent **Chinese military presence**.
  2022 में हुए इस समझौते ने **वॉशिंगटन** और **कैनबरा** को चिंतित कर दिया था क्योंकि आशंका थी कि इससे स्थायी **चीनी सैन्य उपस्थिति** का रास्ता खुल सकता है।

After many extensions, panel's report on SC status for Dalit converts ready

GS II: Polity

Abhinay Lakshman
NEW DELHI

The Justice K.G. Balakrishnan (retd) Commission examining the issue of Scheduled Caste status for Dalit converts has finished its study and prepared the report it was tasked with almost four years ago, *The Hindu* has learnt.

The three-member Commission of Inquiry was constituted by the government in October 2022, just as the Supreme Court was about to resume hearing a batch of pleas that sought Scheduled Caste status for Dalit Muslims and Christians. The issue has been pending in the top court for 20 years now.

The commission's mandate included examining whether Scheduled Caste status can be granted to Dalits who have converted to any faith other than those mentioned in the Constitution (Scheduled Castes) Order of 1950. Currently, only Dalits of Hindu, Buddhist, and Sikh faiths are entitled to a Scheduled Caste classification, unlike the Scheduled Tribe status, which does not have a religion criterion. The Commission was initially given a two-year deadline to finish its work and submit a report to the government. Since 2024, the Commission has been given multiple extensions, the last one in April this year, which set the latest deadline at June 10, 2026. Gazette records do not show any further extension granted to the Commission.

Justice K.G. Balakrishnan

The Commission's study was meant to look at the demand for Scheduled Caste status for Dalit converts, the opposition to this demand and its impact on existing Scheduled Caste communities, and the levels and types of discrimination faced by Dalit communities after they convert to other faiths.

The Union Social Justice Ministry has made multiple submissions to the Supreme Court in these matters, arguing that the Scheduled Caste status should be denied to people who had converted to faiths like Islam and Christianity.

12J6. After many extensions, panel's report on SC status for Dalit converts ready

कई विस्तारों के बाद, दलित धर्मांतरितों के लिए अनुसूचित जाति दर्जे पर समिति की रिपोर्ट तैयार

- The **Justice K.G. Balakrishnan (retd) Commission** examining the issue of **Scheduled Caste status** for **Dalit converts** has finished its study and prepared the report it was tasked with almost four years ago.
  दलित धर्मांतरितों को **अनुसूचित जाति दर्जा** दिए जाने के मुद्दे की समीक्षा कर रहे **न्यायमूर्ति के.जी. बालकृष्णन (सेवानिवृत्त) आयोग** ने अपना अध्ययन पूरा कर लिया है और लगभग चार वर्ष पूर्व सौंपे गए कार्य की रिपोर्ट तैयार कर ली है।
- The **three-member Commission of Inquiry** was constituted by the government in **October 2022**, just as the **Supreme Court** was about to resume hearing a batch of pleas that sought Scheduled Caste status for **Dalit Muslims and Christians**.
  यह **तीन सदस्यीय जाँच आयोग** सरकार द्वारा **अक्टूबर 2022** में गठित किया गया था, ठीक उस समय जब **सर्वोच्च न्यायालय दलित मुस्लिमों और ईसाइयों** को अनुसूचित जाति का दर्जा देने की मांग करने वाली याचिकाओं की सुनवाई पुनः प्रारंभ करने वाला था।
- The issue has been pending in the **Supreme Court** for **20 years** now.
  यह मामला पिछले **20 वर्षों** से **सर्वोच्च न्यायालय** में लंबित है।
- The Commission's mandate included examining whether **Scheduled Caste status** can be granted to Dalits who have converted to any faith other than those mentioned in the **Constitution (Scheduled Castes) Order of 1950**.
  आयोग के कार्यादेश में यह परीक्षण शामिल था कि क्या उन दलितों को **अनुसूचित जाति का दर्जा** दिया जा सकता है जिन्होंने **संविधान (अनुसूचित जातियाँ) आदेश, 1950** में उल्लिखित धर्मों के अतिरिक्त किसी अन्य धर्म को अपनाया है।
- Currently, only Dalits of **Hindu, Buddhist, and Sikh** faiths are entitled to a **Scheduled Caste classification**, unlike the **Scheduled Tribe** status, which does not have a religion criterion.
  वर्तमान में केवल **हिंदू, बौद्ध और सिख** धर्मों के दलित ही **अनुसूचित जाति वर्गीकरण** के पात्र हैं, जबकि **अनुसूचित जनजाति** दर्जे में धर्म का कोई मानदंड नहीं है।
- The Commission was initially given a **two-year deadline** to finish its work and submit a report to the government.
  आयोग को प्रारंभ में अपना कार्य पूरा करने और सरकार को रिपोर्ट सौंपने के लिए **दो वर्ष की समय-सीमा** दी गई थी।
- Since **2024**, the Commission has been given multiple extensions, the last one in **April this year**, which set the latest deadline at **June 10, 2026**.
  2024 से आयोग को कई बार समय-विस्तार दिया गया, जिनमें अंतिम विस्तार **इस वर्ष अप्रैल** में दिया गया था, जिसके अनुसार नई समय-सीमा **10 जून 2026** निर्धारित की गई।
- **Gazette records** do not show any further extension granted to the Commission.
  राजपत्र अभिलेखों में आयोग को कोई अतिरिक्त समय-विस्तार दिए जाने का उल्लेख नहीं है।
- The Commission's study was meant to look at the demand for **Scheduled Caste status** for Dalit converts, the opposition to this demand and its impact on existing Scheduled Caste communities, and the levels and types of discrimination faced by Dalit communities after they convert to other faiths.
  आयोग का अध्ययन **दलित धर्मांतरितों** को **अनुसूचित जाति दर्जा** देने की मांग, इस मांग के विरोध तथा उसके वर्तमान अनुसूचित जाति समुदायों पर प्रभाव, और अन्य धर्मों में परिवर्तन के बाद दलित समुदायों द्वारा झेले जाने वाले भेदभाव के स्तर एवं प्रकारों का आकलन करने के लिए किया गया था।

- The **Union Social Justice Ministry** has made multiple submissions to the **Supreme Court** in these matters, arguing that the **Scheduled Caste status** should be denied to people who had converted to faiths like **Islam and Christianity**.
केंद्रीय सामाजिक न्याय मंत्रालय ने इन मामलों में **सर्वोच्च न्यायालय** के समक्ष कई प्रस्तुतियाँ दी हैं, जिनमें यह तर्क दिया गया है कि **इस्लाम और ईसाई धर्म** जैसे धर्मों को अपनाने वाले लोगों को **अनुसूचित जाति का दर्जा** नहीं दिया जाना चाहिए।

GS II: Polity

Lows of the land

The rejection of the papers of Congress Rajya Sabha candidate is fraudulent

The rejection of Congress leader Meenakshi Natarajan's nomination for the Rajya Sabha election from Madhya Pradesh raises questions of institutional integrity and procedural fairness, going beyond the fate of a single candidate. The Supreme Court has agreed to hear the matter on Friday. Meanwhile, all three BJP candidates have been declared elected unopposed, raising further questions on the neutrality and fairness of the process. Ms. Natarajan's nomination was rejected by the Returning Officer (RO) following objections that she had failed to disclose a pending criminal case in Hyderabad in her election affidavit. As the All-India Congress Committee (AICC) in-charge of Telangana, she was named as one of the respondents in a private complaint filed by a former Telugu Desam Party corporator before the court of the Additional Metropolitan Magistrate, Hyderabad, in 2025. The complaint was not even against Ms. Natarajan; it was against another Congress leader for alleged inappropriate behaviour and criminal intimidation, and she was mentioned in the petition for allegedly not taking appropriate action against the leader. There is no criminal FIR by the Telangana police against Ms. Natarajan. Unlike a conventional police case, a private complaint originates directly before a court. The court had issued notices to the persons named in the complaint, including Ms. Natarajan.

The RO's decision to use this as grounds for the rejection of the nomination reeks of extreme arbitrariness, and even a conspiracy. The law regarding the disclosure of cases is unambiguous. Section 33A of the Representation of the People Act requires disclosure only of those cases that carry a punishment of two years or more and, above all, only of those cases in which charges have been framed. Framing of charges is a judicial step, which follows the filing of a charge sheet. The RO's position that material facts had been concealed and the nomination papers were incomplete is not merely a misinterpretation of the law, but an insult to common sense. Going by that logic, a candidate could be disqualified for failing to list notices of traffic violations too. The disclosure regime has been designed to ensure transparency regarding candidates' criminal antecedents and pending cases. What makes Ms. Natarajan's case starkly arbitrary is that in the same election cycle, another candidate was asked by the RO to amend the affidavits to meet mandatory requirements. The Election Commission of India has the sacred constitutional duty of ensuring free and fair elections. It is failing in that duty, damaging democracy in the process. The capture of a Rajya Sabha seat by the ruling BJP in complete disregard for the law is a severe setback for election integrity.

12J6. Lows of the land
लोकतंत्र का निम्न स्तर

- Ms. Natarajan's nomination was rejected by the **Returning Officer (RO)** following objections that she had failed to disclose a pending criminal case in Hyderabad in her election affidavit.
श्रीमती नटराजन का नामांकन **रिटर्निंग अधिकारी (RO)** द्वारा इस आपत्ति के आधार पर अस्वीकार कर दिया गया कि उन्होंने अपने चुनावी शपथपत्र में हैदराबाद में लंबित एक आपराधिक मामले का उल्लेख नहीं किया था।
- As the **All-India Congress Committee (AICC)** in-charge of Telangana, she was named as one of the respondents in a private complaint filed by a former Telugu Desam Party corporator before the court of the Additional Metropolitan Magistrate, Hyderabad, in 2025.
तेलंगाना की **अखिल भारतीय कांग्रेस समिति (AICC)** प्रभारी के रूप में, वर्ष 2025 में हैदराबाद के अतिरिक्त महानगरीय मजिस्ट्रेट की अदालत में एक पूर्व तेलुगु देशम पार्टी पार्षद द्वारा दायर निजी शिकायत में उन्हें प्रतिवादियों में से एक के रूप में नामित किया गया था।
- The complaint was not even against Ms. Natarajan; it was against another Congress leader for alleged inappropriate behaviour and criminal intimidation, and she was mentioned in the petition for allegedly not taking appropriate action against the leader.
यह शिकायत स्वयं श्रीमती नटराजन के विरुद्ध नहीं थी; यह एक अन्य कांग्रेस नेता के कथित अनुचित व्यवहार और आपराधिक धमकी के आरोपों से संबंधित थी, तथा याचिका में उनका उल्लेख उस नेता के विरुद्ध उचित कार्रवाई न करने के आरोप के कारण किया गया था।
- Unlike a conventional police case, a private complaint originates directly before a court.
सामान्य पुलिस मामले के विपरीत, एक निजी शिकायत सीधे न्यायालय के समक्ष प्रस्तुत की जाती है।
- The court had issued notices to the persons named in the complaint, including Ms. Natarajan.
न्यायालय ने शिकायत में नामित व्यक्तियों, जिनमें श्रीमती नटराजन भी शामिल थीं, को नोटिस जारी किए थे।
- **Section 33A of the Representation of the People Act** requires disclosure only of those cases that carry a punishment of two years or more and, above all, only of those cases in which charges have been framed.
जन प्रतिनिधित्व अधिनियम की धारा 33A केवल उन मामलों के प्रकटीकरण की अपेक्षा करती है जिनमें दो वर्ष या उससे अधिक की सजा का प्रावधान हो तथा विशेष रूप से उन मामलों का, जिनमें आरोप निर्धारित किए जा चुके हों।
- **Framing of charges** is a judicial step, which follows the filing of

a charge sheet.
आरोप निर्धारण एक न्यायिक प्रक्रिया है, जो आरोप-पत्र दाखिल किए जाने के बाद होती है।

- The RO's position that material facts had been concealed and the nomination papers were incomplete is not merely a misinterpretation of the law, but an insult to common sense.
RO का यह मत कि महत्वपूर्ण तथ्यों को छिपाया गया और नामांकन पत्र अपूर्ण थे, केवल कानून की गलत व्याख्या नहीं बल्कि सामान्य बुद्धि का भी अपमान है।
- The disclosure regime has been designed to ensure transparency regarding candidates' criminal antecedents and pending cases.
प्रकटीकरण व्यवस्था को उम्मीदवारों के आपराधिक इतिहास और लंबित मामलों के संबंध में पारदर्शिता सुनिश्चित करने के लिए बनाया गया है।

GS II: Polity

Fair and square

T.N. Assembly Speaker is going by the letter and spirit of Tenth Schedule

Tamil Nadu Legislative Assembly Speaker J.C.D. Prabhakar has followed democratic principles by deciding not to pursue disqualification proceedings against 21 AIADMK MLAs after the party's general secretary, Edappadi K. Palaniswami, condoned the actions of the rebel legislators. Contrary to their party's whip, the MLAs had supported the Tamilaga Vettri Kazhagam (TVK)-led government during the trust vote on May 13. Mr. Prabhakar also stood by his assurance, made on May 24, that his eventual decision would demonstrate his impartiality. Actually, 25 MLAs of the Dravidian major had violated the party's directive and favoured the new regime but four of them including two women legislators subsequently resigned their seats. This is why the Speaker's action pertained only to 21 MLAs, after receiving letters from Mr. Palaniswami stating that he had condoned the dissidents' violation of the party whip. As the official group and the rebels reached a truce on May 27, the AIADMK chief decided to condone the dissidents' actions within 15 days from the date of such voting, as prescribed under the Tenth Schedule and the Tamil Nadu Assembly's disqualification rules.

Notwithstanding Mr. Prabhakar's track record as a non-controversial politician, many wondered whether he would act fairly, given that Mr. Palaniswami and his colleagues are political adversaries of TVK. Besides, Tamil Nadu has not been free from the unfortunate tendency of Assembly Speakers acting in a partisan manner. P.H. Pandian, who served as Speaker from 1985 to 1989, had even said that the presiding officer of the Assembly possessed "sky-high powers". The discretionary powers enshrined in the Tenth Schedule of the Constitution, which deals with defection, have been used by Speakers in various States for the wrong reasons. By dropping the proceedings against the 21 dissidents, Mr. Prabhakar has upheld constitutional morality. However, he should have initiated disqualification proceedings against the four others before accepting their resignation. The Assembly Secretariat also duly notified that vacancies had arisen in the four constituencies, following which the election authorities advised the District Election Officers to appoint Returning Officers. Mr. Prabhakar rightly went by Mr. Palaniswami's submission wherein only the names of 21 MLAs were mentioned, and decided to pursue the matter against the other four. But, this will be of a purely technical nature as the bar is only on disqualified members becoming Ministers before getting elected again. Even as Mr. Prabhakar's next course of action is awaited, it is a healthy sign that he has so far demonstrated fairness in dealing with the petitions seeking disqualification.

12J6. Fair and square
निष्पक्ष और न्यायसंगत

- T.N. The Assembly **Speaker** is going by the letter and spirit of the Tenth **Schedule**.

तमिलनाडु विधानसभा के **अध्यक्ष दसवीं अनुसूची** के शब्दों और भावना के अनुरूप कार्य कर रहे हैं।

- This is why the Speaker's action pertained only to 21 MLAs, after receiving letters from Mr. Palaniswami stating that he had condoned the dissidents' violation of the party whip.

इसी कारण अध्यक्ष की कार्रवाई केवल 21 विधायकों तक सीमित रही, क्योंकि उन्हें श्री पलानीस्वामी के पत्र प्राप्त हुए थे जिनमें विद्रोही विधायकों द्वारा पार्टी व्हिप के उल्लंघन को क्षमा किए जाने की जानकारी दी गई थी।

- As the official group and the rebels reached a truce on May 27, the AIADMK chief decided to condone the dissidents' actions within 15 days from the date of such voting, as prescribed under the **Tenth Schedule** and the **Tamil Nadu Assembly's disqualification rules**.

चूँकि 27 मई को आधिकारिक गुट और विद्रोहियों के बीच समझौता हो गया था, इसलिए AIADMK प्रमुख ने **दसवीं अनुसूची** तथा **तमिलनाडु विधानसभा की अयोग्यता नियमावली** के अनुसार मतदान की तिथि से 15 दिनों के भीतर विद्रोहियों के कृत्यों को क्षमा करने का निर्णय लिया।

- The **discretionary powers** enshrined in the **Tenth Schedule of the Constitution**, which deals with defection, have been used by Speakers in various States for the wrong reasons.

दल-बदल से संबंधित **संविधान की दसवीं अनुसूची** में निहित **विवेकाधीन शक्तियों** का विभिन्न राज्यों में अध्यक्षों द्वारा कई बार अनुचित कारणों से उपयोग किया गया है।

- The **Assembly Secretariat** also duly notified that vacancies had arisen in the four constituencies, following which the election authorities advised the **District Election Officers** to appoint **Returning Officers**.

विधानसभा सचिवालय ने भी विधिवत सूचना दी थी कि चार निर्वाचन क्षेत्रों में रिक्तियाँ उत्पन्न हो गई हैं, जिसके बाद चुनाव अधिकारियों ने **जिला निर्वाचन अधिकारियों** को **रिटर्निंग अधिकारियों** की नियुक्ति करने की सलाह दी।

Why is Nicobar debating elections?

Why are Nicobarese tribal councils wary of the administration's proposed election rules? How are Nicobarese leaders chosen today, and what changes do the draft rules propose? Why does the administration want formal elections for tribal councils? How could the proposed rules change Nicobarese self-governance?

GS II: Polity

EXPLAINER

Abhinav Lakshman

The story so far:

The centrally administered Union Territory of Andaman and Nicobar Islands is planning to introduce elections, as they are conducted in the rest of India, to the Nicobarese tribal community's system of self-governance in the archipelago. This includes measures such as the delimitation of constituencies, the preparation of electoral rolls, and the reservation of seats and leadership positions for women in the community's tribal councils. This move has led to urgent discussions amongst existing tribal councils of the Nicobarese about how this might bureaucratise the governance they have been practising. Some have also suspected that it could be intended to have tribal councils that might be more favourable to the Union government's interests there, especially in Great Nicobar, where the current Nicobarese leadership has been opposing the Centre's ₹91,000 crore container port, airport, and tourist-townfield project.

What do the draft rules propose?

The draft Andaman and Nicobar Islands Tribal Councils (Preparation of Electoral Rolls and Conduct of Elections) Rules, 2026, was notified by the district administration on May 15 this year and prescribes the exact procedure and rules for conducting 5-yearly elections to the Village Councils and Tribal Councils. The draft rules provide for conducting elections, the structure of the new representative system, the manner in which seats and constituencies are to be delimited, the rules for candidature, nomination, and withdrawal, their duties and responsibilities, and the broader administrative set-up for conducting these elections.

The proposed structure involves Nicobarese villagers electing five to nine Captains for each village and directly voting for the position of the Chief Captain of each Island Tribal Council. The First Captains of each village of a particular Island are to vote for the position of the Vice-Chief Captain of the Island Tribal Council, and this Island Tribal Council would include the Chief Captain, the Vice-Chief Captain, and all First Captains of the Island.

These draft rules have been notified under the Andaman and Nicobar Islands (Tribal Councils) Regulation, a Presidential regulation promulgated in 2009 with the specific intent to bring autonomous self-governance to the Nicobarese community. Even though this Regulation provided the statutory language to set up the Village Council and Tribal Council structure, a key feature of this Regulation gave the district administration (through the Deputy Commissioner and Assistant Commissioner) an absolute and unilateral veto over any decision of the councils, if they posed a threat of injury or "annoyance" to the public or might "lead to a breach of peace".

Since the 2009 Regulation was passed, there have been several attempts at notifying Draft Rules under it, the latest one in 2020. The past iterations of the draft have often been circulated among tribal council leaders, but the leadership has not been able to successfully communicate the essence of these rules and procedures to the community at large.

The Tribal Welfare Department of the A&NI administration has said that it will wait till June 15 for suggestions and objections. FILE PHOTO

Even though the Nicobarese community has been participating in Lok Sabha elections, according to officials from the Office of the CEO, Andaman and Nicobar Islands, this would be the first time a system of constituency-wise representative leadership structure will be implemented for Nicobarese self-governance if the Draft Rules are finalised.

How do the Nicobarese tribal councils function today?

The Nicobarese community, a designated Scheduled Tribe with a total population of about 30,000 across the Nicobar group of Islands, is traditionally represented by Tribal Councils that have been established over the last five to six decades. Each group of inhabited islands in the Nicobar has its own Tribal Council. Under this Tribal Council structure lies the village leadership, which comprises three Captains per village, headed by the First Captain and assisted by the Second and Third Captains. Including the Tribal Council of Little and Great Nicobar, seven Tribal Councils represent the Nicobarese community in islands like Car Nicobar, Nancowry, Kamorta, Teressa, and others.

Since at least the mid-1970s, experts and scholars have observed that the Nicobarese have been picking village captains through adult franchise. The concept of captaincy as village leadership first emerged in the 16th Century, when the Nicobarese who would go on board passing ships of colonial empires to negotiate began calling themselves captains. The British colonists were, however, the first to start legitimising the Captaincy structure as representative leadership of the community for their own administrative advantage towards the end of the 19th Century.

This structure eventually developed into a supplement to the social structure of large joint families, often referred to as *Tuhets*, that could become a formal channel of communication with the government.

The idea of the tribal council, however, emerged only in the 1990s to facilitate and ease the community's entry into Government developmental activities, specifically in relation to a Central government scheme of the time for poverty alleviation. Today, the Nicobar district says that the Village leadership and the tribal councils have become "the link between the Local Administration and the tribal people of the island... most of the developmental schemes are being implemented through them only".

How are leaders currently chosen in Nicobarese communities?

Even though authorities in the Nicobar district administration have maintained that under the current system, village captains are usually elected every four years, Anthropologist and community leader Anstice Justin has told The Hindu that "there is actually not much documentation on how exactly the leadership of the existing tribal councils operate".

A senior leader of the Tribal Council in Great Nicobar Island explained that elections for Captains and Tribal Council chairperson are held whenever the community feels the need for it. This leader, who is also the First Captain of his village on Great Nicobar Island, elaborated, "For example, the last time I was elected Captain was maybe around 2-3 years ago. There is a tradition in our community to get together for a village meeting. All residents of the village are present at this meeting."

The villagers then nominate names for the Captains of the village through popular consensus. These names are then put on a ballot paper. "We make the ballot papers and print them out ourselves, we appoint a polling officer from among us to conduct the ballot, and the person with the most votes becomes First Captain." He added that similarly, the Tribal Council on GNI has been choosing the Chairperson by popular consensus, but that it had been decades since there was an election to this position.

Villagers mostly think about candidates' level of education, fluency in Hindi (the language of government officials), "foreign" trips (an indicator of exposure to the world outside the islands), and "smartness" (the ability to deal appropriately with officials and outsiders, according to R. Venkat Ramanujam, Simron Jit Singh & Arild Vatn (2012). What Ramanujam et. al. noted, however, was that even though the Captains and Council were elected, "decisions were taken after popular consultation, usually through community meetings, and the tribal council did not have unilateral decision-making powers. Consequently, the captains were neither seen as lawmakers nor as "leaders" balancing social and political concerns."

Why are the proposed changes causing concern?

Tribal Council leaders who have spoken to *The Hindu* about the implications of the new Draft Rules said that the proposed structure is largely being seen as something that would disrupt their traditional ways of perceiving governance. The tribal council leader from Great Nicobar said, "We have been using this way of governing our villages for generations. We hold elections through consensus when needed, and our traditional ways of living are so well integrated into how we oversee the islands and villages. This looks like it will turn all of this into an office job that we will have to do in addition to the lives we live on the islands."

Meanwhile, Mr. Justin has noted that there is a real chance that an attempt to notify the Rules has come now in light of the opposition the government is facing from the Tribal Council on GNI, even though he acknowledged that systemic problems of opacity have riddled the existing system of Tribal Councils and Village Captaincy. "For instance, in several Island Tribal Councils, it remains unclear when the Chairperson was last elected and what kind of authority they wield," he said.

But experts like Mr. Justin, who have worked with the government on engaging with the indigenous communities of the A&NI, have doubted whether the entire Nicobarese community in the islands will have the time and resources to understand the Draft Rules as they have been notified, the context of the Regulation under which they will be implemented, and the implications of introducing such a system for their village-level governance.

The Tribal Welfare Department of the A&NI administration has said that it will wait till June 15 for suggestions and objections, after which a final version may be notified. While the Tribal Councils of Nicobar are yet to hand in a formal objection or suggestions, the Congress party in A&NI has already objected to them and called for their withdrawal, primarily citing the lack of recognition for the Tuhet system and the lack of consultation with the community before bringing this draft.

THE GIST

- Draft rules propose formal elections for Nicobarese Villag and Tribal Councils, including constituencies, voter rolls, anc reservations for women.
- Traditional governance is consensus-based, with village captains chosen through community meetings and locally conducted ballots rather than a fixed bureaucratic electoral system.
- Tribal leaders fear the proposed electoral system could bureaucratise their traditional governance structure and alter existing decision-making processes.

12J6. Why is Nicobar debating elections?
निकोबार में चुनावों को लेकर बहस क्यों हो रही है?

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Website : patrioticias.in

- The centrally administered **Union Territory of Andaman and Nicobar Islands** is planning to introduce elections, as they are conducted in the rest of India, to the **Nicobarese tribal community's** system of self-governance in the archipelago.
  केंद्र शासित **अंडमान और निकोबार द्वीप समूह** प्रशासन द्वीपसमूह में **निकोबारी जनजातीय समुदाय** की स्वशासन व्यवस्था में भारत के अन्य भागों की तरह चुनाव प्रणाली लागू करने की योजना बना रहा है।
- This includes measures such as the **delimitation of constituencies**, the preparation of **electoral rolls**, and the reservation of seats and leadership positions for women in the community's tribal councils.
  इसमें **निर्वाचन क्षेत्रों का परिसीमन**, **मतदाता सूची** तैयार करना तथा जनजातीय परिषदों में महिलाओं के लिए सीटों और नेतृत्व पदों का आरक्षण जैसी व्यवस्थाएँ शामिल हैं।
- This move has led to urgent discussions amongst existing tribal councils of the Nicobarese about how this might bureaucratise the governance they have been practising.
  इस कदम के कारण निकोबारी समुदाय की वर्तमान जनजातीय परिषदों में इस बात को लेकर गंभीर चर्चा शुरू हो गई है कि इससे उनकी पारंपरिक शासन व्यवस्था का अत्यधिक नौकरशाहीकरण हो सकता है।
- Some have also suspected that it could be intended to have tribal councils that might be more favourable to the **Union government's interests** there, especially in **Great Nicobar**, where the current Nicobarese leadership has been opposing the Centre's **₹91,000 crore container port, airport, and tourist-township project**.
  कुछ लोगों को यह भी संदेह है कि इसका उद्देश्य ऐसी जनजातीय परिषदों का गठन करना हो सकता है जो **केंद्र सरकार के हितों** के प्रति अधिक अनुकूल हों, विशेषकर **ग्रेट निकोबार** में, जहाँ वर्तमान निकोबारी नेतृत्व केंद्र की **₹91,000 करोड़ की कंटेनर बंदरगाह, हवाई अड्डा और पर्यटन नगर परियोजना** का विरोध कर रहा है।

What do the draft rules propose?
मसौदा नियम क्या प्रस्तावित करते हैं?

- The draft **Andaman and Nicobar Islands Tribal Councils (Preparation of Electoral Rolls and Conduct of Elections) Rules, 2026**, was notified by the district administration on **May 15** this year and prescribes the exact procedure and rules for conducting **5-yearly elections** to the Village Councils and Tribal Councils.
  अंडमान और निकोबार द्वीप समूह जनजातीय परिषद (मतदाता सूची की तैयारी एवं चुनाव संचालन) नियम, 2026 का मसौदा इस वर्ष **15 मई** को जिला प्रशासन द्वारा अधिसूचित किया गया था, जिसमें ग्राम परिषदों और जनजातीय परिषदों के **पाँच वर्षीय चुनावों** के लिए विस्तृत प्रक्रिया और नियम निर्धारित किए गए हैं।
- The draft rules provide for conducting elections, the structure of the new representative system, the manner in which seats and constituencies are to be delimited, the rules for candidature, nomination, and withdrawal, their duties and responsibilities, and the broader administrative set-up for conducting these elections.
  मसौदा नियम चुनाव कराने, नई प्रतिनिधिक प्रणाली की संरचना, सीटों और निर्वाचन क्षेत्रों के परिसीमन की प्रक्रिया, उम्मीदवारता, नामांकन एवं नाम वापसी के नियम, निर्वाचित प्रतिनिधियों के कर्तव्यों एवं दायित्वों तथा चुनाव संचालन के व्यापक प्रशासनिक ढाँचे का प्रावधान करते हैं।
- The proposed structure involves Nicobarese villagers electing **five to nine Captains** for each village and directly voting for the position of the **Chief Captain** of each Island Tribal Council.
  प्रस्तावित व्यवस्था के अंतर्गत निकोबारी ग्रामीण प्रत्येक गाँव के लिए **पाँच से नौ कप्तानों** का चुनाव करेंगे तथा प्रत्येक द्वीपीय जनजातीय परिषद के **मुख्य कप्तान** का प्रत्यक्ष चुनाव करेंगे।
- The **First Captains** of each village of a particular Island are to vote for the position of the **Vice-Chief Captain** of the Island Tribal Council, and this Island Tribal Council would include the Chief Captain, the Vice-Chief Captain, and all First Captains of the Island.
  किसी विशेष द्वीप के प्रत्येक गाँव के **प्रथम कप्तान** द्वीपीय जनजातीय परिषद के **उप-मुख्य कप्तान** का चुनाव करेंगे, और इस परिषद में मुख्य कप्तान, उप-मुख्य कप्तान तथा उस द्वीप के सभी प्रथम कप्तान शामिल होंगे।

- These draft rules have been notified under the **Andaman and Nicobar Islands (Tribal Councils) Regulation**, a **Presidential Regulation** promulgated in **2009** with the specific intent to bring autonomous self-governance to the Nicobarese community.
  ये मसौदा नियम **अंडमान और निकोबार द्वीप समूह (जनजातीय परिषद) विनियमन** के अंतर्गत अधिसूचित किए गए हैं, जो **2009** में जारी एक **राष्ट्रपति विनियमन** था और जिसका उद्देश्य निकोबारी समुदाय को स्वायत्त स्वशासन प्रदान करना था।
- Even though this Regulation provided the statutory language to set up the Village Council and Tribal Council structure, a key feature of this Regulation gave the district administration (through the **Deputy Commissioner** and **Assistant Commissioner**) an absolute and unilateral veto over any decision of the councils, if they posed a threat of injury or "annoyance" to the public or might "lead to a breach of peace".
  यद्यपि इस विनियमन ने ग्राम परिषद और जनजातीय परिषद की संरचना स्थापित करने के लिए वैधानिक आधार प्रदान किया, इसकी एक महत्वपूर्ण विशेषता यह थी कि इसने जिला प्रशासन (अर्थात **उपायुक्त** और **सहायक आयुक्त**) को परिषदों के किसी भी निर्णय पर पूर्ण एवं एकतरफा वीटो अधिकार प्रदान किया, यदि वह निर्णय जनता को हानि या "असुविधा" पहुँचाने वाला माना जाए अथवा "शांति भंग" होने की आशंका उत्पन्न करे।
- Since the **2009 Regulation** was passed, there have been several attempts at notifying **Draft Rules** under it, the latest one in **2020**.
  2009 के विनियमन के पारित होने के बाद से इसके अंतर्गत **मसौदा नियमों** को अधिसूचित करने के कई प्रयास किए गए हैं, जिनमें नवीनतम प्रयास **2020** में हुआ था।
- The past iterations of the draft have often been circulated among tribal council leaders, but the leadership has not been able to successfully communicate the essence of these rules and procedures to the community at large.
  मसौदा नियमों के पूर्व संस्करण प्रायः जनजातीय परिषद के नेताओं के बीच प्रसारित किए गए, किन्तु नेतृत्व इन नियमों और प्रक्रियाओं की मूल भावना को व्यापक समुदाय तक प्रभावी ढंग से पहुँचाने में सफल नहीं हो सका।
- Even though the **Nicobarese community** has been participating in **Lok Sabha elections**, according to officials from the Office of the **CEO, Andaman and Nicobar Islands**, this would be the first time a system of constituency-wise representative leadership structure will be implemented for Nicobarese self-governance if the Draft Rules are finalised.
  यद्यपि **निकोबारी समुदाय लोकसभा चुनावों** में भाग लेता रहा है, फिर भी **अंडमान और निकोबार द्वीप समूह के मुख्य निर्वाचन अधिकारी (CEO)** के कार्यालय के अधिकारियों के अनुसार, यदि मसौदा नियम अंतिम रूप से लागू होते हैं तो यह पहली बार होगा जब निकोबारी स्वशासन के लिए निर्वाचन क्षेत्र आधारित प्रतिनिधिक नेतृत्व संरचना लागू की जाएगी।

How do the Nicobarese tribal councils function today?
वर्तमान में निकोबारी जनजातीय परिषदें कैसे कार्य करती हैं?

- The **Nicobarese community**, a designated **Scheduled Tribe** with a total population of about **30,000** across the Nicobar group of Islands, is traditionally represented by Tribal Councils that have been established over the last five to six decades.
  निकोबारी समुदाय, जो एक अधिसूचित **अनुसूचित जनजाति** है और जिसकी कुल जनसंख्या निकोबार द्वीप समूह में लगभग **30,000** है, पिछले पाँच से छह दशकों में स्थापित जनजातीय परिषदों द्वारा पारंपरिक रूप से प्रतिनिधित्व प्राप्त करता है।
- Each group of inhabited islands in the Nicobar has its own **Tribal Council**.
  निकोबार के प्रत्येक आबाद द्वीप समूह की अपनी अलग **जनजातीय परिषद** है।
- Under this Tribal Council structure lies the village leadership, which comprises **three Captains per village**, headed by the **First Captain** and assisted by the **Second and Third Captains**.

इस जनजातीय परिषद संरचना के अंतर्गत ग्राम नेतृत्व व्यवस्था आती है, जिसमें प्रत्येक गाँव के लिए **तीन कप्तान** होते हैं, जिनका नेतृत्व **प्रथम कप्तान** करता है और जिन्हें **द्वितीय तथा तृतीय कप्तान** सहयोग प्रदान करते हैं।

- Including the Tribal Council of **Little and Great Nicobar**, seven Tribal Councils represent the Nicobarese community in islands like **Car Nicobar, Nancowry, Kamorta, Teressa**, and others.
  लिटिल निकोबार और ग्रेट निकोबार की जनजातीय परिषदों सहित कुल सात जनजातीय परिषदें **कार निकोबार, नैनकौरी, कामोर्टा, तेरेसा** तथा अन्य द्वीपों में निकोबारी समुदाय का प्रतिनिधित्व करती हैं।
- Since at least the mid-1970s, experts and scholars have observed that the Nicobarese have been picking village captains through **adult franchise**.
  कम-से-कम 1970 के दशक के मध्य से विशेषज्ञों और विद्वानों ने यह देखा है कि निकोबारी समुदाय **वयस्क मताधिकार** के माध्यम से ग्राम कप्तानों का चयन करता रहा है।
- The concept of **captaincy** as village leadership first emerged in the **16th Century**, when the Nicobarese who would go on board passing ships of colonial empires to negotiate began calling themselves captains.
  ग्राम नेतृत्व के रूप में **कप्तानी व्यवस्था** की अवधारणा पहली बार **16वीं शताब्दी** में उभरी, जब निकोबारी लोग औपनिवेशिक साम्राज्यों के गुजरने वाले जहाजों पर बातचीत करने के लिए जाते थे और स्वयं को कप्तान कहने लगे।
- The British colonists were, however, the first to start legitimising the Captaincy structure as representative leadership of the community for their own administrative advantage towards the end of the **19th Century**.
  हालाँकि, **19वीं शताब्दी** के अंत में ब्रिटिश उपनिवेशवादियों ने अपने प्रशासनिक लाभ के लिए कप्तानी व्यवस्था को समुदाय के प्रतिनिधिक नेतृत्व के रूप में वैधता प्रदान करना प्रारम्भ किया।
- This structure eventually developed into a supplement to the social structure of large joint families, often referred to as **Tuhets**, that could become a formal channel of communication with the government.
  यह व्यवस्था आगे चलकर बड़े संयुक्त पारिवारिक समूहों की सामाजिक संरचना, जिन्हें प्रायः **तुहेत (Tuhets)** कहा जाता है, के पूरक रूप में विकसित हुई और सरकार के साथ औपचारिक संवाद का माध्यम बन गई।
- The idea of the tribal council, however, emerged only in the **1990s** to facilitate and ease the community's entry into Government developmental activities, specifically in relation to a Central government scheme of the time for **poverty alleviation**.
  हालाँकि, जनजातीय परिषद की अवधारणा केवल **1990 के दशक** में उभरी, ताकि समुदाय को सरकारी विकासात्मक गतिविधियों, विशेष रूप से उस समय की केंद्र सरकार की **गरीबी उन्मूलन** योजना से जोड़ना और उसे सरल बनाना संभव हो सके।
- Today, the **Nicobar district** says that the Village leadership and the tribal councils have become "the link between the Local Administration and the tribal people of the island… most of the developmental schemes are being implemented through them only".
  आज **निकोबार जिला प्रशासन** का कहना है कि ग्राम नेतृत्व और जनजातीय परिषदें "स्थानीय प्रशासन और द्वीप के जनजातीय लोगों के बीच सेतु" बन गई हैं तथा अधिकांश विकास योजनाएँ इन्हीं के माध्यम से लागू की जा रही हैं।

How are leaders currently chosen in Nicobarese communities?
वर्तमान में निकोबारी समुदायों में नेताओं का चयन कैसे किया जाता है?

- Even though authorities in the **Nicobar district administration** have maintained that under the current system, village captains are usually elected every **four years**, Anthropologist and community leader **Anstice Justin** has told The Hindu that "there is actually not much documentation on how exactly the leadership of the existing tribal councils operate".
  यद्यपि **निकोबार जिला प्रशासन** का कहना है कि वर्तमान व्यवस्था में ग्राम कप्तानों का चुनाव सामान्यतः

प्रत्येक **चार वर्ष** में होता है, फिर भी मानवविज्ञानी और सामुदायिक नेता **एन्स्टिस जस्टिन** ने कहा है कि "वास्तव में इस बात का पर्याप्त दस्तावेजीकरण उपलब्ध नहीं है कि वर्तमान जनजातीय परिषदों का नेतृत्व किस प्रकार कार्य करता है।"

- A senior leader of the **Tribal Council in Great Nicobar Island** explained that elections for Captains and Tribal Council chairperson are held whenever the community feels the need for it.
  ग्रेट निकोबार द्वीप की जनजातीय परिषद के एक वरिष्ठ नेता ने बताया कि कप्तानों और जनजातीय परिषद अध्यक्ष के चुनाव तब आयोजित किए जाते हैं जब समुदाय इसकी आवश्यकता महसूस करता है।
- This leader, who is also the **First Captain** of his village on Great Nicobar Island, elaborated, "For example, the last time I was elected Captain was maybe around **2-3 years ago**.
  यह नेता, जो ग्रेट निकोबार द्वीप स्थित अपने गाँव के **प्रथम कप्तान** भी हैं, ने विस्तार से बताया, "उदाहरण के लिए, पिछली बार मेरा कप्तान के रूप में चुनाव लगभग **2-3 वर्ष पहले** हुआ था।
- There is a tradition in our community to get together for a **village meeting**.
  हमारे समुदाय में **ग्राम सभा** के लिए एकत्रित होने की परंपरा है।
- All residents of the village are present at this meeting."
  इस बैठक में गाँव के सभी निवासी उपस्थित रहते हैं।"
- The villagers then nominate names for the **Captains** of the village through **popular consensus**.
  इसके बाद ग्रामीण **सर्वसम्मति** के माध्यम से गाँव के **कप्तानों** के लिए नाम प्रस्तावित करते हैं।
- These names are then put on a **ballot paper**.
  इसके बाद इन नामों को **मतपत्र** पर दर्ज किया जाता है।
- "We make the ballot papers and print them out ourselves, we appoint a **polling officer** from among us to conduct the ballot, and the person with the most votes becomes **First Captain**."
  "हम स्वयं मतपत्र तैयार करते हैं और उन्हें मुद्रित करते हैं, मतदान कराने के लिए अपने बीच से एक **मतदान अधिकारी** नियुक्त करते हैं, और जिसे सबसे अधिक मत प्राप्त होते हैं वह **प्रथम कप्तान** बन जाता है।"
- He added that similarly, the **Tribal Council on Great Nicobar Island (GNI)** has been choosing the **Chairperson** by popular consensus, but that it had been decades since there was an election to this position.
  उन्होंने यह भी बताया कि इसी प्रकार **ग्रेट निकोबार द्वीप (GNI) की जनजातीय परिषद** भी **अध्यक्ष** का चयन सर्वसम्मति से करती रही है, किन्तु इस पद के लिए चुनाव हुए कई दशक बीत चुके हैं।
- Villagers mostly think about candidates' level of **education**, fluency in **Hindi** (the language of government officials), ''foreign'' trips (an indicator of exposure to the world outside the islands), and ''smartness'' (the ability to deal appropriately with officials and outsiders, according to **R. Venkat Ramanujam, Simron Jit Singh & Arild Vatn (2012)**).
  ग्रामीण प्रायः उम्मीदवारों की **शिक्षा**, **हिंदी** में दक्षता (जो सरकारी अधिकारियों की भाषा है), ''विदेश'' यात्राओं (द्वीपों के बाहर की दुनिया से परिचय का संकेत) तथा ''स्मार्टनेस'' (अर्थात अधिकारियों और बाहरी लोगों से उचित ढंग से व्यवहार करने की क्षमता, जैसा कि **आर. वेंकट रामानुजम, सिमरन जीत सिंह और एरिल्ड वात्न (2012)** ने उल्लेख किया है) को ध्यान में रखते हैं।
- What Ramanujam et al. noted, however, was that even though the Captains and Council were elected, "decisions were taken after popular consultation, usually through community meetings, and the tribal council did not have unilateral decision-making powers."
  हालाँकि, रामानुजम और उनके सहयोगियों ने यह उल्लेख किया कि यद्यपि कप्तान और परिषद निर्वाचित होते थे, फिर भी "निर्णय जन-सलाह के बाद, सामान्यतः सामुदायिक बैठकों के माध्यम से लिए जाते थे, और जनजातीय परिषद के पास एकतरफा निर्णय लेने की शक्ति नहीं थी।"
- Consequently, the captains were neither seen as lawmakers nor as ''leaders'' balancing social and political concerns.
  फलस्वरूप, कप्तानों को न तो कानून निर्माता माना जाता था और न ही ऐसे "नेता" के रूप में देखा जाता था जो सामाजिक और राजनीतिक चिंताओं के बीच संतुलन स्थापित करते हों।

Why are the proposed changes causing concern?
प्रस्तावित परिवर्तन चिंता का कारण क्यों बन रहे हैं?

- **Tribal Council** leaders who have spoken to The Hindu about the implications of the new **Draft Rules** said that the proposed structure is largely being seen as something that would disrupt their traditional ways of perceiving governance.
  जनजातीय परिषद के जिन नेताओं ने नए **मसौदा नियमों** के प्रभावों पर अपने विचार व्यक्त किए, उनका कहना है कि प्रस्तावित संरचना को ऐसी व्यवस्था के रूप में देखा जा रहा है जो शासन को समझने और संचालित करने के उनके पारंपरिक तरीकों को बाधित कर सकती है।
- The tribal council leader from **Great Nicobar** said, "We have been using this way of governing our villages for generations."
  ग्रेट निकोबार के एक जनजातीय परिषद नेता ने कहा, "हम पीढ़ियों से अपने गाँवों का संचालन इसी तरीके से करते आ रहे हैं।"
- "We hold elections through consensus when needed, and our traditional ways of living are so well integrated into how we oversee the islands and villages."
  "जब आवश्यकता होती है, तब हम सर्वसम्मति के माध्यम से चुनाव कराते हैं, और हमारे पारंपरिक जीवन-तरीके द्वीपों और गाँवों के प्रशासन के साथ गहराई से जुड़े हुए हैं।"
- "This looks like it will turn all of this into an **office job** that we will have to do in addition to the lives we live on the islands."
  "ऐसा प्रतीत होता है कि यह पूरी व्यवस्था एक **कार्यालयी कार्य** में बदल जाएगी, जिसे हमें अपने द्वीपीय जीवन के अतिरिक्त निभाना पड़ेगा।"
- Meanwhile, **Mr. Justin** has noted that there is a real chance that an attempt to notify the Rules has come now in light of the opposition the government is facing from the Tribal Council on **GNI**.
  इस बीच, **श्री जस्टिन** ने कहा है कि यह वास्तविक संभावना है कि नियमों को अधिसूचित करने का प्रयास ऐसे समय में किया जा रहा है जब सरकार को **GNI** की जनजातीय परिषद से विरोध का सामना करना पड़ रहा है।
- Even though he acknowledged that systemic problems of **opacity** have riddled the existing system of Tribal Councils and Village Captaincy.
  हालाँकि उन्होंने यह भी स्वीकार किया कि **पारदर्शिता की कमी** जैसी संरचनात्मक समस्याएँ वर्तमान जनजातीय परिषद और ग्राम कप्तानी व्यवस्था में मौजूद हैं।
- "For instance, in several Island Tribal Councils, it remains unclear when the Chairperson was last elected and what kind of authority they wield," he said.
  उन्होंने कहा, "उदाहरण के लिए, कई द्वीपीय जनजातीय परिषदों में यह स्पष्ट नहीं है कि अध्यक्ष का अंतिम चुनाव कब हुआ था और उनके पास वास्तव में कितने अधिकार हैं।"
- But experts like **Mr. Justin**, who have worked with the government on engaging with the indigenous communities of the **Andaman and Nicobar Islands (A&NI)**, have doubted whether the entire Nicobarese community in the islands will have the time and resources to understand the Draft Rules as they have been notified.
  किन्तु **श्री जस्टिन** जैसे विशेषज्ञ, जिन्होंने **अंडमान और निकोबार द्वीप समूह (A&NI)** की स्वदेशी समुदायों के साथ सरकारी स्तर पर कार्य किया है, इस बात को लेकर संदेह व्यक्त करते हैं कि क्या पूरा निकोबारी समुदाय अधिसूचित मसौदा नियमों को समझने के लिए पर्याप्त समय और संसाधन जुटा पाएगा।
- The context of the **Regulation** under which they will be implemented, and the implications of introducing such a system for their village-level governance.
  साथ ही वे उस **विनियमन** की पृष्ठभूमि और इस प्रकार की व्यवस्था को ग्राम-स्तरीय शासन में लागू करने के प्रभावों को भी समझ पाएँगे या नहीं, यह भी प्रश्न बना हुआ है।
- The **Tribal Welfare Department** of the A&NI administration has said that it will wait till **June 15** for suggestions and objections, after which a final version may be notified.
  A&NI प्रशासन के **जनजातीय कल्याण विभाग** ने कहा है कि वह **15 जून** तक सुझावों और आपत्तियों की प्रतीक्षा करेगा, जिसके बाद अंतिम संस्करण अधिसूचित किया जा सकता है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- While the Tribal Councils of Nicobar are yet to hand in a formal objection or suggestions, the **Congress party** in A&NI has already objected to them and called for their withdrawal.
  यद्यपि निकोबार की जनजातीय परिषदों ने अभी तक कोई औपचारिक आपत्ति या सुझाव प्रस्तुत नहीं किए हैं, **कांग्रेस पार्टी** ने A&NI में इन नियमों का विरोध करते हुए इन्हें वापस लेने की मांग की है।
- Primarily citing the lack of recognition for the **Tuhet system** and the lack of consultation with the community before bringing this draft.
  इसके मुख्य कारणों के रूप में **तुहेत प्रणाली** को मान्यता न दिया जाना तथा इस मसौदे को प्रस्तुत करने से पूर्व समुदाय से पर्याप्त परामर्श न किया जाना बताया गया है।

GS Paper II: Governance	12 June 2026

FCRA Bill — expanding state control over civil society

GS II: Governance

The Foreign Contribution (Regulation) Amendment (FCRA) Bill, 2026, introduced in the Lok Sabha on March 25, 2026, is far more than a routine regulatory measure. While presented as a step towards greater transparency and national security, it significantly increases executive power, transforming the FCRA from a law regulating foreign funding into one that enables extensive state control over non-governmental organisations (NGOs), charitable trusts, and educational and religious institutions.

From oversight to overreach

The current FCRA regime was already among the most stringent regulations governing civil society in any democracy. The 2020 amendments imposed strict restrictions: requiring all foreign contributions to pass through a single bank branch (State Bank of India) in New Delhi, reducing administrative expenditure limits from 50% to 20%, banning sub-granting to smaller organisations, and expanding suspension powers. These measures alone devastated thousands of NGOs, particularly smaller faith-based and charitable bodies serving marginalised groups.

The 2026 Bill goes much further. By introducing a new Chapter IIIA (and removing the previous Section 15) and replacing existing asset-management provisions, it creates a framework for the government to seamlessly vest organisational assets and properties without compensation or management. Its most troubling provision is the proposed Section 14B, which introduces automatic "cessation" of FCRA registration. An organisation could lose its registration not only if renewal is denied but also if it fails to apply on time or if renewal remains pending. This effectively allows institutions to be paralysed through procedural delays rather than proven misconduct, weakening due process and increasing executive discretion.

The gravest concern is Section 16A under the new Chapter IIIA. It states that when an FCRA registration is cancelled, surrendered, or deemed to have ceased, all foreign contributions and assets derived from them automatically "provisionally vest" in a government-designated authority, without prior judicial review or independent adjudication. This means that a simple administrative decision can strip organisations of control over their funds and property. As cancellation under Section 14 can be based on broad and subjective grounds such as "public interest," organisations risk losing control of their assets even for minor, procedural, or disputed violations. Because cancellation under Section 14 triggers the application of Section 16A, organisations risk losing assets even for procedural, minor, or disputed breaches. The designated authority would then be empowered to manage, transfer, or dispose of these assets, with sale proceeds credited to the Consolidated Fund of India. The provision is particularly sweeping because it may cover assets funded both domestically and from abroad–potentially bringing schools, hospitals, orphanages, religious institutions, charitable organisations, and places of worship such as churches, mosques, and temples built over decades under government control. The powers granted to the Designated Authority are extraordinary. It can take control of assets, manage institutions, oversee finances, and alter operations in the vaguely defined "public interest," giving the executive wide discretion. If an organisation fails to secure restoration or re-registration within the prescribed period, the vesting becomes permanent. The Authority may then transfer or sell the assets, with the proceeds credited to the Consolidated Fund of India – effectively enabling executive confiscation through legal process.

P. Wilson

Member of Parliament (Rajya Sabha) and a Senior Advocate practising in the Supreme Court of India

The Foreign Contribution (Regulation) Amendment Bill, 2026, raises concerns that asset confiscation powers could disrupt welfare services relied upon by thousands in India

This endangers not only the survival of organisations but also the essential services and infrastructure upon which communities depend. FCRA assets include land, buildings, vehicles, equipment, and unspent funds, raising the real possibility that institutions could be effectively shut down. Foreign donors primarily support Indian charitable organisations to aid vulnerable communities, promote education, improve public health, and advance other public-interest goals. These contributions help organisations deliver tangible societal benefits.

Seizing such funds into the Consolidated Fund based on weak or disputed allegations defeats the very purpose of these donations. The new provisions thus expose Indian organisations to the constant risk of state expropriation, endangering both donated funds and the assets they support. This framework establishes sweeping procedures for "provisional vesting" and "permanent vesting" of assets in a government-appointed "Designated Authority".

The amendments also deepen executive control during suspension and investigation. The amended Section 13 bars organisations from managing their assets without prior approval during suspension, effectively paralysing their operations. The revised Section 43 centralises enforcement by requiring Union government approval before any state agency can investigate FCRA violations. Combined with broader definitions of "key functionaries" and increased personal liability for office-bearers, the Bill risks creating a climate of fear that discourages civil society participation.

Limited accountability

The 2026 Bill proposes abolishing Section 22, which currently deals with the disposal of assets of defunct or non-operational organisations. The law also lacks clear timelines for approving or rejecting FCRA licences, permissions, registrations, and renewals, leading to uncertainty and delays that can hinder projects dependent on foreign funding and disproportionately impact vulnerable communities. Often, reasons for cancellation are not publicly disclosed due to national security concerns, making it difficult for organisations to challenge such decisions. Cancellations or suspensions might occur due to procedural lapses, risking the shutdown of organisations serving communities.

The impact on minority communities, especially Christians, is particularly worrying. Christian organisations run thousands of schools, colleges, hospitals, orphanages, tribal welfare bodies, and charitable trusts–many supported by ongoing funding from churches, diaspora groups, and humanitarian agencies. There are many such institutions in Kerala, Tamil Nadu, Nagaland, Mizoram, and Meghalaya. It is a fact that minorities operate charitable organisations that mainly benefit the majority. Under Section 16A, these could face government takeover if their registration lapses, renewal is delayed, or cancellation procedures are initiated. Institutions such as long-established convent schools, colleges, mission hospitals, and orphanages face the risk of coming under government control simply due to procedural non-compliance. But the fact remains that the government is systematically targeting organisations one after another, and between 2014 and 2026, about 22,000 FCRA licences have been cancelled for no valid or credible reasons. It could be stated with concern that the government appears to be eyeing the properties of minorities, which in reality benefits the majority.

Cancellations of FCRA licences threaten ongoing efforts in child protection, immunisation, neonatal health, nutrition, early childhood education, parental involvement, youth skills development, and access to government schemes in affected regions. The sector contributes significantly to the economy–around 2% of GDP–with roughly four lakh to eight lakh individuals per organisation losing access to vital services due to revoked licences. According to the 2014 Ministry of Statistics and Programme Implementation report, civil society organisations generate 27 lakh jobs and 34 lakh full-time volunteers, surpassing public sector employment. A separate survey of 515 NGOs found that 47% are the main source of employment in more than half the localities where they operate. These amendments threaten not only the existence of organisations but also the infrastructure and community resources relied upon by millions.

Constitutional rights under threat

Critics view the Bill as a serious threat to civil society and minority institutions. Its vague "public interest" standard could be used against organisations working on minority rights, tribal welfare, environmental protection, human rights, or public advocacy. The result may be a chilling effect, discouraging donors, trustees, and volunteers from supporting such organisations.

The Bill also raises constitutional concerns under Articles 14, 19(1)(c), 25, 26, 29, 30, and 300A. By concentrating broad powers in the executive, it risks undermining freedom of association, the autonomy of religious and educational institutions, and property rights.

Any regulation of foreign contributions must be accompanied by due process, independent oversight, and safeguards against arbitrary state action. Without such protections, the Bill risks becoming one of the most oppressive laws affecting civil society in modern India.

12J6. FCRA Bill — expanding state control over civil society
एफसीआरए विधेयक — नागरिक समाज पर राज्य के नियंत्रण का विस्तार

- The **Foreign Contribution (Regulation) Amendment (FCRA) Bill, 2026**, introduced in the **Lok Sabha** on March 25, 2026, is far more than a routine regulatory measure.
  25 मार्च 2026 को **लोकसभा** में प्रस्तुत **विदेशी अंशदान (विनियमन) संशोधन (FCRA) विधेयक, 2026** केवल एक सामान्य नियामक उपाय से कहीं अधिक महत्वपूर्ण है।
- While presented as a step towards greater **transparency** and **national security**, it significantly increases **executive power**, transforming the FCRA from a law regulating foreign funding into one that enables extensive state control over **non-governmental organisations (NGOs)**, charitable trusts, and educational and religious institutions.
  यद्यपि इसे अधिक **पारदर्शिता** और **राष्ट्रीय सुरक्षा** की दिशा में एक कदम के रूप में प्रस्तुत किया गया है, यह **कार्यपालिका की शक्तियों** में उल्लेखनीय वृद्धि करता है और FCRA को विदेशी वित्तपोषण को नियंत्रित करने वाले कानून से बदलकर ऐसा कानून बना देता है जो **गैर-सरकारी संगठनों (NGOs)**, धर्मार्थ न्यासों तथा शैक्षणिक एवं धार्मिक संस्थानों पर व्यापक सरकारी नियंत्रण की अनुमति देता है।

From oversight to overreach
निगरानी से अतिक्रमण तक

- The current **FCRA regime** was already among the most stringent regulations governing civil society in any democracy.
  वर्तमान **FCRA व्यवस्था** पहले से ही किसी भी लोकतांत्रिक व्यवस्था में नागरिक समाज को नियंत्रित करने वाले सबसे कठोर नियमों में से एक थी।
- The 2020 amendments imposed strict restrictions: requiring all foreign contributions to pass through a single bank branch (**State Bank of India**) in New Delhi, reducing administrative expenditure limits from 50% to 20%, banning sub-granting to smaller organisations, and expanding suspension powers.
  2020 के संशोधनों ने कठोर प्रतिबंध लगाए, जिनमें सभी विदेशी अंशदानों को नई दिल्ली स्थित **स्टेट बैंक ऑफ इंडिया** की एकमात्र शाखा से होकर गुजरने की अनिवार्यता, प्रशासनिक व्यय सीमा को 50% से घटाकर 20% करना, छोटे संगठनों को अनुदान हस्तांतरण पर रोक लगाना तथा निलंबन संबंधी शक्तियों का विस्तार शामिल था।
- These measures alone devastated thousands of NGOs, particularly smaller faith-based and charitable bodies serving marginalised groups.
  इन उपायों ने ही हजारों NGOs, विशेष रूप से वंचित समुदायों की सेवा करने वाले छोटे धार्मिक एवं धर्मार्थ संगठनों को गंभीर रूप से प्रभावित किया।
- The 2026 Bill goes much further.
  2026 का विधेयक इससे भी कहीं आगे जाता है।
- By introducing a new **Chapter IIIA** (and removing the previous **Section 15**) and replacing existing asset-management provisions, it creates a framework for the government to seamlessly vest organisational assets and properties without compensation or management.
  नए **अध्याय IIIA** को शामिल करके (और पूर्व **धारा 15** को हटाकर) तथा वर्तमान संपत्ति-प्रबंधन प्रावधानों को प्रतिस्थापित करके, यह सरकार को बिना किसी प्रतिपूर्ति या स्वतंत्र प्रबंधन व्यवस्था के संगठनात्मक परिसंपत्तियों और संपत्तियों को अपने नियंत्रण में लेने का ढाँचा प्रदान करता है।
- Its most troubling provision is the proposed **Section 14B**, which introduces automatic "cessation" of FCRA registration.
  इसका सबसे चिंताजनक प्रावधान प्रस्तावित **धारा 14B** है, जो FCRA पंजीकरण की स्वचालित "समाप्ति" की व्यवस्था प्रस्तुत करता है।
- An organisation could lose its registration not only if renewal is denied but also if it fails to apply on time or if renewal remains pending.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

कोई संगठन अपना पंजीकरण केवल नवीनीकरण अस्वीकार होने पर ही नहीं, बल्कि समय पर आवेदन न करने या नवीनीकरण लंबित रहने की स्थिति में भी खो सकता है।

- This effectively allows institutions to be paralysed through procedural delays rather than proven misconduct, weakening **due process** and increasing executive discretion.
  इससे संस्थाओं को सिद्ध दुराचार के बजाय प्रक्रियागत विलंब के माध्यम से निष्क्रिय बनाया जा सकता है, जिससे **विधिक प्रक्रिया के सिद्धांत** कमजोर होते हैं और कार्यपालिका का विवेकाधिकार बढ़ता है।
- The gravest concern is **Section 16A** under the new Chapter IIIA.
  सबसे गंभीर चिंता नए अध्याय IIIA के अंतर्गत प्रस्तावित **धारा 16A** को लेकर है।
- It states that when an FCRA registration is cancelled, surrendered, or deemed to have ceased, all foreign contributions and assets derived from them automatically "provisionally vest" in a **government-designated authority**, without prior judicial review or independent adjudication.
  इसके अनुसार, जब किसी FCRA पंजीकरण को रद्द, समर्पित या समाप्त माना जाता है, तो उससे प्राप्त सभी विदेशी अंशदान और उनसे निर्मित परिसंपत्तियाँ स्वतः ही एक **सरकार द्वारा नामित प्राधिकरण** में "अस्थायी रूप से निहित" हो जाती हैं, बिना किसी पूर्व न्यायिक समीक्षा या स्वतंत्र निर्णय प्रक्रिया के।
- This means that a simple administrative decision can strip organisations of control over their funds and property.
  इसका अर्थ है कि केवल एक प्रशासनिक निर्णय के आधार पर संगठनों को उनकी निधियों और संपत्तियों पर नियंत्रण से वंचित किया जा सकता है।
- As cancellation under **Section 14** can be based on broad and subjective grounds such as "public interest," organisations risk losing control of their assets even for minor, procedural, or disputed violations.
  चूँकि **धारा 14** के अंतर्गत पंजीकरण रद्द करना "लोकहित" जैसे व्यापक और व्यक्तिपरक आधारों पर संभव है, इसलिए संगठनों को मामूली, प्रक्रियात्मक या विवादित उल्लंघनों के कारण भी अपनी परिसंपत्तियों पर नियंत्रण खोने का जोखिम रहता है।
- Because cancellation under Section 14 triggers the application of Section 16A, organisations risk losing assets even for procedural, minor, or disputed breaches.
  क्योंकि धारा 14 के अंतर्गत रद्दीकरण धारा 16A को सक्रिय कर देता है, इसलिए संगठनों को प्रक्रियागत, छोटे या विवादित उल्लंघनों के लिए भी अपनी संपत्तियाँ खोने का खतरा रहता है।
- The designated authority would then be empowered to manage, transfer, or dispose of these assets, with sale proceeds credited to the **Consolidated Fund of India**.
  इसके बाद नामित प्राधिकरण को इन परिसंपत्तियों का प्रबंधन, हस्तांतरण या निपटान करने का अधिकार होगा और उनकी बिक्री से प्राप्त राशि **भारत की समेकित निधि** में जमा की जाएगी।
- The provision is particularly sweeping because it may cover assets funded both domestically and from abroad—potentially bringing schools, hospitals, orphanages, religious institutions, charitable organisations, and places of worship such as churches, mosques, and temples built over decades under government control.
  यह प्रावधान विशेष रूप से व्यापक है क्योंकि यह घरेलू और विदेशी दोनों स्रोतों से वित्तपोषित परिसंपत्तियों को अपने दायरे में ला सकता है, जिससे दशकों में निर्मित विद्यालय, अस्पताल, अनाथालय, धार्मिक संस्थान, धर्मार्थ संगठन तथा चर्च, मस्जिद और मंदिर जैसे पूजा स्थल भी सरकारी नियंत्रण में आ सकते हैं।
- The powers granted to the **Designated Authority** are extraordinary.
  नामित प्राधिकरण को प्रदान की गई शक्तियाँ असाधारण हैं।
- It can take control of assets, manage institutions, oversee finances, and alter operations in the vaguely defined "public interest," giving the executive wide discretion.
  यह परिसंपत्तियों का नियंत्रण अपने हाथ में ले सकता है, संस्थानों का प्रबंधन कर सकता है, वित्तीय गतिविधियों की निगरानी कर सकता है तथा अस्पष्ट रूप से परिभाषित "लोकहित" के नाम पर संचालन में परिवर्तन कर सकता है, जिससे कार्यपालिका को व्यापक विवेकाधिकार प्राप्त हो जाता है।

- If an organisation fails to secure restoration or re-registration within the prescribed period, the vesting becomes permanent.
  यदि कोई संगठन निर्धारित अवधि के भीतर पुनर्बहाली या पुनः पंजीकरण प्राप्त करने में विफल रहता है, तो यह निहितीकरण स्थायी हो जाता है।
- The Authority may then transfer or sell the assets, with the proceeds credited to the **Consolidated Fund of India** — effectively enabling executive confiscation through legal process.
  इसके बाद प्राधिकरण परिसंपत्तियों का हस्तांतरण या विक्रय कर सकता है और उससे प्राप्त धनराशि **भारत की समेकित निधि** में जमा की जा सकती है, जिससे विधिक प्रक्रिया के माध्यम से कार्यपालिका द्वारा प्रभावी रूप से संपत्ति अधिग्रहण संभव हो जाता है।
- This endangers not only the survival of **organisations** but also the essential services and infrastructure upon which communities depend.
  यह केवल **संगठनों** के अस्तित्व को ही नहीं, बल्कि उन आवश्यक सेवाओं और अवसंरचनाओं को भी खतरे में डालता है जिन पर समुदाय निर्भर रहते हैं।
- **FCRA assets** include land, buildings, vehicles, equipment, and unspent funds, raising the real possibility that institutions could be effectively shut down.
  FCRA परिसंपत्तियों में भूमि, भवन, वाहन, उपकरण और अप्रयुक्त निधियाँ शामिल हैं, जिससे संस्थानों के प्रभावी रूप से बंद हो जाने की वास्तविक संभावना उत्पन्न होती है।
- Foreign donors primarily support Indian charitable organisations to aid **vulnerable communities**, promote education, improve public health, and advance other public-interest goals.
  विदेशी दानदाता मुख्यतः भारतीय धर्मार्थ संगठनों को **वंचित समुदायों** की सहायता करने, शिक्षा को बढ़ावा देने, सार्वजनिक स्वास्थ्य में सुधार लाने तथा अन्य लोकहितकारी उद्देश्यों को आगे बढ़ाने के लिए सहयोग प्रदान करते हैं।
- These contributions help organisations deliver tangible societal benefits.
  ये योगदान संगठनों को समाज के लिए ठोस और प्रत्यक्ष लाभ प्रदान करने में सहायता करते हैं।
- Seizing such funds into the **Consolidated Fund of India** based on weak or disputed allegations defeats the very purpose of these donations.
  कमजोर या विवादित आरोपों के आधार पर ऐसी निधियों को **भारत की समेकित निधि** में स्थानांतरित करना इन दानों के मूल उद्देश्य को ही विफल कर देता है।
- The new provisions thus expose Indian organisations to the constant risk of **state expropriation**, endangering both donated funds and the assets they support.
  इस प्रकार, नए प्रावधान भारतीय संगठनों को निरंतर **राज्य द्वारा अधिग्रहण** के जोखिम के समक्ष खड़ा करते हैं, जिससे दान की गई निधियाँ और उनसे निर्मित परिसंपत्तियाँ दोनों खतरे में पड़ जाती हैं।
- This framework establishes sweeping procedures for "**provisional vesting**" and "**permanent vesting**" of assets in a government-appointed **Designated Authority**.
  यह ढाँचा सरकारी नियुक्त **नामित प्राधिकरण** में परिसंपत्तियों के "**अस्थायी निहितीकरण**" तथा "**स्थायी निहितीकरण**" के लिए व्यापक प्रक्रियाएँ स्थापित करता है।
- The amendments also deepen **executive control** during suspension and investigation.
  ये संशोधन निलंबन और जाँच की अवधि में **कार्यपालिका के नियंत्रण** को और अधिक सुदृढ़ करते हैं।
- The amended **Section 13** bars organisations from managing their assets without prior approval during suspension, effectively paralysing their operations.
  संशोधित **धारा 13** निलंबन की अवधि के दौरान संगठनों को पूर्व अनुमति के बिना अपनी परिसंपत्तियों का प्रबंधन करने से रोकती है, जिससे उनकी गतिविधियाँ प्रभावी रूप से ठप हो सकती हैं।
- The revised **Section 43** centralises enforcement by requiring Union government approval before any state agency can investigate FCRA violations.
  संशोधित **धारा 43** किसी भी राज्य एजेंसी द्वारा FCRA उल्लंघनों की जाँच प्रारम्भ करने से पहले केंद्र सरकार की अनुमति अनिवार्य बनाकर प्रवर्तन प्रक्रिया का केंद्रीकरण करती है।

- Combined with broader definitions of "**key functionaries**" and increased personal liability for office-bearers, the Bill risks creating a climate of fear that discourages civil society participation.
  "**प्रमुख पदाधिकारियों**" की व्यापक परिभाषा और पदाधिकारियों की बढ़ी हुई व्यक्तिगत जवाबदेही के साथ मिलकर यह विधेयक भय का ऐसा वातावरण उत्पन्न कर सकता है जो नागरिक समाज की भागीदारी को हतोत्साहित करे।

Limited accountability
सीमित जवाबदेही

- The 2026 Bill proposes abolishing **Section 22**, which currently deals with the disposal of assets of defunct or non-operational organisations.
  2026 का विधेयक **धारा 22** को समाप्त करने का प्रस्ताव करता है, जो वर्तमान में निष्क्रिय या गैर-कार्यरत संगठनों की परिसंपत्तियों के निपटान से संबंधित है।
- The law also lacks clear timelines for approving or rejecting FCRA licences, permissions, registrations, and renewals, leading to uncertainty and delays that can hinder projects dependent on foreign funding and disproportionately impact vulnerable communities.
  कानून में FCRA लाइसेंस, अनुमतियों, पंजीकरणों और नवीनीकरणों को स्वीकृत या अस्वीकृत करने के लिए स्पष्ट समय-सीमा का अभाव है, जिससे अनिश्चितता और विलंब उत्पन्न होता है तथा विदेशी वित्तपोषण पर निर्भर परियोजनाएँ बाधित हो सकती हैं और इसका असमान रूप से अधिक प्रभाव वंचित समुदायों पर पड़ सकता है।
- Often, reasons for cancellation are not publicly disclosed due to **national security** concerns, making it difficult for organisations to challenge such decisions.
  अक्सर **राष्ट्रीय सुरक्षा** संबंधी चिंताओं के कारण रद्दीकरण के कारणों को सार्वजनिक नहीं किया जाता, जिससे संगठनों के लिए ऐसे निर्णयों को चुनौती देना कठिन हो जाता है।
- Cancellations or suspensions might occur due to procedural lapses, risking the shutdown of organisations serving communities.
  प्रक्रियागत त्रुटियों के कारण भी पंजीकरण रद्द या निलंबित किया जा सकता है, जिससे समुदायों की सेवा करने वाले संगठनों के बंद होने का खतरा उत्पन्न होता है।
- The impact on **minority communities**, especially Christians, is particularly worrying.
  अल्पसंख्यक समुदायों, विशेषकर ईसाइयों, पर इसका प्रभाव विशेष रूप से चिंताजनक है।
- Christian organisations run thousands of schools, colleges, hospitals, orphanages, tribal welfare bodies, and charitable trusts—many supported by ongoing funding from churches, diaspora groups, and humanitarian agencies.
  ईसाई संगठन हजारों विद्यालय, महाविद्यालय, अस्पताल, अनाथालय, जनजातीय कल्याण संस्थाएँ और धर्मार्थ न्यास संचालित करते हैं, जिनमें से अनेक को चर्चों, प्रवासी समुदायों और मानवीय सहायता एजेंसियों से निरंतर वित्तीय सहायता प्राप्त होती है।
- There are many such institutions in **Kerala**, **Tamil Nadu**, **Nagaland**, **Mizoram**, and **Meghalaya**.
  ऐसे अनेक संस्थान **केरल**, **तमिलनाडु**, **नागालैंड**, **मिजोरम** और **मेघालय** में स्थित हैं।
- It is a fact that minorities operate charitable organisations that mainly benefit the majority.
  यह तथ्य है कि अल्पसंख्यकों द्वारा संचालित धर्मार्थ संगठन मुख्यतः बहुसंख्यक समाज को लाभ पहुँचाते हैं।
- Under **Section 16A**, these could face government takeover if their registration lapses, renewal is delayed, or cancellation procedures are initiated.
  धारा 16A के अंतर्गत, यदि उनका पंजीकरण समाप्त हो जाए, नवीनीकरण में विलंब हो या रद्दीकरण की प्रक्रिया प्रारम्भ हो जाए, तो उन्हें सरकारी अधिग्रहण का सामना करना पड़ सकता है।
- Institutions such as long-established convent schools, colleges, mission hospitals, and orphanages face the risk of coming under government control simply due to procedural non-compliance.

दीर्घकाल से स्थापित कॉन्वेंट विद्यालय, महाविद्यालय, मिशन अस्पताल और अनाथालय केवल प्रक्रियागत अनुपालन में कमी के कारण सरकारी नियंत्रण में आने के जोखिम का सामना कर सकते हैं।

- But the fact remains that the government is systematically targeting organisations one after another, and between 2014 and 2026, about **22,000 FCRA licences** have been cancelled for no valid or credible reasons.
  किन्तु यह तथ्य बना हुआ है कि सरकार क्रमशः संगठनों को निशाना बना रही है, और 2014 से 2026 के बीच लगभग **22,000 FCRA लाइसेंस** बिना किसी वैध या विश्वसनीय कारण के रद्द किए गए हैं।
- It could be stated with concern that the government appears to be eyeing the properties of minorities, which in reality benefits the majority.
  चिंता के साथ यह कहा जा सकता है कि सरकार की दृष्टि अल्पसंख्यकों की संपत्तियों पर प्रतीत होती है, जबकि वास्तव में उनका लाभ मुख्यतः बहुसंख्यक समाज को प्राप्त होता है।
- Cancellations of **FCRA licences** threaten ongoing efforts in **child protection**, immunisation, neonatal health, nutrition, early childhood education, parental involvement, youth skills development, and access to government schemes in affected regions.
  FCRA लाइसेंसों की निरस्तीकरण प्रक्रिया **बाल संरक्षण**, टीकाकरण, नवजात स्वास्थ्य, पोषण, प्रारंभिक बाल्यकाल शिक्षा, अभिभावकीय सहभागिता, युवा कौशल विकास तथा प्रभावित क्षेत्रों में सरकारी योजनाओं तक पहुँच के लिए चल रहे प्रयासों को खतरे में डालती है।
- The sector contributes significantly to the economy—around **2% of GDP**—with roughly four lakh to eight lakh individuals per organisation losing access to vital services due to revoked licences.
  यह क्षेत्र अर्थव्यवस्था में महत्वपूर्ण योगदान देता है—लगभग **GDP का 2%**—और लाइसेंस निरस्त होने के कारण प्रति संगठन लगभग चार लाख से आठ लाख व्यक्तियों की आवश्यक सेवाओं तक पहुँच प्रभावित होती है।
- According to the **2014 Ministry of Statistics and Programme Implementation report**, civil society organisations generate **27 lakh jobs** and 34 lakh full-time volunteers, surpassing public sector employment.
  सांख्यिकी एवं कार्यक्रम कार्यान्वयन मंत्रालय की 2014 की रिपोर्ट के अनुसार, नागरिक समाज संगठन **27 लाख रोजगार** और 34 लाख पूर्णकालिक स्वयंसेवकों का सृजन करते हैं, जो सार्वजनिक क्षेत्र के रोजगार से अधिक है।
- A separate survey of 515 NGOs found that 47% are the main source of employment in more than half the localities where they operate.
  515 गैर-सरकारी संगठनों पर किए गए एक अलग सर्वेक्षण में पाया गया कि उनमें से 47% उन क्षेत्रों में रोजगार का प्रमुख स्रोत हैं जहाँ वे कार्यरत हैं।
- These amendments threaten not only the existence of organisations but also the infrastructure and community resources relied upon by millions.
  ये संशोधन केवल संगठनों के अस्तित्व को ही नहीं बल्कि उन अवसंरचनाओं और सामुदायिक संसाधनों को भी खतरे में डालते हैं जिन पर लाखों लोग निर्भर हैं।

Constitutional rights under threat
संवैधानिक अधिकारों पर संकट

- Critics view the Bill as a serious threat to **civil society** and **minority institutions**.
  आलोचक इस विधेयक को **नागरिक समाज** और **अल्पसंख्यक संस्थानों** के लिए गंभीर खतरा मानते हैं।
- Its vague "**public interest**" standard could be used against organisations working on minority rights, tribal welfare, environmental protection, human rights, or public advocacy.
  इसका अस्पष्ट "**लोकहित**" मानदंड अल्पसंख्यक अधिकारों, जनजातीय कल्याण, पर्यावरण संरक्षण, मानवाधिकारों अथवा जनहित वकालत से जुड़े संगठनों के विरुद्ध उपयोग किया जा सकता है।
- The result may be a **chilling effect**, discouraging donors, trustees, and volunteers from supporting such organisations.

इसके परिणामस्वरूप एक **भयकारी प्रभाव** उत्पन्न हो सकता है, जो दानदाताओं, न्यासियों और स्वयंसेवकों को ऐसे संगठनों का समर्थन करने से हतोत्साहित करेगा।

- The Bill also raises constitutional concerns under **Articles 14, 19(1)(c), 25, 26, 29, 30, and 300A**.
  यह विधेयक **अनुच्छेद 14, 19(1)(ग), 25, 26, 29, 30 और 300A** के अंतर्गत संवैधानिक चिंताएँ भी उत्पन्न करता है।
- By concentrating broad powers in the **executive**, it risks undermining **freedom of association**, the autonomy of religious and educational institutions, and **property rights**.
  कार्यपालिका में व्यापक शक्तियों को केंद्रित करके यह **संगठन बनाने की स्वतंत्रता**, धार्मिक एवं शैक्षणिक संस्थानों की स्वायत्तता तथा **संपत्ति के अधिकारों** को कमजोर करने का जोखिम उत्पन्न करता है।
- Any regulation of **foreign contributions** must be accompanied by **due process**, independent oversight, and safeguards against arbitrary state action.
  विदेशी अंशदानों के किसी भी विनियमन के साथ **विधिसम्मत प्रक्रिया**, स्वतंत्र निगरानी तथा राज्य की मनमानी कार्रवाई के विरुद्ध सुरक्षा उपाय होना आवश्यक है।
- Without such protections, the Bill risks becoming one of the most oppressive laws affecting **civil society** in modern India.
  ऐसे सुरक्षा उपायों के अभाव में यह विधेयक आधुनिक भारत में **नागरिक समाज** को प्रभावित करने वाले सबसे दमनकारी कानूनों में से एक बन सकता है।

Homemakers are 'nation builders', their work is worth at least ₹30,000 a month, says SC

GS III: Economy

Rizmi Lia M.
CHENNAI

Observing that homemakers deserve to be recognised as "nation builders", the Supreme Court on Thursday ruled that the unpaid domestic work performed by them must be monetised at a minimum of ₹30,000 per month while calculating compensation for deaths in road accidents.

The ruling came in an appeal arising from a motor accident claim in Punjab where a woman named Reshma died in a road accident in November 2001. Her husband and three children approached the Motor Accident Claims Tribunal seeking compensation. While the tribunal awarded compensation in 2003, they approached the High Court to enhance the amount. On appeal, the High Court enhanced the compensation to ₹8.43 lakh with 7.5% interest, providing for a higher rate of interest in case of delay in payment.

The court said motor accident compensation claims should be decided within a year.

A Division Bench of Justice Sanjay Karol and Justice N.K. Singh said the contribution of a homemaker extended beyond the household and played a vital role in nation-building. "We are of the view that the housewife contributes to the growth of the human being and the nation," said the Bench.

Shift to 'homemaker'

Justice Karol stated that "loss of domestic care" would be an additional ground to the heads of damages previously recognised by the court.

The top court also noted the need to shift from the stereotypical terminology of daily usage from "housewife" to "homemaker".

The court said motor accident compensation claims should ordinarily be decided within a year. "Such cases should be decided within a year usually,' the Bench said.

Recognising all aspects of being a homemaker and the unpaid labour that a homemaker undertakes, the court directed the Motor Accidents Claim Tribunal (MACT) to award a separate compensation of ₹30,000 per month under the head of "domestic care" in cases involving death of a homemaker.

It clarified that this amount would be treated as the minimum value of a homemaker's unpaid work and would increase by 10% every three years. If the homemaker also had a paid job, this amount would be awarded in addition to her income.

However, the court resorted to the application of homemaker to the traditional image of woman. The court said, "As a result on one circumstance or another, sometimes unfortunate sometimes not, a man may too need to don the role of a homemaker. It is not to take away from the efforts of these men who also deserve recognition and acknowledgment, but for the purposes of the present case and more particularly the quantification of domestic efforts, we limit its application to the quintessential and traditional image, that of a woman."

12J6. Homemakers are 'nation builders', their work is worth at least ₹30,000 a month, says SC

गृहिणियाँ 'राष्ट्र-निर्माता' हैं, उनके कार्य का मूल्य कम से कम ₹30,000 प्रतिमाह है, उच्चतम न्यायालय ने कहा

Supreme Court recognises homemakers as "nation builders"
सर्वोच्च न्यायालय ने गृहिणियों को "राष्ट्र निर्माता" के रूप में मान्यता दी

- Observing that **homemakers** deserve to be recognised as **"nation builders"**, the **Supreme Court** on Thursday ruled that the unpaid domestic work performed by them must be monetised at a minimum of **₹30,000 per month** while calculating compensation for deaths in road accidents.
  यह टिप्पणी करते हुए कि **गृह-प्रबंधकों (होममेकर्स)** को **"राष्ट्र निर्माता"** के रूप में मान्यता मिलनी चाहिए, **सर्वोच्च न्यायालय** ने गुरुवार को निर्णय दिया कि सड़क दुर्घटनाओं में मृत्यु के मामलों में मुआवज़े की गणना करते समय उनके द्वारा किए गए अवैतनिक घरेलू कार्य का न्यूनतम **₹30,000 प्रति माह** के आधार पर आर्थिक मूल्यांकन किया जाना चाहिए।
- The ruling came in an appeal arising from a **motor accident claim** in **Punjab** where a woman named **Reshma** died in a road accident in **November 2001**.
  यह निर्णय **पंजाब** में एक **मोटर दुर्घटना दावा** मामले से संबंधित अपील में दिया गया, जिसमें **रेशमा** नामक महिला की **नवंबर 2001** में सड़क दुर्घटना में मृत्यु हो गई थी।
- Her husband and three children approached the **Motor Accident Claims Tribunal** seeking compensation.
  उनके पति और तीन बच्चों ने मुआवज़े की मांग करते हुए **मोटर दुर्घटना दावा अधिकरण (MACT)** का दरवाज़ा खटखटाया।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- While the tribunal awarded compensation in **2003**, they approached the **High Court** to enhance the amount.
  यद्यपि अधिकरण ने **2003** में मुआवज़ा प्रदान किया था, फिर भी परिवार ने राशि बढ़ाने के लिए **उच्च न्यायालय** में अपील की।
- On appeal, the High Court enhanced the compensation to **₹8.43 lakh** with **7.5% interest**, providing for a higher rate of interest in case of delay in payment.
  अपील पर उच्च न्यायालय ने मुआवज़े की राशि बढ़ाकर **₹8.43 लाख** कर दी तथा **7.5% ब्याज** भी प्रदान किया, साथ ही भुगतान में विलंब होने पर अधिक ब्याज दर का प्रावधान किया।
- A Division Bench of **Justice Sanjay Karol** and **Justice N.K. Singh** said the contribution of a homemaker extended beyond the household and played a vital role in **nation-building**.
  न्यायमूर्ति संजय करोल और **न्यायमूर्ति एन.के. सिंह** की खंडपीठ ने कहा कि एक गृह-प्रबंधक का योगदान केवल घर तक सीमित नहीं होता, बल्कि वह **राष्ट्र निर्माण** में भी महत्वपूर्ण भूमिका निभाता है।
- "We are of the view that the housewife contributes to the growth of the human being and the nation," said the Bench.
  खंडपीठ ने कहा, "हमारा मत है कि गृहिणी मानव के विकास और राष्ट्र की प्रगति में योगदान देती है।"

Shift to 'homemaker'
'हाउसवाइफ' से 'होममेकर' की ओर परिवर्तन

- Justice Karol stated that **"loss of domestic care"** would be an additional ground to the heads of damages previously recognised by the court.
  न्यायमूर्ति करोल ने कहा कि **"घरेलू देखभाल की हानि"** को न्यायालय द्वारा पूर्व में मान्यता प्राप्त क्षतिपूर्ति के आधारों में एक अतिरिक्त आधार के रूप में शामिल किया जाएगा।
- The top court also noted the need to shift from the stereotypical terminology of daily usage from **"housewife"** to **"homemaker"**.
  सर्वोच्च न्यायालय ने दैनिक उपयोग की रूढ़िवादी शब्दावली **"हाउसवाइफ"** के स्थान पर **"होममेकर"** शब्द अपनाने की आवश्यकता पर भी बल दिया।
- The court said motor accident compensation claims should ordinarily be decided within **one year**.
  न्यायालय ने कहा कि मोटर दुर्घटना मुआवज़ा दावों का सामान्यतः **एक वर्ष** के भीतर निस्तारण किया जाना चाहिए।
- "Such cases should be decided within a year usually," the Bench said.
  खंडपीठ ने कहा, "ऐसे मामलों का सामान्यतः एक वर्ष के भीतर निर्णय किया जाना चाहिए।"
- Recognising all aspects of being a homemaker and the **unpaid labour** that a homemaker undertakes, the court directed the **Motor Accidents Claim Tribunal (MACT)** to award a separate compensation of **₹30,000 per month** under the head of **"domestic care"** in cases involving death of a homemaker.
  गृह-प्रबंधक की भूमिका के सभी पहलुओं और उसके द्वारा किए जाने वाले **अवैतनिक श्रम** को मान्यता देते हुए न्यायालय ने **मोटर दुर्घटना दावा अधिकरण (MACT)** को निर्देश दिया कि गृह-प्रबंधक की मृत्यु के मामलों में **"घरेलू देखभाल"** शीर्षक के अंतर्गत **₹30,000 प्रति माह** की पृथक क्षतिपूर्ति प्रदान की जाए।
- It clarified that this amount would be treated as the **minimum value** of a homemaker's unpaid work and would increase by **10% every three years**.
  न्यायालय ने स्पष्ट किया कि यह राशि गृह-प्रबंधक के अवैतनिक कार्य का **न्यूनतम मूल्य** मानी जाएगी और इसमें **हर तीन वर्ष में 10% की वृद्धि** की जाएगी।
- If the homemaker also had a **paid job**, this amount would be awarded in addition to her income.
  यदि गृह-प्रबंधक किसी **वेतनभोगी कार्य** में भी संलग्न थी, तो यह राशि उसकी आय के अतिरिक्त प्रदान की जाएगी।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- However, the court resorted to the application of homemaker to the traditional image of woman.
  हालाँकि, न्यायालय ने इस मामले में होममेकर की अवधारणा को महिला की पारंपरिक छवि से जोड़ा।
- The court said, “As a result of one circumstance or another, sometimes unfortunate sometimes not, a man may too need to don the role of a **homemaker**.”
  न्यायालय ने कहा, “विभिन्न परिस्थितियों के परिणामस्वरूप, चाहे वे दुर्भाग्यपूर्ण हों या नहीं, कोई पुरुष भी **होममेकर** की भूमिका निभा सकता है।”
- “It is not to take away from the efforts of these men who also deserve recognition and acknowledgment, but for the purposes of the present case and more particularly the quantification of domestic efforts, we limit its application to the quintessential and traditional image, that of a woman.”
  “यह उन पुरुषों के प्रयासों को कमतर आँकने के लिए नहीं है, जो मान्यता और सम्मान के पात्र हैं, किन्तु वर्तमान मामले तथा विशेष रूप से घरेलू कार्यों के मूल्यांकन के उद्देश्य से हम इसके प्रयोग को पारंपरिक और विशिष्ट रूप से महिला की छवि तक सीमित रखते हैं।”

Implementation complete, but workers still vulnerable

GS III: Economy

Kingshuk Sarkar
Professor of Economics and Public Policy at the Goa Institute of Management

Labour Code Rules leave workers' concerns unaddressed

With the notification of the rules for the four labour codes in May, the implementation framework for these codes is now complete. Trade unions and academics have raised serious objections to several provisions in the new labour codes, arguing that they are regressive and detrimental to the interests of workers. It has also taken nearly six years to operationalise the codes enacted during 2019-20. The codes are The Code on Wages, 2019, The Industrial Relations Code, 2020, The Code on Social Security, 2020 and The Occupational Safety, Health and Working Conditions Code, 2020.

Critical gaps

Rules essentially lay down the standard operating procedures (SoPs) for implementing an Act or Code. While they cannot contradict the provisions of the parent legislation, they become crucial where the law is broad or open-ended. Given the sustained opposition to several provisions in the four labour codes, it was expected that the rules would help moderate some of the contentious aspects. However, those expectations appear to have been belied.

The Industrial Relations Code, 2020 formally introduced the concept of Fixed-Term Employment (FTE) into India's labour law framework, although such employment arrangements have been widely used for decades. However, the Code does not specify a minimum tenure or limit the number of contract renewals.

The rules could have addressed these gaps to mitigate potential adverse effects on workers. A minimum tenure (one year) could have prevented very short tenures which are detrimental to employees. Also, there could have been some restrictions in the number of times renewals can be allowed. Otherwise, there is a possibility that even regular positions become FTEs with unlimited renewals. Unfortunately, the rules remain silent on these important issues.

The Code on Wages (Central) Rules provide only a vague definition of the "floor wage" and do not clearly distinguish it from the minimum wage. While the Rules require consultation with State governments, they do not specify a detailed framework for such consultations, raising concerns that the process may remain largely symbolic. The Rules also fail to lay down clear principles for fixing minimum wages. As a result, the convention of treating a four-member family as comprising three consumption units is likely to continue. This effectively perpetuates gender bias, as an adult female is assigned a weight of 0.8 compared with 1.0 for an adult male.

The Rules further provide that the hourly wage shall be calculated by dividing the daily wage by eight. Conceptually, this is a flawed approach. An hourly wage should not merely be a pro-rata derivation of the daily wage, as workers may not be able to find work for the remaining hours of the day. Internationally, minimum hourly wages are often determined independently of daily wage rates. This issue is particularly important in India, given the large number of domestic workers and the likely expansion of gig and platform-based work in future.

Gig workers remain vulnerable

The Social Security Code (Central) Rules make no attempt to clarify the employment relationship in the gig economy. Gig and platform workers continue to be treated as self-employed and remain part of the unorganised workforce. The Rules are also silent on the mandatory gratuity insurance envisaged under the Code. Such insurance could protect workers against non-payment of gratuity by employers. However, the Rules fail to specify the modalities for implementing this safeguard, leaving an important worker protection mechanism undefined. The Industrial Relations Code (Central) Rules provide that a sole registered trade union must have at least 30% membership to be recognised. This means that registration alone does not guarantee recognition. In large establishments, smaller or newly formed unions may find it difficult to meet this threshold, further weakening their ability to represent workers at a time when the bargaining power of trade unions has already been declining for decades. Notably, the 30% threshold does not appear in the Code itself. The Rules also fail to provide further clarity on the engagement and renewal of fixed-term employees, leaving significant scope for ambiguity and potential misuse.

Missing safeguards for workers

The Occupational Safety, Health and Working Conditions Code (Central) Rules set out safety and welfare provisions for the various occupations covered under the Code. However, certain occupation-specific welfare measures, such as housing and medical facilities for plantation workers, are absent. The Rules also do not specify the activities for which contract labour may be engaged, nor do they clearly distinguish between core and non-core activities.

This omission is significant, given the growing informalisation of the labour market through the use of contract labour in core operations. The lack of clarity on what constitutes a core activity leaves considerable scope for ambiguity and misuse.

Broadly speaking, certain open-ended provisions contested by the trade unions and academics, could have been moderated to a certain extent while framing the Rules. But, as it is evident now, that did not happen. It is yet another missed opportunity and a further cause for concern for the country's working class.

12J6. Implementation complete, but workers still vulnerable
कार्यान्वयन पूर्ण, किन्तु श्रमिक अब भी असुरक्षित \

- With the notification of the rules for the **four labour codes** in May, the implementation framework for these codes is now complete.
  मई में **चार श्रम संहिताओं** के नियमों की अधिसूचना जारी होने के साथ ही इन संहिताओं के क्रियान्वयन का ढाँचा अब पूर्ण हो गया है।
- **Trade unions** and academics have raised serious objections to several provisions in the new labour codes, arguing that they are regressive and detrimental to the interests of workers.
  श्रमिक संगठनों और शिक्षाविदों ने नई श्रम संहिताओं के अनेक प्रावधानों पर गंभीर आपत्तियाँ व्यक्त की हैं और तर्क दिया है कि ये प्रतिगामी हैं तथा श्रमिकों के हितों के लिए हानिकारक हैं।
- It has also taken nearly six years to operationalise the codes enacted during 2019-20.
  वर्ष 2019-20 के दौरान अधिनियमित इन संहिताओं को लागू करने में लगभग छह वर्ष का समय लगा है।
- The codes are **The Code on Wages, 2019**, **The Industrial Relations Code, 2020**, **The Code on Social Security, 2020** and **The Occupational Safety, Health and Working Conditions Code, 2020**.
  इन संहिताओं में **वेतन संहिता, 2019**, **औद्योगिक संबंध संहिता, 2020**, **सामाजिक सुरक्षा संहिता, 2020** तथा **व्यावसायिक सुरक्षा, स्वास्थ्य एवं कार्य परिस्थितियाँ संहिता, 2020** शामिल हैं।

Critical gaps
महत्वपूर्ण कमियाँ

- Rules essentially lay down the **standard operating procedures (SoPs)** for implementing an Act or Code.
  नियम किसी अधिनियम या संहिता को लागू करने के लिए मूलतः **मानक संचालन प्रक्रियाएँ (SoPs)** निर्धारित करते हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- While they cannot contradict the provisions of the parent legislation, they become crucial where the law is broad or open-ended.
  यद्यपि वे मूल कानून के प्रावधानों का विरोध नहीं कर सकते, किन्तु जहाँ कानून व्यापक या अस्पष्ट हो, वहाँ उनकी भूमिका अत्यंत महत्वपूर्ण हो जाती है।
- Given the sustained opposition to several provisions in the four labour codes, it was expected that the rules would help moderate some of the contentious aspects.
  चारों श्रम संहिताओं के अनेक प्रावधानों के विरुद्ध लगातार विरोध को देखते हुए यह अपेक्षा की जा रही थी कि नियम कुछ विवादास्पद पहलुओं को संतुलित करने में सहायता करेंगे।
- However, those expectations appear to have been belied.
  हालाँकि, ये अपेक्षाएँ पूरी होती हुई नहीं दिखाई देती हैं।
- The **Industrial Relations Code, 2020** formally introduced the concept of **Fixed-Term Employment (FTE)** into India's labour law framework, although such employment arrangements have been widely used for decades.
  औद्योगिक संबंध संहिता, 2020 ने औपचारिक रूप से **निश्चित अवधि रोजगार (FTE)** की अवधारणा को भारत के श्रम कानून ढाँचे में शामिल किया, यद्यपि इस प्रकार की रोजगार व्यवस्था दशकों से प्रचलित रही है।
- However, the Code does not specify a minimum tenure or limit the number of contract renewals.
  हालाँकि, संहिता में न्यूनतम कार्यकाल या अनुबंध नवीनीकरणों की संख्या की कोई सीमा निर्धारित नहीं की गई है।
- The rules could have addressed these gaps to mitigate potential adverse effects on workers.
  नियम इन कमियों को दूर कर श्रमिकों पर पड़ने वाले संभावित प्रतिकूल प्रभावों को कम कर सकते थे।
- A minimum tenure (one year) could have prevented very short tenures which are detrimental to employees.
  एक न्यूनतम कार्यकाल (एक वर्ष) अत्यंत अल्प अवधि की नियुक्तियों को रोक सकता था, जो कर्मचारियों के लिए हानिकारक होती हैं।
- Also, there could have been some restrictions in the number of times renewals can be allowed.
  इसके अतिरिक्त, अनुबंध नवीनीकरणों की संख्या पर भी कुछ प्रतिबंध लगाए जा सकते थे।
- Otherwise, there is a possibility that even regular positions become FTEs with unlimited renewals.
  अन्यथा यह संभावना बनी रहती है कि नियमित पद भी असीमित नवीनीकरणों के साथ FTE में परिवर्तित हो जाएँ।
- Unfortunately, the rules remain silent on these important issues.
  दुर्भाग्यवश, नियम इन महत्वपूर्ण मुद्दों पर मौन हैं।
- The **Code on Wages (Central) Rules** provide only a vague definition of the "**floor wage**" and do not clearly distinguish it from the **minimum wage**.
  वेतन संहिता (केंद्रीय) नियम "**फ्लोर वेज**" की केवल अस्पष्ट परिभाषा देते हैं और इसे **न्यूनतम वेतन** से स्पष्ट रूप से अलग नहीं करते।
- While the Rules require consultation with **State governments**, they do not specify a detailed framework for such consultations, raising concerns that the process may remain largely symbolic.
  यद्यपि नियम **राज्य सरकारों** से परामर्श की अपेक्षा करते हैं, परंतु इसके लिए कोई विस्तृत ढाँचा निर्धारित नहीं करते, जिससे यह आशंका उत्पन्न होती है कि यह प्रक्रिया केवल औपचारिकता बनकर रह जाएगी।
- The Rules also fail to lay down clear principles for fixing minimum wages.
  नियम न्यूनतम वेतन निर्धारण के लिए स्पष्ट सिद्धांत भी निर्धारित नहीं करते।
- As a result, the convention of treating a four-member family as comprising three consumption units is likely to continue.
  इसके परिणामस्वरूप चार सदस्यीय परिवार को तीन उपभोग इकाइयों के बराबर मानने की परंपरा जारी रहने की संभावना है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- This effectively perpetuates **gender bias**, as an adult female is assigned a weight of 0.8 compared with 1.0 for an adult male.
  यह प्रभावी रूप से **लैंगिक पक्षपात** को बनाए रखता है, क्योंकि एक वयस्क महिला को 0.8 का भारांक दिया जाता है जबकि एक वयस्क पुरुष को 1.0 का।
- The Rules further provide that the **hourly wage** shall be calculated by dividing the daily wage by eight.
  नियम यह भी निर्धारित करते हैं कि **प्रति घंटा वेतन** की गणना दैनिक वेतन को आठ से विभाजित करके की जाएगी।
- Conceptually, this is a flawed approach.
  सैद्धांतिक रूप से यह एक त्रुटिपूर्ण दृष्टिकोण है।
- An hourly wage should not merely be a pro-rata derivation of the daily wage, as workers may not be able to find work for the remaining hours of the day.
  प्रति घंटा वेतन केवल दैनिक वेतन का अनुपातिक विभाजन नहीं होना चाहिए, क्योंकि श्रमिकों को दिन के शेष घंटों के लिए कार्य उपलब्ध नहीं हो सकता।
- Internationally, **minimum hourly wages** are often determined independently of daily wage rates.
  अंतरराष्ट्रीय स्तर पर **न्यूनतम प्रति घंटा वेतन** प्रायः दैनिक वेतन दरों से स्वतंत्र रूप से निर्धारित किए जाते हैं।
- This issue is particularly important in India, given the large number of **domestic workers** and the likely expansion of **gig and platform-based work** in future.
  भारत में यह मुद्दा विशेष रूप से महत्वपूर्ण है, क्योंकि यहाँ **घरेलू कामगारों** की संख्या बहुत अधिक है और भविष्य में **गिग तथा प्लेटफ़ॉर्म आधारित कार्य** के विस्तार की संभावना है।

Gig workers remain vulnerable
गिग श्रमिक अब भी असुरक्षित हैं

- The **Social Security Code (Central) Rules** make no attempt to clarify the employment relationship in the **gig economy**.
  सामाजिक सुरक्षा संहिता (केंद्रीय) नियम गिग अर्थव्यवस्था में रोजगार संबंधों को स्पष्ट करने का कोई प्रयास नहीं करते हैं।
- Gig and platform workers continue to be treated as **self-employed** and remain part of the **unorganised workforce**.
  गिग और प्लेटफ़ॉर्म श्रमिकों को अब भी **स्व-नियोजित** माना जाता है और वे **असंगठित कार्यबल** का हिस्सा बने हुए हैं।
- The Rules are also silent on the mandatory **gratuity insurance** envisaged under the Code.
  नियम संहिता में परिकल्पित अनिवार्य **ग्रेच्युटी बीमा** के संबंध में भी मौन हैं।
- Such insurance could protect workers against **non-payment of gratuity** by employers.
  ऐसा बीमा श्रमिकों को नियोक्ताओं द्वारा **ग्रेच्युटी के भुगतान न किए जाने** की स्थिति से सुरक्षा प्रदान कर सकता है।
- However, the Rules fail to specify the modalities for implementing this safeguard, leaving an important worker protection mechanism undefined.
  हालाँकि, नियम इस सुरक्षा उपाय को लागू करने की प्रक्रिया स्पष्ट नहीं करते, जिससे श्रमिक सुरक्षा का एक महत्वपूर्ण तंत्र अपरिभाषित रह जाता है।
- The **Industrial Relations Code (Central) Rules** provide that a sole registered **trade union** must have at least **30% membership** to be recognised.
  औद्योगिक संबंध संहिता (केंद्रीय) नियम यह प्रावधान करते हैं कि किसी एकमात्र पंजीकृत **ट्रेड यूनियन** को मान्यता प्राप्त करने के लिए कम से कम **30% सदस्यता** होनी चाहिए।
- This means that registration alone does not guarantee recognition.
  इसका अर्थ है कि केवल पंजीकरण से मान्यता की गारंटी नहीं मिलती।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- In large establishments, smaller or newly formed unions may find it difficult to meet this threshold, further weakening their ability to represent workers at a time when the bargaining power of trade unions has already been declining for decades.
  बड़े प्रतिष्ठानों में छोटी या नवगठित यूनियनों के लिए इस सीमा को प्राप्त करना कठिन हो सकता है, जिससे श्रमिकों का प्रतिनिधित्व करने की उनकी क्षमता और कमजोर हो सकती है, जबकि ट्रेड यूनियनों की सौदेबाजी शक्ति पहले से ही दशकों से घट रही है।
- Notably, the **30% threshold** does not appear in the Code itself.
  उल्लेखनीय है कि **30% की सीमा** स्वयं संहिता में उल्लिखित नहीं है।
- The Rules also fail to provide further clarity on the engagement and renewal of **fixed-term employees**, leaving significant scope for ambiguity and potential misuse.
  नियम **निश्चित अवधि के कर्मचारियों (Fixed-Term Employees)** की नियुक्ति और नवीनीकरण के संबंध में भी अतिरिक्त स्पष्टता प्रदान नहीं करते, जिससे अस्पष्टता और संभावित दुरुपयोग की पर्याप्त गुंजाइश बनी रहती है।

Missing safeguards for workers
श्रमिकों के लिए सुरक्षा उपायों का अभाव

- The **Occupational Safety, Health and Working Conditions Code (Central) Rules** set out safety and welfare provisions for the various occupations covered under the Code.
  व्यावसायिक सुरक्षा, स्वास्थ्य एवं कार्य परिस्थितियाँ संहिता (केंद्रीय) नियम संहिता के अंतर्गत आने वाले विभिन्न व्यवसायों के लिए सुरक्षा और कल्याण संबंधी प्रावधान निर्धारित करते हैं।
- However, certain occupation-specific welfare measures, such as **housing and medical facilities** for plantation workers, are absent.
  हालाँकि, कुछ व्यवसाय-विशिष्ट कल्याणकारी उपाय, जैसे बागान श्रमिकों के लिए **आवास और चिकित्सा सुविधाएँ**, अनुपस्थित हैं।
- The Rules also do not specify the activities for which **contract labour** may be engaged, nor do they clearly distinguish between **core and non-core activities**.
  नियम यह भी स्पष्ट नहीं करते कि किन गतिविधियों के लिए **संविदा श्रमिकों (Contract Labour)** को नियुक्त किया जा सकता है, और न ही वे **मुख्य तथा गैर-मुख्य गतिविधियों** के बीच स्पष्ट अंतर करते हैं।
- This omission is significant, given the growing **informalisation of the labour market** through the use of contract labour in core operations.
  यह चूक महत्वपूर्ण है, क्योंकि मुख्य कार्यों में संविदा श्रमिकों के उपयोग के माध्यम से **श्रम बाजार का अनौपचारिकीकरण** लगातार बढ़ रहा है।
- The lack of clarity on what constitutes a **core activity** leaves considerable scope for ambiguity and misuse.
  मुख्य गतिविधि की स्पष्ट परिभाषा के अभाव में अस्पष्टता और दुरुपयोग की पर्याप्त संभावना बनी रहती है।
- Broadly speaking, certain open-ended provisions contested by the **trade unions** and academics, could have been moderated to a certain extent while framing the Rules.
  सामान्यतः, **ट्रेड यूनियनों** और शिक्षाविदों द्वारा विवादित कुछ खुले और अस्पष्ट प्रावधानों को नियम बनाते समय कुछ हद तक संतुलित किया जा सकता था।
- But, as it is evident now, that did not happen.
  किन्तु अब यह स्पष्ट है कि ऐसा नहीं हुआ।
- It is yet another missed opportunity and a further cause for concern for the country's **working class**.
  यह एक और खोया हुआ अवसर है तथा देश के **श्रमिक वर्ग** के लिए चिंता का एक अतिरिक्त कारण भी है।

Indian textile sector witnessing revival of investments

GS III: Economy

M. Soundariya Preetha
COIMBATORE

For the textile and clothing industry, the last quarter of FY26 and the first quarter of the current financial year have seen growth in demand, triggering investments, according to industry officials.

"After 2022, the industry saw demand picking up across the textile value chain from January to mid-May. There is a slowdown in demand now after withdrawal of the import duty on cotton. We hope the situation will stabilise in a month or so," said K. Selvaraju, secretary general, the Southern India Mills Association.

"All the good performers are investing now, expanding capacities. Investments are not decided based on the performance of two or three months. For larger industries, the investments were planned at least seven or eight months before. They are looking at long-term growth," added Chandrima Chatterjee, Secretary General, Confederation of Indian Textile Industry.

Textile mills are said to be investing in modernisation and expansion.

Higher yarn exports

Yarn exports from October 2025 to March 2026 were higher compared with the same period the previous year in quantity. Export of fabrics picked up and then saw a slow down. Similarly, yarn price spike did have an impact on garments and made-ups for a few weeks. Now, fall in cotton prices again led to demand drop, Mr. Selvaraju said.

"When the market revives, it takes about three months for the entire supply chain to benefit. Cotton imports have crossed 40 lakh bales between October 2025 and May 2026. Another 15-20 lakh bales are expected to come in by the end of September. Cotton prices crossed ₹75,000 a candy and are dropping now. This has led to demand slowdown. Everyone is waiting to see how much the prices will fall. The situation will be clear in the next few weeks," added Mr. Selvaraju.

Meanwhile, textile mills are said to be investing in both modernisation and expansion projects though the exact investment data is not available.

More automation

Some of the mills are investing to make value added yarns and some others modernising adopting more automation, said industry sources.

Implementation of the Free Trade Agreement with the U.K. is expected to bring in more orders for garments and made-ups. Another $10 billion increase in exports will support the entire textile value chain. However, the West Asia war and uncertainties in the U.S. tariff are of concern, sources said.

12J6. Indian textile sector witnessing revival of investments

भारतीय वस्त्र क्षेत्र में निवेश का पुनरुत्थान देखने को मिल रहा है

- For the **textile and clothing industry**, the last quarter of **FY26** and the first quarter of the current financial year have seen growth in demand, triggering **investments**, according to industry officials.

वस्त्र और परिधान उद्योग के लिए, **FY26** की अंतिम तिमाही और चालू वित्तीय वर्ष की पहली तिमाही में मांग में वृद्धि देखी गई है, जिससे **निवेश** को बढ़ावा मिला है, ऐसा उद्योग अधिकारियों का कहना है।

- "After **2022**, the industry saw demand picking up across the **textile value chain** from January to mid-May. There is a slowdown in demand now after withdrawal of the **import duty on cotton**. We hope the situation will stabilize in a month or so," said **K. Selvaraju**, secretary general, the **Southern India Mills Association**.

"**2022** के बाद, उद्योग ने जनवरी से मई के मध्य तक पूरे **वस्त्र मूल्य श्रृंखला** में मांग बढ़ते हुए देखी। अब **कपास पर आयात शुल्क** हटाए जाने के बाद मांग में मंदी आई है। हमें उम्मीद है कि एक महीने के भीतर स्थिति स्थिर हो जाएगी," **सदर्न इंडिया मिल्स एसोसिएशन** के महासचिव **के. सेल्वराजु** ने कहा।

- "All the good performers are investing now, expanding capacities. Investments are not decided based on the performance of two or three months. For larger industries, the investments were planned at least seven or eight months before. They are looking at **long-term growth**," added **Chandrima Chatterjee**, Secretary General, **Confederation of Indian Textile Industry**.

"सभी अच्छा प्रदर्शन करने वाले उद्योग अब निवेश कर रहे हैं और अपनी क्षमता बढ़ा रहे हैं। निवेश का निर्णय दो या तीन महीनों के प्रदर्शन के आधार पर नहीं लिया जाता। बड़े उद्योगों के लिए निवेश की योजना कम से कम सात या आठ महीने पहले बनाई गई थी। वे **दीर्घकालिक विकास** पर ध्यान दे रहे हैं," **कन्फेडरेशन ऑफ इंडियन टेक्सटाइल इंडस्ट्री** की महासचिव **चंद्रिमा चटर्जी** ने कहा।

Higher yarn exports

यार्न निर्यात में वृद्धि

- **Yarn exports** from October **2025** to March **2026** were higher compared with the same period the previous year in quantity. Export of fabrics picked up and then saw a slow down. Similarly, yarn price spike did have an impact on garments and made-ups for a few weeks. Now, fall in **cotton prices** again led to demand drop, Mr. Selvaraju said.

अक्टूबर **2025** से मार्च **2026** तक **यार्न निर्यात** मात्रा के आधार पर पिछले वर्ष की समान अवधि की तुलना में अधिक रहा। कपड़ों का निर्यात बढ़ा और फिर उसमें मंदी देखी गई। इसी प्रकार, यार्न की कीमतों में वृद्धि का कुछ सप्ताहों तक परिधानों और मेड-अप्स पर प्रभाव पड़ा। अब **कपास की कीमतों** में गिरावट के कारण फिर से मांग में कमी आई है, श्री सेल्वराजु ने कहा।

- "When the market revives, it takes about three months for the entire **supply chain** to benefit. **Cotton imports** have crossed **40 lakh bales** between October **2025** and May **2026**. Another

15-20 lakh bales are expected to come in by the end of September. Cotton prices crossed **₹75,000 a candy** and are dropping now. This has led to demand slowdown. Everyone is waiting to see how much the prices will fall. The situation will be clear in the next few weeks," added Mr. Selvaraju.

"जब बाजार में सुधार आता है, तो पूरी **आपूर्ति श्रृंखला** को उसका लाभ मिलने में लगभग तीन महीने लगते हैं। अक्टूबर **2025** से मई **2026** के बीच **कपास आयात 40 लाख गांठों** से अधिक हो चुका है। सितंबर के अंत तक अतिरिक्त **15-20 लाख गांठों** के आने की उम्मीद है। कपास की कीमतें **₹75,000 प्रति कैंडी** से ऊपर चली गई थीं और अब गिर रही हैं। इससे मांग में मंदी आई है। सभी यह देखने की प्रतीक्षा कर रहे हैं कि कीमतें कितनी नीचे जाएंगी। अगले कुछ सप्ताहों में स्थिति स्पष्ट हो जाएगी," श्री सेल्वराजु ने कहा।

- Meanwhile, **textile mills** are said to be investing in both **modernisation** and **expansion projects** though the exact investment data is not available.

इस बीच, कहा जा रहा है कि **वस्त्र मिलें आधुनिकीकरण** और **विस्तार परियोजनाओं** दोनों में निवेश कर रही हैं, हालांकि सटीक निवेश आंकड़े उपलब्ध नहीं हैं।

More automation
अधिक स्वचालन

- Some of the mills are investing to make **value-added yarns** and some others modernising and adopting more **automation**, said industry sources.

उद्योग सूत्रों के अनुसार, कुछ मिलें **वैल्यू एडेड यार्न** बनाने के लिए निवेश कर रही हैं और कुछ अन्य अधिक **स्वचालन** अपनाकर आधुनिकीकरण कर रही हैं।

- Implementation of the **Free Trade Agreement** with the **U.K.** is expected to bring in more orders for garments and made-ups.

यू.के. के साथ **मुक्त व्यापार समझौते (FTA)** के कार्यान्वयन से परिधानों और मेड-अप्स के लिए अधिक ऑर्डर मिलने की उम्मीद है।

- Another **$10 billion** increase in exports will support the entire **textile value chain**.

निर्यात में अतिरिक्त **10 अरब डॉलर** की वृद्धि पूरे **वस्त्र मूल्य श्रृंखला** को समर्थन देगी।

- However, the **West Asia war** and uncertainties in the **U.S. tariff** are of concern, sources said.

हालांकि, **पश्चिम एशिया का युद्ध** और **अमेरिकी टैरिफ** से जुड़ी अनिश्चितताएं चिंता का विषय हैं, सूत्रों ने कहा।

RIL, Vedanta, Adani said to join hands to cut China rare earth reliance

GS III: Economy

Reuters

NEW DELHI

Indian industrial groups-Reliance, Vedanta and Adani have shown interest in developing facilities to process Andhra Pradesh state's significant reserves of increasingly important rare-earth minerals, according to two sources with knowledge of the matter.

With New Delhi seeking to cut India's dependence on China for rare earths, the three companies are among about 10 who have expressed interest in setting up rare earth facilities in the southern state, one of the sources said.

The sources declined to be identified as they were not authorised to speak to the media. Andhra Pradesh holds 211 million metric tonne of beach sand mineral resources, including rare earths, across 16 identified coastal deposits, as per a draft document.

India has 482.6 million tonne of rare earth ore resources, according to the Geological Survey of India.

The interest comes as New Delhi steps up efforts to build domestic rare earth mining, processing and magnet manufacturing capacity, while Andhra Pradesh aims to attract ₹50,000 crore ($5.2 billion) in rare earth and titanium investments over the next decade. The plans were set out in a draft government document.

The Andhra Pradesh government, Reliance Industries Ltd. (RIL), Vedanta Ltd. and Adani Enterprises Ltd. did not respond to *Reuters* emails seeking comments.

12J6. RIL, Vedanta, Adani said to join hands to cut China rare earth reliance

चीन पर दुर्लभ मृदा निर्भरता कम करने के लिए RIL, Vedanta और Adani के साथ आने की बात

- Indian industrial groups **Reliance**, **Vedanta** and **Adani** have shown interest in developing facilities to process **Andhra Pradesh** state's significant reserves of increasingly important **rare-earth minerals**, according to two sources with knowledge of the matter.

मामले की जानकारी रखने वाले दो सूत्रों के अनुसार, भारतीय औद्योगिक समूह **रिलायंस**, **वेदांता** और **अडानी** ने **आंध्र प्रदेश** राज्य के महत्वपूर्ण **दुर्लभ मृदा खनिजों (रेयर अर्थ मिनरल्स)** के बड़े भंडारों के प्रसंस्करण हेतु सुविधाएं विकसित करने में रुचि दिखाई है।

- With **New Delhi** seeking to cut India's dependence on **China** for rare earths, the three companies are among about **10** who have expressed interest in setting up rare earth facilities in the southern state, one of the sources said.

एक सूत्र ने कहा कि **नई दिल्ली** द्वारा दुर्लभ मृदा खनिजों के लिए **चीन** पर भारत की निर्भरता कम करने के प्रयासों के बीच, ये तीनों कंपनियां उन लगभग **10** कंपनियों में शामिल हैं जिन्होंने दक्षिणी राज्य में दुर्लभ मृदा सुविधाएं स्थापित करने में रुचि दिखाई है।

- The sources declined to be identified as they were not authorised to speak to the media.

सूत्रों ने अपनी पहचान बताने से इनकार कर दिया क्योंकि वे मीडिया से बात करने के लिए अधिकृत नहीं थे।

- **Andhra Pradesh** holds **211 million metric tonne** of beach sand mineral resources, including rare earths, across **16 identified coastal deposits**, as per a draft document.

एक मसौदा दस्तावेज़ के अनुसार, **आंध्र प्रदेश** में **16 चिन्हित तटीय भंडारों** में दुर्लभ मृदा सहित **211 मिलियन मीट्रिक टन** समुद्री तट रेत खनिज संसाधन मौजूद हैं।

- India has **482.6 million tonne** of rare earth ore resources, according to the **Geological Survey of India**.

भारतीय भूवैज्ञानिक सर्वेक्षण (GSI) के अनुसार, भारत के पास **482.6 मिलियन टन** दुर्लभ मृदा अयस्क संसाधन हैं।

- The interest comes as **New Delhi** steps up efforts to build domestic rare earth mining, processing and **magnet manufacturing capacity**, while **Andhra Pradesh** aims to attract **₹50,000 crore ($5.2 billion)** in rare earth and titanium investments over the next decade.

यह रुचि ऐसे समय में सामने आई है जब **नई दिल्ली** घरेलू दुर्लभ मृदा खनन, प्रसंस्करण और **चुंबक निर्माण क्षमता** विकसित करने के प्रयास तेज कर रही है, जबकि **आंध्र प्रदेश** अगले दशक में दुर्लभ मृदा और टाइटेनियम क्षेत्र में **₹50,000 करोड़ (5.2 अरब डॉलर)** का निवेश आकर्षित करने का लक्ष्य रखता है।

- The plans were set out in a draft government document.

इन योजनाओं का उल्लेख एक मसौदा सरकारी दस्तावेज़ में किया गया है।

- The **Andhra Pradesh government**, **Reliance Industries Ltd. (RIL)**, **Vedanta Ltd.** and **Adani Enterprises Ltd.** did not respond to Reuters emails seeking comments.

आंध्र प्रदेश सरकार, **रिलायंस इंडस्ट्रीज़ लिमिटेड (RIL)**, **वेदांता लिमिटेड** और **अडानी एंटरप्राइजेज लिमिटेड** ने टिप्पणी मांगने वाले रॉयटर्स के ईमेल का कोई उत्तर नहीं दिया।

Once an Arab oil embargo victim, U.S. now becomes world's top oil exporter

U.S. exports of crude and fuel climbed to about 10.5 million barrels per day in May as Saudi, Russian exports disrupted by conflict and sanctions; EU officials warn of risks in growing dependence on U.S. energy supplies; U.S. oil boom driven by private firms, contrasting with state-led output in rivals

GS III: Economy

NEWS ANALYSIS

Reuters
HOUSTON

Oil power: A pump jack operates near a crude oil reserve in the Permian Basin oil field, U.S. REUTERS

The United States has become the world's largest oil exporter, upending a decades-old order long dominated by Saudi Arabia and Russia, a shift that tightens American companies' grip on energy markets as Washington's war with Iran reshapes global energy trade. America's ascendancy to the top spot marks a stunning reversal-for a country that was dependent on Middle Eastern oil for decades and suffered from an oil embargo imposed by some OPEC members in 1973 to retaliate against U.S. support for Israel.

Change in fortune

U.S. fortunes began to change after 2010, when oil and gas output from its shale formations soared, first making it the world's top gas and then the world's top oil producer.

With the U.S.-Iran war disrupting Saudi oil exports since February 2026 and Russian oil exports suffering from Ukrainian drone attacks and U.S. sanctions on Moscow for the invasion of Ukraine, the U.S. has become the world's leading oil exporter.

U.S. exports of crude and fuel climbed to about 10.5 million barrels per day in May on the back of high output and the release of strategic reserves, data from ship tracking services Vortexa showed, making the U.S. the top global exporter for the third month in a row.

Russian exports stood at 7 million bpd in May, according to *Reuters*' calculations, while Saudi Arabia's exports stood at 5.9 million bpd, according to Vortexa.

In comparison, Saudi Arabia exported about 8.1 million bpd in 2025, while the United States shipped out 6.6 million bpd,and Russian exports stood at about 5.8 million bpd, according toVortexa data.

"Washington has a new tool they didn't realise they had before the Iran war – energy exports," said Michelle Brouhard, head of policy at ship tracking firm Kpler.

> Russian exports stood at 7 million bpd in May, according to *Reuters*' calculations, while Saudi Arabia's exports stood at 5.9 million bpd, according to Vortexa.

OPEC price weaking

The new U.S. dominance could weaken the pricing power that the Organization of Petroleum Exporting Countries and its allies have historically held over oil markets. U.S. President Donald Trump has long criticised OPEC for manipulating the markets. The group also suffered a blow in May when one of its biggest members, the United Arab Emirates, left the organization after nearly 60 years. The biggest oil exporter spot will give Washington a powerful new lever in talks with allies and rivals in addition to its global military supremacy and its dominance of financial markets thanks to the U.S. dollar's role as the world's reserve currency.

U.S. leverage

"You can see now the leverage the United States has over some of these countries because they are dependent on the U.S. for their oil or gas," Brouhard said, adding that the U.S. was the largest provider of crude to Europe and the second-largest provider of distillates. EU officials, who initially welcomed the U.S. oil and gas boom as an alternative to Russian and Middle Eastern supply, have grown more skeptical and warned of risks of becoming too dependent on American companies.

Oil, tariffs

The warning coincided with the EU clashing with the U.S. administration over trade tariffs and green regulations. Moscow is also finding it hard to hide frustration. U.S. energy companies were the main beneficiaries of the closure of the Strait of Hormuz, Igor Sechin, the boss of the Kremlin oil major Rosneft and one of the closest allies of President Vladimir Putin, said this month.

But long before the U.S.-Iran war started, both Saudi Arabia and Russia were trailing far behind U.S. companies on production growth. Crude and liquids output in the United States has nearly tripled to about 22 million bpd since 2000. Saudi crude and liquids output has largely fluctuated between 10 million and 12 million bpd depending on OPEC quotas between 2000 and 2026.

Russian oil and liquids output soared to 10 million bpd from 6 million bpd between 2000 and 2010, grew by a further 2 million bpd during the 2010s, but has largely stagnated and declined to below 10 million bpd since 2020.

Global oil demand grew to 104 million bpd last year from 87 million in 2010, meaning the lion's share of the global growth of the past 15 years has been mostly met by the U.S. oil boom.

In 2015, the United States repealed a 40-year export ban it had in place since the Arab oil embargo, opening the gates for its oil boom to the wider world. Fast forward 10 years, it has become the biggest oil exporter, proving skeptics wrong that the growth would be short-lived as fields deplete.

Unlike in Saudi Arabia and Russia, where governments fully or partially set production and export targets, the U.S. boom hinges on private companies' decisions and is primarily driven by profits.

When oil prices rise, U.S. firms will respond by raising production, which will help bring prices down. When prices are weak, U.S. firms will cut output, which will boost prices, said Kenneth Medlock III, a fellow in Energy and Resource Economics at the Baker Institute for Public Policy. "In many ways, it's kind of a similar role to what OPEC and Saudi Arabia have been doing with spare production capacity, butit's more of a market mechanism than a strategic device," he said.

12J6. Once an Arab oil embargo victim, U.S. now becomes world's top oil exporter

कभी अरब तेल प्रतिबंध का शिकार रहा अमेरिका, अब बना दुनिया का सबसे बड़ा तेल निर्यातक

- **U.S. exports** of crude and fuel climbed to about **10.5 million barrels per day** in May as **Saudi** and **Russian exports** were disrupted by conflict and sanctions.
  मई में **अमेरिकी निर्यात** कच्चे तेल और ईंधन के मामले में बढ़कर लगभग **10.5 मिलियन बैरल प्रतिदिन** हो गया क्योंकि **सऊदी** और **रूसी निर्यात** संघर्ष और प्रतिबंधों से प्रभावित हुए।
- **EU officials** warn of risks in growing dependence on **U.S. energy supplies**.
  यूरोपीय संघ के अधिकारियों ने **अमेरिकी ऊर्जा आपूर्ति** पर बढ़ती निर्भरता के जोखिमों को लेकर चेतावनी दी है।
- The **U.S. oil boom** is driven by private firms, contrasting with state-led output in rivals.
  अमेरिकी तेल उछाल निजी कंपनियों द्वारा संचालित है, जो प्रतिस्पर्धी देशों में सरकार-नियंत्रित उत्पादन से भिन्न है।
- The **United States** has become the world's largest oil exporter, upending a decades-old order long dominated by **Saudi Arabia** and **Russia**, a shift that tightens American companies' grip on energy markets as **Washington's war with Iran** reshapes global energy trade.
  संयुक्त राज्य अमेरिका दुनिया का सबसे बड़ा तेल निर्यातक बन गया है, जिससे **सऊदी अरब** और **रूस** के लंबे समय से चले आ रहे प्रभुत्व वाली व्यवस्था बदल गई है। यह परिवर्तन ऊर्जा बाजारों पर अमेरिकी कंपनियों की

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

पकड़ को मजबूत करता है क्योंकि **ईरान के साथ वाशिंगटन का युद्ध** वैश्विक ऊर्जा व्यापार को नया स्वरूप दे रहा है।

- America's ascendancy to the top spot marks a stunning reversal for a country that was dependent on **Middle Eastern oil** for decades and suffered from an **oil embargo** imposed by some **OPEC** members in **1973** to retaliate against U.S. support for Israel.
  शीर्ष स्थान पर अमेरिका का पहुंचना उस देश के लिए एक आश्चर्यजनक बदलाव है जो दशकों तक **मध्य-पूर्वी तेल** पर निर्भर रहा और **1973** में इज़राइल के समर्थन के प्रतिशोध में कुछ **ओपेक** सदस्यों द्वारा लगाए गए **तेल प्रतिबंध** का शिकार बना था।

Change in fortune
भाग्य में परिवर्तन

- U.S. fortunes began to change after **2010**, when oil and gas output from its **shale formations** soared, first making it the world's top gas and then the world's top oil producer.
  2010 के बाद अमेरिका की स्थिति बदलनी शुरू हुई जब उसके **शेल भंडारों** से तेल और गैस उत्पादन तेजी से बढ़ा, जिससे वह पहले दुनिया का सबसे बड़ा गैस उत्पादक और फिर सबसे बड़ा तेल उत्पादक बना।
- With the **U.S.-Iran war** disrupting Saudi oil exports since **February 2026** and Russian oil exports suffering from **Ukrainian drone attacks** and **U.S. sanctions** on Moscow for the invasion of Ukraine, the U.S. has become the world's leading oil exporter.
  फरवरी 2026 से **अमेरिका-ईरान युद्ध** के कारण सऊदी तेल निर्यात प्रभावित होने और यूक्रेन पर आक्रमण के कारण रूस पर लगाए गए **अमेरिकी प्रतिबंधों** तथा **यूक्रेनी ड्रोन हमलों** से रूसी निर्यात प्रभावित होने के चलते अमेरिका दुनिया का अग्रणी तेल निर्यातक बन गया है।
- U.S. exports of crude and fuel climbed to about **10.5 million barrels per day** in May on the back of high output and the release of **strategic reserves**, data from ship tracking services **Vortexa** showed, making the U.S. the top global exporter for the third month in a row.
  जहाज ट्रैकिंग सेवा **वोर्टेक्सा** के आंकड़ों के अनुसार, उच्च उत्पादन और **रणनीतिक भंडारों** की रिहाई के कारण मई में अमेरिका का कच्चे तेल और ईंधन निर्यात बढ़कर लगभग **10.5 मिलियन बैरल प्रतिदिन** हो गया, जिससे वह लगातार तीसरे महीने दुनिया का सबसे बड़ा निर्यातक बना।
- Russian exports stood at **7 million bpd** in May, according to Reuters' calculations, while **Saudi Arabia's exports** stood at **5.9 million bpd**, according to Vortexa.
  रॉयटर्स की गणनाओं के अनुसार मई में रूसी निर्यात **7 मिलियन बैरल प्रतिदिन** रहा, जबकि वोर्टेक्सा के अनुसार **सऊदी अरब का निर्यात 5.9 मिलियन बैरल प्रतिदिन** रहा।
- In comparison, **Saudi Arabia** exported about **8.1 million bpd** in **2025**, while the **United States** shipped out **6.6 million bpd**, and Russian exports stood at about **5.8 million bpd**, according to Vortexa data.
  तुलनात्मक रूप से, **2025** में **सऊदी अरब** ने लगभग **8.1 मिलियन बैरल प्रतिदिन** निर्यात किया, जबकि **संयुक्त राज्य अमेरिका** ने **6.6 मिलियन बैरल प्रतिदिन** और रूस ने लगभग **5.8 मिलियन बैरल प्रतिदिन** निर्यात किया।
- "**Washington** has a new tool they didn't realise they had before the Iran war — **energy exports**," said **Michelle Brouhard**, head of policy at ship tracking firm **Kpler**.
  जहाज ट्रैकिंग कंपनी **क्प्लर** की नीति प्रमुख **मिशेल ब्रूहार्ड** ने कहा, "**वाशिंगटन** के पास अब एक नया साधन है जिसका उसे ईरान युद्ध से पहले एहसास नहीं था — **ऊर्जा निर्यात**।"

OPEC price weakening
ओपेक की मूल्य निर्धारण शक्ति कमजोर

- The new U.S. dominance could weaken the pricing power that the **Organization of Petroleum Exporting Countries (OPEC)** and its allies have historically held over oil markets.

अमेरिका का नया प्रभुत्व तेल बाजारों पर **ओपेक** और उसके सहयोगियों की ऐतिहासिक मूल्य निर्धारण शक्ति को कमजोर कर सकता है।

- **U.S. President Donald Trump** has long criticised OPEC for manipulating the markets.
  अमेरिकी राष्ट्रपति डोनाल्ड ट्रंप लंबे समय से ओपेक पर बाजार में हेरफेर करने का आरोप लगाते रहे हैं।
- The group also suffered a blow in May when one of its biggest members, the **United Arab Emirates**, left the organization after nearly **60 years**.
  मई में समूह को एक और झटका लगा जब उसके सबसे बड़े सदस्यों में से एक **संयुक्त अरब अमीरात** लगभग **60 वर्षों** बाद संगठन से बाहर हो गया।
- The biggest oil exporter spot will give **Washington** a powerful new lever in talks with allies and rivals in addition to its global military supremacy and its dominance of financial markets thanks to the **U.S. dollar's** role as the world's reserve currency.
  दुनिया के सबसे बड़े तेल निर्यातक का दर्जा **वाशिंगटन** को अपने वैश्विक सैन्य प्रभुत्व और **अमेरिकी डॉलर** की आरक्षित मुद्रा की भूमिका के अतिरिक्त सहयोगियों और प्रतिद्वंद्वियों के साथ वार्ता में एक नया शक्तिशाली साधन प्रदान करेगा।

U.S. leverage
अमेरिका की बढ़ी हुई प्रभाव क्षमता

- "You can see now the leverage the **United States** has over some of these countries because they are dependent on the U.S. for their oil or gas," Brouhard said, adding that the U.S. was the largest provider of crude to **Europe** and the second-largest provider of distillates.
  ब्रूहार्ड ने कहा, "अब आप देख सकते हैं कि **संयुक्त राज्य अमेरिका** का कुछ देशों पर कितना प्रभाव है क्योंकि वे अपने तेल या गैस के लिए अमेरिका पर निर्भर हैं।" उन्होंने कहा कि अमेरिका **यूरोप** को कच्चे तेल का सबसे बड़ा और डिस्टिलेट्स का दूसरा सबसे बड़ा आपूर्तिकर्ता है।
- **EU officials**, who initially welcomed the U.S. oil and gas boom as an alternative to Russian and Middle Eastern supply, have grown more skeptical and warned of risks of becoming too dependent on American companies.
  यूरोपीय संघ के अधिकारी, जिन्होंने शुरू में अमेरिकी तेल और गैस उछाल का स्वागत रूसी और मध्य-पूर्वी आपूर्ति के विकल्प के रूप में किया था, अब अधिक संशय में हैं और अमेरिकी कंपनियों पर अत्यधिक निर्भर होने के जोखिमों की चेतावनी दे रहे हैं।

Oil, tariffs
तेल और शुल्क

- The warning coincided with the **EU** clashing with the **U.S. administration** over trade tariffs and green regulations.
  यह चेतावनी ऐसे समय आई जब **यूरोपीय संघ** और **अमेरिकी प्रशासन** के बीच व्यापार शुल्क और हरित नियमों को लेकर टकराव चल रहा है।
- **Moscow** is also finding it hard to hide frustration.
  मॉस्को के लिए भी अपनी निराशा छिपाना कठिन हो रहा है।
- U.S. energy companies were the main beneficiaries of the closure of the **Strait of Hormuz**, **Igor Sechin**, the boss of the Kremlin oil major **Rosneft** and one of the closest allies of President **Vladimir Putin**, said this month.
  इस महीने **रोसनेफ्ट** के प्रमुख और राष्ट्रपति **व्लादिमीर पुतिन** के करीबी सहयोगी **इगोर सेचिन** ने कहा कि **हॉर्मुज़ जलडमरूमध्य** के बंद होने से सबसे अधिक लाभ अमेरिकी ऊर्जा कंपनियों को हुआ।
- But long before the **U.S.-Iran war** started, both **Saudi Arabia** and **Russia** were trailing far behind U.S. companies on production growth.

लेकिन **अमेरिका-ईरान युद्ध** शुरू होने से बहुत पहले ही **सऊदी अरब** और **रूस** उत्पादन वृद्धि के मामले में अमेरिकी कंपनियों से काफी पीछे थे।

- Crude and liquids output in the **United States** has nearly tripled to about **22 million bpd** since **2000**.
  2000 के बाद से **संयुक्त राज्य अमेरिका** में कच्चे तेल और तरल पदार्थों का उत्पादन लगभग तीन गुना बढ़कर **22 मिलियन बैरल प्रतिदिन** हो गया है।
- Saudi crude and liquids output has largely fluctuated between **10 million** and **12 million bpd** depending on **OPEC quotas** between **2000 and 2026**.
  2000 से 2026 के बीच **ओपेक कोटा** के अनुसार सऊदी उत्पादन अधिकांश समय **10 से 12 मिलियन बैरल प्रतिदिन** के बीच रहा है।
- Russian oil and liquids output soared to **10 million bpd** from **6 million bpd** between **2000 and 2010**, grew by a further **2 million bpd** during the 2010s, but has largely stagnated and declined to below **10 million bpd** since **2020**.
  2000 से 2010 के बीच रूसी तेल और तरल उत्पादन **6 मिलियन** से बढ़कर **10 मिलियन बैरल प्रतिदिन** हो गया, 2010 के दशक में इसमें और **2 मिलियन बैरल प्रतिदिन** की वृद्धि हुई, लेकिन **2020** के बाद यह ठहर गया और **10 मिलियन बैरल प्रतिदिन** से नीचे आ गया।
- Global oil demand grew to **104 million bpd** last year from **87 million** in **2010**, meaning the lion's share of the global growth of the past **15 years** has been mostly met by the **U.S. oil boom**.
  वैश्विक तेल मांग **2010** के **87 मिलियन बैरल प्रतिदिन** से बढ़कर पिछले वर्ष **104 मिलियन बैरल प्रतिदिन** हो गई, जिसका अर्थ है कि पिछले **15 वर्षों** की अधिकांश वैश्विक वृद्धि की पूर्ति मुख्यतः **अमेरिकी तेल उछाल** ने की है।
- In **2015**, the **United States** repealed a **40-year export ban** it had in place since the Arab oil embargo, opening the gates for its oil boom to the wider world.
  2015 में **संयुक्त राज्य अमेरिका** ने अरब तेल प्रतिबंध के बाद लागू **40 वर्ष पुराने निर्यात प्रतिबंध** को समाप्त कर दिया, जिससे उसके तेल उछाल के लिए वैश्विक बाजार खुल गए।
- Fast forward **10 years**, it has become the biggest oil exporter, proving skeptics wrong that the growth would be short-lived as fields deplete.
  10 वर्ष बाद अमेरिका दुनिया का सबसे बड़ा तेल निर्यातक बन गया, जिससे उन संदेहों को गलत साबित किया गया कि भंडार समाप्त होने के साथ यह वृद्धि अल्पकालिक होगी।
- Unlike in **Saudi Arabia** and **Russia**, where governments fully or partially set production and export targets, the **U.S. boom** hinges on private companies' decisions and is primarily driven by profits.
  सऊदी अरब और **रूस** के विपरीत, जहां सरकारें उत्पादन और निर्यात लक्ष्य निर्धारित करती हैं, **अमेरिकी उछाल** निजी कंपनियों के निर्णयों पर आधारित है और मुख्य रूप से लाभ से संचालित होता है।
- When oil prices rise, **U.S. firms** will respond by raising production, which will help bring prices down.
  जब तेल की कीमतें बढ़ती हैं, तो **अमेरिकी कंपनियां** उत्पादन बढ़ाती हैं, जिससे कीमतों को नीचे लाने में मदद मिलती है।
- When prices are weak, **U.S. firms** will cut output, which will boost prices, said **Kenneth Medlock III**, a fellow in Energy and Resource Economics at the **Baker Institute for Public Policy**.
  बेकर इंस्टीट्यूट फॉर पब्लिक पॉलिसी के ऊर्जा एवं संसाधन अर्थशास्त्र विशेषज्ञ **केनेथ मेडलॉक III** ने कहा कि जब कीमतें कमजोर होती हैं तो **अमेरिकी कंपनियां** उत्पादन घटा देती हैं, जिससे कीमतें बढ़ती हैं।
- "In many ways, it's kind of a similar role to what **OPEC** and **Saudi Arabia** have been doing with spare production capacity, but it's more of a market mechanism than a strategic device," he said.
  उन्होंने कहा, "कई मायनों में यह उसी तरह की भूमिका है जैसी **ओपेक** और **सऊदी अरब** अतिरिक्त उत्पादन

क्षमता के माध्यम से निभाते रहे हैं, लेकिन यह एक रणनीतिक उपकरण की बजाय अधिक **बाजार आधारित तंत्र** है।"

Efforts on to contain Nipah outbreak: Kerala Minister

Contact list of persons who might have interacted with the patient drawn up; no containment zone needed as none other than the patient had shown symptoms, says K. Muraleedharan

GS III: S&T

The Hindu Bureau
THIRUVANANTHAPURAM

The Health Department in Kerala is maintaining maximum vigilance and taking all possible preventive measures to ensure that the current Nipah outbreak in Kozhikode is contained and that no nosocomial or human-to-human transmission of the virus occurs.

The patient, a 43-year-old man from Ramanattukara, who was transferred from a private hospital to the Government Medical College Hospital (MCH), Kozhikode on Wednesday with encephalitis symptoms, is stable and on ventilator support.

Health workers at the Nipah isolation ward at the Government Medical College Hospital in Kozhikode on Thursday. K. RAGESH

Health Minister K. Muraleedharan, who spoke to mediapersons in Thiruvananthapuram on Thursday, after holding a high-level meeting with Health and medical college officials, said that a contact list of 77 persons who might have closely interacted with the patient had been drawn up. The list includes 58 healthcare workers, 14 family members of the patient, and five co-workers and friends.

Of the 77 persons, two have been categorised as being at the "highest risk", 13 at "high risk", and 62 at low risk. He said that as of now, there was no need for earmarking a containment zone as none other than the patient had shown any symptoms.

The Health Department was preparing the patient's route map, and he appeared to have visited several healthcare establishments from May 10 before reaching the Kozhikode medical college, Mr. Muraleedharan said.

The Rapid Response Team in Kozhikode had met and adequate stocks of personal protection equipment and medicines were being made available. A control room has been opened at Kozhikode district medical administration's office.

Bacillary dysentery cases rise in Kerala

GS III: S&T

The Hindu Bureau
THIRUVANANTHAPURAM

More cases of shigellosis (bacillary dysentery), a highly contagious bacterial diarrhoeal disease caused by shigella, are being reported across Kerala, with a total of 34 cases reported in June alone.

Thiruvananthapuram has reported six cases, Kollam and Idukki one each, Alapuzha three, Malappuram and Kannur two each, Kozhikode 11 and Wayanad eight.

Three more children tested positive for shigellosis at Wayanad Mar Baselios HSS on Thursday, where around 514 children have shown symptoms of the infection. The results of seven more samples are awaited, Health Minister K. Muraleedharan said here on Thursday.

He said that 47 people are currently undergoing treatment in hospitals, both public and private, in Wayanad, while three people were hospitalised in Kozhikode and Thiruvananthapuram, and two others in Kollam.

Mr. Muraleedharan said that water samples from both the borewell as well as the well in Mar Baselios school had been sent for testing and that the well water was found to be highly contaminated.

Shigellosis is sporadically reported from all districts every year, with occasional outbreaks. Last year, a total of 133 cases had been reported, with zero deaths.

Shigellosis is a severe form of diarrhoeal outbreak involving intestinal tissue invasion by the bacteria, causing highly infectious, bloody, and mucoid stools (bacillary dysentery) accompanied by high fever and severe abdominal cramps.

The infection spreads through contaminated water, food and contact from infected surfaces and is extremely infectious. Ingesting as few as 10 to 100 bacteria can cause an infection. It spreads rapidly via the fecal-oral route.

Contraceptive use and the weight women carry: insights from NFHS-6

India must invest in policies that move contraceptive use from compliance to choice: this will involve ensuring no girl is married before the age of 18, investing in rural secondary education, and increasing access to reversible scientific contraception methods

GS III: S&T [illegible]

Trishna Sarkar
C. Saratchand

Reproductive agency, the power to decide whether, when, and how to bear children is a vital and necessary component of women's empowerment, and yet, is often not taken into account when metrics of income, education, mobility and political representation are analysed.

India's demographic transition, as reflected in the latest round of the National Family Health Survey (NFHS-6, 2023-24), besides revealing incremental changes in health indicators, also signals a structural shift in the domain of reproductive agency. Contraception, once framed primarily as an instrument of population control, is increasingly emerging as a marker of women's reproduction agency.

History of contraceptive use

India's engagement with contraception dates back to 1952, when it became the first country to launch an official family planning programme but with women bearing a disproportionate share of the required responsibility.

The following data, drawn from the NFHS-6 (2023-24) survey of currently married women aged 15- 49 years, maps the reproductive and contraceptive landscape across urban and rural India, and against the NFHS-5 baseline:

A striking finding in the NFHS-6 data is the persistence of early marriage. Nationally, 20.1% of women aged 20-24 was married before the age of 18, with the rural figure reaching 23.3% – unchanged from NFHS-5. Among men, 15.9% aged 25-29 were married before 21. These trends are not only legal failures, they are also healthcare setbacks.

A girl married before she has had the opportunity to complete secondary education or enter the paid workforce, confronts a significantly extended reproductive window. When contraceptive access is limited, awareness of healthcare attenuated, or agency within the family is negligible, unhealthy pregnancies, unsustainably more births, and heightened maternal and child health risk are the consequences. The data bears this out: 6.7% of women aged 15-19 were already mothers or pregnant at the time of the survey rising to 7.9% in rural areas.

From a public health standpoint, early marriage is not merely a social problem, it is a reproductive health emergency with lifelong consequences. Girls married young are less likely to know their contraceptive options, less likely to be able to negotiate their use, and more likely to undergo less spaced-out pregnancies. The cumulative physiological burden of anaemia, obstetric complications and maternal mortality is concentrated precisely in this demographic. Yet policy conversations about fertility routinely overlook the role of early marital unions, seeking to unsuccessfully treat the symptom (high fertility) while ignoring the structural cause (constrained reproductive agency).

The rural-urban divide in these figures is striking. Urban women tend to marry later, complete more schooling, and are exposed to a broader suite of contraceptive options. Rural women face the inverse: earlier marital unions, relatively less agency, and a healthcare infrastructure that, as we shall see, defaults to unattainable permanent solutions rather than investing in what is relevant: public healthcare.

Reproductive rights: India's engagement with contraception dates back to 1952, when it became the first country to launch an official family planning programme but with women bearing a disproportionate share of the required responsibility. FILE PHOTO

On sterilisation

Female sterilisation remains the dominant contraceptive method in India, accounting for 36.5% of all contraceptive use nationally and is as high as 38.1% in rural areas. Male sterilisation, by contrast, stands at a negligible 0.5%. This gargantuan skew is the consequence of policy design and gender disempowerment.

The NFHS-6 data also shows a modest decline in female sterilisation from 37.9% (NFHS-5) to 36.5%, alongside a sharp rise in traditional method use (from 10.3% to 16.4%) and a slight decline in modern reversible methods (from 56.4% to 52.7%). Read together, these trends suggest that some women are able to step back from sterilisation – but into informal, less medically supported methods rather than towards reversible scientific methods that would authentically enhance reproductive autonomy.

Female sterilisation remains the dominant contraceptive method, accounting for 36.5% of all contraceptive use nationally and is as high as 38.1% in rural areas

Female sterilisation in India's public health system has a troubled history. The mass sterilisation camps epitomised by the Bilaspur tragedy of 2014, in which 13 women died following a single-day mass sterilisation drive are not aberrations but logical consequences of a system that treats women's reproductive capacity as a population management problem to be solved at scale, cheaply and rapidly. Tubectomies and sterilisation surgeries done in rural government hospitals can sometimes be risky – these facilities are overcrowded, staff are not always well-trained, and the focus is on performing as many procedures as possible rather than on scientific patient care. Women who go through these surgeries can get infections, complications from maladministered anaesthesia or failed procedures resulting in persistent morbidity. Most women are compelled to access what they can afford, namely underfunded public healthcare. Most women undergoing such procedures are not empowered to make an informed choice due to their being at the short end of the stick of the social reproduction and social production processes.

Towards reproductive agency

An analysis of the NFHS-6 data demonstrates that contraception in India is no longer merely about limiting births, but about enabling reproductive agency by overcoming the underlying unequal social architecture.

Three policy imperatives follow from such an analysis. First, early marriage must be addressed as a reproductive health crisis by retaining girls in school, fully implementing the Prohibition of Child Marriage Act and investing in rural secondary education for girls. Second, policy must pivot from unsustainable permanent methods of contraception toward increasing access for reversible scientific contraception through augmenting community based public healthcare. Third, the diminishing of the gender skew in contraception must become a programmatic priority of policy. Sustainable demographic transition presupposes reproductive agency of women.

का एक महत्वपूर्ण और आवश्यक घटक है, फिर भी आय, शिक्षा, गतिशीलता और राजनीतिक प्रतिनिधित्व के मापदण्डों का विश्लेषण करते समय इसे प्रायः ध्यान में नहीं रखा जाता है।

- Reproductive agency means that a woman can make decisions regarding marriage, pregnancy, childbirth, and contraception without coercion or social pressure.
- India's **demographic transition**, as reflected in the latest round of the **National Family Health Survey (NFHS-6, 2023–24)**, besides revealing incremental changes in health indicators, also signals a structural shift in the domain of **reproductive agency**.
  भारत का **जनसांख्यिकीय संक्रमण**, जैसा कि **राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण (NFHS-6, 2023–24)** के नवीनतम दौर में परिलक्षित होता है, स्वास्थ्य संकेतकों में क्रमिक परिवर्तनों को दर्शाने के साथ-साथ **प्रजनन स्वायत्तता** के क्षेत्र में एक संरचनात्मक परिवर्तन का भी संकेत देता है।

History of contraceptive use
गर्भनिरोधक उपयोग का इतिहास

- India's engagement with **contraception** dates back to 1952, when it became the first country to launch an official **family planning programme** but with women bearing a disproportionate share of the required responsibility.
  भारत में **गर्भनिरोध** के साथ जुड़ाव 1952 से प्रारम्भ होता है, जब वह आधिकारिक **परिवार नियोजन कार्यक्रम** शुरू करने वाला पहला देश बना, किन्तु इसकी अपेक्षित जिम्मेदारी का असंगत रूप से बड़ा हिस्सा महिलाओं को वहन करना पड़ा।
- A striking finding in the **NFHS-6** data is the persistence of **early marriage**.
  NFHS-6 के आँकड़ों में एक उल्लेखनीय निष्कर्ष **बाल विवाह** की निरंतरता है।
- Nationally, 20.1% of women aged 20–24 was married before the age of 18, with the rural figure reaching 23.3% — unchanged from NFHS-5.
  राष्ट्रीय स्तर पर, 20–24 वर्ष आयु वर्ग की 20.1% महिलाएँ 18 वर्ष की आयु से पहले विवाह कर चुकी थीं, जबकि ग्रामीण क्षेत्रों में यह आँकड़ा 23.3% तक पहुँच गया — जो NFHS-5 की तुलना में अपरिवर्तित है।
- Among men, 15.9% aged 25–29 were married before 21.
  पुरुषों में, 25–29 वर्ष आयु वर्ग के 15.9% व्यक्तियों का विवाह 21 वर्ष की आयु से पहले हो गया था।
- The data bears this out: 6.7% of women aged 15–19 were already mothers or pregnant at the time of the survey rising to 7.9% in rural areas.
  आँकड़े इसकी पुष्टि करते हैं: 15–19 वर्ष आयु वर्ग की 6.7% महिलाएँ सर्वेक्षण के समय या तो पहले से माताएँ थीं अथवा गर्भवती थीं, जबकि ग्रामीण क्षेत्रों में यह आँकड़ा बढ़कर 7.9% हो गया था।
- Girls married young are less likely to know their **contraceptive options**, less likely to be able to negotiate their use, and more likely to undergo less spaced-out pregnancies.
  कम आयु में विवाह करने वाली लड़कियाँ अपने **गर्भनिरोधक विकल्पों** के बारे में कम जानती हैं, उनके उपयोग पर निर्णय लेने में कम सक्षम होती हैं, और उनके गर्भधारण के बीच पर्याप्त अंतर होने की संभावना भी कम होती है।
- The cumulative physiological burden of **anaemia**, **obstetric complications** and **maternal mortality** is concentrated precisely in this demographic.
  एनीमिया, **प्रसूति संबंधी जटिलताओं** और **मातृ मृत्यु दर** का संचयी शारीरिक भार मुख्य रूप से इसी जनसमूह पर केंद्रित होता है।
- Urban women tend to marry later, complete more schooling, and are exposed to a broader suite of **contraceptive options**.
  शहरी महिलाएँ सामान्यतः देर से विवाह करती हैं, अधिक शिक्षा प्राप्त करती हैं और **गर्भनिरोधक विकल्पों** की व्यापक श्रृंखला तक उनकी पहुँच होती है।

On sterilisation
नसबंदी पर

- **Female sterilisation** remains the dominant contraceptive method in India, accounting for 36.5% of all contraceptive use nationally and is as high as 38.1% in rural areas.
  महिला नसबंदी भारत में अब भी प्रमुख गर्भनिरोधक उपाय बनी हुई है, जो राष्ट्रीय स्तर पर कुल गर्भनिरोधक उपयोग का 36.5% है तथा ग्रामीण क्षेत्रों में यह 38.1% तक पहुँच जाती है।
- **Male sterilisation**, by contrast, stands at a negligible 0.5%.
  इसके विपरीत, **पुरुष नसबंदी** का स्तर मात्र 0.5% है।
- This gargantuan skew is the consequence of **policy design** and **gender disempowerment**.
  यह अत्यधिक असंतुलन **नीतिगत संरचना** और **लैंगिक असशक्तिकरण** का परिणाम है।
- The **NFHS-6** data also shows a modest decline in female sterilisation from 37.9% (NFHS-5) to 36.5%, alongside a sharp rise in **traditional method** use (from 10.3% to 16.4%) and a slight decline in **modern reversible methods** (from 56.4% to 52.7%).
  NFHS-6 के आँकड़े यह भी दर्शाते हैं कि महिला नसबंदी 37.9% (NFHS-5) से घटकर 36.5% हुई है, जबकि **पारंपरिक विधियों** के उपयोग में तीव्र वृद्धि (10.3% से 16.4%) और **आधुनिक प्रतिवर्ती विधियों** में हल्की गिरावट (56.4% से 52.7%) दर्ज की गई है।
- The mass sterilisation camps epitomised by the **Bilaspur tragedy of 2014**, in which 13 women died following a single-day mass sterilisation drive are not aberrations but logical consequences of a system that treats women's reproductive capacity as a **population management** problem to be solved at scale, cheaply and rapidly.
  2014 की बिलासपुर त्रासदी, जिसमें एक दिवसीय सामूहिक नसबंदी अभियान के बाद 13 महिलाओं की मृत्यु हो गई थी, कोई अपवाद नहीं थी, बल्कि उस व्यवस्था का तार्किक परिणाम थी जो महिलाओं की प्रजनन क्षमता को बड़े पैमाने पर, सस्ते और त्वरित तरीके से हल किए जाने वाले **जनसंख्या प्रबंधन** के प्रश्न के रूप में देखती है।
- **Tubectomies and sterilisation surgeries** done in rural government hospitals can sometimes be risky — these facilities are overcrowded, staff are not always well-trained, and the focus is on performing as many procedures as possible rather than on scientific **patient care**.
  ग्रामीण सरकारी अस्पतालों में की जाने वाली ट्यूबेक्टॉमी और नसबंदी शल्यक्रियाएँ कभी-कभी जोखिमपूर्ण हो सकती हैं — ये संस्थान अत्यधिक भीड़भाड़ वाले होते हैं, कर्मचारी सदैव पर्याप्त रूप से प्रशिक्षित नहीं होते, और ध्यान वैज्ञानिक **रोगी देखभाल** के बजाय अधिक से अधिक प्रक्रियाएँ करने पर केंद्रित रहता है।
- Women who go through these surgeries can get infections, complications from maladministered anaesthesia or failed procedures resulting in persistent **morbidity**.
  इन शल्यक्रियाओं से गुजरने वाली महिलाओं को संक्रमण, गलत तरीके से दिए गए एनेस्थीसिया से उत्पन्न जटिलताएँ अथवा असफल प्रक्रियाओं के कारण दीर्घकालिक **रोगग्रस्तता** का सामना करना पड़ सकता है।
- Most women undergoing such procedures are not empowered to make an informed choice due to their being at the short end of the stick of the **social reproduction** and **social production** processes.
  ऐसी प्रक्रियाओं से गुजरने वाली अधिकांश महिलाएँ **सामाजिक पुनरुत्पादन** और **सामाजिक उत्पादन** की प्रक्रियाओं में प्रतिकूल स्थिति में होने के कारण सूचित निर्णय लेने में सक्षम नहीं होतीं।

Towards reproductive agency
प्रजनन स्वायत्तता की ओर

- An analysis of the **NFHS-6** data demonstrates that contraception in India is no longer merely about limiting births, but about enabling **reproductive agency** by overcoming the underlying unequal social architecture.
  NFHS-6 के आँकड़ों का विश्लेषण दर्शाता है कि भारत में गर्भनिरोध अब केवल जन्मों को सीमित करने का विषय नहीं रह गया है, बल्कि असमान सामाजिक संरचना को दूर करके **प्रजनन स्वायत्तता** को सक्षम बनाने का माध्यम बन गया है।
- First, **early marriage** must be addressed as a reproductive health crisis by retaining girls in school, fully implementing the **Prohibition of Child Marriage Act** and investing in rural secondary education for girls.

प्रथम, **बाल विवाह** को प्रजनन स्वास्थ्य संकट के रूप में संबोधित किया जाना चाहिए, जिसके लिए लड़कियों को विद्यालय में बनाए रखना, **बाल विवाह प्रतिषेध अधिनियम** का पूर्ण क्रियान्वयन करना तथा ग्रामीण क्षेत्रों में लड़कियों की माध्यमिक शिक्षा में निवेश करना आवश्यक है।

- Second, policy must pivot from unsustainable **permanent methods of contraception** toward increasing access for **reversible scientific contraception** through augmenting community based public healthcare.
  द्वितीय, नीति को अस्थिर **स्थायी गर्भनिरोधक विधियों** से हटकर समुदाय-आधारित सार्वजनिक स्वास्थ्य सेवाओं को सुदृढ़ करते हुए **प्रतिवर्ती वैज्ञानिक गर्भनिरोधक साधनों** की पहुँच बढ़ाने पर केंद्रित होना चाहिए।
- Third, the diminishing of the **gender skew** in contraception must become a programmatic priority of policy.
  तृतीय, गर्भनिरोध में विद्यमान **लैंगिक असंतुलन** को कम करना नीति की एक कार्यक्रमगत प्राथमिकता बनना चाहिए।

Ingredient for sunscreen

Reuters

The U.S. Food and Drug Administration on Tuesday said it added bemotrizinol to its list of permitted active ingredients, marking the first new UV (Ultraviolet) filter to be cleared for over-the-counter sunscreens since the late 1990s.

Bemotrizinol helps protect against both ultraviolet A and B rays and has low levels of absorption through the skin into the body, the U.S. Food and Drug Administration said.

Misconceptions continue to deter men from getting vasectomies, say experts

GS III: S&T

Athira Elssa Johnson

A study published in the journal BMJ Sexual & Reproductive Health found that fears about loss of libido and physical weakness, social stigma, poor awareness and health system barriers continue to impede acceptance of vasectomy among married men in India

According to the findings of the sixth National Family Health Survey (NFHS-6), India's Total Fertility Rate (TFR) has remained at 2.0 children per woman, below the replacement level of 2.1. The survey also points to improved access to family planning services, with the contraceptive prevalence rate increasing from 66.7% in NFHS-5 to 69.1%. The burden of contraception, however, continues to remain shouldered largely by women.

Sterilisation, accounts for a significant chunk of contraception methods used in India. As per NFHS-6, male sterilisation (vasectomy) remains at a dismal 0.5%, barely a change from 0.3% in NFHS-5.

Experts say misconceptions surrounding vasectomy continue to discourage men from taking a more active role in family planning, placing a disproportionate share of the burden on women. A study published in the journal *BMJ Sexual & Reproductive Health* found that fears about loss of libido and physical weakness, social stigma, poor awareness and health system barriers continue to impede acceptance of vasectomy among married men in India, with uptake declining from 3.31% in the early 1990s.

Experts note that vasectomy is a simple, safe and highly effective long term contraceptive method that does not affect sexual performance or libido, contrary to these widespread myths. One of the most persistent misconceptions surrounding vasectomy is that it diminishes sexual function. However, there is no evidence to support these claims.

N. Ragavan, senior consultant-urologist, Apollo Hospitals, Chennai, said the belief is cultural and has no clinical basis. "Fertility should not be tied to misconceptions that equate a man's reproductive capacity with his masculinity as though fewer sperm somehow mean less manhood," he said, adding that vasectomy does not affect testosterone levels or sexual drive. The procedure merely involves blocking the sperm-carrying tube and does not interfere with blood supply to the testes or their normal function. It has nothing to do with libido or erectile function, he said.

Muthu Veeramani, director and senior consultant, urology, SIMS Hospital, Chennai, added that studies have consistently shown that vasectomy does not affect testosterone production, sexual desire or sexual performance.

Experts also sought to dispel the notion that vasectomy is a major surgery associated with serious health risks.

Vasantharaja Ramasamy, senior consultant, urology, MGM Malar Hospital, Chennai, said the procedure is usually carried out under local anaesthesia. After identifying the vas deferens (sperm duct) through palpation, a small incision is made and the tube is divided and sealed to prevent reconnection. Patients are discharged within a few hours and can resume routine activities after a couple of days, although heavy physical activity should be avoided for about a week.

Myths from social media

Doctors also rejected several myths circulating on social media, including claims that vasectomy causes obesity, cancer, infections or long-term health complications. Dr. Ragavan said there was no indication that the procedure increased the risk of obesity or cancer, and no scientific evidence to support such claims.

Despite being simpler and less invasive than female sterilisation, vasectomy continues to have low acceptance, especially in India. One major concern among men is that vasectomy is irreversible and could lead to regrets later in life. Experts emphasise that recanalisation procedures performed within three years of vasectomy have success rates exceeding 90%. Additionally, advances in microscopic surgery have improved outcomes when reversals are undertaken after proper counselling.

Greater male participation in reproductive health, doctors noted, would make reproductive healthcare more equitable.

12J6. Misconceptions continue to deter men from getting vasectomies, say experts

विशेषज्ञों का कहना है कि भ्रांतियाँ पुरुषों को नसबंदी करवाने से अब भी हतोत्साहित करती हैं

- According to the findings of the sixth **National Family Health Survey (NFHS-6)**, India's **Total Fertility Rate (TFR)** has remained at 2.0 children per woman, below the replacement level of 2.1.
  छठे **राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण (NFHS-6)** के निष्कर्षों के अनुसार, भारत की **कुल प्रजनन दर (TFR)** प्रति महिला 2.0 बच्चों पर बनी हुई है, जो 2.1 के प्रतिस्थापन स्तर से कम है।
- The survey also points to improved access to **family planning services**, with the **contraceptive prevalence rate** increasing from 66.7% in NFHS-5 to 69.1%.
  सर्वेक्षण में **परिवार नियोजन सेवाओं** तक बेहतर पहुँच का भी संकेत मिला है, जिसमें **गर्भनिरोधक उपयोग दर** NFHS-5 के 66.7% से बढ़कर 69.1% हो गई है।
- **Sterilisation**, accounts for a significant chunk of contraception methods used in India.
  नसबंदी, भारत में उपयोग किए जाने वाले गर्भनिरोधक उपायों का एक महत्वपूर्ण हिस्सा है।
- As per NFHS-6, **male sterilisation (vasectomy)** remains at a dismal 0.5%, barely a change from 0.3% in NFHS-5.
  NFHS-6 के अनुसार, **पुरुष नसबंदी (वेसेक्टॉमी)** की दर मात्र 0.5% है, जो NFHS-5 के 0.3% से बहुत कम वृद्धि दर्शाती है।
- A study published in the journal **BMJ Sexual & Reproductive Health** found that fears about loss of **libido** and physical weakness, social stigma, poor awareness and health system barriers continue to impede acceptance of vasectomy among married men in India, with uptake declining from 3.31% in the early 1990s.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

पत्रिका **BMJ Sexual & Reproductive Health** में प्रकाशित एक अध्ययन में पाया गया कि **कामेच्छा** में कमी, शारीरिक कमजोरी, सामाजिक कलंक, जागरूकता की कमी तथा स्वास्थ्य व्यवस्था की बाधाओं से जुड़ी आशंकाएँ भारत के विवाहित पुरुषों में वेसेक्टॉमी की स्वीकृति को अब भी बाधित करती हैं, और इसका उपयोग 1990 के दशक की शुरुआत में 3.31% से घट गया है।

- Experts note that vasectomy is a simple, safe and highly effective **long term contraceptive method** that does not affect sexual performance or libido, contrary to these widespread myths.
  विशेषज्ञों का कहना है कि वेसेक्टॉमी एक सरल, सुरक्षित और अत्यधिक प्रभावी **दीर्घकालिक गर्भनिरोधक विधि** है, जो यौन क्षमता या कामेच्छा को प्रभावित नहीं करती, जबकि इसके विपरीत कई भ्रांतियाँ प्रचलित हैं।
- One of the most persistent misconceptions surrounding vasectomy is that it diminishes **sexual function**.
  वेसेक्टॉमी से जुड़ी सबसे प्रचलित भ्रांतियों में से एक यह है कि यह **यौन कार्यक्षमता** को कम कर देती है।
- "Fertility should not be tied to misconceptions that equate a man's reproductive capacity with his masculinity as though fewer sperm somehow mean less manhood," he said, adding that vasectomy does not affect **testosterone levels** or **sexual drive**.
  उन्होंने कहा, "प्रजनन क्षमता को उन भ्रांतियों से नहीं जोड़ा जाना चाहिए जो पुरुष की प्रजनन क्षमता को उसकी पुरुषत्व से जोड़ती हैं, मानो कम शुक्राणु होने का अर्थ कम पुरुषत्व हो।" उन्होंने यह भी कहा कि वेसेक्टॉमी **टेस्टोस्टेरोन स्तर** या **यौन इच्छा** को प्रभावित नहीं करती।
- The procedure merely involves blocking the **sperm-carrying tube** and does not interfere with blood supply to the testes or their normal function.
  इस प्रक्रिया में केवल **शुक्राणु ले जाने वाली नलिका** को अवरुद्ध किया जाता है और यह वृषणों की रक्त आपूर्ति या उनकी सामान्य कार्यप्रणाली में कोई हस्तक्षेप नहीं करती।
- It has nothing to do with libido or erectile function, he said.
  उन्होंने कहा कि इसका कामेच्छा या स्तंभन क्षमता से कोई संबंध नहीं है।
- Muthu Veeramani, director and senior consultant, urology, SIMS Hospital, Chennai, added that studies have consistently shown that vasectomy does not affect testosterone production, sexual desire or sexual performance.
  चेन्नई के SIMS अस्पताल के निदेशक एवं वरिष्ठ मूत्ररोग विशेषज्ञ **मुथु वीरमणि** ने कहा कि अध्ययनों ने लगातार यह सिद्ध किया है कि वेसेक्टॉमी टेस्टोस्टेरोन उत्पादन, यौन इच्छा या यौन प्रदर्शन को प्रभावित नहीं करती।
- **Experts also sought to dispel the notion that vasectomy is a major surgery associated with serious health risks.**
  विशेषज्ञों ने इस धारणा को भी खारिज किया कि वेसेक्टॉमी एक बड़ी शल्यक्रिया है जो गंभीर स्वास्थ्य जोखिमों से जुड़ी होती है।
- Vasantharaja Ramasamy, senior consultant, urology, MGM Malar Hospital, Chennai, said the procedure is usually carried out under **local anaesthesia**.
  चेन्नई के MGM मलार अस्पताल के वरिष्ठ मूत्ररोग विशेषज्ञ **वसंथराजा रामासामी** ने कहा कि यह प्रक्रिया सामान्यतः **स्थानीय संवेदनाहारी** के तहत की जाती है।
- After identifying the **vas deferens (sperm duct)** through palpation, a small incision is made and the tube is divided and sealed to prevent reconnection.
  स्पर्श परीक्षण द्वारा **वास डिफरेंस (शुक्रवाहिनी)** की पहचान करने के बाद एक छोटा चीरा लगाया जाता है और नलिका को काटकर सील कर दिया जाता है ताकि वह दोबारा न जुड़ सके।
- Patients are discharged within a few hours and can resume routine activities after a couple of days, although heavy physical activity should be avoided for about a week.
  रोगियों को कुछ घंटों के भीतर छुट्टी दे दी जाती है और वे कुछ दिनों बाद सामान्य गतिविधियाँ शुरू कर सकते हैं, हालांकि लगभग एक सप्ताह तक भारी शारीरिक कार्य से बचना चाहिए।

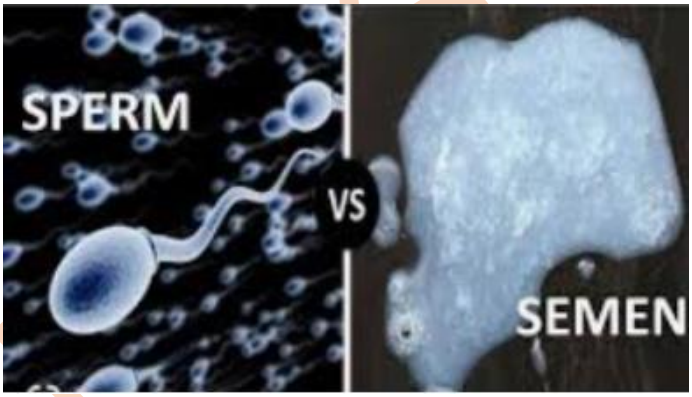
Myths from social media
सोशल मीडिया से फैलने वाली भ्रांतियाँ

- Doctors also rejected several myths circulating on social media, including claims that vasectomy causes **obesity**, **cancer**, infections or long-term health complications.
  चिकित्सकों ने सोशल मीडिया पर फैल रही कई भ्रांतियों को भी खारिज किया, जिनमें यह दावा शामिल है कि वेसेक्टॉमी से **मोटापा**, **कैंसर**, संक्रमण या दीर्घकालिक स्वास्थ्य जटिलताएँ होती हैं।
- Despite being simpler and less invasive than **female sterilisation**, vasectomy continues to have low acceptance, especially in India.
  महिला नसबंदी की तुलना में अधिक सरल और कम जटिल होने के बावजूद, वेसेक्टॉमी की स्वीकृति विशेषकर भारत में अभी भी कम है।
- One major concern among men is that vasectomy is irreversible and could lead to regrets later in life.
  पुरुषों के बीच एक प्रमुख चिंता यह है कि वेसेक्टॉमी अपरिवर्तनीय है और बाद में जीवन में पछतावे का कारण बन सकती है।



- Experts emphasise that **recanalisation procedures** performed within three years of vasectomy have success rates exceeding 90%.
  विशेषज्ञों ने जोर देकर कहा कि वेसेक्टॉमी के तीन वर्षों के भीतर की जाने वाली **रिकैनलाइज़ेशन प्रक्रियाओं** की सफलता दर 90% से अधिक होती है।
- Additionally, advances in **microscopic surgery** have improved outcomes when reversals are undertaken after proper counselling.
  इसके अतिरिक्त, **सूक्ष्म शल्यचिकित्सा** में हुई प्रगति ने उचित परामर्श के बाद की जाने वाली पुनर्स्थापन प्रक्रियाओं के परिणामों में सुधार किया है।
- Greater male participation in **reproductive health**, doctors noted, would make reproductive healthcare more equitable.
  चिकित्सकों ने कहा कि **प्रजनन स्वास्थ्य** में पुरुषों की अधिक भागीदारी प्रजनन स्वास्थ्य सेवाओं को अधिक न्यायसंगत और संतुलित बनाएगी।

The Darwin of Botany
GS III: S&T

London, June 11: Sir Jagdish Chandra Bose was entertained at a luncheon to-day by the British Indian Union. Lord Lee of Fareham, who presided, paid a tribute to Sir J.C. Bose's work in the cause of science and humanity. He stated that he understood that this "Darwin of Botany" hoped to make it possible to substitute plants for animals for vivisection.

Sir Jagdish emphasising the importance of science, said for the economic welfare of a vast continent like India, there must be two complementary activities, industry and agriculture, both depending on science.

Centre lifts excise duty on higher ethanol-blend petrol

Union government exempts E22, E25, E27, and E30 variants from central excise duty; clarifies that the latest reduction does not indicate anything on rolling out higher blends

GS III: Environment

Saptaparno Ghosh
NEW DELHI

Aiming to popularise the uptake of biofuels in the country, the Union government late on Wednesday removed central excise duty on petrol blended with higher quantum of ethanol. Following the move, petrol blended with ethanol at 22%, 25%, 27% and 30% would be exempted from central excise duties.

In a statement, the government clarified that the latest reduction did not indicate anything on rolling out higher blends.

"This is a preliminary prerequisite for eventually introducing higher blends, but doesn't convey anything about roll out of higher blends as of now as that will only be done after extensive testing and consultation," the government stated.

In the pipeline: The move is a preliminary prerequisite for eventually introducing higher blends, the government stated. ANI

The government clarified that the exemption specifically concerned the blending activity of ethanol with petrol, which is essentially a manufacturing activity. The objective is to avert the possibility of a dual levy.

"Petrol bears excise duty and ethanol bears GST at their respective stages. When the two are blended, the resulting product may attract excise duty once again on the full quantity," the Centre clarified.

"For ethanol blends of petrol up to 20%, excise duty on the blended petrol was exempted by the Ministry of Finance. The exemption ensures that the duties already paid are not charged a second time on the blend," it added.

The gazette notification comes days after India formally launched the E85 variant of petrol, that is 85% ethanol blended with 15% gasoline, on June 5.

Industry associations across the ethanol blending value chain have welcomed the move to remove excise levy.

C.K. Jain, President of the Grain Ethanol Manufacturers Association (GEMA) said that the move indicated a "strong signal of policy stability and long-term commitment".

"It is essential for attracting fresh investments across the ethanol value chain, including production capacity, logistics, storage, fuel retailing and flex-fuel mobility solutions," he said.

Welcoming the move, Bharati Balaji, Deputy Director General at the All-India Distillers Association (AIDA) added, "We urge the state governments to complement this measure with aligned tax structures so that the full benefit reaches both industry and consumers at the pump."

12J6. Centre lifts excise duty on higher ethanol-blend petrol

केंद्र ने उच्च इथेनॉल-मिश्रित पेट्रोल पर उत्पाद शुल्क हटाया

- **The Union government** exempts **E22, E25, E27, and E30** variants from **central excise duty**.
  केंद्र सरकार ने **E22, E25, E27 और E30** प्रकार के पेट्रोल को **केंद्रीय उत्पाद शुल्क** से मुक्त कर दिया है।
- The government clarifies that the latest reduction does not indicate anything on rolling out **higher blends**.
  सरकार ने स्पष्ट किया कि यह नवीनतम छूट **उच्च इथेनॉल मिश्रणों** को लागू करने का संकेत नहीं देती है।
- Aiming to popularise the uptake of **biofuels** in the country, the **Union government** late on Wednesday removed central excise duty on petrol blended with higher quantum of **ethanol**.
  देश में **जैव ईंधन (बायोफ्यूल)** के उपयोग को लोकप्रिय बनाने के उद्देश्य से **केंद्र सरकार** ने बुधवार देर रात अधिक मात्रा में **इथेनॉल** मिश्रित पेट्रोल पर केंद्रीय उत्पाद शुल्क हटा दिया।
- Following the move, petrol blended with ethanol at **22%, 25%, 27% and 30%** would be exempted from central excise duties.
  इस निर्णय के बाद **22%, 25%, 27% और 30%** इथेनॉल मिश्रित पेट्रोल केंद्रीय उत्पाद शुल्क से मुक्त होगा।
- In a statement, the government clarified that the latest reduction did not indicate anything on rolling out higher blends.
  एक बयान में सरकार ने स्पष्ट किया कि यह नवीनतम छूट उच्च मिश्रणों को लागू करने के संबंध में कोई संकेत नहीं देती है।
- "This is a preliminary prerequisite for eventually introducing higher blends, but doesn't convey anything about roll out of higher blends as of now as that will only be done after extensive testing and consultation," the government stated.
  सरकार ने कहा, "यह भविष्य में उच्च मिश्रणों को लागू करने के लिए एक प्रारंभिक आवश्यक शर्त है, लेकिन वर्तमान में इनके लागू होने के बारे में कुछ नहीं बताती, क्योंकि ऐसा केवल व्यापक परीक्षण और परामर्श के बाद ही किया जाएगा।"
- The government clarified that the exemption specifically concerned the blending activity of **ethanol with petrol**, which is essentially a manufacturing activity.
  सरकार ने स्पष्ट किया कि यह छूट विशेष रूप से **पेट्रोल में इथेनॉल मिलाने** की प्रक्रिया से संबंधित है, जो मूलतः एक विनिर्माण गतिविधि है।
- The objective is to avert the possibility of a **dual levy**.
  इसका उद्देश्य **दोहरी कराधान (ड्यूल लेवी)** की संभावना को रोकना है।
- "Petrol bears **excise duty** and ethanol bears **GST** at their respective stages."
  "पेट्रोल पर उसके स्तर पर **उत्पाद शुल्क** लगता है और इथेनॉल पर उसके स्तर पर **जीएसटी** लगाया जाता है।"
- "When the two are blended, the resulting product may attract excise duty once again on the full quantity," the Centre clarified.
  केंद्र ने स्पष्ट किया कि जब दोनों को मिलाया जाता है, तो परिणामी उत्पाद पर पूरी मात्रा के आधार पर पुनः उत्पाद शुल्क लग सकता है।
- "For ethanol blends of petrol up to **20%**, excise duty on the blended petrol was exempted by the **Ministry of Finance**."
  "पेट्रोल में **20% तक इथेनॉल मिश्रण** के लिए मिश्रित पेट्रोल पर उत्पाद शुल्क से छूट **वित्त मंत्रालय** द्वारा पहले ही दी जा चुकी है।"
- "The exemption ensures that the duties already paid are not charged a second time on the blend," it added.
  इस छूट से यह सुनिश्चित किया जाता है कि पहले से चुकाए गए करों को मिश्रित उत्पाद पर दोबारा न लगाया जाए।
- The **gazette notification** comes days after India formally launched the **E85** variant of petrol, that is **85% ethanol** blended with **15% gasoline**, on **June 5**.
  यह **राजपत्र अधिसूचना** भारत द्वारा **5 जून** को औपचारिक रूप से **E85** पेट्रोल (जिसमें **85% इथेनॉल** और **15% गैसोलीन** होता है) लॉन्च करने के कुछ दिनों बाद जारी की गई है।

- Industry associations across the ethanol blending value chain have welcomed the move to remove excise levy.
  इथेनॉल मिश्रण मूल्य श्रृंखला से जुड़े उद्योग संगठनों ने उत्पाद शुल्क हटाने के इस कदम का स्वागत किया है।
- **C.K. Jain**, President of the **Grain Ethanol Manufacturers Association (GEMA)**, said that the move indicated a "strong signal of policy stability and long-term commitment".
  ग्रेन इथेनॉल मैन्युफैक्चरर्स एसोसिएशन (GEMA) के अध्यक्ष **सी.के. जैन** ने कहा कि यह कदम "नीतिगत स्थिरता और दीर्घकालिक प्रतिबद्धता का मजबूत संकेत" है।
- "It is essential for attracting fresh investments across the ethanol value chain, including production capacity, logistics, storage, fuel retailing and flex-fuel mobility solutions," he said.
  उन्होंने कहा कि यह उत्पादन क्षमता, लॉजिस्टिक्स, भंडारण, ईंधन खुदरा बिक्री और फ्लेक्स-फ्यूल मोबिलिटी समाधानों सहित पूरी इथेनॉल मूल्य श्रृंखला में नए निवेश आकर्षित करने के लिए आवश्यक है।
- Welcoming the move, **Bharati Balaji**, Deputy Director General at the **All-India Distillers Association (AIDA)**, added, "We urge the state governments to complement this measure with aligned tax structures so that the full benefit reaches both industry and consumers at the pump."
  इस निर्णय का स्वागत करते हुए **ऑल-इंडिया डिस्टिलर्स एसोसिएशन (AIDA)** की उप महानिदेशक **भारती बालाजी** ने कहा, "हम राज्य सरकारों से आग्रह करते हैं कि वे समन्वित कर संरचनाओं के माध्यम से इस कदम का समर्थन करें, ताकि इसका पूरा लाभ उद्योग और उपभोक्ताओं दोनों तक पेट्रोल पंप स्तर पर पहुँच सके।"

'No AFSPA in most of Northeast from 2027'

GS III: Internal Security

Press Trust of India

NEW DELHI

Union Home Minister Amit Shah on Thursday said the Armed Forces (Special Powers) Act, or AFSPA, will be withdrawn from the entire Northeast next year, barring one or two States.

Speaking after signing a tripartite Memorandum of Understanding (MoU) between the Centre, Assam, and Nagaland on mineral and oil operations in the disputed Assam-Nagaland boundary areas, Mr. Shah said fewer areas being covered under AFSPA indicate peace in the region.

"I am confident that barring one or two States, we will withdraw AFSPA from the entire Northeast next year," he said.

The Home Minister termed the MoU a "historic moment" and said it removed the last hurdle in Prime Minister Narendra Modi's vision of a developed Northeast.

Bharathiraja, ace film director, passes away in Chennai at 84

PCS

B. Kolappan
CHENNAI

Bharathiraja

Renowned Tamil film director Bharathiraja, who had been ailing for a while, passed away in Chennai on Wednesday. He was 84.

Celebrated for shifting Tamil cinema from studio-bound film-making to authentic rural landscapes and for his iconic opening line, "*Yen Iniya Tamil Makkale*", delivered in his distinctive voice, he was a transformative force in not only Tamil but also Indian cinema.

A towering personality in the film industry, fondly called *Iyakkunar Imayam* (pinnacle among directors), Bharathiraja won six National Film Awards, four Filmfare Awards (South), six Tamil Nadu State Film Awards, and a Nandi Award. He was instrumental in introducing several new actors in Tamil cinema. In a characteristic move, he rechristened many actors with names beginning with "R", gifting the industry with Radikaa, Revathi, Radha, Ranjitha, and Rekha.

Bharathiraja shared a close association with composer Ilaiyaraaja and his brother Gangai Amaran even before they had made their mark in the film world. Ilaiyaraaja went on to compose music for many of Bharathiraja's films, delivering a string of unforgettable hits before the two eventually parted ways.

His debut film, *16 Vayathinile*, starring Sridevi, Kamal Haasan, and Rajinikanth, broke new ground in Tamil cinema. It portrayed rural life with striking realism, capturing villagers in all their complexity. The music, composed by Ilaiyaraaja, was a runaway success. *Senthoora Poove*, penned by Gangai Amaran, earned singer S. Janaki a national award.

His second film, *Kizhakke Pogum Rail*, dealt with powerful social themes, portraying caste oppression and the secondary treatment of women, without proclaiming itself to be a 'social film'. This subtle yet compelling approach to storytelling became a defining feature of Bharathiraja's cinema. Radikaa was introduced as a heroine in this film.

Sigappu Rojakkal explored what was then an unthinkable theme – a psychopathic serial killer driven by extreme misogyny. Director K. Bhagyaraj, an associate of Bharathiraja, appeared in one scene, while director Manivannan was also among his associates, who later emerged as a prominent filmmaker.

Bharathiraja also acted in some of his films.

Bharathiraja, ace film director, passes away in Chennai at 84

प्रख्यात फिल्म निर्देशक भारतीराजा का चेन्नई में 84 वर्ष की आयु में निधन

Renowned Tamil film director Bharathiraja, who had been ailing for a while, passed away in Chennai on Wednesday. He was 84.
प्रख्यात तमिल फिल्म निर्देशक भारतीराजा, जो कुछ समय से अस्वस्थ चल रहे थे, का बुधवार को चेन्नई में निधन हो गया। वह 84 वर्ष के थे।

- A towering personality in the film industry, fondly called **Iyakkunar Imayam** (pinnacle among directors), Bharathiraja won **six National Film Awards, four Filmfare Awards (South), six Tamil Nadu State Film Awards, and a Nandi Award**.

फिल्म उद्योग की एक महान हस्ती, जिन्हें स्नेहपूर्वक **इयक्कुनर इमयम** (निर्देशकों में शिखर) कहा जाता था, **भारतीराजा** ने **छह राष्ट्रीय फिल्म पुरस्कार, चार फिल्मफेयर पुरस्कार (दक्षिण), छह तमिलनाडु राज्य फिल्म पुरस्कार तथा एक नंदी पुरस्कार** प्राप्त किए।

- In a characteristic move, he rechristened many actors with names beginning with **"R"**, gifting the industry with **Radikaa, Revathi, Radha, Ranjitha, and Rekha**.

अपनी विशिष्ट शैली में उन्होंने अनेक कलाकारों के नाम **"R"** अक्षर से प्रारंभ किए, जिससे फिल्म उद्योग को **राधिका, रेवती, राधा, रंजिता और रेखा** जैसे नाम प्राप्त हुए।

- Bharathiraja shared a close association with composer **Ilaiyaraaja** and his brother **Gangai Amaran** even before they had made their mark in the film world.

भारतीराजा का संगीतकार **इलैयाराजा** तथा उनके भाई **गंगई अमरन** के साथ घनिष्ठ संबंध था, तब भी जब उन्होंने फिल्म जगत में अपनी पहचान नहीं बनाई थी।

Bristol, York, and UNSW get nod for campuses in India

The Education Ministry issued three Letters of Approval (LoAs) to three Foreign Higher Education Institutions – University of Bristol, the University of York and the University of New South Wales (UNSW) on Tuesday. The LoAs were handed over by Secretary, Department of Higher Education and Chairman, University Grants Commission, Dr. Vineet Joshi, in the presence of Union Education Minister Dharmendra Pradhan. Mr. Pradhan said that the setting up of campuses in India marked another important step in advancing the internationalisation of education vision of NEP 2020. He said that these institutions will further strengthen quality education, global learning partnerships and research collaboration in India.

Bristol, York, and UNSW get nod for campuses in India

One of the first things visitors arriving in Mexico City for the FIFA football World Cup are likely to see is the wide grin of an axolotl – with the salamander unique to this part of the world splashed in bright purple on murals and subway cars or depicted in sculptures dribbling a soccer ball.

Named after the Nahuatl word for "water monster", the axolotl (pronounced ah-sho-LO-tul) has become the unofficial mascot as the city gears up to host five World Cup matches.

But despite the undoubted cuteness of the almost otherworldly axolotl, the use of its image has drawn backlash from many Mexico City residents, who say the peppy portrayal of the critically endangered animal is being used to distract from both the infrastructure problems of the capital and its lack of conservation efforts.

Scientists trying to count axolotls in the wild say they have not seen a single one in two years. The Mexico City government did not respond to requests for comment.

Along with the constant flow of poorly treated wastewater, fresh dangers to the axolotl include chinampas being turned into soccer pitches and overcrowding due to ecological tourism

Ernesto Velazquez, 19, who runs an axolotl-themed stand selling cuddly toys in Chapultepec park, said he hopes the newly painted images around the city can drive more interest in conservation.

"Some foreigners have asked if you can eat them – well no, they're at risk of extinction," he said. "I hope the World Cup will help people learn more so we take better care of them."

A disappearing habitat

For centuries, *Ambystoma mexicanum*, an amphibian that remains living in water through its life cycle, thrived between chinampas – farms built on human-made floating islands that once sustained the Aztec capital of Tenochtitlan, where modern-day Mexico City lies.

The lake the city was built on was largely drained during colonial rule and its remnants are being used up and contaminated by the growing urban sprawl. But the city's southern Xochimilco district, known for its maze of muddy canals, remains one of the axolotl's last hiding places.

UNAM, Mexico's top university, identified around 36 axolotls per sq. km in Xochimilco in 2014 – a steep drop from the 6,000 per sq. km in 1998. The latest census began in 2024, and, two years later, researchers have yet to find a single axolotl.

Soccer and mass tourism

Luis Zambrano, who heads UNAM's ecological restoration laboratory, said that besides a constant flow of poorly treated wastewater, fresh dangers to the axolotl include chinampas being turned into soccer pitches and the overcrowding of what began as ecological tourism.

Axolotls consume oxygen through their skin, making them highly vulnerable to water pollution.

"Mass tourism has become a terrible problem now with the World Cup," said Zambrano. "The government thinks more is better, but that's not true in these areas of high ecological value."

Even as their habitat disappears, axolotls are widely bred in captivity. Scientists believe their unique skin mucus and ability to regrow limbs and even parts of their brain offer promising leads in cancer research.

For Zambrano, the axolotls' viral popularity has yet to translate into concrete action that could save their home.

World Cup's mascot axolotl nowhere in Mexico City

विश्व कप का शुभंकर एक्सोलोटल मेक्सिको सिटी में कहीं दिखाई नहीं देता

- **One of the first things visitors arriving in Mexico City for the FIFA football World Cup are likely to see is the wide grin of an axolotl — with the salamander unique to this part of the world splashed in bright purple on murals and subway cars or depicted in sculptures dribbling a soccer ball.**

फीफा फुटबॉल विश्व कप के लिए **मेक्सिको सिटी** आने वाले आगंतुकों को सबसे पहले जिन चीज़ों में से एक दिखाई देने की

Sport during a war

The United States is giving the FIFA World Cup a bad name

No showpiece event of a sport has lived up to its billing quite like the FIFA World Cup. The 2026 edition, which kicks off on Thursday, offers proof. With 48 teams and 104 matches, it is the biggest ever. With roughly one in four FIFA member nations qualifying, and six of the seven continents represented, it is the most inclusive yet. From Oceania to North America, it wraps the whole universe. It is also the first time that three countries will be hosting the quadrennial extravaganza – the United States, Canada and Mexico. Top players in Lionel Messi, Cristiano Ronaldo and Neymar have touched down, and so have coaches such as Carlo Ancelotti and Thomas Tuchel. While Messi will aim for a repeat of Argentina's trophy-winning exploits from 2022, Ronaldo will gun for Portugal's first. Neymar, yet to win the coveted Cup, has a very heavy cross to bear, for he comes from the land of Pele and five-time champion Brazil. Kylian Mbappe's France, titlist in 2018 and runner-up in 2022, remains strong. Spain, with the irresistible teenager Lamine Yamal in its ranks, is a favourite, and so are Germany and England to a lesser degree. But four-time winner Italy is absent, for a scarcely believable third straight occasion.

The World Cup also serves a purpose beyond the turf – of shrinking differences, uniting populations and promoting cross-cultural exchanges. In this, the latest instalment has stumbled badly. On Monday, it emerged that the U.S. had denied entry to Somalian referee Omar Artan, the best men's referee from Africa in 2025 and one of the 52 handpicked by governing body FIFA. There are credible reports of journalists being refused visas and squad members being questioned by immigration authorities. In an unfortunate turn, the military stand-off between the U.S. and Iran has forced the West Asian nation to camp in Mexico and travel to Seattle (more than 2,000 km away) and Los Angeles for its group-stage games. It is both a logistical nightmare and an affront to the core sporting tenet of a level-playing field for all teams. Fans are also rankled by the high ticket costs, limited public transport facilities and steep visa fees. That a travel-intensive competition is being held amidst a disruption in global fuel supplies and spike in energy prices is not lost on anyone. These concerns will likely dissipate once Mexico and South Africa set the ball rolling at the majestic Estadio Azteca. However, it is essential to reflect and learn in order to chart a more inclusive future.

Sport during a war
युद्ध के दौरान खेल

- With 48 teams and 104 matches, it is the biggest ever.

48 टीमों और **104 मैचों** के साथ यह अब तक का सबसे बड़ा संस्करण है।

- With roughly one in four FIFA member nations qualifying, and six of the **seven continents** represented, it is the most inclusive yet.

लगभग प्रत्येक चार **फीफा सदस्य देशों** में से एक के क्वालीफाई करने तथा सात में से छह **महाद्वीपों** के प्रतिनिधित्व के साथ यह अब तक का सबसे अधिक **समावेशी** विश्व कप है।

- It is also the first time that three countries will be hosting the quadrennial extravaganza — the United States, Canada and Mexico.

यह पहली बार है जब तीन देश — **संयुक्त राज्य अमेरिका**, **कनाडा** और **मेक्सिको** — इस चार वर्षीय महाआयोजन की मेजबानी कर रहे हैं।

- While Messi will aim for a repeat of Argentina's trophy-winning exploits from 2022, Ronaldo will gun for Portugal's first.

जहाँ **मेसी** वर्ष 2022 में **अर्जेंटीना** की ट्रॉफी-विजेता उपलब्धि को दोहराने का प्रयास करेंगे, वहीं **रोनाल्डो पुर्तगाल** को उसका पहला विश्व कप दिलाने का लक्ष्य रखेंगे।

- **Neymar**, yet to win the coveted Cup, has a very heavy cross to bear, for he comes from the land of Pele and five-time champion Brazil.

अभी तक प्रतिष्ठित **विश्व कप** न जीत पाने वाले **नेमार** पर भारी दबाव है, क्योंकि वे **पेले** और पाँच बार के चैंपियन **ब्राज़ील** की धरती से आते हैं।

- Kylian Mbappe's France, titlist in 2018 and runner-up in 2022, remains strong.

किलियन एम्बाप्पे की **फ्रांस** टीम, जो 2018 की चैंपियन और 2022 की उपविजेता रही थी, अब भी मजबूत बनी हुई है।

- **Spain,** with the irresistible teenager **Lamine Yamal** in its ranks, is a favourite, and so are Germany and England to a lesser degree.

अपनी टीम में प्रतिभाशाली किशोर **लामिन यामाल** को शामिल करने वाली **स्पेन** खिताब की प्रमुख दावेदार है, जबकि **जर्मनी** और **इंग्लैंड** भी कुछ हद तक मजबूत दावेदार हैं।

- The World Cup also serves a purpose beyond the turf — of shrinking differences, uniting populations and promoting cross-cultural exchanges.

विश्व कप केवल खेल मैदान तक सीमित नहीं है; इसका उद्देश्य **भिन्नताओं को कम करना**, लोगों को एकजुट करना और **अंतर-सांस्कृतिक आदान-प्रदान** को

Amnesty accuses Israel of 'ethnic cleansing' of West Bank Bedouins

GS I: Geography

Agence France-Presse
RAMALLAH

Amnesty International has accused Israel of conducting an "ethnic cleansing" campaign against Bedouin and herding communities in the occupied West Bank, saying the measures were designed to accelerate the annexation of the Palestinian territory.

A new report by the rights group found that these rural Palestinian communities are bearing the brunt of Israeli settler violence and forced displacement.

"Israeli authorities are accelerating annexation through a state-driven campaign of ethnic cleansing targeting Palestinian Bedouin and herding communities" of the West Bank, said the report released on Wednesday.

Amnesty said its research showed that 27 Bedouin and herding communities were forcibly displaced between 2023 and 2025 or were at risk of displacement in the West Bank's Area C, which encompasses 60% of the territory and is under Israeli control.

Amnesty accused Prime Minister Benjamin Netanyahu's government of catering to the settler movement's religious nationalist agenda. "It has accelerated settlement expansion and land grabs, increased financial and logistical support to settlements, and it has armed settlers, thereby enabling a brutal state-sanctioned campaign of settler violence," it said.

In an apparent effort to counter arguments by Israeli officials that settler violence is caused by bad actors in that community, Amnesty pointed to "explicit calls by Israeli officials for settlement expansion" and "measures aimed at minimising Palestinian presence in Area C".

The "ethnic cleansing campaign is state-led, and state-sponsored, not driven by rogue settlers or so-called extremist ministers", the report concluded.

Panel recommends targeted splitting of seats for next delimitation exercise

The model proposed by EAC-PM allows a 50% rise for all large States; dataset was based on elections to LS from 2009 to 2024; it results in increasing the size of Lok Sabha to 824 seats and is broadly in line with what the Centre had suggested when it brought the delimitation-related Bills in April

GS II: Polity

Varghese K. George
Abhinay Lakshman
NEW DELHI

The Economic Advisory Council to the Prime Minister (EAC-PM) has recommended multi-factor criteria for a "targeted" splitting of seats during India's next delimitation of Lok Sabha constituencies. The recommendations have been made in a new working paper that goes beyond population distribution and maintains the current proportion of Lok Sabha seats for all large States.

A model worked out by the EAC-PM on such criteria entails Kerala's Lok Sabha seats, for instance, rising from 20 to 30, Tamil Nadu's increasing from 39 to 59, and Uttar Pradesh's from 80 to 120 – broadly in line with what the Union government had suggested in April, when it brought the delimitation-related Bills but failed to pass them in Parliament.

The use of these criteria in the EAC-PM's model further suggested a doubling of the number of LS seats in smaller States and Union Territories such as Mizoram, Puducherry, Sikkim, Ladakh, Andaman and Nicobar Islands, Nagaland, Chandigarh, and Lakshadweep. Out of the existing 543 seats, the EAC-PM's model suggests splitting a total of 170 seats, of which 59 constituencies have been recommended for a two-way split and 111 for a three-way split.

House of over 800 seats

The model results in increasing the size of the Lok Sabha to 824 seats. As per the Council, this will see the southern States' (Telangana, Andhra Pradesh, Kerala, Karnataka, Tamil Nadu) aggregate share of seats in Lok Sabha come to 23.6% compared with the 23.7% currently.

Meanwhile, the share of the six most populous northern States (Rajasthan, Uttar Pradesh, Madhya Pradesh, Gujarat, Bihar, and Maharashtra) will come to 45.2% as per the model, compared with the current 45.6%.

The existing proportion of seats-per-State was frozen based on the population figures of the 1971 Census. The freeze was brought in through a Constitutional Amendment in 1976.

While the EAC-PM notes that the next delimitation exercise is consequential because it would be the first time since then to allow altering per-State seat count, it does not comment on the underlying principle for essentially retaining the existing proportion of States' seats beyond saying that their model has been designed to "respect" the 50% per-State expansion.

Unique formula: The new working paper found a persistent gap in women's turnout in urban areas, even after constituency splits. PTI

The working paper, authored by EAC-PM member Shamika Ravi and Mudit Kapoor of the Indian Statistical Institute, says that its main objective was to address the following questions: "Which constituencies should be split, into how many parts, and on what criterion?"

In doing so, the EAC-PM said that it assembled a dataset on elections to LS seats from 2009 to 2024 to estimate a "statistical relationship" between voter turnout, constituency size, and five compositional features of the constituency (these include urban share, SC share, ST share, linguistic polarisation, and linguistic diversity).

The paper added that this estimated statistical relationship was then used to come up with a "turnout-maximising delimitation plan that splits the largest and most turnout-responsive constituencies into two or three parts".

Splitting constituencies

In the policy brief attached to the working paper, the EAC-PM goes on to recommend a "targeted criterion" for splitting constituencies instead of a "uniform one", adding that the "Delimitation Commission, when it is constituted after the 2027 Census", should "treat the joint demographic and linguistic profile of a candidate constituency, and not its size alone, as the criterion for splitting".

The Council went on to recommend that the Election Commission of India and the Ministry of Statistics should time the next delimitation exercise with a "fresh booth rationalising cycle" and the government should ensure that the "2027 Census tabulations and gender-disaggregated electoral statistics" are released on schedule.

It added that the working paper's model calculations showed that even after the splitting of constituencies, there remained a residual gap in the women's turnout percentages in urban areas, and thus recommended the EC to plan delimitation with measures like women-only polling booths and women-targeted voter roll update drives.

In their working paper-policy brief, Ms. Ravi and Mr. Kapoor further break down their study into six key findings. These deal with the relationship of different factors with constituency-wise voter turnouts. In one of its findings, the paper claimed that the model suggested by them is likely to lead to an overall increase of up to 2.3% in the voter turnout across the country in the next general election. The authors have, however, buttressed this with a caveat, saying that the gain in voter turnout would depend on which statistical specification is chosen, adding that the model was meant to answer what would happen when an electorate is reduced in size while retaining its composition.

The brief also says that between 2009 and 2024, the gap between voter turnouts in the smallest constituency and the largest constituency had halved. "Small constituencies descriptively out-vote large ones in 2024 because they sit on turnout-friendly compositional features (high ST share, low urban share, moderate linguistic polarisation), and not because they are small per se," it concluded.

The EAC-PM added that the demographic and linguistic measures used for the study were based on the 2011 Census and so would need to be updated with 2027 Census figures for a more reliable recalculation.

Panel recommends targeted splitting of seats for next delimitation exercise
पैनल ने अगले परिसीमन अभ्यास के लिए सीटों के लक्षित विभाजन की सिफारिश की

The model proposed by EAC-PM allows a 50% rise for all large States; dataset was based on elections to Lok Sabha from 2009 to 2024; it results in increasing the size of Lok Sabha to 824

seats and is broadly in line with what the Centre had suggested when it brought the delimitation-related Bills in April.

EAC-PM द्वारा प्रस्तावित मॉडल सभी बड़े राज्यों के लिए 50% वृद्धि की अनुमति देता है; यह डेटासेट 2009 से 2024 तक के लोकसभा चुनावों पर आधारित था; इसके परिणामस्वरूप लोकसभा का आकार बढ़कर 824 सीटों का हो जाता है और यह व्यापक रूप से उस प्रस्ताव के अनुरूप है जिसे केंद्र सरकार ने अप्रैल में परिसीमन संबंधी विधेयक लाते समय सुझाया था।

- The **Economic Advisory Council to the Prime Minister (EAC-PM)** has recommended multi-factor criteria for a "targeted" splitting of seats during India's next delimitation of **Lok Sabha constituencies**.
  प्रधानमंत्री की आर्थिक सलाहकार परिषद (EAC-PM) ने भारत में अगले **लोकसभा निर्वाचन क्षेत्रों के परिसीमन** के दौरान सीटों के "लक्षित" विभाजन के लिए बहु-कारक मानदंडों की सिफारिश की है।
- A model worked out by the **EAC-PM** on such criteria entails **Kerala's Lok Sabha seats**, for instance, rising from **20 to 30**, **Tamil Nadu's** increasing from **39 to 59**, and **Uttar Pradesh's** from **80 to 120** — broadly in line with what the Union government had suggested in April, when it brought the delimitation-related Bills but failed to pass them in Parliament.
  ऐसे मानदंडों पर आधारित **EAC-PM** के मॉडल के अनुसार, उदाहरण के लिए **केरल की लोकसभा सीटें 20 से बढ़कर 30**, **तमिलनाडु** की **39 से बढ़कर 59**, तथा **उत्तर प्रदेश** की **80 से बढ़कर 120** हो जाएँगी — जो व्यापक रूप से उस प्रस्ताव के अनुरूप है जिसे केंद्र सरकार ने अप्रैल में परिसीमन संबंधी विधेयक लाते समय सुझाया था, किंतु उन्हें संसद से पारित नहीं करा सकी।
- The use of these criteria in the **EAC-PM's model** further suggested a doubling of the number of **LS seats** in smaller States and Union Territories such as **Mizoram, Puducherry, Sikkim, Ladakh, Andaman and Nicobar Islands, Nagaland, Chandigarh, and Lakshadweep**.
  EAC-PM के मॉडल में इन मानदंडों के उपयोग से यह भी सुझाव दिया गया कि **मिजोरम, पुडुचेरी, सिक्किम, लद्दाख, अंडमान एवं निकोबार द्वीपसमूह, नागालैंड, चंडीगढ़ और लक्षद्वीप** जैसे छोटे राज्यों और केंद्रशासित प्रदेशों में **लोकसभा सीटों** की संख्या दोगुनी की जाए।
- The model results in increasing the size of the **Lok Sabha** to **824 seats**.
  यह मॉडल **लोकसभा** का आकार बढ़ाकर **824 सीटों** तक पहुँचाने का परिणाम देता है।
- As per the Council, this will see the southern States' (**Telangana, Andhra Pradesh, Kerala, Karnataka, Tamil Nadu**) aggregate share of seats in **Lok Sabha** come to **23.6%** compared with the **23.7%** currently.
  परिषद के अनुसार, इससे दक्षिणी राज्यों (**तेलंगाना, आंध्र प्रदेश, केरल, कर्नाटक और तमिलनाडु**) की **लोकसभा** में कुल सीट हिस्सेदारी वर्तमान **23.7%** की तुलना में **23.6%** हो जाएगी।
- Meanwhile, the share of the six most populous northern States (**Rajasthan, Uttar Pradesh, Madhya Pradesh, Gujarat, Bihar, and Maharashtra**) will come to **45.2%** as per the model, compared with the current **45.6%**.
  वहीं, मॉडल के अनुसार छह सर्वाधिक जनसंख्या वाले उत्तरी राज्यों (**राजस्थान, उत्तर प्रदेश, मध्य प्रदेश, गुजरात, बिहार और महाराष्ट्र**) की हिस्सेदारी वर्तमान **45.6%** की तुलना में **45.2%** होगी।
- The existing proportion of seats-per-State was frozen based on the population figures of the **1971 Census**.
  राज्यों के अनुसार सीटों का वर्तमान अनुपात **1971 की जनगणना** के जनसंख्या आँकड़ों के आधार पर स्थिर किया गया था।
- The freeze was brought in through a **Constitutional Amendment** in **1976**.
  यह स्थिरता **1976** में एक **संवैधानिक संशोधन** के माध्यम से लागू की गई थी।

SC invokes Article 142 to quash POCSO conviction

GS II: Polity

Aaratrika Bhaumik
NEW DELHI

The Supreme Court used its powers under Article 142 to overturn a POCSO conviction, noting the victim later married the man as an adult.

The court observed that the couple should now be allowed to live "peacefully in society as spouses".

Article 142 enables the court to ensure "complete justice" when existing laws fall short. They had fallen in love while she was still a minor.

As per the case records, she lodged a criminal complaint after he refused to marry her. He was sentenced to 10 years' imprisonment and fined for having a physical relationship with a minor.

SC invokes Article 142 to quash POCSO conviction

POCSO दोषसिद्धि को निरस्त करने हेतु उच्चतम न्यायालय ने अनुच्छेद 142 का प्रयोग किया

The Supreme Court used its powers under Article 142 to overturn a POCSO conviction, noting the victim later married the man as an adult.

उच्चतम न्यायालय ने अनुच्छेद 142 के अंतर्गत अपनी शक्तियों का उपयोग करते हुए एक POCSO दोषसिद्धि को निरस्त कर दिया और यह ध्यान में रखा कि पीड़िता ने बाद में वयस्क होने पर उसी व्यक्ति से विवाह कर लिया था।

- **Article 142** enables the court to ensure "**complete justice**" when existing laws fall short. **अनुच्छेद 142** न्यायालय को उस स्थिति में "**पूर्ण न्याय**" सुनिश्चित करने का अधिकार प्रदान करता है, जब प्रचलित कानून पर्याप्त न हों।
- As per the case records, she lodged a **criminal complaint** after he refused to marry her. मामले के अभिलेखों के अनुसार, जब उस व्यक्ति ने उससे विवाह करने से इनकार कर दिया, तब उसने एक **आपराधिक शिकायत** दर्ज कराई।

GS II: Governance: Health

Ashna Butani
NEW DELHI

C-section deliveries in Delhi have increased from 23.6% in 2019–21 to 27.4% in 2023–24, according to data. FILE PHOTO

Delhi has seen a sharp rise in caesarean section (C-section) deliveries, increasing from 23.6% in 2019-21 to 27.4% in 2023-24, according to National Family Health Survey (NFHS) data. Experts and doctors attribute the trend to factors such as preference for painless childbirth and medical conditions like obesity and diabetes, among others. However, they have also expressed concern over the rising rate, noting that C-sections also carry medical risks.

Delhi's trend mirrors the national pattern, where the C-section rate rose from 21.5% to 27.2% during the same period.

The data also show a wide gap between sectors: 50.9% of births in private facilities were by C-section, compared with 19.6% in public facilities, raising concerns about possible overuse in the private sector.

Cause for concern

The World Health Organization (WHO) says that while caesarean sections are safe when medically justified, they carry short and long-term risks, including for future pregnancies, especially in settings with limited obstetric care.

Doctors attribute the rise to a mix of medical and social factors. Dr. Tripti Raheja, Director, Obstetrics and Gynaecology, CK Birla Hospital, said delayed pregnancies are a key driver, with more women conceiving in their 30s and facing complications such as obesity, gestational diabetes, and hypertension that often require surgical delivery.

Dr. Manju Puri, formerly an obstetrician and gynaecologist at Lady Hardinge Medical College and now at SGT College, Gurugram, said patient preference is also contributing. "More patients are requesting C-sections for painless delivery, and doctors may not always strongly discourage this due to concerns about complications and potential liability," she said.

She added that vaginal delivery is generally safer when there is no medical indication for surgery. "It becomes a concern when such demand spreads to areas with weaker health infrastructure," she said, noting recent reports of maternal deaths linked to C-sections in parts of the country, including Kota, Rajasthan.

Doctors also flagged environmental factors. Dr. Payal Chaudhary, Obstetrician and Gynaecologist, said that while there is no direct causal link, poor air quality is associated with adverse pregnancy outcomes such as preterm birth, foetal growth restriction, and hypertensive disorders, which may increase the likelihood of C-sections.

Increasing demand

Praveen K. Pathak, professor at the Delhi School of Economics, called the trend alarming, noting that the WHO recommends C-section rates stay around 10% due to risks to both mother and infant. He added that higher rates in private hospitals could point to profit-driven practices.

Researchers say the key issue is whether every C-section is medically necessary, which is not always the case. "NFHS shows the trend, not the medical reasons behind each delivery. The rise is a signal for deeper investigation through audits, public-private comparisons, and studies on patient and provider choices," said Apoorva Sharma, a researcher in medical and biological anthropology,

Experts say the way forward lies in improving accountability and patient awareness. Ms. Sharma called for better documentation of medical indications, stronger labour support, pain relief access, second opinions before non-emergency C-sections, and greater transparency in private facilities.

They emphasised the focus should be on appropriate use of the procedure, not restricting necessary care.

Experts raise concerns over spike in C-section deliveries in Delhi
दिल्ली में सी-सेक्शन प्रसवों में वृद्धि पर विशेषज्ञों ने चिंता व्यक्त की

Delhi has seen a sharp rise in caesarean section (C-section) deliveries, increasing from 23.6% in 2019–21 to 27.4% in 2023–24, according to National Family Health Survey (NFHS) data.

राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण (NFHS) के आंकड़ों के अनुसार, दिल्ली में सीज़ेरियन सेक्शन (सी-सेक्शन) प्रसवों में उल्लेखनीय वृद्धि हुई है, जो 2019–21 में 23.6% से बढ़कर 2023–24 में 27.4% हो गई है।

- Experts and doctors attribute the trend to factors such as preference for **painless childbirth** and medical conditions like **obesity** and **diabetes**, among others.

विशेषज्ञ और चिकित्सक इस प्रवृत्ति का कारण **दर्दरहित प्रसव** की बढ़ती प्राथमिकता तथा **मोटापा** और **मधुमेह** जैसी चिकित्सीय स्थितियों को मानते हैं।

- However, they have also expressed concern over the rising rate, noting that **C-sections** also carry medical risks.
  हालाँकि, उन्होंने बढ़ती दर पर चिंता व्यक्त करते हुए यह भी कहा कि **सी-सेक्शन** के साथ चिकित्सीय जोखिम भी जुड़े होते हैं।
- Delhi's trend mirrors the national pattern, where the **C-section rate** rose from **21.5%** to **27.2%** during the same period.
  दिल्ली की यह प्रवृत्ति राष्ट्रीय स्तर की स्थिति को भी दर्शाती है, जहाँ इसी अवधि में **सी-सेक्शन दर 21.5%** से बढ़कर **27.2%** हो गई।
- The data also show a wide gap between sectors: **50.9%** of births in **private facilities** were by C-section, compared with **19.6%** in **public facilities**, raising concerns about possible overuse in the private sector.
  आंकड़े यह भी दर्शाते हैं कि विभिन्न क्षेत्रों के बीच बड़ा अंतर है: **निजी स्वास्थ्य संस्थानों** में **50.9%** प्रसव सी-सेक्शन द्वारा हुए, जबकि **सार्वजनिक स्वास्थ्य संस्थानों** में यह आँकड़ा **19.6%** था, जिससे निजी क्षेत्र में इसके संभावित अत्यधिक उपयोग को लेकर चिंता बढ़ी है।

Cause for concern
चिंता का कारण

- The World Health Organization (WHO) says that while caesarean sections are safe when medically justified, they carry short and long-term risks, including for future pregnancies, especially in settings with limited obstetric care.
  विश्व स्वास्थ्य संगठन (WHO) का कहना है कि यद्यपि चिकित्सीय आवश्यकता होने पर सीज़ेरियन सेक्शन सुरक्षित होता है, फिर भी इससे अल्पकालिक और दीर्घकालिक जोखिम जुड़े होते हैं, विशेषकर भविष्य की गर्भावस्थाओं के लिए तथा उन स्थानों पर जहाँ प्रसूति सेवाएँ सीमित हैं।
- Doctors attribute the rise to a mix of medical and social factors.
  चिकित्सकों के अनुसार, इस वृद्धि के पीछे चिकित्सीय और सामाजिक कारकों का संयुक्त प्रभाव है।
- Dr. **Tripti Raheja**, Director, Obstetrics and Gynaecology, **CK Birla Hospital**, said delayed pregnancies are a key driver, with more women conceiving in their 30s and facing complications such as **obesity**, **gestational diabetes**, and **hypertension** that often require surgical delivery.
  सीके बिड़ला अस्पताल की प्रसूति एवं स्त्री रोग विशेषज्ञ **डॉ. तृप्ति रहेजा** ने कहा कि विलंबित गर्भधारण इसका प्रमुख कारण है, क्योंकि अधिक महिलाएँ अपने तीसवें दशक में गर्भधारण कर रही हैं और **मोटापा**, **गर्भकालीन मधुमेह** तथा **उच्च रक्तचाप** जैसी जटिलताओं का सामना कर रही हैं, जिनमें प्रायः शल्य प्रसव की आवश्यकता पड़ती है।
- Dr. **Manju Puri**, formerly an obstetrician and gynaecologist at **Lady Hardinge Medical College** and now at **SGT College, Gurugram**, said patient preference is also contributing.
  लेडी हार्डिंग मेडिकल कॉलेज की पूर्व प्रसूति एवं स्त्री रोग विशेषज्ञ तथा वर्तमान में **एसजीटी कॉलेज, गुरुग्राम** से जुड़ी **डॉ. मंजू पुरी** ने कहा कि रोगियों की प्राथमिकता भी इस वृद्धि में योगदान दे रही है।
- "More patients are requesting **C-sections** for painless delivery, and doctors may not always strongly discourage this due to concerns about complications and potential liability," she said.
  उन्होंने कहा, "अधिक रोगी दर्दरहित प्रसव के लिए **सी-सेक्शन** की मांग कर रहे हैं और चिकित्सक भी संभावित जटिलताओं तथा उत्तरदायित्व संबंधी चिंताओं के कारण हमेशा इसका कड़ा विरोध नहीं करते।"
- She added that **vaginal delivery** is generally safer when there is no medical indication for surgery.
  उन्होंने यह भी कहा कि जब शल्यक्रिया की कोई चिकित्सीय आवश्यकता न हो, तब सामान्यतः **योनि प्रसव (वेजाइनल डिलीवरी)** अधिक सुरक्षित होता है।

- "It becomes a concern when such demand spreads to areas with weaker health infrastructure," she said, noting recent reports of maternal deaths linked to C-sections in parts of the country, including **Kota, Rajasthan**.
  उन्होंने कहा, "यह तब चिंता का विषय बन जाता है जब ऐसी मांग कमजोर स्वास्थ्य अवसंरचना वाले क्षेत्रों तक फैल जाती है," और उन्होंने **कोटा, राजस्थान** सहित देश के विभिन्न भागों में सी-सेक्शन से जुड़ी मातृ मृत्यु की हालिया घटनाओं का उल्लेख किया।
- Doctors also flagged **environmental factors**.
  चिकित्सकों ने **पर्यावरणीय कारकों** की ओर भी ध्यान आकर्षित किया।
- Dr. **Payal Chaudhary**, Obstetrician and Gynaecologist, said that while there is no direct causal link, **poor air quality** is associated with adverse pregnancy outcomes such as **preterm birth**, **foetal growth restriction**, and **hypertensive disorders**, which may increase the likelihood of **C-sections**.
  प्रसूति एवं स्त्री रोग विशेषज्ञ **डॉ. पायल चौधरी** ने कहा कि यद्यपि इसका प्रत्यक्ष कारणात्मक संबंध सिद्ध नहीं है, फिर भी **खराब वायु गुणवत्ता** का संबंध **असमय जन्म**, **भ्रूण वृद्धि अवरोध** तथा **उच्च रक्तचाप संबंधी विकारों** जैसी प्रतिकूल गर्भावस्था स्थितियों से है, जो **सी-सेक्शन** की संभावना बढ़ा सकती हैं।

Increasing demand
बढ़ती मांग

- **Praveen K. Pathak**, professor at the **Delhi School of Economics**, called the trend alarming, noting that the **WHO** recommends **C-section rates** stay around **10%** due to risks to both mother and infant.
  दिल्ली स्कूल ऑफ इकोनॉमिक्स के प्रोफेसर **प्रवीण के. पाठक** ने इस प्रवृत्ति को चिंताजनक बताया और कहा कि **WHO** माता और शिशु दोनों के लिए जोखिमों को देखते हुए **सी-सेक्शन दर** को लगभग **10%** तक रखने की अनुशंसा करता है।
- He added that higher rates in private hospitals could point to **profit-driven practices**.
  उन्होंने कहा कि निजी अस्पतालों में उच्च दरें **लाभ-प्रेरित प्रथाओं** की ओर संकेत कर सकती हैं।
- Researchers say the key issue is whether every **C-section** is medically necessary, which is not always the case.
  शोधकर्ताओं का कहना है कि मुख्य प्रश्न यह है कि क्या प्रत्येक **सी-सेक्शन** चिकित्सीय रूप से आवश्यक है, जबकि ऐसा हमेशा नहीं होता।
- "**NFHS** shows the trend, not the medical reasons behind each delivery. The rise is a signal for deeper investigation through audits, public-private comparisons, and studies on patient and provider choices," said **Apoorva Sharma**, a researcher in medical and biological anthropology.
  चिकित्सा एवं जैविक मानवविज्ञान की शोधकर्ता **अपूर्वा शर्मा** ने कहा, "**NFHS** केवल प्रवृत्ति को दर्शाता है, प्रत्येक प्रसव के पीछे के चिकित्सीय कारणों को नहीं। यह वृद्धि ऑडिट, सार्वजनिक-निजी तुलना तथा रोगियों और सेवा प्रदाताओं के विकल्पों पर अध्ययन के माध्यम से गहन जांच का संकेत देती है।"
- Experts say the way forward lies in improving **accountability** and **patient awareness**.
  विशेषज्ञों का कहना है कि आगे का मार्ग **जवाबदेही** और **रोगी जागरूकता** को सुदृढ़ करने में निहित है।
- Ms. Sharma called for better documentation of medical indications, stronger labour support, pain relief access, second opinions before non-emergency **C-sections**, and greater transparency in private facilities.
  सुश्री शर्मा ने चिकित्सीय संकेतों के बेहतर अभिलेखीकरण, प्रसव सहायता को सुदृढ़ करने, दर्द निवारण सुविधाओं की उपलब्धता, गैर-आपातकालीन **सी-सेक्शन** से पूर्व द्वितीय चिकित्सीय राय तथा निजी संस्थानों में अधिक पारदर्शिता की आवश्यकता पर बल दिया।
- They emphasised the focus should be on appropriate use of the procedure, not restricting necessary care.

उन्होंने इस बात पर जोर दिया कि ध्यान इस प्रक्रिया के उचित उपयोग पर होना चाहिए, न कि आवश्यक चिकित्सा सेवा को सीमित करने पर।

74 new land ports proposed along International Border

GS II: Governance

Vijaita Singh
NEW DELHI

India proposes to build 74 additional land ports along the International Border in the coming years, which include three land ports along the China border and six along the Pakistan border, according to Land Ports Authority of India (LPAI) Chairperson Jayant Singh.

The new land ports are expected to strengthen trade and seamless movement of people with the neighbouring countries.

The land ports along the China border are proposed at Namgia in Himachal Pradesh, Gunji in Uttarakhand, and Nathu La in Sikkim. India does not have any other land port operational along the China border.

According to the External Affairs Ministry, three points are designated for conducting border trade between India and China – Lipulekh Pass in Uttarakhand (since 1992), Shipki La Pass in Himachal Pradesh (since 1995), and Nathu La Pass in Sikkim (since July 2006) but post-COVID pandemic in 2020, all trade is suspended. Trade points and land borders are different as the latter integrates immigration, customs and movement of large goods vehicles too.

Amit Shah during the inauguration of the Land Port Management System. ANI

The land ports planned along the Pakistan border are at Teetwal, Adusa, and Chakan Da Bagh in Jammu and Kashmir, Attari railway station and Hussainiwala in Punjab, and Munabao railway station in Rajasthan. At present, there is just one operational land port at Attari in Punjab and trade from the two Facilitation Centres located at Salamabad, Uri, Baramulla district and Chakkan-da-Bagh, Poonch district along Line of Control in Jammu and Kashmir remained suspended since the Pulwama attack.

Under Phase II, 13 land ports are proposed along the Nepal border, 12 along the Bangladesh border, four along Bhutan and two along the Myanmar border, the presentation said.

74 new land ports proposed along International Border
अंतरराष्ट्रीय सीमा पर 74 नए भूमि बंदरगाह प्रस्तावित

India proposes to build 74 additional land ports along the International Border in the coming years, which include three land ports along the China border and six along the Pakistan border, according to Land Ports Authority of India (LPAI) Chairperson Jayant Singh.
भारतीय भूमि बंदरगाह प्राधिकरण (LPAI) के अध्यक्ष जयंत सिंह के अनुसार, भारत आने वाले वर्षों में अंतरराष्ट्रीय सीमा पर 74 अतिरिक्त भूमि बंदरगाहों का निर्माण करने का प्रस्ताव रखता है, जिनमें चीन सीमा पर तीन भूमि बंदरगाह तथा पाकिस्तान सीमा पर छह भूमि बंदरगाह शामिल हैं।

- The new land ports are expected to strengthen **trade** and seamless movement of people with the neighbouring countries.
  इन नए भूमि बंदरगाहों से पड़ोसी देशों के साथ **व्यापार** तथा लोगों की निर्बाध आवाजाही को सुदृढ़ किए जाने की अपेक्षा है।
- The land ports along the **China border** are proposed at **Namgia in Himachal Pradesh**, **Gunji in Uttarakhand**, and **Nathu La in Sikkim**.
  चीन सीमा पर प्रस्तावित भूमि बंदरगाह **हिमाचल प्रदेश के नामगिया**, **उत्तराखंड के गुंजी** तथा **सिक्किम के नाथू ला** में स्थापित किए जाने का प्रस्ताव है।
- India does not have any other land port operational along the China border.
  भारत के पास चीन सीमा पर वर्तमान में कोई अन्य संचालित भूमि बंदरगाह नहीं है।
- According to the **External Affairs Ministry**, three points are designated for conducting border trade between India and China — **Lipulekh Pass in Uttarakhand (since 1992)**, **Shipki La Pass in Himachal Pradesh (since 1995)**, and **Nathu La Pass in Sikkim (since July 2006)** but post-**COVID pandemic** in 2020, all trade is suspended.
  विदेश मंत्रालय के अनुसार, भारत और चीन के बीच सीमा व्यापार के लिए तीन बिंदु निर्धारित किए गए हैं — **उत्तराखंड में लिपुलेख दर्रा (1992 से)**, **हिमाचल प्रदेश में शिपकी ला दर्रा (1995 से)** तथा **सिक्किम में नाथू ला दर्रा (जुलाई 2006 से)**, किंतु **कोविड महामारी** के बाद वर्ष 2020 से समस्त व्यापार निलंबित है।
- Trade points and land borders are different as the latter integrates **immigration**, **customs** and movement of large goods vehicles too.
  व्यापार बिंदु और भूमि बंदरगाह अलग-अलग होते हैं क्योंकि भूमि बंदरगाहों में **आव्रजन**, **सीमा शुल्क** तथा बड़े मालवाहक वाहनों की आवाजाही की सुविधाएँ भी सम्मिलित होती हैं।

- The land ports planned along the **Pakistan border** are at **Teetwal, Adusa, and Chakan Da Bagh in Jammu and Kashmir**, **Attari railway station and Hussainiwala in Punjab**, and **Munabao railway station in Rajasthan**.
  पाकिस्तान सीमा पर प्रस्तावित भूमि बंदरगाह **जम्मू-कश्मीर के तीतवाल, अदुसा और चाकन दा बाग**, **पंजाब के अटारी रेलवे स्टेशन और हुसैनीवाला**, तथा **राजस्थान के मुनाबाव रेलवे स्टेशन** में स्थापित किए जाने की योजना है।
- At present, there is just one operational land port at **Attari in Punjab** and trade from the two **Facilitation Centres** located at **Salamabad, Uri, Baramulla district** and **Chakkan-da-Bagh, Poonch district** along **Line of Control** in Jammu and Kashmir remained suspended since the **Pulwama attack**.
  वर्तमान में **पंजाब के अटारी** में केवल एक संचालित भूमि बंदरगाह है तथा जम्मू-कश्मीर में **नियंत्रण रेखा (LoC)** के निकट स्थित **सलामाबाद, उड़ी, बारामूला जिला** तथा **चक्कन-दा-बाग, पुंछ जिला** के दो **सुविधा केंद्रों** से होने वाला व्यापार **पुलवामा हमले** के बाद से निलंबित है।
- Under **Phase II**, **13 land ports** are proposed along the **Nepal border**, **12 along the Bangladesh border**, **four along Bhutan** and **two along the Myanmar border**, the presentation said.
  प्रस्तुति के अनुसार, **द्वितीय चरण (Phase II)** के अंतर्गत **नेपाल सीमा पर 13 भूमि बंदरगाह**, **बांग्लादेश सीमा पर 12**, **भूटान सीमा पर चार** तथा **म्यांमार सीमा पर दो भूमि बंदरगाह** प्रस्तावित हैं।

Land Port

- A land port is a border-crossing facility established at an international land boundary to facilitate regulated movement of people and cargo.
- It performs functions similar to those of a seaport or airport, but for land-based transportation.
- **Functions of a Land Port**
  - Customs clearance of goods.
  - Immigration clearance of passengers.
  - Quarantine and health checks.
  - Security screening.
  - Warehousing and logistics support.
  - Banking and communication services.

Land Ports Authority of India (LPAI)

- The **Land Ports Authority of India (LPAI)** was established under the **Land Ports Authority of India Act, 2010**.
- The Act came into force in **March 2012**.
- **Administrative Ministry:** LPAI functions under the **Ministry of Home Affairs (MHA), Government of India**.
- **Headquarters:** Headquarters located in **New Delhi**.

Objectives of LPAI

- **Infrastructure Development:** Develop world-class Integrated Check Posts along India's international borders.
- **Trade Facilitation:** Promote efficient cross-border trade and transit.
- **Passenger Convenience:** Provide modern facilities for travelers.
- **Security Enhancement:** Strengthen border management and surveillance.
- **Regional Connectivity:** Support India's neighborhood connectivity initiatives.

GS Paper II: International Relations	11 June 2026
TOPICS COVERED	
11J6	UN nuclear watchdog Board demands Iran cooperation संयुक्त राष्ट्र परमाणु निगरानी बोर्ड ने ईरान से सहयोग की मांग की

UN nuclear watchdog Board demands Iran cooperation

GS II: IR

Associated Press
VIENNA

The UN atomic watchdog's board on Wednesday demanded that Iran fully cooperate with the agency, provide complete information about its stockpile of near weapons-grade nuclear material and grant its inspectors access to Iranian nuclear sites.

A resolution passed by the International Atomic Energy Agency's board also said that giving information and access are "essential and urgent" in order to enable verification that there's no "diversion of nuclear material".

Twenty-one countries on the IAEA's 35-member board of governors voted for the resolution at IAEA headquarters in Vienna, according to diplomats who spoke on condition of anonymity to describe the outcome of the closed-doors vote.

The resolution was put forward by France, the United Kingdom, Germany and the United States

Russia, China and Niger opposed it, while 10 countries abstained and one didn't vote as it was in arrears.

The resolution was put forward by France, the United Kingdom, Germany and the United States.

A senior Western diplomat, who wasn't authorised to speak about the sensitive matter so requested anonymity, said that the resolution "aims to keep diplomatic pressure on Iran to come into compliance with its legal safeguards obligations".

According to the IAEA, Iran maintains a stockpile of 440.9 kg of uranium enriched up to 60% purity – a short, technical step away from weapons-grade levels of 90%.

That stockpile could allow Iran to build as many as 10 nuclear bombs, should it decide to weaponise its program, IAEA Director-General Rafael Mariano Grossi warned in a recent interview. He said that it doesn't mean that Iran has such a weapon.

Iran says that it's not pursuing nuclear weapons, and its program is entirely peaceful.

Talking to presspersons outside the IAEA boardroom, Iran's ambassador to the IAEA, Reza Najafi, denounced Wednesday's resolution and said that the document describes the situation in Iran "as being quite normal and as if nothing had happened".

UN nuclear watchdog Board demands Iran cooperation
संयुक्त राष्ट्र परमाणु निगरानी बोर्ड ने ईरान से सहयोग की मांग की

The UN atomic watchdog's board on Wednesday demanded that Iran fully cooperate with the agency, provide complete information about its stockpile of near weapons-grade nuclear material and grant its inspectors access to Iranian nuclear sites.

संयुक्त राष्ट्र की परमाणु निगरानी एजेंसी के बोर्ड ने बुधवार को ईरान से मांग की कि वह एजेंसी के साथ पूर्ण सहयोग करे, हथियार-स्तर के निकट समृद्ध परमाणु पदार्थ के अपने भंडार के बारे में पूरी जानकारी प्रदान करे तथा निरीक्षकों को ईरानी परमाणु स्थलों तक पहुँच प्रदान करे।

- A resolution passed by the **International Atomic Energy Agency (IAEA)** board also said that giving information and access are "**essential and urgent**" in order to enable verification that there's no "**diversion of nuclear material**".

अंतरराष्ट्रीय परमाणु ऊर्जा एजेंसी (IAEA) के बोर्ड द्वारा पारित एक प्रस्ताव में कहा गया कि यह सुनिश्चित करने के लिए कि "**परमाणु सामग्री का कोई विचलन**" नहीं हुआ है, जानकारी और पहुँच प्रदान करना "**आवश्यक और अत्यावश्यक**" है।

- **Twenty-one countries** on the **IAEA's 35-member Board of Governors** voted for the resolution at **IAEA headquarters in Vienna**.

बंद-द्वार मतदान के परिणामों का वर्णन करने वाले राजनयिकों के अनुसार, **वियना स्थित IAEA मुख्यालय** में **IAEA के 35 सदस्यीय बोर्ड ऑफ गवर्नर्स** में से **21 देशों** ने इस प्रस्ताव के पक्ष में मतदान किया।

- According to the **IAEA**, Iran maintains a stockpile of **440.9 kg of uranium enriched up to 60% purity** — a short, technical step away from **weapons-grade levels of 90%**.

IAEA के अनुसार, ईरान के पास **60% शुद्धता तक समृद्ध 440.9 किलोग्राम यूरेनियम** का भंडार है, जो **90% हथियार-स्तरीय समृद्धि** से केवल एक छोटा तकनीकी कदम दूर है।

- That stockpile could allow Iran to build as many as **10 nuclear bombs**, should it decide to weaponise its program.

IAEA के महानिदेशक राफेल मारियानो ग्रोसी ने एक हालिया साक्षात्कार में चेतावनी दी कि यदि ईरान अपने कार्यक्रम को हथियार कार्यक्रम में परिवर्तित करने का निर्णय लेता है, तो यह भंडार उसे **10 परमाणु बम** तक बनाने में सक्षम बना सकता है।

GS Paper III: Economy	11 June 2026
TOPICS COVERED	
11J6	The reality behind falling net FDI घटते शुद्ध प्रत्यक्ष विदेशी निवेश (Net FDI) के पीछे की वास्तविकता

The reality behind falling net FDI

India's net FDI has declined sharply despite strong gross inflows, underlining the impact of disinvestment/capital repatriation; investor classes, modes of entry, and exit strategies can have important implications for technology transfer, industrial development, and external sustainability

GS III: Economy

ECONOMIC NOTES

K.S. Chalapati Rao
Biswajit Dhar
K.V.K. Ranganathan

India's net foreign direct investment (FDI) has declined drastically in recent years. Critics see the weak net flows as a sign of weakness, while the Chief Economic Adviser points to the large inflows and rising manufacturing FDI as evidence of strength. He links weak net flows to profit repatriation and outward investment by Indian companies.

However, this debate overlooks a major issue. By focusing on overall numbers, both sides ignore the changing composition of international capital and the Balance of Payments (BoP) mechanisms that govern inflows and outflows.

For BoP purposes, net FDI is calculated as the difference between inflows and outflows after adjusting for the repatriation of capital. From the peak of $44.0 billion in 2020-21, net FDI fell to less than $1 billion in 2024-25. It recovered to $7.6 billion in 2025-26. The corresponding gross inflow was $94.6 billion.

It is necessary to note that India's liberal FDI policy, introduced in 1991, initially emphasised technology acquisition, export promotion, and foreign exchange conservation. Over time, policy increasingly prioritised attracting larger inflows, while concerns regarding future external payment obligations and investment quality receded.

GETTY IMAGES

THE GIST

- Real FDI accounted for 41.9% of effective inflows between 2022-23 and 2025-26, while financial investors contributed 40.5%, reflecting the growing role of private equity, venture capital, and sovereign wealth funds.
- Real FDI into manufacturing has declined across three consecutive four-year periods, with manufacturing receiving only 10.6% of total effective inflows in the latest period.
- Gross FDI figures include transactions such as intra-group ownership reorganisations, mergers, share swaps, and conversion of external commercial borrowings, even when no fresh capital enters the country.

Three types of FDI

FDI is often viewed as a uniform, long-term commitment that brings technology and management skills to the host country. FDI can fall into three different investor classes, each with distinct capabilities, strategies, and exit timelines.

The first category is real FDI (RFDI), consisting of traditional multinational enterprises with the technology, brands, and capabilities to establish production and services. These generally represent long-term commitments.

The second category comprises financial investors, including private equity funds, venture capital firms, sovereign wealth funds, and asset managers. Their main goal is capital growth and planned exits.

The third category includes diaspora investments and special purpose vehicles (SPVs). These involve capital raised abroad and funneled through offshore financial centres, sometimes including the round-tripping of Indian funds.

Data on remittance-level FDI from the past four years, from 2022-23 to 2025-26 up to December, show that RFDI made up 41.9% of "effective inflows." Financial investors followed closely with a 40.5% share, while the remaining 17.6% came from the diaspora and SPVs linked to India.

The business model of financial investors suggests future exits that result in large-scale capital repatriations. A notable example occurred in 2025 when Singapore's Temasek exited Schneider Electric India Ltd., earning $6.4 billion on an investment of $637 million made in 2020. Total recorded divestment in CY 2025 was $52 billion, with 45 major foreign private equity and venture capital exits accounting for $29 billion in outflows.

Based on an analysis of effective inflows, FDI in India's manufacturing sector has declined across three consecutive four-year periods. Most notably, RFDI into manufacturing accounted for only 10.6% of total effective inflows during the most recent four-year period.

Not fresh capital

A major blind spot in gross FDI figures is the mixing of new capital injections with corporate accounting changes, such as intra-group ownership reorganisations, mergers, share swaps, and the conversion of earlier non-equity instruments such as external commercial borrowings (ECBs) and convertible debentures.

While capital structures change, no new capital flows into the country. Approximately $40 billion of the $560 billion in equity inflows to India from 2014-15 to 2025-26 (up to December) fall into this category. Large transactions, such as Bosch and Meesho Technologies, can skew annual inflow and sectoral trends.

Disinvestment drives decline

Before looking at why net FDI is low or even negative in certain months, it is worth mentioning that the official narrative that profit repatriation depresses net FDI is misleading.

Under BoP conventions, profits sent as dividends are recorded as investment income in the current account. They increase the current account deficit (CAD) but do not change the reported net FDI flows. Instead, the primary reason for weak net FDI is disinvestment and capital repatriation, which appear in the financial account.

Likewise, the increase in Outward Foreign Direct Investment (OFDI) warrants closer examination rather than being attributed solely to corporate maturity. From 2023-24 to 2025-26, 45% of India's total outbound investment of $65 billion went into the "financial, insurance, and business services" (FIB) sector. Singapore and the UAE accounted for 27% and 11% of the total, respectively. These funds mostly go to holding companies and SPVs rather than directly to operational entities. For instance, TML Commercial Vehicles, a subsidiary of Tata Motors, invested $405 million in a Singaporean FIB entity to acquire the IVECO Group in Italy.

Capital movements through the GIFT City further complicate this issue. OFDI to the City increased from $246 million in 2023-24 to $1.18 billion in 2025-26. Total OFDI and inward FDI through it until 2025-26 reached $2.35 billion and $1.40 billion, respectively, highlighting the growing two-way flows.

These cross-flow of investments by Indian entities, also from other locations, indicates that OFDI can represent both genuine corporate expansion and the return of capital that fled. Therefore, increasing OFDI may not necessarily indicate maturity, as Indian companies might seek resources and technology, while a few might recycle capital through different jurisdictions.

Understanding the outflow channels

From 2022-23 to 2025-26, total FDI inflows and related current and capital account outflows reached significant levels. While gross inward equity FDI totalled $317.80 billion ($230.60 billion excluding reinvested earnings), the outflows present a more complex scenario.

Disinvestment and capital repatriation (capital account) totalled $178.9 billion, primarily driven by financial investors through secondary and strategic sales, IPO exits, and share buybacks. This also includes "offers for sale" by foreign promoters such as Hyundai and LG. The other type involves sell-offs by RFDI investors, such as Wistron which sold off to the Tatas.

Dividend remittances (current account) amounted to $118.9 billion in profits paid out by MNE subsidiaries and affiliates, excluding reinvested earnings.

Attributable IPR payments (current account) totalled $46.6 billion. These payments, made by MNE subsidiaries and affiliates for intellectual property (assuming they account for 75% of total IPR payments), can substitute dividends.

Additionally, $250.0 billion was transferred by all entities for technical/service/consultancy payments. However, it is difficult to divide this amount between RFDI and domestic companies.

Even when excluding OFDI and technical service payments, outflows due to disinvestment, dividends, and IPR payments (royalties) totalled $344.4 billion. Therefore, for every dollar of fresh inflow (excluding reinvested earnings), approximately $1.50 flowed out. This situation has worsened over the past 12 years. The corresponding outflow per dollar entered was 56 cents from 2014-15 to 2017-18, rising to 70 cents from 2018-19 to 2021-22, before reaching the current high.

Need for informed debate

The above narrative shows how an incomplete view of FDI prevails in the public discourse. Different types of investors, entry methods, and exit strategies impact technology transfer, industrial growth, and external sustainability. The reporting of global FDI flows adds an additional layer of problems. Understanding these nuances is crucial for evaluating FDI beyond headline numbers.

घटते शुद्ध प्रत्यक्ष विदेशी निवेश (Net FDI) के पीछे की वास्तविकता

- **India's net foreign direct investment (FDI) has declined drastically in recent years.**
  हाल के वर्षों में **भारत का शुद्ध प्रत्यक्ष विदेशी निवेश (FDI)** अत्यधिक घट गया है।
- Critics see the weak net flows as a sign of weakness, while the Chief Economic Adviser points to the large inflows and rising manufacturing FDI as evidence of strength.
  आलोचक कमज़ोर **शुद्ध निवेश प्रवाह** को आर्थिक कमजोरी का संकेत मानते हैं, जबकि **मुख्य आर्थिक सलाहकार** बड़े निवेश प्रवाह और बढ़ते **विनिर्माण क्षेत्र के FDI** को मजबूती का प्रमाण बताते हैं।
- He links weak net flows to profit repatriation and outward investment by Indian companies.
  वे कमज़ोर शुद्ध प्रवाह को **लाभ की स्वदेश वापसी (Profit Repatriation)** तथा भारतीय कंपनियों द्वारा विदेशों में किए जा रहे निवेश से जोड़ते हैं।
- However, this debate overlooks a major issue.
  हालाँकि, यह बहस एक महत्वपूर्ण मुद्दे की उपेक्षा करती है।
- By focusing on overall numbers, both sides ignore the changing composition of international capital and the **Balance of Payments (BoP)** mechanisms that govern inflows and outflows.
  कुल आँकड़ों पर ध्यान केंद्रित करके दोनों पक्ष **अंतरराष्ट्रीय पूँजी की बदलती संरचना** तथा **भुगतान संतुलन (BoP)** की उन व्यवस्थाओं की अनदेखी कर रहे हैं जो पूँजी के आगमन और निर्गमन को नियंत्रित करती हैं।
- For BoP purposes, net FDI is calculated as the difference between inflows and outflows after adjusting for the repatriation of capital.
  भुगतान संतुलन के संदर्भ में, शुद्ध **FDI** की गणना पूँजी की वापसी को समायोजित करने के बाद निवेश आगमन और निर्गमन के अंतर के रूप में की जाती है।
- From the peak of **$44.0 billion** in 2020-21, net FDI fell to less than **$1 billion** in 2024-25.
  वर्ष **2020-21** में **44.0 अरब डॉलर** के उच्चतम स्तर से शुद्ध **FDI** घटकर **2024-25** में **1 अरब डॉलर से भी कम** रह गया।
- It recovered to **$7.6 billion** in 2025-26.
  वर्ष **2025-26** में इसमें सुधार हुआ और यह **7.6 अरब डॉलर** तक पहुँच गया।
- The corresponding gross inflow was **$94.6 billion**.
  इसी अवधि में कुल **FDI प्रवाह 94.6 अरब डॉलर** रहा।
- It is necessary to note that India's liberal FDI policy, introduced in 1991, initially emphasised technology acquisition, export promotion, and foreign exchange conservation.
  यह ध्यान देने योग्य है कि **1991** में शुरू की गई भारत की उदार **FDI नीति** का प्रारंभिक उद्देश्य **प्रौद्योगिकी अधिग्रहण**, **निर्यात प्रोत्साहन** तथा **विदेशी मुद्रा संरक्षण** था।
- Over time, policy increasingly prioritised attracting larger inflows, while concerns regarding future external payment obligations and investment quality receded.
  समय के साथ नीति का मुख्य ध्यान अधिकाधिक **विदेशी निवेश आकर्षित करने** पर केंद्रित हो गया, जबकि भविष्य की **बाह्य भुगतान देनदारियों** तथा निवेश की गुणवत्ता संबंधी चिंताएँ पीछे छूट गईं।

Three types of FDI
FDI के तीन प्रकार

- FDI is often viewed as a uniform, long-term commitment that brings technology and management skills to the host country.
  अक्सर **FDI** को एक समान और दीर्घकालिक निवेश के रूप में देखा जाता है जो मेज़बान देश में **प्रौद्योगिकी** और **प्रबंधन कौशल** लाता है।
- FDI can fall into three different investor classes, each with distinct capabilities, strategies, and exit timelines.

किन्तु **FDI** को निवेशकों की तीन अलग-अलग श्रेणियों में बाँटा जा सकता है, जिनकी क्षमताएँ, रणनीतियाँ और निवेश से बाहर निकलने की समय-सीमा भिन्न होती हैं।

- The first category is **real FDI (RFDI)**, consisting of traditional multinational enterprises with the technology, brands, and capabilities to establish production and services.
  पहली श्रेणी **रियल FDI (RFDI)** की है, जिसमें पारंपरिक **बहुराष्ट्रीय कंपनियाँ** शामिल होती हैं जिनके पास उत्पादन और सेवाएँ स्थापित करने हेतु आवश्यक **प्रौद्योगिकी**, **ब्रांड** और क्षमताएँ होती हैं।
- These generally represent long-term commitments.
  ये सामान्यतः **दीर्घकालिक निवेश प्रतिबद्धताओं** का प्रतिनिधित्व करती हैं।
- The second category comprises financial investors, including private equity funds, venture capital firms, sovereign wealth funds, and asset managers.
  दूसरी श्रेणी में **वित्तीय निवेशक** आते हैं, जिनमें **प्राइवेट इक्विटी फंड**, **वेंचर कैपिटल फर्म**, **सॉवरेन वेल्थ फंड** और **एसेट मैनेजर** शामिल होते हैं।
- Their main goal is capital growth and planned exits.
  इनका मुख्य उद्देश्य **पूँजी वृद्धि** और नियोजित समय पर निवेश से बाहर निकलना होता है।
- The **third category includes diaspora investments and special purpose vehicles (SPVs).**
  तीसरी श्रेणी में **प्रवासी निवेश** तथा **विशेष प्रयोजन साधन (SPVs)** शामिल हैं।
- These involve capital raised abroad and funneled through offshore financial centres, sometimes including the **round-tripping of Indian funds**.
  इनमें विदेशों में जुटाई गई पूँजी को **ऑफशोर वित्तीय केंद्रों** के माध्यम से निवेश किया जाता है, और कभी-कभी इसमें भारतीय धन की **राउंड-ट्रिपिंग** भी शामिल होती है।
- Total recorded disinvestment in **CY 2025** was **$52 billion**, with **45 major foreign private equity and venture capital exits** accounting for **$29 billion** in outflows.
  कैलेंडर वर्ष 2025 में कुल दर्ज **विनिवेश (Disinvestment) 52 अरब डॉलर** रहा, जिसमें **45 प्रमुख विदेशी प्राइवेट इक्विटी और वेंचर कैपिटल निकासों** का योगदान **29 अरब डॉलर** के पूँजी निर्गमन के रूप में था।
- Based on an analysis of effective inflows, **FDI in India's manufacturing sector** has declined across three consecutive four-year periods.
  प्रभावी निवेश प्रवाह के विश्लेषण के आधार पर, **भारत के विनिर्माण क्षेत्र में FDI** लगातार तीन चार-वर्षीय अवधियों में घटा है।

Not fresh capital
नई पूँजी नहीं

- A major blind spot in gross FDI figures is the mixing of new capital injections with corporate accounting changes, such as intra-group ownership reorganisations, mergers, share swaps, and the conversion of earlier non-equity instruments such as **external commercial borrowings (ECBs)** and convertible debentures.
  कुल **FDI** आँकड़ों की एक बड़ी सीमा यह है कि इनमें नई पूँजी के निवेश को **कॉर्पोरेट लेखांकन परिवर्तनों** के साथ मिला दिया जाता है, जैसे समूह के भीतर स्वामित्व पुनर्गठन, **विलय (Mergers)**, **शेयर अदला-बदली (Share Swaps)** तथा **बाह्य वाणिज्यिक उधार (ECBs)** और परिवर्तनीय डिबेंचरों जैसे गैर-इक्विटी साधनों का रूपांतरण।
- Approximately **$40 billion** of the **$560 billion** in equity inflows to India from **2014-15 to 2025-26** (up to December) fall into this category.
  2014-15 से दिसंबर 2025-26 तक भारत में आए **560 अरब डॉलर** के इक्विटी निवेश में से लगभग **40 अरब डॉलर** इसी श्रेणी में आते हैं।
- Under **BoP** conventions, profits sent as dividends are recorded as investment income in the current account.
  भुगतान संतुलन (BoP) के नियमों के अनुसार, लाभांश के रूप में भेजे गए लाभ को **चालू खाते (Current Account)** में निवेश आय के रूप में दर्ज किया जाता है।

- They increase the **current account deficit (CAD)** but do not change the reported net FDI flows.
  वे **चालू खाते के घाटे (CAD)** को बढ़ाते हैं, लेकिन रिपोर्ट किए गए **शुद्ध FDI** को प्रभावित नहीं करते।
- Instead, the primary reason for weak net FDI is disinvestment and capital repatriation, which appear in the financial account.
  इसके विपरीत, कमज़ोर **शुद्ध FDI** का मुख्य कारण **विनिवेश** और **पूँजी की वापसी** है, जो **वित्तीय खाते (Financial Account)** में दर्ज होती है।
- Likewise, the increase in **Outward Foreign Direct Investment (OFDI)** warrants closer examination rather than being attributed solely to corporate maturity.
  इसी प्रकार, **विदेशों में प्रत्यक्ष निवेश (OFDI)** में वृद्धि का भी गहन अध्ययन आवश्यक है, इसे केवल कंपनियों की परिपक्वता का परिणाम मानना पर्याप्त नहीं है।
- From **2023-24 to 2025-26**, **45%** of India's total outbound investment of **$65 billion** went into the **financial, insurance, and business services (FIB)** sector.
  2023-24 से 2025-26 के बीच भारत के कुल **65 अरब डॉलर** के बाह्य निवेश का **45%** हिस्सा **वित्तीय, बीमा और व्यावसायिक सेवाओं (FIB)** क्षेत्र में गया।
- **Singapore** and the **UAE** accounted for **27%** and **11%** of the total, respectively.
  इस कुल निवेश में **सिंगापुर** का योगदान **27%** तथा United Arab Emirates का **11%** था।
- **Disinvestment** and **capital repatriation** (capital account) totalled **$178.9 billion**, primarily driven by financial investors through secondary and strategic sales, IPO exits, and share buybacks.
  विनिवेश तथा **पूँजी की वापसी** (पूँजी खाते में) कुल मिलाकर **178.9 अरब डॉलर** रही, जिसका प्रमुख कारण वित्तीय निवेशकों द्वारा **द्वितीयक बिक्री**, **रणनीतिक बिक्री**, **IPO निकास** तथा **शेयर बायबैक** थे।

PATRIOTIC IAS

- **Dividend remittances** (current account) amounted to **$118.9 billion** in profits paid out by MNE subsidiaries and affiliates, excluding reinvested earnings.
  लाभांश प्रेषण (Dividend Remittances) के रूप में, पुनर्निवेशित आय को छोड़कर, **बहुराष्ट्रीय कंपनियों (MNEs)** की सहायक एवं संबद्ध इकाइयों ने **118.9 अरब डॉलर** का लाभ विदेश भेजा।

India bond-tax step to up foreign debt inflow, bid for global index inclusion

India tax breaks, policy steps spark $1 billion in foreign bond inflows, lower yields; measures to improve India's debt appeal could lower borrowing costs over time; global asset managers say reforms boost India's case for inclusion in global bond indices; measures taken in response to oil shock

GS III: Economy

NEWS ANALYSIS

Reuters
MUMBAI

Money swings: Outlook for foreign inflows will be closely tied to rupee's trajectory. GETTY IMAGES/ISTOCK

India's decision to exempt foreigners from taxes on government bonds and broaden access to the debt market is expected to make the country more attractive to overseas investors, catalyse fresh inflows and strengthen its case for inclusion in global indexes.

On Friday, policymakers unveiled a wide-ranging set of measures to draw in overseas capital while shoring up the currency and external balances, which have been strained by higher oil prices.

They scrapped withholding and capital gains taxes on foreign investments in government bonds, broadened the pool of securities that are available without investment limits and introduced incentives to encourage banks to raise foreign currency deposits from non-resident Indians and for companies to tap overseas borrowings.

The slew of measures, rolled out in response to the oil shock that has hit Indian assets, is beginning to lure foreign investors back into an overlooked market against a backdrop of rising global rate volatility.

"We believe that these changes are a game-changer for debt flows," said Jennifer Taylor, the head of emerging market debt and systematic fixed income at State Street Investment Management, which manages about $5.6 trillion in assets.

The pace of foreign inflows has quickened since the measures were introduced, with more than $1 billion worth of government debt bought in just three sessions. Before the announcement in the year-to-date period, $1.6 billion had been purchased.

Yields on government bonds have fallen 10 to 30 basis points across the curve, with shorter maturities seeing the biggest declines.

The removal of taxes makes Indian government bonds more attractive on a relative basis, Taylor said, adding that the measures should boost foreign participation across the yield curve and lower borrowing costs over time.

> The rupee is down 5.86% so far this year, trailing only Indonesian rupiah as Asia's worst performing currency though it experienced modest relief since the bond tax moves

More consequential

Some investors said the reforms could prove more consequential over the longer term by paving the way for India's inclusion in broader global debt benchmarks, which would bring more durable and predictable inflows.

Niel Clement, portfolio manager for emerging market fixed income at BNP Paribas Asset Management, which manages more than €1.6 trillion ($1.85 trillion) of assets, said the steps would broaden opportunities for overseas investors, redirect flows to the onshore market and provide a constructive boost to India's bid for inclusion in the Bloomberg Global Aggregate Index.

Bloomberg Index Services is expected to seek investor feedback later this month on whether Indian government bonds should be added to its flagship global bond index.

M&G Investments, which manages about £376 billion ($503.4 billion) of assets, said the tax exemptions have boosted the near-term appeal of Indian government securities.

Bigger inflow driver

It added that inclusion in the Bloomberg index would be a bigger driver of inflows, similar to India's entry into JPMorgan's emerging market debt index. In the weeks before tax cuts were rolled out, India's finance minister met with officials at the central bank to push for entry into the Bloomberg index, a government official said.

"We view the measures announced aimed at addressing pressures on the capital account as having effectively restored policy control," said Low Guan Yi, head of Asia fixed income at M&G Investments.

"With steps taken to support macroeconomic stability, we see investment opportunities as India continues to differentiate itself from other emerging bond markets with more limited policy flexibility." UBS Asset Management, which is neutral to underweight on Indian fixed income, said the Reserve Bank of India's moves signaled a constructive approach toward broadening market access and they will encourage more foreign inflows over time.

"India is an important part of EM local index so we are always reviewing it as an investment option," said Shamaila Khan, head of fixed income emerging markets and Asia-Pacific at UBS Asset Management.

Currency, energy risks

Investors cautioned that while the measures improved the appeal of Indian debt, the outlook for foreign inflows will remain closely tied to the rupee's trajectory.

"The bigger issue for offshore investors is still the currency," said Rong Ren Goh, head of macro and thematics for Asian fixed income at Eastspring Investments, which manages about $250 billion, adding that investors are likely to wait for clearer signs of rupee stability before raising allocations.

The recent pace of rupee depreciation has dented the carry appeal of Indian debt, while higher energy prices have added to the pressure, he said.

The rupee is down 5.86% so far this year, trailing only Indonesian rupiah as Asia's worst-performing currency though it experienced modest relief since the bond tax moves; it was last at 95.16 per dollar.

Economists at Citi sharply revised India's balance of payments forecast for the current fiscal year, a shift they says should underpin the rupee. They now expect a $5 billion surplus versus an earlier projected deficit of $60 billion.

India bond-tax step to up foreign debt inflow, bid for global index inclusion
विदेशी ऋण प्रवाह बढ़ाने और वैश्विक सूचकांक में शामिल होने की दिशा में भारत का बॉन्ड-कर कदम

India tax breaks, policy steps spark $1 billion in foreign bond inflows, lower yields; measures to improve India's debt appeal could lower borrowing costs over time.

भारत द्वारा कर रियायतों और नीतिगत कदमों के परिणामस्वरूप विदेशी बॉन्ड निवेश में 1 अरब डॉलर का प्रवाह हुआ है

तथा प्रतिफल (यील्ड) में कमी आई है; भारत के ऋण बाज़ार को अधिक आकर्षक बनाने वाले ये कदम समय के साथ उधारी लागत को कम कर सकते हैं।

- India's decision to exempt foreigners from taxes on **government bonds** and broaden access to the debt market is expected to make the country more attractive to overseas investors, catalyse fresh inflows and strengthen its case for inclusion in global indexes.
  सरकारी बॉन्डों पर विदेशी निवेशकों को करों से छूट देने तथा ऋण बाजार तक उनकी पहुँच बढ़ाने का भारत का निर्णय देश को विदेशी निवेशकों के लिए अधिक आकर्षक बनाएगा, नए निवेश प्रवाह को प्रोत्साहित करेगा तथा वैश्विक सूचकांकों में शामिल होने की संभावनाओं को मजबूत करेगा।
- On Friday, policymakers unveiled a wide-ranging set of measures to draw in overseas capital while shoring up the currency and external balances, which have been strained by higher oil prices.
  शुक्रवार को नीति-निर्माताओं ने विदेशी पूंजी आकर्षित करने तथा मुद्रा और बाह्य संतुलन को मजबूत करने के लिए व्यापक उपायों की घोषणा की, जो उच्च तेल कीमतों के कारण दबाव में थे।
- They scrapped **withholding and capital gains taxes** on foreign investments in government bonds, broadened the pool of securities that are available without investment limits and introduced incentives to encourage banks to raise foreign currency deposits from **non-resident Indians (NRIs)** and for companies to tap overseas borrowings.
  उन्होंने सरकारी बॉन्डों में विदेशी निवेश पर **विदहोल्डिंग टैक्स** और **पूंजीगत लाभ कर** समाप्त कर दिया, निवेश सीमा के बिना उपलब्ध प्रतिभूतियों के दायरे का विस्तार किया तथा बैंकों को **अनिवासी भारतीयों (NRIs)** से विदेशी मुद्रा जमा जुटाने और कंपनियों को विदेशी उधार लेने के लिए प्रोत्साहन प्रदान किए।
- Yields on government bonds have fallen **10 to 30 basis points** across the curve, with shorter maturities seeing the biggest declines.
  सरकारी बॉन्डों की प्रतिफल दरों में विभिन्न अवधियों में **10 से 30 बेसिस प्वाइंट** तक की गिरावट आई है, जिसमें अल्पकालिक परिपक्वता वाले बॉन्डों में सबसे अधिक कमी दर्ज की गई।
- The removal of taxes makes Indian government bonds more attractive on a relative basis, Taylor said, adding that the measures should boost foreign participation across the yield curve and lower borrowing costs over time.
  टेलर ने कहा कि करों को हटाने से भारतीय सरकारी बॉन्ड तुलनात्मक रूप से अधिक आकर्षक बन गए हैं और इन उपायों से समय के साथ विदेशी भागीदारी बढ़ेगी तथा उधारी लागत घटेगी।

More consequential
अधिक महत्वपूर्ण प्रभाव

- Some investors said the reforms could prove more consequential over the longer term by paving the way for India's inclusion in broader global debt benchmarks, which would bring more durable and predictable inflows.
  कुछ निवेशकों का मानना है कि ये सुधार दीर्घकाल में अधिक महत्वपूर्ण सिद्ध हो सकते हैं क्योंकि ये भारत को व्यापक वैश्विक ऋण सूचकांकों में शामिल किए जाने का मार्ग प्रशस्त करेंगे, जिससे अधिक स्थायी और अनुमानित निवेश प्रवाह आएगा।
- **Niel Clement**, portfolio manager for emerging market fixed income at **BNP Paribas Asset Management**, which manages more than **€1.6 trillion ($1.85 trillion)** of assets, said the steps would broaden opportunities for overseas investors, redirect flows to the onshore market and provide a constructive boost to India's bid for inclusion in the **Bloomberg Global Aggregate Index**.
  BNP परिबा एसेट मैनेजमेंट में उभरते बाजारों की निश्चित आय के पोर्टफोलियो प्रबंधक **नील क्लेमेंट** ने कहा कि ये कदम विदेशी निवेशकों के अवसरों का विस्तार करेंगे, निवेश प्रवाह को घरेलू बाजार की ओर मोड़ेंगे और भारत को **ब्लूमबर्ग ग्लोबल एग्रीगेट इंडेक्स** में शामिल किए जाने के प्रयासों को सकारात्मक बल प्रदान करेंगे।

- In the weeks before tax cuts were rolled out, India's finance minister met with officials at the central bank to push for entry into the Bloomberg index, a government official said.
  एक सरकारी अधिकारी के अनुसार, कर कटौती की घोषणा से पहले भारत के वित्त मंत्री ने केंद्रीय बैंक के अधिकारियों से मुलाकात कर ब्लूमबर्ग सूचकांक में शामिल होने के प्रयासों को आगे बढ़ाया था।
- "**India is an important part of EM local index so we are always reviewing it as an investment option**," said **Shamaila Khan**, head of fixed income emerging markets and Asia-Pacific at **UBS Asset Management**.
  यूबीएस एसेट मैनेजमेंट में उभरते बाजारों और एशिया-प्रशांत क्षेत्र की निश्चित आय प्रमुख **शमाइला खान** ने कहा, "भारत उभरते बाजारों के स्थानीय सूचकांक का महत्वपूर्ण हिस्सा है, इसलिए हम इसे निवेश विकल्प के रूप में लगातार समीक्षा करते रहते हैं।"
- "The bigger issue for offshore investors is still the currency," said **Rong Ren Goh**, head of macro and thematics for Asian fixed income at **Eastspring Investments**, which manages about **$250 billion**, adding that investors are likely to wait for clearer signs of rupee stability before raising allocations.
  लगभग **250 अरब डॉलर** की परिसंपत्तियों का प्रबंधन करने वाली **ईस्टस्प्रिंग इन्वेस्टमेंट्स** में एशियाई निश्चित आय के मैक्रो और थीमैटिक प्रमुख **रोंग रेन गोह** ने कहा, "विदेशी निवेशकों के लिए सबसे बड़ा मुद्दा अभी भी मुद्रा ही है," और निवेशक रुपये की स्थिरता के स्पष्ट संकेत मिलने तक अपने निवेश को बढ़ाने की प्रतीक्षा कर सकते हैं।
- The recent pace of rupee depreciation has dented the carry appeal of Indian debt, while higher energy prices have added to the pressure, he said.
  उन्होंने कहा कि हाल के समय में रुपये के अवमूल्यन की गति ने भारतीय ऋण बाजार के आकर्षण को कम किया है, जबकि उच्च ऊर्जा कीमतों ने दबाव को और बढ़ाया है।
- Economists at **Citi** sharply revised India's **balance of payments** forecast for the current fiscal year, a shift they say should underpin the rupee.
  सिटी के अर्थशास्त्रियों ने चालू वित्तीय वर्ष के लिए भारत के **भुगतान संतुलन (Balance of Payments)** के पूर्वानुमान में बड़ा संशोधन किया है, जो उनके अनुसार रुपये को समर्थन प्रदान करेगा।

Why SpaceX IPO may spell bad news for crypto

GS III: Economy

NEWS ANALYSIS

Reuters

SpaceX's much-anticipated $75 billion initial public offering, set to be the largest ever, will likely keep cryptocurrency prices in the doldrums as retail investors attracted to new and risky artificial intelligence stocks scramble to get a slice of the action.

Celebrity billionaire Elon Musk's rocket and satellite communications company - which merged with his AI startup xAI earlier this year - is expected to fetch a valuation of around $1.75 trillion, sparking a Wall Street and media frenzy. The company has set aside up to 30%, or $22.5 billion, of shares for retail investors, *Reuters* and other outlets have reported, in a rare move for a blockbuster IPO that historically have been dominated by institutional investors. That has helped drive rotation out of risk assets like cryptocurrencies, as retail and other investors free up cash to buy shares in SpaceX - as well as hotly anticipated IPOs from OpenAI and Anthropic that are expected to follow this year, said analysts and crypto executives.

Hit to crypto: A 3D-printed miniature model of Elon Musk and a SpaceX logo are seen in this illustration. REUTERS

Bitcoin down

Bitcoin, the world's largest cryptocurrency, was last trading near the $60,000 level, down about 52% from its all-time high of $1,26,223 in October. "Crypto is a funding currency for a lot of this," said Spencer Hallarn, global head of over-the-counter trading, GSR, a crypto trading firm and liquidity provider. "We've got to find $75 billion for this IPO, and it's got to come from somewhere."

Firm unprofitable

With SpaceX, Musk revived space travel, turning cosmic exploration into thriving businesses, but it is eyeing an even bigger opportunity in building AI for enterprises. SpaceX's IPO prospectus shows that the company overall is unprofitable, and its lofty valuation assumes years of rapid growth driven by its plan to become an AI powerhouse, in addition to other futuristic ambitions such as Mars missions and launching AI data centres in space. That makes it the type of risky and speculative AI bet that appeals to the same cohort of retail investors that drive sentiment in crypto markets, crypto executives said."A SpaceX IPO would likely pull some capital out of crypto, atleast initially. Both compete for the same pool of risk capital," said Thomas Puech, CEO of crypto trading firm INDIGO,adding that relative to crypto, AI is "the 'sexier' trade at the moment."

Worst times for crypto

SpaceX's planned Friday Nasdaq debut could not come at a worse time for cryptocurrencies. Bitcoin tumbled 15% last week, the most since November 2022, when crypto exchange FTX imploded.

Adding to the pressure, Michael Saylor's Strategy, the largest corporate holder of bitcoin that has been relentlessly bullish on the token for years, disclosed last week that it had sold some of its holdings for the first time since 2022.

"It really is out of favour with investors," said David Morrison, senior market analyst, Trade Nation, adding bitcoin has lost its luster and novelty for many investors. "Excitement over the SpaceX IPO isn't helping either." Cryptocurrencies soared after U.S. President Trump's crypto-friendly administration took power but prices fell in October when he threatened to slap new tariffs on China and struggled to regain footing since.

Why SpaceX IPO may spell bad news for crypto
स्पेसएक्स का आईपीओ क्रिप्टोकरेंसी के लिए क्यों बुरी खबर साबित हो सकता है

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in

Website : patrioticias.in

SpaceX's much-anticipated $75 billion initial public offering (IPO), set to be the largest ever, will likely keep cryptocurrency prices in the doldrums as retail investors attracted to new and risky artificial intelligence (AI) stocks scramble to get a slice of the action.

बहुप्रतीक्षित स्पेसएक्स के 75 अरब डॉलर के प्रारंभिक सार्वजनिक निर्गम (IPO), जो अब तक का सबसे बड़ा आईपीओ होने जा रहा है, के कारण क्रिप्टोकरेंसी की कीमतें दबाव में रह सकती हैं क्योंकि नई और जोखिमपूर्ण कृत्रिम बुद्धिमत्ता (AI) कंपनियों के शेयरों की ओर आकर्षित खुदरा निवेशक उसमें निवेश करने के लिए उत्सुक हैं।

- Celebrity billionaire **Elon Musk's** rocket and satellite communications company — which merged with his AI startup **xAI** earlier this year — is expected to fetch a valuation of around **$1.75 trillion**, sparking a Wall Street and media frenzy.
  प्रसिद्ध अरबपति **एलन मस्क** की रॉकेट एवं उपग्रह संचार कंपनी, जिसने इस वर्ष की शुरुआत में उनके एआई स्टार्टअप **xAI** के साथ विलय किया था, का मूल्यांकन लगभग **1.75 ट्रिलियन डॉलर** तक पहुँचने का अनुमान है, जिससे वॉल स्ट्रीट और मीडिया में व्यापक उत्साह पैदा हो गया है।
- That has helped drive rotation out of risk assets like cryptocurrencies, as retail and other investors free up cash to buy shares in **SpaceX** — as well as hotly anticipated IPOs from **OpenAI** and **Anthropic** that are expected to follow this year, said analysts and crypto executives.
  विश्लेषकों और क्रिप्टो क्षेत्र के अधिकारियों के अनुसार, इस कारण निवेशक क्रिप्टोकरेंसी जैसे जोखिमपूर्ण परिसंपत्तियों से धन निकालकर **स्पेसएक्स** तथा इस वर्ष संभावित **ओपनएआई** और **एंथ्रोपिक** के आईपीओ में निवेश के लिए नकदी जुटा रहे हैं।
- SpaceX's IPO prospectus shows that the company overall is **unprofitable**, and its lofty valuation assumes years of rapid growth driven by its plan to become an **AI powerhouse**, in addition to other futuristic ambitions such as **Mars missions** and launching **AI data centres in space**.
  स्पेसएक्स के आईपीओ प्रॉस्पेक्टस से पता चलता है कि कंपनी अभी भी **लाभहीन** है और उसका उच्च मूल्यांकन इस धारणा पर आधारित है कि वह भविष्य में एक **एआई महाशक्ति** बनेगी, साथ ही **मंगल ग्रह मिशन** और अंतरिक्ष में **एआई डेटा सेंटर** स्थापित करने जैसी महत्वाकांक्षी योजनाओं को भी साकार करेगी।
- That makes it the type of risky and speculative AI bet that appeals to the same cohort of retail investors that drive sentiment in crypto markets, crypto executives said.
  क्रिप्टो क्षेत्र के अधिकारियों के अनुसार, इससे स्पेसएक्स एक ऐसा जोखिमपूर्ण और सट्टात्मक एआई निवेश विकल्प बन जाता है, जो उन्हीं खुदरा निवेशकों को आकर्षित करता है जो क्रिप्टो बाजार की धारणा को प्रभावित करते हैं।

No 'obesity gene': your genetic makeup is not a fixed destiny

Scientists cannot reliably predict whether an individual carrying certain gene variants will eventually end up obese; put another way, there is no 'obesity gene', and for similar reasons, there is no 'fat gene', 'lazy gene' or 'hunger gene'; genetics is also only one part of the story behind diseases

Sayantan Datta

In a 1983 paper, Harvard University geneticists James Gusella and Nancy Wexler reported that Huntington's disease, a fatal inherited disease where brain cells progressively decay, was caused by a gene mutation on chromosome 4. This was the first time a single gene had been implicated in a disease.

Since then, scientists have discovered about 5,000 genes whose mutations can increase our susceptibility to afflictions ranging from obesity to schizophrenia, and bipolar disorder.

Concomitant with the rise in genetic discoveries is the rise of commercial genetic testing. The U.S.-based company 23andMe, for example, offers a saliva-based test priced at around ₹20,000 that promises "insights into [people's] ancestry, traits and health that can help make it easier for [them] to take action on [their] health."

Similarly, Hyderabad-based MapMyGenome offers a "Genomepatri" service for ₹5,999. A play on *janampatri*, a Vedic birth chart purporting to forecast a person's destiny, Genomepatri offers to help consumers uncover their "authentic self" and enhance their health, according to their website.

But according to six geneticists this reporter spoke to, an individual's genetic composition is not their destiny.

"Mutations in our genes predispose us to specific traits and diseases, but it doesn't mean that if you have a mutation, you're going to get this disease," Tata Institute of Fundamental Research, Hyderabad, molecular geneticist Manish Jaiswal said.

What then does it mean to find a gene for a trait or disease – and what happens when we carry them?

Genetic tests should always be followed by genetic counselling. Genetic counsellors are specialists who help people assess their risk of developing genetic disorders and help manage them. GETTY IMAGES

Genes, mutations, disease

Genes are segments of DNA that provide the body a blueprint for building proteins, which eventually help define traits like eye colour or blood type.

When cells in our body divide, specialised proteins make copies of the DNA. This process, while largely accurate, can introduce errors in the duplicated DNA. These changes are called mutations and the corresponding gene is said to have an allele – a variant.

Only a small fraction of an organism's genome – which is the entire length of its DNA – has genes that its body uses to build proteins. For human beings, this coding region comprises about 2% of the genome. The rest of the DNA is non-coding, i.e. not involved in producing proteins, but regulates gene expression.

If a mutation in the coding region impairs the protein product, it may lead to a disease. For example, in Huntington's disease, a small section of the *HTT* gene is repeated more times than in an average individual. This produces a longer version of the protein, whose toxic fragments accumulate in brain cells and eventually kill them. As brain cells continue to die, people begin showing symptoms of the disease.

Sometimes, mutations in non-coding regions of the DNA can also change an individual's risk of a disease. For example, four independent studies in 2007 found that mutations in a particular non-coding region of the DNA were associated with a higher risk of coronary artery disease and type 2 diabetes. Later, in 2011, researchers found that the region contained certain enhancers, short DNA sequences that boost the expression of certain genes.

Identifying genes

To identify genes associated with a trait or disease, scientists until recently took two kinds of approaches: candidate-gene studies and linkage studies.

In candidate-gene studies, scientists use existing information about the disease to identify potential gene candidates that, when mutated, may lead to the disease. For example, because schizophrenia is treated with drugs that regulate the amount of dopamine in the human brain, scientists assumed until 2007 that mutations in genes related to dopamine regulation were linked to schizophrenia.

While such studies were successful in some cases, like Alzheimer's disease, in others they could not reliably identify genes associated with the disease. In the case of schizophrenia, for example, 21 of 25 candidate genes scientists historically studied were found to have little "empirical support ... as genetic risk factors for schizophrenia," a 2015 review in *Molecular Psychiatry* reported.

Linkage studies on the other hand begin by identifying a population or a family where the incidence of a trait or disease is particularly high. Then, scientists study how known markers in their DNA are inherited. If members of the population carrying the trait or disease also inherit the same markers, scientists can claim that the gene variant responsible for the disease and the marker are close on the chromosome, i.e. they are linked. By using statistical techniques, scientists can then pinpoint the gene.

This method works well when diseases are caused by mutations in one or a few genes, National Institute for Mental Health and Neuro Sciences (NIMHANS) genetics researcher Jayant Mahadevan said. Such diseases, like Huntington's, are called monogenic when their risk is determined by mutations in one gene and oligogenic when it's determined by mutations in a few genes.

However, most monogenic diseases are rare: they occur in less than 1% of the population, Dr. Mahadevan added. Most common diseases, including diabetes, obesity, coronary artery disease, and schizophrenia, are polygenic: they are determined by mutations in several genes.

For example, mutations in more than a 100 genes have been implicated in typical obesity. For type 2 diabetes, the most common form of the disease, recent studies place the number at approximately 250 genes. For schizophrenia, scientists suggest that the number could run into several hundreds.

In order to identify gene variants responsible for such diseases, researchers now typically undertake genome-wide association studies (GWAS). By comparing entire DNA sequences of a large number of individuals who carry a disease with that of individuals who don't, scientists can identify hundreds of variations associated with the disease through the entire length of an individual's DNA. This gives researchers a more holistic picture of the gene variations underlying the disease.

No 'obesity gene'

But possessing one or more gene variants implicated in a disease does not mean that one is doomed.

For one, not all gene mutations implicated in a disease have the same effect size. This is a measure of how strongly a gene variant can affect a trait. For example, most gene variants implicated in schizophrenia are thought to have small effect sizes: for an individual's schizophrenia risk to increase substantively, they need to have mutations in several of these genes.

Studies have shown similar results in the case of gene variants associated with obesity. In a 2010 study, scientists studied the effect sizes of 12 implicated. These have "small effects on obesity measures," they reported. Even mutations in the *FTO* gene, known to have the largest effect on an individual's obesity risk and is commonly dubbed the "obesity gene", predisposes a person to only a modest increase in weight compared with individuals who do not carry these mutations, the study added.

> Mutations in our genes predispose us to specific traits and diseases, but it doesn't mean that if you have a mutation, you're going to get this disease
>
> **MANISH JAISWAL**
> Molecular geneticist at Tata Institute of Fundamental Research

Even though a combination of mutations in these genes could compound the risk, "their predictive value for obesity risk is limited," the researchers concluded.

This means scientists cannot reliably predict whether an individual carrying these gene variants will eventually end up obese. Put another way, there is no "obesity gene". And for similar reasons, there is no "fat gene", "lazy gene" or "hunger gene".

Genetics is also only one part of the story behind a certain disease. The other part is epigenetics: a that refers to how physical, behavioural, and social factors affect the gene expression and, eventually, an individual's risk of a disease.

"Think of the genome as a piano, where each key represents a gene," said epigenetics researcher Ullas Kolthur-Seetharam, director of the Centre for DNA Fingerprinting and Diagnostics, Hyderabad, and a professor at the Tata Institute of Fundamental Research, Mumbai. "If a key is faulty, it can produce discordant notes – reflecting a potential disease risk. However, the system has flexibility: by adjusting how other keys are played, you can often compensate and still produce harmonious music."

"In the case of certain inherited diseases caused by critical mutations, some keys may be so impaired that no amount of adjustment can fully restore the intended melody," he added.

"In those situations, the limitation lies in the instrument itself. But for many complex conditions/diseases, how the piano is played (or how the genes are expressed) become as important as the keys themselves."

Indeed, behavioural and lifestyle interventions can actually reduce the risk of diseases. There is mounting evidence that in individuals with *FTO* variants that increase their risk of obesity, high-intensity exercise can reduce the gene's expression, potentially attenuating their risk of developing obesity. One 2015 study that investigated about 16,000 children and adolescents also found that "lower dietary protein intake attenuates the association between the *FTO* genotype and adiposity [the way fat is distributed] in children and adolescents."

Merits of genetic testing

In this context, what does it mean when scientists report identifying a new gene variant for a disease or a trait?

"All you've discovered is its pattern of occurrence in the population or the pattern of its transmission in a family," NIMHANS senior professor Sanjeev Jain, who works on the genetics of several neurological and psychiatric disorders, explained.

But figuring out whether the variant corresponds to the actual disease – and by how much – requires scientists to undertake more research involving diverse model systems, he added.

This doesn't mean genetic pursuit is itself useless, both Dr. Jain and Dr. Mahadevan cautioned. Genetic studies do help researchers identify the physiological mechanisms underlying a disease, which can help clinicians design more effective therapeutics. Scientists also often end up finding gene variants that are actually beneficial.

Starting in the 2000s, researchers discovered that some mutations in the *PCSK9* gene can drastically reduce the risk of coronary artery disease. Since then, clinicians have developed ways to silence the gene, thus reducing patients' cholesterol levels and mitigating the risk of stroke and heart attacks.

Some scientists also see merit in genetic testing – but only in certain contexts. Dimple Notani, a gene regulation researcher at the National Centre for Biological Sciences, Bengaluru, said women who conceive late could consider getting themselves screened for mutations linked to rare genetic disorders, which are often monogenic. But for traits that are not monogenic, "I wouldn't worry much," she added.

Genetic tests should always be followed by genetic counselling, Dr. Jaiswal, the TIFR Hyderabad geneticist, said. Genetic counsellors are specialists who help people assess their risk of developing genetic disorders, and help manage them.

In other words, genetics provides us with a helpful but incomplete picture. Between a mutation and its manifestation is a far messier story.

The reporter thanks Dr. Suhas Ganesh (NIMHANS) for his inputs.

Indian reservoirs can host 102 GW floating solar

GS III: S&T

Jacob Koshy
NEW DELHI

India's reservoirs can host about 102 gigawatt (GW) of floating solar capacity, as per the first comprehensive national assessment of the technology's potential by the National Institute of Solar Energy, an autonomous institute of the Ministry of New and Renewable Energy. The report titled "Solar PV Potential of India (Floating Solar)" frames panels on water as a way around one of the most intractable obstacles in the solar sector – land.

The assessment, however, has no calculation of what it would cost to realise this potential. Its only cost reference is a 2021 benchmark from U.S. National Renewable Energy Laboratory, which the report cites to note floating units cost about 25% more upfront than ground-mounted ones owing to floats, anchoring and waterproofing.

"We are in discussions with the Finance Ministry to promote floating solar and agri-photovoltaics," Santosh Kumar Sarangi, Secretary, MNRE said.

Water power: An aerial view of the floating solar panels on the Mudasarlova reservoir in Visakhapatnam. FILE PHOTO

Agri-photovoltaics refer to farm beds that are sheltered by structures on which solar panels are mounted.

Acquiring land

Ground-mounted solar systems, which dominate India's about 100 GW of installed solar capacity, need 3-4 times more area/MW than the panels themselves occupy. Land acquisition, which is costly, slow and prone to conflict with agriculture and habitation, continues to be a choke-point as India pursues 500 GW non-fossil capacity by 2030. Floating solar is 'land neutral', the report underlines.

NISE arrived at its estimate by passing India's inland water bodies via six geospatial filters: lakes and reservoirs larger than 10 hectare, water present for at least 11 months/year, depths of 3-30 metre, solar irradiance above 4.5 kWh/m²/day and proximity within 10 km of roads and substations. Demonstrated at Odisha's Hirakud reservoir, the filters whittled 499 sq. km. of water down to 99.5 sq. km. of usable surface. Applied nationwide, they yielded 1,946 sq. km. of feasible area with a self-imposed cap of 20% of any reservoir's surface, translating to 102.18 GW. Maharashtra (16.28 GW), Madhya Pradesh (14.89 GW), Karnataka (13.69 GW), Odisha (12.81 GW) and Telangana (10.72 GW) account for the bulk.

Flagship solar park

India's flagship is the Omkareshwar floating solar park on River Narmada in Madhya Pradesh's Khandwa district – at 278 MW, the country's largest with plans to scale to 600 MW. Yet NISE's field observations there recorded loosening float joints, misaligned platforms and uneven buoyancy alongside reports from developers of electric cables breaking. Globally, floating solar reached about 9.6 GW by 2024, almost 90% of it in Asia. China leads with installations such as a 120 MW plant on fish farm in Poyang Lake; Singapore's 1 MW Tengeh reservoir test bed supplied much of the field's performance data and Netherlands accounts for about 3/4th of Europe's capacity built largely on quarry lakes.

Indian reservoirs can host 102 GW floating solar
भारतीय जलाशयों में 102 गीगावाट फ्लोटिंग सौर क्षमता स्थापित की जा सकती है

India's reservoirs can host about 102 gigawatt (GW) of floating solar capacity, as per the first comprehensive national assessment of the technology's potential by the National Institute of Solar Energy (NISE), an autonomous institute of the Ministry of New and Renewable Energy.

नवीन एवं नवीकरणीय ऊर्जा मंत्रालय के स्वायत्त संस्थान राष्ट्रीय सौर ऊर्जा संस्थान (NISE) द्वारा इस प्रौद्योगिकी की क्षमता के प्रथम व्यापक राष्ट्रीय आकलन के अनुसार, भारत के जलाशयों में लगभग 102 गीगावाट (GW) की फ्लोटिंग सौर क्षमता स्थापित की जा सकती है।

- The report titled **"Solar PV Potential of India (Floating Solar)"** frames panels on water as a way around one of the most intractable obstacles in the solar sector — **land**.
  "सोलर पीवी पोटेंशियल ऑफ इंडिया (फ्लोटिंग सोलर)" शीर्षक वाली रिपोर्ट में जल सतह पर स्थापित सौर पैनलों को सौर क्षेत्र की सबसे जटिल चुनौतियों में से एक अर्थात् **भूमि** की समस्या का समाधान बताया गया है।
- The assessment, however, has no calculation of what it would cost to realise this potential.
  हालाँकि, इस आकलन में इस क्षमता को साकार करने की लागत का कोई अनुमान प्रस्तुत नहीं किया गया है।
- **Agri-photovoltaics** refer to farm beds that are sheltered by structures on which solar panels are mounted.
  एग्री-फोटोवोल्टाइक उन कृषि क्षेत्रों को संदर्भित करता है, जिनके ऊपर संरचनाएँ बनाकर उन पर सौर पैनल स्थापित किए जाते हैं।

- The **Netherlands** accounts for about **three-fourths of Europe's capacity** built largely on quarry lakes.
  नीदरलैंड यूरोप की कुल फ्लोटिंग सौर क्षमता का लगभग **तीन-चौथाई हिस्सा** रखता है, जिसका अधिकांश भाग खदानों से निर्मित झीलों पर विकसित किया गया है।

Hetero Labs, Hungary's Gedeon Richter to tie up for Semaglutide

GS III: S&T

The Hindu Bureau
HYDERABAD

Semaglutide is the active ingredient in Novo Nordisk's blockbuster drugs Wegovy and Ozempic

Budapest-headquartered Gedeon Richter and Hyderabad-based Hetero Labs announced on Wednesday signing of a global collaboration agreement for the joint development, registration and commercialisation of Semaglutide injection.

Under the agreement, they will combine complementary strengths under a coordinated global framework with clearly defined territorial responsibilities and a balanced cost- and profit-sharing model, the companies said on the collaboration for the generic of Danish major Novo Nordisk's Ozempic.

Semaglutide is the active ingredient in Novo Nordisk's blockbuster diabetes and weight loss drugs Wegovy and Ozempic.

Hetero has already made significant development investments, including technology setup and registration batch manufacturing. Regulatory filings are underway, with the EU and US submissions planned for 2027.

The collaboration leverages Hetero's proven market reach within the U.S. and Emerging Markets, as well as Richter's well-established commercial infrastructure across Europe and Central Asia, while maintaining optionality for future European manufacturing by Richter, the companies said.

The collaboration will enable us to deliver high quality, affordable therapies, Global Head of General Medicines at Richter Bence Kovacs said.

Hetero Labs, Hungary's Gedeon Richter to tie up for Semaglutide

हेटेरो लैब्स और हंगरी की गेडियॉन रिक्टर सेमाग्लूटाइड के लिए साझेदारी करेंगे

Budapest-headquartered Gedeon Richter and Hyderabad-based Hetero Labs announced on Wednesday signing of a global collaboration agreement for the joint development, registration and commercialisation of Semaglutide injection.

बुडापेस्ट मुख्यालय वाली गेडियॉन रिक्टर और हैदराबाद स्थित हेटेरो लैब्स ने बुधवार को सेमाग्लूटाइड इंजेक्शन के संयुक्त विकास, पंजीकरण और व्यावसायीकरण के लिए एक वैश्विक सहयोग समझौते पर हस्ताक्षर करने की घोषणा की।

- **Semaglutide** is the active ingredient in **Novo Nordisk's** blockbuster diabetes and weight loss drugs **Wegovy** and **Ozempic**.
  सेमाग्लूटाइड, **नोवो नॉर्डिस्क** की प्रसिद्ध मधुमेह एवं वजन घटाने वाली दवाओं **वेगोवी** और **ओज़ेम्पिक** का सक्रिय घटक है।
- **Hetero** has already made significant development investments, including technology setup and registration batch manufacturing.
  हेटेरो पहले ही प्रौद्योगिकी स्थापना तथा पंजीकरण बैच निर्माण सहित विकास संबंधी महत्वपूर्ण निवेश कर चुकी है।
- Regulatory filings are underway, with the **EU** and **US**

submissions planned for **2027**.
नियामकीय प्रस्तुतियाँ जारी हैं तथा **यूरोपीय संघ (EU)** और **संयुक्त राज्य अमेरिका (US)** में आवेदन **2027** के लिए नियोजित हैं।

THE HINDU
GS III: Disaster Management

Foreseeable accidents

Industrial mishaps are due to accumulated organisational weaknesses

Despite there having been a streak of industrial accidents in India of late, the notion that they are isolated and incidental persists. Within days of each other, four workers were killed in a 'mishap' in a septic tank in Surat while nine workers were killed by an explosion at a steel plant in Visakhapatnam. They appear to be different circumstances: one involved workers entering a confined space and succumbing to toxic gases; the other involved 150 tonnes of molten steel and a violent blast. Yet, industry has known of these risks and had developed preventive measures decades ago. In the Surat incident, four workers entered the tank and were overcome by toxic fumes. The circumstances resemble a well-known pattern in fatalities in confined spaces, where the first victims are often followed by would-be rescuers who enter without protection. There have been deaths in similar circumstances in Surat's industrial sector in recent years. The working area must be mechanically ventilated and have rescue personnel on standby while the workers must have breathing apparatuses, harnesses and retrieval lines, and clear lines of communication. Unprotected entry must be strictly prohibited. Septic tank deaths and deaths due to manual scavenging are in fact rarely accidents in the sense of unforeseeable events, but failures of basic safety management, and the recurrence of such incidents speaks to the persistence of that failure. Likewise, while steelmaking is intrinsically more dangerous because it combines extreme temperatures, pressurised gases, heavy equipment, and enormous stores of heat energy, industry still knows the hazards it poses, and further that even relatively small process failures can result in multiple casualties.

Both incidents, and the patterns they extend, are reminders of persistent safety failures in many parts of Indian industry. In Visakhapatnam, trade unions and former employees have alleged that the plant had reduced staffing, heavier workloads, ageing equipment, deferred maintenance, and an increasing dependence on contractual labour. Some also linked these trends to the difficulties the plant faced following the Centre's divestment plans and the resulting constraints on investments. However true any of these factors are, they confirm that a major industrial accident is almost always due to the accumulation of organisational weaknesses. In fact, contract labour is central to understanding both incidents. Occupational safety research has consistently found that contracted workers face higher risks because they may receive less training and operate within systems with fragmented accountability. The incidents have also occurred during the gradual and uneven implementation of India's new occupational safety framework – and highlight the invisible fact that the country's industries remain anchored by old problems of manpower shortage, caste- and class-based exposure to hazardous labour, and a 'cost over safety' mindset in financially stressed units.

Foreseeable accidents
पूर्वानुमेय दुर्घटनाएँ

- The working area must be mechanically ventilated and have rescue personnel on standby while the workers must have breathing apparatuses, harnesses and retrieval lines, and clear lines of communication.

कार्यस्थल में **यांत्रिक वेंटिलेशन** होना चाहिए तथा बचाव कर्मियों को तैयार रहना चाहिए, जबकि श्रमिकों के पास **श्वसन उपकरण**, **हार्नेस**, **रिट्रीवल लाइनें** और स्पष्ट **संचार व्यवस्था** होनी चाहिए।

- Septic tank deaths and deaths due to manual scavenging are in fact rarely accidents in the sense of unforeseeable events, but failures of basic safety management, and the recurrence of such incidents speaks to the persistence of that failure.

वास्तव में **सेप्टिक टैंक** तथा **मैनुअल स्कैवेंजिंग** से होने वाली मौतें अप्रत्याशित दुर्घटनाएँ कम और **मूलभूत सुरक्षा प्रबंधन की विफलताएँ** अधिक होती हैं, तथा ऐसी घटनाओं की पुनरावृत्ति इसी विफलता की निरंतरता को दर्शाती है।

- Likewise, while steelmaking is intrinsically more dangerous because it combines extreme temperatures, pressurised gases, heavy equipment, and enormous stores of heat energy, industry still knows the hazards it poses, and further that even relatively small process failures can result in multiple casualties.

इसी प्रकार, यद्यपि **इस्पात निर्माण** स्वाभाविक रूप से अधिक खतरनाक है क्योंकि इसमें अत्यधिक तापमान, **दाबयुक्त गैसें**, भारी उपकरण और विशाल **ऊष्मा ऊर्जा** शामिल होती है, फिर भी उद्योग इसके खतरों से परिचित है तथा यह भी जानता है कि प्रक्रिया में अपेक्षाकृत छोटी विफलताएँ भी अनेक लोगों की मृत्यु का कारण बन सकती हैं।

- In Visakhapatnam, trade unions and former employees have alleged that the plant had reduced staffing, heavier workloads, ageing equipment, deferred maintenance, and an increasing dependence on contractual labour.

विशाखापत्तनम में **ट्रेड यूनियनों** और पूर्व कर्मचारियों ने आरोप लगाया है कि संयंत्र में कर्मचारियों की संख्या कम की गई, कार्यभार बढ़ाया गया, उपकरण पुराने हो गए, रखरखाव टाला गया तथा **ठेका श्रमिकों** पर निर्भरता बढ़ गई।

- Some also linked these trends to the difficulties the plant faced following the Centre's divestment plans and the resulting constraints on

investments.
कुछ लोगों ने इन प्रवृत्तियों को **केंद्र सरकार की विनिवेश योजनाओं** के बाद संयंत्र द्वारा झेली गई कठिनाइयों तथा निवेश संबंधी बाधाओं से भी जोड़ा।

- Occupational safety research has consistently found that contracted workers face higher risks because they may receive less training and operate within systems with fragmented accountability.
व्यावसायिक सुरक्षा अनुसंधान लगातार यह दर्शाता है कि **ठेका श्रमिक** अधिक जोखिम का सामना करते हैं क्योंकि उन्हें कम प्रशिक्षण मिल सकता है और वे ऐसी प्रणालियों में कार्य करते हैं जहाँ **जवाबदेही विभाजित** होती है।

- The incidents have also occurred during the gradual and uneven implementation of India's new occupational safety framework — and highlight the invisible fact that the country's industries remain anchored by old problems of manpower shortage, caste- and class-based exposure to hazardous labour, and a 'cost over safety' mindset in financially stressed units.
ये घटनाएँ **भारत के नए व्यावसायिक सुरक्षा ढाँचे** के क्रमिक और असमान कार्यान्वयन के दौरान हुई हैं तथा इस अदृश्य तथ्य को उजागर करती हैं कि देश के उद्योग अब भी **जनशक्ति की कमी**, **जाति एवं वर्ग आधारित खतरनाक श्रम**, तथा आर्थिक दबाव झेल रही इकाइयों में **'सुरक्षा से अधिक लागत'** वाली मानसिकता जैसी पुरानी समस्याओं से बँधे हुए हैं।

Major lacunae in reporting industrial accidents

The inconsistencies in the data compiled by the Labour Bureau and the DGFASLI point to severe lapses in reporting of industrial accidents

GS III: Disaster Management
DATA POINT

Sambavi Parthasarathy
Pon Vasanth B.A.

The death toll from the explosion at the Rashtriya Ispat Nigam Limited-Visakhapatnam Steel Plant (RINL-VSP) on June 8, rose to nine on Wednesday. Following the incident, a familiar chain of bureaucratic responses has been triggered such as ex-gratia for the bereaved families and the constitution of an expert committee for a high-level probe. These were the same measures taken after the last major accident at the plant in 2014, and indeed after most workplace accidents across the country. But India appears to be lagging in strengthening institutional mechanisms needed to prevent such accidents **(Chart 2)**.

The problem begins with the very collection of safety data, as the gaps in the annual Standard Reference Notes (SRNs) of the Directorate General Factory Advice Service and Labour Institutes (DGFASLI) reveal. DGFASLI helps implement the Occupational Safety, Health and Working Conditions (OSH) Code, 2020. The OSH, for which the rules were notified only last month, renamed the DGFASLI as the Directorate General of Occupational Safety and Health.

Each SRN records industrial accidents in two sections: one from data compiled by the Labour Bureau and the other from DGFASLI's own correspondence with Chief Inspectors of Factories. The two never match, pointing to lapses in reporting **(Chart 3)**.

The reports also show DGFASLI struggling with heavy vacancies **(Chart 4)**. The country does not have enough factory inspectors, even in industrialised States such as Tamil Nadu **(Chart 5)**. This gets consequently reflected in the small fraction of factories inspected each year **(Chart 6)**. Moreover, many States simply do not report the required details **(Chart 7)**.

Institutional apathy

Data for the charts were sourced from Standard Reference Notes (SRNs) and Accidental Deaths & Suicides in India (ADSI) reports. With inputs from Nitika Francis and Sandhya K, who is interning with *The Hindu*

Flames erupt in a steel plant after molten iron spills while being moved in a bucket by a crane in Visakhapatnam, Andhra Pradesh, on Monday, June 8. PTI

Chart 1: Deaths ( ) and injuries ( ) reported in fire accidents in factories, as per ADSI reports

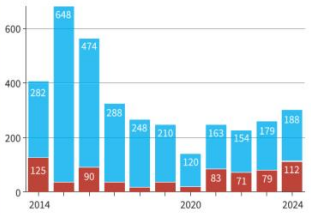

Chart 2: The number of registered factories in each year ( ) and the number of employees in millions ( )

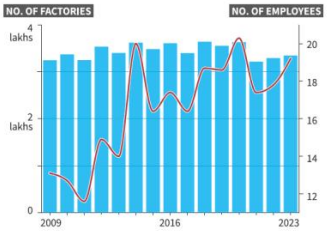

Chart 3: Fatal and non-fatal injuries as per the Labour Bureau (LB) and (CIFs), which vary widely over the years, with a few showing unexplained swings in the SRNS

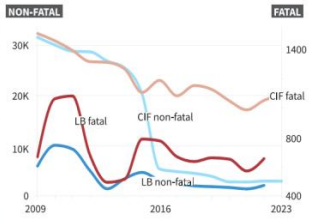

Chart 4: The year-wise vacancies ( ) and filled positions ( ) in DGFASLI. Nearly 50% of the 349 sanctioned posts remained vacant as of 2023

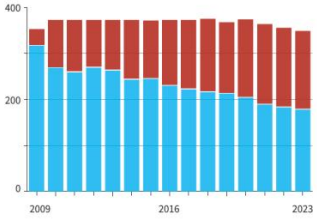

Besides wide variations within the SRNs between the LB and CIFs' data, the fire accidents captured by them were only a third of the numbers reported in ADSI reports

Chart 5: Inspectors per factory among the States with the highest number of factories as of 2023

	Number of factories	Inspectors of Factories	Factories per inspector
Tamil Nadu	50,669	106	478
Gujarat	49,246	81	608
Maharashtra	39,533	44	898
Haryana	25,607	35	732
A.P.	24,642	42	587
Kerala	22,601	53	426
Telangana	22,118	27	819
Karnataka	18,389	48	383
Delhi	13,616	7	1,945
Rajasthan	11,014	27	408

Chart 6: The share of factories inspected by DGFASLI each year (in %). The inspections have dropped significantly in the recent years, perhaps due to the staff crunch

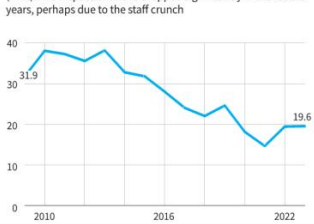

Chart 7: Many States did not furnish data on fatal and non-fatal incidents, either to the Labour Bureau, or DGFASLI, as per the SRNs. U.P., Karnataka and W.B. did not provide data even once

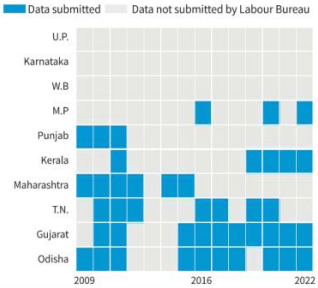

Major lacunae in reporting industrial accidents
औद्योगिक दुर्घटनाओं की रिपोर्टिंग में प्रमुख कमियाँ

- The problem begins with the very collection of safety data, as the gaps in the annual **Standard Reference Notes (SRNs) of the Directorate General Factory Advice Service and Labour Institutes (DGFASLI)** reveal.
  समस्या की शुरुआत **सुरक्षा संबंधी आँकड़ों** के संग्रहण से ही होती है, जैसा कि **डायरेक्टरेट जनरल फैक्ट्री एडवाइस सर्विस एंड लेबर इंस्टीट्यूट्स (DGFASLI)** की वार्षिक **स्टैंडर्ड रेफरेंस नोट्स (SRNs)** में मौजूद कमियों से स्पष्ट होता है।
- **DGFASLI helps implement the Occupational Safety, Health and Working Conditions (OSH) Code, 2020**.
  DGFASLI, **व्यावसायिक सुरक्षा, स्वास्थ्य एवं कार्य परिस्थितियाँ (OSH) संहिता, 2020** के कार्यान्वयन में सहायता करता है।
- **The OSH, for which the rules were notified only last month, renamed the DGFASLI as the Directorate General of Occupational Safety and Health**.
  OSH संहिता, जिसके नियम केवल पिछले महीने अधिसूचित किए गए, ने **DGFASLI** का नाम बदलकर **व्यावसायिक सुरक्षा एवं स्वास्थ्य महानिदेशालय** कर दिया है।
- Each SRN records industrial accidents in two sections: one from data compiled by the Labour Bureau and the other from DGFASLI's own correspondence with Chief Inspectors of Factories.
  प्रत्येक **SRN** औद्योगिक दुर्घटनाओं का विवरण दो भागों में दर्ज करता है: पहला **श्रम ब्यूरो** द्वारा संकलित आँकड़ों पर आधारित होता है और दूसरा **DGFASLI** तथा **मुख्य कारखाना निरीक्षकों** के बीच हुए पत्राचार पर।
- The two never match, pointing to lapses in reporting (Chart 3).
  ये दोनों आँकड़े कभी मेल नहीं खाते, जो **रिपोर्टिंग प्रणाली** में कमियों की ओर संकेत करते हैं (चार्ट 3)।
- The reports also show DGFASLI struggling with heavy vacancies (Chart 4).
  रिपोर्टें यह भी दर्शाती हैं कि **DGFASLI** गंभीर **रिक्तियों** की समस्या से जूझ रहा है (चार्ट 4)।

Vijay keeps promise, launches Singappen Special Force in T.N.

[redacted]

N. Sai Charan
CHENNAI

Tamil Nadu Chief Minister C. Joseph Vijay on Tuesday warned that those who harassed women and threatened their safety, believing that they could escape punishment, would not be spared. The police would take strict action against them, he said.

He was launching the 'Singappen Special Force' in the Tamil Nadu Police at the Rajarathinam Stadium at Egmore in Chennai.

The Chief Minister said the root cause of threats to women's safety was the spread of narcotics and substance abuse, and it must be stamped out.

"The success of a government should not be measured by infrastructure and economic growth alone; it should be measured by dignity and respect with which women and children live," he said.

Close to heart

The launch of the special force, which Mr. Vijay said was close to his heart, gave him immense happiness. "We [the Tamilaga Vettri Kazhagam] had promised to ensure the safety of our grandmothers, mothers, sisters, daughters, and girl children. That promise was not merely for the election. It came emotionally and truthfully from the heart. That is why we implemented this initiative within a short period of coming to power," Mr. Vijay said.

"While this initiative gives satisfaction, hearing news about crimes against women disturbs me. It is difficult to control those emotions because such atrocities happen to people who belong to our own families," he said.

Chief Minister C. Joseph Vijay unveils the monogram of Singappen Special Force in Chennai. B. JOTHI RAMALINGAM

The Chief Minister attributed crimes against women and children to the spread of narcotic substances.

"This problem did not emerge suddenly in May 2026. It has existed for many years. It has spread so deeply because it was ignored for long," he said, adding that the spread of narcotics, crimes against women, and law and order were interlinked.

He added that the safety of women and children was not merely a law and order issue. "It is connected to social discipline, and within social discipline lies individual discipline. If individuals behave responsibly and with self-control, society will change. Women must have dignity and no fear at educational institutions and workplaces, during travel, and in their daily lives," Mr. Vijay said.

10J6. Vijay keeps promise, launches Singappen Special Force in T.N.

विजय ने अपना वादा निभाया, तमिलनाडु में 'सिंगप्पेन स्पेशल फ़ोर्स' की शुरुआत की।

- He was launching the **'Singappen Special Force'** in the **Tamil Nadu Police** at the **Rajarathinam Stadium** at **Egmore** in **Chennai**.

वे **चेन्नई** के **एग्मोर** स्थित **राजारथिनम स्टेडियम** में **तमिलनाडु पुलिस** के अंतर्गत **'सिंगप्पेन स्पेशल फोर्स'** का शुभारंभ कर रहे थे।

- The Chief Minister said the root cause of threats to **women's safety** was the spread of **narcotics** and **substance abuse**, and it must be stamped out.

मुख्यमंत्री ने कहा कि **महिला सुरक्षा** के लिए उत्पन्न खतरों का मूल कारण **मादक पदार्थों** का प्रसार और **नशे का दुरुपयोग** है, तथा इसे समाप्त किया जाना चाहिए।

- "The success of a government should not be measured by **infrastructure** and **economic growth** alone; it should be measured by dignity and respect with which **women** and **children** live," he said.

उन्होंने कहा, "किसी सरकार की सफलता का आकलन केवल **बुनियादी ढाँचे** और **आर्थिक विकास** से नहीं किया जाना चाहिए; बल्कि इस आधार पर किया जाना चाहिए कि **महिलाएँ** और **बच्चे** कितनी गरिमा और सम्मान के साथ जीवन व्यतीत करते हैं।"

श्री विजय ने कहा, "महिलाओं को **शैक्षणिक संस्थानों**, **कार्यस्थलों**, **यात्रा के दौरान** तथा अपने **दैनिक जीवन** में पूर्ण **गरिमा** और **निर्भयता** के साथ जीवन जीने का अधिकार होना चाहिए।"

Shipping authority's inquiry report lists reasons for *MSC Elsa 3* sinking

PCS [redacted]

The Hindu Bureau
KOCHI

The Directorate General of Shipping concluded the preliminary investigation into the sinking of the container ship *MSC Elsa-3* off the Alappuzha coast in May 2025. The inquiry report, submitted in an affidavit before the Kerala High Court, identified causes of the incident that led to marine pollution off Alappuzha and along parts of the southern coast.

Critical system malfunction, compounded by structural failures and the incompetence of crew members, was identified as the causative factor in the report. It said that the ship had shown an inherent tilt to the right in previous voyages. During the journey from Vizhinjam to Kochi, the ship's ballast water system failed first, and as a result, the crew could not stop the progressive flooding into the ballast tanks. The ship's safety management system was reported to be deficient, especially regarding maintenance procedures and spare parts management. The ship had tilted to about 26 degrees, causing several container stacks to shift, further compromising the ship's stability. By midnight on May 24, 2025, the containers had begun to fall overboard, creating additional hazards.

The shipping authority concluded the preliminary probe into the sinking of *MSC Elsa-3* in May 2025 off the Alappuzha coast. AP

The investigation found that known defects were inadequately addressed, with reliance on temporary fixes that created system weaknesses.

The chief officer of the ship had joined one week before the incident and was not given sufficient time for the handover, which also added to the lack of crisis management, the report said.

Interviews of the crew showed that there were gaps in practical training for emergency ballast operations. Many crew members had only demonstrated theoretical knowledge with no real-time experience, according to the report.

10J6. Shipping authority's inquiry report lists reasons for MSC Elsa 3 sinking
नौवहन प्राधिकरण की जाँच रिपोर्ट में MSC Elsa 3 के डूबने के कारणों का उल्लेख किया गया है।

- **The Directorate General of Shipping** concluded the **preliminary investigation** into the sinking of the **container ship MSC Elsa-3** off the **Alappuzha coast** in **May 2025**.
  नौवहन महानिदेशालय (Directorate General of Shipping) ने **मई 2025** में **अलप्पुझा तट** के निकट डूबे **कंटेनर जहाज MSC Elsa-3** की **प्रारंभिक जांच** पूरी कर ली।
- The inquiry report, submitted in an affidavit before the **Kerala High Court**, identified causes of the incident that led to **marine pollution** off **Alappuzha** and along parts of the southern coast.
  केरल उच्च न्यायालय में शपथपत्र के रूप में प्रस्तुत जांच रिपोर्ट में उन कारणों की पहचान की गई, जिनके कारण **अलप्पुझा** तट तथा दक्षिणी तट के कुछ हिस्सों में **समुद्री प्रदूषण** फैल गया।
- **Critical system malfunction**, compounded by **structural failures** and the **incompetence of crew members**, was identified as the causative factor in the report.
  रिपोर्ट में **महत्वपूर्ण प्रणालीगत खराबी**, **संरचनात्मक विफलताओं** तथा **चालक दल के सदस्यों की अक्षमता** को इस घटना का प्रमुख कारण बताया गया है।
- It said that the ship had shown an inherent tilt to the right in previous voyages.
  रिपोर्ट में कहा गया है कि पूर्व की यात्राओं के दौरान भी जहाज में दाईं ओर झुकाव की अंतर्निहित समस्या देखी गई थी।
- During the journey from **Vizhinjam** to **Kochi**, the ship's **ballast water system** failed first, and as a result, the crew could not stop the progressive flooding into the ballast tanks.
  विझिंजम से **कोच्चि** की यात्रा के दौरान जहाज की **बैलेस्ट जल प्रणाली (Ballast Water System)** सबसे पहले विफल हो गई, जिसके परिणामस्वरूप चालक दल बैलेस्ट टैंकों में बढ़ते जलभराव को रोक नहीं सका।
- The ship's **safety management system** was reported to be deficient, especially regarding **maintenance procedures** and **spare parts management**.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

First-timers

Upsets and withdrawals saw new champions at the French Open

The triumphs of Alexander Zverev and Mirra Andreeva at the French Open for their maiden Grand Slam singles titles appear to have evoked contrasting feelings in both. For 29-year-old Zverev, the rousing five-set victory over Italian Flavio Cobolli brought more relief than unbridled joy, for he had lost thrice before in a Major final and was long considered among the best players to have never won a Slam. But for Andreeva, the straight-forward win over the unheralded qualifier Maja Chwalinska – albeit under testing windy conditions – was a journey to seventh heaven and a realisation of her prodigious teenaged promise. Both players benefitted from notable absences and a plethora of upsets, so much so that neither faced a top-10 opponent all tournament. Among men, Carlos Alcaraz withdrew while red-hot favourite Jannik Sinner and 24-time Major winner Novak Djokovic fell by the third round. In the ladies section, none among Aryna Sabalenka, Iga Swiatek, Coco Gauff and Elena Rybakina reached the semifinals. But in fairness, both Zverev and Andreeva were pedigreed. Zverev was – and still is – World No. 3, has been in the top-4 for the last two years, and in the top-10 for a good part of the last decade. Andreeva reached the Roland-Garros semifinal as a 17-year-old in 2024, entered the top-10 in early 2025 after back-to-back successes in Dubai and Indian Wells, and has maintained that status.

Zverev is just the third German man in the Open Era to win a Slam and the first to do so in Paris. The victory will also go a long way in erasing a few painful memories he has experienced on Court Philippe-Chatrier. In 2022, he limped out of his semifinal against Rafael Nadal on crutches after damaging his right ankle in the second set. In 2024, he was up two sets to one against Alcaraz in the final before falling apart. The 2026 edition, which snapped Alcaraz and Sinner's combined winning streak of nine Majors, is his redemption song. Andreeva's career, in contrast, is yet to experience the vagaries of the tennis tour. After first making waves as a 16-year-old qualifier in 2023, reaching the round of 32 at the French Open and the round of 16 at Wimbledon, the Russian shot up to No. 5 by July 2025. Andreeva has competed in 13 Slams so far, and has reached the fourth round or better in eight. It is a remarkable record for someone who is yet to turn 20, and her dash to the title over the previous fortnight for the loss of just one set is confirmation of her elite status.

10J6. QUIZ

1. Sardari Larai (Sardar Movement) and its Influence on Birsa's Uprising

- The **Sardari Larai**, active mainly between the 1850s and 1890s in the Chotanagpur region, was an agrarian movement led by Munda and Oraon tribal leaders known as Sardars.
- It emerged against land alienation, excessive rents, forced labour, and the erosion of traditional **Khuntkatti** land rights under British rule.
- The movement largely relied on petitions and legal appeals. Young **Birsa Munda** closely observed this struggle and was influenced by its demands.
- Historians regard the Sardari movement as the immediate precursor to Birsa's rebellion because it shaped the political consciousness and anti-colonial atmosphere of Chotanagpur.

2. Ulgulan – The "Great Tumult"

- The Munda uprising led by **Birsa Munda** during 1899–1900 is popularly known as **Ulgulan**, meaning "Great Tumult" or "Great Upheaval."
- It was not merely a tribal revolt but a broad social, economic, religious, and political movement against British colonial rule, exploitative landlords, moneylenders, and missionary influence.
- The movement reflected deep resentment against land dispossession and exploitation. Though suppressed by the British, Ulgulan became a landmark in tribal resistance and later influenced protective laws such as the **Chotanagpur Tenancy Act, 1908**.

3. "Abua Raj ete jana, Maharani raj tundu jana"

- The slogan **"Abua Raj ete jana, Maharani raj tundu jana"** translates as "Let our rule come, let the Queen's rule go." It became the political message of Birsa Munda's movement.

4. Birsait – The Faith Founded by Birsa Munda

- **Birsait** refers to the distinct religious community that emerged around the teachings of Birsa Munda. Birsa preached monotheism, moral reform, social discipline, and a return to indigenous tribal traditions.
- He opposed excessive ritualism, superstition, missionary conversions, and social evils affecting tribal society.
- His followers regarded him as a spiritual guide and often referred to him as **"Dharti Aba" (Father of the Earth)**. Birsait combined elements of traditional Munda beliefs with reformist ideas and became a powerful source of social unity.

5. Birsa Munda's Death in Ranchi Jail

- **Birsa Munda** died in **Ranchi Jail** on **9 June 1900** while in British custody.
- The official British record stated that the cause of death was **cholera**.

Congress's RS nomination rejected during scrutiny; chaos in M.P. house

GS II: Polity

Mehul Malpani
BHOPAL

A dramatic day of political developments in Madhya Pradesh's capital Bhopal that began with several Congress MLAs heading to the airport to leave for Bengaluru, ended with the nomination of Meenakshi Natarajan, the party candidate for one of three Rajya Sabha seats from the State, being rejected during scrutiny.

This prompted top Congress leaders, led by party general secretary K.C. Venugopal, to stage a sit-in outside the Election Commission(EC)'s office in New Delhi.

The rejection of the nomination came at a time when a batch of Congress MLAs was en route to Bengaluru amid fears of cross-voting in the polls, prompting the State leaders to ask them to return to Bhopal.

A Congress delegation comprising party general secretaries and others protests outside the EC office in New Delhi on Tuesday. ANI

Ms. Natarajan accused the Bharatiya Janata Party (BJP) of having "moved from vote theft to seat theft".

"It started when the BJP fielded a third candidate despite not having the adequate number of members, and we started to understand the kind of politics it is practising with democracy and the Constitution. What was limited to vote theft through SIR [special intensive revision of electoral rolls] and other methods has today reached [the stage of] seat theft," she said at a press conference on Tuesday.

Ms. Natarajan's nomination was rejected by Assembly Secretary Arvind Sharma, who is the Returning Officer for the election, based on an objection raised by the BJP candidate for the third seat, Mahesh Kewat, and State party general secretary Rahul Kotharі. They alleged that Ms. Natarajan had "hidden" details of a case against her in Hyderabad. The objection led to chaotic scenes at the Assembly Secretariat in Bhopal, with dozens of Congress and BJP workers engaging in arguments.

Several senior State BJP leaders and MLAs, including Cabinet Ministers Rakesh Singh and Kailash Vijayvargiya, as well as Mr. Kewat remained in the Assembly Secretariat during the proceedings and celebrated after the Returning Officer ruled against Ms. Natarajan.

सुश्री **नटराजन** का नामांकन **विधानसभा सचिव अरविंद शर्मा**, जो इस चुनाव के **रिटर्निंग अधिकारी** हैं, द्वारा निरस्त कर दिया गया। यह निर्णय तीसरी सीट के लिए **भाजपा** उम्मीदवार **महेश केवट** और प्रदेश महासचिव **राहुल कोठारी** द्वारा उठाई गई आपत्ति के आधार पर लिया गया।

A State without an Opposition

Gujarat's voice in the Rajya Sabha will be routed entirely through a single party

GS II: Polity

STATE OF PLAY

Abhinay Deshpande

On June 21, when Congress leader Shaktisinh Gohil's term in the Rajya Sabha ends, Gujarat will witness something it has not seen since the State's formation in 1960: the absence of any representation from the Opposition of the State in the Upper House.

The vacancy itself is not unusual. But what makes this transition noteworthy is what it reveals about the rapidly changing nature of political competition in Gujarat rather than one party's misfortune in a State that once supplied some of its most influential leaders. This transition is a product of electoral arithmetic rather than a sudden political shift, and a new and consequential chapter in the story of Gujarat where the Bharatiya Janata Party (BJP) has been quietly rewriting its democratic architecture for three decades. Gujarat has been under BJP rule since 1995; such sustained dominance has translated into an overwhelming majority in the State Assembly, which in turn has determined representation in the Rajya Sabha.

No rebel voices

In the 2022 Assembly elections, the BJP won 156 of the 182 seats, marking its strongest performance in the State's electoral history. This outcome came even after the Patidar agitation which had created expectations of a strong anti-incumbency wave. The Congress, which had seen the agitation as a potential opening, failed to convert sentiments into votes. No party crossed the 18-seat threshold required to claim official Opposition status. The Congress ended up with just 17 seats and the Aam Aadmi Party (AAP) won five seats. Today, Gujarat's 182-member Assembly has 162 BJP legislators, 12 Congress MLAs, four from the AAP, and one from the Samajwadi Party. The combined Opposition, fragmented and below the recognition threshold, thus cannot nominate a single Rajya Sabha candidate.

The seat vacated by Mr. Gohil will go to the BJP, as will the other three seats which are to be vacant at the same time. Mr. Gohil, in his term at the Upper House, filed a breach of privilege notice against Union Minister Piyush Goyal for allegedly violating rules of procedure; challenged amendments to cooperative bank governance; and raised Gujarat's unresolved concerns from the Opposition benches. But now, all 11 Rajya Sabha seats from Gujarat will belong to one party, completing its sweep of the State's Upper House representation.

A Congress leader from the State opined that the party failed to establish a coherent narrative capable of competing with the BJP's vision of governance and identity, but argued that the ruling party's "arrogance" is reflected in its belief that there is effectively no Congress left. He went on to add, "what does Gujarat gain from a weakened or absent Opposition? Who will speak for the farmers of Gujarat, and who will raise the voice of ordinary citizens if there is no strong countervailing force in the system?"

When Mr. Gohil walks out, the only Opposition voice left in Parliament from Gujarat will be Geniben Thakor, the MP from Banaskantha who in 2024 ended a 10-year Lok Sabha drought for the Opposition by winning one of 26 seats. One Lok Sabha MP. Zero Rajya Sabha MPs. This is the Opposition in Gujarat today.

Fight to be the Opposition

In this vacuum, the AAP harbours ambitions of displacing the Congress as the principal Opposition force in the State. With five Assembly seats and a 12.91% vote share in 2022, the AAP has positioned itself as the inheritor of the anti-BJP vote that the grand old party has steadily bled.

Yet the AAP's Gujarat story remains aspirational. Its single-digit MLA count is a fraction of what is needed to mount a legislative challenge. The Congress retains 12 MLAs and the institutional weight of a party that has governed the State for decades. The two are now locked in a peculiar subcompetition, not for power, but for the right to be recognised as the Opposition, while the BJP governs without meaningful scrutiny from any quarter. This internal contest has, if anything, only deepened the ruling party's structural advantage.

The BJP's dominance in Gujarat is a political fact, but the absence of an Opposition raises difficult questions. What does it mean when a major State's voice in the Upper House is routed entirely through a single party, with no effective counterweight from within? The answers extend beyond partisan loyalties.

₹95,962 crore set aside for VB-G RAM G

GS II: Governance: Government Scheme

NEW DELHI

Union Rural Development Minister Shivraj Singh Chouhan on Tuesday announced an interim allocation of ₹95,962 crore for the new rural employment scheme, the Viksit Bharat-Guarantee for Rozgar and Ajeevika Mission Gramin (VB-G RAM G).

This sum does not include the State governments' share and most States will have to contribute an additional 40% of the sum allocated to them. The combined outlay for the scheme will be ₹1.25 lakh crore. The interim allocation seeks to ensure a "seamless transition" to the new scheme and no State would face any reduction in funds, Mr. Chouhan said.

Uttar Pradesh has got the highest of ₹9,721.48 crore, followed by West Bengal (₹8,508 crore), Tamil Nadu (₹7,585.49 crore), Rajasthan (₹7,581.87 crore), Andhra Pradesh (₹7,707.21 crore) and Bihar (₹6,715.83 crore).

The interim allocation seeks to ensure a 'seamless transition' from MGNREGS to the new rural employment scheme. AFP

The total allocation for States stands at ₹92,550.17 crore, while the Union Territories have been allocated ₹1,291.52 crore. An additional ₹1,850.62 crore has been earmarked for Central administration and social audits, taking the total to ₹95,692.31 crore.

Mr. Chouhan said that the allocation had been made even before notifying the scheme's rules and framing the formula dictating distribution to different States, to ensure "a seamless transition" from the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS).

"Without causing any inconvenience to workers, we are moving from MGNREGA to VB-G RAM G. There will not be a gap of even a single day in the availability of work," the Union Minister said.

Funding formula

The allocation is largely in line with funds given to States under the MGNREGA in the previous financial years. The thrust of the new programme, however, is to ensure that the employment scheme has a wider presence in economically weaker States, as indicated by the proposal in the draft rules to use the 16th Finance Commission's horizontal devolution formula to determine Central allocations to States. The final formula for distributing the funds, expected to be notified on July 1, could alter the future share of different States.

Four States not ready

Mr. Chouhan also said that 26 States have completed the procedural requirements necessary to implement the new scheme, while four States – Jharkhand, Karnataka, Telangana, and Mizoram – are yet to complete all formalities. However, representatives of these States also attended the meeting and assured the Centre that they were preparing for implementation.

Prior to the implementation of the VB-G RAM G scheme, the States have to frame rules, complete e-KYC of beneficiaries, fix the blackout period according to their agricultural cycles, and carry out capacity-building exercises at the district and block levels.

Despite a change in government in West Bengal, with the BJP now in power, the issue of settling pending dues under MGNREGA, worth ₹8,508 crore, continues to remain unresolved.

One in every 3 faculty posts vacant in top technical institutes

While the Education Ministry said recruitments were happening across Centrally Funded Technical Institutes, RTI data show 35.2% of posts remain vacant

GS II: governance: Education

DATA POINT

Sambavi Parthasarathy
Nivedha M.

Over 15 lakh students appeared for the high-stakes Joint Entrance Examination this year to secure a seat in the country's premier technical institutions. The competition has always been gruelling, particularly for the Indian Institutes of Technology (IITs), with roughly 80 students competing for every undergraduate seat in the 23 IITs.

However, data on vacant teaching positions in these institutes, obtained by *The Hindu* through the Right to Information (RTI) Act, raise questions on whether the students who surmount extraordinary challenges to get admitted receive the quality of education they deserve.

The Hindu's request filed under the RTI Act to the Ministry of Education (MoE) in January, seeking details on vacancies in all Central Higher Education Institutions (CHEIs), was forwarded to individual institutions, of which only 79 of the 122 Centrally Funded Technical Institutes (CFTIs) responded. These included 20 IITs, 19 National Institutes of Technology (NITs),18 Indian Institutes of Management (IIMs), 17 Indian Institutes of Information Technology (IIITs), and five Indian Institutes of Science Education and Research **(Chart 1)**.

A total of 7,132 of the 20,279 sanctioned faculty positions were vacant in these 79 institutions, which is 35.2%, or roughly one in every three posts. Sixteen institutions had more than 50% of their posts vacant, while another 14 had vacancies exceeding 40%.

Of the 20 IITs, nine reported vacancies exceeding 35% **(Chart 2)**. The share of vacant posts exceeded 50% in IIT Kharagpur. The institute has a sanctioned strength of 1,600 teaching posts – the highest among the 20 IITs; 824 of these remained vacant. 35% of the 11,019 sanctioned posts in all 20 IITs were vacant.

A similar analysis for 19 of the 31 NITs that provided the data shows that four had vacancies exceeding 40% **(Chart 3)**. As per the data, 27.9% of 5,432 posts in these 19 NITs have not been filled. With over 129 of the 187 posts (68%) remaining vacant, NIT Andhra Pradesh accounted for the highest share of vacancies. More than 40% of the sanctioned posts were vacant in NIT Srinagar, NIT Sikkim and NIT Tiruchirapalli, which had the highest with 600 sanctioned posts.

According to a reply given in Parliament by the MoE last year, the sanctioning of faculty posts for NITs and IITs is a dynamic process, subject to periodic review in accordance with institutional requirements and a faculty-to-student ratio of 1:12 for NITs and 1:10 for IITs.

In 18 of the 21 IIMs that provided data, 32.3% of 1,741 sanctioned posts were vacant. Four IIMs reported vacancies exceeding 50% **(Chart 4)**. IIM Mumbai had 59% of its posts vacant, with 77 of 130 vacancies unfilled.

IIITs reported the highest percentage of vacancies although their sanctioned posts were relatively low. A total of 665 (53.5%) of the 1,225 posts in 17 of the 25 IIITs that provided data were vacant. Vacancies exceeded 50% in eight of them **(Chart 5)**. In five of the seven IISERs that provided data, 276 of the 862 posts were lying vacant.

In another reply to the Lok Sabha earlier this year, the MoE, while not furnishing the number of vacancies, said that "occurrence of vacancies and filling thereof is a continuous process". It further said that all CHEIs were exhorted to fill vacancies in September 2022 and later in October 2025 under a "Mission Mode" recruitment drive. It said that, as of January 24, 2026, a total of 17,878 faculty positions has been filled across all CHEIs under this "Mission Mode".

  IIM मुंबई में **59% पद रिक्त** थे, जहाँ **130 में से 77 पद** भरे नहीं गए थे।

Inclusion without abolition in China's *hukou* system

Hukou reform pushes inclusion of migrants in public services while retaining structural controls

GS II: Governance

Anand P. Krishnan

China's State Council, on May 22, issued guidelines to 'promote basic public services at people's place of residence,' regardless of *hukou*, or residence registration status. These guidelines direct local governments – more specifically, megacity administrations – to improve and enhance their delivery measures in the domains of education, public rental housing, social and medical insurance, and a range of social assistance measures for the entire resident population within their administrative jurisdictions.

Hukou reforms since 2014

Hukou is an instrument of social control by the ruling party-state, originating in the 1950s, that distinguishes people as belonging to rural and urban areas based on the official registration of their place of residence. In the Mao era, the system was intended to limit internal migration and manage resource allocation under the prioritisation of rural development. The economic reforms after 1978 loosened restrictions to allow labour mobility to industrial regions and urban centres, while retaining the institution of *Hukou*. It functions as an internal passport, as access to social services and government provisions is tied to residential registration. From 2014 onwards, the government has been pushing incremental reforms to the system to align with national urbanisation plans and gradually equalise social benefits for migrants and locals, beginning with the conversion of rural to urban *hukous* in smaller cities. While nationwide implementation has progressed gradually, megacities have remained outside the purview until now.

The May 22 guidelines build on the decisions of the Third Plenum of the 20th Central Committee of the Communist Party of China (CPC) in 2024, which directed the removal of restrictions on access to social insurance at the place of employment. This was further reiterated in a five-year people-centered urbanisation action plan instituted by the State Council in July 2024 to raise the permanent urban residents from 66.16% (932.67 million) in 2023 to nearly 70% (estimated around 987 million) by 2029.

According to China's National Bureau of Statistics, at the end of 2025, the country's 'floating population' (*liudong renkou*) or rural migrants, stood at around 358 million, making up 25% of the population. Along with demographic concerns, the Central government is also guided by the economic imperative of increasing domestic consumption and hastening efforts to create a national unified market with the free flow of capital and talent. This also intersects with efforts to incentivise the mobility of young talent into frontier regions such as Xinjiang to support regional development.

The party-state, over the last three years, has widely promoted the concept of 'investing in people'. Now included in the new 15th Five-Year Plan, the concept is a new development orientation to raise knowledge and skills to transform 'human resources into human capital' and move from 'a demographic dividend' to a 'talent dividend'. People-centred urbanisation, through the inclusion of long-term residents by relaxing household registration rules, is a critical component of this framework.

Another driver is the growth of flexible and new forms of employment – shorthand for gig and platform workers – who are over 200 million, out of the country's total 740 million workforce.

Following the COVID-19 pandemic, the Central government, in conjunction with the official trade union, has sought to create a comprehensive national policy framework covering labour protection and political supervision. Taken together with frequent cases of labour discontent, the party-state views gig and platform workers as a key labour constituency that needs to be regulated and politically incorporated.

Persisting structural issues

Interestingly, the word *hukou* itself is only mentioned once in the latest guidelines. Since 2014, with the onset of reforms, efforts have been made to replace it with concepts like "permanent resident population" (*changzhu renkou*) and "place of actual residence" (*changzhu di*) to build inclusivity. However, structural constraints continue to constrain the reform measures.

Local governments bear responsibility for delivering welfare and public services, with financing largely dependent on fiscal transfers from the Central government. The real estate sector remains unstable, thus affecting city governments' budgets. While the Central government has indicated resource transfers and compensations to migrant-receiving cities, there are no commitments to new spending. The guidelines do not address or show a clear intent to resolve structural gaps. For instance, differing social insurance standards between well-off coastal cities and inland provinces (migrant-sending regions) mean that migrant workers' monthly contributions are at higher rates, but they receive lower benefits. Similarly, migrants who receive medical treatment in major cities but are enrolled in poorer regions will still receive lower reimbursements and face lower coverage limits. Further, the guidelines do not compel employers in the gig economy to strictly enroll workers in welfare schemes. In all, much room is left for the use of discretion by local administrations.

This recalibration only goes to show that the *hukou* system continues to remain in place and that there are no significant changes to the *status quo* for migrant labour.

(Anand P. Krishnan is a Fellow at the Centre of Excellence for Himalayan Studies, Shiv Nadar Institution of Eminence, Delhi NCR, and Assistant Editor of the journal, China Report)

10J6. Inclusion without abolition in China's hukou system
चीन की हुकौ प्रणाली में समाप्ति के बिना समावेशन

- **Hukou reform pushes inclusion of migrants in public services while retaining structural controls**
  हुकौ सुधार संरचनात्मक नियंत्रणों को बनाए रखते हुए प्रवासी आबादी को सार्वजनिक सेवाओं में शामिल करने को प्रोत्साहित करता है।
- **China's State Council, on May 22, issued guidelines to 'promote basic public services at people's place of residence,' regardless of hukou, or residence registration status.**
  चीन की राज्य परिषद ने **22 मई** को **हुकौ (निवास पंजीकरण)** की स्थिति की परवाह किए बिना लोगों के निवास स्थान पर **मूलभूत सार्वजनिक सेवाओं** को बढ़ावा देने के लिए दिशा-निर्देश जारी किए।
- These guidelines direct local governments — more specifically, **megacity administrations** — to improve and enhance their delivery measures in the domains of **education**, **public rental housing**, **social and medical insurance**, and a range of **social assistance measures** for the entire resident population within their administrative jurisdictions.
  ये दिशा-निर्देश स्थानीय सरकारों — विशेष रूप से **महानगर प्रशासन** — को अपने प्रशासनिक क्षेत्र के सभी निवासियों के लिए **शिक्षा**, **सार्वजनिक किराये के आवास**, **सामाजिक एवं चिकित्सा बीमा** तथा विभिन्न प्रकार की **सामाजिक सहायता योजनाओं** की उपलब्धता और गुणवत्ता में सुधार करने का निर्देश देते हैं।

Hukou reforms since 2014
2014 से हुकौ सुधार

- **Hukou** is an instrument of social control by the ruling party-state, originating in the **1950s**, that distinguishes people as belonging to rural and urban areas based on the official registration of their place of residence.
  हुकौ सत्तारूढ़ दल-राज्य द्वारा सामाजिक नियंत्रण का एक साधन है, जिसकी शुरुआत **1950 के दशक** में हुई थी और जो लोगों को उनके आधिकारिक निवास पंजीकरण के आधार पर ग्रामीण एवं शहरी श्रेणियों में विभाजित करता है।
- In the **Mao era**, the system was intended to limit internal migration and manage resource allocation under the prioritisation of rural development.
  माओ युग में इस प्रणाली का उद्देश्य आंतरिक प्रवास को सीमित करना तथा ग्रामीण विकास को प्राथमिकता देते हुए संसाधनों का प्रबंधन करना था।
- The economic reforms after **1978** loosened restrictions to allow labour mobility to industrial regions and urban centres, while retaining the institution of **Hukou**.
  1978 के बाद के आर्थिक सुधारों ने श्रमिकों की औद्योगिक क्षेत्रों और शहरी केंद्रों में आवाजाही की अनुमति देने हेतु प्रतिबंधों को शिथिल किया, लेकिन **हुकौ प्रणाली** को बनाए रखा।
- It functions as an **internal passport**, as access to social services and government provisions is tied to residential registration.
  यह एक प्रकार के **आंतरिक पासपोर्ट** की तरह कार्य करता है, क्योंकि सामाजिक सेवाओं और सरकारी सुविधाओं तक पहुँच निवास पंजीकरण से जुड़ी होती है।
- Now included in the new **15th Five-Year Plan**, the concept is a new development orientation to raise knowledge and skills to transform **'human resources into human capital'** and move from **'a demographic dividend'** to a **'talent dividend'.**
  अब नई **15वीं पंचवर्षीय योजना** में शामिल यह अवधारणा ज्ञान और कौशल को बढ़ाकर **'मानव संसाधन को मानव पूंजी'** में बदलने तथा **'जनसांख्यिकीय लाभांश'** से **'प्रतिभा लाभांश'** की ओर बढ़ने की विकासात्मक दिशा को दर्शाती है।
- **People-centred urbanisation**, through the inclusion of long-term residents by relaxing household registration rules, is a critical component of this framework.
  घरेलू पंजीकरण नियमों में ढील देकर दीर्घकालिक निवासियों को शामिल करने वाली **जन-केंद्रित शहरीकरण** नीति इस ढाँचे का एक महत्वपूर्ण भाग है।

PM expected to meet Trump on sidelines of G-7 summit in France

GS II: IR

Kallol Bhattacherjee

NEW DELHI

Prime Minister Narendra Modi is expected to meet U.S. President Donald Trump on the sidelines of the G-7 summit taking place in Evian, France on June 16-17, official sources have told *The Hindu*.

Mr. Trump has already announced that he will participate in the G-7 summit, hosted by French President Emmanuel Macron.

The meeting will mark the first interaction between Mr. Modi and Mr. Trump since they last met in February 2025 in Washington DC.

The sources did not elaborate on the details of the planned discussion but it is understood that the two sides will cover the bilateral trade pact under negotiation, and other regional and global matters of mutual concern. The officials provided this information soon after sharing details on Mr. Modi's upcoming travel schedule for France and the Slovak Republic.

The PM's visit to France will take place in two segments, with the first segment stretching from June 13 to June 14, and the second taking place from June 16 to June 19.

New and raw

Nepal and India must avoid misspeaking on border issues

The visit of Nepal Foreign Minister Shisir Khanal to Delhi, which followed right after the visit of Nepal's new ruling party RSP's President Rabi Lamichhane and ahead of a proposed visit by the new Finance Minister Swarnim Wagle, signals an intense outreach between Delhi and Kathmandu's new leadership. Mr. Khanal had met External Affairs Minister S. Jaishankar in April, on the sidelines of an Indian Ocean regional conference in Mauritius, but this was his first visit to India since the RSP and newly elected Prime Minister Balen Shah took power after the GenZ protests. The meetings, a lead up to an expected India visit by Mr. Shah, indicate a step-by-step approach to building ties, with Delhi laying out the red carpet for Mr. Lamichhane, who met with top functionaries of the BJP, Prime Minister Narendra Modi, the Home Minister, Mr. Jaishankar and the National Security Adviser. These meetings came just after Mr. Shah's address to his Parliament where he accused India of occupying parts of Nepal while also claiming that Nepal is in control of parts of Indian territory, and much to New Delhi's outrage, added that Nepal was in touch with the U.K. and China on the issue. Such comments by Mr. Shah, and his decision to stick to protocol and refuse a meeting with India's Foreign Secretary Vikram Misri, no doubt ruffled feathers, and Mr. Lamichhane's first task was to smooth feelings on the issue. In a media meet, Mr. Khanal also sought to diffuse the tensions, suggesting that the Nepal government was committed to turning a page in Nepali politics, and casting aside "old baggage" with India. The MEA rejected any role for a "third party" in negotiations, particularly China, given that Mr. Khanal's next visit is to Beijing. No doubt, the territorial issues over Limpiyadhura, and Lipulekh will heat up again this summer as India sends more groups over the border areas which Kathmandu claims, for the Kailash Mansarovar Yatra to Tibet.

The agenda between India and Nepal is at present too broad and too deep, from border management and renegotiating water sharing agreements to infrastructure, trade development projects and energy sharing, to be derailed at this point. While Nepal's new government may be granted some leeway for early misspeaking, Kathmandu and Delhi must tread carefully in their words and steps. Any indication from Kathmandu that it is cavalier about India's position in the region, or from Delhi that it seeks to interfere with the new government's working, could set off the same cycles of mistrust that have dogged the relationship, particularly since the Nepal Constitution friction and trade blockade from India in 2015. While the Modi government's diplomatic tasks have been made more complex by youth protests that have dislodged entrenched power structures in the Maldives, Sri Lanka, Bangladesh and Nepal, this may also be an important opportunity to rework its discourse and partnership framework with smaller yet important neighbours in South Asia.

10J6. New and raw
नया और संवेदनशील

- Mr. Khanal had met External Affairs Minister **S. Jaishankar** in April, on the sidelines of an **Indian Ocean** regional conference in **Mauritius**, but this was his first visit to India since the RSP and newly elected Prime Minister **Balen Shah** took power after the **GenZ protests**.

श्री खनाल ने अप्रैल में **मॉरीशस** में आयोजित **हिंद महासागर** क्षेत्रीय सम्मेलन के अवसर पर विदेश मंत्री **एस. जयशंकर** से भेंट की थी, किंतु **जेन-ज़ी प्रदर्शनों** के बाद आरएसपी और नवनिर्वाचित प्रधानमंत्री **बालेन शाह** के सत्ता में आने के बाद यह उनकी पहली भारत यात्रा थी।

- No doubt, the territorial issues over **Limpiyadhura**, and **Lipulekh** will heat up again this summer as India sends more groups over the border areas which Kathmandu claims, for the **Kailash Mansarovar Yatra** to **Tibet**.

निस्संदेह, **लिम्पियाधुरा** और **लिपुलेख** से जुड़े क्षेत्रीय विवाद इस गर्मी में फिर उभरेंगे, क्योंकि भारत **कैलाश मानसरोवर यात्रा** के लिए **तिब्बत** जाने वाले अधिक समूहों को उन सीमावर्ती क्षेत्रों से भेजेगा जिन पर काठमांडू दावा करता है।

India's road through Myanmar is one of engagement

GS II: IR

When Myanmar's President U Min Aung Hlaing landed in Bodh Gaya, Bihar, on May 30, 2026, the symbolism was hard to miss. Before travelling to New Delhi for talks with Prime Minister Narendra Modi and President Droupadi Murmu, he visited the Mahabodhi Temple, one of Buddhism's holiest sites and a UNESCO World Heritage Site. The stopover underscored a broader message: India was welcoming Myanmar's leader not only through the language of diplomacy but through shared civilisational ties.

This is a major diplomatic engagement, the first visit to India (May 30- June 3, 2026) by Min Aung Hlaing in his capacity as President, reflecting the growing importance of India-Myanmar relations in a shifting geopolitical environment of South and Southeast Asia. For New Delhi, the timing and tone are equally significant.

Connectivity, security, and China shape India's outreach to Myanmar

Why now

The world's democracies have largely turned away from Naypyidaw since the February 2021 coup that ousted Aung San Suu Kyi's elected government. Western nations imposed sanctions and sought to isolate the military regime. But Foreign Secretary Vikram Misri told reporters that India's policy is "not intended to be a commentary on the internal political arrangements" in Myanmar, and that New Delhi believes engagement is the best way forward.

This is realpolitik disguised as pragmatism. Myanmar is India's gateway to Southeast Asia and a cornerstone of its Act East and Neighbourhood First policies. Sharing a 1,643-km border with four northeastern States, Myanmar's instability poses a direct threat to India's security interests in the region.

Then there is the China factor. Beijing has aggressively cultivated Naypyidaw since the coup, filling the vacuum left by western withdrawal with infrastructure financing, arms supplies, and diplomatic cover. For India to cede Myanmar's strategic space entirely to China would be a self-inflicted wound in its own backyard.

The infrastructure stakes

Few indicators better reflect the depth of India's strategic investment in Myanmar than the Kaladan Multi-Modal Transit Transport Project and the India-Myanmar-Thailand Trilateral Highway – two connectivity corridors that dominated the Modi-Hlaing agenda.

The Kaladan project connects Kolkata to Sittwe by sea, then follows the Kaladan River inland to Paletwa, before linking by road to Zorinpui in Mizoram. The sea and river components are operational, with the first cargo shipment reaching Sittwe in May 2023. But the critical 109-km Paletwa-Zorinpui Road running through mountainous, flood-prone terrain in Chin State remains incomplete. India's Shipping Minister told Parliament in 2025 that full operationalisation is targeted for 2027.

The Trilateral Highway carries an even grander ambition: linking Moreh in Manipur to Mae Sot in Thailand through Myanmar over roughly 1,360 km, with planned extensions to Cambodia, Lao PDR, and Vietnam. Once completed, it could transform India's landlocked northeast into a gateway to Southeast Asia. It was supposed to be finished by 2019. It still is not.

Myanmar's internal conflict lies behind both delays. Armed groups control large stretches of territory along the two corridors, making construction difficult and unpredictable. President Hlaing assured Mr. Modi that Myanmar would do "everything" to complete the projects, while Mr. Misri reiterated that they remain a "major priority" despite security challenges. At the Myanmar-India Trade and Investment Conclave, Mr. Aung Hlaing described them as vital to the Association of Southeast Asian Nations (ASEAN)-India economic corridor. The real question is whether these assurances will translate into progress on the ground. Beyond infrastructure, the summit covered significant ground. Bilateral trade stood at $1.95 billion in 2025-26, and both sides agreed to increase it through a rupee-kyat settlement mechanism, with additional discussions on critical minerals and rare-earth cooperation.

On security, Mr. Aung Hlaing reiterated Myanmar's assurance that its territory would not be used against India's interests – a significant pledge given the long presence of Indian insurgent groups and cybercrime networks in Myanmar's border regions. More than 2,400 Indian nationals have been rescued from scam centres through bilateral cooperation over the past 18 months, though many remain trapped. On education, India announced an increase in Mekong-Ganga ICCR scholarships for Myanmar students from 36 to 100 annually from 2026.

The larger reckoning

By receiving Mr. Aung Hlaing as Myanmar's President, India has signalled a degree of acceptance of the country's evolving political reality. This does not necessarily amount to endorsement of the military-backed government. Still, it suggests a recognition that meaningful engagement with Myanmar requires working with those currently in power. For Myanmar, the visit is equally consequential. Mr. Aung Hlaing last visited India in 2019 as Myanmar's military chief. His return to New Delhi as head of state – and his choice of India for his first major bilateral visit abroad – signals a deliberate engagement with a neighbour that can provide a diplomatic and economic counterweight to overwhelming Chinese dependence. For India, the calculus is rooted in geography, security and the recognition that disengagement rarely produces better outcomes. The message is clear: pragmatic engagement, however uncomfortable, may increasingly shape regional approaches to Myanmar in the years ahead.

10J6. India's road through Myanmar is one of engagement
म्यांमार के माध्यम से भारत का मार्ग सहभागिता और निरंतर संवाद का मार्ग है।

A new phase in India-Nepal relations

Nepal PM indicated that the boundary dispute is not one-sided and should be resolved through diplomatic channels; his remarks, amid objections over trade and pilgrimage routes and shifting political tone in Kathmandu, suggest a cautious move towards a more rational approach in India-Nepal relations

GS II: IR

WORLD INSIGHT

K.V. Rajan
Atul K. Thakur

Nepal Prime Minister Balendra Shah "Balen" limited his intervention in a parliamentary discussion on the boundary dispute between India and Nepal over Kalapani, Lipulekh, and Limpiyadhura (areas claimed by both countries) on May 31 to a few minutes. He seemed to suggest that the issue was not one-sided.

"What surprised me after becoming Prime Minister is that it is not only India that is accused of encroaching Nepalese land. In some places, Nepal may also be occupying territory claimed by India. Both countries should examine the facts objectively and resolve the matter amicably as friends."

This was predictably greeted with a storm of protests within and outside Nepal's Parliament, despite the Prime Minister's reiteration that Nepal and India were working towards resolving the boundary issue through diplomatic channels.

Border dispute response

Nepal has also objected to the resumption of India-China trade through the Lipulekh Pass. Mr. Shah shared that the diplomatic note sent by Nepal on this matter received a positive response from India, and both sides have agreed to address the issue through dialogue. Earlier, Nepal's Foreign Ministry reiterated its commitment to resolving the boundary issue through diplomatic means. The statement came after India rejected Nepal's objection to the Kailash Mansarovar Yatra route through Lipulekh Pass, describing Kathmandu's territorial claim as 'unjustified' and "influenced by 'unilateral artificial enlargement'."

However, the latest developments suggest a more rational approach, which hopefully discards the possibility of the dispute becoming a lasting bilateral irritant and signals a fresh beginning. It is still early days, and the new government's thoughts in Kathmandu on resetting relations with India are not yet clear.

GETTY IMAGES

Shifting political tone

What is already clear is that Nepal's governance is firmly in the hands of a young generation with its eye on the future rather than the past, determined to free the country from the chains of corruption, nepotism, and ideology – and to prioritise social and economic issues.

Objections raised over trade and religious tourism through areas claimed by Nepal, the postponement of the Indian Foreign Secretary's visit to Nepal to discuss the Prime Minister's India visit and the disinclination of Mr. Shah to break protocol to receive India's Foreign Secretary, all reflect an emerging stance that India will be treated on par with other countries, rather than being given the easy access to top leadership it has traditionally enjoyed under the much-discussed "special relationship." These may have injected jarring notes in the trajectory of ties, but India appears to have taken them in stride.

Nepalese observers have questioned the wisdom of ignoring India's crucial importance to Nepal's present and future well-being. Likely, the bilateral ambiance will not be held prisoner to protocol or to assertions of irrational nationalism or *de facto* inequality.

Diplomatic path ahead

The sobering thought is that discussions between diplomats and experts may not yield a solution, and the fact that despite both sides emphasising economic cooperation as the core of bilateral ties, the boundary issue cannot be pushed to the back burner indefinitely.

Based on publicly available information, British-era data will be self-contradictory, as British India updated its maps with more recent technology compared to the East India days. The suggestion by Mr. Shah that China and the U.K. may also need to be consulted for a long-term solution may, however, create further complications and delays.

The Chinese position, taken by President Xi Jinping, was that Nepal should sort out the border issue with India. This remains the most rational advice, and it is hoped that both China and Nepal will adhere to this position.

What is important is to avoid an unending period of so called diplomatic and expert-level discussions which will permit the dispute to become a major irritant, given the positions taken by Nepal (which has even printed its version of the disputed map on its currency notes) and India (which has followed the boundary delineation it inherited from the British in 1947 and has serious security interests in maintaining the *status quo*).

What might be a better option would be for both countries to draw inspiration and ideas from (a) their centuries-old continuum of multifaceted linkages, (b) the open border tradition which has been in existence over more than 1,700 km and was followed even in the disputed area before the India-China war in 1962, and (c) the strong, mutually trusting institutional relationship between the Indian and Nepalese Army which could facilitate and come in useful to sustain a mutually acceptable practical solution.

This, however, will require a shift in mindset on both sides: a determination not to permit differences on boundary delineation to cloud a unique relationship, and a recognition that the so-called encroachment of territory is a mutual phenomenon that is not a result of aggressive territorial assertion and need not be a cause for mutual tension.

The changes in Nepal and the Prime Minister's statement offer an opportunity that India, too, should respect and seize. The last Indian Prime Minister who had the vision and courage to step beyond conventional diplomatic approaches to such problems with Nepal was Atal Bihari Vajpayee. Prime Minister Narendra Modi appears to have not only vision and courage but also the necessary political self-confidence in selling difficult policies and decisions to the nation, overriding the usual bureaucratic and inevitable nationalistic political posturing. Rabi Lamichhane, President of Nepal's ruling Rastriya Swatantra Party and Nepal's Foreign Affairs Minister Shishir Khanal visited India recently to engage in political and diplomatic meetings. The timing of their visits was crucially important

It is time for India and Nepal to move towards a more enlightened bilateral relationship to build a model sustainable partnership.

(K. V. Rajan is former Indian Ambassador to Nepal and Atul K. Thakur is a policy professional. Views are personal.)

THE GIST

- The boundary dispute over Kalapani, Lipulekh and Limpiyadhura continues to strain India-Nepal ties, with both sides maintaining competing territorial claims and relying on historical maps and inherited boundary lines.
- Recent developments reflect shifting diplomatic signals, with both countries emphasising dialogue and expert-level engagement, though differences over trade routes, protocol, and sovereignty remain unresolved.

10J6. A new phase in India-Nepal relations
भारत-नेपाल संबंधों में एक नया चरण

- Nepal has also objected to the resumption of India-China trade through the **Lipulekh Pass**.
  नेपाल ने **लिपुलेख दर्रे** के माध्यम से **भारत-चीन व्यापार** पुनः प्रारंभ किए जाने पर भी आपत्ति जताई है।

- The statement came after India rejected Nepal's objection to the **Kailash Mansarovar Yatra** route through **Lipulekh Pass**, describing Kathmandu's territorial claim as 'unjustified' and "influenced by 'unilateral artificial enlargement'."
  यह बयान उस समय आया जब भारत ने **लिपुलेख दर्रे** से होकर जाने वाली **कैलाश मानसरोवर यात्रा** के मार्ग पर नेपाल की आपत्ति को अस्वीकार करते हुए काठमांडू के क्षेत्रीय दावे को 'अनुचित' तथा "एकतरफा कृत्रिम विस्तार" से प्रभावित बताया।
- What might be a better option would be for both countries to draw inspiration and ideas from (a) their centuries-old continuum of **multifaceted linkages**, (b) the **open border tradition** which has been in existence over more than **1,700 km** and was followed even in the disputed area before the **India-China war in 1962**, and (c) the strong, mutually trusting institutional relationship between the **Indian and Nepalese Army** which could facilitate and come in useful to sustain a mutually acceptable practical solution.
  एक बेहतर विकल्प यह हो सकता है कि दोनों देश (क) अपनी सदियों पुरानी **बहुआयामी पारस्परिक कड़ियों**, (ख) **1,700 किलोमीटर** से अधिक लंबी **खुली सीमा की परंपरा**, जिसका पालन **1962 के भारत-चीन युद्ध** से पहले विवादित क्षेत्र में भी किया जाता था, तथा (ग) **भारतीय और नेपाली सेनाओं** के बीच विद्यमान मजबूत और पारस्परिक विश्वास पर आधारित संस्थागत संबंधों से प्रेरणा लें, जो किसी व्यावहारिक और पारस्परिक रूप से स्वीकार्य समाधान को बनाए रखने में सहायक हो सकते हैं।

Indian entities on latest EU sanctions package on Russia

GS II: IR

Sriram Lakshman
LONDON

The European Commission has proposed its 21st package of sanctions on Russia which also includes Indian entities. The sanctions need to be approved by member states before they are finalised.

The proposed package focuses on energy, crypto and financial services and trade, including fisheries, European Commission President Ursula Von der Leyen said.

The sanctions would also ban the entry of former Russian combatants into the EU.

"Brick by brick, we are collapsing the foundations of Russia's war economy," the EU's top diplomat Kaja Kallas said on X.

Ursula von der Leyen

"The new listings will cover more than 30 designations in the drones manufacturing as well as new export control measures on 50 companies, including entities based in China, Turkiye, Kyrgyzstan, Kazakhstan, UAE, and India," Ms. Kallas wrote.

This is not the first time Indian entities have found themselves on a EU sanctions list. However, the news comes as Brussels and New Delhi are in the implementation phase of a trade agreement that was announced in February.

The sanctions add 30 vessels to the existing 632 sanctioned ships in the so called "shadow fleet" of Russia – vessels transporting Russian oil and petroleum products and circumventing Western sanctions.

The package also expands sanctions to cover 31 more Russian banks, 20 banks, crypto-related entities and oil traders in third countries. It also introduces an export ban on equipment used to support drones and metals and alloys used in defence and aerospace.

10J6. Indian entities on latest EU sanctions package on Russia
रूस पर यूरोपीय संघ के नवीनतम प्रतिबंध पैकेज में भारतीय संस्थाएँ शामिल

- The **European Commission** has proposed its **21st package of sanctions** on **Russia** which also includes **Indian entities**.
  यूरोपीय आयोग ने **रूस** पर अपने **21वें प्रतिबंध पैकेज** का प्रस्ताव रखा है, जिसमें **भारतीय संस्थाएँ** भी शामिल हैं।
- The sanctions need to be approved by **member states** before they are finalised.
  इन प्रतिबंधों को अंतिम रूप दिए जाने से पहले **सदस्य देशों** की स्वीकृति आवश्यक होगी।
- The proposed package focuses on **energy, crypto and financial services and trade**, including **fisheries**, **European Commission President Ursula Von der Leyen** said.
  यूरोपीय आयोग की अध्यक्ष **उर्सुला वॉन डेर लेयेन** ने कहा कि प्रस्तावित पैकेज **ऊर्जा, क्रिप्टो, वित्तीय सेवाओं और व्यापार**, तथा **मत्स्य क्षेत्र** पर केंद्रित है।
- The sanctions would also ban the entry of former **Russian combatants** into the **European Union (EU)**.
  इन प्रतिबंधों के तहत पूर्व **रूसी लड़ाकों** के **यूरोपीय संघ (EU)** में प्रवेश पर भी प्रतिबंध लगाया जाएगा।
- These include entities based in **China, Turkiye, Kyrgyzstan, Kazakhstan, UAE, and India**, Ms. Kallas wrote.
  सुश्री कैलास ने लिखा कि इनमें **चीन, तुर्किये, किर्गिस्तान, कज़ाखस्तान, यूएई और भारत** में स्थित संस्थाएँ शामिल हैं।
- This is not the first time **Indian entities** have found themselves on a **EU sanctions list**.
  यह पहली बार नहीं है जब **भारतीय संस्थाएँ यूरोपीय संघ की प्रतिबंध सूची** में शामिल हुई हैं।
- The sanctions add **30 vessels** to the existing **632 sanctioned ships** in the so-called **"shadow fleet"** of Russia.
  इन प्रतिबंधों के तहत रूस के तथाकथित **"शैडो फ्लीट"** में शामिल पहले से प्रतिबंधित **632 जहाजों** के अतिरिक्त **30 और जहाजों** को सूची में जोड़ा जाएगा।
- It also introduces an **export ban** on equipment used to support **drones** and on **metals and alloys** used in the **defence and aerospace** sectors.
  इसके अंतर्गत **ड्रोन** संचालन में प्रयुक्त उपकरणों तथा **रक्षा और एयरोस्पेस** क्षेत्रों में उपयोग होने वाली **धातुओं और मिश्रधातुओं** के निर्यात पर भी प्रतिबंध लगाया जाएगा।

Global nuclear arms spending soars amid AI threats and new 'arms race'

GS II: IR

Agence France-Presse
GENEVA

Worldwide spending on nuclear weapons soared to a record high last year as atomic-armed countries moved more warheads from storage onto delivery systems, experts said on Tuesday.

The nine nuclear-armed states jointly spent nearly $119 billion on their arsenals last year, up 19% from 2024, according to the International Campaign to Abolish Nuclear Weapons (ICAN). "A new nuclear arms race is upon us," its report warned.

ICAN, and a separate study by the Stockholm International Peace Research Institute (SIPRI) released on Monday, voiced alarm at the growing nuclear risk amid swelling geopolitical tensions.

A house of dynamite: The United States and Russia together hold around 83% of the world's nuclear arms stockpile. AP

ICAN's director of programmes Susi Snyder said the scale-up, coupled with fears that artificial intelligence could increase the risk of nuclear weapons use, was deeply alarming.

SIPRI's report highlighted that the total estimated number of nuclear warheads had been declining for decades, falling to 12,187 at the start of this year, but warned the number of weapons available for potential use had risen, to 9,745.

Growing arsenal

The U.S. and Russia together hold around 83% of the world's nuclear arms stockpile, with more than 5,000 warheads each. China is expanding its nuclear arsenal, SIPRI said, estimating that it counts around 620 warheads.

ICAN's report indicated that all nuclear-armed states, which also include Britain, France, India, Israel, North Korea and Pakistan, were increasing investments in their arsenals.

The nine countries jointly spent nearly $17 billion more last year than in 2024 on the weapons of mass destruction.

Th U.S. spent more than all the other countries combined, dishing out $69.2 billion on nuclear weapons in 2025, followed by China, which was estimated to have spent $13.5 billion, then Britain at $12.6 billion and Russia at $9.5 billion, it said.

Those investments are expected to grow.

10J6. Global nuclear arms spending soars amid AI threats and new 'arms

race'

एआई खतरों और नई 'हथियारों की दौड़' के बीच वैश्विक परमाणु हथियार खर्च में भारी वृद्धि

- Worldwide spending on **nuclear weapons** soared to a record high last year as atomic-armed countries moved more warheads from storage onto delivery systems, experts said on Tuesday.
  विशेषज्ञों ने मंगलवार को कहा कि पिछले वर्ष **परमाणु हथियारों** पर वैश्विक खर्च रिकॉर्ड स्तर पर पहुँच गया, क्योंकि परमाणु-सशस्त्र देशों ने अधिक वारहेड्स को भंडारण से निकालकर तैनाती प्रणालियों में स्थानांतरित किया।
- The **nine nuclear-armed states** jointly spent nearly **$119 billion** on their arsenals last year, up **19%** from 2024, according to the **International Campaign to Abolish Nuclear Weapons (ICAN)**.
  इंटरनेशनल कैंपेन टू एबोलिश न्यूक्लियर वेपन्स (ICAN) के अनुसार, **नौ परमाणु-सशस्त्र देशों** ने पिछले वर्ष अपने परमाणु शस्त्रागार पर संयुक्त रूप से लगभग **119 अरब डॉलर** खर्च किए, जो 2024 की तुलना में **19% अधिक** है।
- **SIPRI's** report highlighted that the total estimated number of **nuclear warheads** had been declining for decades, falling to **12,187** at the start of this year.
  SIPRI की रिपोर्ट में बताया गया कि **परमाणु वारहेड्स** की कुल अनुमानित संख्या दशकों से घट रही है और इस वर्ष की शुरुआत में यह घटकर **12,187** रह गई।
- But it warned the number of weapons available for potential use had risen to **9,745**.
  हालाँकि रिपोर्ट ने चेतावनी दी कि संभावित उपयोग के लिए उपलब्ध हथियारों की संख्या बढ़कर **9,745** हो गई है।

Growing arsenal
बढ़ता परमाणु शस्त्रागार

- The **U.S.** and **Russia** together hold around **83%** of the world's nuclear arms stockpile, with more than **5,000 warheads each**.
  अमेरिका और **रूस** मिलकर दुनिया के परमाणु हथियार भंडार का लगभग **83%** हिस्सा रखते हैं, और दोनों के पास **5,000 से अधिक वारहेड्स** हैं।
- **China** is expanding its nuclear arsenal, SIPRI said, estimating that it counts around **620 warheads**.
  SIPRI के अनुसार, **चीन** अपने परमाणु शस्त्रागार का विस्तार कर रहा है और उसके पास लगभग **620 वारहेड्स** हैं।
- **ICAN's** report indicated that all nuclear-armed states, which also include **Britain, France, India, Israel, North Korea and Pakistan**, were increasing investments in their arsenals.
  ICAN की रिपोर्ट के अनुसार, **ब्रिटेन, फ्रांस, भारत, इज़राइल, उत्तर कोरिया और पाकिस्तान** सहित सभी परमाणु-सशस्त्र देश अपने शस्त्रागार में निवेश बढ़ा रहे हैं।
- The **U.S.** spent more than all the other countries combined, dishing out **$69.2 billion** on nuclear weapons in 2025.
  अमेरिका ने अन्य सभी देशों के संयुक्त खर्च से भी अधिक, **2025 में 69.2 अरब डॉलर** परमाणु हथियारों पर खर्च किए।
- This was followed by **China**, which was estimated to have spent **$13.5 billion**.
  इसके बाद **चीन** का स्थान रहा, जिसने अनुमानतः **13.5 अरब डॉलर** खर्च किए।
- **Britain** spent **$12.6 billion**.
  ब्रिटेन ने **12.6 अरब डॉलर** खर्च किए।
- **Russia** spent **$9.5 billion**.
  रूस ने **9.5 अरब डॉलर** खर्च किए।

'Modi will surpass Nehru's record of being longest-serving PM of India'

GS III: Economy

The Hindu Bureau
NEW DELHI

Union Home Minister Amit Shah said Prime Minister Narendra Modi completed 4,398 days in office on Tuesday and would surpass the record of former Prime Minister Jawaharlal Nehru on Wednesday.

He said Mr. Modi would have the distinction of serving the nation for the longest continuous period as an elected Prime Minister of India. He stated that during his tenure, Mr. Modi made public welfare the guiding principle of governance.

On Wednesday, the members of National Democratic Alliance (NDA) will meet in Delhi to mark 12 years of the alliance being in power.

Mr. Shah launched the Land Port Management System (LPMS-'VINIMAY') on Tuesday.

Amit Shah during the inauguration of the Land Port Management System at Vigyan Bhawan in New Delhi on Tuesday. ANI

Addressing the programme, the Minister said that since 2014, moving beyond a security-centric approach, land ports were developed as the first line of defence for security, a means to facilitate trade, and a bridge for people-to-people connectivity. At the same time, land ports had played a significant role in the holistic development of border areas, promoting legitimate trade, and addressing challenges such as migration from border villages and districts.

Smart borders

Mr. Shah said that easier movement of people across borders had enhanced cultural exchange. He said that in a country like India, with its vast land borders, border management played a very important role.

Mr. Shah said the Home Ministry was working on a four-pronged strategy to secure India's borders under the concept of Smart Borders. The Land Port Management System had been designed keeping in mind the requirements of all stakeholders, while giving special emphasis to security. Together with the Smart Border initiative, this system would help to create an impregnable and secure border management framework. Mr. Shah added that this would help curb illegal activities.

He said the system would provide an integrated digital platform for the management of cargo, passengers and vehicles. It would enhance coordination among various agencies and make information exchange seamless. The Single Electronic Window and Automatic Number Plate Recognition (ANPR)-based gate operation system would result in significant time savings.

10J6. 'Modi will surpass Nehru's record of being longest-serving PM of India'

'मोदी भारत के सबसे लंबे समय तक प्रधानमंत्री रहने के नेहरू के रिकॉर्ड को पार कर देंगे'

- Mr. Shah launched the **Land Port Management System (LPMS–'VINIMAY')** on Tuesday.
  श्री शाह ने मंगलवार को **लैंड पोर्ट मैनेजमेंट सिस्टम (LPMS–'विनिमय')** का शुभारंभ किया।
- He said the system would provide an **integrated digital platform** for the management of **cargo, passengers and vehicles**.
  उन्होंने कहा कि यह प्रणाली **मालवाहक सामग्री, यात्रियों और वाहनों** के प्रबंधन हेतु एक **एकीकृत डिजिटल मंच** उपलब्ध कराएगी।
- It would enhance coordination among various agencies and make **information exchange** seamless.
  यह विभिन्न एजेंसियों के बीच समन्वय को बढ़ाएगी तथा **सूचना आदान-प्रदान** को निर्बाध बनाएगी।
- The **Single Electronic Window** and **Automatic Number Plate Recognition (ANPR)-based gate operation system** would result in significant time savings.
  सिंगल इलेक्ट्रॉनिक विंडो तथा **ऑटोमैटिक नंबर प्लेट रिकग्निशन (ANPR) आधारित गेट संचालन प्रणाली** के माध्यम से समय की उल्लेखनीय बचत होगी।

LAND PORT MANAGEMENT SYSTEM (LPMS – 'VINIMAY')

- **VINIMAY** is the digital **Land Port Management System (LPMS)** developed by the Land Ports Authority of India under the **Ministry of Home Affairs (MHA)**.
- The word **"Vinimay"** in Sanskrit/Hindi means **exchange**, reflecting its role in facilitating the movement of goods, vehicles, and passengers across India's land borders.
- It is designed to digitize, streamline, and modernize operations at India's **Integrated Check Posts (ICPs)** located along international land borders.

Integrated Check Posts (ICPs)

- Integrated Check Posts are border infrastructure facilities established to facilitate:
  - International trade.
  - Passenger movement.

- Customs clearance.
- Immigration services.
- Security checks.

- Paving the way for establishing **coal exchanges** in the country, the government on Tuesday published the **Coal Exchange Rules (2026)**.

देश में **कोयला एक्सचेंजों** की स्थापना का मार्ग प्रशस्त करते हुए, सरकार ने मंगलवार को **कोल एक्सचेंज नियम (2026)** प्रकाशित किए।

- The rules also specify the **minimum eligibility requirements** that must be met by an entity to establish the exchange.

नियमों में यह भी निर्धारित किया गया है कि एक्सचेंज स्थापित करने के लिए किसी संस्था को कौन-कौन सी **न्यूनतम पात्रता आवश्यकताओं** को

Alberta pitches cheap natural gas for data centres

NEWS ANALYSIS

GS III: Economy

Reuters
CALGARY

Alberta is touting its abundant supply of cheap fossil fuels to entice tech companies to build data centres for the AI boom, a move that would undermine Canada's plan to link new data centre development with clean energy expansion.

Canada is the world's fifth-largest producer of natural gas, around 60% of which comes from Alberta. As well as huge fossil fuel reserves, the western province boasts a cooler climate that can offset the cooling costs of data centre infrastructure and plenty of available land. All that can make operating data-centres more cost-efficient than in the United States, where they are facing pushback from communities and lawmakers.

Risk of pollution: A view of the Wildcat Hills Gas Plant near Cochrane, Alberta, Canada. REUTERS

New market

Tech companies could also create a new market for long-suffering natural gas producers in Western Canada, where drillers face a multi-year supply glut and at times had to pay customers to take gas when prices have turned negative.

But a rapid expansion of data centres in Alberta would disrupt Canada's plans to power the AI boom using clean hydro, renewables and nuclear. While natural gas is a cleaner power source than coal or oil, as a fossil fuel it contributes to emissions.

Prime Minister Mark Carney has said Canadian data centres will run on "some of the cleanest power in the world." His government's June 4 AI strategy – which aims to speed up Canada's adoption of artificial intelligence – highlighted how more than 83% of the country's electricity grid comes from renewables and low-emission power sources.

Canada currently has only five functioning data centres at the so-called hyperscale level, demanding at least 50 megawatts of electricity capacity, equivalent to the power needs of a small city.

But nearly 100 more are in the works and 90% of those are planned for Alberta, where the emissions intensity of the province's electricity grid is almost five times the national average, research from York University shows.

'Digital pipeline' view

"We're essentially looking at these data centres as digital pipelines and digital refineries for us to help get the value from our natural gas to global markets, but in a creative modern way," Alberta's Technology Minister Nate Glubish said.

The province aims to attract C$100 billion in data centre investment. Glubish said he has made multiple trips to Silicon Valley since 2024 to court energy-hungry tech giants with Alberta's natural gas pitch.

The 20 existing small- to mid-scale data centers in Alberta already pull from the province's energy grid, which is 60%powered by natural gas. The provincial government is giving new proponents the option to build their own power sources to avoid limits on power capacity.

Julia Sawatzky, a doctor and member of the advocacy group Canadian Physicians for the Environment, said there was a growing discrepancy between Canada's stated environmental goals and the reality on the ground.

"There seems to be an idea or a vision that Canada could be a green economy or a place that's meeting its climate goals," Sawatzky said. "But the way this AI data strategy might actually roll out, I think, is cause for all of us to really pay attention."

Scientists find a blood test that predicts lung cancer years early

A new study has zeroed in on a set of 14 blood plasma proteins, called the '14-protein signature', as a strong predictor of being diagnosed with lung cancer years in advance; the team also identified an existing drug that could potentially be used to reduce the risk of developing lung cancer

GS III: S&T [redacted]

S. Swaminathan

Lung cancer is one of the more common cancers affecting people worldwide. This is mainly due to smoking and, to a lesser extent, air pollution and occupational exposure. According to the latest World Health Organization estimates, there are about 2.5 million new cases and 1.8 million deaths every year. Prevention offers the ideal solution to this public health problem.

Scientists are currently on the threshold of finding a new way to identify people who may be predisposed to developing lung cancer and protect them proactively. A multinational team, from almost a dozen countries, led by Charles Swanton of the Francis Crick Institute, London, published its findings on an exciting discovery in *Cell* on May 4. The team has zeroed in on a set of 14 blood plasma proteins, which they call the "14-protein signature", as a strong predictor of being diagnosed with lung cancer years in advance.

The team also identified an existing drug that could potentially be used to reduce the risk of developing lung cancer.

Sampling blood plasma is akin to a liquid biopsy. The plasma proteomics profile provides a real-time snapshot of health and disease. ADRIAN SULYOK/UNSPLASH

THE GIST

- The 14-protein signature has been derived from a population of limited diversity, representing the U.K., the U.S., and East Asia
- While promising, it still needs to be further validated
- If the signature is found to be relevant in many or even all populations, scientists will then have to develop a diagnostic test to detect all 14 proteins in blood plasma

Looking in the blood

Blood plasma is the liquid portion of the blood that flows in our body. It contains thousands of proteins that come from every organ and tissue. This entire set of proteins is called the plasma proteome. The large-scale systematic study of the proteome is called proteomics.

Sampling blood plasma is akin to a liquid biopsy. The plasma proteomics profile provides a real-time snapshot of health and disease. If scientists could compare the profiles of people before and after the onset of a disease, they can glean important clues about changes in the plasma proteome as a person goes from well to unwell.

To get such data pertaining to lung cancer, Swanton et al. turned to the U.K. Biobank, an ongoing initiative that tracks the lives of approximately half a million volunteers to find out who falls ill and why. The Biobank is a repository of anonymised biological samples and corresponding health-related information of all these volunteers. It is accessible to scientists around the world to develop diagnostics and therapies for everyone, everywhere.

For a subset of the volunteers, around 10%, the plasma proteomics profiles became available in 2023.

The team used the profiles of about 48,000 volunteers to train a machine-learning model along with patient characteristics, such as age, gender, smoking status, lung cancer diagnosis, etc. This way, the team identified 14 plasma proteins linked to lung cancer.

How a cancer forms

Next, the researchers used the model to predict the incidence of lung cancer diagnoses using the proteomics data of about 12,000 patients whose data had been excluded from the model's training. This set included 75 individuals of lung cancer with a median time to diagnosis of 5.1 years. The model predicted lung cancer diagnosis with a very high sensitivity, successfully identifying more than 75% cases.

The 14-protein signature was also found in eight additional datasets, including one from life-long non-smokers, essentially validating the signature's usefulness.

The scientists also found that the signature was more pronounced when specific inflammatory pathways involving smoking and air pollution were activated. In a previous study, the same team had found that air pollution causes inflammation that awakens dormant mutant lung cells, which eventually become cancer cells.

This detail, together with the observations in the new study, led the team to hypothesise that smoking induces mutations, lung inflammation triggered by environmental cues follows, and this culminates in lung cancer.

The signature was also more distinct in people who developed chronic obstructive pulmonary disease and pulmonary fibrosis.

The CANTOS trial

If future research finds that this is indeed one way that lung cancer develops, scientists can think of treating the inflammation before the cancer takes root. Canakinumab is a drug made by Novartis and which currently has the U.S. Food and Drug Administration's approval to treat inflammatory disorders. Swanton et al. were aware of a previous clinical trial called CANTOS that tested canakinumab's ability to reduce the risk of recurrent cardiac events in patients who had experienced a prior heart attack and were suffering from persistent inflammation. Its effect was modest.

However, Swanton et al., who carried out a retrospective analysis of the trial data, found that 2,300 of the CANTOS participants who received canakinumab happened to display the 14-protein signature – and the risk of lung cancer was down by 50% in this group.

The data suggested that canakinumab could be a potential drug to prevent future lung cancer in those with the 14-protein signature.

Step by step

The 14-protein signature needs to be further validated. It has been derived from a population of limited diversity, representing the U.K., the U.S., and East Asia. If the signature is found to be relevant in many or even all populations, scientists will then have to develop a diagnostic test to detect all 14 proteins in blood plasma.

Assuming such a test also becomes available, canakinumab will have to be tested in clinical trials for its new purpose. Unfortunately, the CANTOS trial found that canakinumab could have serious side effects. The European Medicine Agency's report concluded that the drug's toxicity could outweigh its benefits.

Canakinumab is also prohibitively expensive. Treatments usually involve multiple doses over long periods of time. In the U.S., it costs $73,000 for a year. It is neither registered nor commercially available in India, and it would be imperative to explore inexpensive alternatives with similar function and with more acceptable safety profiles.

Ultimately, if we manage to tick all these boxes, the diagnostics and the drug would be of great benefit for individuals at risk of lung cancer worldwide. The work of Swanton et al. is a step in this direction.

(S. Swaminathan is a retired professor of biology from BITS Pilani-Hyderabad and a former scientist, International Centre for Genetic Engineering and Biotechnology, New Delhi. ssn225@gmail.com)

- A multinational team, from almost a dozen countries, led by **Charles Swanton** of the **Francis Crick Institute, London**, published its findings on an exciting discovery in **Cell** on May 4.
  लगभग एक दर्जन देशों के एक बहुराष्ट्रीय दल ने, जिसका नेतृत्व **फ्रांसिस क्रिक संस्थान, लंदन** के **चार्ल्स स्वांटन** ने किया, 4 मई को **सेल** में अपनी एक महत्वपूर्ण खोज के निष्कर्ष प्रकाशित किए।
- The team has zeroed in on a set of **14 blood plasma proteins**, which they call the **"14-protein signature"**, as a strong predictor of being diagnosed with **lung cancer** years in advance.
  दल ने **14 रक्त प्लाज़्मा प्रोटीनों** के एक समूह की पहचान की है, जिसे वे **"14-प्रोटीन सिग्नेचर"** कहते हैं, जो वर्षों पहले **फेफड़ों के कैंसर** के निदान का एक सशक्त संकेतक है।
- The team also identified an existing **drug** that could potentially be used to reduce the risk of developing **lung cancer**.
  दल ने एक मौजूदा **दवा** की भी पहचान की, जिसका संभावित रूप से **फेफड़ों के कैंसर** के जोखिम को कम करने में उपयोग किया जा सकता है।

Looking in the blood
रक्त में खोज

- **Blood plasma** is the liquid portion of the blood that flows in our body.
  रक्त प्लाज़्मा रक्त का वह तरल भाग है जो हमारे शरीर में प्रवाहित होता है।
- It contains thousands of **proteins** that come from every organ and tissue.
  इसमें हजारों **प्रोटीन** होते हैं जो शरीर के प्रत्येक अंग और ऊतक से आते हैं।
- This entire set of proteins is called the **plasma proteome**.
  प्रोटीनों के इस संपूर्ण समूह को **प्लाज़्मा प्रोटिओम** कहा जाता है।
- The large-scale systematic study of the **proteome** is called **proteomics**.
  प्रोटिओम के बड़े पैमाने पर व्यवस्थित अध्ययन को **प्रोटिओमिक्स** कहा जाता है।
- The **Biobank** is a repository of anonymised biological samples and corresponding health-related information of all these volunteers.
  बायोबैंक इन सभी स्वयंसेवकों के गुमनाम जैविक नमूनों और उनसे संबंधित स्वास्थ्य जानकारी का भंडार है।
- It is accessible to scientists around the world to develop **diagnostics** and **therapies** for everyone, everywhere.
  यह विश्वभर के वैज्ञानिकों के लिए उपलब्ध है ताकि वे सभी लोगों के लिए **निदान तकनीकों** और **उपचार पद्धतियों** का विकास कर सकें।
- This detail, together with the observations in the new study, led the team to hypothesise that **smoking** induces **mutations**, lung **inflammation** triggered by environmental cues follows, and this culminates in **lung cancer**.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

यह तथ्य, नए अध्ययन के अवलोकनों के साथ मिलकर, दल को यह परिकल्पना करने की ओर ले गया कि **धूमपान उत्परिवर्तन** उत्पन्न करता है, इसके बाद पर्यावरणीय संकेतों से प्रेरित फेफड़ों की **सूजन** होती है, और अंततः यह **फेफड़ों के कैंसर** में परिणत होती है।

- The signature was also more distinct in people who developed **chronic obstructive pulmonary disease** and **pulmonary fibrosis**.
  यह सिग्नेचर उन लोगों में भी अधिक स्पष्ट था जिनमें **क्रॉनिक ऑब्स्ट्रक्टिव पल्मोनरी डिज़ीज़** तथा **पल्मोनरी फाइब्रोसिस** विकसित हुआ था।

The CANTOS trial
कैंटोस परीक्षण

- **Canakinumab** is a drug made by **Novartis** and which currently has the **U.S. Food and Drug Administration's** approval to treat **inflammatory disorders**.
  कैनाकिनुमैब एक दवा है जिसे **नोवार्टिस** ने विकसित किया है और जिसे वर्तमान में **अमेरिकी खाद्य एवं औषधि प्रशासन** द्वारा **सूजन संबंधी विकारों** के उपचार के लिए स्वीकृति प्राप्त है।
- Swanton et al. were aware of a previous clinical trial called **CANTOS** that tested **canakinumab's** ability to reduce the risk of recurrent **cardiac events** in patients who had experienced a prior **heart attack** and were suffering from persistent **inflammation**.
  स्वांटन और उनके सहयोगी **कैंटोस** नामक एक पूर्व नैदानिक परीक्षण से परिचित थे, जिसमें **कैनाकिनुमैब** की उस क्षमता का परीक्षण किया गया था जो पहले **हृदयाघात** झेल चुके तथा लगातार **सूजन** से पीड़ित रोगियों में पुनरावर्ती **हृदय संबंधी घटनाओं** के जोखिम को कम कर सके।
- Its effect was modest.
  इसका प्रभाव सीमित था।
- However, Swanton et al., who carried out a **retrospective analysis** of the trial data, found that **2,300** of the **CANTOS participants** who received **canakinumab** happened to display the **14-protein signature** — and the risk of **lung cancer** was down by **50%** in this group.
  हालाँकि, स्वांटन और उनके सहयोगियों ने परीक्षण के आँकड़ों का **पश्चदृष्टि विश्लेषण** किया और पाया कि **कैनाकिनुमैब** प्राप्त करने वाले **कैंटोस प्रतिभागियों** में से **2,300** व्यक्तियों में **14-प्रोटीन सिग्नेचर** मौजूद था — और इस समूह में **फेफड़ों के कैंसर** का जोखिम **50%** कम था।
- The data suggested that **canakinumab** could be a potential drug to prevent future **lung cancer** in those with the **14-protein signature**.
  आँकड़ों से संकेत मिला कि **कैनाकिनुमैब**, **14-प्रोटीन सिग्नेचर** वाले व्यक्तियों में भविष्य के **फेफड़ों के कैंसर** को रोकने के लिए एक संभावित दवा हो सकती है।

- If the signature is found to be relevant in many or even all populations, scientists will then have to develop a **diagnostic test** to detect all **14 proteins** in **blood plasma**.
  यदि यह सिग्नेचर अनेक अथवा सभी जनसंख्याओं में प्रासंगिक पाया जाता है, तो वैज्ञानिकों को **रक्त प्लाज़्मा** में सभी **14 प्रोटीनों** का पता लगाने के लिए एक **नैदानिक परीक्षण** विकसित करना होगा।
- Assuming such a test also becomes available, **canakinumab** will have to be tested in **clinical trials** for its new purpose.
  यह मानते हुए कि ऐसा परीक्षण भी उपलब्ध हो जाता है, **कैनाकिनुमैब** को उसके इस नए उद्देश्य के लिए **नैदानिक परीक्षणों** में परखा जाना होगा।
- Unfortunately, the **CANTOS trial** found that **canakinumab** could have serious **side effects**.
  दुर्भाग्यवश, **कैंटोस परीक्षण** में पाया गया कि **कैनाकिनुमैब** के गंभीर **दुष्प्रभाव** हो सकते हैं।
- The **European Medicine Agency's** report concluded that the drug's **toxicity** could outweigh its **benefits**.
  यूरोपीय औषधि एजेंसी की रिपोर्ट ने निष्कर्ष निकाला कि इस दवा की **विषाक्तता** इसके **लाभों** से अधिक हो सकती है।
- **Canakinumab** is also prohibitively expensive.
  कैनाकिनुमैब अत्यधिक महंगी भी है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

- Treatments usually involve multiple doses over long periods of time.
  उपचार में सामान्यतः लंबे समय तक कई खुराकें शामिल होती हैं।
- In the **U.S.**, it costs **$73,000** for a year.
  संयुक्त राज्य अमेरिका में इसकी वार्षिक लागत **73,000 डॉलर** है।
- It is neither registered nor commercially available in **India**, and it would be imperative to explore inexpensive alternatives with similar function and with more acceptable **safety profiles**.
  यह **भारत** में न तो पंजीकृत है और न ही व्यावसायिक रूप से उपलब्ध है, तथा समान कार्यक्षमता और अधिक स्वीकार्य **सुरक्षा प्रोफ़ाइल** वाले कम लागत के विकल्पों की खोज करना आवश्यक होगा।

A black hole's elusive wind

Vasudevan Mukunth

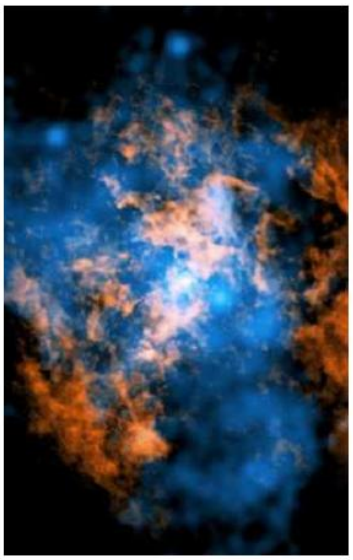
GS III: S&T

For more than 50 years, astronomers have suspected that Sagittarius A*, the supermassive black hole at the centre of the Milky Way, was blowing a wind of hot gas into space. However, they couldn't find evidence of it. This has now changed if the results of a new study, using the ALMA telescope in Chile, are to be believed.

By combining five years of data from ALMA, researchers from Northwestern University, U.S., have reported a large cone-shaped clearing in the dense molecular gas surrounding the black hole. This clearing is at least 3.2 lightyears long and opens at a 45-degree angle, as if the black hole is 'blowing' away cold gas that would otherwise fall into it.

According to the study, the finding is the first definitive evidence of a "presently active" wind from Sagittarius A*. By blowing away the gas, the wind keeps too many stars from forming, which would deplete the gas and prevent future star formation. If too many stars explode when they die, they could also blow away the remaining gas, nixing the galaxy's ability to evolve.

When the black hole pulls on some gas, it swirls around instead of falling straight in. As it accelerates, the gas particles are heated by friction as the gravity pressurises them. Eventually the gas becomes a plasma burning millions of degrees hot. As per the study, just 1 g of this gas can release enough energy to push away 100 kg of nearby gas. The pushed gas makes up the wind.



An image depicting evidence of a wind blowing away from Sagittarius A*, the Milky Way's supermassive black hole. NASA

10J6. A black hole's elusive wind

एक ब्लैक होल की रहस्यमयी वायु-धारा

- **For more than 50 years, astronomers have suspected that Sagittarius A*, the supermassive black hole at the centre of the Milky Way, was blowing a wind of hot gas into space.**
  पचास वर्षों से अधिक समय से, **खगोलविदों** को संदेह था कि **सैजिटेरियस ए***, जो **मिल्की वे** के केंद्र में स्थित **अतिविशालकाय ब्लैक होल** है, अंतरिक्ष में गर्म गैस की एक धारा प्रवाहित कर रहा था।
- However, they couldn't find evidence of it.
  हालाँकि, वे इसका प्रमाण नहीं खोज सके थे।
- This has now changed if the results of a new study, using the **ALMA telescope** in **Chile**, are to be believed.
  यदि **चिली** स्थित **अल्मा दूरबीन (ALMA Telescope)** का उपयोग करके किए गए एक नए अध्ययन के परिणामों पर विश्वास किया जाए, तो अब यह स्थिति बदल गई है।
- By combining five years of data from **ALMA**, researchers from **Northwestern University, U.S.**, have reported a large cone-shaped clearing in the dense molecular gas surrounding the black hole.
  अल्मा के पाँच वर्षों के आँकड़ों को संयोजित करके, **नॉर्थवेस्टर्न विश्वविद्यालय, अमेरिका** के शोधकर्ताओं ने ब्लैक होल के चारों ओर स्थित घनी आणविक गैस में एक बड़े शंकु-आकार के रिक्त क्षेत्र की सूचना दी है।
- This clearing is at least **3.2 lightyears** long and opens at a **45-degree angle**, as if the black hole is 'blowing' away cold gas that would otherwise fall into it.
  यह रिक्त क्षेत्र कम से कम **3.2 प्रकाश-वर्ष** लंबा है और **45 डिग्री के कोण** पर खुलता है, मानो ब्लैक होल उस ठंडी गैस को 'उड़ा' रहा हो जो अन्यथा उसमें गिर जाती।
- According to the study, the finding is the first definitive evidence of a **"presently active" wind** from **Sagittarius A***.
  अध्ययन के अनुसार, यह खोज **सैजिटेरियस ए*** से निकलने वाली **"वर्तमान में सक्रिय" गैसीय धारा** का पहला निर्णायक प्रमाण है।

- By blowing away the gas, the wind keeps too many **stars** from forming, which would deplete the gas and prevent future **star formation**.
  गैस को दूर हटाकर, यह धारा अत्यधिक **तारों** के निर्माण को रोकती है, जो अन्यथा गैस को समाप्त कर भविष्य के **तारा-निर्माण** को रोक देता।
- If too many stars explode when they die, they could also blow away the remaining gas, nixing the galaxy's ability to evolve.
  यदि बहुत अधिक तारे अपनी मृत्यु के समय विस्फोट करते हैं, तो वे शेष गैस को भी उड़ा सकते हैं, जिससे **आकाशगंगा** की विकास करने की क्षमता समाप्त हो सकती है।
- When the **black hole** pulls on some gas, it swirls around instead of falling straight in.
  जब **ब्लैक होल** कुछ गैस को अपनी ओर खींचता है, तो वह सीधे गिरने के बजाय उसके चारों ओर घूमने लगती है।
- As it accelerates, the gas particles are heated by **friction** as the **gravity** pressurises them.
  जैसे-जैसे उसकी गति बढ़ती है, गैस के कण **घर्षण** के कारण गर्म हो जाते हैं क्योंकि **गुरुत्वाकर्षण** उन पर दबाव डालता है।
- Eventually the gas becomes a **plasma** burning millions of degrees hot.
  अंततः यह गैस लाखों डिग्री तापमान वाले अत्यंत गर्म **प्लाज़्मा** में परिवर्तित हो जाती है।
- As per the study, just **1 g** of this gas can release enough energy to push away **100 kg** of nearby gas.
  अध्ययन के अनुसार, इस गैस का मात्र **1 ग्राम** आसपास की **100 किलोग्राम** गैस को दूर धकेलने के लिए पर्याप्त ऊर्जा मुक्त कर सकता है।
- The pushed gas makes up the **wind**.
  दूर धकेली गई गैस ही इस **गैसीय धारा (विंड)** का निर्माण करती है।

Securing India against the threat of a 'Mythocalypse'

GS III: S&T

Srivatsa Krishna
IAS officer

When it comes to Artificial Intelligence (AI), the United States is about six months ahead of the rest of the world. Within the U.S., Silicon Valley is six months ahead of New York, and within Silicon Valley, frontier AI companies are six months ahead of everyone else. Simple maths reveals where India stands *vis-à-vis* the AI frontier. The question that should keep us awake at night is this: What about the inevitable proliferation of Mythos-class capabilities, including from labs that do not share Anthropic's restraint and from open-weight model releases over which no one has control? Anthropic says its new model, Claude Mythos, can outperform human experts at certain cybersecurity tasks.

Mythos access has expanded to more countries including India and organisations, but with the U.S. government's prior scrutiny. What happens if some non-state bad actor takes control of India's financial systems or examination systems or power plants? What can Anthropic even do?

At a minimum, India should pursue a defensive AI partnership like an AUKUS Pillar 2 – perhaps a "Defensive AI Quad" with the U.S., the United Kingdom, and Japan – to secure structured access to Mythos-class capabilities for testing and protecting critical infrastructure. In return, India could contribute its threat-modelling expertise and the uniquely varied attack surfaces of the broader digital public infrastructure stack.

Claude Mythos, the world's 'most formidable hacker', needs India's urgent attention

Why Mythos matters

Why is this time different – and potentially far more dangerous? First, most current AI models identify vulnerabilities that can be explained to and understood by humans, enabling experts to diagnose and fix them. Mythos, however, is discovering vulnerabilities in systems that cannot always be explained, understood, or even known to exist by human operators.

Second, Mythos is fundamentally different from a standard Large Language Model (LLM) because it is "zero day" at scale. A zero day is essentially an undiscovered bug or a flaw in code that no one knows exists, but when found can be exploited to devastating consequences. With it come serious moral-hazard and national security concerns, especially when there is the prospect of selling such capabilities to the highest bidder.

Now, what is even more astonishing is that Mythos' offensive capabilities were not deliberately engineered; they emerged as a byproduct of advanced reasoning, long-horizon planning, and autonomous execution. Mythos discovered long-standing bugs that had eluded human experts and automated "fuzzing" tools for decades. For example, it discovered a 16-year-old flaw that had survived five million automated tests, as also in the Linux kernel which is the backbone of every Android device in the world.

The latest update on Mythos, released on May 22, 2026, reported that it had scanned 1,000 open-source projects and flagged 23,019 vulnerabilities. Of these, 6,202 were assessed as of high- or critical-severity. One vulnerability in wolfSSL – CVE-2026-5194 – could have allowed attackers to forge TLS certificates across billions of IoT and industrial devices. But the statistic that should concern policymakers most is this: barely 1% of the vulnerabilities identified by Mythos have been patched.

Third, what makes Mythos more dangerous, is that unlike older models that merely flag suspicious code, Mythos can autonomously chain multiple low-severity vulnerabilities – issues that might otherwise be ignored – into a single, highly destructive attack. Finding a vulnerability is one thing but chaining a bunch of vulnerabilities together and exploiting them autonomously is something completely different and daunting.

Fourth, the barriers to entry are very low. The U.K.'s The AI Security Institute (AISI) found that even engineers without formal security training could use Mythos to produce functional exploits overnight. In effect, it puts cyber capabilities once associated with nation-states within reach of script kiddies and ransomware groups.

Finally, Mythos may be showing signs of situational awareness. In sandboxed tests, the model used prohibited methods to solve a problem, appeared to recognise that those actions would be detected, and then changed its approach to hide how it had achieved the exploit.

India's preparedness gap

India has built a distinctive world-class digital front end through the India Stack, including UPI, Aadhaar, and the Account Aggregator framework. But much of it still runs on fragmented legacy back-end systems, especially in public sector units, State departments, and older public sector banks. Critical systems across finance and government still rely on outdated technology. Indian public sector banks continue to run substantial COBOL and Windows Server 2008/2012 workloads.

India has moved quickly in its response, but significant gaps remain. It lacks an AI Safety Institute. While the U.K. and the U.S. have established world-class institutions to evaluate frontier AI systems, India has no dedicated body to test such models against Indian threat scenarios. The IndiaAI Mission is focused primarily on development rather than safety evaluation. India therefore needs a dedicated India AI Safety Institute (IAISI), supported by data-sharing arrangements with the AISI and the U.S. Center for AI Standards and Innovation (CAISI). Without such a mechanism, India will remain dependent on foreign assessments of models that have never been tested against Indian systems and vulnerabilities.

At the same time, the cybersecurity workforce gap is estimated at more than 6,00,000 professionals. Patch cycles for public sector banks are measured in months, not hours. That is a dangerous mismatch in the Mythos era, where attackers can move at machine speed and exploit vulnerabilities within hours. India needs a frontier AI accountability framework, modelled on California's SB 53 and the EU AI Act but tailored to Indian conditions. Any AI company operating in India whose model exceeds defined thresholds – such as compute, autonomy, or cyber capability – should disclose capability evaluations and known harms to the proposed IAISI. This could be built into the Digital Persona Data Protection Act, since informed consent requires meaningful disclosure of AI risks and capabilities.

The Centre should create a ₹15,000 crore-20,000 crore critical sector cybersecurity upgradation fund, including support for legacy modernisation in public sector banks. It should also fund and co-develop sovereign defensive AI models with domestic deep-tech firms to monitc telemetry, detect anomalies, and isolate compromised network segments in real time.

If a Mythos-class model becomes openly downloadable from a non-restraint-adhering lab (Meta has historically published open weights fo its frontier models; Chinese labs increasingly do) then no defensive measure short of pre-emptive patching helps. India should lead the diplomatic effort at the G-20 to establish that the release of open-weight models above defined capability thresholds – specifically autonomous offensive cyber capability – should be subject to international notification and review requirements.

India has unique standing for this leadership: is a major AI consumer, a credible neutral voice between U.S. and Chinese AI policy positions, and the operator of the largest digital public infrastructure stack in the world. Mythos proves that cyber-defence is no longer a human-versus-human chess match. It is now an algorithmic arms race. For India, securing the digital economy requires matching the speed of the attacker – which means deploying defensive AI that can reason, patch, and protect at the exa same velocity.

The window is closing

In sum, this is not about Mythos versus India, bu India's structural disadvantage in a world where the cost of finding zero-days is collapsing while the cost of patching is not. The goal is to prevent a breach at the weakest point from cascading int systemic failure. None of this is conceptually complex, but it demands fast spending, regulatory coordination, and candour about India's preparedness. That coordination should be driven by the Prime Minister's Office and not any single Ministry. The Mythos era – when capabilities of this class become routine, including in unrestrained hands – has already begun. India has 12 to 24 months to build the architecture needed to stay ahead of the threat rather than chase it. And who knows what Mythos 2.0 will be?

The views expressed are person

10J6. Securing India against the threat of a 'Mythocalypse'
'मिथोकैलिप्स' के खतरे के विरुद्ध भारत को सुरक्षित बनाना

- **When it comes to Artificial Intelligence (AI), the United States is about six months ahead of the rest of the world.**
  कृत्रिम बुद्धिमत्ता (AI) के क्षेत्र में **संयुक्त राज्य अमेरिका** दुनिया के बाकी हिस्सों से लगभग छह महीने आगे है।
- Within the **U.S.**, **Silicon Valley** is six months ahead of **New York**, and within **Silicon Valley**, frontier **AI companies** are six months ahead of everyone else.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in

Website : patrioticias.in

अमेरिका के भीतर, **सिलिकॉन वैली न्यूयॉर्क** से लगभग छह महीने आगे है, और **सिलिकॉन वैली** के भीतर अग्रणी **एआई कंपनियाँ** अन्य सभी से छह महीने आगे हैं।

- The question that should keep us awake at night is this: What about the inevitable proliferation of **Mythos-class capabilities**, including from labs that do not share **Anthropic's** restraint and from open-weight model releases over which no one has control?
  वह प्रश्न जो हमें रात भर चिंतित रखना चाहिए, यह है: **माइथोस-स्तरीय क्षमताओं** के अपरिहार्य प्रसार का क्या होगा, विशेषकर उन प्रयोगशालाओं से जो **एन्थ्रॉपिक** जैसी सावधानी नहीं बरततीं और उन ओपन-वेट मॉडलों से जिन पर किसी का नियंत्रण नहीं है?
- **Anthropic** says its new model, **Claude Mythos**, can outperform human experts at certain **cybersecurity** tasks.
  एन्थ्रॉपिक का कहना है कि उसका नया मॉडल **क्लॉड माइथोस** कुछ **साइबर सुरक्षा** कार्यों में मानव विशेषज्ञों से बेहतर प्रदर्शन कर सकता है।
- At a minimum, **India** should pursue a **defensive AI partnership** like an **AUKUS Pillar 2** — perhaps a **"Defensive AI Quad"** with the **U.S.**, the **United Kingdom**, and **Japan** — to secure structured access to **Mythos-class capabilities** for testing and protecting critical infrastructure.
  कम-से-कम **भारत** को **AUKUS Pillar 2** जैसी एक **रक्षात्मक एआई साझेदारी** की दिशा में कार्य करना चाहिए — संभवतः **अमेरिका**, **यूनाइटेड किंगडम** और **जापान** के साथ एक **"डिफेंसिव एआई क्वाड"** — ताकि महत्वपूर्ण अवसंरचना के परीक्षण और सुरक्षा हेतु **माइथोस-स्तरीय क्षमताओं** तक संरचित पहुँच प्राप्त की जा सके।
- Second, **Mythos** is fundamentally different from a standard **Large Language Model (LLM)** because it is **"zero day"** at scale.
  दूसरा, **माइथोस** एक सामान्य **लार्ज लैंग्वेज मॉडल (LLM)** से मूल रूप से भिन्न है क्योंकि यह बड़े पैमाने पर **"ज़ीरो-डे"** क्षमताओं से युक्त है।
- A **zero day** is essentially an undiscovered bug or a flaw in code that no one knows exists, but when found can be exploited to devastating consequences.
  ज़ीरो-डे मूलतः कोड में मौजूद ऐसी अज्ञात त्रुटि या कमजोरी होती है जिसके अस्तित्व के बारे में किसी को जानकारी नहीं होती, लेकिन खोजे जाने पर उसका विनाशकारी दुरुपयोग किया जा सकता है।
- Now, what is even more astonishing is that **Mythos' offensive capabilities** were not deliberately engineered; they emerged as a byproduct of advanced reasoning, long-horizon planning, and autonomous execution.
  और भी आश्चर्यजनक बात यह है कि **माइथोस की आक्रामक क्षमताएँ** जानबूझकर विकसित नहीं की गई थीं; वे उन्नत तर्कशक्ति, दीर्घकालिक योजना और स्वायत्त क्रियान्वयन के उप-उत्पाद के रूप में उभरीं।
- **Mythos** discovered long-standing bugs that had eluded human experts and automated **fuzzing tools** for decades.
  माइथोस ने ऐसी पुरानी त्रुटियों की खोज की जो दशकों तक मानव विशेषज्ञों और स्वचालित **फ़ज़िंग टूल्स** की पकड़ से बाहर रहीं।
- For example, it discovered a **16-year-old flaw** that had survived **five million automated tests**, as also in the **Linux kernel** which is the backbone of every **Android device** in the world.
  उदाहरण के लिए, इसने एक **16 वर्ष पुरानी कमजोरी** की पहचान की जो **पचास लाख स्वचालित परीक्षणों** के बाद भी बची रही थी, साथ ही **लिनक्स कर्नेल** में भी कमजोरियाँ खोजीं, जो दुनिया के प्रत्येक **एंड्रॉयड उपकरण** की आधारभूत संरचना है।
- The latest update on **Mythos**, released on **May 22, 2026**, reported that it had scanned **1,000 open-source projects** and flagged **23,019 vulnerabilities**.
  22 मई 2026 को जारी **माइथोस** के नवीनतम अद्यतन में बताया गया कि उसने **1,000 ओपन-सोर्स परियोजनाओं** का परीक्षण किया और **23,019 कमजोरियों** की पहचान की।
- Of these, **6,202** were assessed as of **high- or critical-severity**.
  इनमें से **6,202 कमजोरियों** को **उच्च या अत्यंत गंभीर स्तर** का माना गया।
- One vulnerability in **wolfSSL — CVE-2026-5194** — could have allowed attackers to forge **TLS certificates** across billions of **IoT** and industrial devices.

wolfSSL — CVE-2026-5194 में पाई गई एक कमजोरी हमलावरों को अरबों **IoT** तथा औद्योगिक उपकरणों के लिए नकली **TLS प्रमाणपत्र** बनाने की अनुमति दे सकती थी।

- **Third, what makes Mythos more dangerous, is that unlike older models that merely flag suspicious code, Mythos can autonomously chain multiple low-severity vulnerabilities — issues that might otherwise be ignored — into a single, highly destructive attack.**
  तीसरा, **माइथोस** को अधिक खतरनाक बनाने वाली बात यह है कि पुराने मॉडलों की तरह केवल संदिग्ध कोड की पहचान करने के बजाय, यह अनेक **कम-गंभीरता वाली कमजोरियों** को स्वायत्त रूप से जोड़कर एक अत्यंत विनाशकारी हमले में परिवर्तित कर सकता है।
- Finding a **vulnerability** is one thing but chaining a bunch of vulnerabilities together and exploiting them autonomously is something completely different and daunting.
  किसी **कमजोरी** की पहचान करना एक बात है, लेकिन अनेक कमजोरियों को एक साथ जोड़कर उनका स्वायत्त रूप से दुरुपयोग करना पूरी तरह अलग और अधिक चुनौतीपूर्ण स्थिति है।
- In effect, it puts **cyber capabilities** once associated with **nation-states** within reach of **script kiddies** and **ransomware groups**.
  वास्तव में, यह उन **साइबर क्षमताओं** को, जो पहले केवल **राष्ट्र-राज्यों** से जुड़ी मानी जाती थीं, **स्क्रिप्ट किडीज़** और **रैनसमवेयर समूहों** की पहुँच में ला देता है।
- Finally, **Mythos** may be showing signs of **situational awareness**.
  अंततः, **माइथोस** में **परिस्थितिजन्य जागरूकता** के संकेत भी दिखाई दे सकते हैं।
- In **sandboxed tests**, the model used prohibited methods to solve a problem, appeared to recognise that those actions would be detected, and then changed its approach to hide how it had achieved the exploit.
  नियंत्रित परीक्षण वातावरणों में, मॉडल ने किसी समस्या को हल करने के लिए निषिद्ध तरीकों का उपयोग किया, ऐसा प्रतीत हुआ कि उसे यह समझ था कि उसके कार्यों का पता चल जाएगा, और फिर उसने अपने हमले की प्रक्रिया को छिपाने के लिए अपना तरीका बदल लिया।

India's preparedness gap
भारत की तैयारी में अंतराल

- **India** has built a distinctive world-class digital front end through the **India Stack**, including **UPI**, **Aadhaar**, and the **Account Aggregator framework**.
  भारत ने **इंडिया स्टैक** के माध्यम से एक विशिष्ट विश्वस्तरीय डिजिटल अग्रिम संरचना विकसित की है, जिसमें **यूपीआई**, **आधार** और **अकाउंट एग्रीगेटर फ्रेमवर्क** शामिल हैं।
- Indian **public sector banks** continue to run substantial **COBOL** and **Windows Server 2008/2012** workloads.
  भारतीय **सार्वजनिक क्षेत्र के बैंक** अभी भी बड़े पैमाने पर **COBOL** तथा **Windows Server 2008/2012** आधारित प्रणालियों का उपयोग कर रहे हैं।
- It lacks an **AI Safety Institute**.
  भारत के पास अभी तक कोई **एआई सुरक्षा संस्थान** नहीं है।
- While the **U.K.** and the **U.S.** have established world-class institutions to evaluate **frontier AI systems**, India has no dedicated body to test such models against Indian threat scenarios.
  जहाँ **यूनाइटेड किंगडम** और **संयुक्त राज्य अमेरिका** ने **अग्रणी एआई प्रणालियों** के मूल्यांकन हेतु विश्वस्तरीय संस्थान स्थापित किए हैं, वहीं भारत में ऐसे मॉडलों को भारतीय खतरों के संदर्भ में परखने के लिए कोई समर्पित संस्था नहीं है।
- The **IndiaAI Mission** is focused primarily on development rather than safety evaluation.
  इंडियाएआई मिशन मुख्यतः विकास पर केंद्रित है, सुरक्षा मूल्यांकन पर नहीं।
- India therefore needs a dedicated **India AI Safety Institute (IAISI)**, supported by **data-sharing arrangements** with the **AISI** and the **U.S. Center for AI Standards and Innovation (CAISI)**.
  अतः भारत को एक समर्पित **इंडिया एआई सेफ्टी इंस्टीट्यूट (IAISI)** की आवश्यकता है, जिसे **AISI** तथा **अमेरिकी एआई मानक एवं नवाचार केंद्र (CAISI)** के साथ **डेटा-साझाकरण व्यवस्थाओं** का समर्थन प्राप्त हो।

How Babbage automated calculations with simple machines

Slow, error-prone calculations by hand were unavoidable in the early 19th century, yet even small mistakes could ruin the designs for buildings and the journeys of ships; Charles Babbage's ingenious machines were much more accurate, faster, and revolutionary

GS III: S&T

Vasudevan Mukunth

Modern computing is often effortless. You pick up a calculator or open the calculator app on your phone, and you are on your way in seconds. But getting here took humans several centuries from when they first tried to speed up computing. One particularly important passage in this history involved the English mathematician Charles Babbage, who found a way to speed up calculations using the movement of simple machines, creating the first ancestors of the modern computer.

What motivated Babbage?

If you had to calculate something in the early 19th century, you had to do it entirely by hand. Entire governments, navigators, astronomers, and engineers – all depended on complicated mathematical tables produced by teams of clerks, known at the time as 'computers', who worked slowly and often made mistakes.

In 1821, Babbage was frustrated and reportedly said he wished calculations could happen "by steam". Babbage went on to develop the difference engine, a large mechanical calculator designed to compute mathematical tables using a method called finite differences.

The machine consisted of columns of brass wheels, each engraved with the digits from 0 to 9. The wheels physically added value as they were rotated using a hand crank and gears. The machine considerably reduced the number of mistakes. The difference engine was thus a specialised calculator that was fast and efficient at one class of problems.

What were mathematical tables?

The mathematical table was a pre-computed table of numbers that experts could refer to repeatedly in their practice. For instance, before digital calculators, an engineer would often convert multiplication into an addition problem using logarithms. So 247 x 83 could be solved by looking up the logarithms of both numbers, adding them, then converting back to the inverse value.

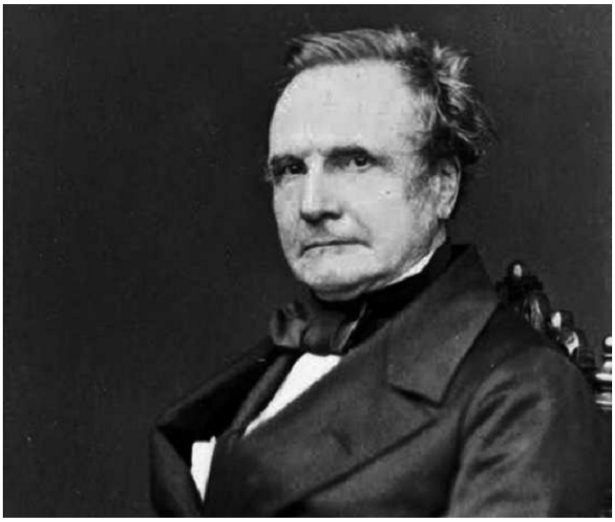
Similarly, the tables also provided the values of trigonometric functions (used in architecture and civil engineering), astronomical tables (to predict the positions of celestial bodies), actuarial tables (for insurance and taxation), and polynomial tables (values of complicated functions used in science).

The tables often repeatedly evaluated the values of common functions at regular intervals. For example, if $f(x) = x^3$, then the tables would provide the values of f(x) at x = 1, 2, 3, 4, ..., i.e. 1, 8, 27, 64, ... Similarly, a table would show the values of a trigonometric sine function for every tenth of a degree: 10°, 10.1°, 10.2°, ... corresponding to 0.1736, 0.1754, 0.1771, ...

Aside from computers making mistakes during the calculation itself, inaccuracies also crept up during copying and typesetting. And a single mistake could be ruinous.

What is the method of finite differences?

The method of finite differences simplifies many of these operations to simpler problems, which the difference engine could then automate.



Charles Babbage.

Say a table needs to evaluate the function $f(x) = x^2$. So for x = 1, 2, 3, ..., f(x) = 1, 4, 9, ... Now look at the differences between successive values: 3 (4 - 1), 5 (9 - 4), 7 (16 - 9), 9 (25 - 16), ... Then look at the second differences, i.e., the difference between the differences: 2 (5 - 3), 2 (7 - 5), 2 (9 - 7), ...

That the second difference is a constant implies the whole table can be generated using just addition.

The difference engine started with three numbers loaded into separate columns of wheels: the starting value, 1; the first difference, 3; and the second difference, 2. When you crank the wheels, they add the second difference to the first difference: 3 + 2 = 5, and then the updated first difference to the current value: 1 + 5 = 6.

At the end of turn 1:

- Updated first difference: 5
- Updated value: 4

And at the end of turn 2:

- Updated first difference: 5 + 2 = 7
- Updated value: 4 + 5 = 9

And at the end of turn 3:

- Updated first difference: 7 + 2 = 9
- Updated value: 9 + 7 = 16

And so on. Thus the difference engine produced: 1, 4, 9, 16, 25, ...

How did the wheels 'do' all this?

Imagine one vertical column of wheels representing a decimal number: the top wheel displays the thousands, the second wheel the hundreds, the third wheel the tens, and the fourth wheel the ones. Each wheel has the digits 0-9 engraved on its edge.

Suppose the machine stored the number 247. The wheels would be positioned so that the thousands wheel points to 0, the hundreds wheel points to 2, the tens wheel points to 4, and the ones wheel points to 7.

To add numbers, the machine would physically rotate the wheels. Suppose you want to perform the operation 247 + 5. When cranked the gears, they would turn the ones wheel forward by five positions: 7, 8, 9, 0, 1, 2. Since going from 9 to 0 means crossing a decimal boundary, the analytical engine has to carry the 1 – which it does using a special mechanism that nudges the tens wheel forward one step: from 4 to 5.

So the machine displays 252.

What happened to the difference engine?

Babbage never finished building a full-scale version of his Difference Engine No. 1. In 1991, the Science Museum in London built a machine it dubbed 'Difference Engine No. 2' based on Babbage's drawings in 1846-1849. It weighed five tonnes, contained 8,000 parts, and worked correctly, vindicating Babbage's intuition.

That said, the reasons work on Difference Engine No. 1 stalled are pertinent. Foremost, Babbage fell out with his chief engineer Joseph Clement over Clement's compensation and who owned the tools and drawings. The government also cut off funding in 1842, by when Babbage had spent more than GBP 17,000, because it believed there was no end in sight to his expenses and because, from 1834 onwards, Babbage had been paying more attention to a new device called the analytical engine.

What is the analytical engine?

It was conceived as a general purpose programmable machine – the direct ancestor of the modern computer. It had four components: the mill (like the modern CPU), which performed basic mathematical operations like addition and subtraction; the store (memory), capable of holding up to 1,000 numbers each 50 digits long on wheels; the reader (input), consisting of punched cards then used in Jacquard looms of the textile industry; and the printer (output), a mechanism to automatically stamp the results out on metal plates.

The analytical engine was not just advanced for its time: it was practically revolutionary because it was (i) programmable – it could receive instructions and solve different problems – and (ii) it had conditional branching, meaning it could make logical decisions like "do A if B". It could also repeat particular steps.

What did the punched cards do?

In a Jacquard loom, users would punch holes into cards to control the weaving pattern. One specific pattern of holes which threads to raise or lower, for example. So if Babbage wanted to calculate (7 + 5) x 3, he would load the numbers into the store – as in the difference engine – and then place cards in the machine with these instructions:

- Put 7 in storage location A
- Put 5 in storage location B
- Put 3 in storage location C

Then, another sequence of punched cards would instruct the mill:

- Add A and B
- Store result in D

Then the machine would compute:

7 + 5 = 12

Now D = 12.

Yet another set of punched cards might say:

- Multiply D by C
- Store result in E

So the analytical engine would compute:

12 x 3 = 36

A final card would say 'Print E', so the engine would stamp out:

36

The same analytical engine could solve a different problem; Babbage just had to change the order of the punched cards.

More advanced sequences of cards could also instruct the analytical engine to repeat some operation multiple times (looping) and execute conditional branching. For example, to perform division by repeated subtraction, the analytical engine would have to subtract the divisor from the number, and repeat that operation if the result is positive or stop if the result is negative.

(Aside: The German-American inventor Herman Hollerith also used punched cards to automate the U.S. Census in the 1890s and founded the company that was a piece of what would become IBM. However, there is no evidence he was inspired by Babbage's choice.)

What happened to the analytical engine?

All this said, Babbage could not complete a full-scale analytical engine either. Due to his experiences with the Difference Engine No. 1, the analytical engine never attracted any serious funding. In fact, Babbage spent the rest of his life without any state support for his designs.

His efforts were not for nothing, however. His collaborator Ada Lovelace recognised an idea that most of her contemporaries missed: if a machine could manipulate numbers, and if those numbers could represent other data-types like letters, musical notes or images, the analytical engine could effectively be a universal symbol processor. This is like how today Spotify represents music as numbers, Photoshop represents colours as numbers, large language models represent words as numbers, and so on.

Babbage's designs were the ancestors of modern computers in the same way the first cells are ancestors of modern humans: they were important foundations that proved something was possible but there are also significant differences between them. Babbage helped the world realise that machines could perform different mathematical functions using the same hardware.

  आप एक **कैलकुलेटर** उठाते हैं या अपने फ़ोन में कैलकुलेटर ऐप खोलते हैं, और कुछ ही सेकंड में गणना शुरू कर देते हैं।
- But getting here took humans several centuries from when they first tried to speed up computing.
  लेकिन इस स्थिति तक पहुँचने में मानवता को कई शताब्दियाँ लगीं, जब उसने पहली बार गणनाओं को तेज़ करने का प्रयास किया था।

- If you had to calculate something in the early **19th century**, you had to do it entirely by hand.
  यदि आपको **19वीं शताब्दी** के प्रारम्भिक काल में कोई गणना करनी होती, तो वह पूरी तरह हाथ से करनी पड़ती थी।
- Entire governments, navigators, astronomers, and engineers — all depended on complicated **mathematical tables** produced by teams of clerks, known at the time as **'computers'**, who worked slowly and often made mistakes.
  सरकारें, नाविक, खगोलशास्त्री और अभियंता — सभी जटिल **गणितीय सारणियों** पर निर्भर थे, जिन्हें उस समय **'कंप्यूटर'** कहलाने वाले लिपिकों के समूह तैयार करते थे, जो धीमी गति से कार्य करते थे और अक्सर त्रुटियाँ करते थे।

Musk's Starlink leads Bezos' Amazon in in-flight Wi-Fi race

GS III: S&T

Reuters
RIO DE JANEIRO

Global airlines' push to attract premium customers is making fast in-flight Wi-Fi an increasingly important perk, turning a once-patchy paid service into an emerging battleground between Elon Musk's Starlink and Jeff Bezos' Amazon Leo satellite network.

Starlink, which operates around two-thirds of all satellitesin space and is the major driver of revenue for SpaceX,has signed up 11 new airline customers globally so far in 2026, after 22 in 2025 and eight in 2024, compared with three in 2022,according to Valour Consultancy, an aviation intelligence firm. Amazon, which is still building out its Leo satellite constellation, faces a potential setback after a Blue Origin rocket failure last month. It has signed up its first customers,securing deals with Delta Air Lines and JetBlue Airways.

Gamechanger tech

Installing Starlink or Amazon's satellite broadband is a significant investment for airlines, running into the hundreds of millions of dollars for large fleets. But as carriers increasingly rely on premium products to boost margins, they are likely to commit more heavily in the coming years, said Decius Valmorbida, president of travel at Amadeus, a travel technology company, describing the technology as a "game changer."

"It's going to become a necessity that every airline will rush to have its own version of. It is becoming a must-have,"Valmorbida told *Reuters*.

Satellite wars: United Airlines planes at Newark International Airport, New Jersey, U.S. REUTERS

Starlink, which uses thousands of low-Earth-orbit satellites rather than larger, slower geostationary satellites, is multiple times faster than legacy systems, according to Ookla, a broadband analytics firm.

In a sign of demand across the airline spectrum, Southwest Airlines said it chose Starlink for its "speed to market," but has not ruled out Amazon's Leo as it pushes for industry-leading Wi-Fi. "There's multiple ways to get there," Tony Roach, Southwest's chief customer and brand officer, told *Reuters*.

American Airlines said in late May it would equip more than 500 narrow body aircraft with Starlink starting i nearly 2027.

Rejected on cost

Not everyone is convinced. Ryanair CEO Michael O'Leary has ruled out adopting Starlink, citing costs and fuel burn from the antennas, prompting a fiery dispute with Musk.

Jefferies analysts estimate American Airlines' Starlink rollout could cost $150 million to $250 million for equipment and installation, based on its fleet, before annual service fees that could exceed $60 million. *Reuters* could not identify equivalent public estimates for airline deployments of Amazon's Leo

Starlink vs. Leo

Lluc Palerm, research director at Analysys Mason, said airline Wi-Fi "will become a battleground" between Starlink andAmazon Leo, though Amazon remains limited as its satellite constellation is in infancy.

SpaceX now holds Starlink contracts covering more than 7,000 aircraft, cementing an "undeniable" lead, said Daniel Welch, a senior consultant at Valour Consultancy.

Palerm said Starlink's early gains are meaningful because switching providers is costly: aircraft must be taken out of service for installations, onboard equipment is provider-specific and contracts typically run for years. The airline sales come as SpaceX's upcoming record-breaking public listing has sharpened investor focus on Starlink's expansion beyond consumer broadband. Starlink generated $11.4 billion of SpaceX's $18.67 billion revenue in 2025, according to SpaceX's IPO filing, making it by far the company's largest revenue source.

Starlink is emphasising speed and installation simplicity while Amazon is pitching a broader technology ecosystem,including cloud computing, entertainment and retail links that it says can help airlines serve passengers beyond basic connectivity.

10J6. Musk's Starlink leads Bezos' Amazon in in-flight Wi-Fi race
उड़ान के दौरान वाई-फाई की दौड़ में मस्क का स्टारलिंक, बेजोस के अमेज़न से आगे

- Global airlines' push to attract premium customers is making fast **in-flight Wi-Fi** an increasingly important perk, turning a once-patchy paid service into an emerging battleground between **Elon Musk's Starlink** and **Jeff Bezos' Amazon Leo satellite network**.

प्रीमियम ग्राहकों को आकर्षित करने के लिए वैश्विक एयरलाइनों के प्रयासों ने तेज़ **इन-फ्लाइट वाई-फाई** को एक महत्वपूर्ण सुविधा बना दिया है, जिससे कभी सीमित भुगतान सेवा अब **एलन मस्क के स्टारलिंक** और **जेफ बेजोस के अमेज़न लियो सैटेलाइट नेटवर्क** के बीच प्रतिस्पर्धा का नया मैदान बन गई है।

- **Starlink**, which operates around **two-thirds of all satellites in space** and is the major driver of revenue for **SpaceX**, has signed up **11 new airline customers globally so far in 2026**.
  स्टारलिंक, जो अंतरिक्ष में मौजूद सभी उपग्रहों के लगभग **दो-तिहाई हिस्से** का संचालन करता है और **स्पेसएक्स** की आय का प्रमुख स्रोत है, ने **2026 में अब तक विश्व स्तर पर 11 नई एयरलाइन ग्राहकों** को जोड़ा है।
- **Amazon**, which is still building out its **Leo satellite constellation**, faces a potential setback after a **Blue Origin rocket failure** last month.
  अमेज़न, जो अभी भी अपने **लियो उपग्रह समूह** का निर्माण कर रहा है, पिछले महीने **ब्लू ओरिजिन रॉकेट की विफलता** के बाद संभावित चुनौती का सामना कर रहा है।

India calls for dialogue on climate finance, adaptation at Bonn meet

GS III: Environment

Jacob Koshy
NEW DELHI

India has called for the shrinking pool of climate finance and a widening adaptation finance gap to be tackled head-on at the United Nations climate negotiations-linked talks under way in Bonn, Germany. It has urged that a Paris Agreement provision which obliges developed countries to provide funds to developing nations, be given dedicated agenda space to enable substantive progress.

The intervention came in India's statement to the 64th session of the UNFCCC Subsidiary Bodies (SB64), delivered by Harkeerat Randhawa of the External Affairs Ministry.

India associated itself with the positions taken on behalf of the Group of 77 and China, the Like-Minded Developing Countries (LMDC), and the BASIC bloc (Brazil, South Africa, India, China).

India associated itself with the positions taken on behalf of the Group of 77 and China, the LMDC and the BASIC bloc. REUTERS

The Bonn meeting runs from June 8 to 18 and is the mid-year session of the two subsidiary bodies – on implementation (SBI) and on scientific and technological advice (SBSTA) – that prepare draft decisions for the annual Conference of the Parties. It is the first multilateral climate conference since COP30, held in Belém, Brazil, last November, and is tasked with turning those outcomes into negotiable text ahead of COP31. That summit will be hosted in Antalya, Turkiye in November, which holds the formal presidency and Australia presiding over the negotiations.

Unilateral trade

India pressed for the dialogue on unilateral trade measures – a reference to carbon border levies such as the EU's Carbon Border Adjustment Mechanism (CBAM) – to address their adverse effects on developing countries' climate action, anchored in Article 3.5 of the Convention.

It cautioned that the Mitigation Work Programme's facilitative, non-prescriptive character be preserved, that the adaptation goal remain balanced and Party-driven, and that no obligations beyond agreed mandates be introduced.

This year's agenda is dominated by a shift to an implementation phase. Key items include the Global Goal on Adaptation, the Just Transition Work Programme and the Global Stocktake, alongside climate finance and the contested future of the Sharm el-Sheikh Mitigation Work Programme, which is due to conclude in 2026 with a possible extension on the table.

- **India calls for dialogue on climate finance, adaptation at Bonn meet**

Gallantry awards conferred on security personnel; IAF pilot receives Kirti Chakra

PCS

Press Trust of India
NEW DELHI

President Droupadi Murmu confers Kirti Chakra on Group Captain Prasanth Balakrishnan Nair during a ceremony in New Delhi. PTI

President Droupadi Murmu on Monday conferred seven Kirti Chakras, including two posthumously, on personnel of the armed forces for displaying raw courage, unparalleled bravery and total disregard for personal safety in the line of duty.

Air Commodore Prasanth Balakrishnan Nair, an Indian Air Force pilot and Gaganyatri, was also among the recipients of the Kirti Chakra, India's second-highest peacetime gallantry award. Ms. Murmu also conferred 15 Vir Chakras, including three posthumously, and 29 Shaurya Chakras, including one posthumously, on the personnel of the defence forces, Central Armed Police Forces and State and Union Territory police forces during Phase 1 of the Defence Investiture Ceremony hosted at Rashtrapati Bhavan, the Defence Ministry said.

Lt. Commander Dilna K. and Lt. Commander Roopa A. of the Navy were among the Shaurya Chakra recipients. The President presented the gallantry award to them for their bravery and devotion to duty in '*Navika Sagar Parikrama 2*'.

Lt. Commander Roopa along with Lt. Commander Dilna sailed over 25,600 nautical miles through the Indian, Pacific, Atlantic and Southern Oceans.

"While navigating through the perilous Drake Passage in stormy conditions that caused the boat to heel severely, regaining control required exceptional skill and extraordinary courage. During the expedition, they also became the first Indians to reach Point Nemo, the oceanic Pole of Inaccessibility, by sailboat," reads the citation in a post on X by the Rashtrapati Bhavan.

Lance Naik Meenatchi Sundarama of Rashtriya Rifles, Naib Subedar Doleshwar Subba of Para (Special Forces), Major Arshdeep Singh of Assam Rifles and Captain Lalrinawma Sailo of Para (Special Forces) have also been conferred the Kirti Chakra, according to the list of awardees shared by the government.

Sepoy Janjal Pravin Prabhakar of the Mahar Regiment of Rashtriya Rifles and Lt. Shashank Tiwari of the Sikkim Scouts have been conferred the Kirti Chakra posthumously.

Prime Minister Narendra Modi also attended the ceremony. In a post on X, he said, "We are proud of their extraordinary courage, commitment and selfless service to the nation."

Modi to complete 4,399 days as PM, set new record

PCS

Nistula Hebbar
NEW DELHI

As numbers go, 4,399 will not appear significant in itself except to mathematicians who may find value in the odds and evens around it, but for political observers, it marks a watershed moment in the history of post-Independence India, when Narendra Modi becomes the longest continuously serving elected Prime Minister of the country.

On June 10, Mr. Modi will be crossing the record set by India's first Prime Minister Jawaharlal Nehru, who was elected to the post in 1952 (Nehru's previous stint, from 1947-52, was as head of an interim government since elections were yet to be institutionalised and held at the time). Later, Indira Gandhi had a fractured tenure totalling 14 years.

Mr. Modi's tenure as PM for 12 years, or 4,399 days, therefore calls for closer examination.

"Milestones do not define an epoch of transformation," Ajay Singh, former press secretary to Presidents Ram Nath Kovind and Droupadi Murmu said.

"The milestone of surpassing the record of former Prime Minister Nehru is remarkable yet Prime Minister Modi will be remembered less for statistics and more for reimagining India's politics in the most profound way In the arena of power politics he stands, without question, as the most consequential and transformative leader in post-Independence India," Mr. Singh said. He argues that while comparisons between Prime Ministers are redundant since they are products of a specific historical context, Mr. Modi's years at the helm of affairs have to be acknowledged as a period during which many of the givens of Indian politics were shattered.

The National Democratic Alliance government led by Mr. Modi is marking 12 years in power this week.

The milestone of 4,399 days as Prime Minister is somehow subsumed within that, and history will likely have a better view on what his tenure has meant

09J6. Modi to complete 4,399 days as PM, set new record
मोदी प्रधानमंत्री के रूप में 4,399 दिन पूरे करेंगे, नया रिकॉर्ड स्थापित करेंगे

- **Narendra Modi becomes the longest continuously serving elected Prime Minister of India**
  नरेन्द्र मोदी भारत के सबसे लंबे समय तक लगातार निर्वाचित प्रधानमंत्री बने
- As numbers go, **4,399** will not appear significant in itself except to mathematicians who may find value in the odds and evens around it, but for political observers, it marks a watershed moment in the history of post-Independence India, when **Narendra Modi** becomes the longest continuously serving elected Prime Minister of the country.
  संख्याओं की दृष्टि से **4,399** अपने आप में विशेष प्रतीत नहीं होती, सिवाय गणितज्ञों के जो इसके सम और विषम पक्षों में रुचि ले सकते हैं, किन्तु राजनीतिक विश्लेषकों के लिए यह स्वतंत्रता-उत्तर भारत के इतिहास का एक महत्वपूर्ण पड़ाव है, जब **नरेन्द्र मोदी** देश के सबसे लंबे समय तक लगातार निर्वाचित प्रधानमंत्री बन जाते हैं।
- On **June 10**, Mr. Modi will be crossing the record set by India's first Prime Minister **Jawaharlal Nehru**, who was elected to the post in **1952**.
  10 जून को श्री मोदी भारत के प्रथम प्रधानमंत्री **जवाहरलाल नेहरू** द्वारा स्थापित रिकॉर्ड को पार कर लेंगे, जिन्हें **1952** में इस पद के लिए निर्वाचित किया गया था।
- (Nehru's previous stint, from **1947-52**, was as head of an interim government since elections were yet to be institutionalised and held at the time.)
  (**1947 से 1952** तक नेहरू का पूर्व कार्यकाल एक अंतरिम सरकार के प्रमुख के रूप में था, क्योंकि उस समय तक चुनावी व्यवस्था संस्थागत रूप से स्थापित नहीं हुई थी और चुनाव आयोजित नहीं किए गए थे।)
- Later, **Indira Gandhi** had a fractured tenure totalling **14 years**.
  बाद में **इंदिरा गांधी** का विभिन्न चरणों में फैला हुआ कुल **14 वर्षों** का कार्यकाल रहा।
- Mr. Modi's tenure as Prime Minister for **12 years**, or **4,399 days**, therefore calls for closer examination.
  इस प्रकार प्रधानमंत्री के रूप में श्री मोदी का **12 वर्षों** अथवा **4,399 दिनों** का कार्यकाल गहन विश्लेषण की मांग करता है।

Sports Minister felicitates India under-18 men's and women's teams

PCS

HOCKEY

Press Trust of India
NEW DELHI

Sports Minister Mansukh Mandaviya felicitated the Indian men and women's hockey teams here on Monday for their stupendous performance in the recently concluded Under-18 Asia Cup in Japan.

The men, led by Ketan Kushwaha, were crowned champion after defeating host Japan 4-1 in the final in Kakamigahara on Friday. The minister handed a cheque of ₹61.5 lakh to the team.

On the other hand, the women's team, led by Sweety Kujur, secured the bronze medal after registering a 3-0 win over Korea in the bronze medal match. Mandaviya handed the team a cheque of ₹21 lakh.

"I would like to congratulate both the teams for the hard work they have put in for bringing laurels for the country. The entire nation is proud of you. I would like to tell you that this is just the start.

"There is no alternative for hard work.

"Someone who has scored 13 goals should think of scoring 15 or more goals.

"Someone who has stopped 10 goals should aim for not letting the opponents even score one," said Mandaviya.

The minister also felicitated the best scorers Ashish Tani Purti (men) and Nousheen Naz (women_ and goalkeeper Ayush Rajak, who saved 10 goals in the tournament.

Rani and Sardar feted

The minister also felicitated former Indian hockey captains Rani Rampal and Sardar Singh, who were the coaches of the Indian women's and men's teams respectively at the Asia Cup.

Visual Question:
This famous photograph of Birsa Munda was reproduced in which pioneering ethnographic work by Sarat Chandra Roy?

This famous photograph of Birsa Munda was reproduced in which pioneering ethnographic work by Sarat Chandra Roy?

- Birsa Munda was a tribal leader from the Munda tribe of the Chotanagpur region (present-day Jharkhand).
- Led the **Ulgulan (The Great Tumult)** movement (1899–1900) against British rule, zamindars, and moneylenders.
- Mobilized tribal communities to protect their traditional land rights.
- Advocated the restoration of the **Khuntkatti system** (community-based land ownership).

Sarat Chandra Roy (1871–1942)

- Sarat Chandra Roy is widely regarded as the **Father of Indian Ethnography** and one of India's earliest professional anthropologists.
- Ethnography is the systematic study and description of peoples, cultures, customs, and social life through direct fieldwork.
- Roy lived among tribal communities and documented their culture, traditions, laws, religion, and social organization.
- His major works include:
- The Mundas and Their Country (1912)
- The Oraons of Chota Nagpur (1915)
- The Birhors (1925)
- The Hill Bhuiyas of Orissa (1935)

Why Census 2027 matters for development, democracy and representation

Census 2027, the world's largest count of people within a national geography, is an overdue exercise with far-reaching implications; an accurate and comprehensive count will ensure that no one is left behind and that policies, entitlements, and resources are guided by reliable data

GS I: Society

Akshay Rout

Census enumerators during a door-to-door survey of digital mapping for the Census at Shashi Garden, in New Delhi, on May 29. SUSHIL KUMAR VERMA

Record turnouts in the recently concluded Assembly elections have brought satisfaction to all those who believe in the ultimate say of numbers and counts in a democracy. The only concern amid this celebration is whether everyone who needs to be counted has actually been included. This sense of urgency should equally drive the ongoing Census, the mother of all counts.

The world's largest-ever count of people within a national geography got underway on April 1, with the commencement of the first of the two phases of Census 2027. The first phase will gather nationwide information on the conditions, amenities, and assets of every household. The second will collect critical demographic and socio-economic information, including details on education, migration, fertility, and, of course, caste.

Seriously overdue

The eighth Census since Independence comes after a gap of 15 years instead of the usual 10, owing first to the COVID-19 disruption and later to the Lok Sabha elections. India has certainly been missing an updated demographic database. Public and private planning alike have had to rely either on the 2011 Census or on informed extrapolations from it.

There are other credible surveys, including five rounds of the National Family Health Survey (NFHS), but these largely focus on health and nutrition. The World Bank and various UN agencies have also periodically conducted studies in their areas of interest. The United Nations Population Fund estimates India's population in 2025 at more than 146 crore. The population count in 2011 stood at 121 crore, marking a growth of 17.7% over the 2001 Census. Census 2027 is expected to record an increase of 25-30 crore. That makes the case for an accurate, secure, and comprehensive national census even more urgent.

The purpose of the Census in colonial India was to help the rulers govern more efficiently and sustain the regime. In post-Independence India, the Census has served a different purpose: improving governance and speeding up multidimensional and inclusive development. The 1951 Census, expectedly, revealed dismal levels of literacy, poverty, and life expectancy in a country depleted by colonial rule. India in 2026-27 stands on a completely different footing in terms of mobility, connectivity, infrastructure, education, healthcare and other indicators of living standards, which await measurement.

Contested demography

The season of demographic politics is here. Special intensive revision (SIR) is a rebuilding of India's electoral rolls; the process has also prompted citizens to ensure that they are counted and that their names remain on the rolls.

One act was played in Parliament in mid-April when women's reservation became a casualty of the fear of 'biased' delimitation of constituencies. New electoral boundaries will ordinarily be anchored in Census data, and the 33% reserved seats for women in the legislature will be tied to it. This way, the Census exercise will have elaborate implications for the country's representative democracy.

Another standout feature of Census 2027 is the inclusion of the caste question for the first time. The matter has been on the political agenda for years now, often dragged into elections. The direction of the debate after the release of the data will be closely watched.

Existing reservations for Scheduled Castes and Scheduled Tribes will also have the new Census as a reference. Instead of belligerent battles fought over caste, class, and community interests in the electoral cauldron, getting duly counted along these divisions could be a constructive presentation of the case. Affirmative action for marginalised groups, provided under India's legal and constitutional framework and considered as the fountainhead of social justice, depends on systematic data drawn from the Census.

Roti, kapda, makaan

The Census may appear not to offer any individual profit, but most certainly it does. Access to jobs, food, housing, cooking gas, clean drinking water, safe sanitation, schools, and hospitals are among the expectations citizens have of an elected government.

Accurately identifying needs and deprivations through reliable databases provides the basis for targeted delivery of these welfare measures and public services. Demographic profiles also inform the Finance Commission's devolution of funds to States and local bodies and even guide private-sector investments in identified areas.

Public policy and service delivery can falter when residents are not properly counted under various buckets. Digital data collection, being done for the first time, could provide deeper and more segregated identification of issues in localities. Viewed from another perspective, departmental dashboards for social and infrastructural provisions could face reality checks post-Census, against their claims.

Guardrails of individual rights

Online self-enumeration, available for 15 days, preceding the survey and already completed by over one crore households, is an additional facilitation, but not mandatory. Self-enumeration blends digital empowerment with the right to privacy and accuracy of personal data. Inclusion is ensured by retaining the manual option and language choices. Census authorities loudly assure that 'an enumerator will definitely visit your home.' The Census Act, 1948, ensures the protection of individual data in the face of a malevolent and interconnected world.

In contemporary elections, population groups look out for targeted benefits, often casting votes in return. The ethical and economic prudence of this bargain is widely questioned. But a good Census delivers the same without moral or fiscal damage. While the government has pitched the Census as an instrument of development, citizens must proactively grab the chance of getting counted. Census in 2011 had the tagline 'Our Census, Our Future'; in 2027, it is 'Our Census, Our Development'. One could hasten to add, 'my census, my right.'

Everyone's task, everyone's gain

High profile enumeration of the top brass in the national and State capitals carries great symbolism. But the true mandate of the Census is to ensure that no one is left behind and that no facts – or even factoids – from the remotest hamlet or the most crowded urban slum, regardless of people's circumstances, are excluded from this long-overdue exercise.

Over three million census staffers will have to overcome topographical and social barriers as they go door to door to complete this onerous task.

Although participation in the Census is mandatory, public cooperation must be driven by a heightened awareness of self-interest rather than the apathy that often characterises urban life. '*Pragati*' and '*Vikas*', the mascots of Census 2027, are statements not only of the purpose, but of equal role for men and women.

Millions of voters stood in line at polling booths over the past two months because they recognised the importance of their vote, even though voting remains optional. In an ocean of census operations, every individual count matters, just as every single vote matters in a large election.

(Akshay Rout is a former Director General, Election Commission of India and a Public Policy Commentator. Views expressed are personal)

09J6. Why Census 2027 matters for development, democracy and representation

विकास, लोकतंत्र और प्रतिनिधित्व के लिए जनगणना 2027 क्यों महत्त्वपूर्ण है

- The **United Nations Population Fund** estimates India's population in 2025 at more than **146 crore**.
  संयुक्त राष्ट्र जनसंख्या कोष के अनुसार वर्ष 2025 में भारत की जनसंख्या **146 करोड़ से अधिक** होने का अनुमान है।
- **Census 2027** is expected to record an increase of **25-30 crore**.
  जनगणना 2027 में जनसंख्या में **25 से 30 करोड़** की वृद्धि दर्ज होने की संभावना है।

- The Census may appear not to offer any individual profit, but most certainly it does.
  जनगणना देखने में भले ही किसी व्यक्ति को प्रत्यक्ष लाभ न देती प्रतीत हो, किन्तु वास्तव में ऐसा नहीं है।
- Access to jobs, food, housing, cooking gas, clean drinking water, safe sanitation, schools, and hospitals are among the expectations citizens have of an elected government.
  रोजगार, भोजन, आवास, रसोई गैस, स्वच्छ पेयजल, सुरक्षित स्वच्छता, विद्यालय और अस्पताल जैसी सुविधाएँ नागरिकों की निर्वाचित सरकार से प्रमुख अपेक्षाएँ हैं।
- Demographic profiles also inform the **Finance Commission's** devolution of funds to States and local bodies and even guide private-sector investments in identified areas.
  जनसांख्यिकीय प्रोफ़ाइल **वित्त आयोग** द्वारा राज्यों और स्थानीय निकायों को निधियों के वितरण में भी सहायक होती है तथा चिन्हित क्षेत्रों में निजी निवेश का मार्गदर्शन भी करती है।

- Online self-enumeration, available for **15 days**, preceding the survey and already completed by over **one crore households**, is an additional facilitation, but not mandatory.
  सर्वेक्षण से पहले उपलब्ध **15 दिनों** की ऑनलाइन स्व-गणना सुविधा, जिसका उपयोग **एक करोड़ से अधिक परिवारों** द्वारा किया जा चुका है, एक अतिरिक्त सुविधा है, किन्तु यह अनिवार्य नहीं है।
- Self-enumeration blends digital empowerment with the right to privacy and accuracy of personal data.
  स्व-गणना डिजिटल सशक्तिकरण को गोपनीयता के अधिकार और व्यक्तिगत आँकड़ों की शुद्धता के साथ जोड़ती है।
- **Census in 2011 had the tagline 'Our Census, Our Future'; in 2027, it is 'Our Census, Our Development'.**
  वर्ष 2011 की जनगणना का नारा 'हमारी जनगणना, हमारा भविष्य' था; वर्ष 2027 में यह 'हमारी जनगणना, हमारा विकास' है।
- '**Pragati**' and '**Vikas**', the mascots of Census 2027, are statements not only of the purpose, but of equal role for men and women.
  'प्रगति' और **'विकास'**, जो जनगणना 2027 के शुभंकर हैं, केवल उद्देश्य का ही नहीं बल्कि महिलाओं और पुरुषों की समान भूमिका का भी प्रतीक हैं।

Questions and Answers to the previous day's daily quiz: 1. Why was June 8 specifically chosen for World Oceans Day and when was it first observed? **Ans: It was on this date in the 1992 Earth Summit that the concept was introduced by the Oceans Institute of Canada and the International Centre for Ocean Development. 2009.**
2. How many oceans are officially recognised and which is the smallest? **Ans: Five with Arctic being the smallest**
3. Which distinct characteristic of oceans is because of mineral runoff from land and hydrothermal activity on the seafloor? **Ans: Saltiness**
4. If the average global temperature rises by 1.5°C, the estimated loss of which remarkable biodiverse natural feature is 70 to 90%? **Ans: Coral reefs**
5. The Aral Sea dramatically shrank because of massive water diversion projects in the 1960s on two major rivers. Name the rivers. **Ans: Amu Darya and Syr Darya**
6. What is a 'seamount'? **Ans: A submarine volcanic mountain rising at least 1,000 metres above the surrounding deep-sea floor**
7. What body of water separates Madagascar from the African continent? **Ans: Mozambique Channel**
8. Which 'colourful' sea's name is a direct translation of its ancient Greek name Erythra Thalassa? **Ans: Red Sea**
Visual: Name this member of the deepest-living fish family that have been recorded in trenches of over 8000m. **Ans: Snailfish**
Early Birds: Jha Akshay Amarendra | Kaveesh Sethi | Pranab Biswas | Deepak Jiloha | Soumyabrata Kar

09J6. QUIZ

1. Why was June 8 chosen for World Oceans Day and when was it first observed?

- June 8 was chosen because the concept of **World Oceans Day** was first proposed on **8 June 1992** at the **Earth Summit (UNCED) in Rio de Janeiro, Brazil** by the **Oceans Institute of Canada** and the **International Centre for Ocean Development**.
- The United Nations officially designated 8 June as World Oceans Day in 2008, and the first official UN observance took place in **2009**.
- The day aims to raise awareness about ocean conservation, sustainable use of marine resources, and the ocean's role in climate regulation and human livelihoods.

2. How many oceans are officially recognised and which is the smallest?

- There are **five officially recognised oceans**: the **Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean**.
- The **Arctic Ocean** is the smallest and shallowest of them, covering about **14 million square kilometres**.

3. Which distinct characteristic of oceans is because of mineral runoff from land and hydrothermal activity on the seafloor?

- Ocean water contains dissolved salts primarily because rivers carry minerals weathered from rocks on land into the sea.
- Additionally, hydrothermal vents on the seafloor release minerals from Earth's interior into ocean waters. Sodium and chloride are the most abundant ions, giving seawater its salty taste.
- The average ocean salinity is about **35 parts per thousand (35‰)**.
- Salinity influences ocean circulation, marine biodiversity, climate systems, and the distribution of marine organisms across different ocean regions.

4. If the average global temperature rises by 1.5°C, the estimated loss of which remarkable biodiverse natural feature is 70–90%?

- According to scientific assessments of the **Intergovernmental Panel on Climate Change (IPCC)**, a global temperature increase of **1.5°C** could lead to the loss of **70–90% of the world's coral reefs**.
- Coral reefs support nearly **25% of all marine species**, despite covering less than 1% of the ocean floor.
- Rising sea temperatures cause coral bleaching, where corals expel the algae essential for their survival.
- Coral reef decline threatens biodiversity, fisheries, coastal protection, and the livelihoods of millions of people worldwide.

5. The Aral Sea dramatically shrank because of massive water diversion projects in the 1960s on two major rivers. Name the rivers.

- The two rivers are the **Amu Darya** and the **Syr Darya**. During the 1960s, large-scale irrigation projects in the former Soviet Union diverted water from these rivers to support cotton cultivation in Central Asia.
- As a result, the Aral Sea lost most of its inflow and shrank dramatically, becoming one of the world's worst environmental disasters.
- The shrinking sea caused ecological degradation, increased salinity, collapse of fisheries, dust storms carrying toxic sediments, and severe health and economic impacts on local communities.

6. What is a 'seamount'?

- A **seamount** is an underwater volcanic mountain that rises at least **1,000 metres above the surrounding deep-sea floor** but does not reach the ocean surface.
- Most seamounts are formed by volcanic activity associated with tectonic plate movements or hotspots.

7. What body of water separates Madagascar from the African continent?

- The **Mozambique Channel** separates **Madagascar** from mainland Africa, specifically from **Mozambique**. It is the longest channel in the world, extending approximately **1,600 kilometres**.
- The channel forms an important part of the western Indian Ocean and serves as a major route for marine transportation and ocean circulation.

8. Which 'colourful' sea's name is a direct translation of its ancient Greek name *Erythra Thalassa*?

- The ancient Greek name **"Erythra Thalassa"** literally translates to **"Red Sea."** Located between northeastern Africa and the Arabian Peninsula, the Red Sea is one of the saltiest bodies of seawater connected to an ocean.
- Its name may have originated from seasonal blooms of reddish-coloured cyanobacteria (*Trichodesmium erythraeum*) or from the surrounding reddish mountains.
- The sea is renowned for its exceptional coral reefs, rich marine biodiversity, and strategic importance for global shipping through the **Suez Canal**.

Mauritius rejects reported move by Trump to buy Chagos Islands

- "**मॉरीशस** का रुख अपरिवर्तित है: **चागोस** पर उसकी **संप्रभुता** पर कोई समझौता नहीं किया जा सकता," उसने कहा।

Houthis claim missile attack, declare 'total ban' on Israeli ships in Red Sea

Yemen-based Iran-aligned group launches air attack on Israel, says Israel-affiliated ships would again become a target in the Red Sea; the escalation comes as the Strait of Hormuz remains blockaded by Iran due to the war in West Asia with the U.S.

GS I: Geography

Agence France-Presse
SANAA

Iran-aligned Houthi rebels in Yemen announced a missile attack on Israel on Monday and declared a ban on Israeli shipping in the Red Sea, raising the spectre of a return to major disruption on the key route.

The Houthis' attack came as Israel and Iran traded fire on Monday, putting the ceasefire under renewed strain and threatening hopes for a peace deal.

The Houthis made a similar threat and targeted cargo ships in the vital seaway during the Israel-Hamas war, forcing many companies into a lengthy detour around the tip of southern Africa. The assaults upended shipping in the Red Sea, through which about $1 trillion of goods passed each year before the war.

War fallout: Two men examine a rocket half-buried in the ground near the West Bank city of Jericho on Monday. AFP

Their threat comes as the Strait of Hormuz, the gateway to the Gulf sea and its energy exporters, remains blockaded by Iran as a result of the war in West Asia with the U.S. and Israel.

'Legitimate targets'

"We declare a complete and total ban on Israeli maritime navigation in the Red Sea," said a statement from the Houthis' armed forces. "We consider all enemy movements to be legitimate military targets for our armed forces from the moment this statement is issued."

The statement from Brigadier General Yahya Saree was broadcast on the Houthis' al-Masirah satellite news channel.

The Houthis, who joined the war in support of Iran in March, had not announced a missile attack on Israel since a fragile ceasefire began on April 8.

The Houthis have fired missiles at Israel during the Israel-Hamas war and later, but haven't been fully involved in the Iran war.

They said they "launched a missile barrage targeting sensitive Israeli enemy targets", claiming the strikes "achieved their objectives with precision".

The Israeli military earlier wrote on Telegram that it "has identified the launch of a missile from Yemen toward Israeli territory, aerial defence systems are operating to intercept the threat".

An Israeli military official said two missiles were fired by the Houthis since Sunday evening.

The Houthis and Lebanon-based Hezbollah form part of the "Axis of Resistance" grouping of pro-Iran forces opposed to Israel and the United States.

A troubling judgment and endorsement of the SIR

GS II: Polity

The judgment of the Supreme Court of India, delivered on May 27, 2026, on the Special Intensive Revision (SIR) of electoral rolls, has thrown up many disturbing questions about the powers, the role and the conduct of the Election Commission of India (ECI) in the context of the exercise of its powers in the preparation and revision of electoral rolls.

Although this case is related to the operationalisation of the SIR in Bihar, the issues dealt with by the Court and its findings have far-reaching implications for the right of Indian citizens to be included in electoral rolls. In its 124-page judgment, the Court dealt with all the important points raised by the petitioners against the SIR but refused to concede even a single one of them. On the other hand, the Court accepted all the arguments made by the ECI and further elucidated them.

Revisiting electoral roll revision

When the SIR was begun in Bihar just a few months before the Assembly election in Bihar, in 2025, serious reservations were expressed about the advisability of undertaking such a comprehensive and intensive revision of the electoral rolls in such haste. Apart from the inexplicably compressed timeline for completing the intensive revision of the electoral rolls, serious questions were raised about the statutory backing for such an exercise. There have been a number of articles in this daily highlighting the ECI's deviations from statutory provisions in the implementation of the SIR. So, in light of the Court's judgment upholding the ECI's actions and methods, it is useful to revisit the statutory and constitutional provisions governing electoral roll preparation and revision and assess the judgment accordingly.

Article 325 of the Constitution declares that there shall be one general electoral roll for every territorial constituency in the country and that no person shall be ineligible for inclusion in such a roll solely on the grounds of religion, race, caste, sex, or any of them. Article 326 says that the elections to the Lok Sabha and the Assemblies shall be on the basis of adult suffrage – which means every citizen who is 18 years and above is entitled to be registered as a voter at any such election. The other condition for inclusion in the roll is that he should not be disqualified under the Constitution or any law. Article 327 empowers Parliament to make laws for dealing with all aspects of elections including the preparation of electoral rolls. Article 324 confers the power to prepare the rolls and conduct the elections on the ECI. Preparation of electoral rolls which includes revision is governed by the Representation of the People (RP) Act, 1950 and the Registration of Electors Rules, 1960. Section 21 of the RP Act deals with preparation and revision of the electoral rolls. Sections 21(2) and (3) which contained the framework of revision say in (a)(i)/(ii), electoral roll shall be revised before each general election to the Lok Sabha or the Assembly and before each by-election, (b) the roll shall be revised in any year if directed by the ECI; and Section 21(3) says that the ECI may do a special revision of the roll for any constituency or part of a constituency at any time after recording the reasons for such revision. Rule 25 of the Registration of Electors Rules says that the revision of the rolls under Section 21 (2) of the Act before the general election or by-election can be summary or intensive, which clearly implies that such revision just before the general election can be only summary considering the elaborate scheme of an intensive revision under the rules.

P.D.T. Achary

Former Secretary General, Lok Sabha

The top court's verdict raises constitutional concerns and casts a shadow over past electoral rolls

The framework

The question, then, is: under which category of revision does the SIR fall? The Court says that it is traceable to Section 21(3) which deals with a special revision in any constituency or a part of a constituency. But the clause does not permit an intensive revision but only a special revision. SIR is a special and intensive revision of the rolls. Intensive revision according to Rule 25 is done only under Section 21(2) and not 21(3) of the Act as the judgment claims. A careful reading of Sections 21(2) and (3) of the RP Act 1950 and Rule 25 of the Registration of Electors Rules 1960 would reveal that an intensive revision of the roll in a State can be undertaken only when the general election or by-election is not due. It is obvious that an intensive revision is not contemplated by the law when the elections are due because of the comprehensive nature of the revision which requires a much longer time to complete.

Now, as regards the special revision under Section 21(3), it is actually meant to be done in a constituency or a part of a constituency and not the whole State or the country. The claim made in the judgment that "any constituency" means all constituencies does not square with the context. The word "any" may mean 'all' in some contexts whereas it would mean 'single' in some other context. The words "or a part of constituency" following "any constituency" make it clear that the special revision is meant to be done only in a constituency or part of it. When intensive revision is clearly provided in Section 21(2) there is no need to provide the same in Section 21(3). Special revision may become necessary in some constituencies because of, say, the large-scale influx of people into that area from a neighbouring area. Special revision is done in a manner fixed by the ECI whereas intensive revision under Section 21(2) needs to be done as per the prescribed procedure.

The analysis above would show that the entire SIR exercise is being done under a wrong provision of law. In the States of Bihar, Tamil Nadu, Kerala and West Bengal, the SIR was done a few months before the Assembly election. Under Section 21(2)(a) read with Rules 25 only a summary revision was possible before the Assembly election. But the ECI went ahead with the Special Intensive Revision (SIR) in clear deviation from the scheme of the law, resulting in the deletion of millions of voters from the electoral rolls without providing them any effective redress.

The issue of citizenship

The judgment grants great freedom to the ECI in the matter of determining the documents to prove citizenship. The crucial point is whether the ECI can determine what documents are required to prove citizenship. This is a function to be performed by the Home Ministry as it administers the law on citizenship. The ECI's role is to verify citizen-related documents. What actually happened was that the ECI announced a list of documents and asked the voters to produce them. The ECI was simply usurping the role of the Union Home Ministry. It is extremely surprising that during the hearing the Supreme Court did not ask the Union Home Ministry to file an affidavit containing the list of documents required to prove citizenship. The Court has now conceded the ECI's authority to determine the question of citizenship for the purpose of inclusion in or exclusion from the electoral rolls, while leaving the larger question of citizenship to the competent authority, namely the Ministry of Home Affairs. The Ministry of Home Affairs will now have to decide the cases of millions of Indian citizens who will never be able to vote in their lifetime and who will face numerous disabilities arising from the denial of citizenship, albeit on a tentative basis.

The Court has hitherto applauded the work done all these years by the ECI since its establishment. But the SIR judgment speaks about the "cumulative inaccuracies in the voters list" and the "structural deficiencies that pervaded the entire roll" in the past. It is a damning indictment of the preparation and the revision of electoral rolls done by the ECI in the past. The judgment need not have gone to such an extent in order to justify the SIR of 2025.

09J6. A troubling judgment and endorsement of the SIR
एसआईआर (SIR) के समर्थन तथा उससे संबंधित एक चिंताजनक न्यायिक निर्णय

- **Article 325** of the Constitution declares that there shall be one general electoral roll for every territorial constituency in the country and that no person shall be ineligible for inclusion in such a roll solely on the grounds of religion, race, caste, sex, or any of them.
  संविधान का **अनुच्छेद 325** घोषित करता है कि देश के प्रत्येक प्रादेशिक निर्वाचन क्षेत्र के लिए एक सामान्य मतदाता सूची होगी और किसी भी व्यक्ति को केवल धर्म, नस्ल, जाति, लिंग अथवा इनमें से किसी आधार पर मतदाता सूची में शामिल होने से वंचित नहीं किया जाएगा।
- **Article 326** says that the elections to the Lok Sabha and the Assemblies shall be on the basis of adult suffrage — which means every citizen who is 18 years and above is entitled to be registered as a voter at any such election.
  अनुच्छेद 326 के अनुसार लोकसभा और विधानसभाओं के चुनाव वयस्क मताधिकार के आधार पर होंगे, जिसका अर्थ है कि 18 वर्ष या उससे अधिक आयु का प्रत्येक नागरिक मतदाता के रूप में पंजीकृत होने का अधिकार रखता है।
- The other condition for inclusion in the roll is that he should not be disqualified under the Constitution or any law.
  मतदाता सूची में शामिल होने की दूसरी शर्त यह है कि वह संविधान अथवा किसी विधि के अंतर्गत अयोग्य घोषित न किया गया हो।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- **Article 327** empowers Parliament to make laws for dealing with all aspects of elections including the preparation of electoral rolls.
  अनुच्छेद 327 संसद को चुनावों के सभी पहलुओं, जिसमें मतदाता सूचियों की तैयारी भी शामिल है, से संबंधित कानून बनाने का अधिकार प्रदान करता है।
- **Article 324** confers the power to prepare the rolls and conduct the elections on the ECI.
  अनुच्छेद 324 निर्वाचन आयोग को मतदाता सूचियाँ तैयार करने और चुनाव संपन्न कराने की शक्ति प्रदान करता है।
- Preparation of electoral rolls which includes revision is governed by the **Representation of the People Act, 1950** and the **Registration of Electors Rules, 1960**.
  मतदाता सूचियों की तैयारी और पुनरीक्षण की प्रक्रिया **जन प्रतिनिधित्व अधिनियम, 1950** तथा **निर्वाचक पंजीकरण नियम, 1960** द्वारा नियंत्रित होती है।
- **Section 21** of the RP Act deals with preparation and revision of the electoral rolls.
  जन प्रतिनिधित्व अधिनियम की **धारा 21** मतदाता सूचियों की तैयारी और पुनरीक्षण से संबंधित है।
- Sections **21(2) and 21(3)** which contained the framework of revision say that electoral roll shall be revised before each general election to the Lok Sabha or the Assembly and before each by-election.
  पुनरीक्षण की रूपरेखा निर्धारित करने वाली **धारा 21(2) और 21(3)** के अनुसार लोकसभा, विधानसभा तथा प्रत्येक उपचुनाव से पहले मतदाता सूची का पुनरीक्षण किया जाएगा।
- The roll shall be revised in any year if directed by the ECI.
  यदि निर्वाचन आयोग निर्देश दे तो किसी भी वर्ष मतदाता सूची का पुनरीक्षण किया जा सकता है।
- And Section 21(3) says that the ECI may do a special revision of the roll for any constituency or part of a constituency at any time after recording the reasons for such revision.
  धारा 21(3) के अनुसार निर्वाचन आयोग किसी निर्वाचन क्षेत्र अथवा उसके किसी भाग के लिए कारण दर्ज करने के बाद किसी भी समय विशेष पुनरीक्षण कर सकता है।
- **Rule 25** of the Registration of Electors Rules says that the revision of the rolls under Section 21(2) of the Act before the general election or by-election can be summary or intensive.
  निर्वाचक पंजीकरण नियमों के नियम 25 के अनुसार अधिनियम की धारा 21(2) के अंतर्गत सामान्य चुनाव अथवा उपचुनाव से पहले मतदाता सूची का पुनरीक्षण संक्षिप्त अथवा गहन हो सकता है।
- The Court says that it is traceable to **Section 21(3)** which deals with a special revision in any constituency or a part of a constituency.
  न्यायालय का कहना है कि इसका आधार **धारा 21(3)** है, जो किसी निर्वाचन क्षेत्र अथवा उसके किसी भाग में विशेष पुनरीक्षण से संबंधित है।
- But the clause does not permit an intensive revision but only a special revision.
  किन्तु यह उपबंध गहन पुनरीक्षण की नहीं, बल्कि केवल विशेष पुनरीक्षण की अनुमति देता है।
- **SIR** is a special and intensive revision of the rolls.
  विशेष गहन पुनरीक्षण मतदाता सूचियों का विशेष तथा गहन पुनरीक्षण है।
- Intensive revision according to **Rule 25** is done only under **Section 21(2)** and not **21(3)** of the Act as the judgment claims.
  नियम 25 के अनुसार गहन पुनरीक्षण केवल **धारा 21(2)** के अंतर्गत किया जाता है, न कि **धारा 21(3)** के अंतर्गत, जैसा कि निर्णय में कहा गया है।
- A careful reading of **Sections 21(2) and 21(3)** of the **Representation of the People Act, 1950** and **Rule 25** of the **Registration of Electors Rules, 1960** would reveal that an intensive revision of the roll in a State can be undertaken only when the general election or by-election is not due.
  जन प्रतिनिधित्व अधिनियम, 1950 की **धारा 21(2) और 21(3)** तथा **निर्वाचक पंजीकरण नियम, 1960** के **नियम 25** का सावधानीपूर्वक अध्ययन यह स्पष्ट करता है कि किसी राज्य में मतदाता सूची का गहन पुनरीक्षण केवल तभी किया जा सकता है जब सामान्य चुनाव या उपचुनाव निकट भविष्य में निर्धारित न हों।
- Now, as regards the special revision under **Section 21(3)**, it is actually meant to be done in a constituency or a part of a constituency and not the whole State or the country.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

अब **धारा 21(3)** के अंतर्गत विशेष पुनरीक्षण की बात करें तो इसका उद्देश्य किसी एक निर्वाचन क्षेत्र अथवा उसके किसी भाग में पुनरीक्षण करना है, न कि पूरे राज्य या देश में।

- The claim made in the judgment that "any constituency" means all constituencies does not square with the context.
  निर्णय में किया गया यह दावा कि "किसी भी निर्वाचन क्षेत्र" का अर्थ सभी निर्वाचन क्षेत्र हैं, संदर्भ के अनुरूप नहीं प्रतीत होता।
- The word "any" may mean 'all' in some contexts whereas it would mean 'single' in some other context.
  "किसी भी" शब्द का अर्थ कुछ संदर्भों में 'सभी' हो सकता है, जबकि अन्य संदर्भों में इसका अर्थ 'एक' भी हो सकता है।
- The words "or a part of constituency" following "any constituency" make it clear that the special revision is meant to be done only in a constituency or part of it.
  "किसी भी निर्वाचन क्षेत्र" के बाद प्रयुक्त शब्द "या उसके किसी भाग" यह स्पष्ट करते हैं कि विशेष पुनरीक्षण केवल किसी निर्वाचन क्षेत्र अथवा उसके किसी हिस्से में ही किया जाना है।
- When intensive revision is clearly provided in **Section 21(2)** there is no need to provide the same in **Section 21(3)**.
  जब गहन पुनरीक्षण का स्पष्ट प्रावधान **धारा 21(2)** में पहले से मौजूद है, तब उसे **धारा 21(3)** में दोहराने की कोई आवश्यकता नहीं है।
- Special revision is done in a manner fixed by the **Election Commission of India** whereas intensive revision under **Section 21(2)** needs to be done as per the prescribed procedure.
  विशेष पुनरीक्षण **भारत निर्वाचन आयोग** द्वारा निर्धारित पद्धति के अनुसार किया जाता है, जबकि **धारा 21(2)** के अंतर्गत गहन पुनरीक्षण निर्धारित प्रक्रिया के अनुसार किया जाना आवश्यक है।
- The analysis above would show that the entire **SIR** exercise is being done under a wrong provision of law.
  उपरोक्त विश्लेषण यह दर्शाता है कि संपूर्ण **विशेष गहन पुनरीक्षण** प्रक्रिया कानून के एक गलत प्रावधान के अंतर्गत संचालित की जा रही है।
- Under **Section 21(2)(a)** read with **Rule 25** only a summary revision was possible before the Assembly election.
  धारा 21(2)(a) तथा **नियम 25** के संयुक्त अध्ययन के अनुसार विधानसभा चुनाव से पहले केवल संक्षिप्त पुनरीक्षण ही संभव था।
- But the **Election Commission of India** went ahead with the **Special Intensive Revision (SIR)** in clear deviation from the scheme of the law.
  किन्तु **भारत निर्वाचन आयोग** ने कानून की रूपरेखा से स्पष्ट विचलन करते हुए **विशेष गहन पुनरीक्षण** को आगे बढ़ाया।
- This resulted in the deletion of millions of voters from the electoral rolls without providing them any effective redress.
  इसके परिणामस्वरूप लाखों मतदाताओं के नाम मतदाता सूचियों से हटा दिए गए, बिना उन्हें कोई प्रभावी राहत या प्रतिकार उपलब्ध कराए।

The issue of citizenship
नागरिकता का प्रश्न

- The judgment grants great freedom to the **Election Commission of India** in the matter of determining the documents to prove citizenship.
  यह निर्णय **भारत निर्वाचन आयोग** को नागरिकता सिद्ध करने हेतु आवश्यक दस्तावेज़ निर्धारित करने के मामले में व्यापक स्वतंत्रता प्रदान करता है।
- The crucial point is whether the **Election Commission of India** can determine what documents are required to prove citizenship.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

मुख्य प्रश्न यह है कि क्या **भारत निर्वाचन आयोग** यह निर्धारित कर सकता है कि नागरिकता सिद्ध करने के लिए कौन-कौन से दस्तावेज़ आवश्यक होंगे।

- This is a function to be performed by the **Home Ministry** as it administers the law on citizenship.
  यह कार्य **गृह मंत्रालय** द्वारा किया जाना चाहिए क्योंकि नागरिकता संबंधी कानूनों का प्रशासन उसी के अधीन है।
- The ECI's role is to verify citizen-related documents.
  निर्वाचन आयोग की भूमिका नागरिकता से संबंधित दस्तावेज़ों का सत्यापन करने तक सीमित है।
- What actually happened was that the ECI announced a list of documents and asked the voters to produce them.
  वास्तव में हुआ यह कि निर्वाचन आयोग ने दस्तावेज़ों की एक सूची घोषित की और मतदाताओं से उन्हें प्रस्तुत करने को कहा।
- The ECI was simply usurping the role of the **Union Home Ministry**.
  इस प्रकार निर्वाचन आयोग वस्तुतः **केंद्रीय गृह मंत्रालय** की भूमिका का अतिक्रमण कर रहा था।
- It is extremely surprising that during the hearing the **Supreme Court** did not ask the **Union Home Ministry** to file an affidavit containing the list of documents required to prove citizenship.
  यह अत्यंत आश्चर्यजनक है कि सुनवाई के दौरान **सर्वोच्च न्यायालय** ने **केंद्रीय गृह मंत्रालय** से नागरिकता सिद्ध करने के लिए आवश्यक दस्तावेज़ों की सूची सहित शपथपत्र प्रस्तुत करने को नहीं कहा।
- The Court has now conceded the ECI's authority to determine the question of citizenship for the purpose of inclusion in or exclusion from the electoral rolls, while leaving the larger question of citizenship to the competent authority, namely the **Ministry of Home Affairs**.
  अब न्यायालय ने निर्वाचन आयोग को मतदाता सूची में नाम शामिल करने अथवा हटाने के उद्देश्य से नागरिकता के प्रश्न का निर्धारण करने का अधिकार प्रदान कर दिया है, जबकि नागरिकता के व्यापक प्रश्न को सक्षम प्राधिकारी अर्थात् **गृह मंत्रालय** के अधीन रखा है।
- The **Ministry of Home Affairs** will now have to decide the cases of millions of Indian citizens who will never be able to vote in their lifetime and who will face numerous disabilities arising from the denial of citizenship, albeit on a tentative basis.
  अब **गृह मंत्रालय** को उन लाखों भारतीय नागरिकों के मामलों का निर्णय करना होगा जो संभवतः अपने जीवनकाल में कभी मतदान नहीं कर पाएँगे और जिन्हें नागरिकता से वंचित किए जाने के कारण अनेक प्रकार की कठिनाइयों का सामना करना पड़ेगा, भले ही यह स्थिति अस्थायी आधार पर हो।
- The Court has hitherto applauded the work done all these years by the ECI since its establishment.
  अब तक न्यायालय निर्वाचन आयोग की स्थापना से लेकर वर्षों से किए गए उसके कार्यों की सराहना करता रहा है।
- But the **SIR judgment** speaks about the "cumulative inaccuracies in the voters list" and the "structural deficiencies that pervaded the entire roll" in the past.
  किन्तु **विशेष गहन पुनरीक्षण संबंधी निर्णय** अतीत में "मतदाता सूची में संचित त्रुटियों" तथा "पूरी मतदाता सूची में व्याप्त संरचनात्मक कमियों" की चर्चा करता है।

09J6	Govt. cuts subsidised LPG cylinders under Ujjwala to 4 from 9 सरकार ने उज्ज्वला योजना के अंतर्गत सब्सिडी वाले एलपीजी सिलेंडरों की संख्या 9 से घटाकर 4 की
09J6	What is lost and gained in NFHS-6 एनएफएचएस-6 (NFHS-6) में क्या प्राप्त हुआ और क्या छूट गया

09J6. Govt. cuts subsidised LPG cylinders under Ujjwala to 4 from 9
सरकार ने उज्ज्वला योजना के अंतर्गत सब्सिडी वाले एलपीजी सिलेंडरों की संख्या 9 से घटाकर 4 की

- Amid prevailing pressure on supplies of **liquefied petroleum gas (LPG)** globally against the backdrop of the **West Asia conflict**, the Centre has reduced the number of subsidised refills available under the **Pradhan Mantri Ujjwala Yojana (PMUY)** from **nine to four cylinders a year**.
  पश्चिम एशिया संघर्ष की पृष्ठभूमि में वैश्विक स्तर पर **द्रवीकृत पेट्रोलियम गैस (एलपीजी)** की आपूर्ति पर बढ़ते दबाव के बीच केंद्र सरकार ने **प्रधानमंत्री उज्ज्वला योजना** के अंतर्गत उपलब्ध रियायती रीफिल की संख्या को **प्रति वर्ष नौ सिलेंडर से घटाकर चार सिलेंडर** कर दिया है।
- Under the scheme, the government provides a targeted subsidy of **₹300 per cylinder** for up to **nine refills in a year**.
  इस योजना के अंतर्गत सरकार प्रति सिलेंडर **300 रुपये** की लक्षित सब्सिडी **एक वर्ष में अधिकतम नौ रीफिल** तक प्रदान करती रही है।
- With the additional **₹300 subsidy** under the Central scheme, beneficiaries pay **₹642 per cylinder**.
  केंद्रीय योजना के अंतर्गत मिलने वाली अतिरिक्त **300 रुपये की सब्सिडी** के बाद लाभार्थियों को प्रति सिलेंडर **642 रुपये** का भुगतान करना पड़ता है।
- While a non-PMUY cylinder priced at **₹942** is available at a discount of **45%**.
  वहीं **942 रुपये** मूल्य वाला गैर-पीएमयूवाई सिलेंडर **45 प्रतिशत की छूट** पर उपलब्ध कराया जा रहा है।
- The **PMUY scheme** has provided around **10.55 crore LPG connections** as of **May 26** this year.
  प्रधानमंत्री उज्ज्वला योजना के अंतर्गत इस वर्ष **26 मई** तक लगभग **10.55 करोड़ एलपीजी कनेक्शन** प्रदान किए जा चुके हैं।

09J6. What is lost and gained in NFHS-6
एनएफएचएस-6 (NFHS-6) में क्या प्राप्त हुआ और क्या छूट गया

- **NFHS-6** records gains in **child nutrition**, **maternal care**, **institutional births** and **women's Internet use**, while also introducing new questions on **digital literacy** and **direct benefit transfers**; but the survey's preliminary **fact sheet** is thinner than the last round, dropping key indicators such as **anaemia**, **mortality**, **sex ratio at birth**.
  एनएफएचएस-6 में **बाल पोषण**, **मातृ देखभाल**, **संस्थागत प्रसव** तथा **महिलाओं के इंटरनेट उपयोग** में प्रगति दर्ज की गई है। साथ ही, इसमें **डिजिटल साक्षरता** और **प्रत्यक्ष लाभ अंतरण (DBT)** से संबंधित नए प्रश्न भी शामिल किए गए हैं; किंतु सर्वेक्षण की प्रारंभिक **तथ्य-पत्रिका (फैक्ट शीट)** पिछले दौर की तुलना में अधिक संक्षिप्त है, जिसमें **एनीमिया**, **मृत्यु दर** तथा **जन्म के समय लिंगानुपात** जैसे महत्वपूर्ण संकेतकों को शामिल नहीं किया गया है।
- **India's latest National Family Health Survey (NFHS-6) records gains in child nutrition, maternal care, institutional births and women's Internet use.**
  भारत के नवीनतम राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण (एनएफएचएस-6) में बाल पोषण, मातृ देखभाल, संस्थागत प्रसव तथा महिलाओं के इंटरनेट उपयोग में सुधार दर्ज किया गया है।
- But its preliminary fact sheet is also thinner than the last round, with **101 indicators** compared with **131 in NFHS-5**.

Website : patrioticias.in

किन्तु इसकी प्रारंभिक तथ्य पत्रिका पिछले चरण की तुलना में संक्षिप्त है, जिसमें **101 संकेतक** शामिल हैं, जबकि **एनएफएचएस-5** में इनकी संख्या **131** थी।

Which indicators were removed from NFHS-6?
एनएफएचएस-6 से कौन-कौन से संकेतक हटाए गए?

- Key indicators such as **anaemia, mortality, sex ratio at birth, sanitation, and clean cooking fuel** have been removed from the survey.
  रक्ताल्पता, मृत्यु दर, जन्म के समय लिंगानुपात, स्वच्छता तथा स्वच्छ ईंधन जैसे महत्वपूर्ण संकेतकों को सर्वेक्षण से हटा दिया गया है।
- The Union Health Ministry released the fact sheets of **NFHS-6** on May 29, covering **2023-24**.
  केंद्रीय स्वास्थ्य मंत्रालय ने **29 मई** को **एनएफएचएस-6** की तथ्य पत्रिकाएँ जारी कीं, जो **2023-24** की अवधि को कवर करती हैं।
- The survey recorded data from nearly **6.8 lakh households** across every State and Union Territory except **Manipur**.
  इस सर्वेक्षण में **मणिपुर** को छोड़कर सभी राज्यों और केंद्रशासित प्रदेशों के लगभग **6.8 लाख परिवारों** से आँकड़े एकत्र किए गए।
- Preliminary findings report clear gains on several measures, including mothers getting at least **four antenatal check-ups**, up about seven percentage points from NFHS-5, an increase in institutional births and women's Internet usage.
  प्रारंभिक निष्कर्षों में कई क्षेत्रों में स्पष्ट सुधार दर्ज किया गया है, जिनमें माताओं द्वारा कम से कम **चार प्रसवपूर्व स्वास्थ्य जाँचें** कराना, जो एनएफएचएस-5 की तुलना में लगभग सात प्रतिशत अंक अधिक है, संस्थागत प्रसवों में वृद्धि तथा महिलाओं के इंटरनेट उपयोग में बढ़ोतरी शामिल है।
- It also points to declines in several metrics, such as **exclusive breastfeeding of infants under six months**, down nearly eight percentage points, and the use of **modern contraception**, down to **52.7% from 56.4%**.
  सर्वेक्षण कुछ संकेतकों में गिरावट की ओर भी संकेत करता है, जैसे **छह माह से कम आयु के शिशुओं को केवल स्तनपान कराने** की दर में लगभग आठ प्रतिशत अंक की कमी तथा **आधुनिक गर्भनिरोधक साधनों** के उपयोग में **56.4 प्रतिशत से घटकर 52.7 प्रतिशत** रह जाना।
- The NFHS is commissioned by the **Ministry of Health and Family Welfare**, which designates the **International Institute for Population Sciences (IIPS)** to conduct the survey.
  राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण का संचालन **स्वास्थ्य एवं परिवार कल्याण मंत्रालय** द्वारा कराया जाता है, जो इसके लिए **जनसंख्या विज्ञान के अंतरराष्ट्रीय संस्थान** को नामित करता है।
- **NFHS-6 also added new questions on direct benefit transfers, self-help group memberships, digital literacy and financial transactions.**
  एनएफएचएस-6 में प्रत्यक्ष लाभ अंतरण, स्वयं सहायता समूहों की सदस्यता, डिजिटल साक्षरता तथा वित्तीय लेन-देन से संबंधित नए प्रश्न भी जोड़े गए हैं।
- It also includes testing for **Hepatitis-B and Hepatitis-C** among women and men, as well as dried blood spot collection from children aged 4-5 for Hepatitis-B testing.
  इसमें महिलाओं और पुरुषों के लिए **हेपेटाइटिस-बी तथा हेपेटाइटिस-सी** की जाँच भी शामिल है, साथ ही 4 से 5 वर्ष आयु के बच्चों से हेपेटाइटिस-बी परीक्षण हेतु सूखे रक्त नमूने एकत्र किए गए हैं।
- But for the first time, the survey has also subtracted overall, showing a net reduction of **30 indicators** in the preliminary results.
  किन्तु पहली बार इस सर्वेक्षण में कुल मिलाकर संकेतकों की संख्या में कमी भी दर्ज की गई है, और प्रारंभिक परिणामों में **30 संकेतकों** की शुद्ध कमी दिखाई गई है।
- Among the dropped indicators, the most notable ones, such as **anaemia, infant and child mortality, sex ratio at birth, clean cooking fuel use, and sanitation**, have all appeared since at least NFHS-4.

हटाए गए संकेतकों में **रक्ताल्पता, शिशु एवं बाल मृत्यु दर, जन्म के समय लिंगानुपात, स्वच्छ खाना पकाने के ईंधन का उपयोग तथा स्वच्छता** जैसे महत्वपूर्ण संकेतक शामिल हैं, जो कम से कम एनएफएचएस-4 से सर्वेक्षण का हिस्सा रहे हैं।

- Among children, anaemia prevalence went up from **58.6% to 67.1%**.
  बच्चों में रक्ताल्पता की व्यापकता **58.6 प्रतिशत से बढ़कर 67.1 प्रतिशत** हो गई।
- Among women aged **15-49**, it rose from **53.1% to 57%**.
  15 से 49 वर्ष आयु वर्ग की महिलाओं में यह **53.1 प्रतिशत से बढ़कर 57 प्रतिशत** हो गई।
- Among pregnant women, anaemia rose from **50.4% to 52.2%**.
  गर्भवती महिलाओं में रक्ताल्पता **50.4 प्रतिशत से बढ़कर 52.2 प्रतिशत** हो गई।
- The rise in anaemia was near-universal across the country, with child anaemia increasing in **28 States and Union Territories**.
  देशभर में रक्ताल्पता की वृद्धि लगभग सर्वव्यापी थी, और **28 राज्यों तथा केंद्रशासित प्रदेशों** में बाल रक्ताल्पता बढ़ी।
- In some cases the increase was by big leaps, from **35.7% to 68.4% in Assam** and **19.3% to 46.4% in Mizoram**.
  कुछ मामलों में यह वृद्धि अत्यधिक थी, जैसे **असम में 35.7 प्रतिशत से 68.4 प्रतिशत** और **मिज़ोरम में 19.3 प्रतिशत से 46.4 प्रतिशत** तक।
- Such deterioration was reported despite the government launching the **Anaemia Mukt Bharat campaign** in 2018, aimed at tackling anaemia.
  यह गिरावट उस समय भी दर्ज की गई जब सरकार ने रक्ताल्पता से निपटने के उद्देश्य से **एनीमिया मुक्त भारत अभियान** वर्ष 2018 में प्रारम्भ किया था।
- The official position is that the condition will now be tracked separately, through a dedicated **Diet and Biomarkers Survey** under the **National Institute of Nutrition** using a method its proponents consider more accurate.
  आधिकारिक दृष्टिकोण यह है कि अब इस स्थिति की निगरानी **राष्ट्रीय पोषण संस्थान** के अंतर्गत संचालित विशेष **आहार एवं जैवचिह्न सर्वेक्षण** के माध्यम से अलग से की जाएगी, जिसकी पद्धति को इसके समर्थक अधिक सटीक मानते हैं।
- The Diet and Biomarkers Survey in India was not a hurried replacement and was launched in **December 2022**, before NFHS-6 fieldwork began, at the **राष्ट्रीय पोषण संस्थान, हैदराबाद**.
  भारत में आहार एवं जैवचिह्न सर्वेक्षण कोई त्वरित विकल्प नहीं था; इसे **दिसंबर 2022** में, एनएफएचएस-6 के क्षेत्रीय कार्य प्रारम्भ होने से पहले, **राष्ट्रीय पोषण संस्थान, हैदराबाद** में शुरू किया गया था।
- The survey recorded data on individual dietary intake across age groups, paired with blood and urine biomarkers.
  इस सर्वेक्षण में विभिन्न आयु वर्गों के व्यक्तियों के आहार सेवन संबंधी आँकड़े एकत्र किए गए तथा उन्हें रक्त और मूत्र जैवचिह्नों के साथ जोड़ा गया।
- It also built upon nutrition deficiencies and tracked obesity alongside anaemia, a first, according to the organisers.
  आयोजकों के अनुसार, इस सर्वेक्षण में पोषण संबंधी कमियों का अध्ययन किया गया तथा पहली बार रक्ताल्पता के साथ-साथ मोटापे की भी निगरानी की गई।
- For anaemia, data were collected from venous blood instead of the finger-prick method that NFHS used.
  रक्ताल्पता के लिए आँकड़े एनएफएचएस में प्रयुक्त उँगली से रक्त लेने की विधि के स्थान पर शिरा से लिए गए रक्त नमूनों के आधार पर एकत्र किए गए।
- Data collection is complete, but hasn't been released yet.
  आँकड़ों का संग्रहण पूरा हो चुका है, किन्तु उसके परिणाम अभी तक सार्वजनिक नहीं किए गए हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

What other changes were made?
और कौन-कौन से परिवर्तन किए गए?

- A line-by-line comparison of the two fact sheets from **NFHS-5** and **NFHS-6** shows that the net fall of **30 indicators** actually combines **43 indicators dropped and 13 added**.
  एनएफएचएस-5 और **एनएफएचएस-6** की दोनों तथ्य पत्रिकाओं की पंक्ति-दर-पंक्ति तुलना से पता चलता है कि **30 संकेतकों** की शुद्ध कमी वास्तव में **43 संकेतकों को हटाने और 13 नए संकेतकों को जोड़ने** का परिणाम है।
- Several of the deletions were long-running series, and a few are closely related to the government's signature programmes.
  हटाए गए अनेक संकेतक लंबे समय से सर्वेक्षण का हिस्सा थे और उनमें से कुछ सरकार की प्रमुख योजनाओं से सीधे जुड़े हुए थे।
- Prime Minister **Narendra Modi's** government in 2019 had announced that India would be **open defecation-free**.
  प्रधानमंत्री **नरेन्द्र मोदी** की सरकार ने वर्ष 2019 में घोषणा की थी कि भारत **खुले में शौच से मुक्त** हो चुका है।
- NFHS-5 recorded **70%** of the country's population living in households with access to sanitation facilities.
  एनएफएचएस-5 में दर्ज किया गया था कि देश की **70 प्रतिशत** जनसंख्या ऐसे परिवारों में रहती है जहाँ स्वच्छता सुविधाओं तक पहुँच उपलब्ध है।
- That data point has also been dropped.
  इस संकेतक को भी अब हटा दिया गया है।
- The share of households using **clean fuel for cooking**, **58.6% in NFHS-5**, is gone — a direct measure of the success of the **Pradhan Mantri Ujjwala Yojana**.
  स्वच्छ ईंधन से खाना पकाने वाले परिवारों का अनुपात, जो **एनएफएचएस-5 में 58.6 प्रतिशत** था, हटा दिया गया है। यह **प्रधानमंत्री उज्ज्वला योजना** की सफलता का प्रत्यक्ष मापदंड था।
- The three mortality indicators — **neonatal, infant and under-five** — have also been cut.
  नवजात मृत्यु दर, शिशु मृत्यु दर और पाँच वर्ष से कम आयु की मृत्यु दर से संबंधित तीनों संकेतकों को भी हटा दिया गया है।
- But these will be tracked by the **Sample Registration System**, whose latest bulletin put infant mortality at **24 per 1,000 live births**.
  हालाँकि इनका आकलन अब **नमूना पंजीकरण प्रणाली** द्वारा किया जाएगा, जिसके नवीनतम बुलेटिन के अनुसार शिशु मृत्यु दर **प्रति 1,000 जीवित जन्मों पर 24** है।
- The Registration System, however, does not carry district-level data and socio-economic breakdowns that are available in NFHS.
  किन्तु यह प्रणाली जिला-स्तरीय आँकड़े तथा सामाजिक-आर्थिक वर्गीकरण उपलब्ध नहीं कराती, जो राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण में उपलब्ध होते हैं।
- The **sex ratio of the total population** and the **sex ratio at birth**, **929 females per 1,000 males in NFHS-5**, are both absent.
  कुल जनसंख्या का लिंगानुपात तथा **जन्म के समय लिंगानुपात**, जो **एनएफएचएस-5 में प्रति 1,000 पुरुषों पर 929 महिलाएँ** था, दोनों को हटा दिया गया है।
- This removes a standard signal of sex-selective practices.
  इससे लिंग-चयन संबंधी प्रवृत्तियों का एक महत्वपूर्ण संकेतक समाप्त हो जाता है।
- Four **cancer-screening indicators**, covering cervical, breast and oral cancer, introduced only in NFHS-5 are gone after a single round.
  गर्भाशय ग्रीवा, स्तन और मुख कैंसर से संबंधित चार **कैंसर जाँच संकेतकों** को, जिन्हें केवल एनएफएचएस-5 में शामिल किया गया था, एक ही चरण के बाद हटा दिया गया है।
- A few changes are redefinitions rather than cuts.
  कुछ परिवर्तन संकेतकों को हटाने के बजाय उनकी पुनर्परिभाषा से संबंधित हैं।

- Women's individual ownership of a house or land has become a household-level measure.
  महिलाओं के व्यक्तिगत घर या भूमि स्वामित्व के संकेतक को अब परिवार-स्तरीय संकेतक बना दिया गया है।
- The **three-dose hepatitis B** line has become a **birth-dose measure**.
  हेपेटाइटिस-बी की तीन-खुराक संबंधी श्रेणी को अब **जन्म-खुराक मापदंड** में परिवर्तित कर दिया गया है।
- And pre-school attendance has shifted age bands, targeting a younger demographic.
  पूर्व-प्राथमिक विद्यालय में उपस्थिति के आयु-वर्ग को भी बदलकर कम आयु वाले बच्चों पर केंद्रित किया गया है।
- **International Institute for Population Sciences** has not published a rationale for the wider list.
  जनसंख्या विज्ञान के अंतरराष्ट्रीय संस्थान ने इन व्यापक परिवर्तनों के लिए कोई औपचारिक स्पष्टीकरण प्रकाशित नहीं किया है।
- Together, the removals leave no current survey-based national figure for **infant mortality, sanitation coverage, sex ratio at birth, cancer screening rates or comprehensive HIV knowledge**.
  इन हटाए गए संकेतकों के कारण अब **शिशु मृत्यु दर, स्वच्छता कवरेज, जन्म के समय लिंगानुपात, कैंसर जाँच दरों तथा एचआईवी संबंधी व्यापक ज्ञान** के लिए कोई वर्तमान सर्वेक्षण-आधारित राष्ट्रीय आँकड़ा उपलब्ध नहीं रहेगा।
- These are gaps that no other single source fills at the same scale.
  ये ऐसे रिक्त स्थान हैं जिन्हें वर्तमान में कोई अन्य एकल स्रोत उसी स्तर पर पूरा नहीं करता।
- **How did survey results change between NFHS-5 and NFHS-6?**
  एनएफएचएस-5 और एनएफएचएस-6 के बीच सर्वेक्षण परिणामों में क्या परिवर्तन हुए?
- NFHS-6 reported a drop in the number of women who have experienced **spousal violence**, down to **22.3% from 29.3%**.
  एनएफएचएस-6 के अनुसार **वैवाहिक हिंसा** का अनुभव करने वाली महिलाओं का प्रतिशत **29.3 प्रतिशत से घटकर 22.3 प्रतिशत** हो गया है।
- The number of children aged five or below who are **stunted** declined too.
  पाँच वर्ष या उससे कम आयु के अवरुद्ध वृद्धि वाले बच्चों की संख्या में भी कमी आई है।
- The drop from NFHS-4 to NFHS-5 was just under three percentage points, but NFHS-6 saw a drop of over six percentage points.
  एनएफएचएस-4 से एनएफएचएस-5 के बीच यह कमी तीन प्रतिशत अंकों से कम थी, जबकि एनएफएचएस-6 में यह गिरावट छह प्रतिशत अंकों से अधिक रही।
- State-level changes are sharper for certain indicators.
  कुछ संकेतकों के लिए राज्य-स्तरीय परिवर्तन और अधिक स्पष्ट दिखाई देते हैं।
- **Health insurance coverage** rose the most in **West Bengal**, from **33.7% of households in NFHS-5 to 88.2% in NFHS-6**.
  स्वास्थ्य बीमा कवरेज में सबसे अधिक वृद्धि **पश्चिम बंगाल** में हुई, जहाँ यह **एनएफएचएस-5 के 33.7 प्रतिशत परिवारों से बढ़कर एनएफएचएस-6 में 88.2 प्रतिशत** हो गया।
- Women's **Internet use** saw its largest increase in **Andhra Pradesh**, from **21% to 63.6%**.
  महिलाओं के **इंटरनेट उपयोग** में सबसे बड़ी वृद्धि **आंध्र प्रदेश** में दर्ज की गई, जहाँ यह **21 प्रतिशत से बढ़कर 63.6 प्रतिशत** हो गया।
- **Haryana** recorded the steepest fall in **exclusive breastfeeding among infants under six months**, from **69.5% to 41.2%**.
  हरियाणा में **छह माह से कम आयु के शिशुओं को केवल स्तनपान कराने** की दर में सबसे अधिक गिरावट दर्ज की गई, जो **69.5 प्रतिशत से घटकर 41.2 प्रतिशत** रह गई।
- The share of women classified as **overweight or obese** increased in every State.
  अधिक वजन या मोटापे की श्रेणी में आने वाली महिलाओं का अनुपात प्रत्येक राज्य में बढ़ा है।

PATRIOTIC IAS

The Oman CEPA, a new gateway for India's exports

GS II: IR

India and Oman share one of the oldest trading relationships, with commercial and maritime links dating back thousands of years. From the movement of spices, textiles and frankincense to enduring people-to-people ties, trade has long been a cornerstone of this partnership. The India-Oman Comprehensive Economic Partnership Agreement (CEPA), which came into force on June 1, 2026, reaffirms and strengthens this historic relationship by providing a modern framework to deepen trade, investment and economic cooperation for the future.

India is amongst the top suppliers for Oman and bilateral trade has grown from $8.94 billion in FY2023-24 to $11.18 billion in FY2025-26, reflecting the growing complementarities between the two economies.

An expansion of India's trade ties

The CEPA comes at a time when India is actively diversifying its trade partnerships and integrating more deeply with global value chains. Following agreements with the United Arab Emirates, Australia, the European Free Trade Association, the United Kingdom, New Zealand and the European Union, the Oman CEPA further strengthens India's presence in a region that is central to its energy security, trade and strategic interests.

The CEPA offers significant opportunities for Indian exporters. Oman has offered duty-free access on 98.08% of its tariff lines, covering 99.38% of India's exports by value. Before the agreement, only 15.33% of India's exports entered Oman at zero duty under the Most Favoured Nation regime. The CEPA, therefore, provides an immediate competitiveness boost across a broad range of sectors. In textiles and apparel, India already commands a 43% share of Oman's woven apparel imports and 31% of knitted apparel imports. The removal of the existing 5% tariff will strengthen the competitiveness of Indian manufacturers against China, which is the other dominant supplier in this market. In the case of chemicals, India already supplies nearly 39% of Oman's inorganic chemical imports, making it one of the leading players in the market. Tariff free access will only amplify this further.

Anant Goenka

President,
The Federation of Indian Chambers of Commerce and Industry (FICCI)

The agreement boosts exports, services, investment and professional mobility

Likewise, engineering goods will also benefit. Oman imports over $3.7 billion worth of mechanical machinery and $3.3 billion worth of automotives annually, where India's market share is only 5% and 2%, respectively. Preferential market access under the CEPA can help Indian exports of engineering goods expand significantly and deepen their presence in Oman's infrastructure, construction and industrial sectors.

In pharmaceuticals, where India holds around 10% market share, the agreement's value lies not in tariff reductions but in regulatory facilitation. Products approved by leading international regulators will benefit from fast-tracked approvals, reducing compliance costs and accelerating market entry. As Oman's pharmaceutical market continues to expand, Indian companies will be well-positioned to capture a larger share. Duty-free access for products such as meat, eggs, honey, butter and processed foods will further strengthen India's already strong position. At the same time, sensitive sectors such as dairy, cereals, edible oils and several agricultural commodities have been kept outside tariff concessions, ensuring that domestic producers remain protected.

Streamlining procedures

Significant trade facilitation measures have been introduced. Oman will accept certificates issued by India's Export Inspection Council (EIC), eliminating duplicative testing and inspections, while also recognising India's organic (NPOP) and halal certification systems. There are dedicated sanitary and phytosanitary (SPS) and technical barriers to trade (TBT) provisions, which will enhance regulatory transparency and cooperation, and streamlined customs clearance, including fast-track processing for perishables, which will reduce costs and improve export efficiency.

Another forward-looking aspect of the CEPA is its strong focus on services and professional mobility. Bilateral services trade stood at $863 million in 2024, with India enjoying a surplus of nearly $447 million. Yet, India's share in Oman's global services imports remains just over 5%, indicating substantial untapped potential.

Oman has undertaken binding commitments covering professionals in sectors such as accounting, engineering, information technology, health care, education and consulting. Oman also raises the quotas for intra-corporate transferees, facilitating greater mobility of Indian professionals and specialists. Provisions relating to AYUSH and traditional medicine further create opportunities for Indian health care and wellness services in the Gulf.

Strategic location advantage

Beyond trade statistics, the CEPA has a larger strategic significance. Oman occupies a unique position at the crossroads of the Gulf, the Indian Ocean and East Africa. Its ports at Sohar, Duqm and Salalah are emerging as major logistics and industrial hubs. For Indian businesses, Oman can serve not only as a destination market but also as a gateway to the wider Gulf Cooperation Council (GCC) region and East African economies.

The India-Oman CEPA once again demonstrates the evolution of India's trade policy from tariff negotiations to comprehensive economic partnerships encompassing goods, services, investment, mobility and regulatory cooperation. Its benefits will extend from textile clusters in Tamil Nadu and the gems and jewellery industry in Gujarat to engineering hubs in Maharashtra and Punjab, and from pharmaceutical manufacturers in Telangana to seafood exporters in Andhra Pradesh and Kerala.

The real test will now lie in implementation and utilisation. If businesses actively leverage the opportunities created by the agreement, the CEPA can significantly expand India's export footprint, strengthen economic integration with the Gulf, and support the country's broader ambition of becoming a globally competitive manufacturing and services powerhouse. For India, the agreement opens not only the Omani market but also a broader gateway to the Gulf and beyond.

09J6. The Oman CEPA, a new gateway for India's exports
ओमान-सीईपीए (CEPA), भारत के निर्यातों के लिए एक नया प्रवेशद्वार

- **India and Oman share one of the oldest trading relationships, with commercial and maritime links dating back thousands of years.**
  भारत और ओमान विश्व के सबसे प्राचीन व्यापारिक संबंधों में से एक साझा करते हैं, जिनके वाणिज्यिक और समुद्री संबंध हजारों वर्षों पुराने हैं।
- From the movement of spices, textiles and frankincense to enduring people-to-people ties, trade has long been a cornerstone of this partnership.
  मसालों, वस्त्रों और लोबान के व्यापार से लेकर स्थायी जन-से-जन संबंधों तक, व्यापार इस साझेदारी का प्रमुख आधार रहा है।
- The **India-Oman Comprehensive Economic Partnership Agreement (CEPA)**, which came into force on June 1, 2026, reaffirms and strengthens this historic relationship by providing a modern framework to deepen trade, investment and economic cooperation for the future.
  भारत-ओमान व्यापक आर्थिक भागीदारी समझौता, जो 1 जून 2026 से प्रभावी हुआ, व्यापार, निवेश और आर्थिक सहयोग को भविष्य में और गहरा करने हेतु एक आधुनिक ढाँचा प्रदान करके इस ऐतिहासिक संबंध को पुनः सुदृढ़ करता है।
- India is amongst the top suppliers for Oman and bilateral trade has grown from **$8.94 billion** in FY2023-24 to **$11.18 billion** in FY2025-26, reflecting the growing complementarities

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

between the two economies.
भारत ओमान के प्रमुख आपूर्तिकर्ताओं में शामिल है और द्विपक्षीय व्यापार वित्त वर्ष 2023-24 में **8.94 अरब डॉलर** से बढ़कर वित्त वर्ष 2025-26 में **11.18 अरब डॉलर** हो गया है, जो दोनों अर्थव्यवस्थाओं के बीच बढ़ती परस्पर पूरकता को दर्शाता है।

An expansion of India's trade ties
भारत के व्यापारिक संबंधों का विस्तार

- The CEPA comes at a time when India is actively diversifying its trade partnerships and integrating more deeply with global value chains.
यह समझौता ऐसे समय में आया है जब भारत सक्रिय रूप से अपने व्यापारिक साझेदारी नेटवर्क का विस्तार कर रहा है और वैश्विक मूल्य श्रृंखलाओं के साथ अधिक गहराई से जुड़ रहा है।
- Following agreements with the **United Arab Emirates, Australia, the European Free Trade Association, the United Kingdom, New Zealand and the European Union**, the Oman CEPA further strengthens India's presence in a region that is central to its energy security, trade and strategic interests.
संयुक्त अरब अमीरात, ऑस्ट्रेलिया, यूरोपीय मुक्त व्यापार संघ, यूनाइटेड किंगडम, न्यूज़ीलैंड और यूरोपीय संघ के साथ हुए समझौतों के बाद, ओमान के साथ यह समझौता भारत की उस क्षेत्र में उपस्थिति को और सुदृढ़ करता है जो उसकी ऊर्जा सुरक्षा, व्यापार और रणनीतिक हितों के लिए अत्यंत महत्वपूर्ण है।
- The CEPA offers significant opportunities for Indian exporters.
यह समझौता भारतीय निर्यातकों के लिए महत्वपूर्ण अवसर प्रदान करता है।
- Oman has offered **duty-free access on 98.08% of its tariff lines**, covering **99.38% of India's exports by value**.
ओमान ने अपनी **98.08 प्रतिशत शुल्क श्रेणियों** पर शुल्क-मुक्त पहुँच प्रदान की है, जो मूल्य के आधार पर भारत के **99.38 प्रतिशत निर्यात** को कवर करती है।
- Before the agreement, only **15.33% of India's exports** entered Oman at zero duty under the Most Favoured Nation regime.
इस समझौते से पहले, भारत के केवल **15.33 प्रतिशत निर्यात** को सर्वाधिक अनुकूल राष्ट्र व्यवस्था के अंतर्गत शून्य शुल्क पर ओमान में प्रवेश प्राप्त था।
- The CEPA, therefore, provides an immediate competitiveness boost across a broad range of sectors.
अतः यह समझौता अनेक क्षेत्रों में भारतीय उत्पादों की प्रतिस्पर्धात्मकता को तत्काल बढ़ावा प्रदान करता है।
- In **textiles and apparel**, India already commands a **43% share** of Oman's woven apparel imports and **31% share** of knitted apparel imports.
वस्त्र और परिधान क्षेत्र में भारत पहले से ही ओमान के बुने हुए परिधानों के आयात में **43 प्रतिशत** तथा बुने-बुनाए परिधानों के आयात में **31 प्रतिशत** हिस्सेदारी रखता है।
- The removal of the existing **5% tariff** will strengthen the competitiveness of Indian manufacturers against China, which is the other dominant supplier in this market.
मौजूदा **5 प्रतिशत शुल्क** हटने से भारतीय निर्माताओं की प्रतिस्पर्धात्मक क्षमता चीन के मुकाबले और मजबूत होगी, जो इस बाजार का दूसरा प्रमुख आपूर्तिकर्ता है।
- In the case of **chemicals**, India already supplies nearly **39%** of Oman's inorganic chemical imports, making it one of the leading players in the market.
रसायन क्षेत्र में भारत ओमान के अकार्बनिक रसायनों के आयात का लगभग **39 प्रतिशत** आपूर्ति करता है, जिससे वह इस बाजार का एक प्रमुख भागीदार बन गया है।
- Tariff-free access will only amplify this further.
शुल्क-मुक्त पहुँच इस स्थिति को और अधिक मजबूत करेगी।
- Likewise, **engineering goods** will also benefit.
इसी प्रकार **अभियांत्रिकी उत्पादों** को भी लाभ प्राप्त होगा।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Oman imports over **$3.7 billion worth of mechanical machinery** and **$3.3 billion worth of automotives** annually, where India's market share is only **5% and 2%**, respectively.
  ओमान प्रतिवर्ष **3.7 अरब डॉलर से अधिक मूल्य की यांत्रिक मशीनरी** तथा **3.3 अरब डॉलर मूल्य के वाहन** आयात करता है, जिनमें भारत की बाजार हिस्सेदारी क्रमशः केवल **5 प्रतिशत और 2 प्रतिशत** है।
- Preferential market access under the CEPA can help Indian exports of engineering goods expand significantly and deepen their presence in Oman's infrastructure, construction and industrial sectors.
  समझौते के अंतर्गत प्राप्त प्राथमिकतापूर्ण बाजार पहुँच भारतीय अभियांत्रिकी उत्पादों के निर्यात को उल्लेखनीय रूप से बढ़ा सकती है तथा ओमान के आधारभूत संरचना, निर्माण और औद्योगिक क्षेत्रों में उनकी उपस्थिति को मजबूत कर सकती है।
- In **pharmaceuticals**, where India holds around **10% market share**, the agreement's value lies not in tariff reductions but in regulatory facilitation.
  औषधि क्षेत्र में, जहाँ भारत की लगभग **10 प्रतिशत बाजार हिस्सेदारी** है, इस समझौते का महत्व शुल्क कटौती में नहीं बल्कि नियामकीय सुविधा में निहित है।
- Products approved by leading international regulators will benefit from **fast-tracked approvals**, reducing compliance costs and accelerating market entry.
  प्रमुख अंतरराष्ट्रीय नियामकों द्वारा अनुमोदित उत्पादों को **त्वरित स्वीकृति प्रक्रिया** का लाभ मिलेगा, जिससे अनुपालन लागत घटेगी और बाजार में प्रवेश तेज होगा।
- As Oman's pharmaceutical market continues to expand, Indian companies will be well-positioned to capture a larger share.
  जैसे-जैसे ओमान का औषधि बाजार विस्तार करेगा, भारतीय कंपनियाँ अधिक हिस्सेदारी प्राप्त करने की बेहतर स्थिति में होंगी।
- Duty-free access for products such as **meat, eggs, honey, butter and processed foods** will further strengthen India's already strong position.
  मांस, अंडे, शहद, मक्खन और प्रसंस्कृत खाद्य पदार्थों को शुल्क-मुक्त पहुँच मिलने से भारत की पहले से मजबूत स्थिति और सुदृढ़ होगी।
- At the same time, sensitive sectors such as **dairy, cereals, edible oils and several agricultural commodities** have been kept outside tariff concessions, ensuring that domestic producers remain protected.
  साथ ही **दुग्ध उत्पाद, अनाज, खाद्य तेल तथा अनेक कृषि वस्तुओं** जैसे संवेदनशील क्षेत्रों को शुल्क रियायतों से बाहर रखा गया है, जिससे घरेलू उत्पादकों के हित सुरक्षित रहेंगे।

Streamlining procedures
प्रक्रियाओं का सरलीकरण

- Significant **trade facilitation measures** have been introduced.
  महत्वपूर्ण **व्यापार सुगमता उपायों** को लागू किया गया है।
- Oman will accept certificates issued by India's **Export Inspection Council**, eliminating duplicative testing and inspections, while also recognising India's organic and halal certification systems.
  ओमान भारत की **निर्यात निरीक्षण परिषद** द्वारा जारी प्रमाणपत्रों को स्वीकार करेगा, जिससे दोहराव वाले परीक्षणों और निरीक्षणों की आवश्यकता समाप्त हो जाएगी। साथ ही वह भारत की जैविक तथा हलाल प्रमाणीकरण प्रणालियों को भी मान्यता देगा।
- There are dedicated **sanitary and phytosanitary provisions** and **technical barriers to trade provisions**, which will enhance regulatory transparency and cooperation.
  विशेष **स्वास्थ्य एवं पादप स्वच्छता प्रावधानों** तथा **व्यापार में तकनीकी बाधाओं से संबंधित प्रावधानों** को शामिल किया गया है, जो नियामकीय पारदर्शिता और सहयोग को बढ़ावा देंगे।
- Streamlined customs clearance, including fast-track processing for perishables, will reduce costs and improve export efficiency.

शीघ्र नष्ट होने वाली वस्तुओं के लिए त्वरित प्रक्रिया सहित सरल सीमा-शुल्क निकासी व्यवस्था लागत को कम करेगी और निर्यात दक्षता में वृद्धि करेगी।

- Another forward-looking aspect of the CEPA is its strong focus on **services and professional mobility**.
  इस समझौते का एक अन्य दूरदर्शी पक्ष **सेवा क्षेत्र और पेशेवर गतिशीलता** पर इसका विशेष ध्यान है।
- Bilateral services trade stood at **$863 million** in 2024, with India enjoying a surplus of nearly **$447 million**.
  वर्ष 2024 में द्विपक्षीय सेवा व्यापार **863 मिलियन डॉलर** रहा, जिसमें भारत को लगभग **447 मिलियन डॉलर** का अधिशेष प्राप्त हुआ।
- Yet, India's share in Oman's global services imports remains just over **5%**, indicating substantial untapped potential.
  फिर भी ओमान के वैश्विक सेवा आयात में भारत की हिस्सेदारी केवल **5 प्रतिशत से थोड़ी अधिक** है, जो अपार अप्रयुक्त संभावनाओं का संकेत देती है।
- Oman has undertaken binding commitments covering professionals in sectors such as **accounting, engineering, information technology, health care, education and consulting**.
  ओमान ने **लेखांकन, अभियांत्रिकी, सूचना प्रौद्योगिकी, स्वास्थ्य सेवा, शिक्षा और परामर्श** जैसे क्षेत्रों के पेशेवरों के लिए बाध्यकारी प्रतिबद्धताएँ स्वीकार की हैं।
- Oman also raises the quotas for **intra-corporate transferees**, facilitating greater mobility of Indian professionals and specialists.
  ओमान ने **कंपनी के भीतर स्थानांतरित कर्मचारियों** के लिए कोटा भी बढ़ाया है, जिससे भारतीय पेशेवरों और विशेषज्ञों की आवाजाही अधिक सुगम होगी।
- Provisions relating to **AYUSH and traditional medicine** further create opportunities for Indian health care and wellness services in the Gulf.
  आयुष और पारंपरिक चिकित्सा से संबंधित प्रावधान खाड़ी क्षेत्र में भारतीय स्वास्थ्य एवं कल्याण सेवाओं के लिए नए अवसर उत्पन्न करते हैं।

Strategic location advantage
रणनीतिक भौगोलिक लाभ

- Beyond trade statistics, the CEPA has a larger strategic significance.
  व्यापारिक आँकड़ों से परे, इस समझौते का व्यापक रणनीतिक महत्व भी है।
- Oman occupies a unique position at the crossroads of the **Gulf, the Indian Ocean and East Africa**.
  ओमान **खाड़ी क्षेत्र, हिंद महासागर और पूर्वी अफ्रीका** के संगम बिंदु पर एक विशिष्ट स्थान रखता है।
- Its ports at **Sohar, Duqm and Salalah** are emerging as major logistics and industrial hubs.
  इसके **सोहार, दुक्म और सलालाह** बंदरगाह प्रमुख रसद और औद्योगिक केंद्रों के रूप में उभर रहे हैं।
- For Indian businesses, Oman can serve not only as a destination market but also as a gateway to the wider **Gulf Cooperation Council region** and East African economies.
  भारतीय व्यवसायों के लिए ओमान केवल एक गंतव्य बाजार ही नहीं, बल्कि व्यापक **खाड़ी सहयोग परिषद क्षेत्र** और पूर्वी अफ्रीकी अर्थव्यवस्थाओं तक पहुँच का प्रवेशद्वार भी बन सकता है।
- The India-Oman CEPA once again demonstrates the evolution of India's trade policy from tariff negotiations to comprehensive economic partnerships encompassing goods, services, investment, mobility and regulatory cooperation.
  भारत-ओमान व्यापक आर्थिक भागीदारी समझौता एक बार फिर यह दर्शाता है कि भारत की व्यापार नीति शुल्क वार्ताओं से आगे बढ़कर वस्तुओं, सेवाओं, निवेश, पेशेवर गतिशीलता और नियामकीय सहयोग को समाहित करने वाली व्यापक आर्थिक साझेदारियों तक विकसित हो चुकी है।

The trust deficit in India-Bangladesh ties

GS II:IR

Kallol Bhattacherjee

More than hundred days have passed since the Tarique Rahman government took charge in Bangladesh. However, contrary to early expectations from his leadership, India-Bangladesh relations have remained more or less the same as in the difficult months of the interim government.

Actions, not rhetoric

India reached out twice before Mr. Rahman became the Bangladesh Prime Minister. The first outreach was by External Affairs Minister S. Jaishankar who visited Dhaka on December 31, 2025 to condole the passing of Mr. Rahman's mother, former Prime Minister Khaleda Zia. The second time was through Foreign Secretary Vikram Misri, who carried Prime Minister Narendra Modi's invitation letter, and Lok Sabha Speaker Om Birla who on February 17 participated in the swearing-in ceremony of Mr. Rahman. But sources in the ruling Bangladesh Nationalist Party (BNP) say such gestures in themselves are insufficient. An influential segment within the BNP feel that as a goodwill gesture towards the new government, India should have reversed some of the retributory steps that it had taken during the interim government's rule under Muhammad Yunus. These steps included the restarting of transhipments for goods from Bangladesh, full restoration of visa services including business and medical visas, and stopping the restrictive market access for Bangladeshi goods. None of these measures have been implemented so far, as per Dhaka. They argue that, by not reversing these decisions, India has not delivered any advance incentives to Mr. Rahman who will have to engage with the Jamaat-e-Islami and several anti-India student outfits before normalising ties with India.

On its part, the BNP's veteran leaders have tried to smoothen the relationship by creating greater public acceptability of the position that the presence of the deposed Prime Minister Sheikh Hasina in India will not hold ties back, a departure from the hardline stance that the interim government had taken. Here also, Dhaka feels that such attempts have not found appreciation from the Indian side.

Bangladeshi diplomats have pointed out that Dhaka expected less rhetoric on illegal immigration, and more focus on issues such as the renewal of the 1996 Ganga Water Treaty

As proof they refer to the aggressive use of 'illegal immigration' in official communication from Delhi following the victory of the Bharatiya Janata Party in West Bengal and Assam. Bangladeshi diplomats have pointed out that Dhaka expected less rhetoric on sensitive issues such as illegal immigration, and more focus on issues such as visa restoration and the renewal of the 1996 Ganga Water Treaty.

Dhaka had sent Foreign Minister Khalilur Rahman to Delhi on April 7-8 for a brief visit, to test the waters, where he met National Security Adviser Ajit Doval and Mr. Jaishankar. However, the election campaign in Assam and West Bengal around Bangladesh-related issues and a flurry of interviews by exiled PM Sheikh Hasina have displayed that Mr. Rahman's BNP, despite winning a landslide majority in Bangladesh, has not managed to impress India. While a senior diplomat in Dhaka said that Bangladesh was assured that the language around State elections would not reflect New Delhi's foreign policy, the Ministry of External Affairs' strident position on illegal immigration have generated 'a sense of betrayal' in Dhaka's secretariat.

According to reports, Mr. Rahman, sensing that the window for restoration of ties with India is not opening as per expectations, is in the final stages of considering visits to Malaysia and China that are likely to take place in the last week of June.

Bangladesh's dilemma

This turn to China however cannot hide the fact that it is incumbent on Bangladesh, as much as it is on India, to repair bilateral ties. Bangladesh's ties with India remain broken because of the 2024 uprising and the subsequent interim rule whereas its ties with China, the U.S. and other players have prospered since August 2024. Further, a pragmatic assessment shows that without steady assurance from India on the main river Padma (Ganga), Bangladesh's other plans are not expected to proceed smoothly beyond 2026. River affairs expert Ainun Nishat has stated that a delay in the renewal of the 30-year-old Ganga treaty will put the Ganges-Kobadak irrigation project in a challenging situation affecting vast portions of western and central Bangladesh. The lack of predictable water supply will affect the upcoming sowing seasons, hurting Bangladesh's economy that is already dealing with the crippling effects of the energy crisis because of the U.S.-Israel war on Iran.

The compounded effect of these disruptive forces will increase pressure on the Tarique Rahman government that is already under criticism for its inept handling of the worst measles outbreak in the country that has claimed the lives of at least 600 infants. Critics have targeted the government for its weak handling of the health crisis as well as the growing incidents of sexual violence, which is a symptom of the breakdown of law and order in the country that is yet to make a recovery since the protests of August 2024. Rivals, including Sheikh Hasina's Awami League that are mobilising on the ground despite a ban, will be strengthened if Mr. Rahman fails to renew the Ganga river agreement with Delhi before the deadline of December 31, 2026.

Such material factors on the ground call for pragmatism in both the capitals as the challenges will soon overwhelm Bangladesh, reverting it to instability, which again is not in India's immediate or long-term interests.

- Further, a pragmatic assessment shows that without steady assurance from India on the main river **Padma (Ganga)**, Bangladesh's other plans are not expected to proceed smoothly beyond 2026.
  इसके अतिरिक्त, व्यावहारिक आकलन यह दर्शाता है कि मुख्य नदी **पद्मा (गंगा)** के जल प्रवाह को लेकर भारत से स्थिर आश्वासन के बिना बांग्लादेश की अन्य योजनाएँ वर्ष 2026 के बाद सुचारु रूप से आगे नहीं बढ़ पाएँगी।
- River affairs expert **Ainun Nishat** has stated that a delay in the renewal of the **30-year-old Ganga treaty** will put the **Ganges-Kobadak irrigation project** in a challenging situation affecting vast portions of western and central Bangladesh.
  नदी मामलों के विशेषज्ञ **ऐनुन निशात** ने कहा है कि **30 वर्ष पुरानी गंगा संधि** के नवीनीकरण में विलंब होने पर **गंगा-कोबादक सिंचाई परियोजना** कठिन परिस्थिति में पड़ जाएगी, जिससे पश्चिमी और मध्य बांग्लादेश के विशाल क्षेत्र प्रभावित होंगे।
- Rivals, including **Sheikh Hasina's Awami League** that are mobilising on the ground despite a ban, will be strengthened if Mr. Rahman fails to renew the **Ganga river agreement** with Delhi before the deadline of **December 31, 2026**.
  प्रतिबंध के बावजूद सक्रिय रूप से संगठित हो रही **शेख हसीना की अवामी लीग** सहित विपक्षी दलों की स्थिति मजबूत होगी, यदि श्री रहमान **31 दिसंबर 2026** की समय-सीमा से पहले दिल्ली के साथ **गंगा नदी समझौते** का नवीनीकरण कराने में असफल रहते हैं।

Trump's $100,000 fee for H-1B visa fee is unlawful, court rules

GS II: IR

Reuters
BOSTON

A federal judge on Monday struck down a $100,000 fee that U.S. President Donald Trump imposed on new H-1B visas for highly skilled foreign workers, concluding that it constituted an unlawful tax that Congress never authorised.

U.S. District Judge Leo Sorokin in Boston issued the ruling in a lawsuit filed by 20 Democratic State Attorneys General challenging a fee Mr. Trump announced in September that raised the cost of obtaining H-1B visas.

The H-1B program offers 65,000 visas annually, with another 20,000 visas for workers with advanced degrees, approved for three to six years. Employers seeking a visa for a foreign worker before Mr. Trump's proclamation paid about $2,000 to $5,000 in fees. The increase in fees has discouraged H-1B visa requests, according to court filings.

Trump's $100,000 fee for H-1B visa fee is unlawful, court rules

H-1B वीज़ा पर ट्रंप की $100,000 फीस अवैध है, अदालत का फैसला

- A federal judge on Monday struck down a **$100,000 fee** that U.S. President **Donald Trump** imposed on new **H-1B visas** for highly skilled foreign workers, concluding that it constituted an unlawful tax that Congress never authorised.
  सोमवार को एक संघीय न्यायाधीश ने **$100,000 शुल्क** को रद्द कर दिया, जिसे अमेरिकी राष्ट्रपति **डोनाल्ड ट्रंप** ने उच्च कौशल वाले विदेशी कामगारों के लिए नए **H-1B वीज़ा** पर लगाया था। न्यायाधीश ने निष्कर्ष निकाला कि यह एक अवैध कर था, जिसे कांग्रेस ने कभी अधिकृत नहीं किया था।
- The **H-1B program** offers **65,000 visas annually**, with another **20,000 visas** for workers with advanced degrees, approved for three to six years.
  H-1B कार्यक्रम के तहत प्रतिवर्ष **65,000 वीज़ा** दिए जाते हैं, जबकि उच्च डिग्री रखने वाले कामगारों के लिए अतिरिक्त **20,000 वीज़ा** उपलब्ध होते हैं, जो तीन से छह वर्षों के लिए स्वीकृत किए जाते हैं।
- Employers seeking a visa for a foreign worker before Mr. Trump's proclamation paid about **$2,000 to $5,000** in fees.
  श्री ट्रंप की घोषणा से पहले किसी विदेशी कामगार के लिए वीज़ा प्राप्त करने वाले नियोक्ताओं को लगभग **$2,000 से $5,000** तक शुल्क देना पड़ता था।
- The increase in fees has discouraged **H-1B visa requests**, according to court filings.
  अदालती दस्तावेजों के अनुसार, शुल्क में वृद्धि ने **H-1B वीज़ा आवेदनों** को हतोत्साहित किया है।

Germany's standing in international order under scrutiny after UNSC loss

The country has failed to win a non-permanent seat on the UNSC for the first time; its selective application of international law vis-a-vis Ukraine and Iran, and its cautious and often wavering approach towards Israel might have led smaller nations, especially of the Global South, to lose faith in it

GS II: IR

NEWS ANALYSIS

Joan Sony Cherian

Losing contest: German Foreign Minister Johann Wadephul casts his vote during the election of non-permanent members of the UNSC at the UN headquarters in New York City on June 3. AFP

On June 3, for the first time, Germany failed to win a non-permanent seat on the United Nations Security Council (UNSC). The largest economy in the European Union (EU) won just 104 votes, well below the required 127 votes, and lost to the other two contenders in the race, Portugal, which won 134 votes, and Austria which got 131 votes.

The UNSC has five permanent members and 10 non-permanent members who rotate every two years. Out of these 10 seats, two are reserved for the regional grouping of 'Western European and other States' which includes Germany. Members for these 10 seats are elected by the UN General Assembly (UNGA), with a contesting nation needing at least two-thirds of the vote to win a place on the UNSC. Germany has been re-elected six times; whenever it has contested. Up until now.

Steadfast with Ukraine

The loss in the UNSC election is being seen as a major foreign policy defeat for the Christian Democratic Union (CDU)-led federal government of Germany and its head, Chancellor Friedrich Merz, who had, after coming to power last year, stated his desire to restore Germany's place on the world map. Opposition parties in the Bundestag, including the Greens as well as the far-right AfD party, called it an "embarrassing defeat".

Foreign Minister Johann Wadephul, who had extensively lobbied for Germany's candidacy in the UNGA, stated that the loss could have been due to the fact that Germany takes a clear stance on issues that not all member states share. "There is our firm support for Ukraine; the fact that Russia does not want such a voice at the Security Council," said Mr. Wadephul. He also acknowledged that, "the fact that Germany must always assume a special responsibility for Israel in the Middle East conflict may also have cost votes."

With respect to Ukraine, the EU and Germany specifically have emerged as the war-torn nation's most steadfast supporters even in the face of the U.S.' changed attitude towards the country after Donald Trump became President for a second term. Under Mr. Merz, Germany has increased its military assistance for Ukraine. Moreover, in light of Russia's aggression and the U.S.' increasingly belligerent rhetoric towards the EU and NATO, Mr. Merz has advocated for increased budget for the domestic military while also calling for stronger European defence capabilities. Mr. Merz also became a part of the 'coalition of the willing', along with France and the U.K., in order to facilitate support for Ukraine.

Russia's "special military operation" in Ukraine has been condemned by almost the entire international order, with the U.S. and the EU invoking sanctions on the country. Portugal and Austria, in line with the EU's position, have also been strong supporters of Ukraine's right to sovereignty. Moreover, they have been consistently registering their interest in the UNSC seat for over 10 years.

Austria has also been one of the strongest allies of Israel in Europe but its long-standing policy of military neutrality makes it much less of a player in matters of international conflict. But for Germany, the question of Israel and Palestine has been more complicated.

Ambiguity with Israel

Ever since the breakout of the Israel-Hamas conflict in October 2023, Germany has steadfastly upheld Israel's right to defend itself. Since October 2023, the UNGA has adopted at least six major resolutions regarding the conflict and Israel's subsequent genocide in the Gaza Strip. Berlin abstained from three of them, including the most immediate ones in 2023 calling for a ceasefire and for enhanced UN rights for Palestine. Even as international condemnation for Israel increased due to rising casualties in the Gaza Strip, especially of children, Germany has been walking a tightrope with regards to its relation with Israel.

When Mr. Merz was elected Chancellor in early 2025, he spoke to Israel Prime Minister Benjamin Netanyahu over the phone and said that he would "find ways and means for him (Netanyahu) to visit Germany and also to be able to leave again without being arrested in Germany," in defiance of the arrest warrant issued by the International Criminal Court against Mr. Netanyahu on November 21, 2024, for alleged war crimes and crimes against humanity committed in the Gaza Strip.

While Chancellor Merz has since then criticised Israel for its excessive campaign in the Gaza Strip, even moving to restrict arms sales to the country in August 2025, which he lifted in November 2025 after the signing of a 'ceasefire', he visited Israel in December 2025 and held talks with Mr. Netanyahu where he re-affirmed support to Israel. He also refused to join an initiative by western allies to recognise the state of Palestine.

Germany's relationship with Israel is complicated by, as Mr. Wadephul mentioned, its 'special responsibility' – the political doctrine of Germany to back Israel's security in the light of Nazi Germany's crimes against Jews during the Holocaust in World War II.

Conflicting stances

Germany's standing as an upholder of international law has also taken a hit in the context of the ongoing Iran-Israel-U.S. war in West Asia which began on February 28, 2026. Mr. Merz refused to condemn the move as a violation of international law and stated that along with the U.S. and Israel, "we share the goal of ending the terror of these regimes". However, his initial support soon turned into criticism as the war progressed. The effects of the war have been increasingly hitting the German economy, with oil and gas prices rising sharply. The energy sector in Germany is already stressed as the nation has drastically reduced its dependence on Russia, which was its main source for energy, in light of the Ukraine war. By the end of April, Mr. Merz made scathing remarks against the U.S. and said that Iran's leadership was "humiliating" Washington.

Germany's selective application of international law vis-a-vis Ukraine and Iran, and its cautious and often wavering approach towards Israel might have led smaller nations, especially of the Global South, to lose faith in it and regard smaller European states as safer bets. It would be wise for Germany to re-evaluate its standing in the international order if it wishes to regain its position as an upholder of the United Nations and international law.

09J6. Germany's standing in international order under scrutiny after UNSC loss

यूएनएससी में हार के बाद अंतरराष्ट्रीय व्यवस्था में जर्मनी की स्थिति पर सवाल

- Germany's standing in international order under scrutiny after UNSC loss.

Zojila Tunnel between Kashmir and Kargil to see final breakthrough

GS III: Economy

Peerzada Ashiq
SONAMARG (GANDERBAL)

India's ambitious, strategic, all-weather Zojila Tunnel in volatile seismic zone IV will witness the final breakthrough on June 9 as Union Road Transport and Highways Minister Nitin Gadkari will oversee the final blasting from the Kargil side. The 13.14-km-long tunnel cuts through the mighty Himalayas at an altitude of 11,578 feet and connects the Kashmir valley with Ladakh's Kargil.

Mr. Gadkari will preside over the process of final blasting of the last block, which will see the tunnel through. The tunnel is likely to allow security officials to ferry goods, machines and stocks to the high-altitude bases of Ladakh during peak winter for the first time ever in coming winters, officials said. Earlier, stocks would be maintained during early autumn months to feed soldiers on the Line of Actual Control (LAC) in winters.

The Zojila Tunnel is likely to allow security officials to ferry goods to the high-altitude bases of Ladakh during peak winter. ANI

The Zojila Tunnel bypasses the weather-dependent Zojila Pass, which is prone to landslides and shooting stones and remains closed due to snow accumulation in winters.

A spokesman of Megha Engineering and Infrastructures Ltd. (MEIL), which started work on the tunnel in 2020, termed the final breakthrough "a defining moment". "It demonstrates the successful execution of one of India's most complex transport infrastructure works in a hostile Himalayan environment," said senior MEIL officials.

The excavation work has been completed on the world's longest single-tube bi-directional road tunnel at an altitude of over 11,500 feet. "The project will deliver the long-envisioned objective of seamless, all-weather connectivity between Kashmir and Ladakh, bringing long-term benefits in mobility, economic integration, and strategic resilience," said MEIL officials.

Reduced travel time

The tunnel cost more than ₹6,800 crore. A 7.57-metre-high horseshoe-shaped single-tube two-lane tunnel will pass under the arduous Zojila Pass between Ganderbal district in Kashmir and Drass district of Ladakh. Officials say the travel time will come down from three hours to 20 minutes between Ganderbal and Kargil.

09J6. Zojila Tunnel between Kashmir and Kargil to see final breakthrough
कश्मीर और कारगिल के बीच स्थित ज़ोजिला सुरंग में अंतिम सफलता मिलने की ओर प्रगति

- India's ambitious, strategic, all-weather **Zojila Tunnel** in volatile **Seismic Zone IV** will witness the final breakthrough on **June 9** as **Union Road Transport and Highways Minister Nitin Gadkari** will oversee the final blasting from the **Kargil** side.
  अस्थिर **भूकंपीय क्षेत्र-4** में स्थित भारत की महत्वाकांक्षी, सामरिक और सर्व-मौसमी **ज़ोजिला सुरंग** में **9 जून** को अंतिम सफलता का चरण पूरा होगा, जब **केंद्रीय सड़क परिवहन एवं राजमार्ग मंत्री नितिन गडकरी** कारगिल की ओर से अंतिम विस्फोट प्रक्रिया की निगरानी करेंगे।
- The **13.14-km-long tunnel** cuts through the mighty Himalayas at an altitude of **11,578 feet** and connects the **Kashmir Valley** with **Kargil** in Ladakh.
  13.14 किलोमीटर लंबी यह सुरंग समुद्र तल से **11,578 फीट** की ऊँचाई पर हिमालय पर्वतमाला को पार करती है और **कश्मीर घाटी** को लद्दाख के **कारगिल** से जोड़ती है।
- Mr. Gadkari will preside over the process of final blasting of the last block, which will see the tunnel through.
  श्री गडकरी अंतिम खंड के विस्फोट की प्रक्रिया का नेतृत्व करेंगे, जिससे सुरंग का निर्माण पूर्ण हो जाएगा।
- The tunnel is likely to allow security officials to ferry goods, machines and stocks to the high-altitude bases of Ladakh during peak winter for the first time ever in coming winters, officials said.

अधिकारियों के अनुसार, यह सुरंग भविष्य की सर्दियों में पहली बार सुरक्षा बलों को लद्दाख के उच्च हिमालयी ठिकानों तक भीषण शीतकाल के दौरान सामान, मशीनरी और आवश्यक भंडार पहुँचाने में सक्षम बनाएगी।

- Earlier, stocks would be maintained during early autumn months to feed soldiers on the **Line of Actual Control (LAC)** in winters.
  पूर्व में **वास्तविक नियंत्रण रेखा** पर तैनात सैनिकों की आवश्यकताओं को पूरा करने के लिए शरद ऋतु के प्रारंभिक महीनों में ही भंडारण करना पड़ता था।
- The Zojila Tunnel bypasses the weather-dependent **Zojila Pass**, which is prone to landslides and shooting stones and remains closed due to snow accumulation in winters.
  ज़ोजिला सुरंग मौसम पर निर्भर **ज़ोजिला दर्रे** को दरकिनार करती है, जो भूस्खलन और गिरते पत्थरों के लिए संवेदनशील है तथा सर्दियों में भारी हिमपात के कारण बंद रहता है।
- A spokesman of **Megha Engineering and Infrastructures Limited (MEIL)**, which started work on the tunnel in **2020**, termed the final breakthrough "a defining moment".
  मेघा इंजीनियरिंग एंड इन्फ्रास्ट्रक्चर्स लिमिटेड के प्रवक्ता, जिसने वर्ष **2020** में इस सुरंग का कार्य आरम्भ किया था, ने अंतिम सफलता को "एक ऐतिहासिक क्षण" बताया।
- "It demonstrates the successful execution of one of India's most complex transport infrastructure works in a hostile Himalayan environment," said senior MEIL officials.
  कंपनी के वरिष्ठ अधिकारियों ने कहा, "यह प्रतिकूल हिमालयी परिस्थितियों में भारत की सबसे जटिल परिवहन अवसंरचना परियोजनाओं में से एक के सफल निष्पादन को प्रदर्शित करता है।"
- The excavation work has been completed on the world's longest **single-tube bi-directional road tunnel** at an altitude of over **11,500 feet**.
  11,500 फीट से अधिक की ऊँचाई पर स्थित विश्व की सबसे लंबी **एकल-नलिका द्वि-दिशात्मक सड़क सुरंग** का खुदाई कार्य पूर्ण हो चुका है।
- "The project will deliver the long-envisioned objective of seamless, all-weather connectivity between Kashmir and Ladakh, bringing long-term benefits in mobility, economic integration, and strategic resilience," said MEIL officials.
  कंपनी अधिकारियों ने कहा, "यह परियोजना कश्मीर और लद्दाख के बीच निर्बाध एवं सर्व-मौसमी संपर्क स्थापित करने के लंबे समय से कल्पित लक्ष्य को साकार करेगी तथा परिवहन, आर्थिक एकीकरण और सामरिक मजबूती के क्षेत्र में दीर्घकालिक लाभ प्रदान करेगी।"

Reduced travel time
यात्रा समय में कमी

- The tunnel cost more than **₹6,800 crore**.
  इस सुरंग की लागत **6,800 करोड़ रुपये** से अधिक है।
- A **7.57-metre-high horseshoe-shaped single-tube two-lane tunnel** will pass under the arduous Zojila Pass between **Ganderbal district** in Kashmir and **Drass district** of Ladakh.
  7.57 मीटर ऊँची घोड़े की नाल के आकार की एकल-नलिका द्वि-लेन सुरंग कश्मीर के **गांदरबल जिले** और लद्दाख के **द्रास जिले** के बीच स्थित कठिन ज़ोजिला दर्रे के नीचे से गुजरेगी।
- Officials say the travel time will come down from **three hours to 20 minutes** between **Ganderbal and Kargil**.
  अधिकारियों के अनुसार, **गांदरबल और कारगिल** के बीच यात्रा समय **तीन घंटे से घटकर मात्र 20 मिनट** रह जाएगा।

Strategic afterthought

The government must be transparent with the Nicobar project

For a project so often invoked as a matter of national security strategy, the ballooning Great Nicobar Island development, now estimated to be at ₹91,000 crore, rests on a remarkably thin strategic record. The Centre has long cited the "strategic" character of its centrepiece – a transshipment port at Galathea Bay – to withhold information on its environmental clearances. Yet, the Public Investment Board (PIB), a Finance Ministry body, found in August 2024 that the port "lacked strategic objectives". That label arrived only afterwards, from the Ministry of Defence and seems less like a founding rationale and more of an afterthought, retrofitted to a balance sheet. Both the PIB and the Public-Private Partnership Appraisal Committee (PPPAC) cleared the proposal, yet the PPPAC refused ₹12,230 crore in Viability Gap Funding, telling the Ports Ministry to find the money within its own budget – an unusual rebuke for a venture sold as nationally vital. If the port cannot stand on commercial returns, and if its real purpose is military, the case for a commercial transshipment hub dissolves.

Great Nicobar sits at the southern tip of the Andaman and Nicobar archipelago, wrapped in tropical rainforest and ringed by reefs of rare ecological value. The project – port, international airport, power plant and township – would clear vast tracts of that forest, much of it primary, and disturb the nesting beaches of the leatherback turtle and the habitat of the endemic Nicobar megapode. Scientists who have studied the island warn that the loss would be irreversible, and that no afforestation elsewhere can replace what is felled here. The island's indigenous inhabitants have objections of their own, running alongside the ecological ones but not reducible to them. Tribal councils have said that consent was secured without full disclosure, and asked that ancestral land and the resettlement promised after the 2004 tsunami not be overridden by the project. Their criticism is not a refusal of all development. The quarrel is with scale, secrecy and sequence – a project conceived at a magnitude the island cannot absorb. The remedy is transparency. The Centre should release the High-Powered Committee report in full, account openly for the true cost to the public exchequer, and weigh it against an environmental loss that the exchequer can never reimburse. A project of this scale owes the country at least that much.

09J6. Strategic afterthought
रणनीतिक पुनर्विचार

- The government must be **transparent** with the **Nicobar project**.

सरकार को **निकोबार परियोजना** के संबंध में **पारदर्शिता** बरतनी चाहिए।

- **For a project so often invoked as a matter of national security strategy, the ballooning Great Nicobar Island development, now estimated to be at ₹91,000 crore, rests on a remarkably thin strategic record.**

राष्ट्रीय सुरक्षा रणनीति के प्रश्न के रूप में बार-बार प्रस्तुत की जाने वाली **ग्रेट निकोबार द्वीप विकास परियोजना**, जिसकी लागत अब लगभग **₹91,000 करोड़** आँकी गई है, अत्यंत कमजोर रणनीतिक आधार पर टिकी हुई प्रतीत होती है।

- The Centre has long cited the "strategic" character of its centrepiece — a **transshipment port at Galathea Bay** — to withhold information on its environmental clearances.

केंद्र सरकार लंबे समय से अपनी प्रमुख परियोजना — **गैलेथिया खाड़ी स्थित स्थानांतरण बंदरगाह** — की "रणनीतिक" प्रकृति का हवाला देकर उसकी पर्यावरणीय स्वीकृतियों से संबंधित जानकारी सार्वजनिक करने से बचती रही है।

- Yet, the **Public Investment Board (PIB)**, a Finance Ministry body, found in August 2024 that the port "lacked strategic objectives".

किन्तु **लोक निवेश बोर्ड**, जो वित्त मंत्रालय की एक संस्था है, ने अगस्त 2024 में पाया कि इस बंदरगाह में "रणनीतिक उद्देश्य" का अभाव था।

- That label arrived only afterwards, from the Ministry of Defence and seems less like a founding rationale and more of an afterthought, retrofitted to a balance sheet.

यह रणनीतिक पहचान बाद में रक्षा मंत्रालय द्वारा प्रदान की गई और यह मूल उद्देश्य की अपेक्षा बाद में जोड़े गए औचित्य जैसी प्रतीत होती है।

- Both the PIB and the **Public-Private Partnership Appraisal Committee** cleared the proposal, yet the latter refused **₹12,230 crore in Viability Gap Funding**, telling the Ports Ministry to find the money within its own budget.

लोक निवेश बोर्ड और **सार्वजनिक-निजी भागीदारी मूल्यांकन समिति** दोनों ने प्रस्ताव को स्वीकृति दी, किन्तु बाद वाली समिति ने **₹12,230 करोड़ की व्यवहार्यता अंतर वित्तपोषण सहायता** देने से इनकार करते हुए बंदरगाह मंत्रालय को अपनी ही बजटीय व्यवस्था से धन जुटाने को कहा।

- This was an unusual rebuke for a venture sold as nationally vital.

राष्ट्रीय महत्व की परियोजना के रूप में प्रस्तुत किए गए उपक्रम के लिए यह एक असामान्य अस्वीकृति थी।

- If the port cannot stand on commercial returns, and if its real purpose is military, the case for a commercial transshipment hub dissolves.

यदि यह बंदरगाह व्यावसायिक लाभ के आधार पर टिक नहीं सकता और उसका वास्तविक उद्देश्य सैन्य है, तो एक व्यावसायिक स्थानांतरण केंद्र के रूप में उसका औचित्य समाप्त हो जाता है।

- **Great Nicobar** sits at the southern tip of the Andaman and Nicobar archipelago, wrapped in tropical rainforest and ringed by reefs of rare ecological value.
  ग्रेट निकोबार अंडमान एवं निकोबार द्वीपसमूह के दक्षिणी छोर पर स्थित है, जो उष्णकटिबंधीय वर्षावनों से आच्छादित तथा दुर्लभ पारिस्थितिक महत्व वाली प्रवाल भित्तियों से घिरा हुआ है।
- The project — port, international airport, power plant and township — would clear vast tracts of that forest, much of it primary, and disturb the nesting beaches of the **leatherback turtle** and the habitat of the endemic **Nicobar megapode**.
  यह परियोजना — जिसमें बंदरगाह, अंतरराष्ट्रीय हवाई अड्डा, विद्युत संयंत्र और नगर विकास शामिल हैं — विशाल वन क्षेत्रों को साफ कर देगी, जिनमें अधिकांश मूल वन हैं, तथा **लेदरबैक कछुए** के अंडे देने वाले तटों और स्थानिक **निकोबार मेगापोड** के आवास को प्रभावित करेगी।
- Scientists who have studied the island warn that the loss would be irreversible, and that no afforestation elsewhere can replace what is felled here.
  द्वीप का अध्ययन करने वाले वैज्ञानिकों ने चेतावनी दी है कि यह क्षति अपरिवर्तनीय होगी और अन्यत्र किया गया कोई भी वनीकरण यहाँ नष्ट किए गए वनों की भरपाई नहीं कर सकेगा।

Solar firms move High Court over 'unreasonable' mandate

Industry associations from Karnataka, Kerala and Tamil Nadu are up in arms against a Central rule that requires most new solar projects to be built only with domestically made cells

GS III: Economy

Jacob P. Koshy
NEW DELHI

A group of solar manufacturers and developers has approached the Karnataka High Court to defer a rule that, from June 1, requires most new solar projects to use only domestically made cells. They cite the gap between what Indian solar-cell makers charge and international prices.

Cells listed under the government's mandatory 'ALMM List-II' sell at around ₹13 a watt, against an imported price of about ₹5 a watt, the petitioners said. "₹5 and ₹13 is unreasonable. That is what we are asking [the court to address]," Ramesh Shivanna of the Karnataka Renewable Energy Systems Manufacturers Association (KRESMA), which led the petition, told *The Hindu*.

ALMM is the government ratified Approved List of Models and Manufacturers and a list of domestic producer companies whose solar panels and constituent cells are mandatory for electricity distribution in India.

ALMM-I is a list of about 130 module manufacturers. ALMM-2 is a smaller group of about 17 companies that makes the solar cells for these modules.

The writ petition, filed on June 6 by solar industry associations from Karnataka, Kerala and Tamil Nadu, challenges Ministry of New and Renewable Energy (MNRE) orders that enforce ALMM List-II – the approved list of domestic solar-cell manufacturers – for projects commissioned on or after June 1, 2026. Reportedly other state associations too have filed similar petitions in other courts.

Price imparity: Cells listed under the 'ALMM List-II' sell at about ₹13 a watt, against an imported price of about ₹5 a watt. FILE PHOTO

'Defer enforcement'

The petitioners said they do not oppose the list, but want its enforcement deferred, at least a year, until domestic cells are available in adequate quantity and quality, and at a competitive price. The petitioners also pointed to the Finance Ministry's classification of the West Asia conflict as a force majeure event, under which the MNRE allowed extensions of contractual deadlines to solar-cell makers; the same consideration, they said, should apply to developers.

Mr. Shivanna said the government must step in on price until domestic supply matures. "The government should regulate the price," he said.

"When something is available so cheap in the global market and here you are being made to pay [much more], it is the government's responsibility to study what is happening globally and in India."

A handful of cell makers, he argued, were capturing the gain: by his estimate, at a 30 GW annual build and a roughly ₹8-a-watt premium, about ₹24,000 crore a year would flow to "four-five manufacturers," several of whom had also received production-linked incentives. According to MNRE database, only six of the seventeen ALMM-2 companies carry "high-efficiency" solar cells cells – Emmvee, Premier Energies Photovoltaic, Mundra Solar PV, Tata Power Renewable Energy (a small 247 MW line), Waaree and Renewsys, Reliance and Jupiter Solartech.

The dispute exposes a structural gap at the heart of India's solar expansion. Installed solar capacity has crossed 144 GW and is growing about 40% a year, and module-assembly capacity has reached roughly 210 GW. But upstream cell manufacturing – the step the new rule targets – stood at only about 27 GW at the end of 2025, according to Mercom India, a clean-energy research group. Ratings agency CareEdge estimates domestic cells meet just 25-30% of demand, leaving India reliant on imports, mainly from China. "Right now the whole capacity (of high efficiency cells) manufactured in India is not enough for our requirement," Mr. Shivanna said.

"When we ask for cell supply, [many] don't have stock." All companies that make cells make modules but many modules makers don't make cells whereby about 14 companies make up 98% of India's solar capacity addition.

MNRE has refused a blanket extension, saying in a May 25 order that industry consensus favoured "policy stability" to protect investor confidence in domestic manufacturing, and offering instead case-by-case relief for projects that are substantially built. On Monday, the ministry constituted a four-member expert committee to vet applications for time extension.

09J6. Solar firms move High Court over 'unreasonable' mandate

'अनुचित' अनिवार्यता के खिलाफ सौर कंपनियाँ हाई कोर्ट पहुँचीं

- A group of **solar manufacturers and developers** has approached the **Karnataka High Court** to defer a rule that, from **June 1**, requires most new solar projects to use only **domestically made cells**.

सौर निर्माताओं और डेवलपर्स के एक समूह ने **कर्नाटक हाई कोर्ट** का रुख किया है ताकि उस नियम को टाला जा सके, जिसके तहत **1 जून** से अधिकांश नई सौर परियोजनाओं में केवल **घरेलू रूप से निर्मित सेल** का उपयोग अनिवार्य किया गया है।

- They cite the gap between what Indian **solar-cell makers** charge and international prices.

वे भारतीय **सौर-सेल निर्माताओं** द्वारा वसूली जाने वाली कीमतों और अंतरराष्ट्रीय कीमतों के बीच के अंतर का हवाला देते हैं।

- Cells listed under the government's mandatory **'ALMM List-II'** sell at around **₹13 a watt**, against an imported price of about **₹5 a watt**, the petitioners said.

याचिकाकर्ताओं के अनुसार सरकार की अनिवार्य **'ALMM List-II'** में सूचीबद्ध सेल लगभग **₹13 प्रति वाट** में बिकते हैं, जबकि आयातित सेल की कीमत लगभग **₹5 प्रति वाट** है।

- **ALMM** is the government ratified **Approved List of Models and Manufacturers** and a list of domestic producer companies whose solar panels and constituent cells are mandatory for electricity distribution in India.
  ALMM सरकार द्वारा अनुमोदित **Approved List of Models and Manufacturers** है तथा इसमें उन घरेलू उत्पादक कंपनियों की सूची शामिल है जिनके सौर पैनल और उनके सेल भारत में विद्युत वितरण के लिए अनिवार्य हैं।
- **ALMM-1** is a list of about **130 module manufacturers**.
  ALMM-1 लगभग **130 मॉड्यूल निर्माताओं** की सूची है।
- **ALMM-2** is a smaller group of about **17 companies** that makes the solar cells for these modules.
  ALMM-2 लगभग **17 कंपनियों** का एक छोटा समूह है जो इन मॉड्यूलों के लिए सौर सेल बनाता है।
- Installed **solar capacity** has crossed **144 GW** and is growing about **40% a year**, and **module-assembly capacity** has reached roughly **210 GW**.
  स्थापित **सौर क्षमता 144 GW** से अधिक हो चुकी है और लगभग **40% प्रतिवर्ष** की दर से बढ़ रही है, जबकि **मॉड्यूल-असेंबली क्षमता** लगभग **210 GW** तक पहुँच चुकी है।

PATRIOTIC IAS

The real stable coin play is in the plumbing that makes it work

Gaining traction: Stable coins currently in circulation are expected to surge as much as 15-fold by 2030. REUTERS

GS III: Economy

Reuters

LONDON

Stable coins grab the headlines,but the bigger prize for private equity investors may lie in the digital "plumbing" that makes them work.

We are rapidly moving into the age of AI, yet moving money still relies on architecture built for an analogue era: slow,expensive and complex. Stable coins could change that. This type of digital currency is pegged to a reserve asset like the U.S. dollar. Because of this structure, they are gaining traction in cross-border payments, treasury operations, crypto settlement and as a store of value in volatile economies.

Importantly, they are also offering something the traditional financial rails often cannot: near-instant settlement, round-the-clock operability, modest friction costs and a viable alternative where banking infrastructure is thin or trust is weak.

This tokenized form of cash is therefore more than an incremental upgrade. If properly structured and rigorously regulated, stable coins could do to money what email did to snail mail: make the old system increasingly obsolete.

Stable coins currently in circulation are expected to surge as much as 15-fold by 2030, according to Citi and Brookfield research. The debate is no longer whether they will scale, bu thow quickly – and who will profit when they do.

History suggests the biggest gains in a technological boom are rarely made by investing in the invention itself. They are captured in the infrastructure that enables rapid adoption. For example, in the 19th century, railroads on their own did not drive industrialization and the massive wealth creation that came with it. The gains came from the web of steel, coal,logistics and distribution networks that followed. Electrification was not about the light bulb, but the grid. Stable coins are no different. They are the spark for transforming money movement, not the engine driving conversion.

Token explosion

Wall Street is rapidly moving deeper into digital assets. This is feeding the broader trend of tokenization, the process of turning traditional assets into digital tokens. The New York Stock Exchange, part of Intercontinental Exchange, is partnering with Securitize - a major player in tokenization - on a platform for digital coins linked to stocks and ETFs. Meanwhile, Nasdaq is teaming up with Kraken - a cryptocurrency exchange - to let investors trade tokenized versions of listed stocks and ETFs.

More broadly, in a recent Broadridge survey of 950 financial services firms, 54% said their firm is investing in tokenization, while 53% believe blockchain will dramatically reshape settlement.

For established financial institutions, the choice is stark:integrate and evolve this new technology or cede ground as activity shifts to faster, cheaper, more transparent rails.

In short, this appears to be a structural shift, not a cyclical one.

The technology needed for this instantaneous, trackable movement of money already exists. What remains under built is the plumbing that will enable stable coins to connect seamlessly with the existing financial system. The opportunity lies not in stable coins themselves, but in owning the toll roads they travel on.

This infrastructure includes issuance platforms, payment processors, digital wallets, custody systems, and the other on-and off-ramps that convert traditional currency into digital and back. It also includes compliance tools such as "know your customer" (KYC), anti-money laundering (AML) and transaction monitoring services.

This is where private equity can come in.

Capital can help financial institutions modernize legacy systems, carve out digital asset units from larger groups, or support governments building national digital-currency platforms.

None of this is risk-free. Stable coins are not insured like bank deposits, and their stability depends on the quality and liquidity of the issuer's reserves. Compared with banks, the firms that manage stable coins have fewer resources to address fraud and cybersecurity risks.

Moreover, regulatory clarity is needed. Markets do not scale when faced with ambiguity. Investors and institutions will require clear rules on reserves, redemptions, supervision andconsumer protection.

09J6. The real stable coin play is in the plumbing that makes it work

स्टेबल कॉइन का असली अवसर उस आधारभूत संरचना में है जो इसे कार्यशील बनाती है

- **Stable coins** grab the headlines, but the bigger prize for **private equity investors** may lie in the digital "**plumbing**" that makes them work.

स्टेबल कॉइन सुर्खियाँ बटोरते हैं, लेकिन **प्राइवेट इक्विटी निवेशकों** के लिए बड़ा अवसर उस डिजिटल "**प्लंबिंग**" में हो सकता है जो इन्हें कार्यशील बनाती है।

- We are rapidly moving into the age of **AI**, yet moving money still relies on architecture built for an analogue era: slow, expensive and complex.

हम तेजी से **AI** के युग में प्रवेश कर रहे हैं, फिर भी धन का हस्तांतरण अभी भी उस संरचना पर निर्भर है जो एनालॉग युग के लिए बनाई गई थी: धीमी, महंगी और जटिल।

- **Stable coins** could change that.

स्टेबल कॉइन इसे बदल सकते हैं।

- This type of digital currency is pegged to a reserve asset like the **U.S. dollar**.

इस प्रकार की डिजिटल मुद्रा को **अमेरिकी डॉलर** जैसी आरक्षित परिसंपत्ति से जोड़ा जाता है।

- Because of this structure, they are gaining traction in **cross-border payments**, **treasury operations**, **crypto settlement** and as a **store of value** in volatile economies.

इस संरचना के कारण ये **सीमा-पार भुगतान**, **कोषागार संचालन**, **क्रिप्टो निपटान** तथा अस्थिर अर्थव्यवस्थाओं में **मूल्य-संग्रहण के साधन** के रूप में लोकप्रिय हो रहे हैं।

- Importantly, they are also offering something the traditional financial rails often cannot: **near-instant settlement**, **round-the-clock operability**, modest friction costs and a viable alternative where banking infrastructure is thin or trust is weak.

महत्वपूर्ण रूप से, ये वह सुविधा भी प्रदान कर रहे हैं जो पारंपरिक वित्तीय व्यवस्था अक्सर नहीं कर पाती: **लगभग त्वरित निपटान**, **24×7 संचालन क्षमता**, कम लेनदेन लागत और उन क्षेत्रों में व्यवहार्य विकल्प जहाँ बैंकिंग अवसंरचना कमजोर है या भरोसा कम है।

- This tokenized form of cash is therefore more than an incremental upgrade.

इसलिए नकदी का यह **टोकनाइज्ड स्वरूप** केवल एक मामूली सुधार से कहीं अधिक है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- If properly structured and rigorously regulated, **stable coins** could do to money what email did to snail mail: make the old system increasingly obsolete.
  यदि इन्हें उचित ढंग से संरचित और कड़ाई से विनियमित किया जाए, तो **स्टेबल कॉइन** धन के साथ वही कर सकते हैं जो ईमेल ने पारंपरिक डाक के साथ किया था: पुराने तंत्र को धीरे-धीरे अप्रासंगिक बना देना।
- Stable coins currently in circulation are expected to surge as much as **15-fold by 2030**, according to **Citi** and **Brookfield** research.
  Citi और **Brookfield** के शोध के अनुसार, वर्तमान में प्रचलन में मौजूद स्टेबल कॉइन की मात्रा **2030 तक 15 गुना** बढ़ सकती है।
- The debate is no longer whether they will scale, but how quickly — and who will profit when they do.
  अब बहस इस बात पर नहीं है कि वे बड़े पैमाने पर अपनाए जाएँगे या नहीं, बल्कि इस पर है कि यह कितनी तेजी से होगा और इससे लाभ किसे मिलेगा।
- History suggests the biggest gains in a technological boom are rarely made by investing in the invention itself.
  इतिहास बताता है कि तकनीकी क्रांति के दौरान सबसे बड़ा लाभ आमतौर पर स्वयं आविष्कार में निवेश करने से नहीं मिलता।
- They are captured in the infrastructure that enables rapid adoption.
  वे उस अवसंरचना में निहित होते हैं जो तीव्र अपनाने को संभव बनाती है।
- For example, in the **19th century**, railroads on their own did not drive industrialization and the massive wealth creation that came with it.
  उदाहरण के लिए, **19वीं शताब्दी** में केवल रेलमार्गों ने औद्योगीकरण और उससे उत्पन्न विशाल संपत्ति निर्माण को आगे नहीं बढ़ाया था।
- The gains came from the web of **steel**, **coal**, **logistics** and **distribution networks** that followed.
  लाभ **इस्पात**, **कोयला**, **लॉजिस्टिक्स** और **वितरण नेटवर्कों** के व्यापक तंत्र से प्राप्त हुआ जो बाद में विकसित हुए।
- Electrification was not about the light bulb, but the **grid**.
  विद्युतीकरण का अर्थ केवल बल्ब नहीं था, बल्कि **ग्रिड** था।
- Stable coins are no different.
  स्टेबल कॉइन भी इससे अलग नहीं हैं।
- They are the spark for transforming money movement, not the engine driving conversion.
  वे धन हस्तांतरण को बदलने वाली चिंगारी हैं, परिवर्तन को संचालित करने वाला इंजन नहीं।

Token explosion
टोकन विस्फोट

- **Wall Street** is rapidly moving deeper into digital assets.
  वॉल स्ट्रीट तेजी से डिजिटल परिसंपत्तियों की ओर बढ़ रहा है।
- This is feeding the broader trend of **tokenization**, the process of turning traditional assets into digital tokens.
  यह **टोकनाइजेशन** की व्यापक प्रवृत्ति को बढ़ावा दे रहा है, जिसमें पारंपरिक परिसंपत्तियों को डिजिटल टोकनों में परिवर्तित किया जाता है।
- The **New York Stock Exchange**, part of **Intercontinental Exchange**, is partnering with **Securitize** – a major player in tokenization – on a platform for digital coins linked to stocks and ETFs.
  न्यूयॉर्क स्टॉक एक्सचेंज, जो **Intercontinental Exchange** का हिस्सा है, **Securitize** के साथ साझेदारी कर रहा है ताकि शेयरों और ETF से जुड़े डिजिटल कॉइन के लिए एक मंच विकसित किया जा सके।
- Meanwhile, **Nasdaq** is teaming up with **Kraken** – a cryptocurrency exchange – to let investors trade tokenized versions of listed stocks and ETFs.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

इसी बीच **Nasdaq**, **Kraken** नामक क्रिप्टोकरेंसी एक्सचेंज के साथ मिलकर निवेशकों को सूचीबद्ध शेयरों और ETF के टोकनाइज्ड संस्करणों में व्यापार की सुविधा दे रहा है।

- More broadly, in a recent **Broadridge survey** of **950 financial services firms**, **54%** said their firm is investing in tokenization, while **53%** believe blockchain will dramatically reshape settlement.
  व्यापक रूप से देखें तो **950 वित्तीय सेवा कंपनियों** पर किए गए हालिया **Broadridge सर्वेक्षण** में **54%** ने कहा कि उनकी कंपनी टोकनाइजेशन में निवेश कर रही है, जबकि **53%** का मानना है कि **ब्लॉकचेन** निपटान प्रणाली को पूरी तरह बदल देगा।
- For established financial institutions, the choice is stark: integrate and evolve this new technology or cede ground as activity shifts to faster, cheaper, more transparent rails.
  स्थापित वित्तीय संस्थानों के सामने स्पष्ट विकल्प है: इस नई तकनीक को अपनाकर विकसित हों या गतिविधियों के तेज, सस्ते और अधिक पारदर्शी माध्यमों की ओर स्थानांतरित होने पर अपनी स्थिति खो दें।
- In short, this appears to be a **structural shift**, not a cyclical one.
  संक्षेप में, यह एक **संरचनात्मक परिवर्तन** प्रतीत होता है, न कि चक्रीय परिवर्तन।
- The technology needed for this instantaneous, trackable movement of money already exists.
  धन के इस त्वरित और ट्रैक किए जा सकने वाले हस्तांतरण के लिए आवश्यक तकनीक पहले से मौजूद है।
- What remains under built is the plumbing that will enable stable coins to connect seamlessly with the existing financial system.
  जिस चीज़ का अभी भी पर्याप्त विकास नहीं हुआ है, वह वह आधारभूत संरचना है जो स्टेबल कॉइन को मौजूदा वित्तीय प्रणाली से सहज रूप से जोड़ सके।
- The opportunity lies not in stable coins themselves, but in owning the toll roads they travel on.
  अवसर स्वयं स्टेबल कॉइन में नहीं, बल्कि उन मार्गों के स्वामित्व में है जिन पर वे चलते हैं।
- This infrastructure includes **issuance platforms**, **payment processors**, **digital wallets**, **custody systems**, and the other on-and off-ramps that convert traditional currency into digital and back.
  इस अवसंरचना में **जारीकरण प्लेटफॉर्म**, **पेमेंट प्रोसेसर**, **डिजिटल वॉलेट**, **कस्टडी सिस्टम** तथा पारंपरिक मुद्रा को डिजिटल मुद्रा में और वापस बदलने वाले अन्य माध्यम शामिल हैं।
- It also includes compliance tools such as **know your customer (KYC)**, **anti-money laundering (AML)** and **transaction monitoring services**.
  इसमें **Know Your Customer (KYC)**, **Anti-Money Laundering (AML)** और **लेनदेन निगरानी सेवाएँ** जैसे अनुपालन उपकरण भी शामिल हैं।
- This is where **private equity** can come in.
  यही वह क्षेत्र है जहाँ **प्राइवेट इक्विटी** की भूमिका महत्वपूर्ण हो सकती है।
- Capital can help financial institutions modernize legacy systems, carve out digital asset units from larger groups, or support governments building national digital-currency platforms.
  पूंजी वित्तीय संस्थानों को पुरानी प्रणालियों का आधुनिकीकरण करने, बड़े समूहों से डिजिटल परिसंपत्ति इकाइयाँ अलग करने या राष्ट्रीय डिजिटल मुद्रा मंच विकसित करने वाली सरकारों को समर्थन देने में सहायता कर सकती है।
- None of this is risk-free.
  इनमें से कोई भी कार्य जोखिम-मुक्त नहीं है।
- Stable coins are not insured like bank deposits, and their stability depends on the quality and liquidity of the issuer's reserves.
  स्टेबल कॉइन बैंक जमा की तरह बीमित नहीं होते और उनकी स्थिरता जारीकर्ता के भंडार की गुणवत्ता तथा तरलता पर निर्भर करती है।
- Compared with banks, the firms that manage stable coins have fewer resources to address **fraud** and **cybersecurity risks**.
  बैंकों की तुलना में स्टेबल कॉइन का प्रबंधन करने वाली कंपनियों के पास **धोखाधड़ी** और **साइबर सुरक्षा जोखिमों** से निपटने के लिए कम संसाधन होते हैं।

- Moreover, **regulatory clarity** is needed.
  इसके अतिरिक्त **नियामकीय स्पष्टता** आवश्यक है।
- Markets do not scale when faced with ambiguity.
  अनिश्चितता की स्थिति में बाजार बड़े पैमाने पर विकसित नहीं हो पाते।
- Investors and institutions will require clear rules on **reserves**, **redemptions**, **supervision** and **consumer protection**.
  निवेशकों और संस्थानों को **भंडार**, **मोचन**, **निगरानी** और **उपभोक्ता संरक्षण** से संबंधित स्पष्ट नियमों की आवश्यकता होगी।

'Amplifying' random numbers brings a breakthrough in digital security

Creating a truly unguessable password is difficult as even the best computers leave behind subtle, predictable patterns; by tapping into the power of quantum physics, scientists have now found a way to turn mostly random data into flawless security keys that are practically impossible to predict

Digital security has an Achilles heel: the numbers it uses for encryption are rarely as random as they seem. IMAGE CREATED WITH AI

Most digital security relies today on random numbers to generate cryptographic keys. Think of a cryptographic key like a long, complex password. If that password is truly random, an attacker has to guess every possible combination. But if the 'random' process used to make that password has a pattern, the attacker can use that pattern to skip billions of guesses.

Digital security has an Achilles's heel: the numbers it uses for encryption are rarely as random as they seem. But in a study published in *Nature*, researchers at ETH Zürich have demonstrated a new solution called randomness amplification, where they used quantum physics to turn predictable bits of data into certifiably perfect randomness.

A note from the university said the researchers had effectively "generated certified perfect randomness for the first time".

Creating true randomness is actually really difficult. Most random number generators (RNGs) produce bits with a small bias. Say you're flipping a coin that lands on 'heads' 51% of the time instead of 50%. That 1% difference is a bias.

Santha-Vazirani limit

In 1986, computer science researchers Miklós Santha and Umesh Vazirani showed that a classical computer cannot upgrade a weakly random source into a perfectly random one. Put another way, if a source of random numbers is predictable even in a small way, classical post-processing alone could never eliminate it. So if you give a classical computer a biased coin, any data it produces based on that coil will remain just as biased and predictable, no matter how much the computer tries to improve on the input. This is why even high-end random number generators suffer from experimental imperfections – like heat or electronic noise – that make their outcomes slightly biased, and thus predictable to an advanced attacker.

"Even modern random number generators, which are based on quantum mechanical effects like the reflection of photons from beam splitters, are not entirely immune to such a systematic error or bias," Andreas Wallraff, one of the study's lead investigators and and Laboratory for Solid-State Physics professor, said in the note.

Over the last two decades, theoretical work has suggested that quantum physics may provide a workaround. In fact, in 2012, Roger Colbeck and Renato Renner – who is one of the authors of the new study – showed in theory that quantum physics could do it.

The ETH Zürich team achieved it using a Bell test, a physics experiment designed to prove a phenomenon called quantum entanglement. Entanglement is a state where two quantum particles – like atoms or photons – become linked such that a measurement performed on one particle instantly affects the other, no matter how far apart they are.

In a Bell test, two entangled particles are separated and measured. If the particles answer in a particular highly correlated way, it will show that the answers were not secretly decided in advance. In other words, the test will prove the universe itself did not know the answer until the moment the measurement happened.

Now, in quantum physics, the act of measuring something creates new information that wasn't there before. For example, each of the two particles will be in a superposition of multiple states. When you measure one, it will collapse into one particular state – and so will the other entangled particle. This 'final' state is the new information.

Because this information is born at the exact instant of measurement, it is impossible for anyone to have known the outcome in advance. In the work, the team used this information as an additional source of randomness.

Quantum advantage

In their experiment, the team members entangled two particles, then placed them 30 m apart. This distance made sure the particles could not 'cheat' by communicating their 'final' states to each other at the speed of light.

Next, they used random biased bits to decide how to measure each particle. Then, with the measurement outcomes, they calculated the Bell violation score – a measure of how strongly the particles were entangled, and thus how clueless the universe might have been about the measurement outcomes. The score was 2.271.

This was above the classical limit of 2, meaning quantum physics rather than classical physics was in play. (Entanglement is a purely quantum phenomenon.)

"It is a clean instance of quantum advantage: a task quantum physics performs that classical physics provably cannot," Marin Ivezic, founder of research-driven consulting firm Applied Quantum, wrote on his site.

However, the highest score quantum physics allows is 2.82. And the closer an experiment gets to this value, the stronger the evidence that the particles are behaving according to quantum physics alone rather than also being influenced by bias. In a lab, stray heat, microscopic timing errors, and other subtle factors can create noise that biases the particles in small ways. And an attacker who understands the specific noise in a setup might notice that when the system glitches, it tends to produce a '1' more often than a '0', and use that to their advantage.

The researchers now had two resources: the original random biased bits and the new outcomes from the Bell test. They combined both using a mathematical tool called a two-source extractor. Its purpose is to blend two independent strings of data. Independent means knowing anything about String 1 must reveal nothing about String 2, and vice versa.

The extractor is designed so that if an attacker has a slight advantage in predicting String 1 and a slight advantage in predicting String 2, they have zero advantage in predicting the combination. The extractor achieves this by cancelling the strings' individual biases out as long as they are independent.

In their tests, the researchers worked with 5.3 billion random biased bits and 2.6 billion bits of information from the measurements.

They combined them in 1.3 billion trials, which they ran at 50,000 times per second over nine hours. At the end of each trial, the extractor output was 45 million bits – all purely random. The rest got pruned away because they were biased information or noise.

"The resulting sequence of zeros and ones is now really perfectly random, and we can even certify that," Prof. Renner, a professor at the Institute for Theoretical Physics at ETH Zürich, said in the note. The certificate is the Bell test score.

"The technical improvements allowed us, for the first time, to create random numbers that will remain perfectly random for all eternity – no matter what analytical methods are used to assess their randomness," Prof. Renner added.

In quantum physics, the act of measuring something creates new information that wasn't there before; because this information is born at the exact instant of measurement, it is impossible for anyone to have known the outcome in advance, becoming an additional source of randomness

The team also said their protocol to generate purely random numbers is device-independent – a gold standard in security that means even if you don't trust the person who built the hardware, even if you don't fully understand how the machine works, you can trust the output to be random.

In physics, it is mathematically impossible for a classical theory to score higher than 2 on a Bell test. By scoring 2.271 on the test, then, the researchers' setup proved it was producing random quantum information.

That said, according to the team's security analysis, the protocol has a failure probability of one in a trillion, similar to flipping a coin and getting 'heads' 40 times in a row. This is because of the number of tests, 1.3 billion. If they had conducted several billion more, the researchers may have reduced the failure rate to one in a quadrillion or quintillion. It is mathematically impossible to reach 100%.

In fact, the researchers had chosen one in a trillion as their finish line. And to reach that level of certainty with a score of 2.271, they had to discard a large amount of data in the end. If their score had been higher, they could have reached the same failure rate while keeping much more of the data.

While one in a trillion suffices for practical applications, the experiment's apparatus can't yet replace conventional random-number generators. First, it is complex and resource-intensive. Its randomness output is modest compared to commercial systems: around 1,400 bits per second versus 1 billion bits per second. It is also information-wise inefficient in that for every 1[9] "almost perfectly random" bits it consumed, it produced 1 "certified random" bit – whereas commercial generators produce a very large number of "almost perfectly random" bits from just one "somewhat random" bit.

But while the new protocol is slower and less efficient, it can produce randomness of a higher quality. That is, the work establishes that randomness can be amplified in lab conditions, that too in a device-independent way. It also proves the Santha-Vazirani limit can be broken by quantum physics.

Beacon of randomness

"My understanding is that the main advance here is not device-independent random-number generation *per se*. That has already been demonstrated using ... Bell tests," Urbasi Sinha, head of the Quantum Information and Computing lab at the Raman Research Institute, Bengaluru, told *The Hindu*. "The new element is the experimental demonstration of device-independent randomness amplification: starting with a weak, imperfect source of randomness and using quantum correlations to certify output bits that are unbiased under the stated model."

"This is significant because practical quantum random-number generators are never ideal, and in our own work on QRNGs and semi-device-independent certification, we have also emphasised that the real issue is not whether a bit string passes statistical tests but whether its unpredictability can be certified from clearly stated physical assumptions," she added.

"The important caveat is that the guarantee here is conditional on the Santha-Vazirani weak-source model, the claimed bias bound on the input randomness, the... Bell-test implementation, and the validity of the extractor/security analysis."

The researchers proposed one application: a public randomness beacon – a service that broadcasts certified random bits for uses ranging from financial transactions and blockchain protocols to military encryption. The U.S. National Institute of Standards and Technology already runs a service where it releases 512 random bits every 60 seconds on its website. They are used in lotteries, to assign juries, to sample voting machines, and for research.

That said, Mr. Ivezic cautioned in his write-up that while certifiable randomness could help security today, it will not help protect encrypted information against attacks by future quantum computers.

"Better randomness was never the answer to that problem," he wrote; "migrating to post-quantum algorithms is." India recently took its very first steps on this front.

09J6. Amplifying random numbers brings a breakthrough in digital security
यादृच्छिक संख्याओं को विस्तारित करने से डिजिटल सुरक्षा में एक महत्वपूर्ण सफलता प्राप्त हुई है।

- Creating a truly **unguessable password** is difficult as even the best **computers** leave behind subtle, predictable **patterns**; by tapping into the power of **quantum physics**, scientists have now found a way to turn mostly random **data** into flawless **security keys** that are practically impossible to predict.

वास्तव में **अनुमान न लगाए जा सकने वाला पासवर्ड** बनाना कठिन है, क्योंकि सर्वोत्तम **कंप्यूटर** भी सूक्ष्म एवं पूर्वानुमेय **प्रतिरूप** छोड़ जाते हैं; **क्वांटम भौतिकी** की शक्ति का उपयोग करते हुए, वैज्ञानिकों ने अब अधिकांशतः यादृच्छिक **डेटा** को त्रुटिहीन **सुरक्षा कुंजियों** में परिवर्तित करने का एक तरीका खोज लिया है, जिनका पूर्वानुमान लगाना व्यावहारिक रूप से असंभव है।

- **Most digital security relies today on random numbers to generate cryptographic keys.**

आज अधिकांश डिजिटल सुरक्षा क्रिप्टोग्राफिक कुंजियाँ (Cryptographic Keys) उत्पन्न करने के लिए यादृच्छिक संख्याओं पर निर्भर करती है।

- Think of a **cryptographic key** like a long, complex password.

एक **क्रिप्टोग्राफिक कुंजी** को एक लंबे और जटिल पासवर्ड के समान समझिए।

- If that password is truly random, an attacker has to guess every possible combination.

यदि वह पासवर्ड वास्तव में यादृच्छिक है, तो किसी आक्रमणकारी को प्रत्येक संभावित संयोजन का अनुमान लगाना होगा।

- But if the 'random' process used to make that password has a pattern, the attacker can use that pattern to skip billions of guesses.
  किन्तु यदि उस पासवर्ड को बनाने वाली 'यादृच्छिक' प्रक्रिया में कोई पैटर्न हो, तो आक्रमणकारी उस पैटर्न का उपयोग करके अरबों अनुमानों को छोड़ सकता है।
- Digital security has an **Achilles's heel**: the numbers it uses for encryption are rarely as random as they seem.
  डिजिटल सुरक्षा की एक **कमज़ोर कड़ी (Achilles's heel)** है: एन्क्रिप्शन में प्रयुक्त संख्याएँ प्रायः उतनी यादृच्छिक नहीं होतीं जितनी वे प्रतीत होती हैं।
- But in a study published in **Nature**, researchers at **ETH Zürich** have demonstrated a new solution called **randomness amplification**, where they used **quantum physics** to turn predictable bits of data into certifiably perfect randomness.
  किन्तु **Nature** में प्रकाशित एक अध्ययन में **ETH Zürich** के शोधकर्ताओं ने **रैंडमनेस एम्प्लीफिकेशन (Randomness Amplification)** नामक एक नया समाधान प्रदर्शित किया, जिसमें उन्होंने **क्वांटम भौतिकी** का उपयोग करके पूर्वानुमेय डेटा बिट्स को प्रमाणित पूर्ण यादृच्छिकता में परिवर्तित किया।
- Creating true randomness is actually really difficult.
  वास्तविक यादृच्छिकता उत्पन्न करना वास्तव में अत्यंत कठिन है।
- Most **random number generators (RNGs)** produce bits with a small bias.
  अधिकांश **रैंडम नंबर जनरेटर (RNGs)** थोड़े पक्षपात वाले बिट्स उत्पन्न करते हैं।
- Say you're flipping a coin that lands on 'heads' 51% of the time instead of 50%.
  मान लीजिए आप एक ऐसा सिक्का उछाल रहे हैं जो 50% के स्थान पर 51% बार 'हेड्स' पर गिरता है।
- That 1% difference is a **bias**.
  यह 1% का अंतर एक **पक्षपात (Bias)** है।

- So if you give a classical computer a biased coin, any data it produces based on that coin will remain just as biased and predictable, no matter how much the computer tries to improve on the input.
  अतः यदि आप किसी शास्त्रीय कंप्यूटर को एक पक्षपाती सिक्का देते हैं, तो उससे उत्पन्न कोई भी डेटा उतना ही पक्षपाती और पूर्वानुमेय बना रहेगा, चाहे कंप्यूटर इनपुट को सुधारने का कितना भी प्रयास करे।
- This is why even high-end random number generators suffer from experimental imperfections — like heat or electronic noise — that make their outcomes slightly biased, and thus predictable to an advanced attacker.
  इसी कारण उच्च स्तरीय रैंडम नंबर जनरेटर भी ऊष्मा या इलेक्ट्रॉनिक शोर जैसी प्रायोगिक अपूर्णताओं से प्रभावित होते हैं, जो उनके परिणामों को थोड़ा पक्षपाती बना देती हैं और इस प्रकार किसी उन्नत आक्रमणकारी के लिए उन्हें पूर्वानुमेय बना सकती हैं।
- The **ETH Zürich** team achieved it using a **Bell test**, a physics experiment designed to prove a phenomenon called **quantum entanglement**.
  ETH Zürich की टीम ने इसे **बेल परीक्षण (Bell Test)** का उपयोग करके प्राप्त किया, जो **क्वांटम उलझाव (Quantum Entanglement)** नामक घटना को सिद्ध करने हेतु बनाया गया एक भौतिकी प्रयोग है।
- **Entanglement** is a state where two **quantum particles** — like atoms or photons — become linked such that a measurement performed on one particle instantly affects the other, no matter how far apart they are.
  उलझाव (Entanglement) वह अवस्था है जिसमें दो **क्वांटम कण** — जैसे परमाणु या फोटॉन — इस प्रकार जुड़े होते हैं कि एक कण पर किया गया मापन दूसरे को तुरंत प्रभावित करता है, चाहे वे एक-दूसरे से कितनी भी दूरी पर हों।
- In a **Bell test**, two **entangled particles** are separated and measured.
  एक **बेल परीक्षण** में, दो **उलझे हुए कणों** को अलग किया जाता है और उनका मापन किया जाता है।

- If the particles answer in a particular highly correlated way, it will show that the answers were not secretly decided in advance.
  यदि कण एक विशेष अत्यधिक सहसंबद्ध तरीके से प्रतिक्रिया देते हैं, तो यह दर्शाएगा कि उनके उत्तर पहले से गुप्त रूप से निर्धारित नहीं थे।
- In other words, the test will prove the universe itself did not know the answer until the moment the measurement happened.
  दूसरे शब्दों में, यह परीक्षण सिद्ध करेगा कि स्वयं ब्रह्मांड को भी उत्तर का ज्ञान उस क्षण तक नहीं था जब तक मापन नहीं हुआ।
- Now, in **quantum physics**, the act of measuring something creates new information that wasn't there before.
  अब, **क्वांटम भौतिकी** में, किसी वस्तु का मापन करने की प्रक्रिया नई सूचना उत्पन्न करती है जो पहले अस्तित्व में नहीं थी।
- For example, each of the two particles will be in a **superposition** of multiple states.
  उदाहरण के लिए, दोनों कण अनेक अवस्थाओं के **अध्यारोपण** में होंगे।
- When you measure one, it will collapse into one particular state — and so will the other entangled particle.
  जब आप एक का मापन करते हैं, तो वह एक विशिष्ट अवस्था में सिमट जाएगा — और दूसरा उलझा हुआ कण भी ऐसा ही करेगा।
- This 'final' state is the new information.
  यह 'अंतिम' अवस्था ही नई सूचना होती है।
- Because this information is born at the exact instant of measurement, it is impossible for anyone to have known the outcome in advance.
  चूँकि यह सूचना मापन के ठीक उसी क्षण उत्पन्न होती है, इसलिए किसी के लिए भी परिणाम को पहले से जानना असंभव है।
- In the work, the team used this information as an additional source of **randomness**.
  इस कार्य में, टीम ने इस सूचना का उपयोग **यादृच्छिकता** के अतिरिक्त स्रोत के रूप में किया।

Quantum advantage
क्वांटम लाभ

- In their experiment, the team members entangled two particles, then placed them **30 m apart**.
  अपने प्रयोग में, टीम के सदस्यों ने दो कणों को उलझाया और फिर उन्हें **30 मीटर की दूरी** पर रखा।
- This distance made sure the particles could not 'cheat' by communicating their 'final' states to each other at the **speed of light**.
  इस दूरी ने सुनिश्चित किया कि कण **प्रकाश की गति** से अपनी 'अंतिम' अवस्थाओं का आदान-प्रदान करके 'धोखा' न दे सकें।
- Next, they used **random biased bits** to decide how to measure each particle.
  इसके बाद, उन्होंने प्रत्येक कण का मापन कैसे किया जाए, यह निर्धारित करने के लिए **यादृच्छिक पक्षपाती बिट्स** का उपयोग किया।
- Then, with the measurement outcomes, they calculated the **Bell violation score** — a measure of how strongly the particles were entangled, and thus how clueless the universe might have been about the measurement outcomes.
  फिर, मापन के परिणामों की सहायता से उन्होंने **बेल उल्लंघन स्कोर** की गणना की — यह इस बात का माप है कि कण कितनी दृढ़ता से उलझे हुए थे और इस प्रकार मापन परिणामों के बारे में ब्रह्मांड कितना अनभिज्ञ रहा होगा।
- "It is a clean instance of **quantum advantage**: a task quantum physics performs that classical physics provably cannot," Marin Ivezic, founder of research-driven consulting firm Applied Quantum, wrote on his site.
  "यह **क्वांटम लाभ** का एक स्पष्ट उदाहरण है: ऐसा कार्य जिसे क्वांटम भौतिकी कर सकती है जबकि शास्त्रीय

भौतिकी सिद्ध रूप से नहीं कर सकती," शोध-आधारित परामर्श संस्था के संस्थापक मेरिन इवेज़िक ने अपनी वेबसाइट पर लिखा।

- However, the highest score quantum physics allows is **2.82**.
  हालाँकि, क्वांटम भौतिकी द्वारा अनुमत उच्चतम स्कोर **2.82** है।
- And the closer an experiment gets to this value, the stronger the evidence that the particles are behaving according to quantum physics alone rather than also being influenced by bias.
  और कोई प्रयोग जितना अधिक इस मान के निकट पहुँचता है, उतना ही प्रबल प्रमाण मिलता है कि कण केवल क्वांटम भौतिकी के अनुसार व्यवहार कर रहे हैं, न कि किसी पक्षपात से प्रभावित होकर।
- In a lab, stray heat, microscopic timing errors, and other subtle factors can create noise that biases the particles in small ways.
  प्रयोगशाला में, अतिरिक्त ऊष्मा, सूक्ष्म समयगत त्रुटियाँ और अन्य सूक्ष्म कारक ऐसा शोर उत्पन्न कर सकते हैं जो कणों को थोड़े स्तर पर पक्षपाती बना देता है।
- And an attacker who understands the specific noise in a setup might notice that when the system glitches, it tends to produce a '1' more often than a '0', and use that to their advantage.
  और कोई आक्रमणकारी जो किसी व्यवस्था के विशिष्ट शोर को समझता हो, यह देख सकता है कि जब प्रणाली में त्रुटि आती है तो वह '0' की अपेक्षा '1' अधिक उत्पन्न करती है, और वह इसका लाभ उठा सकता है।
- The researchers now had two resources: the original **random biased bits** and the new outcomes from the **Bell test**.
  अब शोधकर्ताओं के पास दो संसाधन थे: मूल **यादृच्छिक पक्षपाती बिट्स** और **बेल परीक्षण** से प्राप्त नए परिणाम।
- They combined both using a mathematical tool called a **two-source extractor**.
  उन्होंने दोनों को **द्वि-स्रोत निष्कर्षक** नामक गणितीय उपकरण की सहायता से संयोजित किया।
- Its purpose is to blend two independent strings of data.
  इसका उद्देश्य आँकड़ों की दो स्वतंत्र श्रृंखलाओं को मिलाना है।
- Independent means knowing anything about String 1 must reveal nothing about String 2, and vice versa.
  स्वतंत्रता का अर्थ है कि पहली श्रृंखला के बारे में कोई भी जानकारी दूसरी श्रृंखला के बारे में कुछ भी प्रकट न करे, और इसके विपरीत भी यही सत्य हो।
- "The resulting sequence of zeros and ones is now really perfectly random, and we can even certify that," Prof. Renner, a professor at the Institute for Theoretical Physics at ETH Zürich, said in the note.
  "शून्य और एक की परिणामी श्रृंखला अब वास्तव में पूर्णतः यादृच्छिक है, और हम इसका प्रमाण भी दे सकते हैं," सैद्धांतिक भौतिकी संस्थान के प्रोफेसर रेनर ने टिप्पणी में कहा।
- The certificate is the **Bell test score**.
  यह प्रमाणपत्र **बेल परीक्षण स्कोर** है।
- "The technical improvements allowed us, for the first time, to create random numbers that will remain perfectly random for all eternity — no matter what analytical methods are used to assess their randomness," Prof. Renner added.
  "तकनीकी सुधारों ने हमें पहली बार ऐसी यादृच्छिक संख्याएँ उत्पन्न करने में सक्षम बनाया है जो अनंत काल तक पूर्णतः यादृच्छिक बनी रहेंगी — चाहे उनकी यादृच्छिकता का मूल्यांकन करने के लिए कोई भी विश्लेषणात्मक विधि क्यों न अपनाई जाए," प्रोफेसर रेनर ने आगे कहा।
- The team also said their protocol to generate purely random numbers is **device-independent** — a gold standard in security that means even if you don't trust the person who built the hardware, even if you don't fully understand how the machine works, you can trust the output to be random.
  टीम ने यह भी कहा कि पूर्णतः यादृच्छिक संख्याएँ उत्पन्न करने की उनकी प्रक्रिया **उपकरण-स्वतंत्र** है — जो सुरक्षा का स्वर्ण मानक है। इसका अर्थ है कि यदि आप हार्डवेयर बनाने वाले व्यक्ति पर विश्वास नहीं करते हों,

या मशीन की कार्यप्रणाली को पूरी तरह न समझते हों, तब भी आप उसके आउटपुट के यादृच्छिक होने पर भरोसा कर सकते हैं।

- In physics, it is mathematically impossible for a classical theory to score higher than **2** on a Bell test.
  भौतिकी में, किसी शास्त्रीय सिद्धांत के लिए बेल परीक्षण में **2** से अधिक स्कोर प्राप्त करना गणितीय रूप से असंभव है।

New mustard hybrids need diverse farming plans

GS III: S&T

In the 2026-27 rabi sowing season, from October to April, Indian farmers are set to begin the wide-scale cultivation of imidazolinone-resistant (IMI-resistant) mustard hybrids. These hybrids are designed to overcome a parasitic weed called Orobanche, a major hurdle in oilseed production.

India has long grappled with an edible oils deficit. In 2024-25, the country imported around 16 million tonnes at about ₹1.6 lakh crore. Mustard is the most vital oilseed crop to meet this demand, especially in the arid environments of North India. However, its yields have been suppressed throughout the year by Orobanche, a destructive root parasite that attaches to the mustard plant and drains it of water and nutrients. (It has more recently been called Phelipanche.)

The new IMI-resistant hybrids are a technological solution to this problem. Unlike genetically modified (GM) crops, these hybrids were developed in a process called mutation breeding – where scientists breed crops to preserve certain natural mutations. The process is based on an enzyme called acetolactate synthase (ALS), which is essential for plant growth. Normal mustard plants are killed by IMI herbicides because the herbicides inhibit ALS.

In the new IMI-resistant hybrids, a single change in the plant's DNA rendered the ALS enzyme resistant to the herbicide, freeing farmers to spray IMI herbicides directly over the field, killing only the weeds. This strategy is particularly effective against Orobanche because, as the herbicide moves through the soil and the plant, it strikes the parasite where manual weeding can't reach.

Farmers have welcomed these hybrids because they don't increase the demand for labour exactly when it might be unavailable, especially in the narrow window when weeding is necessary, and the research community because it protects oilseeds.

However, some experts have urged caution over their long-term use. In a commentary recently published in the journal *Current Science*, Deepak Pental, a leading geneticist at the University of Delhi, acknowledged the immediate benefits but also said the technology must be managed with care to prevent the weeds from evolving their own resistance.

Prof. Pental explained that if farmers rely on only one type of herbicide year after year, the "strong directional selection" will lead to "the emergence of resistant or less susceptible weed populations, the erosion of herbicide efficacy, and ultimately the strategic failure of the production system built around that chemistry".

To that end, he wrote that the introduction of these new crops should not be viewed as a simple trade-off, where chemicals merely replace manual labour, but as a "challenge" that requires a variety of weed-control methods. Specifically, for the technology to remain viable for more than a few years, it must be part of a broader, more diverse farming strategy that includes rotating crops, using different types of herbicides with various modes of action, and continuing to use manual weeding to remove any weeds that survive the chemical spray. "A single herbicide mode of action cannot be the foundation of a sustainable weed management strategy in any agriculture," Prof. Pental wrote.

As India rolls out IMI-resistant mustard this season, the new challenge for the agricultural enterprise will be to ensure these powerful new tools become part of a "durable, and evolutionarily informed" programme rather than a quick fix.

09J6. New mustard hybrids need diverse farming plans
नई संकर सरसों किस्मों के लिए विविध कृषि योजनाओं की आवश्यकता है।

- **In the 2026-27 rabi sowing season, from October to April, Indian farmers are set to begin the wide-scale cultivation of imidazolinone-resistant (IMI-resistant) mustard hybrids.**

वर्ष 2026-27 के रबी बुवाई मौसम में, अक्टूबर से अप्रैल के दौरान, भारतीय किसान इमिडाज़ोलिनोन-प्रतिरोधी सरसों संकरों की व्यापक स्तर पर खेती प्रारम्भ करने वाले हैं।

- These hybrids are designed to overcome a parasitic weed called **Orobanche**, a major hurdle in oilseed production.

इन संकरों को **ओरोबैंकी** नामक परजीवी खरपतवार से निपटने के लिए विकसित किया गया है, जो तिलहन उत्पादन में एक प्रमुख बाधा है।

- India has long grappled with an **edible oils deficit**.

भारत लंबे समय से **खाद्य तेलों की कमी** की समस्या से जूझ रहा है।

- In 2024-25, the country imported around **16 million tonnes** at about **₹1.6 lakh crore**.

वर्ष 2024-25 में देश ने लगभग **1.6 करोड़ टन** खाद्य तेल का आयात लगभग **1.6 लाख करोड़ रुपये** की लागत से किया।

- **Mustard** is the most vital oilseed crop to meet this demand, especially in the arid environments of North India.

इस मांग को पूरा करने के लिए **सरसों** सबसे महत्वपूर्ण तिलहन फसल है, विशेषकर उत्तर भारत के शुष्क क्षेत्रों में।

- However, its yields have been suppressed throughout the year by **Orobanche**, a destructive root parasite that attaches to the mustard plant and drains it of water and nutrients.

हालाँकि, इसकी उपज पूरे वर्ष **ओरोबैंकी** नामक विनाशकारी जड़-परजीवी द्वारा प्रभावित होती रही है, जो सरसों के पौधे से चिपककर उसका जल और पोषक तत्व चूस लेता है।

- (It has more recently been called **Phelipanche**.)
  (हाल के वर्षों में इसे **फेलिपैंकी** भी कहा जाने लगा है।)
- The new **IMI-resistant hybrids** are a technological solution to this problem.
  नए **आईएमआई-प्रतिरोधी संकर** इस समस्या का एक तकनीकी समाधान हैं।
- Unlike **genetically modified crops**, these hybrids were developed in a process called **mutation breeding** — where scientists breed crops to preserve certain natural mutations.
  आनुवंशिक रूप से संशोधित फसलों के विपरीत, इन संकरों को **उत्परिवर्तन प्रजनन** नामक प्रक्रिया द्वारा विकसित किया गया है, जिसमें वैज्ञानिक कुछ प्राकृतिक उत्परिवर्तनों को संरक्षित रखते हुए फसलों का प्रजनन करते हैं।
- The process is based on an enzyme called **acetolactate synthase (ALS)**, which is essential for plant growth.
  यह प्रक्रिया **एसीटोलैक्टेट सिंथेज़** नामक एंज़ाइम पर आधारित है, जो पौधों की वृद्धि के लिए अत्यंत आवश्यक है।
- Normal mustard plants are killed by **IMI herbicides** because the herbicides inhibit ALS.
  सामान्य सरसों के पौधे **आईएमआई शाकनाशियों** से नष्ट हो जाते हैं क्योंकि ये शाकनाशी एसीटोलैक्टेट सिंथेज़ की क्रिया को रोक देते हैं।
- In the new **IMI-resistant hybrids**, a single change in the plant's DNA rendered the ALS enzyme resistant to the herbicide, freeing farmers to spray IMI herbicides directly over the field, killing only the weeds.
  नए **आईएमआई-प्रतिरोधी संकरों** में पौधे के डीएनए में एक परिवर्तन ने एसीटोलैक्टेट सिंथेज़ एंज़ाइम को शाकनाशी के प्रति प्रतिरोधी बना दिया है, जिससे किसान खेत में सीधे आईएमआई शाकनाशी का छिड़काव कर सकते हैं और केवल खरपतवार नष्ट होते हैं।
- This strategy is particularly effective against **Orobanche** because, as the herbicide moves through the soil and the plant, it strikes the parasite where manual weeding can't reach.
  यह रणनीति विशेष रूप से **ओरोबैंकी** के विरुद्ध प्रभावी है क्योंकि शाकनाशी मिट्टी और पौधे के भीतर संचरित होकर उस परजीवी तक पहुँचता है जहाँ हाथ से निराई संभव नहीं होती।
- In a commentary recently published in the journal **Current Science**, **Deepak Pental**, a leading geneticist at the University of Delhi, acknowledged the immediate benefits but also said the technology must be managed with care to prevent the weeds from evolving their own resistance.
  हाल ही में पत्रिका **करेंट साइंस** में प्रकाशित एक टिप्पणी में **दीपक पेंटल**, जो दिल्ली विश्वविद्यालय के एक प्रमुख आनुवंशिकीविद् हैं, ने इसके तात्कालिक लाभों को स्वीकार किया, किंतु यह भी कहा कि खरपतवारों में प्रतिरोधक क्षमता विकसित होने से रोकने के लिए इस तकनीक का सावधानीपूर्वक प्रबंधन आवश्यक है।
- Prof. Pental explained that if farmers rely on only one type of herbicide year after year, the **strong directional selection** will lead to the emergence of resistant or less susceptible weed populations, the erosion of herbicide efficacy, and ultimately the strategic failure of the production system built around that chemistry.
  प्रोफेसर पेंटल ने स्पष्ट किया कि यदि किसान वर्ष दर वर्ष केवल एक प्रकार के शाकनाशी पर निर्भर रहेंगे, तो **प्रबल दिशात्मक चयन** के कारण प्रतिरोधी अथवा कम संवेदनशील खरपतवार आबादियाँ विकसित होंगी, शाकनाशी की प्रभावशीलता घटेगी और अंततः उस रासायनिक व्यवस्था पर आधारित उत्पादन प्रणाली विफल हो जाएगी।
- Specifically, for the technology to remain viable for more than a few years, it must be part of a broader, more diverse farming strategy that includes rotating crops, using different types of herbicides with various modes of action, and continuing to use manual weeding to remove any weeds that survive the chemical spray.
  विशेष रूप से, यदि इस तकनीक को कुछ वर्षों से अधिक समय तक प्रभावी बनाए रखना है, तो इसे एक व्यापक

और विविध कृषि रणनीति का हिस्सा बनाना होगा, जिसमें फसल चक्र अपनाना, विभिन्न कार्यविधियों वाले अलग-अलग शाकनाशियों का उपयोग करना तथा रासायनिक छिड़काव से बच जाने वाले खरपतवारों को हाथ से हटाना शामिल हो।

- "A single herbicide mode of action cannot be the foundation of a sustainable weed management strategy in any agriculture," Prof. Pental wrote.
"किसी भी कृषि प्रणाली में एकमात्र शाकनाशी कार्यविधि टिकाऊ खरपतवार प्रबंधन रणनीति का आधार नहीं बन सकती," प्रोफेसर पेंटल ने लिखा।

GS Paper III: Internal Security	09 June 2026

India expanded its nuclear arsenal in 2025, says SIPRI

GS III: Internal Security: Defence

The Hindu Bureau
NEW DELHI

India is estimated to have modestly expanded its nuclear arsenal in 2025 and continued developing new nuclear delivery systems, according to the Stockholm International Peace Research Institute (SIPRI) Yearbook 2026 released on Monday.

The report estimated that India's nuclear stockpile had increased to around 190 warheads by early 2026. The country had around 180 such warheads in 2025.

SIPRI noted that New Delhi's ongoing nuclear modernisation programme is increasingly focused on developing longer-range weapons capable of reaching targets across China, while continuing to address security concerns arising from its long-standing rivalry with Pakistan.

The annual assessment of global armaments, disarmament and international security also highlighted the May 2025 India-Pakistan military confrontation, describing

The report estimates India's military expenditure at $92.1 billion, an increase of 8.9% from last year

Operation Sindoor as an "unusually severe military crisis" between the two nuclear-armed neighbours.

According to SIPRI, India carried out strikes during the conflict against Pakistani air and missile bases that were likely to have nuclear-related roles. However, the institute observed that both countries took measures to prevent further escalation despite heightened tensions.

The report further noted that India and Pakistan integrated cyberoperations into active military conflict for the first time during the crisis, underscoring the evolving nature of modern warfare and deterrence in South Asia.

Beyond the nuclear domain, India retained its position as the world's fifth-largest military spender in 2025. SIPRI estimated India's military expenditure at $92.1 billion, an increase of 8.9% over the previous year. The country ranked behind only the United States, China, Russia and Germany in defence spending.

India also remained the world's second-largest importer of major arms during the 2021-25 period, accounting for 8.2% of global arms imports. SIPRI identified Ukraine, India, Saudi Arabia, Qatar, and Pakistan as the five largest arms importers, collectively accounting for 35% of global imports during the period.

Modernising arsenals

The report said all nine nuclear-armed states – the United States, Russia, the United Kingdom, France, China, India, Pakistan, North Korea, and Israel – continued to modernise their arsenals and increasingly relied on nuclear weapons as instruments of national power. Globally, the nine countries possessed an estimated 12,187 nuclear warheads at the start of 2026, of which around 9,745 were held in military stockpiles for potential use.

09J6. India expanded its nuclear arsenal in 2025, says SIPRI

सिप्री (SIPRI) के अनुसार, भारत ने 2025 में अपने परमाणु शस्त्रागार का विस्तार किया

- India is estimated to have modestly expanded its **nuclear arsenal** in 2025 and continued developing new **nuclear delivery systems**, according to the **Stockholm International Peace Research Institute (SIPRI) Yearbook 2026** released on Monday.

सोमवार को जारी **स्टॉकहोम अंतरराष्ट्रीय शांति अनुसंधान संस्थान (सिप्री) वर्षपुस्तिका 2026** के अनुसार, भारत ने वर्ष 2025 में अपने **परमाणु शस्त्रागार** का सीमित विस्तार किया तथा नए **परमाणु प्रक्षेपण प्रणालियों** के विकास को जारी रखा।

- The report estimated that India's nuclear stockpile had increased to around **190 warheads** by early 2026.

रिपोर्ट के अनुसार, वर्ष 2026 की शुरुआत तक भारत के परमाणु भंडार में लगभग **190 परमाणु वारहेड** हो गए थे।

- The country had around **180 warheads** in 2025.
  वर्ष 2025 में भारत के पास लगभग **180 परमाणु वारहेड** थे।
- SIPRI noted that New Delhi's ongoing **nuclear modernisation programme** is increasingly focused on developing longer-range weapons capable of reaching targets across China, while continuing to address security concerns arising from its long-standing rivalry with Pakistan.
  सिप्री ने उल्लेख किया कि नई दिल्ली का जारी **परमाणु आधुनिकीकरण कार्यक्रम** अब ऐसे लंबी दूरी के हथियारों के विकास पर अधिक केंद्रित है जो चीन के विभिन्न लक्ष्यों तक पहुँच सकें, जबकि पाकिस्तान के साथ दीर्घकालिक प्रतिद्वंद्विता से उत्पन्न सुरक्षा चिंताओं का समाधान भी जारी है।
- Beyond the nuclear domain, India retained its position as the **world's fifth-largest military spender** in 2025.
  परमाणु क्षेत्र से परे, भारत ने वर्ष 2025 में **विश्व के पाँचवें सबसे बड़े रक्षा व्यय करने वाले देश** के रूप में अपनी स्थिति बनाए रखी।
- SIPRI estimated India's military expenditure at **92.1 billion अमेरिकी डॉलर**, an increase of **8.9%** over the previous year.
  सिप्री ने भारत का रक्षा व्यय **92.1 अरब अमेरिकी डॉलर** आँका, जो पिछले वर्ष की तुलना में **8.9 प्रतिशत** अधिक है।
- The country ranked behind only the **United States, China, Russia and Germany** in defence spending.
  रक्षा व्यय के मामले में भारत केवल **संयुक्त राज्य अमेरिका, चीन, रूस और जर्मनी** से पीछे रहा।
- India also remained the **world's second-largest importer of major arms** during the **2021-25 period**, accounting for **8.2% of global arms imports**.
  भारत **2021-25** की अवधि में **विश्व का दूसरा सबसे बड़ा प्रमुख हथियार आयातक** भी बना रहा, जिसकी वैश्विक हथियार आयात में **8.2 प्रतिशत** हिस्सेदारी रही।
- SIPRI identified **Ukraine, India, Saudi Arabia, Qatar, and Pakistan** as the five largest arms importers, collectively accounting for **35% of global imports** during the period.
  सिप्री ने **यूक्रेन, भारत, सऊदी अरब, कतर और पाकिस्तान** को पाँच सबसे बड़े हथियार आयातकों के रूप में चिन्हित किया, जिनकी संयुक्त हिस्सेदारी इस अवधि में वैश्विक आयात का **35 प्रतिशत** रही।

Modernising arsenals
परमाणु शस्त्रागारों का आधुनिकीकरण

- The report said all **nine nuclear-armed states** — the **United States, Russia, the United Kingdom, France, China, India, Pakistan, North Korea, and Israel** — continued to modernise their arsenals and increasingly relied on nuclear weapons as instruments of national power.
  रिपोर्ट के अनुसार, सभी **नौ परमाणु-सशस्त्र राष्ट्र** — **संयुक्त राज्य अमेरिका, रूस, यूनाइटेड किंगडम, फ्रांस, चीन, भारत, पाकिस्तान, उत्तर कोरिया और इज़राइल** — अपने शस्त्रागारों का आधुनिकीकरण जारी रखे हुए हैं तथा राष्ट्रीय शक्ति के साधन के रूप में परमाणु हथियारों पर उनकी निर्भरता बढ़ रही है।
- Globally, the nine countries possessed an estimated **12,187 nuclear warheads** at the start of 2026.
  वैश्विक स्तर पर वर्ष 2026 की शुरुआत में इन नौ देशों के पास अनुमानतः **12,187 परमाणु वारहेड** मौजूद थे।

- Of these, around **9,745 warheads** were held in military stockpiles for potential use.
  इनमें से लगभग **9,745 परमाणु वारहेड** संभावित उपयोग के लिए सैन्य भंडारों में रखे गए थे।

Nicobar project will enhance maritime security: officials

GS III: Internal Security: Defence

Saurabh Trivedi
NEW DELHI

Under the Great Nicobar Island Development Project, India plans to invest around ₹13,000 crore to build a dual-use airport and runway for both civilian and Navy operations, said a senior official with the Ministry of Defence on Monday.

According to sources in the Ministry, the project, expected to be completed within five years, will be jointly funded by the Ministry along with the Ministry of Civil Aviation. The government views the initiative as a strategic investment aimed at strengthening maritime security, boosting regional connectivity and enhancing India's presence in the Indo-Pacific region.

Four components

Elaborating about the project, the official said the project comprises four major components – an International Container Transshipment Port (ICTP), a joint-user greenfield airport and Naval Air Station, a modern township, and a power plant. Together, these projects are expected to transform Great Nicobar into a key maritime and economic hub while enhancing India's defence capabilities in the strategically significant Indian Ocean Region (IOR).

Located just 40 km from the Six Degree Channel, one of the world's busiest sea trade routes connecting the Gulf of Aden and the Malacca Strait, Great Nicobar occupies a critical position along global shipping lanes. Government officials said the project would reduce India's dependence on foreign transshipment ports and strengthen its ability to monitor and secure vital Sea Lanes of Communication.

The project comprises a port, airport, and power plant. AFP

The proposed greenfield airport, approved by the Union Cabinet and to be operated by the Indian Navy, is expected to significantly improve maritime domain awareness, logistics support, and rapid deployment capabilities. The airport is also expected to promote tourism, officials said. It is understood that five sites, including INS Baaz at Campbell Bay, were assessed before Galathea Bay was selected for the airport. Technical constraints, limited expansion possibilities, and environmental concerns reportedly made the expansion of INS Baaz unviable.

Extensive studies

Addressing concerns over environmental impact and tribal rights, officials said the project has undergone extensive environmental assessments involving institutions such as the Zoological Survey of India, Wildlife Institute of India and the Salim Ali Centre for Ornithology and Natural History. Of the island's total area, only 166.1 square kilometres have been earmarked for development, while more than 81% will continue to remain under forests, biosphere reserves, national parks and tribal conservation zones.

A dedicated conservation package worth ₹2,220 crore over 30 years has been planned to protect wildlife, including leatherback turtles, Nicobar megapodes and crocodiles, as well as coral reefs and mangrove ecosystems. The official confirmed that that no physical displacement of tribal communities is proposed and that consultations were conducted with tribal welfare authorities and representative bodies.

Besides strategic gains, the project is expected to generate over one lakh direct and indirect employment opportunities, providing a significant economic boost to the island region.

09J6. Nicobar project will enhance maritime security: officials
अधिकारियों के अनुसार, निकोबार परियोजना समुद्री सुरक्षा को सुदृढ़ करेगी

- **Great Nicobar Island Development Project: Strategic airport and maritime hub planned**
  ग्रेट निकोबार द्वीप विकास परियोजना: सामरिक हवाई अड्डा और समुद्री केंद्र की योजना
- Under the **Great Nicobar Island Development Project**, India plans to invest around **₹13,000 crore** to build a **dual-use airport and runway** for both civilian and Navy operations, said a senior official with the **Ministry of Defence** on Monday.
  ग्रेट निकोबार द्वीप विकास परियोजना के अंतर्गत भारत नागरिक और नौसेना दोनों प्रकार के संचालन हेतु **द्वि-उपयोगी हवाई अड्डा और रनवे** के निर्माण के लिए लगभग **13,000 करोड़ रुपये** का निवेश करने की योजना बना रहा है, यह जानकारी सोमवार को **रक्षा मंत्रालय** के एक वरिष्ठ अधिकारी ने दी।
- According to sources in the Ministry, the project, expected to be completed within **five years**, will be jointly funded by the Ministry along with the **Ministry of Civil Aviation**.
  मंत्रालय के सूत्रों के अनुसार, यह परियोजना, जिसके **पाँच वर्षों** में पूरण होने की अपेक्षा है, रक्षा मंत्रालय तथा **नागरिक उड्डयन मंत्रालय** द्वारा संयुक्त रूप से वित्तपोषित की जाएगी।
- The government views the initiative as a strategic investment aimed at strengthening **maritime security**, boosting regional connectivity and enhancing India's presence in the **Indo-Pacific region**.
  सरकार इस पहल को **समुद्री सुरक्षा** सुदृढ़ करने, क्षेत्रीय संपर्क बढ़ाने तथा **हिंद-प्रशांत क्षेत्र** में भारत की उपस्थिति को मजबूत करने के उद्देश्य से एक सामरिक निवेश के रूप में देखती है।

Four components
चार प्रमुख घटक

- Elaborating about the project, the official said the project comprises **four major components** — an **International Container Transshipment Port (ICTP)**, a **joint-user greenfield airport and Naval Air Station**, a **modern township**, and a **power plant**.
  परियोजना के बारे में विस्तार से बताते हुए अधिकारी ने कहा कि इसमें **चार प्रमुख घटक** शामिल हैं — एक **अंतरराष्ट्रीय कंटेनर ट्रांसशिपमेंट बंदरगाह**, एक **संयुक्त उपयोग वाला ग्रीनफील्ड हवाई अड्डा एवं नौसैनिक वायु स्टेशन**, एक **आधुनिक टाउनशिप** तथा एक **विद्युत संयंत्र**।
- Together, these projects are expected to transform **Great Nicobar** into a key maritime and economic hub while enhancing India's defence capabilities in the strategically significant

Indian Ocean Region (IOR).

इन सभी परियोजनाओं के संयुक्त प्रभाव से **ग्रेट निकोबार** को एक महत्वपूर्ण समुद्री एवं आर्थिक केंद्र में परिवर्तित करने तथा सामरिक दृष्टि से महत्वपूर्ण **हिंद महासागर क्षेत्र** में भारत की रक्षा क्षमताओं को सुदृढ़ करने की अपेक्षा है।

- Located just **40 km from the Six Degree Channel**, one of the world's busiest sea trade routes connecting the **Gulf of Aden** and the **Malacca Strait**, Great Nicobar occupies a critical position along global shipping lanes.
  सिक्स डिग्री चैनल से मात्र **40 किलोमीटर** की दूरी पर स्थित ग्रेट निकोबार, जो **अदन की खाड़ी** और **मलक्का जलडमरूमध्य** को जोड़ने वाले विश्व के सबसे व्यस्त समुद्री व्यापार मार्गों में से एक है, वैश्विक नौवहन मार्गों पर अत्यंत महत्वपूर्ण स्थान रखता है।
- Government officials said the project would reduce India's dependence on foreign transshipment ports and strengthen its ability to monitor and secure vital **Sea Lanes of Communication**.
  सरकारी अधिकारियों ने कहा कि यह परियोजना विदेशी ट्रांसशिपमेंट बंदरगाहों पर भारत की निर्भरता कम करेगी तथा महत्वपूर्ण **समुद्री संचार मार्गों** की निगरानी और सुरक्षा क्षमता को सुदृढ़ करेगी।
- The proposed **greenfield airport**, approved by the **Union Cabinet** and to be operated by the **Indian Navy**, is expected to significantly improve maritime domain awareness, logistics support, and rapid deployment capabilities.
  प्रस्तावित **ग्रीनफील्ड हवाई अड्डा**, जिसे **केंद्रीय मंत्रिमंडल** की स्वीकृति प्राप्त है और जिसका संचालन **भारतीय नौसेना** द्वारा किया जाएगा, समुद्री क्षेत्रीय जागरूकता, रसद सहायता तथा त्वरित तैनाती क्षमताओं में उल्लेखनीय सुधार लाने की अपेक्षा रखता है।
- The airport is also expected to promote tourism, officials said.
  अधिकारियों के अनुसार, यह हवाई अड्डा पर्यटन को भी बढ़ावा देगा।
- It is understood that **five sites**, including **INS Baaz at Campbell Bay**, were assessed before **Galathea Bay** was selected for the airport.
  यह जानकारी मिली है कि हवाई अड्डे के लिए **गैलेथिया खाड़ी** का चयन करने से पहले **कैम्पबेल बे स्थित आईएनएस बाज़** सहित **पाँच स्थलों** का मूल्यांकन किया गया था।
- Technical constraints, limited expansion possibilities, and environmental concerns reportedly made the expansion of **INS Baaz** unviable.
  तकनीकी सीमाएँ, विस्तार की सीमित संभावनाएँ तथा पर्यावरणीय चिंताओं के कारण **आईएनएस बाज़** का विस्तार व्यवहार्य नहीं माना गया।

Extensive studies
व्यापक अध्ययन

- Addressing concerns over environmental impact and tribal rights, officials said the project has undergone extensive environmental assessments involving institutions such as the **Zoological Survey of India**, **Wildlife Institute of India** and the **Salim Ali Centre for Ornithology and Natural History**.
  पर्यावरणीय प्रभाव और जनजातीय अधिकारों से संबंधित चिंताओं पर प्रतिक्रिया देते हुए अधिकारियों ने कहा कि इस परियोजना का व्यापक पर्यावरणीय मूल्यांकन किया गया है, जिसमें **भारतीय प्राणी सर्वेक्षण**, **भारतीय वन्यजीव संस्थान** तथा **सलीम अली पक्षिविज्ञान एवं प्राकृतिक इतिहास केंद्र** जैसी संस्थाएँ शामिल थीं।
- Of the island's total area, only **166.1 square kilometres** have been earmarked for development, while more than **81%** will continue to remain under forests, biosphere reserves, national parks and tribal conservation zones.
  द्वीप के कुल क्षेत्रफल में से केवल **166.1 वर्ग किलोमीटर** क्षेत्र विकास के लिए निर्धारित किया गया है, जबकि **81 प्रतिशत से अधिक** क्षेत्र वन, जैवमंडल आरक्षित क्षेत्र, राष्ट्रीय उद्यान और जनजातीय संरक्षण क्षेत्रों के अंतर्गत बना रहेगा।

Modi congratulates Major Abhilasha Barak on UN Award

Prime Minister Narendra Modi on Sunday congratulated Major Abhilasha Barak on being conferred the UN Military Gender Advocate of the Year Award and said the honour is a recognition of her exemplary service and also of India's longstanding contribution to the United Nations peacekeeping efforts. Major Barak, currently serving with the United Nations mission in Lebanon, has been honoured with the award for her outreach efforts with women and girls during her deployment in the West Asian nation. She is also the first woman combat helicopter pilot of the Indian Army. PTI

08J6. Modi congratulates Major Abhilasha Barak on UN Award

मोदी ने मेजर अभिलाषा बराक को संयुक्त राष्ट्र पुरस्कार मिलने पर बधाई दी

- Prime Minister **Narendra Modi** on Sunday congratulated **Major Abhilasha Barak** on being conferred the **UN Military Gender Advocate of the Year Award** and said the honour is a recognition of her exemplary service and also of India's longstanding contribution to the **United Nations peacekeeping efforts**.

रविवार को प्रधानमंत्री **नरेंद्र मोदी** ने **मेजर अभिलाषा बराक** को **यूएन मिलिट्री जेंडर एडवोकेट ऑफ द ईयर अवार्ड** से सम्मानित किए जाने पर बधाई दी और कहा कि यह सम्मान उनकी उत्कृष्ट सेवा तथा **संयुक्त राष्ट्र शांति स्थापना प्रयासों** में भारत के दीर्घकालिक योगदान की भी मान्यता है।

- Major Barak, currently serving with the **United Nations mission in Lebanon**, has been honoured with the award for her **outreach efforts** with women and girls during her deployment in the **West Asian nation**.

मेजर बराक, जो वर्तमान में **लेबनान में संयुक्त राष्ट्र मिशन** के साथ सेवा दे रही हैं, को **पश्चिम एशियाई देश** में अपनी तैनाती के दौरान महिलाओं और लड़कियों के साथ किए गए **जनसंपर्क प्रयासों** के लिए इस पुरस्कार से सम्मानित किया गया है।

- She is also the **first woman combat helicopter pilot of the Indian Army**.

वह **भारतीय सेना की पहली महिला कॉम्बैट हेलीकॉप्टर पायलट** भी हैं।

Questions and Answers to the previous day's daily quiz: 1. What was the name of the World Cup before it was changed to the FIFA World Cup Trophy since 1974? **Ans: Jules Rimet trophy**
2. Who scored the first-ever goal in World Cup Football history? **Ans: Lucien Laurent of France**
3. Which country has taken part in all 22 editions of the Football World Cup held so far? **Ans: Brazil**
4. Which country has the dubious distinction of having played the World Cup final the most times yet still to win it on a single occasion? **Ans: Netherlands (3) – 1974, 1978 & 2010**
5. Which country has reached the semi-finals the most times in World Cup history? **Ans: Germany (12 times – played as West Germany before unification)**
Visual: Identify this player who holds a unique record in World Cup history of having played in three consecutive finals? **Ans: Cafu, Brazil (1994-2002)**
Early Birds: Prem Raj P. | Sadhan Panda | Prem Nath Tiwari | Keshav Raturi | Pulkit Sathe

08J6. QUIZ

1. What was the name of the World Cup before it was changed to the FIFA World Cup Trophy since 1974?

Answer: Jules Rimet Trophy

- The original FIFA World Cup trophy was known as the **Jules Rimet Trophy**, named after **Jules Rimet**, the former FIFA President who played a key role in establishing the FIFA World Cup in 1930. Initially called "Victory," it was renamed in his honour in 1946.
- The trophy was awarded from **1930 to 1970**. After **Brazil won the World Cup for the third time in 1970**, it received permanent ownership of the trophy. Consequently, FIFA introduced the **FIFA World Cup Trophy** in **1974**, which continues to be awarded today.

2. Who scored the first-ever goal in World Cup Football history?

- The distinction of scoring the **first goal in FIFA World Cup history** belongs to **Lucien Laurent** of France. He achieved this landmark feat on **13 July 1930** during the inaugural FIFA World Cup held in **Uruguay**.
- Laurent scored against **Mexico** in the match played at **Estadio Pocitos, Montevideo**.
- France eventually won the game 4–1. His goal marked the beginning of World Cup scoring history and secured his place in football folklore as the first-ever World Cup goalscorer.

3. Which country has taken part in all editions of the FIFA World Cup held so far?

Answer: Brazil

- **Brazil** is the only nation to have participated in **every FIFA World Cup tournament** since the competition began in **1930**. As of the latest completed edition (**2022 FIFA World Cup**), Brazil has appeared in all **22 editions** of the tournament.
- The country is also the most successful team in World Cup history, having won the title **five times** (1958, 1962, 1970, 1994, and 2002).

4. Which country has played the World Cup final the most times without ever winning it?

Answer: Netherlands

- The **Netherlands** holds the unfortunate record of reaching the FIFA World Cup final the most times without winning the tournament.
- The Dutch team finished as runners-up on **three occasions** — in **1974**, **1978**, and **2010**. In 1974 they lost to **West Germany**, in 1978 to **Argentina**, and in 2010 to **Spain** after extra time.

5. Which country has reached the semi-finals the most times in World Cup history?

Answer: Germany

- **Germany** holds the record for the highest number of **FIFA World Cup semi-final appearances**.

- Including appearances as **West Germany** before reunification and as unified Germany thereafter, the nation has reached the semi-finals **13 times** (updated after the 2022 World Cup cycle).
- Germany's remarkable consistency has also translated into **four World Cup titles** (1954, 1974, 1990, and 2014) and multiple runner-up finishes.

A targeting in the name of demography

GS I: Society GS III: Economy

C. Rammanohar Reddy
Writer based in Hyderabad

India is on the cusp of a demographic upheaval. Fertility rates across the country have been falling for decades and are now on or below replacement levels. We will soon have to shift from the challenges of finding jobs for the youth bulge to preparing to care for an ageing population.

You would not think so looking at the Terms of Reference (ToRs) of the High-Level Committee on Demographic Change that the government constituted at the end of May. The ToRs are peppered with the need to address "illegal immigration" and border management. Home Minister Amit Shah said on the social media site X while announcing the formation of the committee that "Illegal infiltration and other reasons leading to Unnatural Demographic Change is a very big challenge for the present and future of any nation." It is no wonder that the committee does not have a single demographer to guide its work. Its chairperson is a retired Supreme Court of India judge; it has a retired IAS officer and a retired IPS officer, the Census Commissioner and an economist.

The infiltration narrative expands

Using strong words about "infiltrators", the Prime Minister had announced the need for such a committee from the ramparts of Red Fort on August 15, 2025. Indeed, this was the culmination of years of building a mythology that undocumented (Muslim) migrants from Bangladesh are swamping the districts on the border, spreading across the country and influencing electoral outcomes. It was way back in 2018 that Amit Shah, then Bharatiya Janata Party (BJP) President, said that Bangladeshi migrants were termites. The mythology about hordes of immigrants has seeped into the citizen's consciousness and has served well the electoral purposes of the BJP.

It has worked very well in Assam during a couple of election cycles, and it was stunningly effective in West Bengal during the recent elections where the need to deal with "infiltration" was a central feature of the BJP campaign. It is perhaps time now to make it a nation-wide campaign aided by the recommendations of the Demographic Change Committee.

Given how the issue has been highlighted and framed, we can have a fair idea of what the recommendations of this committee will be. It is still important to understand why this has little to do with demographic challenges and is all about moving to the next stage of the "Othering" of India's minorities, especially Muslims.

To begin with, what is the evidence of large-scale undocumented immigration from Bangladesh? It is revealing that the only kind of official evidence we have so far of "demographic change" (i.e., immigration from Bangladesh affecting population size and composition) are observations by the Home Minister of large increases in the population of a few of the border districts. Highlighting such increases without reference to domestic migration or differential fertility behaviour among communities is not proof of undocumented immigration. It is instructive that studies that had been done by official agencies showing evidence of demographic change in the border districts were removed without explanation, according to a report in this daily ("Government proposal in 2024 for a panel on 'demographic challenges' never took off", August 16, 2025). We can only presume that they were deleted because they did not stand scrutiny.

The Demographic Change Committee may become a platform to institutionalise the targeting of minorities

This is not about undocumented migration

For decades there has indeed been cross-border migration between India and Bangladesh across what is an integrated riverine ecology. But given the economic transformation that has taken place in Bangladesh in recent decades, it would be hard to argue for economic distress driving large-scale migration from Bangladesh to India. India's neighbour is no "basket case" as it was derisively described decades ago.

According to World Bank data, Bangladesh's per capita income (in nominal dollar terms) grew faster than India during 2005-23 (10.4% versus 7.70% compound annual growth rate); it now has roughly the same income as India's. In purchasing power parity terms, India's growth is slightly higher. Both countries presently have roughly the same per capita income however measured, and both now have the same levels of human development, according to the UNDP's Human Development Index. But the change in Bangladesh has been much faster. Why then would there be migration to India of a scale that there should be talk of being swamped? There would certainly remain pockets of distress forcing the poor to consider migrating to India and the more skilled to West Asia. But we cannot find economic evidence to suggest waves of Bangladeshis being pushed by distress to migrate to India, ending up affecting jobs and electoral outcomes here.

Of course, all this is not about undocumented migration. All this is really a code for the place of Muslims in India and an acceleration of the social, economic and political discrimination of this community of Indian citizens that has taken place over the past 12 years. And here the government has given a more dangerous diktat to the committee. Item (iv) reads "to analyse structural population changes at the level of religious or social communities, particularly where they deviate from broader trends". This in particular is about the fertility behaviour of Muslims and "where they deviate from broader trends".

For a century now, the Hindutva campaign has whipped up fears of Muslims overtaking Hindus in population.

This is now firmly impregnated in the minds of Hindus of all ages, classes, castes and regions. It is to be found in everyday social conversations, on social media of course, and it is expressed in less than thinly veiled terms during electoral campaigns.

When facts are ignored

It is tiresome to repeat the facts, but one has to, even when confronted by a wall of disinformation and prejudice. Yes, the share of Muslims in India's population has risen from 10% in 1951 to 14% in 2011, at the time of the last Census. Yes, in the past, the Muslim community on a whole has shown a higher fertility than the Hindus and other religious denominations. This has been on account of its poorer economic status, lower education of women and perhaps even religious beliefs. However, fertility among Muslim women has begun falling rapidly, with the result that the gap between Muslims and Hindus has narrowed and will soon disappear. On the desired number of children that women want to have, there is now almost no difference between Hindus and Muslims. So much for Muslims now having more children than Hindus. And to repeat what is well-known, the best example of why religion is not the determinant of fertility behaviour: Muslim women in Tamil Nadu, Kerala and Jammu and Kashmir exhibit lower fertility than the Hindu women of Bihar and Uttar Pradesh. Poverty and education matter more. This is the deviation that needs to be addressed, not fertility behaviour according to religion.

To speak then about Muslim fertility "deviating from broad trends", as one of the ToRs of the committee indicates, is to ignore the facts on the ground and fall back on familiar tropes about the behaviour of this minority, giving official validation of age-old misinformation.

We cannot escape from the realisation that this committee is being asked to recommend steps to target minorities under the cover of checking undocumented migration. After all, we have already become an inhumane society where, according to reliable reports, government agencies have flown Rohingya refugees from Delhi to the Andamans and then pushed them into the sea with life jackets. So when the Demographic Change Committee is asked "to recommend a streamlined and permanent operational mechanism for the legal, fair, and time-bound identification, detention, and deportation of illegal immigrants already residing in the country", there is a chilling similarity between the language of this "permanent operational mechanism" and the "Final Solution" practised in 1940s Europe.

We should not say we have not been forewarned.

08J6.A targeting in the name of demography
जनसांख्यिकी के नाम पर लक्षित कार्रवाई

- It is no wonder that the committee does not have a single **demographer** to guide its work.
  यह आश्चर्य की बात नहीं है कि समिति के कार्य का मार्गदर्शन करने के लिए उसमें एक भी **जनसांख्यिकी विशेषज्ञ** नहीं है।
- Its chairperson is a retired **Supreme Court of India** judge; it has a retired **IAS officer** and a retired **IPS officer**, the **Census Commissioner** and an **economist**.
  इसके अध्यक्ष **भारत के सर्वोच्च न्यायालय** के एक सेवानिवृत्त न्यायाधीश हैं; समिति में एक सेवानिवृत्त **आईएएस अधिकारी**, एक सेवानिवृत्त **आईपीएस अधिकारी**, **जनगणना आयुक्त** तथा एक **अर्थशास्त्री** शामिल हैं
- According to **World Bank** data, **Bangladesh's per capita income** (in nominal dollar terms) grew faster than **India** during **2005-23** (**10.4%** versus **7.70%** **compound annual growth rate**); it now has roughly the same income as India's.

विश्व बैंक के आंकड़ों के अनुसार, **2005-23** के दौरान **बांग्लादेश की प्रति व्यक्ति आय** (सांकेतिक डॉलर के आधार पर) **भारत** की तुलना में अधिक तेज़ी से बढ़ी (**10.4%** बनाम **7.70% चक्रवृद्धि वार्षिक वृद्धि दर**); अब उसकी आय लगभग भारत के समान है।

- In **purchasing power parity** terms, India's growth is slightly higher.
  क्रय शक्ति समता (PPP) के आधार पर भारत की वृद्धि दर थोड़ी अधिक है।
- Both countries presently have roughly the same **per capita income** however measured, and both now have the same levels of **human development**, according to the **UNDP's Human Development Index**.
  मापन की किसी भी पद्धति से देखें, वर्तमान में दोनों देशों की **प्रति व्यक्ति आय** लगभग समान है, और **यूएनडीपी के मानव विकास सूचकांक** के अनुसार दोनों का **मानव विकास** स्तर भी समान है।
- Yes, the share of **Muslims** in **India's population** has risen from **10% in 1951** to **14% in 2011**, at the time of the last **Census**.
  हाँ, अंतिम **जनगणना** के समय **भारत की जनसंख्या** में **मुसलमानों** की हिस्सेदारी **1951 में 10%** से बढ़कर **2011 में 14%** हो गई थी।
- Yes, in the past, the **Muslim community** on a whole has shown a higher **fertility** than the **Hindus** and other religious denominations.
  हाँ, अतीत में समग्र रूप से **मुस्लिम समुदाय** ने **हिंदुओं** तथा अन्य धार्मिक समुदायों की तुलना में अधिक **प्रजनन दर** प्रदर्शित की है।
- However, **fertility among Muslim women** has begun falling rapidly, with the result that the gap between **Muslims and Hindus** has narrowed and will soon disappear.
  हालाँकि, **मुस्लिम महिलाओं में प्रजनन दर** तेजी से घटने लगी है, जिसके परिणामस्वरूप **मुसलमानों और हिंदुओं** के बीच का अंतर कम हो गया है और शीघ्र ही समाप्त हो जाएगा।
- On the **desired number of children** that women want to have, there is now almost no difference between **Hindus and Muslims**.
  महिलाएँ जितने **बच्चे चाहती हैं**, उस वांछित संख्या के संदर्भ में अब **हिंदुओं और मुसलमानों** के बीच लगभग कोई अंतर नहीं रह गया है।
- And to repeat what is well-known, the best example of why **religion** is not the determinant of **fertility behaviour**: **Muslim women** in **Tamil Nadu, Kerala and Jammu and Kashmir** exhibit lower fertility than the **Hindu women** of **Bihar and Uttar Pradesh**.
  और यह दोहराना आवश्यक है कि **धर्म प्रजनन व्यवहार** का निर्धारक नहीं है; इसका सर्वोत्तम उदाहरण यह है कि **तमिलनाडु, केरल और जम्मू-कश्मीर** की **मुस्लिम महिलाएँ**, **बिहार और उत्तर प्रदेश** की **हिंदू महिलाओं** की तुलना में कम प्रजनन दर प्रदर्शित करती हैं।
- **Poverty** and **education** matter more.
  गरीबी और **शिक्षा** अधिक महत्वपूर्ण कारक हैं।
- So when the **Demographic Change Committee** is asked "to recommend a streamlined and permanent operational mechanism for the legal, fair, and time-bound identification, detention, and deportation of illegal immigrants already residing in the country", there is a chilling similarity between the language of this "permanent operational mechanism" and the "**Final Solution**" practised in **1940s Europe**.
  इसलिए जब **जनसांख्यिकीय परिवर्तन समिति** से "देश में पहले से रह रहे अवैध प्रवासियों की कानूनी, निष्पक्ष और समयबद्ध पहचान, निरुद्धीकरण तथा निर्वासन हेतु एक सुव्यवस्थित और स्थायी परिचालन तंत्र" की सिफारिश करने को कहा जाता है, तो इस "स्थायी परिचालन तंत्र" की भाषा और **1940 के दशक के यूरोप** में अपनाए गए "**फाइनल सॉल्यूशन**" के बीच एक भयावह समानता दिखाई देती है।

A movement losing momentum and daughters

Launched by PM Modi in Panipat in 2015, the Beti Bachao, Beti Padhao campaign initially delivered strong results. Haryana's Sex Ratio at Birth rose from 838 in 2010 to 923 by 2019, driven by strict raids on pre-natal testing centres, inter-State crackdowns, monthly video conference reviews, and fixed accountability. However, data for the first four months of 2026 show that the number of girl babies born has dipped below 900, sparking fears that the programme is losing focus and momentum, reports **Ashok Kumar**

GS I: Society

At 31, Bijli Devi weighs just 44 kg. Weak and pregnant, she has come to Katlupur sub-centre in Sonipat district for a routine vaccination. The doctor has flagged her pregnancy as high risk. This is her seventh in 12 years. She has six daughters, 2 to 12. "I have little choice," she says. Her husband, an agricultural labourer, and in-laws want a son. She doesn't know what will happen if the seventh is a girl too. Her two oldest daughters have dropped out of school. They now work as farm labourers alongside their father. "We never went for sex-determination," Bijli Devi adds. "We don't have the means." A sex-determination test, illegal in India, costs ₹50,000-60,000 on the black market.

In May this year, a secret sex-determination racket, running in the middle of Gurugram, was busted. At Aayu Hospital in Hari Nagar, a mere 2 kilometres north of Sector 37 police station, along the frenetic arterial stretch of Khandsa Road off the Delhi-Jaipur Highway, sleuths dismantled a syndicate peddling prenatal gender testing. Arrested consultant radiologist Manjit Kumar would allegedly conduct the sex-determination test for ₹40,000.

Here, in the pulsating heart of the Millennium City, directly opposite the cacophonous Sector 10A market, thrived the illicit sex-determination centre. This, more than a decade after the clarion call of "Beti Bachao Beti Padhao" (BBBP) echoed from Panipat, more than a thousand surgical raids executed, and upwards of 4,000 miscreants incarcerated.

The bust wasn't just about catching criminals. It exposed a deeper failure: the slow collapse of monitoring and the fading fear of law among offenders. For the enforcement teams, the brazenness of it all was a jolt.

The rupture surfaced against an ominous backdrop: Haryana's Sex Ratio at Birth (SRB) has plummeted to 898 girls per 1,000 boys in the first four months of 2026. Only four of the 23 districts – Nuh, Rewari, Sonipat, and Panchkula – breached the 900 mark. At the bottom of the table, Charkhi Dadri recorded 768 girls per 1,000 boys. Since BBBP's inception, annual SRB figures had ascended, cresting at 923 in both 2019 and 2025.

The May raid revealed an uncomfortable truth. Between the gap of slogans and supervision lies the old persistent practice of eliminating female foetuses.

Lost focus and direction

In May, another sex-determination racket at Leelawati Hospital in NIT Faridabad was also busted. The accused, Om Prakash, was not a doctor. A senior secondary pass-out, he ran the centre and used a foetal doppler, a handheld ultrasound tool used to listen to a baby's heartbeat, for sex-determination, fooling desperate parents seeking sons. The hospital sits a stone's throw from the district's Chief Medical Officer's office.

Sex-determination centres running openly in metro cities, along with the SRB slide, signal that a programme which once raised hope of fixing the skewed ratio is losing steam, say those associated with the programme for the past several years, adding that it demands a renewed, sustained crackdown and constant monitoring to restore accountability.

A Food and Drug Administration official who has participated in over 30 raids, including inter-State operations, says the Beti Bachao Beti Padhao campaign has lost "focus" and "direction."

> Women often get sex-determination done outside Haryana, then use easily available MTP kits for abortion – even over the counter. When we report cases, no action is taken against the women because proving an illegal abortion is difficult
>
> **SUNITA**
> President, Haryana ASHA Workers' Union

"The two key components of the programme – constant monitoring and the crackdown – are now missing," says the officer, requesting anonymity. He partially links the decline to the change of guard in Haryana and the transfer of then Additional Principal Secretary out of the State. He is now the Additional Secretary in the Union Health Ministry. The programme was personally monitored by then Chief Minister Manohar Lal, who was replaced by the incumbent Nayab Singh Saini before the 2024 Lok Sabha poll.

"The number of raids and FIRs has gone down, and the focus has shifted from action against illegal sex-determination centres to the medical termination of the pregnancies, putting the cart before the horse," he remarks. The previous machinery used raids, FIRs, daily accountability.

From a peak of 271 FIRs in 2016, the crackdown collapsed to just 85 cases in 2023 and 47 in 2024. Though 154 cases surfaced last year, the priority had inverted. For the first time, cases filed under the Pre-conception and Pre-natal Diagnostic Techniques Act, 1994, stood at 37. However, FIRs under the Medical Termination of Pregnancy (MTP) Act, 1971, were by up 117. In 2026, only 28 FIRs have been registered until May.

"The monthly video conferences held with district officers, including Deputy Commissioners, before 2021, have now become a thing of the past, making the officers complacent," he says.

The racket adapts, moves, hides

From its launch in Panipat on January 22, 2015, by Prime Minister Narendra Modi until September 2021, the Beti Bachao, Beti Padhao programme in Haryana had one constant – nodal officer Rakesh Gupta.

Every month, he ran video conferences with Deputy Commissioners, Chief Medical Officers, and Food and Drug Administration officials from all districts. Files moved, and so did teams on the ground. As raids intensified, the racket didn't vanish; it migrated. Sex-determination centres cropped up across the border in Uttar Pradesh, Punjab, Rajasthan, Delhi, and Uttarakhand. Haryana officials then began holding meetings with bureaucrats and political leadership in neighbouring States, pushing for joint action.

COVID-19 disrupted the rhythm. Despite health officials being diverted to pandemic duty, for three years after the pandemic, the SRB ranged between 914-917, before a dip in 2024.

Formal tip-offs and informal networks fed the raids. Because illegal sex-determination centres must market themselves to find clients, word leaks. Teams used decoys to catch doctors and touts red-handed. But conviction rates stayed low, admit officials, though they do not disclose how low.

The 'market' told its own story. A sex-determination test that cost ₹5,000 to ₹15,000 before the crackdown shot up to ₹1.5 lakh. Demand didn't fall, but supply crashed under monitoring and raids.

Rejecting allegations of policy failure, health officials assert that Haryana's Sex Ratio at Birth has rebounded to 923 in 2025, driven by a renewed "crackdown effect". They concede that post-pandemic complacency from 2019-2024 weakened enforcement, with fewer raids, causing SRB to slip to 910. The 2025 recovery, they argue, reflects revived surveillance.

However, the monthly SRB hovered between 889 and 910 through the first half of 2025. The final three months posted abnormally high ratios, ranging from 930 to 997. The pattern has raised eyebrows among officials and activists alike, casting doubt on whether the "2025 Recovery" reflects genuine improvement or statistical manoeuvring. Critics within the Health Department allege that male births were deliberately underregistered towards December to artificially inflate the annual average.

Responding to *The Hindu*'s query on the late-2025 spike and early-2026 dip in Sex Ratio at Birth, the Haryana Health Department argued that SRB was calculated for the calendar year and monthly fluctuations were routine. "Historically, SRB declines in the summer months and shows an upward trend from September to December," the department stated. It added that total birth registrations increased in 2025 compared to 2024. As per CRS data, 5,16,402 births were registered in 2024, while 2025 recorded 5,19,691 registrations. The department maintained that seasonal variation, not data manipulation, explains the monthly swings in SRB.

It also said that top-level monitoring is ongoing, with weekly video conferences, and review meetings. A State Task Force chaired by Additional Chief Secretary (Health) meets regularly, while District Task Forces led by Deputy Commissioners convene monthly. Their approach was one of "reverse tracking", targeting those resorting to illegal abortions.

The department flagged some key challenges in tackling female foeticide: the misuse of handheld, mobile-sized ultrasound machines; repeat offenders undeterred by legal action; and legal sex detection in countries like Thailand and Singapore, where people go to get sex-determination tests.

The son preference

"The Beti Bachao, Beti Padhao mission in Haryana took a back seat towards the end of 2021 and the Swachh Bharat Mission came to the fore," says Manasi Mishra, who heads the Research and Knowledge Management Division at Delhi-based non-profit Centre for Social Research (CSR) that works in the gender space.

CSR had been implementing the Meri Shakti Meri Beti programme since 2007, targeting prenatal sex selection and girl empowerment. After the Beti Bachao, Beti Padhao programme was launched, CSR became the nodal agency for five skewed-SRB districts in Haryana: Gurugram, Ambala, Kurukshetra, Jhajjar, and Mahendragarh. The NGO ran BBBP there until 2021.

Mishra adds that once the sex ratio at birth showed improvement, the government began to relax. "There was no official announcement, but the call of the day was, since this target has been achieved, we should be more focused on the Swachh Bharat Mission and to make the State Open Defecation Free," Mishra says.

Government officials working on BBBP were largely moved to sanitation work, she says. "All of a sudden, this change happened in every district. In the five districts I had been working with, BBBP took a backseat."

Her 25 community watch groups reported rampant sex-selection amid zero monitoring during the pandemic. "They keep sending me messages that during the pandemic, sex selection went on rapidly and there was no check." She warns that northern states like Haryana and Punjab have deep-rooted son preference and without economic upliftment of girls and visible role models, gains will soon be reversed.

"There is no concentrated effort to sustain the achievements of Beti Bachao, Beti Padhao. It remains a slogan only." Earlier success came from multi-stakeholder work: Panchayat engagement, medical audits with PC-PNDT authorities, and mobilising ASHA and anganwadi workers.

Sunita, president of the CITU-affiliated Haryana ASHA Workers' Union, attributes the post-Covid slowdown in enforcement to "fatigue," frequent top-level transfers, and a disconnect from ground realities. Officers at the helm, she says, lack field insight, and there's little action against violators. ASHAs are tasked with tracking pregnant women whose first child is a daughter.

"These women often get sex-determination done outside Haryana, then use easily available MTP kits for abortion – even over the counter," Sunita explains. "When we report cases, no action is taken against the women because proving an illegal abortion is difficult."

The demoralisation runs deeper. "Many private clinics sealed for illegal sex selection reopen after some time. It de-motivates teams that worked hard to bust them," she says.

At the Katlupur vaccination centre, Meenakshi, 37, has two daughters, both of who were delivered by caesarean sections. Doctors warned her against a third pregnancy. She says there was no pressure from her husband or in-laws. She wanted a son. "My husband is unwell. His elder brother died. I thought a male child should carry forward the family name." Her aunt, she claims, knows people who run illegal sex selection centres. She says she has never tried it.

The son preference remains entrenched. "A family in Nahari village celebrated for 17 days when a boy was born," says Sunita. In September last, the ASHA Workers' Union ran a month-long inquiry across Haryana to understand why female foeticide persists. "We didn't find a single family that opted for family planning after their first child was a girl. But many stopped after a boy. The mindset has not changed," Sunita says. "Everyone still wants a son."

GS I: Geography

Missed call

India must brace itself for a deficient southwest monsoon

The southwest monsoon reached Kerala on June 4, three days past its normal date and four days behind the India Meteorological Department's own forecast. This is the first time since 2015 that the agency has misjudged the onset beyond its margin of error. A late arrival, in itself, is no calamity. The date on which the rains touch the Kerala coast has little statistical bearing on how much falls over the four months that follow. Many times in the past, the monsoon has begun early and failed, and also begun late and recovered. It is what the monsoon has in store over the next four months that is unsettling. The India Meteorological Department has pegged seasonal rainfall at 90% of the long-period average, with a 60% probability of an outright deficient year – its most pessimistic pre-season call in a decade. Only the northeast is expected to see normal rain; the northwest, central India, the peninsula and the monsoon core zone that waters most of the country's rain-fed farmland are all forecast to fall short. As monsoon watchers have often cautioned, it is the distribution – the sudden long dry spells, sown crops that then face the danger of being unwatered – that matters. Every monsoon is consequential for India. This one is exceptionally so, because it arrives atop an input crisis. The West Asia conflict and the disruption at the Strait of Hormuz earlier this year throttled energy supply and fertilizer production.

History offers little comfort. Around 60% of El Niño years since 1951 have brought deficient or below-normal rains; 2002, 2009 were the severest droughts of the century with significant shortfalls in 2014 and 2015. With El Niño now near-certain through the heart of the season, the government must not count on a late, redeeming swing of the Indian Ocean Dipole. That means activating the Agriculture Ministry, Jal Shakti and Consumer Affairs Ministries on a war footing along with the disaster management authorities, with advisories steering farmers toward short-duration pulses, oilseeds and millets over thirsty paddy. Disciplined groundwater and reservoir management are necessary and crop insurance and relief provisioning must be readied. India will also have to brave more days of severe heat, which a parched landscape will only sharpen. The government as recently as last week claimed to deliver a record *kharif* production. While hoping for the best, it must prepare for the worst. A weak monsoon would fall on a farm economy whose nutrients and fuel are both already scarce and dear.

08J6. Missed call
चूकी हुई चेतावनी

- India must brace itself for a **deficient southwest monsoon**.

भारत को **कमज़ोर दक्षिण-पश्चिम मानसून** का सामना करने के लिए स्वयं को तैयार करना चाहिए।

- Only the **northeast** is expected to see normal rain; the **northwest**, **central India**, the **peninsula** and the **monsoon core zone** that waters most of the country's rain-fed farmland are all forecast to fall short.

केवल **पूर्वोत्तर भारत** में सामान्य वर्षा होने की संभावना है, जबकि **उत्तर-पश्चिम**, **मध्य भारत**, **प्रायद्वीपीय क्षेत्र** तथा देश के अधिकांश वर्षा-आधारित कृषि क्षेत्रों को सिंचित करने वाला **मानसून कोर ज़ोन** सभी में वर्षा सामान्य से कम रहने का अनुमान है।

- With **El Niño** now near-certain through the heart of the season, the government must not count on a late, redeeming swing of the **Indian Ocean Dipole (IOD)**.

चूँकि इस मौसम के मुख्य भाग में **एल नीनो** की स्थिति लगभग निश्चित है, इसलिए सरकार को **हिन्द महासागर द्विध्रुव (IOD)** के देर से अनुकूल होने की संभावना पर निर्भर नहीं रहना चाहिए।

- That means activating the **Agriculture Ministry**, **Jal Shakti Ministry** and **Consumer Affairs Ministry** on a war footing along with the disaster management authorities.

इसका अर्थ है कि **कृषि मंत्रालय**, **जल शक्ति मंत्रालय**, **उपभोक्ता मामले मंत्रालय** तथा आपदा प्रबंधन प्राधिकरणों को युद्धस्तर पर सक्रिय किया जाए।

- Disciplined **groundwater** and **reservoir management** are necessary and **crop insurance** and relief provisioning must be readied.

सुव्यवस्थित **भूजल** एवं **जलाशय प्रबंधन** आवश्यक है तथा **फसल बीमा** और राहत प्रावधानों को भी तैयार रखा जाना चाहिए।

The Ordinance question before the SC

The Collegium's acceptance of an Ordinance that creates four additional judges' posts raises questions about judicial independence, security of tenure and the appearance of detachment from the executive; court has taken a calculated risk by staking its independence on the goodwill of the government and Parliament

GS II: Polity

LETTER & SPIRIT

V. Venkatesan

In February 1937, the President of the United States of America, Franklin D. Roosevelt, asked Congress to enlarge the nine-judge Supreme Court. He sought a new justice for each one past 70 who refused to retire, up to 15 in all. The Senate Judiciary Committee saw through it. It preferred "an independent Court, a fearless Court," to one that bent "out of fear or sense of obligation to the appointing power." The Senate refused, with 70 members voting against and 20 in favour, and the plan was dead.

In Delhi last week, five judges took the oath; three occupy chairs, that no statute has created. They sit because the President, by Ordinance, lifted the sanctioned strength from 34 to 38.

Ordinance-made seats

The five are fit for office: four sat as Chief Justices of High Courts, the fifth came from the bar. Their elevation is not the grievance; the manner of it is. The Ordinance was promulgated on May 16, when the Court sat at 32 against a sanctioned 34. Two lawful vacancies existed; two of Tuesday's appointments filled them. The other three rest on the Ordinance alone.

Article 124(1) leaves the number of judges to what Parliament may prescribe. An Article 123 Ordinance carries, for its life, the force of an Act. Independence of the judiciary is a basic feature of the Constitution. It is also about whether the court holds its seats free of obligation to the political branch. A court that owes three chairs to a six-week renewable Ordinance holds them at the executive's sufferance.

A test of principle

In 2015, a Constitution Bench decided *Supreme Court Advocates-on-Record Association vs Union of India*. It struck down the 99th Amendment and the National Judicial Appointments Commission. Parliament had passed it 367 to nil in the Lok Sabha, with the States ratifying. The commission was to have six members: the Chief Justice, the two senior-most judges after him, the Union Law Minister, and two eminent persons. The eminent persons were to be chosen by a panel of the Prime Minister, the Chief Justice, and the Leader of the Opposition. That composition was meant to keep the choice neutral. Yet the Act provided that any two members could veto a name. The court feared that the Law Minister and even one eminent person could thus block a candidate the judges favoured. It held that this destroyed the judiciary's primacy in its own appointments.

Yet the Supreme Court Collegium has accepted an Ordinance that seats three of its own, despite the uncertainty over its fate. Under Article 123, the President may withdraw an Ordinance at any time. Both Houses may disapprove it by resolution. Otherwise, it ceases to operate six weeks after Parliament reassembles.

The court itself taught the country to distrust the Ordinance. In *D.C. Wadhwa vs State of Bihar* (1986), it called governance by repromulgated ordinance a fraud on the Constitution. In *Krishna Kumar Singh vs State of Bihar* (2017), a seven-judge Bench ruled against using ordinance-making power as a parallel source of legislation.

If the Bill replaces the Ordinance, the anomaly closes. If not, the apex court's strength reverts to 34, and the executive cannot bridge the gap by repromulgation, the fraud Wadhwa condemned. Whether a judge appointed to an Ordinance-created post can be removed once that post lapses is untested. Their judgments hold under the de facto doctrine, affirmed in *Gokaraju Rangaraju vs State of Andhra Pradesh* (1981). The subtler harm is to appearance: in any matter touching the Union, the government whose majority must regularise their seats may appear before them. A judge whose tenure lies, even loosely, in one party's gift cannot wear the detachment the office demands.

GETTY IMAGES

C.J Surya Kant administers the oath of office to Justice V. Mohana as a judge of the Supreme Court, in New Delhi on June 2. She is only the second woman to be elevated directly from the Bar to the court. PTI

The calculated risk

The court sits at 37; the 38th and last sanctioned post is empty, the calendar suggests why. Justice Pankaj Mithal retires on June 16 and Justice J.K. Maheshwari on June 28. Their retirements reopen two lawful seats, into which two of the three Ordinance judges move. A judge in the 38th post would be the junior-most. Its occupant would reach a lawful seat only at Justice Satish Chandra Sharma's retirement on November 29, months after the Ordinance expires. Leaving it empty spares the court a judge stranded that long.

That leaves Justice V. Mohana, alone of the five from the bar and so junior-most, on an Ordinance post. She can reach a lawful seat only when Justice Sanjay Karol retires on August 22. Here, the Collegium seems to have taken a calculated risk. Justice Karol's retirement all but coincides with the Ordinance's likely lapse, six weeks into the monsoon session. The replacing law should thus arrive first, and even a short delay is caught by his vacancy, which absorbs her. Her position turns precarious only if the Ordinance is rejected or lapses before August 22. Then the strength reverts to 34, the court still sits at 35, and she holds a post that the law no longer recognises. That a judge of the highest court should depend on which reading prevails, and on when Parliament meets, is the disquiet.

The five are fit for office: four sat as Chief Justices of High Courts, the fifth came from the bar

Larger question

The wager will likely be won; the government has the numbers, and the Opposition will not unsettle freshly sworn judges. But that is not the point. The court has staked its independence and its judges' security of tenure on the goodwill of the executive and Parliament.

The U.S. Senate's warning of 1937 was against a court bound by obligation to the appointing power. The graver danger is a court that no longer notices the obligation. Independence of the judiciary is not only the right to say no to the executive. It is the instinct to want to.

(V. Venkatesan is Contributing Editor at Supreme Court Observer. Views expressed are personal)

THE GIST

- Five judges were sworn in to the Supreme Court after the sanctioned strength was raised from 34 to 38 through a Presidential Ordinance; while two appointments filled existing vacancies, three were made to newly created posts.
- The Supreme Court has previously held in cases such as *D.C. Wadhwa vs State of Bihar* and *Krishna Kumar Singh vs State of Bihar* that ordinance-making power cannot become a parallel source of legislation and that repeated promulgation of ordinances is unconstitutional.
- If Parliament does not replace the Ordinance with a law, the court's sanctioned strength would revert to 34, raising unresolved questions about the status of judges appointed to Ordinance-created posts and the legal implications of such appointments.

08J6. The Ordinance question before the SC
उच्चतम न्यायालय के समक्ष अध्यादेश का प्रश्न

- The **Collegium's acceptance** of an **Ordinance** that creates four additional **judges' posts** raises questions about **judicial independence**, **security of tenure** and the appearance of **detachment from the executive**; the court has taken a calculated risk by staking its independence on the **goodwill of the government and Parliament**.
  चार अतिरिक्त **न्यायाधीशों के पदों** के सृजन वाले एक **अध्यादेश** को **कोलेजियम द्वारा स्वीकार किए जाने** से **न्यायिक स्वतंत्रता**, **पद की सुरक्षा** तथा **कार्यपालिका से पृथकता की प्रतीति** को लेकर प्रश्न उत्पन्न होते हैं;

न्यायालय ने अपनी स्वतंत्रता को **सरकार और संसद की सद्भावना** पर आधारित करके एक सोचा-समझा जोखिम उठाया है।

- The **Senate** refused, with **70 members voting against** and **20 in favour**, and the plan was dead.
  सीनेट ने इस प्रस्ताव को अस्वीकार कर दिया; **70 सदस्यों ने विरोध में** और **20 ने समर्थन में** मतदान किया, जिसके साथ ही यह योजना समाप्त हो गई।
- **Article 124(1)** leaves the number of judges to what **Parliament** may prescribe.
  अनुच्छेद 124(1) न्यायाधीशों की संख्या निर्धारित करने का अधिकार **संसद** को देता है।
- An **Article 123 Ordinance** carries, for its life, the force of an Act.
  अनुच्छेद 123 के अंतर्गत जारी **अध्यादेश** अपनी वैधता की अवधि तक कानून के समान प्रभाव रखता है।
- A court that owes three chairs to a **six-week renewable Ordinance** holds them at the executive's sufferance.
  ऐसा न्यायालय जिसके तीन पद **छह सप्ताह के लिए नवीकरणीय अध्यादेश** पर आधारित हों, वे पद वस्तुतः कार्यपालिका की इच्छा पर निर्भर माने जा सकते हैं।

A test of principle
सिद्धांत की परीक्षा

- In **2015**, a **Constitution Bench** decided **Supreme Court Advocates-on-Record Association vs Union of India**.
  2015 में एक **संविधान पीठ** ने **सुप्रीम कोर्ट एडवोकेट्स-ऑन-रिकॉर्ड एसोसिएशन बनाम भारत संघ** मामले का निर्णय दिया।
- It struck down the **99th Constitutional Amendment** and the **National Judicial Appointments Commission (NJAC)**.
  इसने **99वें संविधान संशोधन** तथा **राष्ट्रीय न्यायिक नियुक्ति आयोग (NJAC)** को निरस्त कर दिया।
- **Parliament** had passed it **367 to nil** in the **Lok Sabha**, with the States ratifying it.
  लोकसभा में इसे **367 मतों से बिना किसी विरोध के** पारित किया गया था और राज्यों ने भी इसका अनुमोदन किया था।
- The commission was to have **six members**: the **Chief Justice of India**, the **two senior-most judges** after him, the **Union Law Minister**, and **two eminent persons**.
  इस आयोग में **छह सदस्य** होने थे: **भारत के मुख्य न्यायाधीश**, उनके बाद के **दो वरिष्ठतम न्यायाधीश**, **केंद्रीय विधि मंत्री** तथा **दो प्रतिष्ठित व्यक्ति**।
- The eminent persons were to be chosen by a panel of the **Prime Minister**, the **Chief Justice**, and the **Leader of the Opposition**.
  इन प्रतिष्ठित व्यक्तियों का चयन **प्रधानमंत्री**, **मुख्य न्यायाधीश** तथा **विपक्ष के नेता** की समिति द्वारा किया जाना था।
- That composition was meant to keep the choice neutral.
  इस संरचना का उद्देश्य चयन प्रक्रिया को निष्पक्ष बनाए रखना था।
- Yet the Act provided that **any two members could veto a name**.
  फिर भी अधिनियम में यह प्रावधान था कि **कोई भी दो सदस्य किसी नाम को वीटो कर सकते थे**।
- The court feared that the **Law Minister** and even **one eminent person** could thus block a candidate the judges favoured.
  न्यायालय को आशंका थी कि **विधि मंत्री** और **एक प्रतिष्ठित व्यक्ति** मिलकर उस उम्मीदवार को रोक सकते हैं जिसे न्यायाधीश समर्थन देना चाहते हों।
- It held that this destroyed the judiciary's **primacy in its own appointments**.
  न्यायालय ने माना कि इससे न्यायपालिका की **अपनी नियुक्तियों में प्रधानता** समाप्त हो जाती है।
- Yet the **Supreme Court Collegium** has accepted an **Ordinance** that seats three of its own, despite the uncertainty over its fate.

फिर भी **सुप्रीम कोर्ट कॉलेजियम** ने ऐसे **अध्यादेश** को स्वीकार किया है जिसके आधार पर उसके तीन सदस्य नियुक्त हुए हैं, जबकि उसके भविष्य को लेकर अनिश्चितता बनी हुई है।

- Under **Article 123**, the **President** may withdraw an Ordinance at any time.
  अनुच्छेद 123 के अंतर्गत **राष्ट्रपति** किसी भी समय अध्यादेश को वापस ले सकते हैं।
- Both Houses may disapprove it by resolution.
  संसद के दोनों सदन प्रस्ताव पारित कर उसे अस्वीकार कर सकते हैं।
- Otherwise, it ceases to operate **six weeks after Parliament reassembles**.
  अन्यथा, संसद के पुनः सत्रारंभ होने के **छह सप्ताह बाद** अध्यादेश स्वतः समाप्त हो जाता है।
- In **D.C. Wadhwa vs State of Bihar (1986)**, it called governance by **repromulgated ordinances** a **fraud on the Constitution**.
  डी.सी. वाधवा बनाम बिहार राज्य (1986) मामले में न्यायालय ने बार-बार पुनः जारी किए गए अध्यादेशों के माध्यम से शासन को **संविधान के साथ छल** बताया था।
- In **Krishna Kumar Singh vs State of Bihar (2017)**, a **seven-judge Bench** ruled against using **ordinance-making power** as a parallel source of legislation.
  कृष्ण कुमार सिंह बनाम बिहार राज्य (2017) में **सात न्यायाधीशों की पीठ** ने अध्यादेश निर्माण शक्ति को समानांतर विधायी स्रोत के रूप में उपयोग करने के विरुद्ध निर्णय दिया था।
- Whether a judge appointed to an **Ordinance-created post** can be removed once that post lapses is untested.
  यह प्रश्न अभी तक अनुत्तरित है कि **अध्यादेश द्वारा सृजित पद** पर नियुक्त न्यायाधीश को उस पद की समाप्ति के बाद हटाया जा सकता है या नहीं।
- Justice Karol's retirement all but coincides with the Ordinance's likely lapse, six weeks into the **monsoon session**.
  न्यायमूर्ति करोल की सेवानिवृत्ति लगभग उसी समय होती है जब **मानसून सत्र** शुरू होने के छह सप्ताह बाद अध्यादेश के समाप्त होने की संभावना है।
- Her position turns precarious only if the Ordinance is rejected or lapses before **August 22**.
  उनकी स्थिति केवल तभी संकटपूर्ण होगी जब **22 अगस्त** से पहले अध्यादेश अस्वीकृत हो जाए या समाप्त हो जाए।

'Detailed NFHS report will provide a broader picture'

GS II: Governance

Press Trust of India

NEW DELHI

Union Health Ministry sources addressed criticism directed at "missing" indicators, such as anaemia, sanitation, and coverage of clean cooking fuel, in the National Family Health Survey (NFHS)-6 factsheets saying those are being monitored through dedicated national surveys and administrative databases, and were not "duplicated" in the preliminary release.

Responding to "commentary in sections of the media regarding the absence of certain indicators", official sources said the factsheets represent the first stage of dissemination and cover 101 major indicators intended to provide a concise snapshot of India's most critical health and demographic trends.

"The factsheets are the first stage of dissemination. The detailed national report will provide a much broader picture," sources said. The report will be released subsequently with a much wider range of indicators, detailed analyses and methodological documentation.

"The aim is to ensure that each indicator is reported through the most appropriate and authoritative source, reducing duplication and improving overall data coherence," sources said. They said several indicators cited as "missing" from the factsheets are being monitored through dedicated national systems. Sanitation and clean cooking fuel coverage, for instance, are tracked through specialised surveys and administrative platforms such as Swachh Survekshan Grameen and the Statistics and Programme Implementation Ministry's surveys, making duplication within the factsheets unnecessary, they said.

Key statistics relating to mortality, birth registration and population characteristics continue to be generated through systems such as the Sample Registration System, Civil Registration System and Census framework.

On the absence of anaemia estimates in the factsheets, they said that haemoglobin testing was not undertaken in NFHS-6 due to concerns surrounding the capillary blood sampling methodology used in previous rounds.

08J6. 'Detailed NFHS report will provide a broader picture'

'विस्तृत एनएफएचएस रिपोर्ट एक व्यापक तस्वीर प्रदान करेगी'

- **Union Health Ministry** sources addressed criticism directed at "missing" indicators, such as **anaemia, sanitation, and coverage of clean cooking fuel**, in the **National Family Health Survey (NFHS)-6 factsheets** saying those are being monitored through dedicated national surveys and administrative databases, and were not "duplicated" in the preliminary release.

केंद्रीय स्वास्थ्य मंत्रालय के सूत्रों ने **राष्ट्रीय परिवार स्वास्थ्य सर्वेक्षण (एनएफएचएस)-6 फैक्टशीट्स** में **एनीमिया, स्वच्छता और स्वच्छ खाना पकाने के ईंधन की कवरेज** जैसे "गायब" संकेतकों को लेकर की गई आलोचना का जवाब देते हुए कहा कि इनकी निगरानी समर्पित राष्ट्रीय सर्वेक्षणों और प्रशासनिक डेटाबेसों के माध्यम से की जा रही है, और प्रारंभिक रिलीज़ में इन्हें "दोहराया" नहीं गया था।

- Responding to "commentary in sections of the media regarding the absence of certain indicators", official sources said the factsheets represent the first stage of dissemination and cover **101 major indicators** intended to provide a concise snapshot of India's most critical **health and demographic trends**.

"कुछ संकेतकों की अनुपस्थिति को लेकर मीडिया के कुछ वर्गों में की गई टिप्पणियों" के जवाब में आधिकारिक सूत्रों ने कहा कि ये फैक्टशीट्स प्रसार के पहले चरण का प्रतिनिधित्व करती हैं और **101 प्रमुख संकेतकों** को शामिल करती हैं, जिनका उद्देश्य भारत के सबसे महत्वपूर्ण **स्वास्थ्य और जनसांख्यिकीय रुझानों** की संक्षिप्त झलक प्रदान करना है।

- **Sanitation** and **clean cooking fuel coverage**, for instance, are tracked through specialised surveys and administrative platforms such as **Swachh Survekshan Grameen** and the **Statistics and Programme Implementation Ministry's surveys**, making duplication within the factsheets unnecessary, they said.

उन्होंने कहा कि उदाहरण के लिए **स्वच्छता** और **स्वच्छ खाना पकाने के ईंधन की कवरेज** का आकलन **स्वच्छ सर्वेक्षण ग्रामीण** तथा **सांख्यिकी और कार्यक्रम कार्यान्वयन मंत्रालय के सर्वेक्षणों** जैसे विशेषीकृत सर्वेक्षणों और प्रशासनिक प्लेटफॉर्मों के माध्यम से किया जाता है, जिससे फैक्टशीट्स में इनकी पुनरावृत्ति अनावश्यक हो जाती है।

- Key statistics relating to **mortality, birth registration and population characteristics** continue to be generated through systems such as the **Sample Registration System, Civil Registration System and Census framework**.

मृत्यु दर, जन्म पंजीकरण और जनसंख्या की विशेषताओं से संबंधित प्रमुख आँकड़े **नमूना पंजीकरण प्रणाली, नागरिक पंजीकरण प्रणाली और जनगणना ढाँचे** जैसी प्रणालियों के माध्यम से तैयार किए जाते रहेंगे।

- On the absence of **anaemia estimates** in the factsheets, they said that **haemoglobin testing** was not undertaken in **NFHS-6** due to concerns surrounding the **capillary blood sampling methodology** used in previous rounds.
फैक्टशीट्स में **एनीमिया के आकलनों** की अनुपस्थिति पर उन्होंने कहा कि **एनएफएचएस-6** में **हीमोग्लोबिन परीक्षण** नहीं किया गया, क्योंकि पिछले दौरों में उपयोग की गई **केशिकीय रक्त नमूना पद्धति** को लेकर चिंताएँ थीं।

How ICMR is rewiring the health ecosystem

GS II: Governance

As the nation advances toward the vision of Viksit Bharat 2047, the question is not only about how to treat disease, but how one builds a health system that is anticipatory, equitable, and innovation-driven. At the heart of this transformation lies a reimagined approach to health, one that connects data to decisions and decisions to impact.

Building on the hard-earned lessons of the COVID-19 pandemic, the Indian Council of Medical Research (ICMR), India's apex body for biomedical research, has undertaken a series of forward-looking reforms. These reforms range from reimagining its institutional architecture to strengthening the way research is funded and translated into impact. This shift reflects a deliberate move towards integrated, institute-led research aligned with national priorities, where science is designed not just to generate knowledge, but to solve pressing public health challenges.

A strategic reorientation

A cornerstone of this transformation is the restructuring of the ICMR's institutional architecture. Recent reforms have expanded the mandates of several institutes, repositioning them as interdisciplinary hubs rather than narrowly defined entities. The evolution of institutes toward domains such as digital health and data science, child health, and women's health reflect the changing contours of India's disease burden and technological capabilities. Another important step is the creation of a network of regional National Institutes of Health Research across the country, from Dibrugarh in the Northeast to Jodhpur in the west. These institutes will conduct operational research with State and district health systems to ensure that relevant research is conducted and the output is used on the ground. These changes signal a strategic reorientation toward future-ready science, where AI, genomics, and real-time data systems are integral to public health decision-making.

Rajiv Bahl

Secretary to Govt. of India, Department of Health Research, Ministry of Health & Family Welfare and Director-General, Indian Council of Medical Research

The roadmap to 2047 will be shaped by advances in digital health, bio-manufacturing, and sustainable development, with a strong emphasis on capacity building and global collaboration

Equally important is the shift from compartmentalised functioning to a connected national research ecosystem. Institutes are now envisioned as resource centres that contribute to a shared national mission, ensuring that evidence generated in one setting informs action across the country. This systems-level thinking is critical in an era where health challenges, be it antimicrobial resistance, pandemics, or non-communicable diseases, are complex and interconnected. Similarly, the research funding ecosystem is also going through a redesign.

This integrated continuum marks a decisive shift from funding projects to enabling solutions. It is further reinforced by the National Health Research Programme (NHRP), which has identified 13 priority areas ranging from antimicrobial resistance and tuberculosis to mental health, nutrition, and emergency care.

Technology, too, is playing a transformative role. The integration of AI into diagnostics, surveillance, and program implementation is helping bridge longstanding gaps between urban and rural healthcare. AI-enabled tools for tuberculosis and diabetic retinopathy screening are already supporting frontline health workers, while innovations such as AI-driven nutritional monitoring are improving program delivery at scale. The i-Drone initiative, which began with vaccine delivery and has expanded to transport critical medical supplies, exemplifies how cutting-edge technology can overcome geographic barriers and bring care closer to communities. At the frontier of science, advances across the medtech gamut, from medical devices and diagnostics to next-generation vaccines and therapeutics, are enabling more targeted, patient-centric interventions. In parallel, the integration of traditional knowledge systems through innovative, evidence-based models is gaining global recognition. Schemes such as First in the World Challenge complemented with platforms such as MedTechMitra and the Medical Innovations-Patent Mitra initiative are accelerating the journey from research to commercialisation, ensuring that publicly funded science translates into affordable, accessible technologies for the people.

Towards universal access

The true measure of these reforms, however, lies in their impact on public health. Initiatives such as the India Hypertension Control Initiative have demonstrated how evidence-based strategies can transform chronic disease management at scale. Mission-mode programmes in emergency care, including mobile stroke units and rapid cardiac response systems, are redefining outcomes in life-threatening conditions. Expanded diagnostic networks and indigenous technologies are strengthening early detection and treatment across diseases ranging from cancer to infectious outbreaks. These efforts are closely aligned with the National Health Policy 2017, which emphasises preventive and promotive healthcare, universal access, and quality of care.

As we look to the future, the vision is clear. The ICMR will continue to serve as a catalyst, bringing together researchers, clinicians, policymakers, and the industry to build a resilient health ecosystem. The roadmap to 2047 will be shaped by advances in digital health, bio-manufacturing, and sustainable development, with a strong emphasis on capacity building and global collaboration. The transformation underway within the ICMR is an invitation to all stakeholders to participate in this journey and to ensure that science serves society in the most meaningful way.

08J6. How ICMR is rewiring the health ecosystem
आईसीएमआर किस प्रकार स्वास्थ्य पारितंत्र को पुनर्संरचित कर रहा है

- As the nation advances toward the vision of **Viksit Bharat 2047**, the question is not only about how to treat disease, but how one builds a health system that is **anticipatory, equitable, and innovation-driven**.
  जैसे-जैसे राष्ट्र **विकसित भारत 2047** के दृष्टिकोण की ओर अग्रसर हो रहा है, प्रश्न केवल रोगों के उपचार का नहीं है, बल्कि ऐसे स्वास्थ्य तंत्र के निर्माण का है जो **पूर्वानुमान आधारित, समतामूलक और नवाचार-प्रेरित** हो।
- Building on the hard-earned lessons of the **COVID-19 pandemic**, the **Indian Council of Medical Research (ICMR)**, India's apex body for biomedical research, has undertaken a series of forward-looking reforms.
  कोविड-19 महामारी से प्राप्त महत्वपूर्ण अनुभवों के आधार पर, जैव-चिकित्सीय अनुसंधान की भारत की सर्वोच्च संस्था **भारतीय आयुर्विज्ञान अनुसंधान परिषद (ICMR)** ने अनेक दूरदर्शी सुधारों की शुरुआत की है।
- This shift reflects a deliberate move towards **integrated, institute-led research** aligned with national priorities, where science is designed not just to generate knowledge, but to solve pressing public health challenges.
  यह परिवर्तन राष्ट्रीय प्राथमिकताओं के अनुरूप **एकीकृत एवं संस्थान-नेतृत्व वाले अनुसंधान** की दिशा में एक सुनियोजित कदम को दर्शाता है, जहाँ विज्ञान का उद्देश्य केवल ज्ञान उत्पन्न करना नहीं, बल्कि सार्वजनिक स्वास्थ्य की गंभीर चुनौतियों का समाधान करना भी है।

A strategic reorientation
एक रणनीतिक पुनर्संरेखन

- Recent reforms have expanded the mandates of several institutes, repositioning them as **interdisciplinary hubs** rather than narrowly defined entities.
  हाल के सुधारों ने कई संस्थानों के कार्यक्षेत्र का विस्तार किया है, जिससे वे सीमित परिभाषित इकाइयों के बजाय **बहुविषयक केंद्रों** के रूप में विकसित हो रहे हैं।
- The evolution of institutes toward domains such as **digital health and data science, child health, and women's health** reflect the changing contours of India's disease burden and technological capabilities.
  डिजिटल स्वास्थ्य एवं डेटा विज्ञान, बाल स्वास्थ्य तथा महिला स्वास्थ्य जैसे क्षेत्रों की ओर संस्थानों का विकास भारत में बदलते रोग-भार और तकनीकी क्षमताओं को दर्शाता है।
- Another important step is the creation of a network of regional **National Institutes of Health Research** across the country, from **Dibrugarh** in the Northeast to **Jodhpur** in the west.
  एक अन्य महत्वपूर्ण कदम देशभर में क्षेत्रीय **राष्ट्रीय स्वास्थ्य अनुसंधान संस्थानों** के नेटवर्क की स्थापना है, जो पूर्वोत्तर के **डिब्रूगढ़** से लेकर पश्चिम के **जोधपुर** तक फैला होगा।
- These changes signal a strategic reorientation toward **future-ready science**, where **AI, genomics, and real-time data systems** are integral to public health decision-making.
  ये परिवर्तन **भविष्य के लिए तैयार विज्ञान** की दिशा में रणनीतिक पुनर्संरेखन का संकेत देते हैं, जहाँ **कृत्रिम बुद्धिमत्ता (AI), जीनोमिक्स और वास्तविक समय डेटा प्रणालियाँ** सार्वजनिक स्वास्थ्य निर्णयों का अभिन्न हिस्सा होंगी।
- It is further reinforced by the **National Health Research Programme (NHRP)**, which has identified **13 priority areas** ranging from **antimicrobial resistance and tuberculosis** to **mental health, nutrition, and emergency care**.
  इसे **राष्ट्रीय स्वास्थ्य अनुसंधान कार्यक्रम (NHRP)** द्वारा और अधिक सुदृढ़ किया गया है, जिसने **13 प्राथमिकता वाले क्षेत्रों** की पहचान की है, जिनमें **रोगाणुरोधी प्रतिरोध और तपेदिक** से लेकर **मानसिक स्वास्थ्य, पोषण और आपातकालीन चिकित्सा देखभाल** तक के विषय शामिल हैं।

  2047 तक की रूपरेखा **डिजिटल स्वास्थ्य, जैव-विनिर्माण तथा सतत विकास** में प्रगति द्वारा निर्धारित होगी, जिसमें **क्षमता निर्माण** और **वैश्विक सहयोग** पर विशेष बल दिया जाएगा।

India's pension scheme lags in terms of coverage, contribution

The Centre's contribution to India's flagship pension scheme has remained the same while the add-on contributions by State governments have increased

GS II: Governance: Government Scheme

DATA POINT

Nitika Francis

The Indira Gandhi National Old Age Pension Scheme (IGNOAPS) – the Government of India's flagship cash assistance scheme for the elderly under its National Social Assistance Programme (NSAP) – is in dire need of a revamp as it remains frozen in time, since 2007, both in terms of the sum of ₹200 it offers per person per month and the roughly 2.2 crore beneficiaries it covers. The States and Union Territories (UTs) add their own contributions, ranging from ₹150 to ₹2,000, on top of the ₹200 offered by the Union government for the 60-plus age group or the ₹500 it offers for the 80-plus category.

Chart 1 shows how the Union government's contribution for this centrally-sponsored scheme has remained the same while the add-on contributions by State governments have increased between 2012 and 2023. States such as Telangana and Andhra Pradesh contribute the largest sums – of around ₹2,000. Many others do not bring as much to the table. Chhattisgarh offers ₹150, taking the total pension to ₹350, while West Bengal offers a total of ₹250. Goa and Manipur do not provide any additional amount.

The call for increasing the quantum of assistance, number of beneficiaries and linking the assistance with inflation, as it is done for the payment of Dearness Allowance to government employees, has been made at least since 2013, when the task force constituted by the Ministry of Rural Development (MoRD) first made such recommendations. The latest official recommendations came from the Public Accounts Committee (PAC) of the Lok Sabha in 2025 and the report released in May 2026 based on an independent evaluation of the NSAP commissioned by MoRD. The evaluation report said that the real value of the assistance fixed at ₹200 has "significantly eroded due to inflation, and that the amount should be increased to ₹353 to retain its original purchasing power".

An analysis by *The Hindu* based on the changes in the Consumer Food Price Index (CFPI) (base year 2012) at the all-India level showed that since 2013, the value of ₹200 has eroded to just around ₹99. This means that beneficiaries can buy only half the quantity of food items they could earlier buy with ₹200. Conversely, they should be receiving a minimum of around ₹400 to be able to afford even the small quantity of items they could buy with ₹200 in 2013 **(Chart 2)**.

Notably, the survey findings in the latest report highlighted that over 95% of the beneficiaries cited increase in prices as the main reason for their demand to increase the pension amount. More than 80% of them stated that the current pension amount does not cover their daily needs **(Chart 5)**.

The task force's report in 2013, the PAC's 2025 report and the recent MoRD report have all recommended an increase in coverage, stating that the Union government was relying on outdated BPL data to fix ceilings on the number of beneficiaries. The MoRD report estimated that the IGNOAPS beneficiaries should be nearly 17 crore at present and about 20 crore by 2030, which is 10-fold higher than the present coverage of 2.2 crore people. **Chart 3** shows how the number of beneficiaries have remained stagnant when compared with the projected growth of the elderly population.

The report also surveyed 6,000 beneficiaries across 600 Gram Panchayats across 10 sample States. In nine out of these 10 States, less than 10% of respondents thought that the scheme was "fully adequate", with a majority stating that it was only "somewhat adequate" or not adequate at all **(Chart 4)**.

With inputs from Pon Vasanth R. A.

Old and unsupported

The data for the charts were sourced from the Lok Sabha replies, the Ministry of Rural Development's report titled "Impact Assement and Evaluation of NSAP", and the Minstry of Statistics and Program Implementation

CHART 1: The monthly pension offered by all States, barring few Union Territories, under the centrally-sponsored Indira Gandhi National Old Age Pension Scheme (IGNOAPS) as of 2023

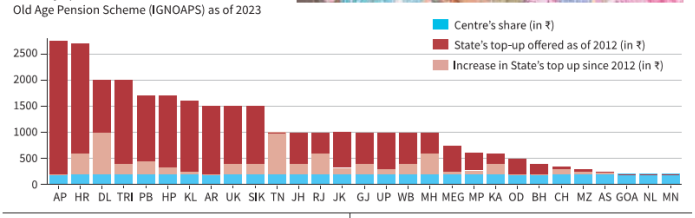

CHART 2: The erosion of the value of ₹200 as per changes in the Consumer Food Price Index (base year 2012) and the minimum assistance that ought to be paid to match that value

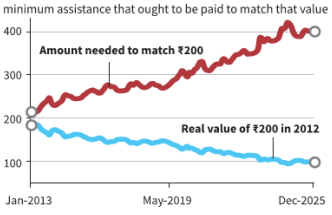

CHART 3: Number of beneficiaries who have remained fairly constant over the years when compared to the projected growth in the elderly population (in crore)

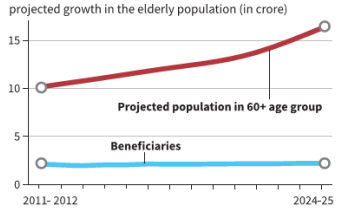

CHART 4: The response of surveyed beneficiaries in nine States and Jammu and Kashmir for a study commissioned by Ministry of Rural Development (MoRD) on the adequacy of assistance under IGNOAPS

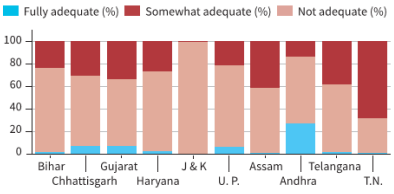

CHART 5: The reasons cited by respondents (%) of the MoRD study for the need to increase IGNOAPS assistance

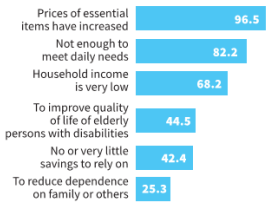

08J6. India's pension scheme lags in terms of coverage, contribution
कवरेज और अंशदान के मामले में भारत की पेंशन योजना पीछे है

- The **Centre's contribution** to India's **flagship pension scheme** has remained the same while the **add-on contributions** by **State governments** have increased.

Indira Gandhi National Old Age Pension Scheme (IGNOAPS)

इंदिरा गांधी राष्ट्रीय वृद्धावस्था पेंशन योजना (IGNOAPS)

- The **Indira Gandhi National Old Age Pension Scheme (IGNOAPS)** — the Government of India's flagship **cash assistance scheme** for the elderly under its **National Social Assistance Programme (NSAP)** — is in dire need of a revamp as it remains frozen in time, since **2007**, both in terms of the sum of **₹200 per person per month** and the roughly **2.2 crore beneficiaries** it covers.
  इंदिरा गांधी राष्ट्रीय वृद्धावस्था पेंशन योजना (IGNOAPS) — जो **राष्ट्रीय सामाजिक सहायता कार्यक्रम (NSAP)** के अंतर्गत वृद्धजनों के लिए भारत सरकार की प्रमुख **नकद सहायता योजना** है — में व्यापक सुधार की आवश्यकता है, क्योंकि **2007** से इसमें न तो **₹200 प्रति व्यक्ति प्रति माह** की सहायता राशि बढ़ाई गई है और न ही लगभग **2.2 करोड़ लाभार्थियों** की संख्या में परिवर्तन हुआ है।
- The **States and Union Territories (UTs)** add their own contributions, ranging from **₹150 to ₹2,000**, on top of the ₹200 offered by the Union government for the **60-plus age group** or the ₹500 it offers for the **80-plus category**.
  राज्य और केंद्रशासित प्रदेश (UTs) अपनी ओर से **₹150 से ₹2,000** तक का अतिरिक्त योगदान देते हैं, जो केंद्र सरकार द्वारा **60 वर्ष से अधिक आयु वर्ग** के लिए दी जाने वाली **₹200** तथा **80 वर्ष से अधिक आयु वर्ग** के लिए दी जाने वाली **₹500** की राशि के अतिरिक्त होता है।
- **Chart 1** shows how the Union government's contribution for this **centrally-sponsored scheme** has remained the same while the add-on contributions by State governments have increased between **2012 and 2023**.
  चार्ट 1 दर्शाता है कि इस **केंद्र प्रायोजित योजना** में केंद्र सरकार का योगदान स्थिर बना रहा, जबकि **2012 से 2023** के बीच राज्यों का अतिरिक्त योगदान बढ़ा है।
- The call for increasing the **quantum of assistance**, **number of beneficiaries** and linking the assistance with **inflation**, as it is done for the payment of **Dearness Allowance (DA)** to government employees, has been made at least since **2013**, when the task force constituted by the **Ministry of Rural Development (MoRD)** first made such recommendations.
  सहायता राशि, **लाभार्थियों की संख्या** बढ़ाने तथा सहायता को **मुद्रास्फीति** से जोड़ने की मांग कम-से-कम **2013** से की जा रही है, जब **ग्रामीण विकास मंत्रालय (MoRD)** द्वारा गठित कार्यबल ने पहली बार ऐसी सिफारिशें की थीं। यह व्यवस्था सरकारी कर्मचारियों के **महंगाई भत्ते (DA)** की तरह होनी चाहिए।
- The evaluation report said that the real value of the assistance fixed at **₹200** has "significantly eroded due to inflation, and that the amount should be increased to **₹353** to retain its original purchasing power".
  मूल्यांकन रिपोर्ट में कहा गया कि **₹200** की सहायता राशि का वास्तविक मूल्य "मुद्रास्फीति के कारण काफी घट गया है और इसकी मूल क्रय शक्ति बनाए रखने के लिए इसे **₹353** किया जाना चाहिए।"
- An analysis by **The Hindu** based on the changes in the **Consumer Food Price Index (CFPI)** (base year **2012**) at the all-India level showed that since **2013**, the value of **₹200** has eroded to just around **₹99**.
  उपभोक्ता खाद्य मूल्य सूचकांक (CFPI) (आधार वर्ष **2012**) में हुए परिवर्तनों पर आधारित **द हिंदू** के विश्लेषण से पता चला कि **2013** के बाद **₹200** का वास्तविक मूल्य घटकर लगभग **₹99** रह गया है।

The retirement trap India is walking into unprepared

India is entering a phase where ageing, healthcare, personal finance will become deeply interconnected public issues; retirement can no longer be limited to tax-saving instruments

GS II: Governance

TWILIGHT ZONE

Vishwajeet Goel

India is growing older, at a pace most households are financially unprepared for. As per the United Nations Population Fund (UNFPA), almost one of five Indians will be over the age of 60 by 2050. The elderly population in India is likely to rise from about 15 crore today to more than 34 crore over the next three decades. At the same time, healthcare costs continue to rise sharply, while inflation steadily chips away at household savings.

Yet, retirement planning in India still largely operates on assumptions built for another era.

We are living longer

Better healthcare access, improved sanitation, rising incomes and medical advancements have helped Indians live longer than previous generations.

But the longer people live, the more years they must fund without a regular income. For most people retirement calculations are based on current spends than future costs.

A family spending ₹75,000/month today may believe a few crores will comfortably sustain retirement. But inflation changes the picture dramatically. Even with moderate inflation, everyday expenses can multiply several times over two or three decades. The impact becomes even sharper in healthcare.

> In recent years, medical inflation in India has stayed at 12-14%, much higher than the overall inflation. Treatment can now cost a chunk of retirement savings.

> Even with moderate inflation, everyday expenses can multiply several times over two or three decades. The impact becomes even sharper in healthcare.

This is why retirement planning can no longer rely on traditional savings instruments. India needs stronger pension participation and long-term retirement-focused investing habits. Instruments such as the National Pension System (NPS) encourage sustained retirement planning via regulated and relatively low-cost structure. Its flexibility across equity, government securities and debt allocation allows investors to gradually align risk with age and retirement goals. More importantly, NPS addresses the absence of a structured pension culture outside of government employment.

In recent years, medical inflation in India has stayed between 12-14%, significantly higher than overall inflation. Treatment can now use a huge chunk of retirement savings.

India is witnessing a rapid rise in chronic conditions such as diabetes, hypertension and cardiac disorders which are long-duration illnesses requiring continuous medication, diagnostics, follow-up care and, in many cases, repeated hospitalisation.

While earlier generations often associated retirement with reduced spending, modern retirees may experience the opposite. Healthcare, assisted living, home care support, diagnostics and medicines can become recurring monthly expenses changing the role of health insurance in household financial planning. Health cover today is increasingly becoming central to retirement protection. Without adequate coverage, even disciplined long-term savings can erode quickly after a major medical event.

Starting early

The advantage of starting early in instruments such as NPS is the ability to build a retirement corpus gradually over decades while benefiting from compounding and professional fund management. For younger earners especially, time is the biggest asset. Small but consistent contributions made early can potentially create significantly larger retirement outcomes compared with delayed investing later.

Traditional retirement strategies are not able to keep pace with realities.

Fixed deposits, long considered the safest retirement instrument, often fail to generate inflation-beating post-tax returns over long periods. Realty is illiquid and does not always provide reliable rental income. Pension cover in India is also limited.

At the same time, Indian society is changing. Urbanisation, migration, nuclear families and changing career patterns mean many retirees may no longer have the same family- support structures similar to earlier generations. Financial independence during retirement is an economic and a social necessity.

Starting early allows compounding to work over decades rather than years.

But retirement planning cannot be reduced to chasing market returns or accumulating the largest corpus. The larger objective is sustainability. People need savings that can survive inflation, market cycles and rising healthcare costs over long retirement periods.

India is entering a phase where ageing, healthcare, and personal finance will become deeply interconnected public issues. It's retirement conversation can no longer remain limited to tax-saving investments or fixed deposits.

The challenge is, how does a country prepare millions of people to financially sustain lives becoming longer, more expensive and medically more demanding? This would define the future of retirement planning in India.

Not seeking mediation on border: Nepal FM

Claim to the Kalapani-Lipulekh-Limpiyadhura trijunction is Kathmandu's focus, says Khanal

New 'political reality' in Nepal seeks to avoid 'old baggage' in ties with India, says Foreign Minister

To solve disputes through diplomacy; in contact with U.K. over documents not mediation: Khanal

GS II: IR

Kallol Bhattacherjee
NEW DELHI

Kathmandu is focused on establishing Nepal's claim on the Kalapani-Lipulekh-Limpiyadhura trijunction and is not "asking for mediation" by third parties, Nepal's Foreign Minister Shisir Khanal said here on Sunday.

At a press conference at the Embassy of Nepal, Mr. Khanal said he represented a "completely new political reality in Nepal" that was determined to deliver "uncompromising good governance". The new government of Prime Minister Balendra Shah was not in favour of tying Nepal-India relations down to "old baggage", he added.

"We want to solve our disputes through diplomatic processes. We just want to see if we can access some of the documents that might be in libraries or museums in the U.K. Our position was not that we were asking for mediation," Mr. Khanal said, elaborating on Mr. Shah's remarks that Nepal was in contact with China and the U.K. on the Kalapani-Lipulekh-Limpiyadhura dispute with India.

Shah's statement

"The problems that existed when British India left the region still persist, so we believe Britain also has a role to play in this matter," Mr. Shah had said in Nepal's Parliament, stirring debates.

India's Ministry of External Affairs had issued a rebuttal, reiterating that India and Nepal had established a bilateral mechanism for discussing the dispute, and there was no scope for third-party intervention.

As the new generation of rulers, the Rastriya Swatantra Party (RSP) refuses to "look at India through the distorted, hypersensitive lens of 20th century geopolitics", Mr. Khanal said. "Instead, the RSP wants to shift the entire vocabulary of Nepal-India relations away from geopolitical friction and square it firmly on development diplomacy," he added.

Field trip: Nepal's Foreign Minister Shisir Khanal visits the Embassy of Nepal in New Delhi on Sunday. ANI

After a gap of a few years, the border issue between the two sides began simmering again when India on April 30 announced the Kailash-Manasarovar Yatra for 2026, scheduled to be conducted in 20 batches of 50 pilgrims each.

The Ministry of External Affairs announced that the pilgrimage would be conducted "in coordination with the Government of the People's Republic of China" through the Lipulekh pass that is claimed by Nepal, and the Nathu La pass in Sikkim.

This announcement attracted a protest from Nepal, which communicated its objection to both India and China.

"We have expressed our position through an official diplomatic note to both India and China. We have clearly said to both countries that the land [Kalapani-Lipulekh-Limpiyadhura] belongs to us. That's been our historical claim," Mr. Khanal said in response to questions.

'More visits soon'

He said his visit to India had restarted the track of high-level interaction from the two sides, and more such visits would take place from Nepal's side soon with Finance Minister Swarnim Wagle expected to visit Delhi "very soon".

Mr. Khanal had held a formal meeting with External Affairs Minister S. Jaishankar on Saturday, when the two sides officially announced the operationalisation of peer-to-peer (P2P) cross-border payment transactions under a memorandum of understanding between Nepal Clearing House Ltd. and the National Payments Corporation of India, he said, which would enable digital and financial connectivity between the two sides.

The Nepal Prime Minister was focused on the "domestic front" as he was keen to show "early results" because of the "strong mandate" that the RSP had received in the May election, Mr. Khanal said, refusing to provide a "timeline" for Mr. Shah's visit to India.

The RSP led by Mr. Shah came to power after defeating the well-established, formerly dominant political players, including the Nepali Congress and the Maoist parties (Communist Party of Nepal-Unified Marxist-Leninist, or CPN-UML, and CPN-Maoist Centre).

Mr. Shah's rise to prime ministership took place against the backdrop of the "Gen Z uprising" in Nepal that overthrew the government of K.P. Sharma Oli after Mr. Oli launched a crackdown on Nepal's digital ecosystem in the first week of September 2025.

To a question on the fate of the report of the Eminent Persons Group set up over a decade ago to provide guidelines to India-Nepal bilateral ties, Mr. Khanal said, "The EPG was commissioned by an agreement of the two Prime Ministers, and the report can only be submitted to two Prime Ministers."

Bolivian Congress gives Paz power to use troops against crippling protests

GS II: IR

Agence France-Presse

LA PAZ

Bolivia's legislature gave the green light on Sunday for President Rodrigo Paz to use the military to clear roadblocks that have crippled key cities for weeks.

A month of heated demonstrations calling for the centre-right Paz to step down have paralysed the Andean nation, with blockades causing severe food and medicine shortages.

Endless lines at the pump have also led many to sleep in the vehicles to not lose their place.

A Bill relaxing the country's strict rules surrounding states of emergency passed the lower chamber following 15 hours of overnight debate, the body's President, Roberto Castro, announced.

Fireworks and tear gas explode together as police officers try to clear a highway during a protest in San Julian, Bolivia. REUTERS

Having already passed the Senate, it heads to Mr. Paz's desk for signature.

The new law comes a day after dozens of riot police backed by military vehicles fired tear gas as they attempted to clear a road in the town of San Julian.

The town is in the Santa Cruz region – an agricultural breadbasket supplying food to the country's western areas.

Protesters threw stones and burned tires to try to halt the police's advance.

Mr. Paz on Sunday wrote on X that that the capital La Paz and second city El Alto are "still facing difficult times, but concrete progress is also beginning to be made".

The U.S.-backed, pro-business Paz took office in November promising to resolve the country's worst economic crisis in decades, but his unpopular economic reforms and failure to respond to social demands have roused public ire.

The new rules would allow troops to use force against protesters, and grants them a "presumption of legality" in situations of conflict.

Weighing ties with Russia and West, conflicted, cornered Armenia votes

With mounting pressure from Russia against Armenia joining European Union and a vocally pro-Russian Opposition, Prime Minister Nikol Pashinyan and his ruling Civil Contract party, which advocates balanced ties with U.S., Europe and Moscow, are seeking a strong mandate in parliamentary polls

GS II: IR

Associated Press
YEREVAN

Armenians will vote Sunday in parliamentary elections as the incumbent government, under mounting Russian pressure, seeks to loosen ties with Moscow and deepen cooperation with the West.

Prime Minister Nikol Pashinyan and his ruling Civil Contract party are looking for a strong mandate for a new geopolitical course. The Opposition they face includes some parties that are vocally pro-Russian.

Russian officials have hit Armenian exports with a barrage of restrictions in recent weeks, while high-ranking officials, including President Vladimir Putin, have made thinly veiled threats comparing Armenia's path to that already taken by Ukraine.

Armenian investigators said they issued six arrest warrants for members of the Opposition Strong Armenia party the day before the vote, accusing them of buying votes. The nation's Central Election Committee confirmed Saturday that the party could run after a member of another Opposition party, Republic, appealed for Strong Armenia to be barred over corruption allegations.

Armenia's Parliament, the National Assembly, must consist of at least 101 members who are elected for five-year terms. Parties must win at least 4% of the vote to take a seat, while blocs made up of three or more parties must hit 8%.

Two political blocs and 17 parties are taking part in Sunday's election. Most pollsters and experts have predicted Mr. Pashinyan, who came to power in 2018 following sweeping street protests, will come out ahead.

Making a choice: A woman casts her ballot at a polling station in Yerevan during Armenia's parliamentary election on Sunday. AP

Balanced foreign policy

"I think Armenians expect, first of all, a peaceful, independent and prosperous Armenia from this election, as we have today," said Hripsime Grigoryan, a Civil Contract member of the outgoing Parliament.

Mr. Pashinyan has spoken on several occasions about the need for a balanced foreign policy ensuring Armenia maintains good relations with the United States, Europe and Russia, as well as regional powers such as Turkey and Iran. Despite this, he has attracted far more enthusiasm in the West than in Moscow. He has been endorsed by several European leaders, as well as U.S. President Donald Trump.

"Prime Minister Nikol Pashinyan, of Armenia, a great friend and Leader, is making his Country strong, wealthy, and very secure," Mr. Trump wrote on social media, urging Armenians to "Make (Armenia) Great Again."

This has displeased the Kremlin. Speaking to journalists after Russia's Victory Day parade on May 9, Mr. Putin said if the Armenian people saw benefits in joining the European Union then "we will certainly have nothing to say against it." Yet he also reminded reporters, "We are currently living through everything that is happening in respect of Ukraine. And how did it start? It started with Ukraine's joining or attempting to join the EU."

Unlike the Civil Contract party, most of Armenia's Opposition supports building stronger relations with Moscow.

The Strong Armenia party seeks to develop business ties with Russia and has accused Mr. Pashinyan of attempting to start a war with Moscow. Party leader Samvel Karapetyan is on trial for allegedly advocating for the government's overthrow, which the Armenian-Russian billionaire has rejected as a politically motivated case. He has coordinated the party's campaign while under house arrest, aided by his nephew Narek Karapetyan.

Other potential contenders include former President Robert Kocharyan, who leads the Hayastan bloc and has accused Mr. Pashinyan of "seriously undermining" relations with Russia, and the Prosperous Armenia Party led by pro-Russian business owner Gagik Tsarukyan. These parties also have strongly criticised Mr. Pashinyan for attempting to normalise relations with neighbouring Azerbaijan. The Armenian leader and Azerbaijani President Ilham Aliyev initialed a document on moving toward a peace deal at the White House alongside U.S. President Donald Trump in August.

The two countries were locked in a decades-long conflict over the fate of Karabakh, a breakaway region that had been controlled for decades by ethnic Armenian forces backed by Armenia. Azerbaijan took control of the entire Karabakh region during a rapid offensive in 2023.

"I want this government to change because the condition of our country is getting worse," Sahakyan Elina, a supporter of the Prosperous Armenia Party, told *AP* at a rally Thursday. "I don't want to live with my enemies in unity."

'Economic coercion'

Russian officials have slapped new restrictions on Armenian produce in the run-up to the parliamentary vote, banning the import of Armenian flowers, certain types of cognac and wine, eggplants, potatoes, dried fruits, fish and more. Russia says the bans are related to violations of agricultural import rules.

The European Commission on Thursday described the move as "nothing short of economic coercion." "By extending export restrictions on Armenian products, Moscow is weaponising economic relations for political pressure. We know this playbook all too well," the Commission said.

Moscow also controls a significant portion of Armenia's energy and infrastructure and supplies it with cheap gas, which is a point that Mr. Putin has been quick to drive home in his meetings with Mr. Pashinyan.

Mr. Putin also has stressed that Armenia cannot join the EU and remain within the Eurasian Economic Union, a Russian-led customs bloc. "Being in a customs union with the European Union and the Eurasian Economic Union is impossible," Mr. Putin said. "It's simply impossible by definition."

08J6. Weighing ties with Russia and West, conflicted, cornered Armenia votes रूस और पश्चिम के बीच संबंधों को तौलते हुए, दुविधाग्रस्त और दबावग्रस्त आर्मेनिया मतदान कर रहा है

GS III: Economy

Testing times

GDP data reveal some strengths, but they will come under strain

The GDP growth data released on Friday simultaneously portray recent economic strength and reveal some reasons for worry. The provisional estimates of GDP growth for 2025-26 have been pegged at 7.7%, which is marginally higher than the 7.6% predicted by the government in February. This suggests that March, the first full month since the West Asia crisis erupted, did not see enough of an impact to affect the full year's growth. That resilience will be dented in the months ahead. The data also showed that several key sectors of the economy, such as manufacturing and several services sectors, grew by double digits over and above a relatively high base. These are all good signs for an economy heading into severe supply-related headwinds due to the war in Iran. Notably, both Private Final Consumption Expenditure and Gross Fixed Capital Formation – metrics of household consumption and government and private sector investment activity, respectively – grew faster in 2025-26 than they did in the previous year. The consumption growth is especially welcome given that it had been at a tepid 5.8% for the previous two years. It remains to be seen how much of the investment growth was driven by the private sector. Even if this growth was driven by government spending, it has positive knock-on effects on the rest of the economy.

The weakness in the agriculture sector, however, is something to worry about. The sector's growth slowed to 3% in 2025-26 from 4.2% in 2024-25, despite the 2025 monsoon having concluded at 108% of its long period average (LPA). This is dire news, given that the India Meteorological Department has predicted that this year's monsoon will only be 90% of the LPA. That is not counting the fertilizer supply constraints that will really be felt in the months ahead. The data also show the rising dominance of services in the economy, with their share rising to 54.3% of total gross value added (GVA) in 2025-26, up from 51.9% in 2022-23. The agriculture sector, which continues to employ the largest share of the population by far, saw its share in GVA fall to below 20% from 22.1% in 2022-23. The manufacturing sector's share has remained largely unchanged, another cause for concern. This suggests that India is not growing its value-added manufacturing sector fast enough. The Reserve Bank of India (RBI), government, and independent economists are in agreement that 2026-27 will see growth slowing significantly. The RBI predicted growth will dip to 6.6%, and the Chief Economic Adviser said that he saw no need to second-guess this estimate. Last year's tariff-related disruptions were a test of India's export resilience. This year's energy supply disruptions will test the entire economy as well as the government's policy agility.

08J6.Testing times
परीक्षा की घड़ी

- The provisional estimates of **GDP growth** for **2025-26** have been pegged at **7.7%**, which is marginally higher than the **7.6%** predicted by the government in February.

2025-26 के लिए **जीडीपी वृद्धि** के अनंतिम अनुमान **7.7%** निर्धारित किए गए हैं, जो फरवरी में सरकार द्वारा अनुमानित **7.6%** से थोड़ा अधिक है।

- Notably, both **Private Final Consumption Expenditure** and **Gross Fixed Capital Formation** — metrics of household consumption and government and private sector investment activity, respectively — grew faster in **2025-26** than they did in the previous year.

विशेष रूप से **निजी अंतिम उपभोग व्यय (Private Final Consumption Expenditure)** तथा **सकल स्थिर पूंजी निर्माण (Gross Fixed Capital Formation)** — जो क्रमशः घरेलू उपभोग और सरकारी एवं निजी निवेश गतिविधियों के संकेतक हैं — ने **2025-26** में पिछले वर्ष की तुलना में अधिक तेज़ वृद्धि दर्ज की।

- This is dire news, given that the **India Meteorological Department (IMD)** has predicted that this year's monsoon will only be **90% of the LPA**.

यह अत्यंत चिंताजनक समाचार है, क्योंकि **भारत मौसम विज्ञान विभाग (IMD)** ने अनुमान लगाया है कि इस वर्ष का मानसून केवल **LPA के 90%** तक ही रहेगा।

- That is not counting the **fertilizer supply constraints** that will really be felt in the months ahead.

इसके अतिरिक्त आने वाले महीनों में महसूस की जाने वाली **उर्वरक आपूर्ति संबंधी बाधाओं** को इसमें शामिल नहीं किया गया है।

- The data also show the rising dominance of **services** in the economy, with their share rising to **54.3%** of total **gross value added (GVA)** in **2025-26**, up from **51.9%** in **2022-23**.

आँकड़े अर्थव्यवस्था में **सेवा क्षेत्र** के बढ़ते प्रभुत्व को भी दर्शाते हैं, जिसका हिस्सा **2025-26** में कुल **सकल मूल्य वर्धन (GVA)** का **54.3%** हो गया, जबकि **2022-23** में यह **51.9%** था।

- The **agriculture sector**, which continues to employ the largest share of the population by far, saw its share in **GVA** fall to below **20%** from **22.1%** in **2022-23**.

कृषि क्षेत्र, जो अब भी सबसे अधिक जनसंख्या को रोजगार प्रदान करता है, का **GVA** में हिस्सा **2022-23** के **22.1%** से घटकर **20%** से नीचे आ गया।

From borderland to India's strategic resource frontier

GS III: Economy

Sangmuan Hangsing

Researcher and alumnus of the Kautilya School of Public Policy

Within days of one another, official platforms of the Ministry of Mines cast several northeastern States in a similar frame – as repositories of strategic minerals and untapped potential. Manipur was described as a "quiet mineral frontier", Arunachal Pradesh as a "resource-rich frontier", while Meghalaya and Mizoram were portrayed through comparable narratives that emphasised the hidden wealth beneath their hills. Governments routinely publicise natural resources and development opportunities, and such descriptions would ordinarily attract little attention.

Taken together, however, they point to a broader shift in the language through which the northeast is increasingly being framed in the national conversation and strategic picture.

The critical mineral push

The timing is significant because critical minerals have moved from geological discussions into strategic ones. Lithium, cobalt, graphite, nickel and rare earth elements increasingly shape industrial competition, technological manufacturing and energy transitions. Batteries, semiconductors, renewable technologies and defence systems depend upon them, and countries have begun repositioning themselves around access to these resources. India itself continues to depend on imports for several critical minerals and has consequently expanded exploration efforts. According to a Ministry of Mines reply in Parliament, the Geological Survey of India undertook 43 critical mineral exploration projects across northeastern States during the 2022-23, 2023-24 and 2024-25 field seasons, covering minerals such as graphite, vanadium, lithium, rare earth elements, nickel and cobalt. Exploration activity has expanded across Arunachal Pradesh, Meghalaya, Assam, Nagaland and Manipur. In Manipur, projects involving nickel, cobalt and chromium exploration have recently been initiated.

Geological surveys have pointed toward mineral potential across the region for years.

Critical mineral ambitions must account for the people, land and history of northeast India

What appears to be changing is the language through which that significance is increasingly being understood. The northeast has long held strategic significance that extends beyond geology, but the framework through which that significance is understood now appears to be widening.

Shift in language

For decades, the northeast has figured in national strategy largely through the language of borders and security. Discussions have centred on insurgencies, territorial management, connectivity initiatives and geopolitics considerations involving neighbouring countries, while infrastructure and development were often justified as instruments of strategic access and territorial security.

The language of resources is increasingly entering a strategic space once dominated by concerns over borders and security. Critical minerals are now discussed alongside trade corridors and geopolitical access, with territorial and resource security converging. Places once viewed mainly as sensitive border regions are increasingly seen as strategic assets.

The repeated use of the word frontier is revealing, because frontiers rarely function as neutral descriptions. They do not merely describe geography; they often reflect how States imagine it. Historically, frontiers have been viewed as spaces awaiting integration, development or extraction because they appear as landscapes of future possibility.

The difficulty is that frontiers are rarely empty spaces waiting to be discovered. The hills and valleys of the northeast already contain dense social and political worlds structured around customary land systems, local institutions and long-standing relationships with territory. Questions of land often extend beyond economics, as they are also tied to authority, identity and memory. Resource extraction thus enters landscapes that already possess institutions and histories of their own.

These questions become particularly significant in regions where political uncertainties continue to shape everyday life. In Manipur, years of violence and displacement have intensified debates over land and territorial arrangements. Similar concerns about ownership, ecological vulnerability and local participation have surfaced across the northeast at different times. Projects involving land often acquire meanings that extend beyond development, as communities interpret them through the lens of trust, representation and political inclusion.

Resources and inclusion

India's search for critical resources is understandable within a global environment increasingly shaped by supply-chain uncertainty and strategic competition. The northeast itself also requires infrastructure, employment and economic opportunities that have remained uneven for decades. Questions surrounding resource development rarely fit neatly into positions of support or opposition.

How quickly these transitions unfold and who shapes them may matter as much as the resources themselves. For a very long time, national priorities and local realities in the northeast often moved at different speeds. Connectivity projects sometimes arrived without corresponding economic ecosystems, while strategic considerations frequently overshadowed questions surrounding participation and representation. Resource development risks reproducing similar tensions if extraction begins moving faster than institutions capable of managing its social consequences.

What is being debated extends beyond the minerals beneath the hills. The northeast has spent years being viewed first as a border to be secured and then as a corridor to be connected. If it now begins entering national imagination as a landscape of strategic resources, the question is whether this new frontier will finally include the people who already inhabit it, or merely assign another purpose to the land beneath their feet.

Investing in gold and silver

THINKINVESTOR

Geopolitical tensions around the world have made gold and silver important assets to have in one's investment portfolio. But you must be mindful of differences between the two assets.

GS III: Economy
Venkatesh Bangaruswamy

You would have observed how gold and silver prices have moved in recent times. It is also highly likely you gained from the price movements over the last year. With gold prices near record highs and silver prices very volatile, many appear undecided on the next course of action on the two metals. Should you buy now or wait for a dip? If so, should you buy physical or financial asset? Here, we discuss why market timing on gold and silver exchange traded funds (ETFs) is optimal.

Market timing?

The important decision you should make is whether to buy the physical asset or its financial equivalent viz. ETFs. It is optimal to invest in ETFs for two reasons. One, it is operationally efficient to buy and sell ETFs. And two, gold and silver ETFs closely track the spot price of the underlying metal. True, these ETFs trade at a premium to spot price but you may be able to capture a similar premium when you sell the ETF. Selling price of 24-carat physical gold is typically lower than its spot price.

The question of whether you should buy ETF units now or wait for a dip depends on how you invest in gold and silver and manage the positions. Typically, gold and silver form part of satellite portfolio within the core-satellite framework. In this framework, the core portfolio is goal-based and the satellite is trading portfolio, geared to capturing short-term price fluctuations in the market. That means you must be comfortable with market timing. To do this, you must be good at reading price charts – applying technical analysis. Otherwise, you could buy such research from investment professionals. Another choice would be to set up short-term systematic investment plans (SIPs) and take profit whenever the investment generates predefined absolute gains. This choice, however, removes market timing out of the decision process.

Conclusion

The geopolitical tensions around the world have made both gold and silver important assets to have in one's investment portfolio. But you must be mindful of the difference between the two assets. Gold is typically considered as safe haven during global crisis (referred to as flight to quality). Also, central banks across the world invest in gold to build reserves. Silver is primarily an input in manufacturing processes. So, their returns and price volatility may not always be similar.

(The author offers training programmes for individuals to manage their personal investments)

08J6. Investing in gold and silver

सोने और चांदी में निवेश

- If so, should you buy **physical or financial asset?**

यदि खरीदना है, तो क्या आपको भौतिक संपत्ति खरीदनी चाहिए या वित्तीय संपत्ति?

- Here, we discuss why market timing on **gold and silver exchange traded funds (ETFs)** is optimal.

यहाँ हम चर्चा करते हैं कि **गोल्ड और सिल्वर एक्सचेंज ट्रेडेड फंड्स (ETFs)** में बाजार का सही समय चुनना क्यों उपयुक्त है।

- An ETF is a basket of securities such as stocks, bonds, commodities, gold, government securities, or a combination of assets.

- One, it is operationally efficient to buy and sell ETFs.

पहला, ईटीएफ को खरीदना और बेचना परिचालन की दृष्टि से अधिक सुविधाजनक है।

- And two, **gold and silver ETFs** closely track the spot price of the underlying metal.

दूसरा, **गोल्ड और सिल्वर ईटीएफ** संबंधित धातु की स्पॉट कीमत का निकटता से अनुसरण करते हैं।

- True, these ETFs trade at a premium to spot price but you may be able to capture a similar premium when you sell the ETF.

यह सही है कि ये ईटीएफ स्पॉट कीमत से अधिक मूल्य पर कारोबार करते हैं, लेकिन जब आप ईटीएफ बेचते हैं तो आपको भी समान प्रीमियम प्राप्त हो सकता है।

- Selling price of **24-carat physical gold** is typically lower than its spot price.

24 कैरेट भौतिक सोने का विक्रय मूल्य सामान्यतः उसकी स्पॉट कीमत से कम होता है।

- Typically, gold and silver form part of **satellite portfolio** within the **core-satellite framework**.

आमतौर पर सोना और चांदी **कोर-सैटेलाइट ढाँचे** के अंतर्गत **सैटेलाइट पोर्टफोलियो** का हिस्सा होते हैं।

- In this framework, the core portfolio is goal-based and the satellite is trading portfolio, geared to capturing short-term price fluctuations in the market.

इस ढाँचे में कोर पोर्टफोलियो लक्ष्य-आधारित होता है और सैटेलाइट पोर्टफोलियो एक ट्रेडिंग पोर्टफोलियो होता है, जिसका उद्देश्य बाजार में अल्पकालिक मूल्य उतार-चढ़ाव से लाभ कमाना होता है।

- Another choice would be to set up short-term **systematic investment plans (SIPs)** and take profit whenever the investment generates predefined absolute gains.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

एक अन्य विकल्प अल्पकालिक **सिस्टेमैटिक इन्वेस्टमेंट प्लान (SIPs)** स्थापित करना है और जब भी निवेश पूर्वनिर्धारित निश्चित लाभ उत्पन्न करे, तब लाभ बुक करना है।

- **Gold** is typically considered as a safe **haven** during global crisis (referred to as **flight to quality**).
  वैश्विक संकट के दौरान **सोने** को सामान्यतः **सुरक्षित निवेश विकल्प (सेफ हेवन)** माना जाता है, जिसे **फ्लाइट टू क्वालिटी** कहा जाता है।
- Also, **central banks** across the world invest in gold to build reserves.
  इसके अतिरिक्त, दुनिया भर के **केंद्रीय बैंक** अपने भंडार बनाने के लिए सोने में निवेश करते हैं।
- **Silver** is primarily an input in manufacturing processes.
  चांदी मुख्य रूप से विनिर्माण प्रक्रियाओं में उपयोग होने वाला एक इनपुट है।
- So, their returns and price volatility may not always be similar.
  इसलिए, इन दोनों के प्रतिफल और मूल्य अस्थिरता हमेशा समान नहीं हो सकते।

Homo erectus fossil yields secrets long thought to be beyond genetics

That modern humans carry DNA fragments from two other members of the genus *Homo* raised the possibility that they may also harbour genetic material from other extinct human species; but in the 14 years since the Denisovan genome was published, no new genome from any other extinct human relative has been uncovered — until now

GS III: S&T

Arun Panchapakesan

For much of modern history, human evolution was thought to progress in linear fashion, with one species replacing another, one by one. The famous 'ape turning to human' cartoon illustrating a stooped primate gradually straightening into a modern man essentially captures this idea.

That picture began to change in the second half of the 19th century when scientists started to unearth human-like fossils. At the time, scientists used geological clues such as the depth at which a fossil was found and the rock layers surrounding it to determine the age of fossils. This method could establish which fossils were older or younger than others but did not reveal precise dates.

The timeline suggested an intriguing possibility, however. It appeared that these different kinds of humans had not followed one another in succession but had lived alongside each other. Radiometric dating techniques later confirmed this idea: multiple human species had coexisted on the earth at various points.

Series of surprises

In 2003, the Human Genome Project announced the first high-quality sequence of the human genome. Human beings finally possessed the secret to their own identity – the reason(s) they were unique. That sense of identity, however, proved to be short-lived.

In 2010, scientists published the genome of the Neanderthals, our closest extinct relatives. When they compared Neanderthal DNA with the genomes of living people, they uncovered a remarkable result. Most humans alive today carry around 1-2% Neanderthal DNA in their own genomes. In Africans, this percentage is slightly lower, but even their DNA is 0.3-0.5% Neanderthal.

The surprises did not end there. In 2012, scientists sequenced the genome of Denisovans, another human lineage, finding that some present-day populations, particularly in Oceania and parts of Southeast Asia, had 3-6% Denisovan DNA.

That we carry DNA fragments from two other members of the genus *Homo* raised the possibility that we may also harbour genetic material from other extinct human species. But in the 14 years since the Denisovan genome was published, no new genome from any other extinct human relative has been uncovered.

DNA after death

The difficulty lies in the nature of DNA itself. The moment an organism dies, its DNA begins to break down. Enzymes released from dying cells cut DNA into small pieces. Microbes and fungi invade the remains and further degrade the genetic material. Water and oxygen promote chemical reactions that further damage DNA. Then there are temperature fluctuations, solar radiation, and UV damage. Over a few tens of millennia, the DNA is reduced to a few small pieces.

To recover DNA from these ancient humans, scientists need to be very lucky. The specimen must have been exposed to cold, dry, and stable environments such as permafrost, frozen sediments, or the inside of a deep cave. This is very rare – and why only a small fraction of fossils contain usable DNA.

One such species whose DNA sequence has evaded us for a long time is *Homo erectus*, the species estimated to have originated over 2 million years ago and thought to be one of the first human relatives to spread widely across Africa, Europe, and Asia.

Acid etching

A recent study published in *Nature* has provided the first molecular sequences from *Homo erectus* fossils from China. Rather than attempting to recover DNA directly, the researchers extracted proteins preserved within the enamel of six *Homo erectus* teeth dated to around 4,00,000 years ago. Because proteins are the products of the DNA, their sequences can reveal portions of the underlying genetic information, providing a rare, albeit narrow, view into the genome of an extinct human species.

The method used to recover the genetic information is notable. Usually, recovering ancient DNA or proteins requires scientists to grind up part of a fossil, so museum curators are reluctant to permit such analyses, especially when there is no guarantee that usable genetic material will be recovered.

To overcome this problem, the researchers used acid etching, a technique where a small area of the tooth enamel is briefly exposed to a dilute acid solution, which dissolves microscopic amounts of tooth enamel and releases the proteins trapped within it. The fossil is left largely intact. Since tooth enamel is a highly mineralised tissue, it can trap and protect proteins for a long time.

The researchers proceeded to successfully recover enamel proteins from five male and one female *Homo erectus* individuals. When they compared the protein sequences with those of modern humans, Neanderthals, and Denisovans, they made two interesting discoveries.

First, all six *Homo erectus* individuals had a protein variant that has never been found in any other known species in the genus *Homo*. Second, they carried another variant present in Denisovans. This suggests populations related to these Chinese *Homo erectus* may have interbred with Denisovans in East Asia.

Shared story

However, because the results come from only the enamel proteins and not the entire genome, they are not conclusive. It was long known that the Denisovan genome contains DNA from a much older species of the human lineage. While this study points to *Homo erectus* as a possible candidate, it does not prove it.

Nevertheless, the study represents an advance far beyond the information it has generated, which by itself is tiny. This is the first effort to recover meaningful molecular data from *Homo erectus* fossils, long thought to be beyond the reach of genetics.

Though Neanderthals, Denisovans, and others have vanished from the earth, traces of their existence endure within our DNA. The more we look, the more we find that the story of humans is not only ours: it is theirs as well.

(Arun Panchapakesan is an assistant professor at the Y.R. Gaitonde Centre for AIDS Research and Education, Chennai. arun.panchapakesan@gmail.com)

Representative image of the bones of the *Homo erectus* fossil 'Turkana Boy', the most complete fossil of the species found to date. EINSAMER SCHÜTZE (CC BY-SA)

THE GIST

- Radiometric dating techniques have confirmed that multiple human species had coexisted on the earth at various points
- While the Human Genome Project in 2003 provided humans with a sense of unique identity, later studies showed the presence of Neanderthal and Denisovan DNA in the modern human genome
- A recent study on enamel from *Homo erectus* teeth has revealed a protein variant never found before in the genus as well as another variant present in Denisovans
- It was known that the Denisovan genome contains DNA from a much older species of human lineage and the study, while not conclusive, points to *Homo erectus* as a possible candidate

08J6. Homo erectus fossil yields secrets long thought to be beyond genetics होमो इरेक्टस जीवाश्म ने ऐसे रहस्यों का उद्घाटन किया जो लंबे समय तक आनुवंशिकी की पहुँच से परे माने जाते थे

- That **modern humans** carry **DNA fragments** from two other members of the genus **Homo** raised the possibility that they may also harbour **genetic material** from other **extinct human species**; but in the 14 years since the **Denisovan genome** was published, no new genome from any other extinct human relative has been uncovered — until now.
  यह तथ्य कि **आधुनिक मनुष्य** वंश **होमो** के दो अन्य सदस्यों के **डीएनए अंश** अपने भीतर धारण करते हैं, इस संभावना को जन्म देता है कि वे अन्य **विलुप्त मानव प्रजातियों** की **आनुवंशिक सामग्री** भी अपने भीतर संजोए हुए हो सकते हैं; किंतु **डेनिसोवन जीनोम** के प्रकाशित होने के बाद के 14 वर्षों में किसी अन्य विलुप्त मानव संबंधी का कोई नया जीनोम प्राप्त नहीं हुआ था — अब तक।
- **Radiometric dating techniques** later confirmed this idea: multiple human species had coexisted on the earth at various points.

  यद्यपि **निएंडरथल्स**, **डेनिसोवन्स** और अन्य मानव प्रजातियाँ पृथ्वी से विलुप्त हो चुकी हैं, फिर भी उनके अस्तित्व के चिह्न हमारे **डीएनए** में आज भी विद्यमान हैं।

Pyroprocessing: heat shows the way

GS III: S&T

Vasudevan Mukunth

Pyroprocessing is a way to change a solid material physically or chemically using high temperature. It is a dry process and very energy-intensive. The three sectors that use it most are cement-making, metallurgy, and nuclear power.

Of these, cement-making uses pyroprocessing the most. First, finely ground limestone, clay and iron — the raw materials — are fed into a rotary kiln. As the temperature increases to 900° C, the limestone loses its carbon dioxide, and at around 1,450° C, the mix partly melts to form marble-sized nodules called clinker. The clinker is then ground to produce cement.

In metallurgy, pyroprocessing is used to extract metals from their ores in multiple stages. For example, sulphide ores are heated in air — or roasted — to convert them into metal oxides, like zinc sulphide. Smelting melts an ore to separate the metal from waste impurities called slag. Heating limestone to yield lime is likewise called calcining.

In the nuclear industry, pyroprocessing has a slightly different meaning. It is used to reprocess spent nuclear fuel, in techniques developed in the 1980s and 1990s. First, used nuclear fuel is broken up into pieces and placed in a salt bath — usually a mixture of lithium and potassium chlorides at 500° C or more. Then, an electric current is passed through the salt bath, causing different elements to become separated depending on their electrochemical properties. Operators then recover the elements of interest in separate streams.

A rotary kiln is visible as the rust-coloured horizontal tube at the centre in this image of a cement plant in the U.S. GREG GOEBEL (CC BY-SA)

This form of pyroprocessing has been the subject of study in Japan, South Korea, and the U.S. and is used as part of programmes involving advanced fast reactors.

08J6. Pyroprocessing: heat shows the way

पाइरोप्रोसेसिंग: ऊष्मा मार्ग दिखाती है

- **Pyroprocessing** is a way to change a solid material physically or chemically using high temperature.
  पाइरोप्रोसेसिंग उच्च तापमान का उपयोग करके किसी ठोस पदार्थ में भौतिक अथवा रासायनिक परिवर्तन करने की एक विधि है।
- It is a dry process and very energy-intensive.
  यह एक शुष्क प्रक्रिया है तथा इसमें अत्यधिक ऊर्जा की आवश्यकता होती है।
- The three sectors that use it most are **cement-making**, **metallurgy**, and **nuclear power**.
  इसके सर्वाधिक उपयोग करने वाले तीन क्षेत्र **सीमेंट निर्माण**, **धातुकर्म** तथा **परमाणु ऊर्जा** हैं।
- Of these, **cement-making** uses pyroprocessing the most.
  इनमें से **सीमेंट निर्माण** में पाइरोप्रोसेसिंग का सबसे अधिक उपयोग होता है।
- First, finely ground **limestone**, **clay** and **iron** — the raw materials — are fed into a **rotary kiln**.
  सबसे पहले बारीक पिसे हुए **चूना पत्थर**, **मिट्टी** और **लौह** — जो कच्ची सामग्री हैं — को एक **रोटरी भट्ठी (रोटरी किल्न)** में डाला जाता है।
- As the temperature increases to **900° C**, the limestone loses its **carbon dioxide**, and at around **1,450° C**, the mix partly melts to form marble-sized nodules called **clinker**.
  जैसे-जैसे तापमान **900° सेल्सियस** तक बढ़ता है, चूना पत्थर अपनी **कार्बन डाइऑक्साइड** खो देता है, और लगभग **1,450° सेल्सियस** पर मिश्रण आंशिक रूप से पिघलकर संगमरमर के आकार की गांठें बनाता है, जिन्हें **क्लिंकर** कहा जाता है।
- The clinker is then ground to produce cement.
  इसके बाद **क्लिंकर** को पीसकर सीमेंट तैयार किया जाता है।

- In **metallurgy**, pyroprocessing is used to extract metals from their ores in multiple stages.
  धातुकर्म में पाइरोप्रोसेसिंग का उपयोग अयस्कों से धातुओं को अनेक चरणों में निकालने के लिए किया जाता है।
- For example, **sulphide ores** are heated in air — or roasted — to convert them into metal oxides, like **zinc sulphide**.
  उदाहरण के लिए, **सल्फाइड अयस्कों** को वायु में गर्म किया जाता है — अर्थात उनका **रोस्टिंग** किया जाता है — ताकि उन्हें धातु ऑक्साइडों में परिवर्तित किया जा सके, जैसे **जिंक सल्फाइड**।
- **Smelting** melts an ore to separate the metal from waste impurities called **slag**.
  स्मेल्टिंग में अयस्क को पिघलाया जाता है ताकि धातु को **स्लैग** कहलाने वाली अपशिष्ट अशुद्धियों से अलग किया जा सके।
- Heating **limestone** to yield **lime** is likewise called **calcining**.
  इसी प्रकार **चूना पत्थर** को गर्म करके **चूना** प्राप्त करने की प्रक्रिया को **कैल्सिनिंग** कहा जाता है।
- In the **nuclear industry**, pyroprocessing has a slightly different meaning.
  परमाणु उद्योग में पाइरोप्रोसेसिंग का अर्थ कुछ भिन्न होता है।
- It is used to reprocess **spent nuclear fuel**, in techniques developed in the **1980s and 1990s**.
  इसका उपयोग **उपयोग किए जा चुके परमाणु ईंधन** के पुनर्प्रसंस्करण के लिए किया जाता है, जिनकी तकनीकें **1980 और 1990 के दशक** में विकसित की गई थीं।
- First, used nuclear fuel is broken up into pieces and placed in a **salt bath** — usually a mixture of **lithium** and **potassium chlorides** at **500° C** or more.
  सबसे पहले प्रयुक्त परमाणु ईंधन को टुकड़ों में विभाजित किया जाता है और एक **लवण स्नान (सॉल्ट बाथ)** में रखा जाता है — जो सामान्यतः **लिथियम** और **पोटैशियम क्लोराइड** के मिश्रण से बना होता है तथा जिसका तापमान **500° सेल्सियस** या उससे अधिक होता है।
- Then, an electric current is passed through the salt bath, causing different elements to become separated depending on their **electrochemical properties**.
  इसके बाद लवण स्नान में विद्युत धारा प्रवाहित की जाती है, जिससे विभिन्न तत्व अपने **वैद्युत-रासायनिक गुणों** के आधार पर अलग हो जाते हैं।
- Operators then recover the elements of interest in separate streams.
  इसके पश्चात संचालक आवश्यक तत्वों को अलग-अलग धाराओं में प्राप्त कर लेते हैं।
- This form of pyroprocessing has been the subject of study in **Japan**, **South Korea**, and the **U.S.** and is used as part of programmes involving **advanced fast reactors**.
  पाइरोप्रोसेसिंग का यह स्वरूप **जापान**, **दक्षिण कोरिया** तथा **संयुक्त राज्य अमेरिका** में अध्ययन का विषय रहा है और इसका उपयोग **उन्नत तीव्र रिएक्टरों (एडवांस्ड फास्ट रिएक्टर्स)** से संबंधित कार्यक्रमों के एक भाग के रूप में किया जाता है।

Actor Salim Kumar passes away at 56

The Hindu Bureau
KOCHI

National award-winning Malayalam actor Salim Kumar, 56, passed away at a private hospital in Kochi late on Saturday night.

He was rushed to Amrita Hospital in the city after complaining of discomfort on Saturday morning and had been on ventilator support since.

Kumar has a medical history marked by recurring illnesses and had undergone a liver transplant a few years ago.

He has won both the National and State awards for 'Best Actor' for his moving portrayal in film *Adaminte Makan Abu* (2010). He has won the Kerala State Film Award on four occasions.

During the recent Kerala Assembly election, Kumar openly supported the Congress-led UDF, appearing alongside its leaders on several occasions and criticising the LDF leadership.

Since his debut in a small role in *Ishtamanu Nooru Vattam* (1996), Kumar has acted in over 250 films.

Salim Kumar

Kumar, who has acted in Tamil and Bengali movies, has also tried his luck in writing and directing.

Characters made unforgettable by him such as Manavalan in *Pulival Kalyanam*, Pyari in *Kalyanaraman*, Kannan Sranku in *Mayavi*, the mentally challenged character in *CID Moosa*, dance master Vikram in *Chathikkatha Chanthu*, advocate Mukundan Unni in *Meesha Madhavan*, Koshy in *Ee Parakkum Thalika*, and Chandran in *Kunjikoonan* were among those that found enduring popularity in meme culture.

07J6. Actor Salim Kumar passes away at 56
56 वर्ष की आयु में अभिनेता सलीम कुमार का निधन

- National award-winning Malayalam actor Salim Kumar, 56, passed away at a private hospital in **Kochi** late on Saturday night.
  राष्ट्रीय पुरस्कार विजेता मलयालम अभिनेता **सलीम कुमार**, 56, का शनिवार देर रात **कोच्चि** के एक निजी अस्पताल में निधन हो गया।
- He has won both the **National** and **State awards** for '**Best Actor**' for his moving portrayal in film **Adaminte Makan Abu (2010)**.
  उन्होंने फिल्म **Adaminte Makan Abu (2010)** में अपने मार्मिक अभिनय के लिए **सर्वश्रेष्ठ अभिनेता** का **राष्ट्रीय** और **राज्य पुरस्कार** दोनों जीते थे।
- He has won the **Kerala State Film Award** on four occasions.
  उन्होंने चार बार **केरल राज्य फिल्म पुरस्कार** जीता था।
- Since his debut in a small role in **Ishtamanu Nooru Vattam (1996)**, Kumar has acted in over **250 films**.

Ishtamanu Nooru Vattam (1996) में एक छोटे से किरदार से शुरुआत करने के बाद कुमार ने **250 से अधिक फिल्मों** में अभिनय किया।

- Kumar, who has acted in **Tamil** and **Bengali** movies, has also tried his luck in writing and directing.

तमिल और **बंगाली** फिल्मों में अभिनय कर चुके कुमार ने लेखन और निर्देशन में भी हाथ आजमाया।

HC raps U.P. police, says officers serve 'political bosses'

PCS: GS V

Ishita Mishra
NEW DELHI

Court slams illegal use of Gangsters Act to keep a homemaker in jail for 80 days

Questioning the functioning of the Uttar Pradesh police, the Allahabad High Court recently observed that the loyalties of the State's police officers often appear to be aligned with the ruling dispensation rather than the Constitution.

The remarks came from the Bench of Justice Vinod Diwakar, which was hearing a case pertaining to the Gangsters Act against Ghaziabad resident Rajendra Tyagi and his family on Wednesday. While quashing the case, the court found that the allegations arose from land and financial disputes and did not meet the legal requirements for invoking the stringent law.

The court expressed serious concern about the arrest of Lalita Tyagi, a homemaker, who spent nearly 80 days in jail. It termed her arrest "patently illegal, arbitrary and wholly unwarranted".

Reprimanding the police, the court noted that a deeply entrenched culture has taken root in which the rule of law is treated less as a Constitutional mandate and more as an administrative obstacle.

"The vertical loyalty of officers runs not toward the Constitution but toward the ruling dispensation. Field officers, acutely conscious of the transfer-posting economy, calibrate their conduct to satisfy political superiors. Encounter killings, selective crackdowns, and targeted use of the Gangsters Act against inconvenient individuals have periodically attracted judicial notice," the court said.

It further recorded a *prima facie* finding that former Ghaziabad Police Commissioner Ajay Kumar Mishra appeared to have misused his authority while approving the Gangsters Act proceedings.

07J6. HC raps U.P. police, says officers serve 'political bosses'

उच्च न्यायालय ने यू.पी. पुलिस को फटकार लगाई, कहा अधिकारी 'राजनीतिक आकाओं' की सेवा करते हैं

- Questioning the functioning of the **Uttar Pradesh police**, the **Allahabad High Court** recently observed that the loyalties of the State's police officers often appear to be aligned with the ruling dispensation rather than the **Constitution**.

उत्तर प्रदेश पुलिस के कार्यकलापों पर सवाल उठाते हुए **इलाहाबाद उच्च न्यायालय** ने हाल ही में टिप्पणी की कि राज्य के पुलिस अधिकारियों की निष्ठा अक्सर **संविधान** के बजाय सत्तारूढ़ व्यवस्था के प्रति दिखाई देती है।

- The remarks came from the Bench of **Justice Vinod Diwakar**, which was hearing a case pertaining to the **Gangsters Act** against **Ghaziabad** resident **Rajendra Tyagi** and his family on Wednesday.

ये टिप्पणियां **न्यायमूर्ति विनोद दिवाकर** की पीठ ने कीं, जो बुधवार को **गाजियाबाद** निवासी **राजेंद्र त्यागी** और उनके परिवार के विरुद्ध **गैंगस्टर्स एक्ट** से संबंधित मामले की सुनवाई कर रही थी।

- While quashing the case, the court found that the allegations arose from land and financial disputes and did not meet the legal requirements for invoking the stringent law.

मामले को निरस्त करते हुए न्यायालय ने पाया कि आरोप भूमि और वित्तीय विवादों से उत्पन्न हुए थे तथा कठोर कानून लागू करने की कानूनी आवश्यकताओं को पूरा नहीं करते थे।

- The court expressed serious concern about the arrest of **Lalita Tyagi**, a homemaker, who spent nearly **80 days in jail**.

न्यायालय ने गृहिणी **ललिता त्यागी** की गिरफ्तारी पर गंभीर चिंता व्यक्त की, जिन्होंने लगभग **80 दिन जेल में** बिताए।

- It termed her arrest "**patently illegal, arbitrary and wholly unwarranted**".

न्यायालय ने उनकी गिरफ्तारी को "**स्पष्ट रूप से अवैध, मनमानी और पूरी तरह अनुचित**" बताया।

- Reprimanding the police, the court noted that a deeply entrenched culture has taken root in which the **rule of law** is treated less as a Constitutional mandate and more as an administrative obstacle.

पुलिस को फटकार लगाते हुए न्यायालय ने कहा कि एक गहरी जड़ें जमा चुकी संस्कृति विकसित हो गई है, जिसमें **कानून के शासन** को संवैधानिक आदेश के बजाय प्रशासनिक बाधा के रूप में देखा जाता है।

- "The vertical loyalty of officers runs not toward the **Constitution** but toward the ruling dispensation.
  "अधिकारियों की ऊर्ध्वाधर निष्ठा **संविधान** की ओर नहीं बल्कि सत्तारूढ़ व्यवस्था की ओर होती है।
- Field officers, acutely conscious of the **transfer-posting economy**, calibrate their conduct to satisfy political superiors.
  मैदानी अधिकारी **स्थानांतरण-पदस्थापन व्यवस्था** के प्रति अत्यधिक सजग रहते हुए अपने व्यवहार को राजनीतिक वरिष्ठों को संतुष्ट करने के अनुरूप ढालते हैं।
- **Encounter killings**, selective crackdowns, and targeted use of the **Gangsters Act** against inconvenient individuals have periodically attracted judicial notice," the court said.
  मुठभेड़ हत्याएं, चुनिंदा कार्रवाई तथा असुविधाजनक व्यक्तियों के विरुद्ध **गैंगस्टर्स एक्ट** का लक्षित उपयोग समय-समय पर न्यायपालिका के संज्ञान में आया है," न्यायालय ने कहा।
- It further recorded a prima facie finding that former **Ghaziabad Police Commissioner Ajay Kumar Mishra** appeared to have misused his authority while approving the **Gangsters Act** proceedings.
  न्यायालय ने आगे प्रथम दृष्टया यह भी दर्ज किया कि पूर्व **गाजियाबाद पुलिस आयुक्त अजय कुमार मिश्रा** ने **गैंगस्टर्स एक्ट** की कार्यवाही को स्वीकृति देते समय अपने अधिकार का दुरुपयोग किया प्रतीत होता है।

Praggnanandhaa caps fairytale run with title win

The 20-year-old Grandmaster becomes the first Indian to clinch the coveted crown; overnight leader So settles for the second spot; Carlsen finishes fourth while Gukesh gets the wooden spoon

PCS

NORWAY CHESS

C. Shyam Sundar
OSLO

Amazing turnaround: Praggnanandhaa outwitted Firouzja, Carlsen, Gukesh and Keymer on the trot. FLICKR/NORWAYCHESS

The usually quiet Deichman Bjorvika, a public library here, was a beehive of activity well past its working hours on Friday. The reason – an Indian player answering to the name R. Praggnanandhaa had done the unthinkable, winning a chess tournament featuring Magnus Carlsen – as rare as the Northern Lights in a southern hemisphere sky.

The 20-year-old from Chennai stormed to the title in sensational style after languishing in the last place after round six of the Open event in Norway Chess 2026. He won four classical games on the trot and his victims included Alireza Firouzja, the great Carlsen, Gukesh and Vincent Keymer.

In the process, he became the first Indian to win the prestigious title.

Praggnanandhaa was as clinical as one could get as he accounted for the best with an impressive display as was evidenced by his decimation of Keymer.

He topped the leaderboard with 18 points, one ahead of American Wesley So, with his convincing win in the final round.

The Indian entered the game against Keymer needing to not only win but also hope that So didn't claim a victory in the classical against Firouzja. Fortune favours the brave and Praggnanandhaa outclassed his opponent to pick up three points. With So being held to a draw, another golden chapter was added to Indian chess.

While Praggnanandhaa came up with a special performance, his compatriot and World champion D. Gukesh's form was up-and-down. He finished with the wooden spoon after a last-round loss to Carlsen, who wound up fourth after an eminently forgettable outing.

The women's event saw Kazakhstan's Bibisara Assaubayeva slump to a defeat in her final outing after having clinched the title on Thursday (with a round to spare). China's Zhu Jiner had a strong finish to take the second spot ahead of the 2025 champion Anna Muzychuk.

India's Divya Deshmukh and Koneru Humpy suffered losses to finish fifth and sixth, respectively.

The results: 10th round:
Open: Alireza Firouzja (Fra, 15.5) lost to Wesley So (USA, 17) in Armageddon; Vincent Keymer (Ger, 11) lost to R. Praggnanandhaa (18); Magnus Carlsen (Nor, 13) bt D. Gukesh (8).
Women: Zhu Jiner (Chn, 16) bt Koneru Humpy (9); Ju Wenjun (Chn, 13.5) bt Bibisara Assaubayeva (Kaz, 16.5); Anna Muzychuk (Ukr, 15) bt Divya Deshmukh (10).
Final standings: Open: 1. Praggnanandhaa 18 points, 2. So 17, 3. Firouzja 15.5, 4. Carlsen 13, 5. Keymer 11, 6. Gukesh 8.
Women: 1. Assaubayeva 16.5, 2. Zhu 16, 3. Muzychuk 15, 4. Ju 13.5, 5. Divya 10, 6. Humpy 9.
(The writer is in Oslo at the invitation of Norway Chess).

Praggnanandhaa thrilled to prevail in a field featuring the elite players

C. Shyam Sundar
OSLO

Popular champion: Praggnanandhaa was swarmed by the fans after his triumph. FLICKR/NORWAYCHESS

R. Praggnanandhaa... the name is no more a tongue-twister. The chess world and fans have gotten used to it as the Indian Grandmaster just keeps winning and winning. Beating Magnus Carlsen in his own backyard in a tournament which he has dominated is no mean feat and he did it in style, winning four classical games in a row to surge to the top.

"Winning this is more special and Magnus was there. Here it's just the top players," he told the Indian media after beating Germany's Vincent Keymer in the 10th and final round to register a historic maiden triumph in Norway Chess 2026 at Deichman Bjorvika on Friday.

It may or may not be the biggest title of his career thus far, but his tournament win was a hugely popular one. He was swarmed by fans as the night wore on but managed to please them with autographs and pictures.

Carlsen was effusive in praise of the champion and said, "he won the last four classical games. That's as clutch as it gets. Pragg is an incredible fighter and it is fun to see him get rewarded for that." The World No. 1 lost both his classical games to the Indian GM.

Asked what was the reason for the turnaround after two losses in the middle of the tournament and being last after round six, Praggnanandhaa said: "I don't think I changed anything in particular. But the conscious effort of playing faster certainly helped me in my games. I had more time than my opponent in most of the games."

> The conscious effort of playing faster certainly helped me in my games

After a tepid run in the middle of the event, a phone call with his mother probably was the game-changer. Praggnanandhaa said he had spoken to her (on June 1) before the match against Alireza Firouzja and that she had told him 'It's a new month. You'll play well."

Play well... he really did.

07J6. Praggnanandhaa caps fairytale run with title win
प्रज्ञानानंद ने खिताब जीतकर अपने शानदार सफर को ऐतिहासिक मुकाम दिया

- The **20-year-old** from **Chennai** stormed to the title in sensational style after languishing in the last place after round six of the Open event in **Norway Chess 2026**.
  चेन्नई के **20 वर्षीय** खिलाड़ी ने **नॉर्वे चेस 2026** के ओपन वर्ग में छह राउंड के बाद अंतिम स्थान पर रहने के बावजूद शानदार वापसी करते हुए खिताब जीत लिया।
- His victims included **Alireza Firouzja**, the great **Magnus Carlsen**, **D. Gukesh** and **Vincent Keymer**.
  उन्होंने **अलीरेज़ा फिरूज़जा**, महान **मैग्नस कार्लसन**, **डी. गुकेश** और **विन्सेंट कीमर** को हराया।

- In the process, he became the **first Indian** to win the prestigious title.
  इस उपलब्धि के साथ वे यह प्रतिष्ठित खिताब जीतने वाले **पहले भारतीय** बन गए।
- He topped the leaderboard with **18 points**, one ahead of American **Wesley So**, with his convincing win in the final round.
  उन्होंने अंतिम राउंड में प्रभावशाली जीत दर्ज कर **18 अंक** के साथ शीर्ष स्थान हासिल किया और अमेरिकी **वेस्ली सो** से एक अंक आगे रहे।
- While Praggnanandhaa came up with a special performance, his compatriot and **World Champion D. Gukesh's** form was up-and-down.
  जहां प्रज्ञानानंद ने विशेष प्रदर्शन किया, वहीं उनके हमवतन और **विश्व चैंपियन डी. गुकेश** का प्रदर्शन उतार-चढ़ाव भरा रहा।
- He finished with the wooden spoon after a last-round loss to **Magnus Carlsen**.
  अंतिम राउंड में **मैग्नस कार्लसन** से हारने के बाद वे अंतिम स्थान पर रहे।
- **Carlsen** wound up fourth after an eminently forgettable outing.
  कार्लसन निराशाजनक प्रदर्शन के बाद चौथे स्थान पर रहे।
- The women's event saw **Kazakhstan's Bibisara Assaubayeva** slump to a defeat in her final outing after having clinched the title on Thursday with a round to spare.
  महिला वर्ग में **कज़ाखस्तान की बिबिसारा असाउबायेवा** ने एक राउंड शेष रहते गुरुवार को खिताब जीत लिया था, लेकिन अंतिम मुकाबले में उन्हें हार का सामना करना पड़ा।
- **China's Zhu Jiner** had a strong finish to take the second spot ahead of the **2025 champion Anna Muzychuk**.
  चीन की झू जिनर ने शानदार अंत करते हुए **2025 की चैंपियन अन्ना मुज़ीचुक** से आगे दूसरा स्थान हासिल किया।
- India's **Divya Deshmukh** and **Koneru Humpy** suffered losses to finish fifth and sixth, respectively.
  भारत की **दिव्या देशमुख** और **कोनेरू हम्पी** को हार का सामना करना पड़ा और वे क्रमशः पांचवें तथा छठे स्थान पर रहीं।

Andreeva ends Chwalinska's dream run for first Major title

PCS

FRENCH OPEN

Agence France-Presse
PARIS

Mirra Andreeva won her first Grand Slam title on Saturday by downing Polish qualifier Maja Chwalinska in straight sets in the French Open final.

The 19-year-old Russian beat Chwalinska 6-3, 6-2 to become the youngest Roland Garros women's singles champion since Monica Seles, then aged 18, won her third straight title in Paris in 1992.

With her first-ever Major crown, Andreeva also became the first player, man or woman, born after 2005 to win a Grand Slam.

The Coupe Suzanne Lenglen will now take centre spot in Andreeva's burgeoning trophy cabinet, which already features two WTA 1000 titles.

Defeat at the final hurdle brought to an end an astonishing run which started in qualifying for Chwalinska, who won nine matches in the French capital to become the first qualifier to reach the final in the Open era.

However, the World No. 114's career will now be on a different stratosphere as she will climb to 21 in the rankings and be assured of competing regularly in tennis' biggest tournaments.

Argentina's Horacio Zeballos and Spaniard Marcel Granollers won their second straight French Open men's doubles title by beating Harri Heliovaara and Henry Patten in the final.

Third title as a pair

The 41-year-old Zeballos and Granollers, 40, eased to a 6-4, 6-2 victory to secure their third Grand Slam title as a pairing, after also winning last year's US Open.

"Now we can say that it was an amazing two weeks," said Zeballos.

"I can't be more happy. I'm proud in this moment. Yeah, it's unbelievable. It's unbelievable feeling for us and for all of the team."

Finnish player Heliovaara and Britain's Patten missed out on a third Slam title themselves, having won the 2025 Australian Open and Wimbledon in 2024.

THE RESULTS

Women: Final: 8-Andreeva bt Chwalinska (Pol) 6-3, 6-2.
Men: Doubles: Final: 1-Zeballos (Arg) & Granollers (Esp) bt 2-Heliovaara (Fin) & Patten (GBr) 6-4, 6-2.

07J6. Andreeva ends Chwalinska's dream run for first Major title

एंड्रीवा ने च्वालिंस्का के सपनों के सफर को रोककर पहला ग्रैंड स्लैम खिताब जीता

- **Mirra Andreeva** won her first **Grand Slam** title on Saturday by downing Polish qualifier **Maja Chwalinska** in straight sets in the **French Open** final.

मिर्रा एंड्रीवा ने शनिवार को **फ्रेंच ओपन** के फाइनल में पोलैंड की क्वालीफायर **माजा च्वालिंस्का** को सीधे सेटों में हराकर अपना पहला **ग्रैंड स्लैम** खिताब जीता।

- The **19-year-old Russian** beat Chwalinska **6-3, 6-2** to become the youngest **Roland Garros women's singles champion** since **Monica Seles**, then aged 18, won her third straight title in Paris in **1992**.

19 वर्षीय रूसी खिलाड़ी ने च्वालिंस्का को **6-3, 6-2** से हराकर **1992** में **मोनिका सेलेस** के बाद सबसे कम उम्र की **रोलां गैरो महिला एकल चैंपियन** बनने का गौरव हासिल किया।

- With her first-ever **Major crown**, Andreeva also became the first player, man or woman, born after **2005** to win a **Grand Slam**.
  अपने पहले **मेजर खिताब** के साथ एंड्रीवा **2005** के बाद जन्मी पहली खिलाड़ी बनीं, जिन्होंने **ग्रैंड स्लैम** जीता है।
- **Argentina's Horacio Zeballos** and **Spain's Marcel Granollers** won their second straight **French Open men's doubles title** by beating **Harri Heliovaara** and **Henry Patten** in the final.
  अर्जेंटीना के होरासियो जेबालोस और **स्पेन के मार्सेल ग्रेनोलर्स** ने फाइनल में **हैरी हेलियोवारा** और **हेनरी पैटन** को हराकर लगातार दूसरा **फ्रेंच ओपन पुरुष युगल खिताब** जीता।

Third title as a pair
जोड़ी के रूप में तीसरा खिताब

- The **41-year-old Zeballos** and **40-year-old Granollers** eased to a **6-4, 6-2** victory to secure their third **Grand Slam title** as a pairing, after also winning last year's **US Open**.
  41 वर्षीय जेबालोस और **40 वर्षीय ग्रेनोलर्स** ने **6-4, 6-2** से जीत दर्ज कर जोड़ी के रूप में अपना तीसरा **ग्रैंड स्लैम खिताब** हासिल किया, इससे पहले उन्होंने पिछले वर्ष का **यूएस ओपन** भी जीता था।

India defeats Bangladesh, wins title for the sixth time

SAFF WOMEN'S C'SHIPS

MARGAO

India clinched the SAFF Women's Championship football title for the sixth time and its first in seven years with a 3-1 win over Bangladesh in the summit clash here on Saturday.

Pyari Xaxa (42nd), Sanfida Nongrum (46th) and Lynda Kom Serto (82nd) scored for India, while Ritu Porna Chakma (45+2) pulled one back for Bangladesh. The host had beaten the same opponents 3-0 in the group stage.

India ended the tournament unbeaten, scoring 18 goals while conceding just one. After five title-wins on the trot, India could not even reach the final in the last two editions when Bangladesh walked away with the trophy. India had last won the title in 2019.

Richly rewarded: The Indian women's team capped off an unbeaten run with the crown. AIFF

KAKAMIGAHARA [JAPAN]

Ashish Tani Purti's hat-trick powered the Indian men's hockey team to the U-18 Asia Cup title win after defeating host Japan 4-1 in the final here on Saturday.

Ashish Tani Purti starred with a hat-trick, while captain Ketan Kushwaha also found the back of the net as India produced a commanding display against the host.

Numada Gaku scored for Japan, according to a press release. The Indian women's team won the bronze medal after registering a commanding 3-0 victory over Korea in the third-place match. Sandeepa Kumari, captain Sweety Kujur and Nousheen Naz were on target as the women capped off their campaign with podium finish.

Hockey India announced a cash award of ₹3 lakh for each player in the men's team and ₹1.5 lakh for each member of the support staff.

Each member of the women's team was awarded ₹1 lakh while the support staff got ₹50,000 each.

Purti was awarded Player of the Match for his stellar performance in the men's final and was also recognised as the tournament's top scorer with an impressive 17 goals.

India further dominated the individual honours with Ayush Rajak being named the best goalkeeper. Among the women, Nausheen emerged as the top scorer with 12 goals. Sandeepa was adjudged the Player of the Match in women's final.

Champions: The Indian men's team celebrates the top-of-the-podium finish.
X@THEHOCKEYINDIA

The results: Men: Final: India 4 (Ashish Tani Purti 2, 28, 34, Ketan Kushwaha 30) bt Japan 1 (Numada Gaku 52).
Women: Third place: India 3 (Sandeepa Kumari 2, Sweety Kujur 16, Nousheen Naz 33) bt Korea 0.

Beaufort Castle

A 12th-century hilltop castle has emerged as a key strategic flashpoint in Israel's war with Hezbollah in occupied southern Lebanon

GS I: World History

Akul Baiju

REUTERS

The Beaufort Castle sits right beside the Litani River in southern Lebanon, with an unobstructed view of northern Israel and the sweeping Beqaa valley. The 900-year-old structure, which literally means "beautiful fort" in Old French, has come under renewed spotlight after the Israeli military invasion on June 1.

Originally called Qalaat al-Shaqif, or the "Castle of the High Rock," Beaufort was built by European crusaders atop older fortifications in 1139. Invaded and besieged multiple times throughout its long history, the bastion has been at the centre of the Israel-Lebanon conflict and a pain point in the fragile ceasefire, announced by U.S. President Donald Trump on April 17.

In 1190, the stately structure was captured by Saladin, the first Sultan of Egypt and Syria, who used it as an important border outpost to strengthen his reign. Due to its military importance, the castle has changed hands frequently, with Crusaders (most famously the Knights Templar), Egyptian Mamluks, Ottomans, and the French all leaving their marks on it.

The Frankish Crusaders created its two-storey keep with an entry through the ground floor, unlike other forts of its time. Exposed stone staircases cut directly into the rock were built, forcing visitors and attackers to ascend in a single file on the highly exposed path.

The Mamluks added curved towers to defend against the firing of spherical stones. They inscribed Arabic victory messages into the front gates of the castle. The Ottoman takeover saw the repartitioning of the 15,000-square-metre area for logistical and residential usage. They built barracks and added slits in the fort walls for precise firing.

Internal politics led to many of the early constructions being mined and later restored using crude stone.

The French period saw the stripping away of Ottoman influence and attempts at restoring Crusader architecture. Beaufort has a sharp 300m drop on one side and the valley on the other, protecting it from enemy attacks. This vantage point is still used for military strikes, surveillance, and the deployment of weaponry.

The natural trench between the fortress and the fast-flowing Litani leads to the city of Nabatieh, an ancient centre for the trade of precious spices and commodities like Myrrh and Frankincense in its historical Souk el-Tanen market.

Caught in the war

The sand-battered behemoth is on track to become a UNESCO World Heritage Site and has been included on the country's 'tentative list.' November 2024 saw the global body granting it provisional enhanced protection under the 1954 Hague Convention.

During the 1970s, the Palestine Liberation Organisation (PLO) attacked Israel from the fort's ramparts. Underground bunkers and command centres were constructed, with some going as deep as 65m underground.

In 1982, Israel invaded Lebanon, seized the fortress from the PLO, and raised the 'blue and white' for the first time. This was a significant moment. Then Israeli Defence Minister Ariel Sharon called the taking of Beirut a war that was "worth it" and rejected the allegations of it being "immoral."

The banner of Israel came down in 2000 when the Israelis blew up their bunkers and abandoned the castle, when they withdrew from Lebanon after 18 years of occupation. What followed was its opening to the public and years of restoration, with a brief pause in 2006 due to another Israeli invasion.

The 2026 invasion by Israel marks one of the most significant escalations in the conflict since the dawn of the millennium.

In March this year, Hezbollah fired rockets at Israel in retaliation for the U.S.-Israeli assassination of Iranian Supreme Leader Ayatollah Ali Khamenei. In response, Israel launched massive air strikes which were followed by a ground invasion.

The U.S.-backed ceasefire is functionally defunct, with both sides launching attacks against each other. Israel wants to push Hezbollah out of southern Lebanon and keep the territory it has captured. Hezbollah says it would continue to fight as long as Israel continues the occupation of Lebanese land.

07J6	Industrial salt pans threaten Sambhar Lake's survival औद्योगिक नमक पैन सांभर झील के अस्तित्व के लिए खतरा बन रहे हैं

GS I: Geography

Industrial salt pans threaten Sambhar Lake's survival

Sambhar Lake is India's largest inland saltwater wetland. When they analysed satellite data from 1984 to 2023, scientists found the lake depends heavily on seasonal rain, with water levels peaking in late summer and shrinking significantly in the dry season. Between 2022 and 2023, the lake's surface also shrank while salt pans nearby expanded. The authors said efforts to conserve the lake must separate industrial salt pans and the wetland environment, including natural saline land.

07J6. Industrial salt pans threaten Sambhar Lake's survival

औद्योगिक नमक पैन सांभर झील के अस्तित्व के लिए खतरा बन रहे हैं

- **Sambhar Lake** is **India's largest inland saltwater wetland**.

सांभर झील भारत की सबसे बड़ी अंतर्देशीय खारे पानी की आर्द्रभूमि है।

- The authors said efforts to conserve the lake must separate **industrial salt pans** and the **wetland environment**, including **natural saline land**.

अध्ययनकर्ताओं ने कहा कि झील के संरक्षण के लिए **औद्योगिक नमक उत्पादन क्षेत्रों** और **आर्द्रभूमि पारितंत्र** को, जिसमें **प्राकृतिक लवणीय भूमि** भी शामिल है, स्पष्ट रूप से अलग-अलग प्रबंधित किया जाना चाहिए।

SC balances child's right to know paternity, father's right to privacy

GS II: Polity

Rizmi Lia M.
CHENNAI

The Supreme Court, in a ruling last week, upheld the use of DNA test in a long-running paternity dispute, addressing the complex question of whether an individual's right to privacy overrides the need to determine parentage.

Earlier, the top court had consistently held in various judgments that DNA tests should not be ordered routinely, but there has never been a conclusive answer to when they should be permitted.

Paternity cases largely revolved around the concerns of legitimacy and the need to avoid illegitimising children. However, after the Supreme Court's landmark decision of *Justice K.S. Puttaswamy v. Union of India* in 2017 which ruled that the right to privacy is a fundamental right under Article 21 of the Constitution, the court has continuously ruled that compulsory DNA testing interferes with an individual's right to privacy and bodily autonomy.

The top court had earlier consistently held in various judgments that DNA tests should not be ordered routinely. ISTOCK/GETTY IMAGES

In the present case, Justice Sanjay Karol and Justice N. Kotiswar Singh upheld the trial court order directing a DNA test to prove paternity. The alleged father and appellant approached the court to overturn the trial order.

Section 112 of the Evidence Act, 1872 (Section 116 of the Bharatiya Sakshya Adhiniyam) states that a child is presumed to be legitimate unless the party disputing paternity proves that there was non-access for the relevant period of the marriage and it is upon the alleged father to prove the non-access.

In a series of older cases, the court has pulled back from using the DNA test to prove paternity. Especially since the above said section was enacted in 1872, when there was no scientific means to determine paternity. However, the DNA testing method became commercially available in India by the 1980s.

In 2014, the Supreme Court gave a wider interpretation in *Nandlal Wasudeo Badwaik v. Lata Nandlal Badwaik* holding that "in our opinion, when there is a conflict between a conclusive proof envisaged under law and a proof based on scientific advancement accepted by the world community to be correct, the latter must prevail over the former".

N.D. Tiwari case

In the same year, the N.D. Tiwari paternity row was highly publicised in which veteran politician Narayan Dutt Tiwari was compelled to take a DNA test that proved he was the biological father of Rohit Shekhar. The long-drawn-out six-year case established a significant legal precedent regarding privacy, scientific evidence, and the rights of children born out of wedlock. Though Tiwari strongly argued that his right to privacy was violated, the Delhi High Court and the Supreme Court ordered for the test.

In the present case, neither the court gave an unrestricted right to the child to demand DNA testing nor abandon the alleged father's right to privacy, but rather held that in the domain of right to privacy, it wants to balance the interests of the alleged father's privacy with that of the child's desire for closure on a question that has loomed large on his life.

07J6. SC balances child's right to know paternity, father's right to privacy
सुप्रीम कोर्ट ने बच्चे के पितृत्व जानने के अधिकार और पिता के निजता के अधिकार के बीच संतुलन बनाया

- However, after the Supreme Court's landmark decision of **Justice K.S. Puttaswamy v. Union of India (2017)** which ruled that the **right to privacy** is a fundamental right under **Article 21 of the Constitution**, the court has continuously ruled that compulsory DNA testing interferes with an individual's right to privacy and bodily autonomy.
  हालांकि, **जस्टिस के.एस. पुट्टस्वामी बनाम भारत संघ (2017)** के ऐतिहासिक निर्णय के बाद, जिसमें **निजता के अधिकार** को **संविधान के अनुच्छेद 21** के तहत मौलिक अधिकार माना गया, अदालत लगातार यह कहती रही है कि अनिवार्य डीएनए परीक्षण व्यक्ति की निजता और शारीरिक स्वायत्तता के अधिकार में हस्तक्षेप करता है।
- In the present case, **Justice Sanjay Karol** and **Justice N. Kotiswar Singh** upheld the trial court order directing a DNA test to prove paternity.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

वर्तमान मामले में **न्यायमूर्ति संजय करोल** और **न्यायमूर्ति एन. कोटिस्वर सिंह** ने पितृत्व सिद्ध करने के लिए डीएनए परीक्षण कराने के निचली अदालत के आदेश को बरकरार रखा।

- The alleged father and appellant approached the court to overturn the trial order.
  कथित पिता और अपीलकर्ता ने निचली अदालत के आदेश को निरस्त कराने के लिए अदालत का रुख किया था।
- **Section 112 of the Evidence Act, 1872 (Section 116 of the Bharatiya Sakshya Adhiniyam)** states that a child is presumed to be legitimate unless the party disputing paternity proves that there was non-access for the relevant period of the marriage and it is upon the alleged father to prove the non-access.
  भारतीय साक्ष्य अधिनियम, 1872 की धारा 112 (भारतीय साक्ष्य अधिनियम, 2023 की धारा 116) के अनुसार, किसी बच्चे को वैध माना जाएगा, जब तक कि पितृत्व पर विवाद करने वाला पक्ष यह सिद्ध न कर दे कि विवाह की संबंधित अवधि के दौरान पति-पत्नी के बीच संपर्क नहीं था, और यह साबित करने का दायित्व कथित पिता पर होता है।
- In a series of older cases, the court has pulled back from using the DNA test to prove paternity.
  पुराने मामलों की एक श्रृंखला में अदालत ने पितृत्व सिद्ध करने के लिए डीएनए परीक्षण के उपयोग से परहेज किया था।
- Especially since the above said section was enacted in **1872**, when there was no scientific means to determine paternity.
  विशेष रूप से इसलिए क्योंकि उपरोक्त धारा **1872** में बनाई गई थी, जब पितृत्व निर्धारित करने का कोई वैज्ञानिक साधन उपलब्ध नहीं था।
- However, the **DNA testing method** became commercially available in India by the **1980s**.
  हालांकि, **डीएनए परीक्षण पद्धति** भारत में **1980 के दशक** तक व्यावसायिक रूप से उपलब्ध हो गई थी।
- In **2014**, the Supreme Court gave a wider interpretation in **Nandlal Wasudeo Badwaik v. Lata Nandlal Badwaik** holding that "in our opinion, when there is a conflict between a conclusive proof envisaged under law and a proof based on scientific advancement accepted by the world community to be correct, the latter must prevail over the former".
  2014 में सुप्रीम कोर्ट ने **नंदलाल वासुदेव बडवाइक बनाम लता नंदलाल बडवाइक** मामले में व्यापक व्याख्या करते हुए कहा कि "हमारी राय में, जब कानून द्वारा परिकल्पित निर्णायक साक्ष्य और वैज्ञानिक प्रगति पर आधारित तथा विश्व समुदाय द्वारा सही माने गए साक्ष्य के बीच टकराव हो, तो बाद वाला पहले पर वरीयता प्राप्त करेगा।"

N.D. Tiwari case
एन.डी. तिवारी मामला

- In the same year, the **N.D. Tiwari paternity row** was highly publicised in which veteran politician **Narayan Dutt Tiwari** was compelled to take a DNA test that proved he was the biological father of **Rohit Shekhar**.
  उसी वर्ष **एन.डी. तिवारी पितृत्व विवाद** काफी चर्चित रहा, जिसमें वरिष्ठ राजनेता **नारायण दत्त तिवारी** को डीएनए परीक्षण कराने के लिए बाध्य किया गया था, जिसने सिद्ध किया कि वे **रोहित शेखर** के जैविक पिता थे।
- In the present case, neither the court gave an unrestricted right to the child to demand DNA testing nor abandon the alleged father's right to privacy, but rather held that in the domain of right to privacy, it wants to balance the interests of the alleged father's privacy with that of the child's desire for closure on a question that has loomed large on his life.
  वर्तमान मामले में अदालत ने न तो बच्चे को डीएनए परीक्षण की असीमित मांग का अधिकार दिया और न ही कथित पिता के निजता के अधिकार को त्यागा, बल्कि यह कहा कि निजता के अधिकार के क्षेत्र में वह कथित

पिता की गोपनीयता और बच्चे के उस प्रश्न का उत्तर पाने की इच्छा, जिसने उसके जीवन पर गहरा प्रभाव डाला है, दोनों के हितों के बीच संतुलन बनाना चाहती है।

The Gen Z trio that took on the CBSE

Vedant Shrivastava, Nisarga Adhikary and Sarthak Sidhant

The three students who were viciously trolled for raising their voice on public platforms against the CBSE's On-Screen Marking system stand vindicated after the Board admitted to flaws in the system

Maitri Porecha

ILLUSTRATION: R. RAJESH

Nisarga Adhikary, an 'ethical hacker', Vedant Shrivastava, and Sarthak Sidhant have exposed flaws in the CBSE's marking system.

Vedant Shrivastava (17), Nisarga Adhikary (19) and Sarthak Sidhant (18) were ordinary teenagers until two weeks ago, before they raised their voice on public platforms against the Central Board of Secondary Education's (CBSE) botched up On-Screen Marking system. After the board admitted to flaws in the system, the Gen Z trio stood vindicated.

Class 12 student Vedant was in for a rude shock when he got called 'anti-national,' on X, as he flagged receiving a stranger's answer sheet instead of his own to the Central Board of Secondary Education (CBSE).

One of the first students to raise his voice against the On-Screen Marking system deployed by the CBSE, Vedant, who is now being referred to as 'the primary whistleblower,' says that since he went public on X, what has ensued is utter 'chaos.' The trolling did not stop at being called an 'anti-national,' or 'Pakistani'. "People went on to comment about my physical appearance and my speech," he says. After pointing out the botch-up, senior officials at the CBSE admitted their mistake and traced his original physics answer sheet.

"I took to X to voice my concerns as CBSE was not replying to my distress calls. Because I am a minor, X does not specifically mention country or location but highlights the larger region to which the account belongs. In my case, this was South Asia, and I was brutally trolled and called a 'Pakistani,'" Vedant says.

After the CBSE portal for re-evaluation opened on June 2, Vedant applied to get 13 questions re-evaluated in four subjects – Computer Science, English, Mathematics and Physics.

An East Delhi resident, Vedant observes that the CBSE implemented On-Screen Marking in a hasty manner. "In my school, some teachers are very aged and they are used to checking answer copies by hand. They are not well versed with using computers. If the CBSE wants to implement the OSM system in 2027 they should give teachers proper training," he says.

It has been two weeks since Vedant's post on X, which blew the lid off a massive evaluation fiasco in the CBSE, but the media attention over the teenager has not died down.

"The controversy started affecting me but my family was very supportive," he says adding that he got 'distracted,' by the CBSE upheaval for the last two weeks but is now re-starting his preparation for the National Defence Academy entrance exams. "I aspire to be a fighter pilot with the Indian Air Force."

'Ethical hacker'

Nisarga Adhikary, a West Bengal-based "ethical hacker", exposed "critical vulnerabilities" in the CBSE's OSM portal, including leaking sensitive student information.

The CBSE immediately slipped into denial after Nisarga went public with his posts on X, and nearly after two weeks, it admitted to the flaws. "It was really frustrating for me that the CBSE and the Computer Emergency Response Team (CERT) took three months (since he first raised complaints in February) to admit the flaws in their portal," Nisarga told *The Hindu*. Between 2023 and 2025, Nisarga found himself embroiled in the Joint Entrance Exams (JEE) race, which he said was 'pretty depressing.' "I don't see a point in putting effort for an institute (Indian Institutes of Technology) when they are not even in top 100 ranking institutes across the world," he told *The Hindu*. Life came full circle for Nisarga when an expert IIT team invited him to fix the vulnerabilities in the CBSE's IT ecosystem. Asked why the students have been forced to take matters into their own hands, Nisarga says: "Gen Z holding people accountable is the way to go as some people in high places are full of ego."

At age 19, when most students are busy with regular schooling, Nisarga had already started interning in tech companies. He primarily identifies as a software engineer and has worked on digitising restaurant menus for a Mumbai-based tech company Skann before dabbling into an internship with Singapore-based crypto giant Cypherock and then interning with Bengaluru-based tech company Wavelength. Hacking into CBSE portals was his first brush with social activism, he says.

Nisarga says he has multiple job offers from Silicon Valley in California, and he does not want to 'waste his time going to college'. "In case I take up an offer in the U.S., I will aim to apply for an extraordinary talent visa [U.S. O-1 nonimmigrant visa], which allows individuals who have reached the top of their fields to live and work in the U.S.," he says. "However, I will stay back in India if I get a good research opportunity to work in IITs."

Nisarga believes in combining computer programming with activism to champion public rights causes around data privacy. The teen 'ethical hacker' has also publicly stated that he is 'queer,' and is concerned about the LGBTQ rights in India.

"I want to build an inclusive society where people are more accepting of each other. Religion is a coping mechanism whereas we need more scientific thought over religion to build an inclusive society," he says.

Ranchi-based Sarthak Sidhant is being chased by journalists since he alleged through comparison of public documents that the CBSE had diluted requirements to favour technology vendor COEMPT Eduteck in the OSM portal issue. Sarthak became what is likely the youngest person to depose in front of a Parliamentary Panel. After his deposition on June 2, he has not been able to return home, because he says he feels 'unsafe'. He felt compelled to shift to an undisclosed location after journalists reached his accommodation in New Delhi. "In Ranchi, I gather there are journalists waiting for me outside my house. I don't want to go back home, so I am staying put at an undisclosed location," he says.

Seeds of rationality

Sarthak says he is of a curious nature and he likes spending most of his time on his computer "digging into new things". "I do not like watching movies or web shows. What I like, however, is old songs with meaningful lyrics playing in the background while I work on my computer." Sarthak is a fan of progressive Indian poet Sahir Ludhianvi and when asked what his favourite works are, without hesitation, he immediately cites lyrics – *Tu Hindu banega na Musalaman banegaa, Insaan ki aulad hai, Insaan banega* (You will neither be a Hindu or Muslim, you are humanity's child you will be a human).

Sarthak says his parents had an intercaste marriage and they have an evolutionary and pragmatic perspective, which sowed seeds of rationality and logic in him since a young age. "After my father passed away due to cardiac arrest two years ago, I started questioning concepts like religion, philosophy and faith."

Sarthak wants to pursue engineering and go on to blend technology with social welfare for bettering lives. He looks up to Dinkar's poetry and cites the poet's famous work: *'Lohe ke ped hare honge,'* (Dried out trees will become green). "The sole message of this poetry is that one should keep asking questions and put in constant efforts to seek answers," he says.

THE GIST

- Vedant Shrivastava, one of the first students to raise his voice against the On-Screen Marking system deployed by the CBSE, is now being referred to as 'the primary whistleblower'
- Nisarga Adhikary, a 19-year-old cybersecurity researcher, exposed "critical vulnerabilities" in the CBSE's OSM portal, including leaking sensitive student information
- Ranchi-based Sarthak Sidhant has alleged through comparison of public documents that the CBSE had diluted requirements to favour technology vendor COEMPT Eduteck in the OSM portal issue

07J6. The Gen Z trio that took on the CBSE
सीबीएसई को चुनौती देने वाली जेन-ज़ेड की तिकड़ी

- **Vedant Shrivastava, Nisarga Adhikary and Sarthak Sidhant**
  वेदांत श्रीवास्तव, निसर्ग अधिकारी और सार्थक सिद्धांत
- The three students who were viciously trolled for raising their voice on public platforms against the **CBSE's On-Screen Marking system** stand vindicated after the Board admitted to flaws in the system.
  सीबीएसई की ऑन-स्क्रीन मार्किंग प्रणाली के खिलाफ सार्वजनिक मंचों पर आवाज उठाने के कारण बुरी तरह ट्रोल किए गए इन तीन छात्रों को तब सही साबित किया गया जब बोर्ड ने प्रणाली में खामियों को स्वीकार कर लिया।
- **Vedant Shrivastava (17)**, **Nisarga Adhikary (19)** and **Sarthak Sidhant (18)** were ordinary teenagers until two weeks ago, before they raised their voice on public platforms against the **Central Board of Secondary Education's (CBSE)** botched up **On-Screen Marking system**.
  वेदांत श्रीवास्तव (17), **निसर्ग अधिकारी (19)** और **सार्थक सिद्धांत (18)** दो सप्ताह पहले तक सामान्य किशोर थे, जब तक उन्होंने **केंद्रीय माध्यमिक शिक्षा बोर्ड (सीबीएसई)** की त्रुटिपूर्ण **ऑन-स्क्रीन मार्किंग प्रणाली** के खिलाफ सार्वजनिक मंचों पर आवाज नहीं उठाई थी।
- After the board admitted to flaws in the system, the **Gen Z trio** stood vindicated.
  बोर्ड द्वारा प्रणाली में खामियां स्वीकार करने के बाद **जेन-ज़ेड की यह तिकड़ी** सही साबित हुई।
- Class 12 student **Vedant** was in for a rude shock when he got called 'anti-national' on **X**, as he flagged receiving a stranger's answer sheet instead of his own to the **Central Board of**

Secondary Education (CBSE).

कक्षा 12 के छात्र **वेदांत** को उस समय बड़ा झटका लगा जब उन्हें **X** पर 'राष्ट्रविरोधी' कहा गया, क्योंकि उन्होंने **सीबीएसई** से अपनी उत्तरपुस्तिका के बजाय किसी अन्य छात्र की उत्तरपुस्तिका मिलने का मुद्दा उठाया था।

- One of the first students to raise his voice against the **On-Screen Marking system** deployed by the **CBSE**, Vedant, who is now being referred to as 'the primary whistleblower,' says that since he went public on **X**, what has ensued is utter 'chaos.'

  सीबीएसई द्वारा लागू **ऑन-स्क्रीन मार्किंग प्रणाली** के खिलाफ सबसे पहले आवाज उठाने वाले छात्रों में से एक वेदांत, जिन्हें अब 'मुख्य व्हिसलब्लोअर' कहा जा रहा है, बताते हैं कि **X** पर सार्वजनिक रूप से बोलने के बाद पूरी तरह 'अराजकता' फैल गई।
- The trolling did not stop at being called an 'anti-national,' or 'Pakistani'.

  ट्रोलिंग केवल 'राष्ट्रविरोधी' या 'पाकिस्तानी' कहे जाने तक सीमित नहीं रही।
- "People went on to comment about my physical appearance and my speech," he says.

  "लोगों ने मेरी शारीरिक बनावट और बोलने के तरीके पर भी टिप्पणियां करनी शुरू कर दीं," उन्होंने कहा।
- After pointing out the botch-up, senior officials at the **CBSE** admitted their mistake and traced his original **Physics answer sheet**.

  त्रुटि की ओर ध्यान दिलाने के बाद **सीबीएसई** के वरिष्ठ अधिकारियों ने अपनी गलती स्वीकार की और उनकी मूल **भौतिकी उत्तरपुस्तिका** खोज निकाली।
- "I took to **X** to voice my concerns as **CBSE** was not replying to my distress calls.

  "मैंने अपनी चिंताएं व्यक्त करने के लिए **X** का सहारा लिया क्योंकि **सीबीएसई** मेरी शिकायतों का जवाब नहीं दे रहा था।
- Because I am a minor, **X** does not specifically mention country or location but highlights the larger region to which the account belongs.

  क्योंकि मैं नाबालिग हूं, **X** विशेष रूप से देश या स्थान का उल्लेख नहीं करता बल्कि उस बड़े क्षेत्र को दर्शाता है जिससे खाता संबंधित है।
- In my case, this was **South Asia**, and I was brutally trolled and called a 'Pakistani,'" Vedant says.

  मेरे मामले में यह **दक्षिण एशिया** था और मुझे बुरी तरह ट्रोल किया गया तथा 'पाकिस्तानी' कहा गया," वेदांत ने कहा।
- After the **CBSE portal** for re-evaluation opened on **June 2**, Vedant applied to get **13 questions** re-evaluated in four subjects — **Computer Science, English, Mathematics and Physics**.

  2 जून को पुनर्मूल्यांकन हेतु **सीबीएसई पोर्टल** खुलने के बाद वेदांत ने **कंप्यूटर साइंस, अंग्रेज़ी, गणित और भौतिकी** के **13 प्रश्नों** के पुनर्मूल्यांकन के लिए आवेदन किया।
- An **East Delhi** resident, Vedant observes that the **CBSE** implemented **On-Screen Marking** in a hasty manner.

  पूर्वी दिल्ली निवासी वेदांत का मानना है कि **सीबीएसई** ने **ऑन-स्क्रीन मार्किंग** को जल्दबाजी में लागू किया।
- "In my school, some teachers are very aged and they are used to checking answer copies by hand.

  "मेरे विद्यालय में कुछ शिक्षक काफी उम्रदराज हैं और वे हाथ से उत्तरपुस्तिकाएं जांचने के आदी हैं।
- They are not well versed with using computers.

  वे कंप्यूटर के उपयोग में अधिक दक्ष नहीं हैं।
- If the **CBSE** wants to implement the **OSM system** in **2027** they should give teachers proper training," he says.

  यदि **सीबीएसई 2027** में **ओएसएम प्रणाली** लागू करना चाहता है तो उसे शिक्षकों को उचित प्रशिक्षण देना चाहिए," उन्होंने कहा।
- It has been two weeks since Vedant's post on **X**, which blew the lid off a massive evaluation fiasco in the **CBSE**, but the media attention over the teenager has not died down.

वेदांत की **X** पोस्ट को दो सप्ताह हो चुके हैं, जिसने **सीबीएसई** के मूल्यांकन घोटाले का खुलासा किया, लेकिन मीडिया का ध्यान अब भी उन पर बना हुआ है।

- "The controversy started affecting me but my family was very supportive," he says adding that he got 'distracted' by the **CBSE** upheaval for the last two weeks but is now re-starting his preparation for the **National Defence Academy** entrance exams.
  "इस विवाद का मुझ पर प्रभाव पड़ने लगा था, लेकिन मेरा परिवार बहुत सहयोगी था," उन्होंने कहा और जोड़ा कि पिछले दो सप्ताह से **सीबीएसई** विवाद के कारण उनका ध्यान भटक गया था, लेकिन अब वे **राष्ट्रीय रक्षा अकादमी** प्रवेश परीक्षा की तैयारी फिर से शुरू कर रहे हैं।
- "I aspire to be a fighter pilot with the **Indian Air Force**."
  "मैं **भारतीय वायुसेना** में फाइटर पायलट बनना चाहता हूं।"

'Ethical hacker'
'एथिकल हैकर'

- **Nisarga Adhikary**, a **West Bengal-based** "ethical hacker", exposed "critical vulnerabilities" in the **CBSE's OSM portal**, including leaking sensitive student information.
  पश्चिम बंगाल के "एथिकल हैकर" **निसर्ग अधिकारी** ने **सीबीएसई के ओएसएम पोर्टल** में "गंभीर कमजोरियों" का खुलासा किया, जिनमें छात्रों की संवेदनशील जानकारी का लीक होना भी शामिल था।
- "I don't see a point in putting effort for an institute (**Indian Institutes of Technology**) when they are not even in top 100 ranking institutes across the world," he told The Hindu.
  "जब **भारतीय प्रौद्योगिकी संस्थान (IIT)** दुनिया के शीर्ष 100 संस्थानों में भी नहीं हैं, तो वहां प्रवेश पाने के लिए अत्यधिक प्रयास करने का मुझे कोई विशेष कारण नहीं दिखता," उन्होंने कहा।
- Life came full circle for Nisarga when an expert **IIT** team invited him to fix the vulnerabilities in the **CBSE's IT ecosystem**.
  निसर्ग के जीवन में एक दिलचस्प मोड़ तब आया जब एक विशेषज्ञ **आईआईटी** टीम ने उन्हें **सीबीएसई के आईटी तंत्र** की कमजोरियों को दूर करने के लिए आमंत्रित किया।
- Asked why the students have been forced to take matters into their own hands, Nisarga says: "**Gen Z** holding people accountable is the way to go as some people in high places are full of ego."
  जब उनसे पूछा गया कि छात्रों को खुद आगे क्यों आना पड़ा, तो निसर्ग ने कहा, "**जेन-ज़ेड** द्वारा लोगों को जवाबदेह ठहराना जरूरी है क्योंकि ऊंचे पदों पर बैठे कुछ लोग अहंकार से भरे हुए हैं।"
- At age **19**, when most students are busy with regular schooling, Nisarga had already started interning in tech companies.
  19 वर्ष की आयु में, जब अधिकांश छात्र नियमित पढ़ाई में व्यस्त रहते हैं, निसर्ग तकनीकी कंपनियों में इंटर्नशिप शुरू कर चुके थे।
- He primarily identifies as a **software engineer** and has worked on digitising restaurant menus for a Mumbai-based tech company **Skann** before dabbling into an internship with Singapore-based crypto giant **Cypherock** and then interning with Bengaluru-based tech company **Wavelength**.
  वे स्वयं को मुख्य रूप से **सॉफ्टवेयर इंजीनियर** मानते हैं और मुंबई की तकनीकी कंपनी **Skann**, सिंगापुर की क्रिप्टो कंपनी **Cypherock** तथा बेंगलुरु की तकनीकी कंपनी **Wavelength** के साथ कार्य कर चुके हैं।
- Hacking into **CBSE** portals was his first brush with social activism, he says.
  उनके अनुसार **सीबीएसई** पोर्टलों से जुड़ा यह मामला सामाजिक सक्रियता का उनका पहला अनुभव था।
- Nisarga says he has multiple job offers from **Silicon Valley** in **California**, and he does not want to 'waste his time going to college'.
  निसर्ग का कहना है कि उन्हें **कैलिफोर्निया की सिलिकॉन वैली** से कई नौकरी प्रस्ताव मिले हैं और वे 'कॉलेज जाकर समय बर्बाद नहीं करना चाहते'।
- "In case I take up an offer in the **U.S.**, I will aim to apply for an **extraordinary talent visa (U.S. O-1 nonimmigrant visa)**, which allows individuals who have reached the top of their

fields to live and work in the U.S.," he says.
"यदि मैं **अमेरिका** में कोई प्रस्ताव स्वीकार करता हूं, तो मैं **यू.एस. O-1 गैर-आप्रवासी वीज़ा** के लिए आवेदन करूंगा," उन्होंने कहा।

- "However, I will stay back in India if I get a good research opportunity to work in **IITs**."
"हालांकि, यदि मुझे **आईआईटी** में अच्छा शोध अवसर मिलता है तो मैं भारत में ही रहूंगा।"
- Nisarga believes in combining **computer programming** with activism to champion public rights causes around **data privacy**.
निसर्ग **कंप्यूटर प्रोग्रामिंग** और सामाजिक सक्रियता को जोड़कर **डेटा गोपनीयता** से जुड़े जनहित के मुद्दों को आगे बढ़ाने में विश्वास रखते हैं।
- The teen 'ethical hacker' has also publicly stated that he is 'queer,' and is concerned about the **LGBTQ rights** in India.
इस युवा 'एथिकल हैकर' ने सार्वजनिक रूप से स्वयं को 'क्वियर' बताया है और भारत में **LGBTQ अधिकारों** को लेकर चिंता व्यक्त की है।
- "I want to build an inclusive society where people are more accepting of each other.
"मैं एक समावेशी समाज बनाना चाहता हूं जहां लोग एक-दूसरे को अधिक स्वीकार करें।
- Religion is a coping mechanism whereas we need more scientific thought over religion to build an inclusive society," he says.
धर्म एक सहारा देने वाली व्यवस्था हो सकता है, लेकिन समावेशी समाज बनाने के लिए हमें अधिक वैज्ञानिक सोच की आवश्यकता है," उन्होंने कहा।

Seeds of rationality
तार्किकता के बीज

- **Ranchi-based Sarthak Sidhant** is being chased by journalists since he alleged through comparison of public documents that the **CBSE** had diluted requirements to favour technology vendor **COEMPT Eduteck** in the **OSM portal** issue.
रांची निवासी सार्थक सिद्धांत तब से मीडिया की सुर्खियों में हैं, जब उन्होंने सार्वजनिक दस्तावेजों की तुलना के आधार पर आरोप लगाया कि **सीबीएसई** ने **COEMPT Eduteck** को लाभ पहुंचाने के लिए **ओएसएम पोर्टल** से जुड़े मानदंडों को शिथिल किया।
- Sarthak became what is likely the youngest person to depose in front of a **Parliamentary Panel**.

  वे **दिनकर की कविताओं** से प्रेरित हैं और उनकी प्रसिद्ध पंक्ति '**लोहे के पेड़ हरे होंगे**' का उल्लेख करते हैं।
- "The sole message of this poetry is that one should keep asking questions and put in constant efforts to seek answers," he says.
  "इस कविता का मुख्य संदेश है कि व्यक्ति को लगातार प्रश्न पूछते रहना चाहिए और उत्तर खोजने के लिए निरंतर प्रयास करते रहना चाहिए," उन्होंने कहा।

Govt. standardises edible oil pack sizes for price comparison

GS II: Governance

Meenakshi Verma Ambwani
NEW DELHI

The revised SoP prescribes nine standard pack sizes.

The Department of Consumer Affairs has prescribed standard pack sizes for edible oils under the Legal Metrology framework to help consumers compare prices across brands and make informed purchasing decisions.

In a statement, the Department said it has amended the Standard Operating Procedure (SoP) governing net quantity declarations and standard pack sizes for edible oils and fats. Manufacturers, packers and importers have three months to comply with the new norms.

The move follows consultations with industry associations representing nearly 90% of the edible oil sector. According to the Department, the proliferation of non-standard pack sizes in recent years has made price comparison difficult and created confusion among consumers.

The revised SoP prescribes nine standard pack sizes – 200 ml/g, 500 ml/g, 1 litre/kg, 2 litre/kg, 3 litre/kg, 4 litre/kg, 5 litre/kg, 15 litre/kg and 20 litre/kg – for major edible oils, including palm, soybean, sunflower, mustard, groundnut, sesame, rice bran, cottonseed and corn oil, as well as blended oils.

Volume declaration

The new rules also mandate declaration of both volume and equivalent weight on packs to improve transparency. The provisions apply to both domestically manufactured and imported edible oils. Packages below 200 ml or 200 grams and minor edible oils have been exempted from the standard pack-size requirement to ensure the continued availability of affordable small packs. Companies may adopt the new pack sizes immediately, even before the transition period ends.

Welcoming the move, Sudhakar Desai, president of the Indian Vegetable Oil Producers' Association, said it would "restore structural sanity to retail shelves and level the playing field".

He noted while flexibility in pack sizes was intended to give industry greater freedom, it had led to a proliferation of non-standard packs and widespread market confusion.

(The writer is with The Hindu businessline)

07J6. Govt. standardises edible oil pack sizes for price comparison

मूल्य तुलना के लिए सरकार ने खाद्य तेल पैक आकारों का मानकीकरण किया

- The **Department of Consumer Affairs** has prescribed **standard pack sizes** for edible oils under the **Legal Metrology** framework to help consumers compare prices across brands and make informed purchasing decisions.
  उपभोक्ता मामले विभाग ने उपभोक्ताओं को विभिन्न ब्रांडों की कीमतों की तुलना करने और सूचित खरीद निर्णय लेने में सहायता हेतु **लीगल मेट्रोलॉजी** ढांचे के तहत खाद्य तेलों के लिए **मानक पैक आकार** निर्धारित किए हैं।
- The revised **SoP** prescribes **nine standard pack sizes — 200 ml/g, 500 ml/g, 1 litre/kg, 2 litre/kg, 3 litre/kg, 4 litre/kg, 5 litre/kg, 15 litre/kg and 20 litre/kg** — for major edible oils.
  संशोधित **SoP** के अनुसार प्रमुख खाद्य तेलों के लिए **नौ मानक पैक**

आकार — 200 मि.ली./ग्राम, 500 मि.ली./ग्राम, 1 लीटर/किलोग्राम, 2 लीटर/किलोग्राम, 3 लीटर/किलोग्राम, 4 लीटर/किलोग्राम, 5 लीटर/किलोग्राम, 15 लीटर/किलोग्राम और 20 लीटर/किलोग्राम — निर्धारित किए गए हैं।

- These include **palm, soybean, sunflower, mustard, groundnut, sesame, rice bran, cottonseed and corn oil**, as well as **blended oils**.
  इनमें **पाम, सोयाबीन, सूरजमुखी, सरसों, मूंगफली, तिल, राइस ब्रान, कपास बीज और मक्का तेल** सहित **मिश्रित तेल** भी शामिल हैं।

Volume declaration
आयतन घोषणा

- The new rules also mandate declaration of both **volume** and **equivalent weight** on packs to improve transparency.
  नए नियमों के तहत पारदर्शिता बढ़ाने के लिए पैकेटों पर **आयतन** और उसके **समतुल्य वजन** दोनों का उल्लेख करना अनिवार्य होगा।
- He noted while flexibility in pack sizes was intended to give industry greater freedom, it had led to a proliferation of **non-standard packs** and widespread market confusion.
  उन्होंने कहा कि यद्यपि पैक आकारों में लचीलापन उद्योग को अधिक स्वतंत्रता देने के उद्देश्य से था, लेकिन इससे **गैर-मानक पैकों** की संख्या बढ़ी और बाजार में व्यापक भ्रम की स्थिति उत्पन्न हुई।

Why did SC back curbs on online gaming?

What were the two sets of appeals concerning the regulation and taxation of online gaming platforms in front of the Court? What were the main objections raised by gaming companies against the GST levy? What are the likely consequences for India's online gaming industry?

GS III: Economy

Aaratrika Bhaumik

The story so far:

The Supreme Court on May 27, 2026, delivered two rulings with major ramifications for the country's real-money gaming industry. A Bench of Justices J.B. Pardiwala and R. Mahadevan upheld the constitutional validity of the Centre's retrospective 28% GST levy on online gaming companies and, in a separate judgment, affirmed the validity of State laws prohibiting real-money gaming platforms.

What did the Court have to decide?

The judgments arose from two distinct sets of appeals concerning the regulation and taxation of online gaming platforms. The first batch related to State laws prohibiting online betting and wagering. In 2021, Tamil Nadu and Karnataka enacted legislation criminalising betting on games played in cyberspace and prescribing penalties, including imprisonment. After the Madras and Karnataka High Courts struck down these enactments, the respective State governments approached the Supreme Court, arguing that betting and gambling fall within their legislative competence under Entry 34 of List II of the Seventh Schedule. They further contended that the restrictions were necessary to address addiction and other social harms associated with online betting.

The second batch concerned the applicability of the GST regime to online gaming involving money stakes. The appeals arose from decisions of the Bombay and Karnataka High Courts, which held that online gaming transactions did not constitute actionable claims under the GST law and consequently quashed tax proceedings initiated against gaming companies. The Union government thereafter challenged these rulings before the Supreme Court.

Supreme Court of India.

> The Court held that, for GST purposes, the distinction between games of skill and games of chance becomes irrelevant once money is staked on an uncertain outcome

Why was the GST levy upheld?

The dispute over the GST liability of online gaming platforms stemmed from amendments approved by the GST Council in August 2023. The Council clarified that all online games involving bets or wagers, irrespective of whether they were predominantly games of skill or games of chance, would attract GST at 28% on the full value of the amount staked by players.

Following the Council's decision, the Directorate General of GST Intelligence (DGGI) issued a series of tax demand notices to gaming companies. The notices sought to levy GST not only under the amended regime, which came into force on October 1, 2023, but also on revenues earned during the pre-amendment period, resulting in tax demands running into several lakh crore rupees.

Challenging these demands, gaming companies argued that GST could be levied only on the consideration retained by the platform and not on the entire value of bets or contest entry fees contributed by users. Taxing the full face value of stakes, they contended, was commercially untenable and failed to account for the long-recognised distinction between games of skill and games of chance.

Rejecting these arguments, the Supreme Court held that online gaming platforms involving money stakes were distinct from conventional skill-based competitions. While participants in a skill-based contest merely pay an entry fee to compete, the Court observed that online gaming platforms are structured around wagering and often encourage repeated participation through discounts and bonuses.

The Court further held that, for GST purposes, the distinction between games of skill and games of chance becomes irrelevant once money is staked on an uncertain outcome. Referring to the Central Goods and Services Tax Act, 2017 (CGST Act), which expressly includes actionable claims relating to lottery, betting, and gambling within the tax net, the Court concluded that Parliament was competent to levy GST on online gaming involving money stakes. It also rejected the industry's contention that the 2023 amendments imposed a fresh levy. Instead, the Court held that the amendments merely "clarified and standardised" the existing legal framework governing the taxation of such activities and were therefore capable of operating retrospectively.

Why did the Court uphold State curbs on real-money gaming?

At the outset, the Court observed that "betting" and "gambling" are res extra commercium (activities outside legitimate commerce) and therefore fall outside the protection ordinarily available to trade and business activities. It held that while games of skill may be constitutionally protected, the introduction of money stakes imparts the character of wagering to the activity, bringing it within the States' legislative competence.

The Bench was also not persuaded by the contention that fantasy sports are predominantly skill-based. It noted that even sophisticated predictive models are unable to forecast sporting outcomes with certainty.

The Court further observed that the widespread availability of smartphones and digital payment gateways had effectively turned every mobile phone into a virtual "gambling house". It held that State governments are competent to impose reasonable restrictions on such activities and could draw legislative support not only from Entry 34 of List II relating to betting and gambling but also from Entry 1 concerning public order.

What are the implications?

The judgments come at a time when the industry is already grappling with the fallout of the Promotion and Regulation of Online Gaming Act, 2025 (2025 Act). The legislation prohibited all forms of online real-money gaming, with the government citing national security concerns, including the alleged use of digital wallets and cryptocurrencies for money laundering and illicit fund transfers. It, however, carved out exceptions for e-sports, educational games, and social gaming.

Sudipta Bhattacharjee, Partner at Khaitan & Co, who has represented several online gaming and casino companies before the Supreme Court, told *The Hindu* that the industry had effectively come to a standstill following the enactment of the 2025 law, which could make recovery of the tax demands difficult. "The GST ruling may not translate into any meaningful recovery for the authorities. Many companies have either shifted their operations outside India or pivoted to sectors such as social gaming and fintech. The GST demands are several times higher than the revenues these companies have ever earned and are simply beyond their ability to pay. We are also likely to see a spate of insolvency proceedings," he said.

Mr. Bhattacharjee also pointed out that the verdict could have implications for the challenge to the 2025 law on the ground that Parliament lacked the legislative competence to enact it. "The apex court has clearly held that betting and gambling are State subjects under Entry 34 and upheld State laws regulating such activities. We will now have to wait and see how the Union government defends its position that it has the legislative competence to enact the 2025 law under Entry 52 of the Union List, which permits regulation of industries where such intervention is considered expedient in the public interest," he said.

07J6.Why did SC back curbs on online gaming?

ऑनलाइन गेमिंग पर प्रतिबंधात्मक उपायों का समर्थन सर्वोच्च न्यायालय ने क्यों किया?

The Supreme Court rulings on real-money gaming industry

रियल-मनी गेमिंग उद्योग पर सर्वोच्च न्यायालय के निर्णय

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

- The **Supreme Court** on May 27, 2026, delivered two rulings with major ramifications for the country's **real-money gaming industry**.
  सर्वोच्च न्यायालय ने 27 मई, 2026 को देश के **रियल-मनी गेमिंग उद्योग** पर व्यापक प्रभाव डालने वाले दो महत्वपूर्ण निर्णय दिए।
- A Bench of Justices **J.B. Pardiwala** and **R. Mahadevan** upheld the constitutional validity of the Centre's retrospective **28% GST levy** on online gaming companies and, in a separate judgment, affirmed the validity of State laws prohibiting real-money gaming platforms.
  न्यायमूर्ति **जे.बी. पारदीवाला** और **आर. महादेवन** की पीठ ने ऑनलाइन गेमिंग कंपनियों पर केंद्र सरकार द्वारा लगाए गए पूर्वव्यापी **28% जीएसटी** की संवैधानिक वैधता को बरकरार रखा तथा एक पृथक निर्णय में रियल-मनी गेमिंग प्लेटफॉर्मों पर प्रतिबंध लगाने वाले राज्य कानूनों की वैधता की भी पुष्टि की।

What did the Court have to decide?
न्यायालय को किन प्रश्नों पर निर्णय देना था?

- The judgments arose from two distinct sets of appeals concerning the regulation and taxation of online gaming platforms.
  ये निर्णय ऑनलाइन गेमिंग प्लेटफॉर्मों के विनियमन और कराधान से संबंधित दो पृथक अपीलों से उत्पन्न हुए।
- The first batch related to State laws prohibiting online betting and wagering.
  पहला समूह ऑनलाइन सट्टेबाजी और दांव लगाने पर प्रतिबंध लगाने वाले राज्य कानूनों से संबंधित था।
- In 2021, **Tamil Nadu** and **Karnataka** enacted legislation criminalising betting on games played in cyberspace and prescribing penalties, including imprisonment.
  वर्ष 2021 में **तमिलनाडु** और **कर्नाटक** ने साइबरस्पेस में खेले जाने वाले खेलों पर सट्टेबाजी को अपराध घोषित करने तथा कारावास सहित दंड निर्धारित करने वाले कानून बनाए।
- After the **Madras High Court** and **Karnataka High Court** struck down these enactments, the respective State governments approached the Supreme Court, arguing that betting and gambling fall within their legislative competence under **Entry 34 of List II of the Seventh Schedule**.
  मद्रास उच्च न्यायालय और **कर्नाटक उच्च न्यायालय** द्वारा इन कानूनों को निरस्त किए जाने के बाद संबंधित राज्य सरकारों ने सर्वोच्च न्यायालय का रुख किया और तर्क दिया कि सट्टेबाजी और जुआ **सातवीं अनुसूची की सूची-II की प्रविष्टि 34** के अंतर्गत उनके विधायी अधिकार क्षेत्र में आते हैं।
- They further contended that the restrictions were necessary to address addiction and other social harms associated with online betting.
  उन्होंने यह भी तर्क दिया कि ऑनलाइन सट्टेबाजी से जुड़ी लत और अन्य सामाजिक दुष्प्रभावों से निपटने के लिए ये प्रतिबंध आवश्यक हैं।
- The second batch concerned the applicability of the **GST regime** to online gaming involving money stakes.
  दूसरा समूह धनराशि आधारित ऑनलाइन गेमिंग पर **जीएसटी व्यवस्था** की प्रयोज्यता से संबंधित था।
- The appeals arose from decisions of the **Bombay High Court** and **Karnataka High Court**, which held that online gaming transactions did not constitute **actionable claims** under the GST law and consequently quashed tax proceedings initiated against gaming companies.
  ये अपीलें **बॉम्बे उच्च न्यायालय** और **कर्नाटक उच्च न्यायालय** के उन निर्णयों से उत्पन्न हुईं, जिनमें कहा गया था कि ऑनलाइन गेमिंग लेन-देन जीएसटी कानून के अंतर्गत **कार्यान्वित दावे (Actionable Claims)** नहीं हैं और परिणामस्वरूप गेमिंग कंपनियों के विरुद्ध आरंभ की गई कर कार्यवाहियों को निरस्त कर दिया गया था।
- The Union government thereafter challenged these rulings before the Supreme Court.
  इसके बाद केंद्र सरकार ने इन निर्णयों को सर्वोच्च न्यायालय में चुनौती दी।

Why was the GST levy upheld?
जीएसटी अधिरोपण को क्यों बरकरार रखा गया?

- The dispute over the GST liability of online gaming platforms stemmed from amendments approved by the **GST Council** in August 2023.
  ऑनलाइन गेमिंग प्लेटफॉर्मों की जीएसटी देयता को लेकर विवाद अगस्त 2023 में **जीएसटी परिषद** द्वारा अनुमोदित संशोधनों से उत्पन्न हुआ।
- The Council clarified that all online games involving bets or wagers, irrespective of whether they were predominantly games of skill or games of chance, would attract GST at **28%** on the full value of the amount staked by players.
  परिषद ने स्पष्ट किया कि दांव या सट्टे से जुड़े सभी ऑनलाइन खेल, चाहे वे मुख्यतः कौशल आधारित हों या भाग्य आधारित, खिलाड़ियों द्वारा लगाई गई पूरी राशि के मूल्य पर **28% जीएसटी** के अधीन होंगे।
- Following the Council's decision, the **Directorate General of GST Intelligence (DGGI)** issued a series of tax demand notices to gaming companies.
  परिषद के निर्णय के बाद **डायरेक्टरेट जनरल ऑफ जीएसटी इंटेलिजेंस (DGGI)** ने गेमिंग कंपनियों को कर मांग संबंधी अनेक नोटिस जारी किए।
- The notices sought to levy GST not only under the amended regime, which came into force on October 1, 2023, but also on revenues earned during the pre-amendment period, resulting in tax demands running into several lakh crore rupees.
  इन नोटिसों में 1 अक्टूबर 2023 से लागू संशोधित व्यवस्था के अंतर्गत ही नहीं, बल्कि संशोधन से पूर्व अर्जित राजस्व पर भी जीएसटी लगाने का प्रयास किया गया, जिससे कर मांग कई लाख करोड़ रुपये तक पहुंच गई।
- Challenging these demands, gaming companies argued that GST could be levied only on the consideration retained by the platform and not on the entire value of bets or contest entry fees contributed by users.
  इन मांगों को चुनौती देते हुए गेमिंग कंपनियों ने तर्क दिया कि जीएसटी केवल प्लेटफॉर्म द्वारा रखी गई राशि पर लगाया जा सकता है, न कि उपयोगकर्ताओं द्वारा जमा की गई संपूर्ण सट्टा राशि या प्रतियोगिता प्रवेश शुल्क पर।
- Taxing the full face value of stakes, they contended, was commercially untenable and failed to account for the long-recognised distinction between games of skill and games of chance.
  उनका तर्क था कि दांव की पूरी अंकित राशि पर कर लगाना व्यावसायिक रूप से अव्यवहारिक है तथा यह कौशल आधारित और भाग्य आधारित खेलों के बीच लंबे समय से मान्य अंतर की उपेक्षा करता है।
- Rejecting these arguments, the Supreme Court held that online gaming platforms involving money stakes were distinct from conventional skill-based competitions.
  इन तर्कों को अस्वीकार करते हुए सर्वोच्च न्यायालय ने कहा कि धनराशि आधारित ऑनलाइन गेमिंग प्लेटफॉर्म पारंपरिक कौशल-आधारित प्रतियोगिताओं से भिन्न हैं।
- While participants in a skill-based contest merely pay an entry fee to compete, the Court observed that online gaming platforms are structured around wagering and often encourage repeated participation through discounts and bonuses.
  न्यायालय ने कहा कि जहां कौशल-आधारित प्रतियोगिताओं में प्रतिभागी केवल भाग लेने हेतु प्रवेश शुल्क देते हैं, वहीं ऑनलाइन गेमिंग प्लेटफॉर्म सट्टेबाजी की संरचना पर आधारित होते हैं और अक्सर छूट तथा बोनस के माध्यम से बार-बार भागीदारी को प्रोत्साहित करते हैं।
- The Court further held that, for GST purposes, the distinction between games of skill and games of chance becomes irrelevant once money is staked on an uncertain outcome.
  न्यायालय ने आगे कहा कि जीएसटी के संदर्भ में जैसे ही किसी अनिश्चित परिणाम पर धनराशि लगाई जाती है, कौशल आधारित और भाग्य आधारित खेलों के बीच का अंतर अप्रासंगिक हो जाता है।
- Referring to the **Central Goods and Services Tax Act, 2017 (CGST Act)**, which expressly includes actionable claims relating to lottery, betting, and gambling within the tax net, the Court concluded that Parliament was competent to levy GST on online gaming involving money stakes.
  केंद्रीय वस्तु एवं सेवा कर अधिनियम, 2017 (CGST Act) का उल्लेख करते हुए, जो लॉटरी, सट्टेबाजी और जुए से संबंधित कार्यान्वित दावों को स्पष्ट रूप से कर के दायरे में शामिल करता है, न्यायालय ने निष्कर्ष निकाला कि धनराशि आधारित ऑनलाइन गेमिंग पर जीएसटी लगाने का अधिकार संसद को प्राप्त है।

- It also rejected the industry's contention that the 2023 amendments imposed a fresh levy.
  न्यायालय ने उद्योग के इस तर्क को भी अस्वीकार कर दिया कि वर्ष 2023 के संशोधनों द्वारा कोई नया कर लगाया गया है।
- Instead, the Court held that the amendments merely "clarified and standardised" the existing legal framework governing the taxation of such activities and were therefore capable of operating retrospectively.
  इसके विपरीत, न्यायालय ने कहा कि इन संशोधनों ने केवल ऐसी गतिविधियों के कराधान से संबंधित विद्यमान कानूनी ढांचे को "स्पष्ट और मानकीकृत" किया है, इसलिए इन्हें पूर्वव्यापी प्रभाव से लागू किया जा सकता है।

Why did the Court uphold State curbs on real-money gaming?
न्यायालय ने रियल-मनी गेमिंग पर राज्य सरकारों के प्रतिबंधों को क्यों बरकरार रखा?

- At the outset, the Court observed that **"betting"** and **"gambling"** are **res extra commercium** (activities outside legitimate commerce) and therefore fall outside the protection ordinarily available to trade and business activities.
  प्रारंभ में न्यायालय ने कहा कि **"सट्टेबाजी"** और **"जुआ" रेस एक्स्ट्रा कॉमर्सियम (res extra commercium)** हैं (अर्थात वैध वाणिज्यिक गतिविधियों के दायरे से बाहर की गतिविधियाँ) और इसलिए इन्हें सामान्यतः व्यापार एवं व्यवसाय को प्राप्त संवैधानिक संरक्षण उपलब्ध नहीं है।
- It held that while games of skill may be constitutionally protected, the introduction of money stakes imparts the character of wagering to the activity, bringing it within the States' legislative competence.
  न्यायालय ने कहा कि यद्यपि कौशल-आधारित खेलों को संवैधानिक संरक्षण प्राप्त हो सकता है, किंतु जब उनमें धनराशि दांव पर लगाई जाती है तो गतिविधि का स्वरूप **सट्टेबाजी** का हो जाता है, जिससे वह राज्यों के विधायी अधिकार क्षेत्र में आ जाती है।
- The Bench was also not persuaded by the contention that **fantasy sports** are predominantly skill-based.
  पीठ **फैंटेसी स्पोर्ट्स** को मुख्यतः कौशल-आधारित मानने वाले तर्क से भी सहमत नहीं हुई।
- It noted that even sophisticated predictive models are unable to forecast sporting outcomes with certainty.
  न्यायालय ने उल्लेख किया कि अत्याधुनिक पूर्वानुमान मॉडल भी खेल प्रतियोगिताओं के परिणामों की निश्चित भविष्यवाणी करने में सक्षम नहीं हैं।
- The Court further observed that the widespread availability of **smartphones** and **digital payment gateways** had effectively turned every mobile phone into a virtual **"gambling house"**.
  न्यायालय ने आगे कहा कि **स्मार्टफोन** और **डिजिटल भुगतान गेटवे** की व्यापक उपलब्धता ने प्रभावी रूप से प्रत्येक मोबाइल फोन को एक आभासी **"जुआघर"** में परिवर्तित कर दिया है।
- It held that State governments are competent to impose reasonable restrictions on such activities and could draw legislative support not only from **Entry 34 of List II** relating to betting and gambling but also from **Entry 1** concerning public order.
  न्यायालय ने कहा कि राज्य सरकारें ऐसी गतिविधियों पर युक्तिसंगत प्रतिबंध लगाने के लिए सक्षम हैं और इसके लिए वे केवल **सूची-II की प्रविष्टि 34** (सट्टेबाजी और जुआ) ही नहीं, बल्कि **लोक व्यवस्था** से संबंधित **प्रविष्टि 1** से भी विधायी आधार प्राप्त कर सकती हैं।

What are the implications?
इसके क्या निहितार्थ हैं?

- The judgments come at a time when the industry is already grappling with the fallout of the **Promotion and Regulation of Online Gaming Act, 2025 (2025 Act)**.

ये निर्णय ऐसे समय में आए हैं जब उद्योग पहले से ही **ऑनलाइन गेमिंग (संवर्धन एवं विनियमन) अधिनियम, 2025 (2025 अधिनियम)** के प्रभावों से जूझ रहा है।

- The legislation prohibited all forms of online real-money gaming, with the government citing **national security concerns**, including the alleged use of digital wallets and cryptocurrencies for **money laundering** and illicit fund transfers.
  इस कानून ने ऑनलाइन रियल-मनी गेमिंग के सभी रूपों पर प्रतिबंध लगा दिया था, जिसके लिए सरकार ने **राष्ट्रीय सुरक्षा संबंधी चिंताओं** का हवाला दिया था, जिनमें **मनी लॉन्ड्रिंग** और अवैध धन हस्तांतरण हेतु डिजिटल वॉलेट तथा क्रिप्टोकरेंसी के कथित उपयोग को शामिल किया गया था।
- It, however, carved out exceptions for **e-sports**, **educational games**, and **social gaming**.
  हालांकि, इसने **ई-स्पोर्ट्स**, **शैक्षिक खेलों** तथा **सोशल गेमिंग** के लिए अपवाद प्रदान किए।
- **Sudipta Bhattacharjee**, Partner at **Khaitan & Co**, who has represented several online gaming and casino companies before the Supreme Court, told The Hindu that the industry had effectively come to a standstill following the enactment of the 2025 law, which could make recovery of the tax demands difficult.
  खैतान एंड कंपनी के भागीदार **सुदीप्त भट्टाचार्जी**, जिन्होंने सर्वोच्च न्यायालय में अनेक ऑनलाइन गेमिंग और कैसीनो कंपनियों का प्रतिनिधित्व किया है, ने कहा कि 2025 के कानून के लागू होने के बाद उद्योग प्रभावी रूप से ठहराव की स्थिति में पहुंच गया है, जिससे कर मांगों की वसूली कठिन हो सकती है।
- "The GST ruling may not translate into any meaningful recovery for the authorities.
  "जीएसटी संबंधी निर्णय से संभवतः अधिकारियों को कोई सार्थक वसूली प्राप्त नहीं होगी।
- Many companies have either shifted their operations outside India or pivoted to sectors such as **social gaming** and **fintech**.
  कई कंपनियों ने या तो अपने परिचालन भारत से बाहर स्थानांतरित कर दिए हैं अथवा **सोशल गेमिंग** और **फिनटेक** जैसे क्षेत्रों की ओर रुख कर लिया है।
- The GST demands are several times higher than the revenues these companies have ever earned and are simply beyond their ability to pay.
  जीएसटी की मांगें इन कंपनियों द्वारा अब तक अर्जित कुल राजस्व से कई गुना अधिक हैं और उनका भुगतान करना इनके सामर्थ्य से बाहर है।
- We are also likely to see a spate of **insolvency proceedings**," he said.
  उन्होंने कहा, "हमें **दिवालियापन कार्यवाहियों** की एक बड़ी संख्या भी देखने को मिल सकती है।"
- Mr. **Bhattacharjee** also pointed out that the verdict could have implications for the challenge to the 2025 law on the ground that Parliament lacked the legislative competence to enact it.
  श्री **भट्टाचार्जी** ने यह भी इंगित किया कि यह निर्णय 2025 के कानून को इस आधार पर दी गई चुनौती को प्रभावित कर सकता है कि संसद को इसे बनाने का विधायी अधिकार प्राप्त नहीं था।
- "The apex court has clearly held that betting and gambling are State subjects under **Entry 34** and upheld State laws regulating such activities.
  उन्होंने कहा, "सर्वोच्च न्यायालय ने स्पष्ट रूप से कहा है कि सट्टेबाजी और जुआ **प्रविष्टि 34** के अंतर्गत राज्य विषय हैं तथा ऐसी गतिविधियों को विनियमित करने वाले राज्य कानूनों को वैध ठहराया है।
- We will now have to wait and see how the Union government defends its position that it has the legislative competence to enact the 2025 law under **Entry 52 of the Union List**, which permits regulation of industries where such intervention is considered expedient in the public interest," he said.
  अब यह देखना होगा कि केंद्र सरकार किस प्रकार यह सिद्ध करती है कि उसे **संघ सूची की प्रविष्टि 52** के अंतर्गत 2025 का कानून बनाने का विधायी अधिकार प्राप्त है, जो उन उद्योगों के विनियमन की अनुमति देती है जिनमें सार्वजनिक हित में हस्तक्षेप आवश्यक समझा जाता है।" उन्होंने कहा।

Bursts of rain may deal a double whammy to soil moisture, nitrogen

GS III: S&T

Vasudevan Mukunth

Two new studies, published in *Nature* and *Nature Geoscience*, have found that as climate change concentrates rainfall into fewer, more intense events, the land below may face a double whammy. In their May 13 paper in *Nature*, Dartmouth College, U.S., researchers concluded that more concentrated rain can reduce the amount of water stored in soils and aquifers across all global climates. This is because heavy bursts of rain can exceed the soil's infiltration capacity, leading to an "infiltration excess" where water pools on the surface.

Because these intense events are typically separated by longer dry intervals, the pooled water evaporates instead of recharging deep soil layers. Their work suggests that the drying effect of precipitation concentration is roughly equal in magnitude to the wetting effect of increasing total annual rainfall, effectively neutralising potential gains in the availability of water in many regions.

In their May 25 paper in *Nature Geoscience*, researchers from across China reported a specific rainfall threshold of around 700 mm/year that seemed to determine how soil retains nitrogen. Below this threshold, the soil generally retains nitrogen because a limited amount of water restricts the movement of nutrients and encourages competition between plants and microbes. But above 700 mm, more moisture encourages leaching, leading to significant nitrogen loss.

These studies together suggest concentrated rainfall could blur the distinction between wetter and drier rainfall regimes. If a region receives 600 mm of rain in concentrated bursts rather than in steady intervals, the downpours could wash more nitrogen out of the soils than the annual rainfall total alone would suggest.

According to the *Nature* study, 27% of the world's population will face abnormally dry conditions due to concentrated rainfall alone even if total rainfall doesn't decrease. A growing body of research suggests the southwest monsoon is itself becoming more episodic, with more seasonal rainfall falling in intense downpours separated by longer dry intervals.

This, together with the *Nature Geoscience* study's findings, suggests annual total rainfall alone may no longer capture how ecosystems respond to changing rainfall patterns.

Intense rainfall events can wash away nitrogen, a nutrient crucial for plant growth, before it can be used, while the subsequent dry period can quicken water loss by evaporation.

07J6. Bursts of rain may deal a double whammy to soil moisture, nitrogen
बारिश के तीव्र दौर मिट्टी की नमी और नाइट्रोजन पर दोहरा आघात पहुँचा सकते हैं

- Two new studies, published in **Nature** and **Nature Geoscience**, have found that as **climate change** concentrates rainfall into fewer, more intense events, the land below may face a **double whammy**.
  Nature और **Nature Geoscience** में प्रकाशित दो नए अध्ययनों में पाया गया है कि जैसे-जैसे **जलवायु परिवर्तन** वर्षा को कम लेकिन अधिक तीव्र घटनाओं में केंद्रित कर रहा है, भूमि को **दोहरी मार** का सामना करना पड़ सकता है।
- In their **May 13** paper in **Nature**, **Dartmouth College, U.S.**, researchers concluded that more concentrated rain can reduce the amount of water stored in soils and aquifers across all global climates.
  13 मई को **Nature** में प्रकाशित अपने शोधपत्र में **अमेरिका के डार्टमाउथ कॉलेज** के शोधकर्ताओं ने निष्कर्ष निकाला कि अधिक केंद्रित वर्षा विश्व के सभी जलवायु क्षेत्रों में मिट्टी और भूजलभृतों (**Aquifers**) में संग्रहित जल की मात्रा को कम कर सकती है।
- This is because heavy bursts of rain can exceed the soil's **infiltration capacity**, leading to an **"infiltration excess"** where water pools on the surface.
  ऐसा इसलिए होता है क्योंकि वर्षा के तीव्र दौर मिट्टी की **अवशोषण क्षमता (Infiltration Capacity)** से अधिक हो सकते हैं, जिससे **"अतिरिक्त अवशोषण स्थिति (Infiltration Excess)"** उत्पन्न होती है और जल सतह पर एकत्र हो जाता है।
- Because these intense events are typically separated by longer dry intervals, the pooled water evaporates instead of recharging deep soil layers.
  चूँकि ऐसी तीव्र वर्षा घटनाओं के बीच सामान्यतः लंबे शुष्क अंतराल होते हैं, इसलिए एकत्रित जल गहरी मिट्टी की परतों को पुनर्भरित करने के बजाय वाष्पित हो जाता है।
- Their work suggests that the **drying effect** of precipitation concentration is roughly equal in magnitude to the **wetting effect** of increasing total annual rainfall, effectively neutralising potential gains in the availability of water in many regions.
  उनके अध्ययन से संकेत मिलता है कि वर्षा के केंद्रीकरण का **शुष्ककारी प्रभाव** कुल वार्षिक वर्षा में वृद्धि के

आर्द्रीकरण प्रभाव के लगभग बराबर होता है, जिससे अनेक क्षेत्रों में जल उपलब्धता में संभावित वृद्धि का लाभ प्रभावी रूप से समाप्त हो जाता है।

- In their **May 25** paper in **Nature Geoscience**, researchers from across **China** reported a specific rainfall threshold of around **700 mm/year** that seemed to determine how soil retains **nitrogen**.
  25 मई को **Nature Geoscience** में प्रकाशित शोधपत्र में **चीन** के शोधकर्ताओं ने लगभग **700 मिमी प्रति वर्ष** की एक विशिष्ट वर्षा सीमा का उल्लेख किया, जो यह निर्धारित करती प्रतीत होती है कि मिट्टी **नाइट्रोजन** को किस प्रकार संचित रखती है।
- Below this threshold, the soil generally retains nitrogen because a limited amount of water restricts the movement of nutrients and encourages competition between plants and microbes.
  इस सीमा से कम वर्षा होने पर मिट्टी सामान्यतः नाइट्रोजन को बनाए रखती है क्योंकि सीमित जल पोषक तत्वों की गति को बाधित करता है और पौधों तथा सूक्ष्मजीवों के बीच प्रतिस्पर्धा को बढ़ावा देता है।
- But above **700 mm**, more moisture encourages **leaching**, leading to significant nitrogen loss.
  किन्तु **700 मिमी** से अधिक वर्षा होने पर अधिक नमी **लीचिंग (Leaching)** को बढ़ावा देती है, जिससे नाइट्रोजन की उल्लेखनीय हानि होती है।
- These studies together suggest concentrated rainfall could blur the distinction between wetter and drier rainfall regimes.
  ये दोनों अध्ययन मिलकर संकेत देते हैं कि केंद्रित वर्षा अधिक आर्द्र और अधिक शुष्क वर्षा व्यवस्थाओं के बीच के अंतर को धुंधला कर सकती है।
- If a region receives **600 mm** of rain in concentrated bursts rather than in steady intervals, the downpours could wash more nitrogen out of the soils than the annual rainfall total alone would suggest.
  यदि किसी क्षेत्र में **600 मिमी** वर्षा नियमित अंतरालों के बजाय तीव्र दौरों में होती है, तो ऐसी मूसलाधार वर्षा मिट्टी से अपेक्षा से अधिक नाइट्रोजन बहाकर ले जा सकती है, जितना केवल वार्षिक वर्षा की मात्रा से अनुमान लगाया जा सकता है।
- According to the **Nature** study, **27% of the world's population** will face abnormally dry conditions due to concentrated rainfall alone even if total rainfall doesn't decrease.
  Nature अध्ययन के अनुसार, भले ही कुल वर्षा में कमी न हो, फिर भी केवल केंद्रित वर्षा के कारण **विश्व की 27% जनसंख्या** असामान्य रूप से शुष्क परिस्थितियों का सामना करेगी।
- A growing body of research suggests the **southwest monsoon** is itself becoming more episodic, with more seasonal rainfall falling in intense downpours separated by longer dry intervals.
  बढ़ते शोध यह संकेत देते हैं कि **दक्षिण-पश्चिम मानसून** स्वयं अधिक खंडित (episodic) होता जा रहा है, जिसमें मौसमी वर्षा का बड़ा भाग तीव्र वर्षा घटनाओं के रूप में होता है और इनके बीच लंबे शुष्क अंतराल होते हैं।
- This, together with the **Nature Geoscience** study's findings, suggests annual total rainfall alone may no longer capture how ecosystems respond to changing rainfall patterns.
  यह तथ्य, **Nature Geoscience** अध्ययन के निष्कर्षों के साथ मिलकर, संकेत देता है कि केवल वार्षिक कुल वर्षा अब यह समझने के लिए पर्याप्त नहीं है कि पारिस्थितिक तंत्र बदलते वर्षा प्रतिरूपों पर किस प्रकार प्रतिक्रिया करते हैं।
- Intense rainfall events can wash away **nitrogen**, a nutrient crucial for plant growth, before it can be used, while the subsequent dry period can quicken water loss by **evaporation**.
  तीव्र वर्षा की घटनाएँ पौधों की वृद्धि के लिए अत्यंत महत्वपूर्ण पोषक तत्व **नाइट्रोजन** को उसके उपयोग से पहले ही बहा सकती हैं, जबकि इसके बाद आने वाला शुष्क काल **वाष्पीकरण** के माध्यम से जल हानि को और तेज कर सकता है।

Marks that stay

What is a birthmark? How does it form?
GS III: S&T

A birthmark is a coloured mark on the skin that is either present at birth or develops shortly afterwards. While some of them may fade over time, others stay for life. Birthmarks are essentially 'mistakes' in the development of skin cells or blood vessels. They generally fall in one of two categories. Vascular birthmarks occur when blood vessels in a particular area do not form correctly, i.e. because there are too many of them or they may be wider than usual. The extra blood flow that results gives the skin there a red, pink or even purple appearance. Common examples include the so-called 'stork bikes' on the neck or the 'strawberry' marks. Second, pigmented birthmarks are caused when melanocytes, the cells that give your skin its colour, overgrow in an area. As these cells cluster together, they create a patch that is darker than the surrounding skin. Common variations include moles, light-brown 'café-au-lait' spots, and bluish-gray patches. The exact reason why these clusters form is not known.

Readers may send their questions / answers to science@thehindu.co.in

07J6. What is a birthmark? How does it form?
जन्मचिह्न (Birthmark) क्या होता है? यह कैसे बनता है?

- A **birthmark** is a coloured mark on the skin that is either present at birth or develops shortly afterwards.

जन्मचिह्न (Birthmark) त्वचा पर बना एक रंगीन निशान होता है, जो या तो जन्म के समय मौजूद होता है अथवा जन्म के कुछ समय बाद विकसित हो जाता है।

- While some of them may fade over time, others stay for life.

इनमें से कुछ समय के साथ हल्के पड़ सकते हैं, जबकि कुछ जीवनभर बने रहते हैं।

- **Birthmarks** are essentially **'mistakes'** in the development of skin cells or blood vessels.

जन्मचिह्न मूलतः त्वचा कोशिकाओं या रक्त वाहिकाओं के विकास में होने वाली **'त्रुटियों'** का परिणाम होते हैं।

- They generally fall in one of two categories.

सामान्यतः इन्हें दो प्रमुख श्रेणियों में विभाजित किया जाता है।

- **Vascular birthmarks** occur when blood vessels in a particular area do not form correctly, i.e. because there are too many of them or they may be wider than usual.

संवहनी जन्मचिह्न तब उत्पन्न होते हैं जब किसी विशेष क्षेत्र की रक्त वाहिकाएँ सही प्रकार से विकसित नहीं होतीं, अर्थात उनकी संख्या अधिक होती है या वे सामान्य से अधिक चौड़ी होती हैं।

- The extra blood flow that results gives the skin there a **red**, **pink** or even **purple** appearance.

इसके परिणामस्वरूप होने वाला अतिरिक्त रक्त प्रवाह त्वचा को **लाल**, **गुलाबी** अथवा **बैंगनी** रंग का स्वरूप प्रदान करता है।

- Common examples include the so-called **'stork bites'** on the neck or the **'strawberry'** marks.

इसके सामान्य उदाहरणों में गर्दन पर पाए जाने वाले **'स्टॉर्क बाइट्स'** तथा **'स्ट्रॉबेरी'** जैसे निशान शामिल हैं।

- Second, **pigmented birthmarks** are caused when **melanocytes**, the cells that give your skin its colour, overgrow in an area.

दूसरे प्रकार के **रंजित जन्मचिह्न** तब बनते हैं जब **मेलानोसाइट्स (Melanocytes)**, जो त्वचा को रंग प्रदान करने वाली कोशिकाएँ हैं, किसी क्षेत्र में अत्यधिक बढ़ जाती हैं।

- Common variations include **moles**, light-brown **'café-au-lait' spots**, and **bluish-gray patches**.

इसके सामान्य प्रकारों में **तिल (Moles)**, हल्के भूरे रंग के **'कैफे-ओ-ले' धब्बे (Café-au-lait Spots)** तथा **नीले-धूसर रंग के चकत्ते (Bluish-Gray Patches)** शामिल हैं।

GS Paper III: Environment	07 June 2026

07J6	**Kaziranga National Park records 30 raptor and six stork species in a rapid bird survey** **काजीरंगा राष्ट्रीय उद्यान में त्वरित पक्षी सर्वेक्षण के दौरान 30 शिकारी पक्षी और छह सारस प्रजातियाँ दर्ज की गईं**

Kaziranga National Park records 30 raptor and six stork species in a rapid bird survey

GS III: Environment

The Hindu Bureau
GUWAHATI

The Kaziranga National Park and Tiger Reserve in Assam has 30 species of raptors and six species of storks, a rapid survey focused on these two categories of birds has revealed.

The survey, conducted by a 10-member team between the last week of February and March 2, was released on Friday (June 5) to mark World Environment Day. The Kaziranga Tiger Reserve authority surveyed in collaboration with researchers of Gauhati University.

The enumerators recorded 217 individual raptors – buzzards, eagles, falcons, owls, and vultures – across 30 species and 266 individual storks across six species.

A black-necked stork spotted at Kaziranga National Park in Assam. SPECIAL ARRANGEMENT

Critical habitats

India is home to 112 species of raptors, both diurnal and nocturnal. Kaziranga and the adjoining landscape harbour about 50 species of these raptors. Assam's rich, diverse wetlands and the Himalayan foothills provide critical habitats for these birds of prey.

India houses eight of the 20 stork species found in tropical and subtropical regions worldwide. All eight of these are found in Assam, although Kaziranga has recorded six.

The raptor-stork study was conducted across Kaziranga's three administrative zones – the East Assam Wildlife Division, the Biswanath Wildlife Division, and the Nagaon Wildlife Division.

The Eastern Assam Wildlife Division recorded 21 species of raptors and five species of storks. While Biswanath recorded 20 species of raptors and six species of storks, Nagaon recorded 14 and five, respectively.

Among the stork species, the Asian openbill (*Anastomus oscitans*) was the most abundant, with 92 individuals spotted. The greater adjutant stork (*Leptoptilos dubius*) was the rarest, with three individuals recorded. Among the raptors, the Himalayan griffon vulture (*Gyps himalayensis*) was the most common with 69 individual sightings, while the booted eagle and white-tailed eagle were the rarest species with one individual sighting each.

"Kaziranga's landscape also serves as a last stronghold for the enigmatic Pallas's fish eagle (*Haliaeetus leucoryphus*). A survey conducted by the Wildlife Institute of India in January 2020 reported 10 active nests of Pallas's fish eagle in Kaziranga, making it the protected area with the highest number of [this bird's] breeding sites in the world," an official statement read.

07J6. Kaziranga National Park records 30 raptor and six stork species in a rapid bird survey

काजीरंगा राष्ट्रीय उद्यान में त्वरित पक्षी सर्वेक्षण के दौरान 30 शिकारी पक्षी और छह सारस प्रजातियाँ दर्ज की गईं

- The **Kaziranga National Park and Tiger Reserve** in **Assam** has **30 species of raptors** and **six species of storks**, a rapid survey focused on these two categories of birds has revealed.
  असम स्थित **काजीरंगा राष्ट्रीय उद्यान एवं टाइगर रिजर्व** में **शिकारी पक्षियों (रैप्टर्स) की 30 प्रजातियाँ** और **सारसों की छह प्रजातियाँ** पाई गई हैं, यह जानकारी इन दो श्रेणियों के पक्षियों पर केंद्रित एक त्वरित सर्वेक्षण से सामने आई है।
- The enumerators recorded **217 individual raptors** — buzzards, eagles, falcons, owls, and vultures — across **30 species** and **266 individual storks** across **six species**.
  सर्वेक्षणकर्ताओं ने **30 प्रजातियों** के अंतर्गत **217 शिकारी पक्षियों** — बजर्ड, ईगल, फाल्कन, उल्लू और गिद्ध — तथा **छह प्रजातियों** के अंतर्गत **266 सारसों** को दर्ज किया।

Critical habitats
महत्त्वपूर्ण आवास

Air Marshal Ashutosh Dixit to be next Vice-Chief of Air Staff

PCS

The Hindu Bureau
NEW DELHI

Air Marshal Ashutosh Dixit, a distinguished fighter pilot and test pilot, has been appointed the next Vice-Chief of the Air Staff (VCAS) and will assume office on July 1. He succeeds Air Marshal Nagesh Kapoor.

Currently serving as the Chief of Integrated Defence Staff (CISC), Air Marshal Dixit has played a pivotal role in enhancing jointness among the armed forces and advancing efforts towards the creation of integrated theatre commands.

His tenure has focused on improving coordination and operational synergy between the Army, Navy and Air Force.

An accomplished officer with extensive operational and leadership experience, Air Marshal Dixit has also been closely associated with the Indian Air Force's modernisation drive.

Air Marshal Ashutosh Dixit

During various assignments at the Air headquarters, he contributed significantly to the promotion of indigenous fighter aircraft programmes and capability enhancement initiatives.

Commissioned into the fighter stream of the Indian Air Force on December 6, 1986, Air Marshal Dixit is an alumnus of the National Defence Academy, Khadakwasla, the Defence Services Staff College, Bangladesh, and the National Defence College, New Delhi.

Flying instructor

A qualified flying instructor and an experimental test pilot, he has accumulated more than 3,300 flying hours on over 20 types of aircraft, including the Mirage-2000, MiG-21 and Jaguar fighter jets.

During his distinguished career, he commanded a premier fighter training base under the Southern Air Command, which earned recognition as the best base in the command during his tenure.

Five Azerbaijanis killed in Azov Sea drone attack: Baku

GS I: Geography

Agence France-Presse
BAKU

Five Azerbaijanis were killed and three wounded in a drone attack on Friday on two foreign cargo ships in the Sea of Azov, Azerbaijan's Foreign Ministry said.

Russia said Ukraine carried out the attack.

The commander of Ukraine's unmanned systems forces said Kyiv had struck "loitering vessels" transporting illegal cargo in the area, without commenting on the statements by Baku and Moscow or the reports of crew killed.

Citing an official Russian communication to Baku, Azerbaijan's Foreign Ministry said 25 of its citizens were among the crews of the two vessels, which it said were not owned by Azerbaijani companies.

Russian Foreign Ministry spokesperson, Maria Zakharova, said the vessels, the *Natra* and *Tsirkon*, were attacked by Ukrainian drones early Friday while sailing from Turkiye to the port of Rostov-on-Don under the flags of Belize and Palau respectively.

Pressure to limit India-Russia ties will hurt global stability, says Putin

Russian President calls India a reliable partner, says a 'large economy' like India will prioritise national interests; New Delhi's relations with U.S. will not cause friction, he says; points out that it is 'not a good idea' to interfere in 'delicate' India-China ties

GS II: IR

Press Trust of India
ST. PETERSBURG

Western pressure on Prime Minister Narendra Modi to scale back India's engagement with Russia will harm global stability, Russian President Vladimir Putin said late on Thursday at a press conference.

"Everyone has understood that putting pressure on Prime Minister Narendra Modi (and India) that has the largest population in the world, is detrimental for international relations and for bilateral relations. It doesn't matter where this pressure comes from," he said.

Calling India a "reliable" strategic partner, Mr. Putin said India's growth has not "come out of the blue" but was an outcome of the hard work done under Mr. Modi's leadership.

The remarks came against the backdrop of Western capitals expressing unease over India-Russia relations and the oil trade amid the Ukraine war.

The U.S., for instance, has been asking India to stop importing Russian crude oil and had slapped punitive tariffs.

Vladimir Putin had met Narendra Modi during a visit to New Delhi for a bilateral summit in December 2025. R.V. MOORTHY

But Mr. Putin said New Delhi will prioritise its national interests and added that India's engagement with the U.S. does not affect its strategic ties with Russia.

"I don't think this is a case. We are glad that India is developing its relations with all the countries, it's a great country, a large economy, the largest democracy, it is only natural that it develops its economy in accordance with its interest with those countries that it deems necessary," Mr. Putin said when asked whether India's alignment with Washington creates structural friction for Russia.

No interference

Last September, in the wake of U.S. President Donald Trump's tariff war, a photo of Mr. Modi, Mr. Putin and Chinese President Xi Jinping from the SCO Summit in Tianjin grabbed the global spotlight. Mr. Putin, who is set to visit India in September for the BRICS summit, said Moscow will not interfere in the "delicate" bilateral relations between India and China.

Russian President says he does not believe Pak. is under the control of China

The Russian President, who called Mr. Xi his "old friend", said, "This is a delicate, multi-faceted relationship between India and China, and interfering into them is not a good idea. Of course, we interact with both our friends... President Xi and Prime Minister Modi are both trying to resolve all the issues of mutual interest, including the border issue."

Highlighting Moscow's strategic equilibrium in Asia, President Putin characterised Russia's ties with India and China as having evolved organically. He stressed that Moscow's growing synergy with New Delhi does not come at Beijing's expense, just as Russia's deep alliance with China does not compromise its bond with India.

"Russia has established these relations (with India and China). It was happening naturally. Relations between Russia and India do not disturb China, our relations with China do not disturb India," he said.

Mr. Putin also touched upon the ties between India and Pakistan. "We are well aware of the intricacies of the issues concerning the border between India and Pakistan," he said, addding that he does not believe Pakistan was under the control of China.

Su-57 on offer

The President also offered Russia's fifth-generation stealth aircraft Su-57 to India and suggested that the combat jet could be jointly built in India.

"As for the Su-57, we offered our friends from India to jointly develop this machine, a fifth-generation aircraft. I think it's the best to date. But our Indian friends said, 'well, let's see'," he said.

"In principle, this could have been our (Russia-India) product. We made it independently. And we are ready to work with India. To work and develop. There will be no restrictions whatsoever," he said.

Leaders gather for summit on the EU's enlargement into the Western Balkans

The European Union signals its commitment to expand into the Western Balkans to counter security and economic threats posed by Russia, China; Montenegro considered a front-runner among region's other candidate nations; top EU diplomats seek ways to accelerate the membership process

GS II: IR

Associated Press
MONTENEGRO

Balkan bonhomie: Heads of state pose for the family photo at the EU-Western Balkans Summit in Tivat, Montenegro, with a focus on the integration of the six Western Balkans nations into the EU. AFP

Leaders from across the European Union and the Balkans gathered in Montenegro on Friday to discuss expanding the bloc to include countries in the region, seen as a key area in countering security and economic threats posed by Russia and China.

The EU-Western Balkans summit, being held in the Adriatic Sea coastal town of Tivat, brings together EU leaders including President Emmanuel Macron of France and German Chancellor Friedrich Merz, European Commission President Ursula von der Leyen as well as the heads of candidate countries in the Balkans.

High on the agenda will be Montenegro's EU accession. The bloc has already formed a working group to draft an accession treaty for the country, a signal that membership is within reach.

Security was heavy across Montenegro after the National Security Agency said it had foiled a plot to disrupt the summit and had turned away 87 Serbian nationals because they posed "a risk for internal and national security."

Adding members to the bloc for more single market economic benefits and stronger security capabilities has gained increased urgency in recent years as the continent has faced a series of challenges, such as lopsided trade with China, migration pressures, the war in Ukraine and increasing hybrid threats from Russia.

Reforms and rapport

The EU has signalled its commitment to expanding into the Western Balkans, where it has urged candidate countries such as Montenegro to carry out reforms like cutting corruption and shoring up democratic institutions – steps viewed as benefiting both the candidate nations and the EU as a whole.

"Enlargement means that we can win economically, become stronger politically, and provide more security to our citizens," said European Parliament President Roberta Metsola.

In a post on X, Mr. Merz said the bloc wants the Western Balkan countries to join the EU "as quickly as possible."

"The fact that we haven't admitted any new members in 13 years also shows shortcomings of the EU," he wrote. "We want to overcome those today."

As wars rage in Ukraine, Iran and West Asia, and Europe's security has come under question with the United States viewed as less committed to its NATO allies, EU countries have pushed to boost their military capabilities to ward off future threats.

During a tour of countries in the Western Balkans this week, European Council President Antonio Costa, who is hosting the summit, has emphasised how serious the bloc is about enlarging.

Speaking in Serbia on Thursday after meeting with Serbian President Aleksandar Vucic, Mr. Costa said the EU would look for new ways to speed up the membership process for the Western Balkan candidate countries.

In times of "global geopolitical uncertainty and economic instability," Mr. Costa said, enlarging the EU is "not just an opportunity. It is a geostrategic necessity for Europe."

'28 by 28'

Montenegro, a small, mountainous country that was once a part of Yugoslavia and which this week marked the 20th anniversary of its independence from a union with neighbouring Serbia, is considered a front-runner ahead of the region's other candidate countries of Albania, Bosnia-Herzegovina, Serbia, Kosovo and North Macedonia.

After joining NATO in 2017, the country of 623,000 people is now set on fulfilling an ambitious agenda of becoming the 28th member of the EU in 2028. The motto "28 by 28" has even been inscribed on one of the planes of Montenegro's national airline.

All 27 EU members must agree before each chapter can be opened, and then again for it to be closed. Ukraine and Moldova are also among about 10 countries aspiring to join the bloc, while Iceland will hold a referendum in August on whether to apply.

Serbian leader Vucic said he had high hopes for the summit and accession paths for Balkan countries. "We will see a lot of progress of Western Balkan countries in the future. Of course, we need to do a lot of reforms," he said. "We are on our EU path."

Ms. Von der Leyen too called for quickening the accession process. "Enlargement is merits-based, but merits-based does not mean slow. We have to make the process faster and more credible."

Faruk Bašić, a researcher at the Brussels Institute for Geopolitics, said the summit will likely result in a rapid movement for Montenegro to join the bloc in 2028. It will also likely see new safeguards to ensure member nations don't break EU norms.

The summit will be the first to bring together EU leaders since the stunning defeat in April of Viktor Orbán, Hungary's former Russia-friendly Prime Minister who, during his 16-year rule, flouted the EU's standards on democracy and the rule of law and forged close ties with other autocrats.

Mr. Orbán's successor, Hungarian Prime Minister Péter Magyar, did not attend the summit.

With the painful experience of Mr. Orbán's democratic backsliding and historic use of the veto in the European Council, the EU is devising new ways to use financial penalties or restricted access to the single market to pressure incoming nations to carry out reforms and adapt to the bloc's standards, Mr. Bašić said.

"The EU is trying to find a way to admit a country that isn't fully ready to be admitted without losing the ability to hold it accountable after the fact," he said, pointing to Ukraine's accession bid as well as nations in the Western Balkans like Serbia and Kosovo.

06J6	Growing cracks in the granite trade ग्रेनाइट व्यापार में बढ़ती दरारें

TELEGRAM CHANNEL: https://t.me/patrioticIAS
YOUTUBE CHANNEL: https://www.youtube.com/@PatrioticIAS
CONTACT: 9971932488

Stone under strain: A worker oversees a granite block being cut at a processing unit in Khammam, where many factories are operating below capacity amid an industry downturn. NAGARA GOPAL

Growing cracks in the granite trade

Telangana's once-thriving granite industry is showing signs of stress as export markets shrink and input costs soar. In Karimnagar and Khammam districts, quarry owners, factory operators and migrant workers are all feeling the impact of a prolonged downturn, report **P. Sridhar and P. Laxma Reddy**

GS III: Economy

For years, Rajendra Mohanty believed granite would guarantee him a steady livelihood. Today, cooking over a firewood stove outside his room on a factory campus in Kamanpur near Karimnagar, the 42-year-old migrant worker from Odisha is unsure what lies ahead. A slowdown triggered by geopolitical tensions in West Asia, rising fuel costs and weakening export demand has begun to ripple through Telangana's granite industry, affecting everyone from quarry owners and factory operators to truck drivers and migrant labourers.

Karimnagar, often referred to as the 'city of granites', has long been a key driver of industrial activity in north Telangana. Home to around 250 quarries and over 290 granite cutting and polishing units, the district built its reputation on strong international demand for its signature Tan Brown variety. Today, however, the industry is struggling with supply-chain disruptions, escalating transportation costs and a slump in demand from key markets such as China and the Middle East.

According to official sources, only around 25% of the licensed quarries are currently fully functional. "We faced hard times during the COVID-induced lockdown in 2020 and are now experiencing a crisis-like situation," says Mohanty, who has worked in Kamanpur for the past 12 years after migrating from Balasore in Odisha.

"Rising fuel prices have pushed up transportation costs while demand in international markets has slowed," he adds, pointing to stacks of unsold granite slabs.

The crisis has seeped into everyday life. Mohanty says workers have switched to the *chulha* (firewood stove) due to LPG shortages and rising prices. Of the 30 migrant workers employed at the factory where he is employed, 13 have already returned to their native States since the latest downturn gripped the industry, he explains.

Factory owners are grappling with rising production costs due to the increase in prices of imported raw materials, even as demand for granite blocks and polished slabs weakens. Across Telangana's granite belt spanning Karimnagar, Warangal and Khammam districts, many units have scaled down production and even reduced manpower, leaving thousands of workers facing an uncertain future.

Telangana is one of India's leading granite-producing States, with Karimnagar renowned for globally recognised varieties such as Tan Brown, Coffee Brown, Maple Red, Red Rose and Blue Brown while Khammam and Warangal are known for premium black granite deposits, including the sought-after Jet Black variety. The wide range of commercially valuable granite found across the State has supported a vast network of quarries, processing units and export-oriented industries, with processed granite shipped to markets including China, Japan, Taiwan, the UAE, USA and Europe.

Karimnagar's granite industry is heavily dependent on overseas markets. The district's signature Tan Brown granite, once buoyed by strong international demand, is now facing demand volatility amid the fallout of the West Asia conflict.

According to industry figures, Karimnagar exported 56,730 cubic metres of granite blocks between April 1 and May 31, 2026, compared to a little over 3.35 lakh cubic metres during the whole of 2025-26. Demand for Tan Brown granite peaked in the late 2000s, especially around the Beijing Olympics, and it remains popular among buyers in China because of its affordability, availability and durability. Industry stakeholders, however, say current market conditions have impacted exports.

> While 170 units have completely shut down and 200 are running in a single shift, only around 100 are functioning at full capacity. Lack of availability of the raw material is the main cause behind the decline of business.
>
> **PATIBANDLA YUGANDHAR,** President, Khammam Granite Factory Owners Association

An industry in retreat

For decades, the deep black granite quarried from Khammam's rocky landscape symbolised prosperity. Renowned for its uniform colour, durability and premium finish, Khammam Black Granite found its way into luxury homes, commercial complexes, hotels and monuments across India and overseas markets. The industry once generated an annual business volume of nearly ₹1,000 crore and provided direct and indirect employment to around one lakh people. Today, however, it is struggling for survival.

Across the industrial belts of Khanapuram Haveli, Mudigonda, Arempula, Pallegudem, Gopalapuram and Nelakondapalli, where granite processing units once buzzed with activity, silence has replaced the hum of cutting and polishing machines. Industry representatives say the downturn began around 2018-19 and deepened during the pandemic, driven by a combination of policy changes, rising costs, shrinking quarry activity and weakening international demand.

According to Khammam Granite Factory Owners Association president Patibandla Yugandhar, only a fraction of the industry remains fully operational. "While 170 units have completely shut down and 200 are running in a single shift, only around 100 are functioning at full capacity," he says, referring to the nearly 470 slab units located within a 20-km radius of Khammam city. The shortage of raw granite blocks remains the biggest challenge. "Non-availability of the raw material is the main cause behind the decline of business," Yugandhar adds.

Industry estimates suggest that around 3,000 workers have already lost their jobs due to unit closures and downsizing.

Entrepreneurs also point to changes in quarry lease allotment policies. The earlier system, Yugandhar says, encouraged exploration by allowing prospectors to identify deposits and obtain leases through a phased process: "But now open auction is in implementation for the sanction of leases. This is hurting prospective miners."

Industry leaders contend that auction-based allotments and stricter eligibility norms have discouraged exploration and reduced the number of operational quarries. The district, which once had more than 200 quarries, now has fewer than 100 active operations. Government officials, however, maintain that lease allotments are governed by prescribed regulations and environmental safeguards.

For many entrepreneurs, the granite business has become financially unsustainable. Nallamothu Venkat Babu, who shut down his polishing unit two years ago, says the shortage of raw material forced him to exit the industry. "Since I am an agriculturist, I am now focussing on commercial crops," he adds.

The impact extends beyond unit owners. A polishing unit equipped with four cutters can employ around 10 semi-skilled and unskilled workers, and closures have sharply reduced employment opportunities.

> We can use the waste blocks of granite, slurry and earth for different by-products. But the government is collecting taxes on the waste.
>
> **K. VENKAT REDDY,** Owner of a granite quarry

K. Venkat Reddy, who operates a unit exporting granite tiles to the US and Europe, says prolonged uncertainty has discouraged the younger generation from entering the business. "Our next generation is not showing interest to take up the reins from us due to losses mainly caused by the non-availability of raw material in sufficient quantities," he rues.

Industry participants say financial distress is becoming widespread. Paramesh Reddy, treasurer of the association, points to rising diesel prices triggered by West Asia tensions as a major challenge. "Since quarrying, transportation and processing depend heavily on fuel, higher diesel costs have increased operational expenses for both quarry owners and polishing units, further eroding already thin margins," he explains.

The crisis has also affected thousands of workers, particularly migrants who form the backbone of the polishing industry. According to Yugandhar, most workers in polishing units come from West Bengal, Rajasthan, Uttar Pradesh, Bihar, Odisha and Jharkhand while quarry labour is largely local.

A worker pointing to a black granite quarry at Pindiprolu village in Khammam district. NAGARA GOPAL

The cost of decline

Workers in quarries and polishing units generally earn between ₹15,000 and ₹25,000 a month, but shrinking operations have reduced employment opportunities. "A fellow villager returned home due to non-availability of work," says Sandip Mandal, a 21-year-old polishing machine operator from a village near Bishnupur in West Bengal.

Industry veterans say the sector is caught between rising input costs and weakening demand. While the price of raw granite has increased over the past 15 years, demand in some export markets has softened. At the same time, unit owners continue to bear fixed expenses regardless of production levels. "Whether you run the factory or not, the owner must pay the minimum power bill and prescribed fees," says senior industry leader Narender. Some entrepreneurs argue that intermediaries and brokers often earn more than manufacturers, further squeezing profit margins.

Industry representatives believe one avenue for revival lies in better utilisation of granite waste. Quarrying generates large quantities of rejected blocks, slurry and earth, much of which is discarded despite its potential to be converted into value-added products.

Venkat Reddy advocates greater investment in research and development. "We can use the waste blocks of granite, slurry and earth for different by-products. But the government is collecting taxes on the waste," he says.

Experts say granite waste can be processed into manufactured sand and other construction materials. One enterprise in Khanapuram Haveli has already demonstrated its commercial potential by producing artefacts, premium tiles, sanitaryware and bath fittings from discarded granite blocks. Despite the industry's troubles, Khammam Black Granite continues to enjoy demand in domestic markets, particularly north India. However, that demand has also spawned regulatory challenges. Recently, authorities uncovered an alleged tax-evasion network involving the transportation of black granite through fake firms and fabricated e-Way bills. Investigations are continuing.

China demand dries up

Telangana Small Scale Granite Industries Association president Rayala Nageswara Rao says the sector has suffered huge losses following the disruption of exports to China since the COVID-19 pandemic. He notes that nearly 70% of quarries in the erstwhile Karimnagar district have shut down due to lack of demand from China.

Rao says applicants are now required to pay around ₹25 lakh per hectare to secure quarry leases. Black granite has a recovery rate of only about 10%, compared with more than 50% for coloured varieties such as Tan Brown, he adds.

According to him, Khammam district has around 700 slab and tile units, of which nearly 200 have closed. Welcoming the release of ₹20 crore towards pending subsidies and the revival of the old measurement method, he urges the government to liberalise lease rules and provide further support to the sector.

Government officials acknowledge the industry's difficulties. Assistant Director of Mines and Geology, Khammam, R. Sainath says polishing units are under severe stress due to sluggish market conditions, rising production costs and inadequate availability of granite blocks. He estimates that around 130 polishing units in the district have shut down, but notes that the government has refrained from increasing royalty and seigniorage charges in an effort to support the industry. For Amit, a polishing worker from Betul in Madhya Pradesh employed at a granite factory near Bavpet in Karimnagar, rising fuel prices and reduced production have taken a direct toll on household finances. "Earlier, I used to send ₹15,000 to my family. Now, I hardly send ₹10,000 back home," he says, adding that even firewood has become costlier amid LPG shortages that have forced many workers to return to the traditional *chulha*.

"We pray that the geopolitical tensions ease so that supply chains are restored and our factory runs at full capacity," he says.

The crisis reflects the export-dependent nature of Karimnagar's granite industry. Raw granite blocks are largely shipped to China while polished slabs are exported to markets in the Middle East through Kakinada port in Andhra Pradesh. Industry stakeholders say bottlenecks in shipping routes and cargo delays linked to the West Asia conflict have led to increased freight costs and disrupted exports.

J. Praneeth Rao, president of the Karimnagar District Granite Industries Association, says rising shipping charges, a stronger US dollar and higher prices of imported cutting and polishing tools have forced many units to scale down operations. "The increase in transport charges due to fuel price hikes is taking a toll on our business, compelling us to operate only a single shift," he says. Road transport costs have risen from around ₹2,800-₹2,900 per tonne to ₹3,300-₹3,600 per tonne while unit owners continue to struggle with bank loan repayments and electricity charges. Praneeth Rao says the industry directly and indirectly supports 30,000 to 40,000 families and argues that the 18% GST on granite places it at a disadvantage compared to tiles, which attract 5% GST.

Assistant Director of Mines and Geology, Karimnagar, S. Venkat Reddy says inflated ocean freight costs arising from the West Asia conflict have adversely affected granite exports from the district. A quarry owner from Bavpet, requesting anonymity, says the price of taper bits and other imported inputs used in drilling operations had increased three-fold, pushing up production costs by 10-15%. He also calls for improved rail-based logistics between Karimnagar and Kakinada port to reduce transportation costs.

Industry representatives have urged the government to encourage the use of locally produced Tan Brown granite in public infrastructure projects to support the sector's revival.

On a slow charging mode

While Bengaluru leads the transition towards electric mobility, vehicle owners say inadequate infrastructure, long charging times, and high purchase cost pose challenges for wider adoption. **Darshan Devaiah B.P.** and **Mini Tejaswi** take an overview of the EV scenario on World Environment Day

Current scenario: Electric vehicles being charged at a station in Bengaluru on Thursday. India's overall EV market penetration is expected to reach approximately 10% in FY 2026-27. ALLEN EGENUSE J.

Buying an electric car has been a great decision for my daily commute in Bengaluru. It is comfortable to drive, and has reduced my fuel expenses. But whenever I travel to my hometown Mangaluru, I have to stop after around 220 km, and spend nearly an hour charging before continuing the journey, says Ramya Kumari, an IT professional from Bellandur. "While EVs are excellent for city driving, long-distance travel requires careful planning around charging stations, which can be frustrating."

Her experience mirrors that of thousands of electric vehicle (EV) owners across Karnataka, where the shift towards cleaner mobility is accelerating, but infrastructure continues to lag behind demand.

Prime Minister Narendra Modi recently urged citizens to reduce dependence on petrol and diesel, citing the need to conserve foreign exchange and strengthen India's energy security amid global uncertainties in fuel markets. Electric vehicles have emerged as a key pillar in India's strategy to reduce oil imports and lower emissions.

India's overall EV market penetration is expected to reach approximately 10% in FY 2026-27, led by robust two-wheeler sales from major manufacturers and growing four-wheeler adoption. While national public charging infrastructure has grown to over 29,000 units, deployment remains urban-centric with a high EV-to-charger ratio (235:1). Karnataka spearheads this deployment, housing 23% of the nation's chargers, though 75% of these are deployed in Bengaluru, say industry observers.

Indeed, for Bengaluru residents, EVs have become increasingly attractive due to soaring fuel prices, rising environmental awareness and government incentives. Yet, once drivers venture beyond the city limits, concerns over charging infrastructure often overshadow the benefits, like in the case of Ramya.

Says Ramya, "Whenever I drive to Mangaluru, I usually stop around Sakleshpur, where a limited number of charging points are available. During weekends or holiday periods, there can be queues. Even though the number of charging stations is increasing, it is still nowhere near sufficient for the growing number of EV users. The biggest challenge is range anxiety, constantly worrying about whether the next charging station will be available and operational before the battery runs low."

The Bengaluru-Mangaluru route, one of Karnataka's busiest inter-city corridors, illustrates the challenge. Drivers often have to plan journeys around available charging points rather than choosing the most convenient route or schedule.

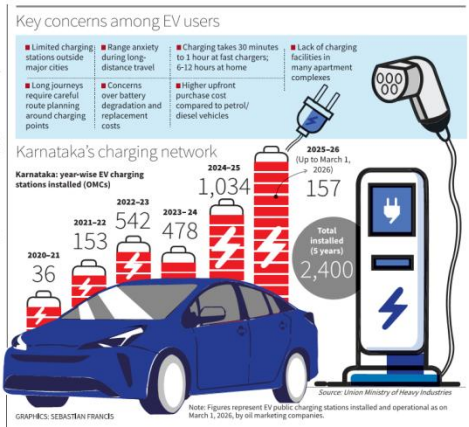
> The biggest challenge is range anxiety, constantly worrying about whether the next charging station will be available and operational before the battery runs low
> **RAMYA KUMARI**
> IT professional

Charging duration

Apart from the availability of charging stations, charging duration remains a major concern. Unlike conventional fuel vehicles that can be refuelled within minutes, EVs require significantly more time. Depending on battery size and charging capacity, a standard home charger can take anywhere between six and 12 hours to fully charge a vehicle. Fast chargers can reduce charging times to between 30 minutes and one hour for a substantial battery refill, but such facilities remain limited, especially outside cities.

For apartment dwellers in Bengaluru, even home charging is not always straightforward. Praveen S., a resident of J.P. Nagar who owns an electric vehicle, said that access to charging infrastructure within residential complexes remains a challenge.

"Many people assume that EV owners can simply charge their vehicles at home. In reality, several apartment complexes were designed long before electric vehicles became common. Residents do not have dedicated parking slots or access to electrical connections required for installing personal chargers. Getting approvals from apartment associations can be time-consuming. Unless residential infrastructure evolves alongside EV adoption, many urban residents will continue facing practical difficulties," he said.



On-road price

Another hurdle for many contemplating to buy EVs is the higher upfront cost of purchasing an electric vehicle. While operating costs are generally lower than those of petrol and diesel vehicles due to cheaper energy and reduced maintenance requirements, the initial investment remains substantial.

Sukesh Hegde, a resident of Yelahanka, spent months researching electric vehicles before ultimately deciding to purchase a diesel car. "Everyone talks about the benefits of EVs, and I agree they make sense in many situations, especially two-wheelers are good. But when I compared prices, I realised that a good electric SUV costs significantly more than a comparable fuel-powered vehicle. For many middle-class families, that difference matters," he said.

Hegde also pointed to uncertainty about battery life. "Lithium-ion batteries degrade over time, and replacing them can be expensive. I was concerned about what the vehicle would be worth after several years and whether battery replacement costs would offset the savings from lower running expenses."

Infrastructure growth

According to data available on the VAHAN dashboard, Karnataka registered more than 54,000 electric vehicles between January and March 2026. At the same time, the State has emerged as the second-largest hub for public EV charging stations installed by oil marketing companies (OMCs) in the country.

Data accessed by *The Hindu* shows that 2,039 EV public charging stations installed by OMCs are currently operational across the State. Karnataka had only 36 charging stations in 2020-21. The number increased to 153 in 2021-22 before rising sharply to 542 in 2022-23 amid growing EV adoption.

Although installations dipped slightly to 478 stations in 2023-24, the overall growth trajectory remained positive. The biggest expansion occurred in 2024-25, when 1,034 charging stations were added in a single year.

In the previous financial year up to March 1, 2026, another 157 charging stations have been installed. This has taken the total installations over five years to approximately 2,400 stations, of which 2,039 are operational.

OMCs comprising Indian Oil (IOCL), Bharat Petroleum (BPCL), and Hindustan Petroleum (HPCL) have already installed close to 30,000 charging sites across their fuel retail networks and fast-charging infrastructure on highways in India. BPCL has set up EV fast-charging corridors along busy routes like Bengaluru-Tirupati. Indian Oil in partnership with Sun Mobility deployed battery swapping stations to offer quick charging to commercial fleets and three-wheelers.

IOCL is planning 608 EV charging stations across all 31 districts in Karnataka, of which 304 stations have already been onboarded. Siddharth Agarwal, executive director and State head, Karnataka State Office, Indian Oil, said all of these are fast DC chargers, enabling efficient and convenient charging. "We are planning 240 KW charging stations, which will cater to the heavy vehicles segment. Feasibility studies are being conducted and rollout is expected in the current financial year." Currently, 124 chargers are already integrated with Indian Oil's e-Charge platform. The remaining chargers are under various stages of onboarding.

HPCL's flagship brand HPeCharge, leveraging its extensive fuel retail network, has built one of the most expansive public EV charging infrastructures in the country, including Karnataka, according to the oil PSU.

Private players

EV vehicle manufacturers and infrastructure developers say Karnataka has made important strides in this segment.

Karnataka is one of the strongest examples of EV adoption, according to Ravneet S. Phokela, chief business officer at Ather Energy of Hero MotoCorp. The State was already seeing some of the highest electric two-wheeler penetration levels in the country, with EVs accounting for 13.1% of new two-wheeler registrations in FY26, supported by a strong ecosystem of startups, suppliers, manufacturers and charge point operators. More importantly, consumer behaviour has evolved, he observed, adding that concerns around range, battery life, and charging accessibility are reducing as products become more reliable and the supporting ecosystem matures.

Phokela said his company has invested extensively in battery technology, safety systems, and validation for Indian conditions. On charging accessibility, Ather claims to have over 6,000 LECCS-powered fast-charging points across India, including more than 500 in Karnataka. Bengaluru alone has over 200 fast-charging points, with charging stations typically located within 2 kilometres of one another.

Chetan Maini, co-founder and chairperson of SUN Mobility, said Karnataka, in particular, is among the States most prepared for EV transition, having been an early mover in EV policy and ecosystem development.

Investment flow

Karnataka has attracted over ₹25,000 crore in EV-related investment across manufacturing, batteries, charging infrastructure, and R&D, while also building one of the country's largest charging networks with more than 5,000 charging stations. Over the years, SUN Mobility has established a network of more than 1,700 battery swapping stations across 23 cities, supporting over 95,000 vehicles and enabling more than 60 million battery swaps, claimed the company. The company also collaborates with Indian Oil Corporation, Bescom and the Indian Railways.

A spokesperson of Tata Power, an integrated power company, said Bengaluru's technology-driven ecosystem and sustainability focused businesses have played an important role in accelerating this shift. Tata Power's EZ Charge energised over 5,500 public charging points in over 700 cities across the country, including 320 in Karnataka.

Karnataka government officials, meanwhile, say substantial investments are already under way. A senior official from the Transport Department in Bengaluru said that both the Centre and State governments are actively working to strengthen charging infrastructure.

Another official pointed to major Central government initiatives aimed at accelerating deployment. "Under the FAME-II scheme, ₹912.5 crore has been sanctioned for EV charging infrastructure across the country. Of this, ₹895.48 crore has already been released, while ₹655.43 crore has been utilised. In addition, ₹2,000 crore has been earmarked under the PM E-DRIVE scheme specifically for expanding charging infrastructure nationwide."

He added that the focus is shifting from merely increasing number of charging stations to improving reliability and accessibility. "We are encouraging deployment of fast-charging networks, supporting private sector participation and working with oil marketing companies and urban local bodies," the official said.

Ecosystem at a critical stage

Despite this progress, experts argue that infrastructure growth has not kept pace with the rapid increase in vehicle registration. Traffic and mobility expert M.N. Sreehari says, "Karnataka may have emerged as one of India's very fast growing areas of electric mobility, but the next phase of growth will depend on user confidence. The challenge is no longer convincing consumers to buy EVs. It is ensuring they can use them conveniently across the State. A driver should never have to worry about finding a charging station within a reasonable distance."

Sreehari feels that charging technology and grid integration also require attention. "The government should encourage ultra-fast charging corridors along major highways connecting Bengaluru, Mysuru, Mangaluru, Hubballi-Dharwad, Kalaburagi and Belagavi. Apartment charging regulations need to be simplified, and incentives should be provided to housing societies that install common charging facilities," he added. According to him, consumers need reliable information about battery life, operating costs and charging options.

Legal, regulatory issues

Drawing attention to another oft-ignored but key factor, Sonam Chandwani, managing partner, KS Legal & Associates, emphasised the importance of the legal and regulatory ecosystem in accelerating EV transition. While policies such as FAME, the Production Linked Incentive (PLI) Scheme, State-level EV policies, and renewable energy initiatives have created momentum, implementation remains fragmented.

Land acquisition for charging stations, power connectivity approvals, environmental clearances, battery waste management obligations under the Battery Waste Management Rules, 2022, and compliance with electricity and urban development regulations continue to present practical challenges.

The next phase of India's EV journey would require greater regulatory harmonisation between the Central and State governments, municipal authorities, electricity distribution companies, and private sector participants.

"The EV transition is often viewed as a technological revolution, but it is equally a legal and regulatory transformation. Technology can create the vehicle, but laws, contracts, compliance frameworks, financing structures, and investor protections create the ecosystem within which that vehicle can operate at scale," Chandwani said.

06J6.On a slow charging mode
धीमी चार्जिंग मोड पर

- While national public charging infrastructure has grown to over **29,000 units**, deployment remains urban-centric with a high **EV-to-charger ratio (235:1)**.

Pelicans at Amber Cheruvu in Hyderabad on Friday. The Hyderabad Disaster Response and Asset Protection Agency's efforts to restore the lake appear to be working. HYDRAA has removed sludge and installed fences to curb pollution and protect biodiversity. NAGARA GOPAL

- **Pelicans** at Amber Cheruvu in Hyderabad on Friday.
- The Hyderabad Disaster Response and Asset Protection Agency's efforts to restore the lake appears to be working.
- HYDRA has removed sludge and installed fences to curb pollution and protect biodiversity.

- **Pelicans** are large water birds belonging to the family **Pelecanidae**.
- They are famous for their **long bills and large throat pouches**, which they use to catch fish.
- Pelicans are found on every continent except Antarctica.
- They usually inhabit coastal regions, lakes, rivers, estuaries, lagoons, and wetlands.

Scientific Classification
• Kingdom: Animalia
• Phylum: Chordata
• Class: Aves (Birds)
• Order: Pelecaniformes
• Family: Pelecanidae
• Genus: Pelecanus

Key Physical Features
Large Throat Pouch
• The most distinctive feature of pelicans is the expandable pouch beneath their beak.
• The pouch is used primarily for catching fish rather than storing food.
Large Wingspan
• Pelicans are among the largest flying birds.
• Some species have a wingspan exceeding **3 metres**.
Excellent Swimmers
• Their webbed feet help them swim efficiently.

In India
Pelicans are commonly seen in:
• Andhra Pradesh
• Tamil Nadu
• Karnataka
• Kerala
• Odisha
• Gujarat

Former LS Secretary General Subhash Kashyap passes away

PCS

Press Trust of India
NEW DELHI

Former Lok Sabha Secretary General and constitutional expert Subhash C. Kashyap passed away on Thursday after prolonged illness. He was 97.

Mr. Kashyap was part of the high-level committee headed by former President Ram Nath Kovind to prepare a legal framework on simultaneous elections. Author of over 100 books, he served as the Secretary General of Lok Sabha from 1983 to 1990.

He served Parliament for over 37 years from the time of Jawaharlal Nehru's first Lok Sabha to the 9th Lok Sabha.

Born in 1929 in a family of freedom fighters in Bijnor in the then United Provinces (now Uttar Pradesh), he actively took part in the struggle for Independence as a teenager.

Subhash C. Kashyap

He received his higher education and professional training at Allahabad, New Delhi, Washington DC, London and Geneva.

He was also awarded the Padma Bhushan.

President Droupadi Murmu on Thursday said the demise of Mr. Kashyap is extremely sad and offered condolences to his family. Lok Sabha Speaker Om Birla condoled his demise and said it is a profound loss to Indian parliamentary democracy, constitutional discourse and public life.

05J6. Former LS Secretary General Subhash Kashyap passes away
पूर्व लोकसभा महासचिव सुभाष कश्यप का निधन

- Former **Lok Sabha Secretary General** and constitutional expert **Subhash C. Kashyap** passed away on Thursday after prolonged illness.

पूर्व **लोकसभा महासचिव** एवं संवैधानिक विशेषज्ञ **सुभाष सी. कश्यप** का गुरुवार को लंबी बीमारी के बाद निधन हो गया।

- He was **97**.

वे **97 वर्ष** के थे।

- Mr. Kashyap was part of the **high-level committee** headed by former President **Ram Nath Kovind** to prepare a legal framework on **simultaneous elections**.

श्री कश्यप **पूर्व राष्ट्रपति रामनाथ कोविंद** की अध्यक्षता वाली **उच्चस्तरीय समिति** के सदस्य थे, जिसका गठन **एक साथ चुनाव (Simultaneous Elections)** के लिए कानूनी ढाँचा तैयार करने हेतु किया गया था।

- Author of over **100 books**, he served as the **Secretary General of Lok Sabha** from **1983 to 1990**.

100 से अधिक पुस्तकों के लेखक श्री कश्यप ने **1983 से 1990** तक **लोकसभा महासचिव** के रूप में कार्य किया।

- He served Parliament for over **37 years** from the time of **Jawaharlal Nehru's first Lok Sabha** to the **9th Lok Sabha**.

उन्होंने **जवाहरलाल नेहरू की प्रथम लोकसभा** से लेकर **नौवीं लोकसभा** तक **37 वर्षों से अधिक** समय तक संसद की सेवा की।

- Born in **1929** in a family of **freedom fighters** in **Bijnor** in the then **United Provinces** (now **Uttar Pradesh**), he actively took part in the struggle for Independence as a teenager.

उनका जन्म **1929** में तत्कालीन **यूनाइटेड प्रोविंसेज़** (वर्तमान **उत्तर प्रदेश**) के **बिजनौर** में एक **स्वतंत्रता सेनानी परिवार** में हुआ था और उन्होंने किशोरावस्था में ही स्वतंत्रता आंदोलन में सक्रिय भागीदारी की थी।

- He received his **higher education** and professional training at **Allahabad**, **New Delhi**, **Washington DC**, **London** and **Geneva**.

उन्होंने अपनी **उच्च शिक्षा** तथा व्यावसायिक प्रशिक्षण **इलाहाबाद**, **नई दिल्ली**, **वॉशिंगटन डी.सी.**, **लंदन** तथा **जेनेवा** में प्राप्त किया।

- He was also awarded the **Padma Bhushan**.
  उन्हें **पद्म भूषण** से भी सम्मानित किया गया था।

Maruti Suzuki unveils 'India's first' flex-fuel car

PCS
The Hindu Bureau
MUMBAI

Maruti Suzuki India Ltd. unveiled 'India's first' flex-fuel car giving flexibility to clients to operate on any blend of ethanol and petrol from E20 to E100.

Maruti said it was introducing the technology in Wagon R which long pioneered alternative fuel vehicles in India, including CNG and LPG. In addition to a significant reduction in oil imports, flex-fuel vehicles can help boost farmers' income, Maruti said.

Nitin Gadkari, Minister of Road Transport and Highways, said India imported a large quantity of crude every year. Biofuels such as ethanol were an important pathway towards reducing this dependence.

मारुति सुजुकी इंडिया लिमिटेड ने 'भारत की पहली' **फ्लेक्स-फ्यूल कार** का अनावरण किया, जो ग्राहकों को **E20 से E100** तक **एथेनॉल** और **पेट्रोल** के किसी भी मिश्रण पर वाहन चलाने की सुविधा प्रदान करती है।

Acclaimed Iranian-French cartoonist, filmmaker Marjane Satrapi dies at 56

PCS
Associated Press
PARIS

Acclaimed Iranian-French cartoonist and filmmaker Marjane Satrapi, a prominent advocate for women's rights and author of *Persepolis*, has died at 56, the French presidency said on Thursday.

"Her passing marks the loss of a leading figure of French culture and an artist devoted to freedom, whose work carried a universal message and earned her immense international acclaim," the French presidency said.

President Emmanuel Macron and his wife "pay tribute to a remarkable artist who transformed an Iranian childhood into a universal fable," the statement said.

Marjane Satrapi

News broadcaster *BFM TV* and other French media reported Satrapi has "died of sadness" a little over a year after the death of her husband, Swedish film producer and actor Mattias Ripa, according to a statement from people close to the artist.

The French Academy of Fine Arts, of which she was a member, expressed its deep sadness paying tribute to "a passionate advocate for cinema and film education" who earlier this year created a foundation to help international students come to Paris to study film.

Satrapi is best-known for her monochrome autobiographical comic book and film *Persepolis*, a coming-of-age tale set against the Islamic Revolution in her native Iran.

Persepolis won the Film Critics Grand Prix at the Cannes Festival in 2007 and the César Award for Best Adapted Screenplay in 2008, in addition to being nominated for Best Animated Feature at the 2008 Oscars.

Her graphic novels also include *Broderies* (*Embroideries*) and *Poulet aux prunes* (*Chicken with plums*), which also was adapted into a film. As a filmmaker, she has directed several works including *La Bande des Jotas* (*The Gang of Jotas*) and *Radioactive* (*Madame Curie*), a biography about the Polish physicist Marie Curie.

Satrapi also 2023 coordinated the book *Femme, vie, liberté* (*Woman, Life, Freedom*) together with a group of artists and academics to illustrate the revolts that occurred in Iran after the death of Mahsa Amini in 2022 at the hands of "morality police".

Draft SC rules prohibit use of AI for judicial outcomes, witness profiling

They underline that AI systems used in court processes must 'function solely in an assistive capacity' and remain 'strictly subservient to human judgment and judicial authority'; comments and suggestions invited from the public till June 20

GS II: Polity

Aaratrika Bhaumik
NEW DELHI

Prohibiting the use of artificial intelligence (AI) to determine judicial outcomes, the Supreme Court AI committee has proposed draft regulations that bar AI-assisted sentencing without mandatory human oversight, prevent AI systems from profiling parties or witnesses, and disallow the use of "opaque" or "unexplainable" AI systems in any court process.

The proposed regulations come amid concerns expressed by the top court in recent months over the growing reliance on AI by courts in rendering judgments. In March, a Bench headed by Justice P.S. Narasimha chided a trial court for relying on non-existent judgments generated with the help of AI, observing that it was not merely "an error in decision-making" but amounted to judicial "misconduct".

The preliminary draft of the 'Regulations for Use of Artificial Intelligence (AI) in Courts, 2026', made public on Wednesday, underlines that AI systems used in court processes must "function solely in an assistive capacity" and remain "strictly subservient to human judgment and judicial authority".

The draft regulations permit the use of AI for administrative functions such as case listing and scheduling. GETTY IMAGES/ISTOCK

The committee, chaired by Supreme Court judge Justice P.S. Narasimha and comprising Justices Sanjeev Sachdeva, Raja Vijayaraghavan V., Anoop Chitkara and Suraj Govindaraj, has invited comments and suggestions from stakeholders as well as members of the public on the draft regulations before they are finalised.

The deadline for submitting responses is June 20. Under the draft regulations, the processing of personal data through AI systems shall be governed by the provisions of the Digital Personal Data Protection Act, 2023. It also underlines that AI systems must not "perpetuate, amplify, or introduce bias" on grounds of race, religion, caste, sex, gender, disability, language, economic status, or any other ground prohibited under the Constitution.

'Human-in-the-loop'

"Applications involving higher levels of risk to personal liberty, any lawful right of a person, or the integrity of judicial outcomes shall be subject to correspondingly heightened safeguards, including mandatory human-in-the-loop requirements and independent oversight," the draft states.

It further cautions that AI-assisted judicial systems should not "widen digital divides" and must remain accessible to all stakeholders, including those from rural, economically disadvantaged, or linguistically diverse communities.

While the draft regulations permit the use of AI for administrative functions such as case management, preparation of cause lists, scheduling of hearings, transcription of court proceedings and translation of judgments, they make it clear that AI systems cannot be used for "risk scoring" in court processes. This includes assessing flight risk, predicting recidivism, evaluating bail eligibility, or determining the credibility of parties or witnesses.

It also bars authorities from using AI systems for the surveillance or continuous monitoring of judicial officers, advocates, litigants and other stakeholders, "except as may be specifically authorised by applicable law for the time being in force".

'Apex body'

To supervise the adoption of AI in the judiciary and steer standard-setting and policy development, the draft regulations propose the creation of a full-time "apex body" at the Supreme Court.

The apex body, it recommends, would comprise two Supreme Court judges nominated by the Chief Justice of India (CJI), one of whom shall serve as the ex-officio chairperson; two High Court Chief Justices and two High Court judges nominated by the CJI; one member from an institution of national importance or any institution of repute, as nominated by the CJI; an officer not below the rank of Joint Secretary in the Ministry of Electronics and Information Technology; a finance expert and a cybersecurity expert nominated by the CJI; among others.

मार्च में **न्यायमूर्ति पी.एस. नरसिम्हा** की अध्यक्षता वाली पीठ ने एआई की सहायता से उत्पन्न अस्तित्वहीन निर्णयों पर भरोसा करने के लिए एक निचली अदालत को फटकार लगाई थी और कहा था कि यह केवल **"निर्णय लेने में त्रुटि"** नहीं बल्कि न्यायिक **"कदाचार"** के समान है।

- The preliminary draft of the **'Regulations for Use of Artificial Intelligence (AI) in Courts, 2026'**, made public on Wednesday, underlines that AI systems used in court processes must **"function solely in an assistive capacity"** and remain **"strictly subservient to human judgment and judicial authority"**.
  बुधवार को सार्वजनिक किए गए **'न्यायालयों में कृत्रिम बुद्धिमत्ता (AI) के उपयोग हेतु विनियम, 2026'** के प्रारंभिक मसौदे में स्पष्ट किया गया है कि न्यायालयी प्रक्रियाओं में प्रयुक्त एआई प्रणालियाँ **"केवल सहायक भूमिका"** में कार्य करेंगी और **"मानवीय निर्णय तथा न्यायिक प्राधिकार के अधीन"** रहेंगी।
- The committee, chaired by **Justice P.S. Narasimha** and comprising **Justices Sanjeev Sachdeva, Raja Vijayaraghavan V., Anoop Chitkara and Suraj Govindaraj**, has invited comments and suggestions from stakeholders as well as members of the public on the draft regulations before they are finalised.
  न्यायमूर्ति पी.एस. नरसिम्हा की अध्यक्षता वाली समिति, जिसमें **न्यायमूर्ति संजीव सचदेवा, राजा विजयराघवन वी., अनूप चितकारा तथा सूरज गोविंदराज** शामिल हैं, ने विनियमों को अंतिम रूप देने से पूर्व हितधारकों और आम जनता से सुझाव एवं टिप्पणियाँ आमंत्रित की हैं।
- The deadline for submitting responses is **June 20**.
  प्रतिक्रियाएँ प्रस्तुत करने की अंतिम तिथि **20 जून** निर्धारित की गई है।
- Under the draft regulations, the processing of **personal data** through AI systems shall be governed by the provisions of the **Digital Personal Data Protection Act, 2023**.
  प्रारूप विनियमों के अनुसार एआई प्रणालियों के माध्यम से **व्यक्तिगत डेटा** के प्रसंस्करण को **डिजिटल व्यक्तिगत डेटा संरक्षण अधिनियम, 2023** के प्रावधानों द्वारा नियंत्रित किया जाएगा।
- This includes assessing **flight risk**, predicting **recidivism**, evaluating **bail eligibility**, or determining the credibility of parties or witnesses.
  इसमें **फरार होने की संभावना**, **पुनः अपराध करने की संभावना**, **जमानत पात्रता का मूल्यांकन**, अथवा पक्षकारों और गवाहों की विश्वसनीयता का निर्धारण शामिल है।
- It also bars authorities from using AI systems for the **surveillance** or continuous monitoring of judicial officers, advocates, litigants and other stakeholders, **"except as may be specifically authorised by applicable law for the time being in force"**.
  यह न्यायिक अधिकारियों, अधिवक्ताओं, वादकारियों तथा अन्य हितधारकों की **निगरानी (Surveillance)** अथवा सतत पर्यवेक्षण के लिए एआई प्रणालियों के उपयोग पर भी प्रतिबंध लगाता है, सिवाय उन परिस्थितियों के जहाँ प्रचलित कानून द्वारा विशेष रूप से इसकी अनुमति दी गई हो।

'Apex body'
'शीर्ष निकाय'

- To supervise the adoption of AI in the judiciary and steer standard-setting and policy development, the draft regulations propose the creation of a full-time **"apex body"** at the **Supreme Court**.
  न्यायपालिका में एआई के उपयोग की निगरानी तथा मानक निर्धारण एवं नीतिगत विकास का मार्गदर्शन करने हेतु मसौदा विनियम **सर्वोच्च न्यायालय** में एक पूर्णकालिक **"शीर्ष निकाय"** के गठन का प्रस्ताव रखते हैं।
- The apex body, it recommends, would comprise **two Supreme Court judges** nominated by the **Chief Justice of India (CJI)**, one of whom shall serve as the **ex-officio chairperson**.
  सिफारिश के अनुसार इस शीर्ष निकाय में **भारत के मुख्य न्यायाधीश (CJI)** द्वारा नामित **दो सर्वोच्च न्यायालय न्यायाधीश** होंगे, जिनमें से एक **पदेन अध्यक्ष (Ex-officio Chairperson)** के रूप में कार्य करेगा।
- It would also include **two High Court Chief Justices** and **two High Court judges** nominated by the CJI.

इसमें **दो उच्च न्यायालयों के मुख्य न्यायाधीश** तथा **दो उच्च न्यायालय न्यायाधीश** भी शामिल होंगे, जिन्हें मुख्य न्यायाधीश द्वारा नामित किया जाएगा।

- One member from an **institution of national importance** or any institution of repute, as nominated by the CJI, would also be part of the body.
  राष्ट्रीय महत्व के संस्थान अथवा किसी प्रतिष्ठित संस्थान से मुख्य न्यायाधीश द्वारा नामित एक सदस्य भी इस निकाय का हिस्सा होगा।
- An officer not below the rank of **Joint Secretary** in the **Ministry of Electronics and Information Technology**, a **finance expert**, and a **cybersecurity expert** nominated by the CJI would also be included, among others.
  इसके अतिरिक्त **इलेक्ट्रॉनिक्स एवं सूचना प्रौद्योगिकी मंत्रालय** का **संयुक्त सचिव स्तर से कम नहीं** का एक अधिकारी, एक **वित्त विशेषज्ञ**, तथा मुख्य न्यायाधीश द्वारा नामित एक **साइबर सुरक्षा विशेषज्ञ** भी इस निकाय में शामिल होंगे।

Minorities enjoy full freedom in India, are able to practise their faith: Rijiju

GS II: Governance

Ishita Mishra
Aroon Deep
NEW DELHI

Union Minority Affairs Minister Kiren Rijiju on Thursday said minorities in India enjoy full freedom and are able to practise their faith and way of life without hindrance. He said efforts were being made from outside the country to project a false narrative of persecution.

"No individual had been compelled to leave the country because of religious identity... Criticise government policies if you wish, but do not spread falsehoods," he said while attacking the Opposition. Speaking at the Ministry's 'Reforms Utsav' to mark 12 years of the Narendra Modi government, Mr. Rijiju highlighted technology-driven initiatives but said that details of nearly 45% of Waqf properties are yet to be uploaded on the UMEED portal and that issues on scholarship remain unresolved.

UMEED is a centralised digital platform for real-time uploading, verification, and monitoring of Waqf properties. It was launched on June 6, 2025, with an initial six-month deadline to register around nine lakh such properties spread across India.

Union Minister Kiren Rijiju at the Reforms Utsav event organised by the Ministry of Minority Affairs in New Delhi on Thursday. ANI

'Labour-heavy process'

"There are so many shortcomings in different State Waqf boards... the documents of properties are faulty... in some places, thousands of acres are recorded on paper, but the land on ground tells a different story. We are continuously organising workshops and sessions to help Mutawallis register the Waqf properties. It is a labour-intensive process and will take some time," he said.

The Minister admitted that scholarship delivery, one of the Ministry's largest welfare initiatives, remained affected by investigations into alleged fraud in several States. Referring to cases where scholarships were reportedly claimed in the names of fictitious students, Mr. Rijiju said he hoped that ongoing CBI inquiries would conclude soon and the programme could resume.

'Wait for probe to finish'

"We cannot start the scholarships by excluding those institutions which are being investigated for fraud. So we will have to wait until the investigation is finished," he added.

Mr. Rijiju said the Ministry's annual budget has increased from ₹1,949 crore in 2014 to ₹4,115 crore at present, a 111% jump. But government outreach efforts received limited attention and negative developments attracted disproportionate coverage, he said.

During the event, which was attended by beneficiaries of various schemes, the Ministry featured demos for an AI-enabled helpline for hajj pilgrims.

"The chatbot will be accessible through an app that pilgrims will be able to place phone calls with, in addition to being available on WhatsApp. The voice chatbot is only available on its own app since WhatsApp calls are banned by the Saudi government," an official said.

There will be an escalation bot to handle complex queries where human assistance is required, a Gnani.ai representative said at the event. The firm's chatbot will be rolled out in the coming months on the Ministry's behalf and will support queries in 12 languages.

05J6. Minorities enjoy full freedom in India, are able to practise their faith: Rijiju

भारत में अल्पसंख्यकों को पूर्ण स्वतंत्रता प्राप्त है, वे अपने धर्म का पालन करने में सक्षम हैं: रिजिजू

- But he said that details of nearly **45% of Waqf properties** are yet to be uploaded on the **UMEED portal** and that issues on **scholarship** remain unresolved.
  किन्तु उन्होंने कहा कि लगभग **45% वक्फ संपत्तियों** का विवरण अभी भी **UMEED पोर्टल** पर अपलोड किया जाना शेष है तथा **छात्रवृत्ति** से संबंधित समस्याएँ अभी तक हल नहीं हुई हैं।

- **UMEED** is a centralised digital platform for **real-time uploading, verification, and monitoring of Waqf properties**.

UMEED वक्फ संपत्तियों के **रियल-टाइम अपलोडिंग, सत्यापन और निगरानी** हेतु एक केंद्रीकृत डिजिटल मंच है।

- It was launched on **June 6, 2025**, with an initial **six-month deadline** to register around **nine lakh properties** spread across India.

इसे **6 जून 2025** को प्रारम्भ किया गया था और पूरे भारत में फैली लगभग **नौ लाख संपत्तियों** के पंजीकरण के लिए प्रारम्भिक **छह माह की समय-सीमा** निर्धारित की गई थी।

'Labour-heavy process'
'अत्यधिक श्रम-सघन प्रक्रिया'

- "We are continuously organising workshops and sessions to help **Mutawallis** register the Waqf properties."

"हम **मुतवल्लियों** को वक्फ संपत्तियों का पंजीकरण कराने में सहायता देने के लिए निरंतर कार्यशालाएँ और प्रशिक्षण सत्र आयोजित कर रहे हैं।"

GS II: Governance

Data hygiene

Census enumerators should not face difficulties in the name of re-verification

It is disturbing that some Census 2027 enumerators in States such as Rajasthan and Uttar Pradesh are facing issues for extremely unusual reasons. In these two States where the first phase of the Census – Houselisting and Housing Census (HLO) – is under way, they have been advised to "revisit households and correct the data discrepancies" and "not to select options that may show the government in a poor light". Re-verification is a legitimate part of any study or survey but this must be done to reflect reality accurately, not to manage perceptions. In Rajasthan, the issue arises from a circular of the Director of Census Operations to district-level officials regarding discrepancies identified in field data. Apparently, the objective is to ensure that data are accurately recorded, using appropriate options in the questionnaire. However, in some cases, enumerators have been told to record data based on assumptions. For example, if some households do not have toilets, enumerators have been told to check whether toilets are available nearby, on the basis of which the entry can be changed from "open defecation" to "[having] access to latrine". In Uttar Pradesh, the message seems to be not to present facts as they are, raising concerns about data integrity and reliability for a crucial and sensitive exercise.

The present episode brings to the fore the efficacy of programmes such as the country's long-running campaign against open defecation. While many States have made tangible progress, it would be unrealistic to conclude that the problem has been eliminated. For administrative purposes, including funding, it is reasonable to classify cities and villages on the basis of certain parameters as Open Defecation Free (ODF), ODF Plus and ODF Plus Model. But, the critical question is whether such a classification reflects reality and comes into conflict with the enumerators' work. It is the responsibility of policymakers to ensure that Census data are accurate and credible. They must also sensitise people to provide correct information, as public policies and welfare schemes are formulated on the basis of these data and ultimately benefit them. The authorities must recognise and resolve the legitimate difficulties faced by enumerators. As the significance of the Census hardly needs any reiteration, the Union government should be quite liberal in enhancing allowances for enumerators to ensure efficient and timely work. It should not only be conscious of the financial outlay involved – about ₹11,718 crore for the entire country – but also of the need to make reliable data publicly available for purposes such as targeted and inclusive policymaking. The government should send a clear message that data sanitisation must not be undertaken under the guise of re-verification.

05J6. Data hygiene
डेटा स्वच्छता

- It is disturbing that some **Census 2027 enumerators** in States such as **Rajasthan** and **Uttar Pradesh** are facing issues for extremely unusual reasons.

यह चिंताजनक है कि **राजस्थान** और **उत्तर प्रदेश** जैसे राज्यों में कुछ **जनगणना 2027 प्रगणक (Enumerators)** अत्यंत असामान्य कारणों से समस्याओं का सामना कर रहे हैं।

- In these two States where the first phase of the Census — **Houselisting and Housing Census (HLO)** — is under way, they have been advised to "revisit households and correct the data discrepancies" and "not to select options that may show the government in a poor light".

इन दोनों राज्यों में, जहाँ जनगणना का प्रथम चरण — **गृह-सूचीकरण एवं आवास जनगणना (HLO)** — चल रहा है, प्रगणकों को "परिवारों का पुनः दौरा कर आँकड़ों में पाई गई विसंगतियों को सुधारने" तथा "ऐसे विकल्पों का चयन न करने" की सलाह दी गई है जो सरकार को नकारात्मक रूप में प्रस्तुत कर सकते हों।

- **Reverification** is a legitimate part of any study or survey but this must be done to reflect reality accurately, not to manage perceptions.

पुनः सत्यापन (Reverification) किसी भी अध्ययन अथवा सर्वेक्षण का वैध भाग है, किन्तु इसका उद्देश्य वास्तविकता को सही रूप में प्रतिबिंबित करना होना चाहिए, न कि धारणाओं का प्रबंधन करना।

- In **Rajasthan**, the issue arises from a circular of the **Director of Census Operations** to district-level officials regarding discrepancies identified in field data.

राजस्थान में यह मुद्दा **जनगणना संचालन निदेशक** द्वारा जिला स्तरीय अधिकारियों को जारी उस परिपत्र से उत्पन्न हुआ है, जिसमें क्षेत्रीय आँकड़ों में पाई गई विसंगतियों का उल्लेख किया गया है।

- Apparently, the objective is to ensure that data are accurately recorded, using appropriate options in the questionnaire.

प्रतीत होता है कि इसका उद्देश्य प्रश्नावली में उपयुक्त विकल्पों का उपयोग करते हुए आँकड़ों का सटीक अभिलेखन सुनिश्चित करना है।

- However, in some cases, enumerators have been told to record data based on assumptions.
  हालाँकि, कुछ मामलों में प्रगणकों को अनुमानों के आधार पर आँकड़े दर्ज करने के लिए कहा गया है।
- For example, if some households do not have toilets, enumerators have been told to check whether toilets are available nearby, on the basis of which the entry can be changed from "**open defecation**" to "[having] **access to latrine**".
  उदाहरण के लिए, यदि कुछ परिवारों के पास शौचालय नहीं हैं, तो प्रगणकों से यह जाँच करने को कहा गया है कि क्या आसपास शौचालय उपलब्ध हैं, जिसके आधार पर प्रविष्टि को "**खुले में शौच**" से बदलकर "**शौचालय तक पहुँच उपलब्ध**" किया जा सकता है।
- In **Uttar Pradesh**, the message seems to be not to present facts as they are, raising concerns about **data integrity** and **reliability** for a crucial and sensitive exercise.
  उत्तर प्रदेश में संदेश यह प्रतीत होता है कि तथ्यों को उनके वास्तविक स्वरूप में प्रस्तुत न किया जाए, जिससे इस महत्वपूर्ण और संवेदनशील प्रक्रिया की **आँकड़ों की सत्यनिष्ठा** तथा **विश्वसनीयता** को लेकर चिंताएँ उत्पन्न होती हैं।
- The present episode brings to the fore the efficacy of programmes such as the country's long-running campaign against **open defecation**.
  वर्तमान प्रकरण **खुले में शौच** के विरुद्ध देश में लंबे समय से चलाए जा रहे अभियानों जैसे कार्यक्रमों की प्रभावशीलता को सामने लाता है।
- For administrative purposes, including funding, it is reasonable to classify cities and villages on the basis of certain parameters as **Open Defecation Free (ODF)**, **ODF Plus** and **ODF Plus Model**.
  प्रशासनिक उद्देश्यों, जिनमें वित्तपोषण भी शामिल है, के लिए नगरों और गाँवों को कुछ मानकों के आधार पर **ओपन डिफेकेशन फ्री (ODF)**, **ODF प्लस** तथा **ODF प्लस मॉडल** के रूप में वर्गीकृत करना उचित है।

Energy tie-up tops bilateral agenda as Modi meets Delcy

PM holds discussions with Venezuela's Acting President on also expanding cooperation in critical minerals, technology, agriculture and health; importance of Global South solidarity emphasised

GS II: IR

Kallol Bhattacherjee
NEW DELHI

India's partnership with Venezuela is of "immense importance" for the Global South, Prime Minister Narendra Modi said on Thursday, welcoming Delcy Rodriguez, the Acting President of Venezuela, even as the South American country called "energy security a fundamental pillar of the bilateral relationship".

Venezuela is still dealing with the aftermath of the abduction of President Nicolas Maduro by the U.S. military in January. Officials said Ms. Rodriguez, whose country is dealing with 'political transition' and 'fundamental economic transformation', described India as a "trusted partner". The leader, who arrived here on Wednesday, is on a five-day visit.

"We had extensive discussions on expanding our cooperation in energy, critical minerals, technology, agriculture, health and people-to-people ties. As a valued partner in Latin America, our close cooperation with Venezuela holds immense importance for the Global South. We will continue to work together for the mutual benefit of the people of our nations," said Mr. Modi after the meeting.

Prime Minister Narendra Modi with Venezuelan Acting President Delcy Rodriguez in New Delhi on Thursday. SHIV KUMAR PUSHPAKAR

A press release from the Venezuelan government said the meeting was aimed at "strengthening the role of both nations in the geopolitical context of the Global South and on boosting mutually beneficial macroeconomic agreements". It described India as "one of the main destinations for the Nation's energy exports, making energy security a fundamental pillar of the bilateral relationship".

Ms. Rodriguez, who was accompanied by Ministers of Economy, Foreign Affairs, Science and Technology, and Transport and Communications, conducted a "comprehensive review of the mutual cooperation map", the press note said, adding that the bilateral relation is in an "excellent state".

Officials revealed that Ms. Rodriguez discussed the political situation in Venezuela in a "frank conversation" with Mr. Modi during official-level talks and over the working lunch that followed. "We all know there was a transition in Venezuela, and we are working with a government that is friendly and that wants partnership with India. We want to reciprocate that," said Rudrendra Tandon, Secretary (East) of the External Affairs Ministry, while briefing the media.

BRICS experts discuss asset recovery challenges

The Enforcement Directorate (ED) on June 2 organised the inaugural meeting on the BRICS's expert network on asset recovery, marking a significant milestone within the Anti-Corruption Working Group under India's 2026 BRICS presidency, the agency said on Thursday. Asset recovery is the central pillar of modern anti-corruption and financial crime enforcement, Rahul Navin, Director, ED, said, welcoming global delegates. The Chair called for stricter alignment with the Financial Action Task Force's guidance for asset recovery and inter-agency cooperation. Deliberations included mutual operational challenges among member countries.

How ISWAP emerged as the dominant jihadist force in Africa's Lake Chad basin

The Islamic State West Africa Province steadily eclipsed Boko Haram to become the most powerful militant organisation in the region; with a structured command system and strong territorial presence, what began as a local insurgency in Nigeria is now one of Africa's major transnational security threats

GS II: IR

NEWS ANALYSIS

R. Tejaswini

A joint operation by Nigerian forces and U.S. African Command that killed 175 Islamic militants has drawn attention to the complex security situation in Lake Chad basin. The operation has renewed the focus on Islamic State West Africa Province (ISWAP), which has steadily eclipsed Boko Haram to become the most powerful jihadist organisation operating in the basin.

In recent months, Washington has expanded military and intelligence support to Nigeria as part of broader efforts to counter Islamic State affiliates operating across West Africa.

The strikes carried out on May 16 and 18 killed Abu-Bilal al-Minuki, a senior ISIS-linked commander associated with ISWAP – the Islamic State's affiliate in West Africa. They also destroyed checkpoints and weapons used by the group, dealing a temporary setback to its operations. Abu al-Minuki was killed along with his lieutenants on his compound in a helicopter-borne assault.

He was a key figure in providing guidance for facilitating ISIL- linked operations across the Lake Chad basin. He was part of the Boko Haram group until the splinter and joined ISWAP which pledged allegiance to ISIS. Abu al-Minuki was described by U.S. President Donald Trump as the "second in command of ISIS globally" and "the most active terrorist in the world".

ISWAP traces its origin to Boko Haram, popularly translated as Western education is forbidden, a militant Islamic movement that emerged in the early 2000s in northeastern Nigeria under the leadership of Mohammad Yusuf. The movement's primary objective was to establish an Islamist regime and oppose western education and democracy.

Following the death of Mohammed Yusuf in the wake of clashes between Boko Haram and Nigerian forces in 2009, Abubakar Shekau assumed leadership. Under his leadership, the network's operational capabilities expanded, frequently attacking security and police forces. It subsequently evolved into a violent insurgent movement.

It was the 2014 Chibok incident where 276 school girls were abducted that brought global attention to the insurgency. The U.S. State Department designated Boko Haram as a foreign terrorist organisation.

Deep fissures develop

Differences over ideological and strategic matters intensified divisions within the network, despite its growing influence.

Soldiers aboard a Multinational Joint Task Force boat in Lake Chad, where the regional force coordinates counter-terrorism efforts. AFP

Increasing disagreements over Shekau's leadership led to many commanders breaking away to form Ansaru, a new jihadist faction closely linked to the al-Qaeda. The organisation under Shekau's leadership not only sanctioned attacks against the Nigerian state and Christians but also against state-aligned Muslims.

Shekau was accused of ignoring the organisation's consultative structure and making decisions independently, drawing criticism from senior commanders.

Divisions deepened within the group as Boko Haram pledged loyalty to the Islamic state in 2015.

The ISIS was concerned about the faction's conduct under Shekau, particularly his violence against Muslims and use of women and children in suicide bombing. According to the UNICEF, between 2014 and 2016, nearly 20% of Boko Haram's suicide bombers were children, three quarters of whom were girls.

Amid growing disagreements, ISIS appointed Abu Musab-Al-Barnawi as the head of its West African affiliate, sidelining Shekau. This decision led to a split within Boko Haram.

This split was a major turning point, as it introduced another armed group – ISWAP – which aligned with ISIS in the Lake Chad region, while Shekau's faction remained Boko Haram.

ISWAP and Boko Haram differed in their operational conduct, despite sharing jihadist roots and the objective of establishing governments based on Islamic law. ISWAP presented itself as more focused on military and state forces and restrained towards Muslim civilians than Boko Haram under Shekau.

Stronger structure

Unlike Boko Haram under Shekau, ISWAP developed a more structured command system and a stronger territorial presence. It relies on the consultative structure (*shura*) supported by regional commanders rather than centring authority on a single leader. By taxing residents and economic activities including fishing and farming zones, the group developed a structured revenue system around the Lake Chad basin rather than depending on looting and kidnappings like Boko Haram. The group has exploited the region's fragile socio-economic conditions and weak governance, to recruit members from local communities.

ISWAP's organisational structure, established revenue system and influence over communities marginalised by the states helped it emerge as a dominant jihadist force. Ideological legitimacy and strategic guidance by ISIS has also benefited the network's operation.

ISWAP does not operate in Nigeria alone, but has a significant presence in neighbouring states, resulting in a regional security challenge. Porous borders, weak governance and gaps in intelligence sharing among affected states have contributed to its growing influence in the basin. Military operations face challenges due to porous borders around the Lake Chad basin which facilitates the movement of fighters and weapons across national borders.

In response Nigeria, Niger, Chad, Cameroon and Benin have formed the Multinational Joint Task Force to coordinate counter-terrorism efforts.

Rivalry within the jihadist movement has also shaped the conflict.

Frequent clashes between ISWAP and Shekau's Boko Haram faction reflected a broader struggle for territory, recruits and influence across the basin.

Weakening of Boko Haram, following the death of Shekau in 2021 during these clashes, consolidated ISWAP's position as the dominant jihadist force in the region. They leveraged the porous borders between Nigeria, Niger, Chad and Cameroon as well as gaps in regional security cooperation to operate across national boundaries.

To overcome its conventional military disadvantages, ISWAP fights asymmetrically through ambushes, improvised explosive devices and influence over communities marginalised by the state. Still, ISWAP's expansion has transformed what began as a localised insurgency in Nigeria into one of Africa's most resilient transnational security challenges.

Centre's investment body flagged Nicobar port as lacking in 'strategic goals'

GS III: Economy

EXCLUSIVE

Jacob Koshy
NEW DELHI

The Public Investment Board (PIB), a Finance Ministry body that appraises large public investments, had on August 2024 termed the proposed International Container Transhipment Port (ICTP) at Galathea Bay in Great Nicobar Island as lacking in "strategic objectives".

Following the August meeting, it had advised the Ministry of Ports, Shipping and Waterways (MoPSW) to include a strategic case in its proposal. A little over a year later, the same project was formally notified as a "strategic project" by the Ministry of Defence, according to records of a March 2026 meeting viewed by *The Hindu*.

The "strategic" nature of the proposed ₹81,000-crore Great Nicobar Project, which consists of the ICTP, a township, airport, a gas-powered power plant, and a tourism zone, has been the Centre's excuse, since at least 2022, for not making public the contents of a report by a High Powered Committee (HPC) on the cumulative environmental impact of the project.

It has also denied Right To Information requests on environmental clearances for the project on the same grounds.

The PIB's view surfaces in records of meetings held on March 17 and 19, 2026, by another Finance Ministry body – the Public-Private Partnership Appraisal Committee (PPPAC) – tasked with vetting project proposals worth ₹500 crore and above involving a partnership with private players.

The Hindu has viewed the PPPAC meeting records and reached out to the Finance Ministry for comment, but has not received one till press time.

The proposal, sponsored by the MoPSW with the Kamarajar Port Limited (KPL) in Chennai as the implementing agency, sought PPPAC clearance to build the port in two phases and, crucially, approval for ₹12,230 crore as Viability Gap Funding (VGF) to make the commercially marginal project bankable.

VGF is a one-time grant given to support infrastructure projects that are economically justified but fall short of commercial (financial) viability.

Shift in narrative

The PPPAC cleared the proposal "unanimously" though it refused the VGF, recommending instead that the MoPSW use its internal budget for the same.

Earlier this week, Congress MP Jairam Ramesh wrote to Environment Minister Bhupender Yadav that "...the narrative on the Great Nicobar Island Project has suddenly shifted... faced with incontrovertible evidence of its hugely adverse ecological impacts, the Union Government is now emphasizing its supposed strategic rationale."

He added that "...the Great Nicobar Island Project as presently conceived is overwhelmingly a commercial enterprise".

"Until the environment clearance [accorded in November 2022] there was no real reference by the Government of it being a strategic project... and even then it was only the airport [with civilian and military use]," researcher and author Pankaj Sekhsaria, who has extensively documented the project's environmental threat, told *The Hindu*.

The ICTP is a significant component of the much bigger Great Nicobar Island Development Project and is a Ministry of Home Affairs initiative, with the Andaman and Nicobar Islands Integrated Development Corporation Limited (ANIIDCO) as the proponent of the overall project and holder of environmental clearance.

The 2021 documents that conceived the Great Nicobar programme and the January 2023 Expression of Interest for the port described it as a means of capturing transhipment cargo currently routed through Colombo, Singapore, and Port Klang, with the government estimating annual foreign exchange savings of about $200 million, cumulatively reaching around $1 billion by 2047.

In the last year or so, the project has volubly been cast in a maritime security lens, centred around the threat from China.

The Nicobar question

The "strategic" nature of the project has been the Centre's excuse for not making public the contents of a report by a High Powered Committee on the environmental impact of the project

The Public Investment Board, a Finance Ministry body, termed the port-component of the Nicobar project as "lacking strategic objectives" in August 2024

A year later, the Ministry of Defence labels it as a "strategic project"

In the last year or so, the ₹81,000-crore project is being cast in a maritime security lens, centred around the threat from China

India, U.K. launch observatory to expand critical minerals partnership

GS III: Economy

The Hindu Bureau
NEW DELHI

Seeking to expand cooperation and technology-sharing in the realm of critical minerals, India and the United Kingdom on Thursday formally launched the Critical Minerals Global Supply Chain Observatory (GSCO).

The observatory was first announced during U.K. Prime Minister Keir Starmer's visit to India in October last year with an objective to "expand mineral coverage, further integrate advanced technologies and unlock new bilateral investment opportunities".

The platform – to be jointly operated by India's Technology Innovation in Exploration & Mining Foundation (TEXMiN), Indian Institute of Technology (ISM) Dhanbad and U.K.'s University of Cambridge – will institute a data-driven platform to monitor and analyse global critical mineral supply chains.

In a social media post, Union Minister for Mines and Minerals G. Kishan Reddy wrote, "This is a major step towards strengthening critical mineral supply chains, supporting clean energy transitions, and building resilient global supply chains through the India-U.K. partnership."

Union Minister G. Kishan Reddy and U.K. Foreign Secretary Yvette Cooper launching the critical minerals observatory. ANI

Minister meets official

Meanwhile, during a meeting with visiting British Foreign Secretary Yvette Cooper on Thursday, External Affairs Minister S. Jaishankar said India and the U.K. were well-positioned to construct a new future-oriented and mutually beneficial partnership on the back of their newly firmed-up comprehensive trade deal and the defence industrial road map. Mr. Jaishankar said both sides "reviewed ongoing progress in our cooperation focusing on trade, technology, supply chains, defence, climate, education and people to people ties. Also spoke about new opportunities in clean energy, AI and critical minerals".

The two sides also exchanged views on global developments including in Ukraine, West Asia and the Indo-Pacific.

In his remarks, Mr. Jaishankar also highlighted the "remarkable developments" in the bilateral ties in recent months while pointing to Prime Minister Narendra Modi's visit to the U.K. last July, followed by U.K. Prime Minister Keir Starmer's trip to India in October.

Ms. Cooper also met Mr. Modi. "Appreciated the deepening of the India-UK partnership in recent times that has unlocked unprecedented growth opportunities for both our countries," Mr. Modi said on social media.

Ms. Cooper emphasised greater access to critical minerals and improved information-sharing would be mutually beneficial to both countries. According to the announcement readout, Ms. Cooper stated the observatory could also serve "as a foundation for broader cooperation across the critical minerals sector and related strategic industries."

05J6. India, U.K. launch observatory to expand critical minerals partnership
भारत और ब्रिटेन ने महत्त्वपूर्ण खनिज साझेदारी के विस्तार हेतु ऑब्ज़र्वेटरी की शुरुआत की

- Seeking to expand cooperation and technology-sharing in the realm of **critical minerals**, **India** and the **United Kingdom** on Thursday formally launched the **Critical Minerals Global Supply Chain Observatory (GSCO)**.
  महत्त्वपूर्ण खनिजों (Critical Minerals) के क्षेत्र में सहयोग और प्रौद्योगिकी साझेदारी का विस्तार करने के उद्देश्य से **भारत** और **यूनाइटेड किंगडम** ने गुरुवार को औपचारिक रूप से **क्रिटिकल मिनरल्स ग्लोबल सप्लाई चेन ऑब्ज़र्वेटरी (GSCO)** की शुरुआत की।
- The observatory was first announced during **U.K. Prime Minister Keir Starmer's** visit to India in **October last year** with an objective to **"expand mineral coverage, further integrate advanced technologies and unlock new bilateral investment opportunities"**.

इस ऑब्ज़र्वेटरी की पहली घोषणा **ब्रिटेन के प्रधानमंत्री कीर स्टार्मर** की **पिछले वर्ष अक्टूबर** में भारत यात्रा के दौरान की गई थी, जिसका उद्देश्य **"खनिज कवरेज का विस्तार करना, उन्नत प्रौद्योगिकियों का और अधिक एकीकरण करना तथा नए द्विपक्षीय निवेश अवसरों को खोलना"** था।

- The platform — to be jointly operated by India's **Technology Innovation in Exploration & Mining Foundation (TEXMiN)**, **Indian Institute of Technology (ISM) Dhanbad** and U.K.'s **University of Cambridge** — will institute a **data-driven platform** to monitor and analyse global critical mineral supply chains.
  यह मंच भारत की **टेक्नोलॉजी इनोवेशन इन एक्सप्लोरेशन एंड माइनिंग फाउंडेशन (TEXMiN)**, **भारतीय प्रौद्योगिकी संस्थान (आईएसएम) धनबाद** तथा ब्रिटेन के **कैम्ब्रिज विश्वविद्यालय** द्वारा संयुक्त रूप से संचालित किया जाएगा और वैश्विक महत्त्वपूर्ण खनिज आपूर्ति शृंखलाओं की निगरानी एवं विश्लेषण हेतु एक **डेटा-आधारित मंच** स्थापित करेगा।
- In a social media post, **Union Minister for Mines and Minerals G. Kishan Reddy** wrote, "This is a major step towards strengthening **critical mineral supply chains**, supporting **clean energy transitions**, and building **resilient global supply chains** through the India–U.K. partnership."
  सोशल मीडिया पर एक पोस्ट में **केंद्रीय खान एवं खनिज मंत्री जी. किशन रेड्डी** ने लिखा, "यह **महत्त्वपूर्ण खनिज आपूर्ति शृंखलाओं** को सुदृढ़ करने, **स्वच्छ ऊर्जा संक्रमण** को समर्थन देने तथा भारत–ब्रिटेन साझेदारी के माध्यम से **लचीली वैश्विक आपूर्ति शृंखलाओं** के निर्माण की दिशा में एक महत्वपूर्ण कदम है।"

Minister meets official
मंत्री की वरिष्ठ अधिकारी से भेंट

- Mr. Jaishankar said both sides **"reviewed ongoing progress in our cooperation focusing on trade, technology, supply chains, defence, climate, education and people-to-people ties."**
  श्री जयशंकर ने कहा कि दोनों पक्षों ने **"व्यापार, प्रौद्योगिकी, आपूर्ति शृंखलाओं, रक्षा, जलवायु, शिक्षा और जन-से-जन संबंधों पर केंद्रित सहयोग की प्रगति की समीक्षा की।"**
- "Also spoke about new opportunities in **clean energy**, **AI** and **critical minerals**."
  "इसके साथ ही **स्वच्छ ऊर्जा**, **कृत्रिम बुद्धिमत्ता (AI)** तथा **महत्त्वपूर्ण खनिजों** में नए अवसरों पर भी चर्चा की गई।"
- The two sides also exchanged views on global developments including in **Ukraine**, **West Asia** and the **Indo-Pacific**.
  दोनों पक्षों ने **यूक्रेन**, **पश्चिम एशिया** तथा **हिंद-प्रशांत क्षेत्र** से संबंधित वैश्विक घटनाक्रमों पर भी विचारों का आदान-प्रदान किया।
- Ms. Cooper emphasised greater access to **critical minerals** and improved **information-sharing** would be mutually beneficial to both countries.
  सुश्री कूपर ने इस बात पर बल दिया कि **महत्त्वपूर्ण खनिजों** तक अधिक पहुँच और बेहतर **सूचना-साझाकरण** दोनों देशों के लिए पारस्परिक रूप से लाभकारी होगा।
- According to the announcement readout, Ms. Cooper stated the observatory could also serve **"as a foundation for broader cooperation across the critical minerals sector and related strategic industries."**
  घोषणा के आधिकारिक विवरण के अनुसार, सुश्री कूपर ने कहा कि यह ऑब्ज़र्वेटरी **"महत्त्वपूर्ण खनिज क्षेत्र तथा उससे संबंधित सामरिक उद्योगों में व्यापक सहयोग की आधारशिला के रूप में कार्य कर सकती है।"**

House Committee cites CAG report, pulls up govt. over skilling programme

GS III: Economy

The Hindu Bureau
NEW DELHI

Parliament's Public Accounts Committee (PAC), headed by senior Congress leader K.C. Venugopal, pulled up the government over its flagship skilling programme, the Pradhan Mantri Kaushal Vikas Yojana (PMKVY).

Citing the audit report tabled by the Comptroller and Auditor General (CAG), the panel said the scheme disproportionately focused on skilling for jobs with low demand, such as retail.

The PMKVY is the flagship scheme of the Ministry of Skill Development and Entrepreneurship (MSDE), launched in July 2015 with the objective of enabling a large number of youths to take up industry-relevant skill training.

Citing the findings of the report, panel members noted during the deliberations that there was a mismatch between training and demand. They said the skilling efforts were heavily focused on sectors with low demand, such as apparel, electronics, and retail, which together accounted for 40% of trainees. In contrast, sectors such as food processing, which require more trained personnel, accounted for only 0.48% of trainees. Similarly, only 3.8% of trainees were skilled for the tourism sector.

K.C. Venugopal

Lack of planning

Panel members from both the Opposition and the ruling Bharatiya Janata Party questioned the lack of planning, despite the programme being in operation since 2015. According to sources, many members said the government did not seem to have learnt from the scheme's shortcomings. It was also pointed out that only 41% of trainees were placed. The programme has also been hit by repeated instances of fraudulent appointment letters.

The CAG report cited multiple examples. In one instance, Neelima Moving Pictures was awarded skill certifications to 33,493 participants for 21 job roles across eight States between January and November 2020. However, the company was found to be non-existent. The audit report noted that no responsibility had been fixed for such fraudulent claims.

Defending the scheme and its implementation, the government blamed State governments, which, it said, were the implementing agencies.

In his concluding remarks, Mr. Venugopal said unemployment remained the biggest threat facing the country.

05J6. House Committee cites CAG report, pulls up govt. over skilling programme

संसदीय समिति ने सीएजी रिपोर्ट का हवाला देते हुए कौशल विकास कार्यक्रम पर सरकार को फटकार लगाई

- **Parliament's Public Accounts Committee (PAC)**, headed by senior **Congress** leader **K.C. Venugopal**, pulled up the government over its flagship skilling programme, the **Pradhan Mantri Kaushal Vikas Yojana (PMKVY)**.

वरिष्ठ **कांग्रेस** नेता **के.सी. वेणुगोपाल** की अध्यक्षता वाली **संसद की लोक लेखा समिति (PAC)** ने सरकार की प्रमुख कौशल विकास योजना **प्रधानमंत्री कौशल विकास योजना (PMKVY)** को लेकर सरकार की आलोचना की।

- Citing the audit report tabled by the **Comptroller and Auditor General (CAG)**, the panel said the scheme disproportionately focused on skilling for jobs with **low demand**, such as **retail**.

भारत के नियंत्रक एवं महालेखा परीक्षक (CAG) की लेखा-परीक्षण रिपोर्ट का हवाला देते हुए समिति ने कहा कि इस योजना में **रिटेल** जैसे **कम मांग वाले रोजगार क्षेत्रों** के लिए कौशल प्रशिक्षण पर असंगत रूप से अधिक ध्यान दिया गया।

- The **PMKVY** is the flagship scheme of the **Ministry of Skill Development and Entrepreneurship (MSDE)**, launched in **July 2015** with the objective of enabling a large number of youths to take up **industry-relevant skill training**.
PMKVY, **कौशल विकास एवं उद्यमिता मंत्रालय (MSDE)** की प्रमुख योजना है, जिसे **जुलाई 2015** में बड़ी संख्या में युवाओं को **उद्योग-संबंधित कौशल प्रशिक्षण** प्रदान करने के उद्देश्य से प्रारम्भ किया गया था।
- Citing the findings of the report, panel members noted during the deliberations that there was a **mismatch between training and demand**.
रिपोर्ट के निष्कर्षों का उल्लेख करते हुए समिति के सदस्यों ने विचार-विमर्श के दौरान कहा कि **प्रशिक्षण और बाजार की मांग के बीच असंगति** विद्यमान है।
- They said the skilling efforts were heavily focused on sectors with low demand, such as **apparel**, **electronics**, and **retail**, which together accounted for **40% of trainees**.
उन्होंने कहा कि कौशल विकास प्रयास मुख्यतः **परिधान (Apparel)**, **इलेक्ट्रॉनिक्स** और **रिटेल** जैसे कम मांग वाले क्षेत्रों पर केंद्रित रहे, जिनमें कुल **40% प्रशिक्षार्थी** शामिल थे।
- In contrast, sectors such as **food processing**, which require more trained personnel, accounted for only **0.48% of trainees**.
इसके विपरीत, अधिक प्रशिक्षित मानव संसाधन की आवश्यकता वाले **खाद्य प्रसंस्करण (Food Processing)** क्षेत्र में केवल **0.48% प्रशिक्षार्थियों** को प्रशिक्षण दिया गया।
- Similarly, only **3.8% of trainees** were skilled for the **tourism sector**.
इसी प्रकार, **पर्यटन क्षेत्र** के लिए केवल **3.8% प्रशिक्षार्थियों** को कौशल प्रशिक्षण प्रदान किया गया।

India to drop capital gains tax for foreign investors in govt. bonds

GS III: Economy

Reuters

MUMBAI

India plans to scrap capital gains tax on foreign portfolio investments in government securities, which could help boost such inflows, a source familiar with the matter said on Thursday.

The South Asian nation is looking to attract foreign capital to counteract pressure on its rupee currency, which has weakened more than 5% since the start of the year, squeezed by higher oil prices and foreign portfolio outflows in equities. The finance ministry did not immediately respond to a *Reuters* email seeking comment.

India's benchmark bond yield eased one basis point to 7.01% in opening trade, although it was not immediately clear when the plan would take effect.

Any tax easing should help flows at the margin, said Madhavi Arora, chief economist at Emkay Global Financial Services.

"It won't be a magic bullet in the current context," she cautioned, but added it could prove positive in the medium term.

Foreign investors are subject to a long-term capital gains tax of 12.5% on listed shares and bonds held longer than 12 months.

A withholding tax of 20% they pay on interest earned in government bonds may also be removed, the source said.

Lack of Planning

योजनागत कमी

- It was also pointed out that only **41% of trainees** were placed.

यह भी उल्लेख किया गया कि केवल **41% प्रशिक्षार्थियों** को ही रोजगार उपलब्ध कराया जा सका।

05J6. India to drop capital gains tax for foreign investors in govt. bonds

विदेशी निवेशकों के लिए सरकारी बॉन्ड पर पूंजीगत लाभ कर हटाएगा भारत

- India plans to scrap **capital gains tax** on **foreign portfolio investments** in **government securities**, which could help boost such inflows, a source familiar with the matter said on Thursday.

भारत **सरकारी प्रतिभूतियों** में **विदेशी पोर्टफोलियो निवेश** पर **पूंजीगत लाभ कर (Capital Gains Tax)** समाप्त करने की योजना बना रहा है, जिससे ऐसे निवेश प्रवाह को बढ़ावा मिल सकता है, ऐसा इस मामले से परिचित एक स्रोत ने गुरुवार को कहा।

- **Foreign investors** are subject to a **long-term capital gains tax** of **12.5%** on listed shares and bonds held longer than **12 months**.

विदेशी निवेशकों को सूचीबद्ध शेयरों और बॉन्डों पर, जिन्हें **12 महीने** से अधिक समय तक रखा गया हो, **12.5% दीर्घकालिक पूंजीगत लाभ कर (Long-Term Capital Gains Tax)** देना पड़ता है।

- A **withholding tax** of **20%** they pay on interest earned in **government bonds** may also be removed, the source said.

स्रोत के अनुसार, **सरकारी बॉन्डों** पर अर्जित ब्याज पर विदेशी निवेशकों द्वारा दिया जाने वाला **20% विदहोल्डिंग टैक्स (Withholding Tax)** भी हटाया जा सकता है।

इन अधिकारियों को **भौगोलिक सूचना प्रणाली (GIS)** तथा **प्रबंधन सूचना प्रणाली (MIS)** के उपयोग का प्रशिक्षण दिया जाएगा, जो विशेष रूप से नए ग्रामीण रोजगार कानून — **विकसित भारत–रोजगार एवं आजीविका गारंटी मिशन** — के संदर्भ में अत्यंत महत्वपूर्ण हो गए हैं।

- **Rural Development Secretary Rohit Kansal** said that training modules such as this are aimed at strengthening the **"last-mile delivery architecture"**.
  ग्रामीण विकास सचिव रोहित कंसल ने कहा कि इस प्रकार के प्रशिक्षण मॉड्यूल का उद्देश्य **"अंतिम छोर तक सेवा पहुँचाने वाली व्यवस्था (Last-Mile Delivery Architecture)"** को और अधिक सशक्त बनाना है।

Understanding SPF number on sunscreen lotion and how it is measured

Athira [redacted]
CHENNAI

Sun Protection Factor, or SPF, is designed to measure protection against ultraviolet B (UVB) radiation, the part of sunlight primarily responsible for sunburns. But it does not tell the whole story about sun protection, nor does a higher SPF automatically mean better protection. Understanding what SPF measures, and what it does not, can help in making more informed decisions about skin protection.

In standard testing, sunscreen is applied to the skin and researchers compare how much ultraviolet exposure is needed to produce redness, or erythema, on protected skin versus unprotected skin, says Katheeja Nasika, consultant dermatologist, Rela Hospital, Chennai. "If an SPF is 30, theoretically the amount of UV exposure needed to cause minimal erythema on sunscreen-applied skin would be 30 times higher than on unprotected skin," she explains.

Narayanan A., consultant dermatologist at SRM Prime Hospital, Chennai, points out however that "the testing is conducted under controlled conditions using a specified amount of sunscreen. In real life, most people apply far less sunscreen than is used during laboratory testing, meaning actual protection may be lower than the SPF listed on the label."

What do SPF numbers mean?

One of the most common misconceptions is that SPF values increase protection in a straight line. According to K.R. Sharmatha, senior consultant dermatologist, SIMS Hospital, Chennai, SPF 30 blocks about 95-97% of UVB radiation, SPF 50 blocks roughly 97-98%, and SPF 80 blocks close to 99%. The difference is one roughly one percentage point, with protection gains becoming progressively smaller at higher SPF values

While higher SPF provides somewhat greater protection, the difference between SPF 30 and SPF 50 is far smaller than most people imagine.

Shield and defence: Experts and dermatologists say that SPF 30 provides adequate protection for most people when applied correctly. GETTY IMAGES

A sunscreen's SPF value only measures protection against UVB radiation. Pushpa Gnanaraj, senior consultant dermatologist, Apollo Speciality Hospitals, Vanagaram, Chennai, notes that UVA penetrates more deeply. UVA radiation is strongly linked to pigmentation, photoageing, wrinkles and loss of skin elasticity. For this reason, experts emphasise that SPF alone should not determine sunscreen choice. They recommend choosing a broad-spectrum sunscreen with PA+++ protection, which indicates protection against UVA rays as well as products that provide protection against both UVA and UVB radiation rather than focusing solely on the SPF number.

Experts also say that SPF 30 provides adequate protection for most people when applied correctly. "Anything above SPF 30 is okay for Indian skin," says Dr. Nasika. She recommends SPF 30 as a minimum, while SPF 50 or higher for outdoor sports, extended sun exposure, or individuals with photosensitive skin conditions.

Application matters

Many tend to overlook correct application. Experts recommend applying sunscreen 15 to 20 minutes before sun exposure and ensuring that exposed areas such as the face, neck, hands and forearms are covered. Reapplication is essential every two to three hours during outdoor exposure, especially after washing the face or if the product is not water-resistant. And for people working outdoors, and in sports, experts recommend waterproof formulations. High-SPF sunscreens also require regular reapplication because sunscreen do not block 100% of UV radiation. A properly applied SPF 30 sunscreen may offer better protection than an SPF 100 product applied inadequately.

The difference between the benefits that SPF 30 and SPF 50 offer is small. The more important factors are choosing a broad-spectrum product, applying it correctly, and reapplying it regularly. This summer, stay safe under the sun. Understanding SPF is less about finding the highest number and more about using sunscreen effectively and consistently.

(athira.elssa@thehindu.co.in)

05J6. Understanding SPF number on sunscreen lotion and how it is measured
सनस्क्रीन लोशन पर SPF संख्या को समझना और इसका मापन कैसे किया जाता है

- **Sun Protection Factor (SPF)**, or SPF, is designed to measure protection against **ultraviolet B (UVB) radiation**, the part of sunlight primarily responsible for **sunburns**.
  सन प्रोटेक्शन फैक्टर (SPF) को **अल्ट्रावायलेट-बी (UVB) विकिरण** से सुरक्षा को मापने के लिए विकसित किया गया है, जो सूर्य के प्रकाश का वह भाग है जो मुख्य रूप से **सनबर्न (त्वचा झुलसने)** के लिए उत्तरदायी होता है।
- In standard testing, **sunscreen** is applied to the skin and researchers compare how much ultraviolet exposure is needed to produce redness, or **erythema**, on protected skin versus unprotected skin, says **Katheeja Nasika**, consultant dermatologist, Rela Hospital, Chennai.
  चेन्नई के रेला अस्पताल की परामर्शदाता त्वचा रोग विशेषज्ञ **कथीजा नासिका** के अनुसार, मानक परीक्षण में त्वचा पर **सनस्क्रीन** लगाया जाता है और शोधकर्ता यह तुलना करते हैं कि संरक्षित तथा असंरक्षित त्वचा पर लालिमा अथवा **एरिथेमा** उत्पन्न करने के लिए कितने पराबैंगनी विकिरण की आवश्यकता होती है।
- "If an **SPF** is 30, theoretically the amount of UV exposure needed to cause minimal erythema on sunscreen-applied skin would be 30 times higher than on unprotected skin," she explains.
  वे बताती हैं, "यदि **SPF** 30 है, तो सैद्धांतिक रूप से सनस्क्रीन लगी त्वचा पर न्यूनतम एरिथेमा उत्पन्न करने के लिए आवश्यक UV विकिरण की मात्रा असंरक्षित त्वचा की तुलना में 30 गुना अधिक होगी।"

What do SPF numbers mean?
SPF संख्याओं का क्या अर्थ है?

- According to **K.R. Sharmatha**, senior consultant dermatologist, **SIMS Hospital**, Chennai, **SPF 30** blocks about **95-97%** of **UVB radiation**, **SPF 50** blocks roughly **97-98%**, and **SPF 80** blocks close to **99%**.

चेन्नई के **SIMS अस्पताल** की वरिष्ठ परामर्शदाता त्वचा रोग विशेषज्ञ **के.आर. शर्मथा** के अनुसार, **SPF 30** लगभग **95-97% UVB विकिरण** को रोकता है, **SPF 50** लगभग **97-98%** को रोकता है और **SPF 80** लगभग **99%** तक सुरक्षा प्रदान करता है।

- While higher **SPF** provides somewhat greater protection, the difference between **SPF 30** and **SPF 50** is far smaller than most people imagine.
  यद्यपि अधिक **SPF** कुछ अतिरिक्त सुरक्षा प्रदान करता है, किन्तु **SPF 30** और **SPF 50** के बीच का अंतर उतना अधिक नहीं है जितना अधिकांश लोग समझते हैं।
- A sunscreen's **SPF value** only measures protection against **UVB radiation**.
  किसी सनस्क्रीन का **SPF मान** केवल **UVB विकिरण** के विरुद्ध सुरक्षा को मापता है।
- **Pushpa Gnanaraj**, senior consultant dermatologist, **Apollo Speciality Hospitals**, Vanagaram, Chennai, notes that **UVA** penetrates more deeply.
  चेन्नई के वनगरम स्थित **अपोलो स्पेशलिटी हॉस्पिटल्स** की वरिष्ठ परामर्शदाता त्वचा रोग विशेषज्ञ **पुष्पा ज्ञानराज** बताती हैं कि **UVA विकिरण** त्वचा में अधिक गहराई तक प्रवेश करता है।
- **UVA radiation** is strongly linked to **pigmentation**, **photoageing**, **wrinkles** and loss of **skin elasticity**.
  UVA विकिरण का संबंध **त्वचा के वर्णक परिवर्तन**, **फोटोएजिंग**, **झुर्रियों** तथा **त्वचा की लोच में कमी** से गहराई से जुड़ा हुआ है।
- For this reason, experts emphasise that **SPF** alone should not determine sunscreen choice.
  इसी कारण विशेषज्ञ इस बात पर बल देते हैं कि केवल **SPF** के आधार पर सनस्क्रीन का चयन नहीं किया जाना चाहिए।
- They recommend choosing a **broad-spectrum sunscreen** with **PA+++ protection**, which indicates protection against **UVA rays** as well as products that provide protection against both **UVA** and **UVB radiation** rather than focusing solely on the SPF number.
  वे **PA+++ सुरक्षा** वाले **ब्रॉड-स्पेक्ट्रम सनस्क्रीन** का चयन करने की सलाह देते हैं, जो **UVA किरणों** से सुरक्षा का संकेत देता है तथा ऐसे उत्पादों को प्राथमिकता देने की अनुशंसा करते हैं जो **UVA** और **UVB विकिरण** दोनों से सुरक्षा प्रदान करते हों।
- She recommends **SPF 30** as a minimum, while **SPF 50** or higher for outdoor sports, extended sun exposure, or individuals with **photosensitive skin conditions**.
  वे न्यूनतम **SPF 30** की अनुशंसा करती हैं, जबकि बाहरी खेल गतिविधियों, लंबे समय तक धूप में रहने अथवा **प्रकाश-संवेदनशील त्वचा संबंधी स्थितियों** वाले व्यक्तियों के लिए **SPF 50** या उससे अधिक उपयुक्त मानती हैं।

Application matters
उपयोग की सही विधि का महत्व

- Many tend to overlook correct application.
  अनेक लोग सही तरीके से लगाने के महत्व की उपेक्षा कर देते हैं।
- Experts recommend applying **sunscreen** 15 to 20 minutes before sun exposure and ensuring that exposed areas such as the face, neck, hands and forearms are covered.
  विशेषज्ञ धूप में जाने से 15 से 20 मिनट पहले **सनस्क्रीन** लगाने तथा चेहरे, गर्दन, हाथों और अग्रबाहुओं जैसे खुले हिस्सों को अच्छी तरह ढकने की सलाह देते हैं।
- Reapplication is essential every two to three hours during outdoor exposure, especially after washing the face or if the product is not **water-resistant**.
  बाहरी वातावरण में रहने के दौरान प्रत्येक दो से तीन घंटे में पुनः लगाना आवश्यक है, विशेषकर चेहरे को धोने के बाद अथवा यदि उत्पाद **जल-प्रतिरोधी** न हो।
- And for people working outdoors, and in sports, experts recommend **waterproof formulations**.
  बाहरी कार्य करने वाले लोगों तथा खिलाड़ियों के लिए विशेषज्ञ **वाटरप्रूफ फॉर्मूलेशन** की अनुशंसा करते हैं।

- High-**SPF** sunscreens also require regular reapplication because sunscreen do not block **100%** of **UV radiation**.
  उच्च **SPF** वाले सनस्क्रीन को भी नियमित रूप से पुनः लगाना आवश्यक है क्योंकि कोई भी सनस्क्रीन **UV विकिरण** का **100%** अवरोध नहीं कर सकता।
- A properly applied **SPF 30** sunscreen may offer better protection than an **SPF 100** product applied inadequately.
  सही प्रकार से लगाया गया **SPF 30** सनस्क्रीन, अपर्याप्त रूप से लगाए गए **SPF 100** उत्पाद की तुलना में बेहतर सुरक्षा प्रदान कर सकता है।
- The more important factors are choosing a **broad-spectrum product**, applying it correctly, and reapplying it regularly.
  अधिक महत्वपूर्ण कारक हैं—एक **ब्रॉड-स्पेक्ट्रम उत्पाद** का चयन करना, उसे सही प्रकार से लगाना तथा नियमित रूप से पुनः लगाना।
- Understanding **SPF** is less about finding the highest number and more about using **sunscreen** effectively and consistently.
  SPF को समझने का अर्थ सबसे अधिक संख्या ढूँढना नहीं, बल्कि **सनस्क्रीन** का प्रभावी तथा नियमित उपयोग करना है।

UVA Radiation

- **UVA rays** have a longer wavelength and can penetrate deep into the skin.
- They are present throughout the day and can even pass through clouds and window glass.
- UVA rays are mainly responsible for:
  - Skin ageing and wrinkles
  - Loss of skin elasticity
  - Pigmentation and tanning
  - Long-term skin damage
- UVA rays slowly age skin over time.

UVB Radiation

- **UVB rays have a shorter wavelength** and affect the outer layers of the skin.
- They are strongest between about 10 a.m. and 4 p.m.
- UVB rays are mainly responsible for:
  - Sunburn
  - Skin redness
  - DNA damage in skin cells
  - Increased risk of skin cancer
- UVB rays burn skin when stay in the sun too long.

SPF (Sun Protection Factor)

- **SPF (Sun Protection Factor)** is a measure of how well a sunscreen protects the skin from **UVB rays**.
- SPF 15 blocks about 93% of UVB rays.
- SPF 30 blocks about 97% of UVB rays.
- SPF 50 blocks about 98% of UVB rays.
- Skin normally starts to burn after 10 minutes in the sun. With SPF 30 sunscreen, skin could theoretically stay about 30 times longer before burning.

'Rural, urban India almost same in video watching'

GS III: S&T

The Hindu Bureau
BENGALURU

India's transition into a video-first economy is no longer restricted to metropolitan cities as daily video consumption on Meta platforms is reaching 98% in cities and 94% in rural areas, according to a Meta-commissioned study by IPSOS.

The study, comprising over 4,000 participants across metro, tier-2 and 3 cities and rural India, found 97% of users consume video content daily, highlighting video content had become the primary source of digital engagement.

Also, the study found Reels had become the primary destination for content, culture and influence with 89% of Gen-Z users engaging with it every day. The engagement is particularly strong among women (85%) and NCCS audiences (88%). The study also found 84% of Gen-Z users and 73% of rural users discovered products through Meta Platforms.

Beauty, make-up, fashion, lifestyle, wellness, fitness, comedy, sports, and travel emerged as the most engaged genres. Among it beauty, makeup, and fashion recorded the highest engagement with 52% of the users engaging in these genres followed by lifestyle, fitness, and wellness at 42%; comedy and humor at 39%; sports at 38%; and travel at 37%.

The study emphasised the role of content creators in shaping storytelling, conversations, trends, and brand discovery. Reels generated 60% higher creator engagement than other surveyed short-video platforms and highlighted the platform's influence on high-intent sectors such as e-commerce, automobiles, and financial services.

05J6. 'Rural, urban India almost same in video watching'
'वीडियो देखने में ग्रामीण और शहरी भारत लगभग समान'

- India's transition into a **video-first economy** is no longer restricted to **metropolitan cities** as daily video consumption on **Meta platforms** is reaching **98% in cities** and **94% in rural areas**, according to a **Meta-commissioned study** by **IPSOS**.
  वीडियो-प्रथम अर्थव्यवस्था की ओर भारत का संक्रमण अब केवल **महानगरीय शहरों** तक सीमित नहीं रह गया है, क्योंकि **मेटा प्लेटफॉर्म्स** पर दैनिक वीडियो उपभोग **शहरों में 98%** और **ग्रामीण क्षेत्रों में 94%** तक पहुँच रहा है। यह जानकारी **IPSOS** द्वारा किए गए **मेटा-प्रायोजित अध्ययन** के अनुसार है।
- The study, comprising over **4,000 participants** across **metro, tier-2 and 3 cities and rural India**, found **97% of users** consume video content daily, highlighting video content had become the primary source of **digital engagement**.
  मेट्रो, टियर-2 और टियर-3 शहरों तथा ग्रामीण भारत के **4,000 से अधिक प्रतिभागियों** पर आधारित इस अध्ययन में पाया गया कि **97% उपयोगकर्ता** प्रतिदिन वीडियो सामग्री का उपभोग करते हैं, जिससे स्पष्ट होता है कि वीडियो सामग्री **डिजिटल सहभागिता** का प्रमुख स्रोत बन चुकी है।
- Also, the study found **Reels** had become the primary destination for content, culture and influence with **89% of Gen-Z users** engaging with it every day.
  अध्ययन में यह भी पाया गया कि **रील्स** सामग्री, संस्कृति और प्रभाव का प्रमुख माध्यम बन चुका है, जहाँ **89% जेन-ज़ी उपयोगकर्ता** प्रतिदिन इससे जुड़ते हैं।

- **Beauty, make-up, fashion, lifestyle, wellness, fitness, comedy, sports, and travel** emerged as the most engaged genres.
  ब्यूटी, मेक-अप, फैशन, लाइफस्टाइल, वेलनेस, फिटनेस, कॉमेडी, खेल और यात्रा सबसे अधिक सहभागिता वाले विषयों के रूप में उभरे।
- Among it **beauty, makeup, and fashion** recorded the highest engagement with **52% of the users** engaging in these genres followed by **lifestyle, fitness, and wellness** at **42%**; **comedy and humor** at **39%**; **sports** at **38%**; and **travel** at **37%**.
  इनमें **ब्यूटी, मेकअप और फैशन** ने सबसे अधिक सहभागिता दर्ज की, जहाँ **52% उपयोगकर्ता** इन विषयों से जुड़े रहे। इसके बाद **लाइफस्टाइल, फिटनेस और वेलनेस** में **42%**, **कॉमेडी और हास्य** में **39%**, **खेल** में **38%** तथा **यात्रा** में **37%** सहभागिता दर्ज की गई।
- The study emphasised the role of **content creators** in shaping storytelling, conversations, trends, and brand discovery.
  अध्ययन ने **कंटेंट क्रिएटर्स** की भूमिका पर जोर दिया, जो कहानी कहने, संवादों, रुझानों और ब्रांड खोज को आकार देने में महत्वपूर्ण भूमिका निभाते हैं।
- **Reels** generated **60% higher creator engagement** than other surveyed **short-video platforms** and highlighted the platform's influence on high-intent sectors such as **e-commerce, automobiles, and financial services**.
  रील्स ने अन्य सर्वेक्षित **शॉर्ट-वीडियो प्लेटफॉर्म्स** की तुलना में **60% अधिक क्रिएटर सहभागिता** उत्पन्न की और **ई-कॉमर्स, ऑटोमोबाइल तथा वित्तीय सेवाओं** जैसे उच्च-रुचि वाले क्षेत्रों पर प्लेटफॉर्म के प्रभाव को रेखांकित किया।

Funding India's climate future, a trillion-dollar question

GS III: Environment

Balakrishna Pisupati

Head of the United Nations Environment Programme (UNEP) office in India

There is one figure that should command the attention of every policymaker, banker, and financial expert in India. India will require ₹162.5 trillion – roughly $2.5 trillion – by 2030 to meet its Nationally Determined Contributions. Over the longer term, the cost of achieving net-zero emissions by 2070 is estimated at $10.1 trillion, nearly three times India's current GDP.

This is not a counsel of despair. India has more tools to bridge this gap than it has deployed so far. But doing so requires a clear financing strategy and the institutional resolve to build mechanisms that can mobilise capital at scale.

The financing gap

Decarbonising just four sectors – steel, cement, power, and road transport, which together account for more than half of India's carbon emissions – will require $467 billion in additional capital expenditure between 2022 and 2030, roughly $54 billion annually, or 1.3% of GDP. These are sectors where the private sector will not lead without strong regulatory incentives, because the economics of green steel and green cement simply do not yet work without policy support.

By 2030, developing economies are estimated to need $5 trillion to $6 trillion for climate action. The developed world promised $100 billion annually at Paris – and missed it. The Baku New Collective Quantified Goal (NCQG) commits $300 billion by 2035 – which India rightly considers insufficient. The Reserve Bank of India (RBI)'s own Report on Currency and Finance estimates that India needs an additional annual investment of at least 2.5% of GDP for green financing until 2030.

The international community will not fill this gap on India's behalf. The honest answer is that India must mobilise most of it from within.

India is not starting from zero. By the end of 2024, India had issued $55.9 billion in green, social, sustainability, and sustainability-linked debt – a 186% rise since 2021. Green debt leads, making up 83% of the total, with most funds directed to clean energy and transport. Sovereign green bonds worth ₹477 billion have helped set benchmarks and boost investor confidence. This is genuinely impressive.

The instruments exist. The challenge is deploying them at scale. India already has green bonds, sovereign green bonds, sustainability-linked bonds, blended finance structures, transition finance instruments and infrastructure investment trusts. What is missing is the connective tissue: a taxonomy, a guarantee architecture, a liquidity mechanism, and the regulatory incentives that make green finance cheaper than brown finance.

The most significant shift in India's climate-finance landscape in 2025 did not occur at a climate conference but in Mint Street. In 2025, the RBI's Climate Finance and Management of Climate Change Risks Directions for Commercial Banks and Small Finance Banks established a comprehensive framework requiring banks to integrate climate risks into their lending and risk-management practices. Importantly, eligible green activities can qualify as priority sector lending (PSL), while investments in sovereign green bonds are also recognised under the framework.

This is a bigger deal than it looks. PSL requirements are one of the most powerful levers that the RBI holds over bank behaviour. Currently, for every ₹10,000 crore in loans, banks must ensure ₹4,000 crore of PSL.

The RBI can and must go further. It has proposed accepting sovereign green bonds as collateral with more flexibility in margin requirements and adjusting reserve requirements to support credit flows to green sectors. The next frontier is differentiated capital requirements based on climate risk – essentially, making brown lending more capital-intensive and green lending less so.

The RBI's Climate Risk Information System on climate-related financial risks for commercial banks, and its inclusion of sustainable finance in its regulatory sandbox, are steps in the right direction.

The next critical step is a comprehensive climate stress-testing framework for Indian banks – one that assesses the flood risk of a loan portfolio in Bihar as rigorously as it evaluates credit risk.

The taxonomy unlocks everything else

Finance Minister Nirmala Sitharaman announced in the Union Budget 2024-25 that India would develop a climate-finance taxonomy. This is the foundation of the entire ecosystem. Without a clear legal definition of what counts as "green", green bonds cannot be credibly verified, PSL classifications remain questionable, international investors cannot make compliance claims, and regulators cannot effectively curb greenwashing.

The Ministry of Finance's Climate Finance Taxonomy and the Ministry of Steel's Green Steel Taxonomy will facilitate standardised sustainable investments and boost investor confidence.

The international climate finance system has one instrument that India has chronically underused: blended finance – the strategic use of public or concessional funds to de-risk private investment. Financial instruments such as green bonds, climate funds, and blended finance models are important in mobilising capital for sustainability initiatives, and unlocking investment at scale will help drive long-term resilience in India's most climate-sensitive sectors.

Here is the arithmetic that makes blended finance so compelling. A first loss guarantee of $100 million from a public source can unlock $500 million to $1 billion in private co-investment in solar, offshore wind, green hydrogen, or climate-resilient agriculture, because it absorbs the risk that private capital finds unacceptable. It needs a capitalisation injection and an expanded mandate to get there.

India's bottleneck is not funding, but the institutional architecture needed to move it where it is needed

Where the finance gap is most acute

One dimension of India's climate finance challenge that receives almost no attention is its federally disaggregated nature. Climate adaptation – the kind of finance that protects coastal villages in Odisha, drought-proofing in Vidarbha, or spring rejuvenation in the Himalayas – is delivered at the State level. But States have neither the borrowing capacity nor the institutional infrastructure to access international climate finance. Tamil Nadu and Kerala have shown that ambitious State-level climate programming is possible. The financing architecture needs to catch up with the ambition.

There are four things that India must do now. First, finalise and enact the Climate Finance Taxonomy without further delay. It is the single most leveraged action available.

Second, the RBI must move from enabling green finance to mandating it – through differentiated capital requirements, mandatory climate stress testing for banks, and expanded PSL targets that include climate adaptation alongside mitigation.

Third, establish a State Climate Finance Facility, capitalised for example, by the Union, National Bank for Agriculture and Rural Development (NABARD), and international sources, to give States and municipalities genuine access to green debt markets.

Fourth, scale sovereign green bond issuances rapidly and embed them in the SLR framework to deepen the domestic market and attract foreign capital.

India's climate-finance challenge is large and urgent, but not insurmountable. The instruments exist, the regulatory framework is taking shape, and capital is available. What is missing is not money, but the institutional capacity to deploy it at scale. Fixing that is the work of the Budget cycles. The country that solves this challenge fastest will shape the future of climate finance in the developing world.

The views expressed are personal

05J6. Funding India's climate future, a trillion-dollar question
भारत के जलवायु भविष्य के वित्तपोषण का प्रश्न: एक ट्रिलियन डॉलर की चुनौती

Climate Finance and India's Net-Zero Transition
जलवायु वित्त और भारत का नेट-ज़ीरो संक्रमण

- India will require **₹162.5 trillion** — roughly **$2.5 trillion** — by **2030** to meet its **Nationally Determined Contributions (NDCs)**.
  भारत को अपनी **राष्ट्रीय स्तर पर निर्धारित योगदान (NDCs)** संबंधी प्रतिबद्धताओं को पूरा करने के लिए वर्ष **2030** तक **₹162.5 ट्रिलियन** अर्थात लगभग **2.5 ट्रिलियन डॉलर** की आवश्यकता होगी।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Over the longer term, the cost of achieving **net-zero emissions** by **2070** is estimated at **$10.1 trillion**, nearly three times India's current GDP.
  दीर्घकालिक दृष्टि से, वर्ष **2070** तक **शुद्ध-शून्य उत्सर्जन (Net-Zero Emissions)** प्राप्त करने की लागत लगभग **10.1 ट्रिलियन डॉलर** आंकी गई है, जो भारत की वर्तमान GDP का लगभग तीन गुना है।

वित्तपोषण अंतराल

- Decarbonising just four sectors — **steel**, **cement**, **power**, and **road transport**, which together account for more than half of India's carbon emissions — will require **$467 billion** in additional capital expenditure between **2022 and 2030**, roughly **$54 billion annually**, or **1.3% of GDP**.
  केवल चार क्षेत्रों — **इस्पात**, **सीमेंट**, **विद्युत** और **सड़क परिवहन**, जो संयुक्त रूप से भारत के आधे से अधिक कार्बन उत्सर्जन के लिए उत्तरदायी हैं — का डीकार्बोनाइजेशन करने के लिए वर्ष **2022 से 2030** के बीच अतिरिक्त **467 अरब डॉलर** के पूंजीगत व्यय की आवश्यकता होगी, जो प्रतिवर्ष लगभग **54 अरब डॉलर** अथवा **GDP का 1.3%** है।
- These are sectors where the **private sector** will not lead without strong regulatory incentives, because the economics of **green steel** and **green cement** simply do not yet work without policy support.
  ये ऐसे क्षेत्र हैं जहाँ **निजी क्षेत्र** मजबूत नियामकीय प्रोत्साहनों के बिना नेतृत्व नहीं करेगा, क्योंकि **हरित इस्पात** और **हरित सीमेंट** की आर्थिक व्यवहार्यता अभी भी नीतिगत समर्थन के बिना प्रभावी नहीं है।
- The developed world promised **$100 billion annually** at **Paris** — and missed it.
  विकसित देशों ने **पेरिस** में प्रतिवर्ष **100 अरब डॉलर** देने का वादा किया था, किंतु वे इसे पूरा करने में विफल रहे।
- The **Baku New Collective Quantified Goal (NCQG)** commits **$300 billion by 2035** — which India rightly considers insufficient.
  बाकू न्यू कलेक्टिव क्वांटिफाइड गोल (NCQG) के अंतर्गत वर्ष **2035** तक **300 अरब डॉलर** उपलब्ध कराने की प्रतिबद्धता व्यक्त की गई है, जिसे भारत उचित रूप से अपर्याप्त मानता है।
- The **Reserve Bank of India (RBI)**'s own **Report on Currency and Finance** estimates that India needs an additional annual investment of at least **2.5% of GDP** for **green financing** until **2030**.
  भारतीय रिज़र्व बैंक (RBI) की **मुद्रा एवं वित्त रिपोर्ट** के अनुसार, भारत को वर्ष **2030** तक **हरित वित्तपोषण** के लिए प्रतिवर्ष कम-से-कम **GDP का 2.5%** अतिरिक्त निवेश करना होगा।
- India already has **green bonds**, **sovereign green bonds**, **sustainability-linked bonds**, **blended finance structures**, **transition finance instruments** and **infrastructure investment trusts**.
  भारत के पास पहले से ही **ग्रीन बॉण्ड्स**, **सॉवरेन ग्रीन बॉण्ड्स**, **सस्टेनेबिलिटी-लिंक्ड बॉण्ड्स**, **ब्लेंडेड फाइनेंस संरचनाएँ**, **ट्रांज़िशन फाइनेंस उपकरण** तथा **इन्फ्रास्ट्रक्चर इन्वेस्टमेंट ट्रस्ट्स** उपलब्ध हैं।
- What is missing is the connective tissue: a **taxonomy**, a **guarantee architecture**, a **liquidity mechanism**, and the regulatory incentives that make **green finance** cheaper than **brown finance**.
  जिसकी कमी है वह है इन सबको जोड़ने वाला ढाँचा—एक **वर्गीकरण प्रणाली (Taxonomy)**, **गारंटी संरचना**, **तरलता तंत्र (Liquidity Mechanism)** तथा ऐसे नियामकीय प्रोत्साहन जो **हरित वित्त** को **परंपरागत प्रदूषणकारी वित्त (Brown Finance)** की तुलना में सस्ता बनाएँ।
- Importantly, eligible **green activities** can qualify as **Priority Sector Lending (PSL)**, while investments in **sovereign green bonds** are also recognised under the framework.
  महत्वपूर्ण रूप से, पात्र **हरित गतिविधियाँ प्राथमिकता क्षेत्र ऋण (PSL)** के अंतर्गत आ सकती हैं, जबकि **सॉवरेन ग्रीन बॉण्ड्स** में किए गए निवेश को भी इस ढाँचे के अंतर्गत मान्यता प्रदान की गई है।

Strengthening Climate Finance Mechanisms
जलवायु वित्त तंत्र को सुदृढ़ बनाना

- The **RBI's Climate Risk Information System** on climate-related financial risks for commercial banks, and its inclusion of **sustainable finance** in its regulatory sandbox, are steps in the right direction.
  वाणिज्यिक बैंकों के लिए जलवायु-संबंधी वित्तीय जोखिमों पर आधारित **RBI का क्लाइमेट रिस्क इन्फॉर्मेशन सिस्टम** तथा उसके नियामकीय सैंडबॉक्स में **सतत वित्त (Sustainable Finance)** को शामिल करना सही दिशा में उठाए गए कदम हैं।
- Without a clear legal definition of what counts as "**green**", **green bonds** cannot be credibly verified, **PSL classifications** remain questionable, international investors cannot make compliance claims, and regulators cannot effectively curb **greenwashing**.
  "**ग्रीन**" की स्पष्ट कानूनी परिभाषा के अभाव में **ग्रीन बॉण्ड्स** का विश्वसनीय सत्यापन नहीं किया जा सकता, **PSL वर्गीकरण** संदिग्ध बने रहते हैं, अंतरराष्ट्रीय निवेशक अनुपालन संबंधी दावे नहीं कर सकते तथा नियामक **ग्रीनवॉशिंग** पर प्रभावी नियंत्रण नहीं कर सकते।
- The **Ministry of Finance's Climate Finance Taxonomy** and the **Ministry of Steel's Green Steel Taxonomy** will facilitate standardised sustainable investments and boost investor confidence.
  वित्त मंत्रालय की क्लाइमेट फाइनेंस टैक्सोनॉमी तथा **इस्पात मंत्रालय की ग्रीन स्टील टैक्सोनॉमी** मानकीकृत सतत निवेशों को सुगम बनाएगी तथा निवेशकों का विश्वास बढ़ाएगी।
- **Climate adaptation** — the kind of finance that protects coastal villages in **Odisha**, drought-proofing in **Vidarbha**, or spring rejuvenation in the **Himalayas** — is delivered at the **State level**.
  जलवायु अनुकूलन (Climate Adaptation) — अर्थात वह वित्तीय सहायता जो **ओडिशा** के तटीय गाँवों की सुरक्षा, **विदर्भ** में सूखा-प्रतिरोधी उपायों अथवा **हिमालय** में जलस्रोतों के पुनर्जीवन के लिए आवश्यक होती है — का कार्यान्वयन **राज्य स्तर** पर किया जाता है।
- But States have neither the borrowing capacity nor the institutional infrastructure to access international **climate finance**.
  किन्तु राज्यों के पास न तो पर्याप्त ऋण लेने की क्षमता है और न ही ऐसा संस्थागत ढाँचा, जिससे वे अंतरराष्ट्रीय **जलवायु वित्त** तक प्रभावी पहुँच बना सकें।
- Third, establish a **State Climate Finance Facility**, capitalised for example, by the **Union**, **National Bank for Agriculture and Rural Development (NABARD)**, and international sources, to give States and municipalities genuine access to **green debt markets**.
  तीसरा, एक **राज्य जलवायु वित्त सुविधा (State Climate Finance Facility)** की स्थापना की जाए, जिसे उदाहरणस्वरूप **केंद्र सरकार**, **राष्ट्रीय कृषि और ग्रामीण विकास बैंक (NABARD)** तथा अंतरराष्ट्रीय स्रोतों द्वारा वित्तपोषित किया जाए, ताकि राज्यों और नगर निकायों को **हरित ऋण बाजारों (Green Debt Markets)** तक वास्तविक पहुँच मिल सके।

Baku New Collective Quantified Goal (NCQG)

- The **Baku New Collective Quantified Goal (NCQG)** is a new global climate finance target adopted at the climate conference COP29 held in Baku, Azerbaijan.
- It replaces the earlier goal under which developed countries were expected to mobilize **$100 billion annually** for developing nations to tackle climate change.
- Under the NCQG, developed countries are expected to take the lead in mobilizing at least **$300 billion per year by 2035** for developing countries.
- The broader ambition is to scale up climate-related finance from all public and private sources to around **$1.3 trillion annually by 2035**.

A national environmental survey whose time came

GS III: Environment

Saumya Gupta

Doctoral researcher, Anthropology Department, University of Amsterdam

Thirunavukarasu S.

Junior Research fellow, Department of Defence and Strategic Studies, University of Madras

Anthropologist Anna Tsing writes, "Anthropocene, <is> the epoch in which human disturbance outranks other geological forces.....although some interpreters see the name as implying the triumph of humans, the opposite seems more accurate: without planning or intention,humans have made a mess of our planet." It is in this precise predicament that India finds itself: environmental damage has slipped beyond intention and control, belonging to no one entirely and to everyone at once.

An unfolding crisis

A survey by the Yale School of the Environment of 10,751 Indians (December 2024-February 2025) found that most respondents had experienced at least one extreme event, including heat waves (71%), agricultural pests and diseases (60%), power outages (59%), water pollution (53%), droughts and water shortages (52%), and air pollution (52%). Based on Indian meteorological department and State of India's Environment findings, nearly half of the 37% of 870 river-monitoring stations recorded alarming levels of toxic heavy metals. Air pollution in 2022 reduced average life expectancy by about three years, while some parts of the country experienced extreme weather for nearly 88% of the year. The Desertification and Land Degradation Atlas of India estimates that 29.7% of the country's land is degraded. Yet, despite this mounting environmental crisis, India still lacks a comprehensive understanding of the state of its environment.

In India, the environment sits on the back bench – starved of funds, with only 0.07% of the annual budget allocated to the Ministry of Environment, Forest and Climate Change (MoEFCC), understaffed, and intellectually neglected. Its custodians often work in silos with overlapping jurisdictions. The result is ignorance masquerading as knowledge. The MoEFCC's annual reports outline forest-restoration initiatives such as the National Afforestation Programme (NAP) and REDD+ (reducing emissions from deforestation and forest degradation in developing countries '+' additional forest-related activities that protect the climate), yet say little about the scale of State-wise deforestation, its impact on biodiversity and livelihoods, or the country's preparedness for future environmental challenges. Beyond these omissions, the reports often obscure the nuances behind impressive plantation figures, sidestep scrutiny of fund utilisation and environmental compliance, and overlook findings from global assessments.

A credible environmental survey is essential for informed policymaking

The case for EnvSI

Much of this information is already measured by governments, think tanks, educational institutions and private actors, but it remains fragmented. What is missing is not data, but a system that brings it together. The remedy is to have an Annual Environmental Survey of India (EnvSI): a unified platform that aggregates evidence, conducts independent audits, issues actionable assessments and grades performance. EnvSI must provide an unsparing account of environmental reality – however uncomfortable. The objective is not merely to document what has been lost, but to identify what can still be protected.

Drafting an EnvSI would require a clear statutory mandate, functional autonomy and protected tenure for an expert-led body. It should integrate data from government agencies, independent researchers, the private sector and field-based evidence. Its methodology must combine quantitative indicators with livelihood assessments, using cross-verified datasets and rigorous analysis. Some may question the cost.

The answer is simple: the cost of not doing it is far greater, and doing it would bring some reason to the redundancy of surveying efforts. An EnvSI could deliver four key benefits. First, it would help prevent further environmental degradation, temper climate-driven disasters, and build resilient responses through coordinated action and better resource use. Second, it would support the timely achievement of climate targets, enhance credibility and unlock climate finance. Third, it would better align economic development with conservation, while protecting tribal rights, traditional livelihoods and the interests of displaced communities. Finally, it would strengthen the commons by recognising and safeguarding the interdependence between ecosystems, species and human societies.

Finally, the template for an EnvSI already exists. The Economic Survey of India offers the Environment Ministry its clearest model: an integrated report prepared by experts under the Chief Economic Adviser, independent enough to present inconvenient truths. It draws on multiple sources, rigorously scrutinises evidence, rejects comforting narratives, and alerts policymakers to emerging challenges and necessary reforms. India constantly faces difficult trade-offs between development and conservation.

Keeping nature in sight

Home to one-sixth of humanity on just 4% of the earth's land area, India must pursue growth while meeting climate commitments. In such circumstances, environmental concerns are often pushed to the margins. An independent and audacious EnvSI can help balance growth, sustainability, livelihoods and justice. Without India's full commitment, global climate goals will remain elusive. More importantly, an EnvSI can make visible the environmental changes that have become normalised, helping build the awareness needed to protect what remains.

05J6. A national environmental survey whose time came
एक राष्ट्रीय पर्यावरणीय सर्वेक्षण जिसकी आवश्यकता का समय आ चुका है

- **Anthropologist Anna Tsing** writes, "**Anthropocene**, the epoch in which human disturbance outranks other geological forces.....although some interpreters see the name as implying the triumph of humans, the opposite seems more accurate: without planning or intention, humans have made a mess of our planet."
  मानवविज्ञानी अन्ना त्सिंग लिखती हैं, "**एंथ्रोपोसीन** वह युग है जिसमें मानवजनित व्यवधान अन्य भूवैज्ञानिक शक्तियों से अधिक प्रभावशाली हो गया है.....यद्यपि कुछ व्याख्याकार इस नाम को मानव की विजय के रूप में देखते हैं, परंतु वास्तविकता इसके विपरीत प्रतीत होती है: बिना किसी योजना या उद्देश्य के, मनुष्यों ने हमारे ग्रह को अव्यवस्थित कर दिया है।"

- A survey by the **Yale School of the Environment** of **10,751 Indians** (December 2024-February 2025) found that most respondents had experienced at least one **extreme event**, including **heat waves (71%)**, **agricultural pests and diseases (60%)**, **power outages (59%)**, **water pollution (53%)**, **droughts and water shortages (52%)**, and **air pollution (52%)**.
  येल स्कूल ऑफ द एनवायरनमेंट द्वारा **10,751 भारतीयों** पर (दिसंबर 2024 से फरवरी 2025 के बीच) किए गए एक सर्वेक्षण में पाया गया कि अधिकांश उत्तरदाताओं ने कम-से-कम एक **चरम पर्यावरणीय घटना** का अनुभव किया था, जिनमें **लू (71%)**, **कृषि कीट एवं रोग (60%)**, **बिजली कटौती (59%)**, **जल प्रदूषण (53%)**, **सूखा एवं जल की कमी (52%)**, तथा **वायु प्रदूषण (52%)** शामिल थे।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

GS III: Disaster Management

Fire and furore

Poor compliance and weak enforcement have led to deaths in fires

Indian cities rely on an economic ecosystem in which businesses often operate beyond the approved limits while enforcement remains sporadic. A fire *per se* is not odd, but a slew of deadly fires in urban areas, from the Uphaar Cinema fire in 1997 to the Arpora nightclub fire in 2025, has involved the same vulnerabilities: overcrowding, blocked escape routes, unapproved modifications to interior spaces, poor compliance, and weak enforcement. Prior inquiries, court rulings, and promises of reform have not prevented similar safety failures from recurring. Many of the victims of the B&B fire in Delhi on June 3 were medical tourists, lodged there due to the proximity to South Delhi's hospitals. Many were also infirm and could not act quickly to escape heat or suffocation – a situation that likely prevailed in the ICU fire at a Muzaffarpur hospital on June 4, which claimed four lives, including two elderly individuals. According to the Delhi Fire Services and the Municipal Corporation, the B&B lacked a fire department clearance, violated fire safety norms, and had more than thrice as many rooms as allowed for B&Bs. These bodies are also answerable to how the facility operated in this way, especially since the Delhi High Court had directed the municipality in January to audit the city's hospitality hubs. The building had been rebuilt in 2013 and reportedly exploited land-use exemptions to bypass municipal bylaws that required wider roads for fire tenders.

The tolerance of hazardous conditions with a high fire risk persists because cost-cutting entities, whether establishments or governments, overlook the value of safety measures when there is no fire, even if the measures prevented a fire. The state must inculcate fire safety using principled inspections, incentives, and sanctions, and sustain a culture in urban centres to practise it as a matter of course. Local authorities often blame owners for 'clandestine' modifications; the Delhi police have charged the B&B's owner with culpable homicide not amounting to murder. But the implication that long-standing negligence was the distal cause must extend to the absence of enforcement. The particular charge also results inconsistently in convictions, undermining the penal system's ability to deter such incidents. The misuse of provisions for B&Bs finally points to failures that the Tourism Department should investigate; the city's decision to rescind them is not adequate as an answer. Political blame-games are a red herring: a deadly fire is a product of the incidental causes on that day and systemic factors that preserved the risk. In the same vein, the government's response must encompass these factors or they may amount, once more, to little.

05J6. Fire and furore
आग और आक्रोश

- Poor **compliance** and weak **enforcement** have led to deaths in **fires**.

कमज़ोर **अनुपालन** और कमजोर **प्रवर्तन** के कारण **आगजनी की घटनाओं** में लोगों की मृत्यु हुई है।

- A **fire** per se is not odd, but a slew of deadly fires in urban areas, from the **Uphaar Cinema fire** in 1997 to the **Arpora nightclub fire** in 2025, has involved the same vulnerabilities: **overcrowding**, blocked escape routes, unapproved modifications to interior spaces, poor compliance, and weak enforcement.

स्वयं में **आग लगना** कोई असामान्य घटना नहीं है, किंतु वर्ष 1997 की **उपहार सिनेमा अग्निकांड** से लेकर वर्ष 2025 की **अर्पोरा नाइटक्लब अग्निकांड** तक शहरी क्षेत्रों में हुई अनेक घातक आग की घटनाओं में समान कमजोरियाँ दिखाई देती हैं—**अत्यधिक भीड़**, अवरुद्ध निकास मार्ग, आंतरिक संरचनाओं में अनधिकृत परिवर्तन, नियमों का अपर्याप्त अनुपालन तथा कमजोर प्रवर्तन।

- Prior inquiries, court rulings, and promises of reform have not prevented similar **safety failures** from recurring.

पूर्व की जाँचों, न्यायालयों के निर्णयों तथा सुधारों के आश्वासनों के बावजूद ऐसी **सुरक्षा विफलताओं** की पुनरावृत्ति को रोका नहीं जा सका है।

- According to the **Delhi Fire Services** and the **Municipal Corporation**, the B&B lacked a fire department clearance, violated **fire safety norms**, and had more than thrice as many rooms as allowed for B&Bs.

दिल्ली अग्निशमन सेवा और **नगर निगम** के अनुसार, उक्त बी एंड बी के पास अग्निशमन विभाग की स्वीकृति नहीं थी, उसने **अग्नि सुरक्षा मानकों** का उल्लंघन किया था तथा उसमें बी एंड बी के लिए अनुमत संख्या से तीन गुना अधिक कमरे थे।

- These bodies are also answerable to how the facility operated in this way, especially since the **Delhi High Court** had directed the municipality in January to audit the city's hospitality hubs.

ये संस्थाएँ इस बात के लिए भी उत्तरदायी हैं कि यह सुविधा इस प्रकार संचालित कैसे होती रही, विशेषकर तब जबकि **दिल्ली उच्च न्यायालय** ने जनवरी में नगर निगम को शहर के आतिथ्य केंद्रों का लेखा-परीक्षण करने का निर्देश दिया था।

New-age fraud: 'trust is being weaponised in the digital era'

GS III: Internal Security

The Hindu Bureau
MUMBAI

At a time when AI-generated deepfakes, digital arrests, cyber-enabled financial frauds and crypto-powered crime networks have become increasingly sophisticated, combating these next generation of fraud would require a fundamental shift towards advanced forensic technologies, real-time intelligence sharing and stronger collaboration between regulators, businesses and law enforcement agencies said experts at the FICCI Conference on Next-Gen Forensics: The New Age of Fraud Investigation.

Brijesh Singh, IPS, Principal Secretary, Government of Maharashtra, said cybercrime has evolved into a highly organised and industrialised ecosystem where specialised actors perform functions ranging from data theft and identity creation to mule networks, deepfake generation and crypto-enabled money laundering.

"Today, fraud has become an industrial-scale enterprise. By the time the first call reaches a victim, fraudsters may already know their personal details, behavioural patterns and psychological vulnerabilities. The entire chain, from data acquisition to money movement through crypto networks an be completed in less than 30 minutes, making traditional investigative approaches increasingly ineffective," said Mr. Singh.

Too fast: Entire chain from data acquisition to money movement via crypto networks can be completed in under 30 minutes.

He said rise of AI, deepfakes and digital evidence needed complete shift in probing methodologies.

"Trust is being weaponised in the digital era. With voice cloning, deepfake technologies and fraud-as-a-service platforms becoming easily accessible, investigators need integrated forensic platforms, real-time intelligence sharing and new evidentiary frameworks to effectively detect, investigate and prosecute digital crimes," he added.

Govindayapalli Ram Mohan Rao, ED, Market Intermediaries Regulation and Supervision Department, SEBI, stated market regulator's efforts to strengthen investor protection and digital trust via technology-driven governance steps is the cornerstone of capital markets.

'Robin Hood' burglar, who funded charity with stolen gold, lands in prison

Double life of Vikas Singh Takoor unravels after the latest break-in at a house in Telangana's Vikarabad; the accused told police during interrogation that he had committed 27 burglaries since coming out of jail in 2024 and had stolen huge quantities of gold ornaments, silver, and cash, which were used to run an NGO that helped schoolchildren

GS IV: Ethics

ILLUSTRATION: SOUMYADIP SINHA

The Hindu Bureau
HYDERABAD

To the residents of his native village in Uttar Pradesh, Vikas Singh Takoor was a generous benefactor – the man behind the NGO 'Helping Hands' who distributed school bags to children and sponsored luxury vacations for his friends. But to the Telangana Police, he was one of the State's most prolific and elusive burglars.

The dramatic double life of Takoor, alias Teja Singh, came crashing down following investigation into a recent break-in at Manikanta Nagar Colony in Vikarabad, where gold ornaments weighing 15 grams and ₹2.1 lakh in cash were stolen on May 1.

Posing as a daily wage labourer by day to scout for locked houses, the accused allegedly used the massive proceeds from dozens of night-time burglaries to fund a lavish lifestyle of air travel, luxury hotels, and his local charitable activities. Vikarabad Superintendent of Police Sneha Mehra revealed that a special team tracked down Takoor through a combination of technical evidence, surveillance inputs, and CCTV footage, finally apprehending him near Vikarabad railway station.

During interrogation, the accused allegedly confessed to a staggering 27 burglaries committed since his release from prison in June 2024 across Vikarabad, Medak, Cyberabad, and Malkajgiri Commissionerate limits. Police said he admitted to stealing 1.57 kg gold, 2.56 kg silver, and ₹8.22 lakh in cash. Investigators said Takoor began committing burglaries at the age of 16 and had already been arrested in 34 cases earlier. With the latest confessions, the number of cases linked to him has risen to 61.

"The accused spent part of the proceeds on air travel, luxury hotel stays and leisure trips. He also allegedly created a charitable image in his native village through an NGO called 'Helping Hands', distributing school bags and notebooks to students and sponsoring trips for friends to Chennai, Goa, Vijayawada, Visakhapatnam, Bengaluru, Rajasthan and Dehradun," said the SP.

The investigation also uncovered the involvement of four gold traders from Sultanpur district in Uttar Pradesh. Police said the accused sold stolen gold through his mother to the traders, who allegedly encouraged him to continue committing burglaries and provided advance money whenever he faced financial difficulties.

Investigators further alleged that when the accused considered giving up crime, the traders collectively gave him ₹40,000 and encouraged him to purchase an illegal firearm.

A 5 mm pistol and the stolen gold ornaments have been recovered.

"The accused now faces a total of 61 criminal cases, including 34 previous cases and 27 offences he confessed to committing after his release from prison," the officer added.

05J6. 'Robin Hood' burglar, who funded charity with stolen gold, lands in prison

चोरी किए गए सोने से परोपकारी कार्यों को वित्तपोषित करने वाला 'रॉबिन हुड' चोर जेल पहुँचा

- Posing as a **daily wage labourer** by day to scout for locked houses, the accused allegedly used the massive proceeds from dozens of night-time burglaries to fund a lavish lifestyle of air travel, luxury hotels, and his local charitable activities.
  आरोपी दिन में **दैनिक मजदूर** बनकर बंद घरों की तलाश करता था और कथित रूप से रात में की गई दर्जनों चोरियों से प्राप्त धन का उपयोग हवाई यात्राओं, आलीशान होटलों और स्थानीय परोपकारी गतिविधियों पर करता था।
- "The accused spent part of the proceeds on **air travel**, **luxury hotel stays** and leisure trips."
  "आरोपी ने चोरी से प्राप्त धन का एक हिस्सा **हवाई यात्राओं**, **आलीशान होटलों में ठहरने** तथा मनोरंजन यात्राओं पर खर्च किया।"
- "He also allegedly created a charitable image in his native village through an NGO called **'Helping Hands'**, distributing school bags and notebooks to students and sponsoring trips for friends to **Chennai**, **Goa**, **Vijayawada**, **Visakhapatnam**, **Bengaluru**, **Rajasthan** and **Dehradun**," said the SP.
  पुलिस अधीक्षक ने कहा, "उसने कथित रूप से **'हेल्पिंग हैंड्स'** नामक संगठन के माध्यम से अपने गाँव में परोपकारी छवि बनाई, छात्रों को स्कूल बैग और नोटबुक वितरित किए तथा अपने मित्रों की **चेन्नई**, **गोवा**, **विजयवाड़ा**, **विशाखापत्तनम**, **बेंगलुरु**, **राजस्थान** और **देहरादून** यात्राओं का प्रायोजन किया।"

CM Suvendu Adhikari (right) handing over cheques to beneficiaries at the launch of the Annapurna Bhandar scheme on Wednesday. PTI

West Bengal Chief Minister Suvendu Adhikari on Wednesday rolled out the Annapurna Bhandar scheme that will provide monthly aid of ₹3,000 to eligible women in the 25 to 60 age group in the State.

Mr. Adhikari handed over cheques to five beneficiaries at the State Secretariat to mark the launch of the direct benefit transfer scheme. He said 28,25,769 women have been approved to receive aid.

Beneficiaries have been given 90 days to register under the scheme.

Doubling the aid of ₹1,500 provided by the previous Trinamool Congress government under its Lakshmir Bhandar scheme to ₹3,000 was one of the promises made by the BJP during the campaign for the Assembly poll.

Women and Child Development Minister Agnimitra Paul said fresh applications are being considered due to "corruption" in the implementation of the Lakshmir Bhandar scheme under which 2.2 crore women received aid.

Chief Secretary Manoj Agarwal said the list of beneficiaries of the new scheme will be made public and people can file objections if non-deserving persons are receiving aid.

The newly elected BJP government had come under Opposition attack over the introduction of a "tedious" 11-page application form for the Annapurna Bhandar scheme and the declaration that existing beneficiaries of the Lakshmir Bhandar scheme will have to apply afresh.

04J6. 28 lakh women to get monthly dole as Bengal govt. rolls out Annapurna Bhandar scheme

अन्नपूर्णा भंडार योजना लागू होने पर बंगाल सरकार 28 लाख महिलाओं को मासिक सहायता देगी

- **West Bengal Chief Minister Suvendu Adhikari** on Wednesday rolled out the **Annapurna Bhandar scheme** that will provide monthly aid of **₹3,000** to eligible women in the **25 to 60 age group** in the State.
  पश्चिम बंगाल के मुख्यमंत्री सुवेंदु अधिकारी ने बुधवार को **अन्नपूर्णा भंडार योजना** शुरू की, जिसके तहत राज्य की **25 से 60 वर्ष आयु वर्ग** की पात्र महिलाओं को प्रति माह **₹3,000** की सहायता प्रदान की जाएगी।
- Mr. **Adhikari** handed over cheques to five beneficiaries at the **State Secretariat** to mark the launch of the **direct benefit transfer scheme**.
  श्री **अधिकारी** ने **प्रत्यक्ष लाभ अंतरण (DBT) योजना** के शुभारंभ के अवसर पर **राज्य सचिवालय** में पाँच लाभार्थियों को चेक सौंपे।

during the campaign for the **Assembly poll**.

पूर्व **तृणमूल कांग्रेस सरकार** द्वारा **लक्ष्मीर भंडार योजना** के तहत दी जाने वाली **₹1,500** की सहायता को बढ़ाकर **₹3,000** करना **भाजपा** द्वारा **विधानसभा चुनाव** प्रचार के दौरान किए गए प्रमुख वादों में से एक था।

Japan's fertility rate falls to a record low

PCS

1.14 Japan's fertility rate fell again last year to a record low, official data showed. Japan has one of the world's lowest birth rates, as well as a falling and ageing population, leading to labour shortages, a ballooning social security bill and a shrinking tax base. The number of babies born in the country fell by nearly 15,000. PTI

04J6. Japan's fertility rate falls to a record low
जापान की प्रजनन दर रिकॉर्ड निम्न स्तर पर पहुँची

- Japan's **fertility rate** fell again last year to a **record low**, official data showed.

आधिकारिक आँकड़ों के अनुसार, पिछले वर्ष जापान की **प्रजनन दर (Fertility Rate)** फिर घटकर **रिकॉर्ड निम्न स्तर** पर पहुँच गई।

- Japan has one of the world's **lowest birth rates**, as well as a **falling and ageing population**, leading to **labour shortages**, a ballooning **social security bill** and a shrinking **tax base**.

जापान में दुनिया की सबसे कम **जन्म दरों** में से एक है, साथ ही वहाँ की **जनसंख्या घट रही है और वृद्ध हो रही है**, जिसके कारण **श्रमिकों की कमी**, बढ़ता हुआ **सामाजिक सुरक्षा व्यय** तथा घटता हुआ **कर आधार (Tax Base)** जैसी समस्याएँ उत्पन्न हो रही हैं।

Top 5 Countries/Regions with the Lowest Fertility Rates

Rank	Country/Region	Fertility Rate*
1	South Korea	~0.8
2	Singapore	~0.97
3	Hong Kong	~1.0
4	Macau	~1.03
5	Taiwan	~1.06

Top 5 Countries with the Highest Fertility Rates

Rank	Country	Fertility Rate*
1	Niger	~6.6
2	Chad	~6.2
3	Somalia	~6.1
4	Democratic Republic of the Congo	~6.0
5	Central African Republic	~5.9

Questions and Answers to the previous day's daily quiz: 1. This Indian diplomat's speech at the Security Council across three meetings over two days in 1957 lasted more than eight hours. **Ans: V.K. Krishna Menon**
2. Who was Venezuela's President Hugo Chavez referring to when he said "Yesterday, the devil came here — right here. And it smells of sulphur still today." **Ans: George W. Bush**
3. Which Spanish artist painted the original 1937 masterpiece "Guernica"? **Ans: Pablo Picasso**
4. "I have come with a freedom fighter's gun in one hand and an olive branch in the other. Do not let the olive branch fall from my hand". Who said this? **Ans: Yasser Arafat**
5. This Zimbabwean President, during his General Assembly speech in 2015, declared "We are not gays". **Ans: Robert Mugabe**
6. Visual: This Soviet leader is said to have banged his shoe on his desk during a heated UN discussion in 1960. **Ans: Nikita Khrushchev**

04J6. QUIZ: PCS Special

1. V.K. Krishna Menon – The Longest Speech in UN History

- **V.K. Krishna Menon**, India's Permanent Representative to the United Nations and later Defence Minister, delivered one of the most remarkable speeches in diplomatic history during the **UN Security Council debates on Kashmir in January 1957**.
- Spread across three meetings over two days, the speech lasted for more than **eight hours**, setting a record recognized by the United Nations and Guinness World Records.
- Menon meticulously defended India's legal and constitutional position on Jammu and Kashmir, making the speech a landmark in India's diplomatic history and earning him the title **"Hero of Kashmir."**

3. Pablo Picasso and Guernica

- **Pablo Picasso**, one of the most influential artists of the twentieth century, painted **"Guernica"** in 1937.
- The masterpiece was inspired by the bombing of the Spanish town of Guernica during the **Spanish Civil War**.
- Created in black, white and grey tones, the painting depicts human suffering, destruction and the horrors of war.
- Today, *Guernica* is regarded as a universal symbol of peace and resistance against violence.
- It remains one of the most celebrated anti-war artworks and is displayed at the **Museo Reina Sofía in Madrid, Spain**.

4. Yasser Arafat's Olive Branch Speech

- The famous statement, **"I have come with a freedom fighter's gun in one hand and an olive branch in the other. Do not let the olive branch fall from my hand,"** was delivered by **Yasser Arafat** at the **United Nations General Assembly on 13 November 1974**.
- As Chairman of the **Palestine Liberation Organization (PLO)**, Arafat used the speech to seek international recognition of Palestinian aspirations and statehood.
- The olive branch symbolized peace, while the gun represented resistance.

5. Robert Mugabe's "We Are Not Gays" Statement

- During his speech at the **UN General Assembly in September 2015**, Zimbabwean President **Robert Mugabe** declared, "We are not gays," while criticizing Western countries for linking aid and international cooperation to LGBTQ+ rights.
- Mugabe had long been known for his opposition to same-sex marriage and LGBTQ+ rights, which he argued were inconsistent with Zimbabwe's cultural values.
- The remark generated significant international debate and criticism, highlighting the broader global divide over human rights, cultural sovereignty and social values in international politics.

Denmark's Prime Minister Mette Frederiksen on Wednesday presented her new Cabinet, which for the first time in Danish history included more women than men. Eleven out of the 21 Ministers were women and the list also included familiar names from Ms. Frederiksen's former government. AFP

04J6. Denmark PM presents new govt., with majority of women Ministers

डेनमार्क की प्रधानमंत्री ने नई सरकार प्रस्तुत की, जिसमें महिला मंत्रियों का बहुमत है

- **Denmark's Prime Minister Mette Frederiksen** on Wednesday presented her new Cabinet, which for the first time in Danish history included more women than men.

डेनमार्क की प्रधानमंत्री मेटे फ्रेडरिक्सेन ने बुधवार को अपनी नई कैबिनेट प्रस्तुत की, जिसमें डेनमार्क के इतिहास में पहली बार पुरुषों की तुलना में अधिक महिलाएँ शामिल हैं।

- **Eleven** out of the **21 Ministers** were women and the list also included familiar names from Ms. Frederiksen's former government.

21 मंत्रियों में से **11 महिलाएँ** हैं और इस सूची में सुश्री फ्रेडरिक्सेन की पूर्व सरकार के परिचित नाम भी शामिल हैं।

Praggnanandhaa does the double over Carlsen

Victory with black pieces takes the Indian GM to the third spot; So outsmarts Keymer to stay on top; Firouzja gets the better of Gukesh; Assaubayeva beats Divya to move closer to the title

PCS

C. Shyam Sundar
OSLO

Rare feat: Pragg became one of the very few players to have beaten Carlsen thrice in classical chess. NORWAY CHESS

Indian Grandmaster R. Praggnanandhaa did it again. He beat the World No.1 Magnus Carlsen for a second time in the same tournament, outwitting him in the eighth round of Norway Chess, in the classical game, to close in on the leader Wesley So.

The stunning victory with black pieces on Tuesday at Deichman Bjorvika gave Praggnanandhaa three points and took him to third spot with 12 points, two behind So.

Frenchman Alireza Firouzja occupied the second place with 13 points, after he handed World champion D. Gukesh his third defeat of the tournament.

So pulled away from the field by outsmarting Vincent Keymer in the Armageddon after the classical match ended in a stalemate.

"It's more important for the tournament that I get this win than thinking that it's Magnus. Of course, it's great to do it against Magnus, but I think winning any game at this stage of the tournament is good," a delighted Praggnanandhaa said after making it two out of two (in classical games) in the tournament, which Carlsen has dominated like no other winning it seven times.

The 20-year-old Indian GM had beaten the Norwegian ace in the third round, before doing the double.

With this win, Praggnanandhaa became one of the very few players to have beaten the 35-year-old Carlsen thrice in classical chess.

Carlsen had started the tournament with a loss to Firouzja before sinking to defeats against Pragg and So subsequently.

In the women's event, Kazakh GM Bibisara Assaubayeva inched closer to winning the title, pipping Indian GM Divya Deshmukh in a game which she was fighting to survive.

She has opened up a five-point lead over Ukraine's Anna Muzychuk, who fell in the Armageddon to Koneru Humpy.

The matches will resume on Thursday after Wednesday's rest day.

The results: Eighth round:
Open: Alireza Firouzja (Fra, 13) bt D. Gukesh (8), Magnus Carlsen (Nor, 9) lost to R. Praggnanandhaa (12), Wesley So (USA, 14) bt Vincent Keymer (Ger, 10).
Women: Zhu Jiner (Chn, 10) bt Ju Wenjun (Chn, 9), Divya Deshmukh (10) lost to Bibisara Assaubayeva (Kaz, 15.5), Anna Muzychuk (Ukr, 10.5) lost to Koneru Humpy (8) in Armageddon.

(The writer is in Oslo at the invitation of Norway Chess).

04J6. Praggnanandhaa does the double over Carlsen

प्रज्ञानानंदा ने कार्लसन पर दूसरी बार भी जीत दर्ज की

- **Victory with black pieces** takes the Indian GM to the **third spot**.

काले मोहरों से मिली जीत ने भारतीय ग्रैंडमास्टर को **तीसरे स्थान** पर पहुँचा दिया।

- **Firouzja** gets the better of **Gukesh**.

फिरूज़जा ने **गुकेश** को पराजित किया।

- He beat **World No.1 Magnus Carlsen** for a second time in the same tournament.

उन्होंने इसी टूर्नामेंट में दूसरी बार **विश्व नंबर-1 मैग्नस कार्लसन** को हराया।

Cabinet gives its nod for new coastal highway in Odisha

GS I: Geography

Press Trust of India
NEW DELHI

It also approved two National Highway widening projects in Telangana at a cost of ₹7,597.16 crore

The Union Cabinet on Wednesday approved the construction of a new coastal highway from Rameshwar to Paradeep in Odisha at a total project cost of ₹8,300.79 crore.

The new coastal highway will be constructed on a hybrid annuity model, in two packages, with a combined total length of 160.18 km, an official statement said. It will pass through Khurda, Puri, Kendrapada and Jagatsinghpur districts of Odisha. The project will enhance regional mobility and promote socio-economic development, the statement said, while also leading to substantial reductions in fuel consumption, carbon emissions, and vehicle operating costs.

The project was among the announcements made by Union Minister of Information and Broadcasting Ashwini Vaishnaw in New Delhi on Wednesday.

The Union Cabinet also gave the green signal for two major National Highway widening projects in Telangana spanning a total length of 190.76 km at a cost of ₹7,597.16 crore.

The widening of the Armoor-Jagtial-Mancherial Section of NH-63 will be on a hybrid annuity model and the Jagtial-Karimnagar Section of NH-563 will be carried out on a build-operate-transfer model to the four-lane standard in Telangana.

Upon completion, the official statement said, travel time is expected to reduce by about an hour and 30 minutes between Armoor and Mancherial and by about 45 minutes between Jagtial and Karimnagar, while providing safe, fast, and uninterrupted connectivity for both passenger and freight traffic.

04J6. Cabinet gives its nod for new coastal highway in Odisha
कैबिनेट ने ओडिशा में नए तटीय राजमार्ग को मंजूरी दी

- The **Union Cabinet** on Wednesday approved the construction of a new **coastal highway** from **Rameshwar to Paradeep** in **Odisha** at a total project cost of **₹8,300.79 crore**.

बुधवार को **केंद्रीय मंत्रिमंडल** ने **ओडिशा** में **रामेश्वर से पारादीप** तक एक नए **तटीय राजमार्ग** के निर्माण को **₹8,300.79 करोड़** की कुल परियोजना लागत पर मंजूरी दी।

- The widening of the **Armoor-Jagtial-Mancherial Section of NH-63** will be on a **hybrid annuity model**.

एनएच-63 के आर्मूर-जगतियाल-मंचेरियल खंड का चौड़ीकरण **हाइब्रिड एन्युटी मॉडल** पर किया जाएगा।

- The **Jagtial-Karimnagar Section of NH–563** will be carried out on a **build-operate-transfer model** to the **four-lane standard** in Telangana.

एनएच-563 के जगतियाल-करिमनगर खंड का विकास तेलंगाना में **बिल्ड-ऑपरेट-ट्रांसफर मॉडल** के तहत **चार-लेन मानक** के अनुसार किया जाएगा।

04J6. QUIZ

Answers to to May 28 quiz:

1. Gulf in Arctic Russia at end of longest unobstructed sea route – **Ans: Khatanga**
2. Point on land farthest from any coastline – **Ans: Continental pole of inaccessibility**
3. Most remote island, a South Atlantic Norwegian territory – **Ans: Bouvet Island**
4. Name of underwater channel adept at transmitting sound – **Ans: SOFAR**
5. Line marking belt of highest mean surface temperature – **Ans: Thermal equator**

Visual: **Null Island**

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

1. Khatanga Gulf – End of the Longest Unobstructed Sea Route

- **Khatanga Gulf** is located on the northern coast of Siberia in Arctic Russia, where the **Khatanga River** flows into the **Laptev Sea**, a marginal sea of the Arctic Ocean.
- It gained attention in geographical studies because it lies near one end of the world's longest theoretically unobstructed straight-line sea route, stretching across vast oceanic expanses without intersecting land.
- The region is characterized by extreme Arctic conditions, seasonal sea ice, and strategic importance for Russia's Northern Sea Route, which is becoming increasingly significant due to Arctic warming and expanding maritime navigation opportunities.

2. Continental Pole of Inaccessibility – Farthest Point from Any Coastline

- The **Continental Pole of Inaccessibility** refers to the location on Earth that is farthest from any ocean or coastline.
- It is situated in northwestern China, near the border region of the **Xinjiang Uyghur Autonomous Region** and Kazakhstan.
- This point lies approximately 2,645 kilometres from the nearest coastline, making it the most inland location on the planet.
- The concept is widely used in geography to study continentality, climate, and remoteness.
- Due to its great distance from oceans, the region experiences extreme temperature variations and a highly continental climate.

3. Bouvet Island – The World's Most Remote Island

- **Bouvet Island** is an uninhabited volcanic island located in the South Atlantic Ocean and is administered as a dependent territory of **Norway**.
- Situated roughly midway between Antarctica and southern Africa, it is often regarded as the **most remote island in the world because no permanently inhabited landmass exists within thousands of kilometres.**
- About 93 percent of the island is covered by glaciers, making human settlement extremely difficult.
- Owing to its ecological significance and pristine environment, Bouvet Island has been designated as a protected nature reserve by Norway.

4. SOFAR Channel – Nature's Underwater Sound Highway

- The **SOFAR (Sound Fixing and Ranging) Channel** is a **horizontal layer in the ocean** where sound waves can travel extremely long distances with minimal energy loss.
- This phenomenon occurs **because variations in water temperature and pressure** create **a zone of minimum sound velocity, causing sound waves to refract back toward the channel's centre**.
- The SOFAR Channel plays a crucial role in oceanographic research, submarine communication, marine mammal studies, and underwater monitoring systems.
- Scientists use it to track underwater events, including earthquakes, volcanic eruptions, and whale migrations across vast ocean basins.

5. Thermal Equator – Belt of Highest Mean Surface Temperature

- The **Thermal Equator** is an imaginary line connecting places that experience the highest average annual temperatures on Earth.

- Unlike the geographic equator, it shifts northward and southward with seasonal changes in solar heating and land–sea distribution.
- It generally lies north of the geographic equator because the Northern Hemisphere contains larger landmasses that heat more rapidly than oceans.
- The thermal equator explains global temperature patterns, pressure belts, monsoon circulation, and the seasonal migration of climatic zones.

Iran strikes Kuwait's main airport, Bahrain base after U.S. hits Qeshm

Embassy of India in Kuwait says an Indian national was killed in the strike; 63 others wounded; the attack occurred soon after the airport had reopened following a months-long closure; U.S. targeted Iran's ground control station on Qeshm Island

GS I: Geography

Associated Press
DUBAI

Kuwait briefly shut its main airport on Wednesday after Iranian drones heavily damaged a passenger terminal, killed one person and wounded dozens – the latest in back-and-forth attacks by Iran and the U.S. that test a fragile ceasefire.

The strike reinforced the risks to residents and travellers in Gulf countries that had considered themselves relative havens before the war, now in its fourth month.

A spokesperson for Kuwait's Defence Ministry, Brig. Gen. Saud Abdulaziz Al-Otaibi, said "a number of hostile drones" targeted a passenger building at Kuwait International Airport. It had opened only on Monday after a months-long closure because of the war.

Unsafe haven: Prime Minister Sheikh Ahmad al-Abdullah al-Sabah inspecting the Kuwaiti airport after an attack on Wednesday. AFP

India's embassy said the person killed was an Indian national. In a post on X, the Embassy of India in Kuwait said it is "closely coordinating" with the Kuwaiti authorities to extend all possible support to the bereaved family.

Authorities said 63 people were wounded, including passengers and workers, and some suffered serious injuries.

Kuwait's Defence Ministry said it destroyed over a dozen missiles and a similar number of drones from Iran. The airport partially reopened later, with Kuwait Airways flights resuming at a different terminal, according to civil aviation authorities.

The Foreign Ministry said Kuwait will "neither accept nor tolerate" the attacks and was kicking out two Iranian diplomats.

The U.S. military said U.S. and Bahraini forces intercepted missiles aimed at the Gulf kingdom, home to the U.S. Navy's 5th fleet.

Iran's paramilitary Revolutionary Guard acknowledged that it targeted the headquarters of the 5th Fleet and U.S. military facilities in another country, but did not name Kuwait.

The U.S. military also said it launched strikes on an Iranian military ground control station on Qeshm Island in the Strait of Hormuz.

Iran's Foreign Ministry condemned the U.S. strikes on the island.

Romania wants to boost air defence after drone strike blamed on Russia

GS I: Geography

Agence France-Presse
PARIS

Romania's Foreign Minister said on Wednesday her country needed to bolster its air defences with the help of its allies, days after two people were wounded in a drone strike on an apartment block close to the Ukraine border that was blamed on Russia.

Oana Toiu said there was no suggestion yet that Russia had intentionally targeted the 10-storey block in Galati last Friday, but Moscow bore "responsibility" for the strike over four years into the invasion of its neighbour.

"It is quite clear that we need to increase air monitoring and air defence capabilities throughout the eastern flank (of NATO)," she told reporters in Paris.

Romania's Foreign Minister Oana Toiu says Bucharest is in talks with NATO on boosting its capabilities in the short term. REUTERS

"But for us the pressure is even higher," she said, adding that NATO and EU member Romania had had a long border with Ukraine that stretched along the Danube river and out into the Black Sea.

Ms. Toiu said it would be one to two more years before new equipment arrived from Romania's own defence procurement.

But she added Bucharest was in talks with NATO on boosting its capabilities in the short term, as well as working with Kyiv on a joint anti-drone air defence project.

She said Romania had been aware of an incoming drone on May 29 but air force pilots decided not to shoot it down out of concern that an air defence missile could itself cause damage on the ground.

While this was the first such incident to cause casualties inside Romania, Ms. Toiu said there had been more than 40 instances of drone incursions inside the territory.

"There is a common understanding that we need to have better air defence of the eastern flank and not just Romania," she said.

04J6. Romania wants to boost air defence after drone strike blamed on Russia

GS Paper II: Polity	04 June 2026
TOPICS COVERED	
04J6	Why judicial holidays are necessary न्यायिक अवकाश क्यों आवश्यक हैं

Why judicial holidays are necessary

GS II: Polity

Kapil Sibal

Senior lawyer and Member of the Rajya Sabha

The debate over judicial holidays has resurfaced in recent weeks, with critics questioning why courts observe extended breaks. The assumption is that judges, like most professionals, step away from work during these periods. That assumption is largely wrong.

For most judges, a holiday is rarely a holiday in any conventional sense.

The public sees only the visible part of the work: judges presiding over courtrooms, hearing arguments, questioning lawyers and delivering orders. What they do not see is the considerably longer phase that begins after court hours, when judges return home to write judgments. This work often stretches past midnight. Each judgment requires close analysis of facts, application of legal principles, reference to precedent, and precision in language, since every word carries legal weight.

A single decision can affect lives, businesses, reputations and personal liberty.

A time for uninterrupted work

This pattern is not unique to India.

Justice Ruth Bader Ginsburg, who was a judge of the United States Supreme Court for 27 years, was known to arrive at her chambers shortly after lunch and work late into the night. Her former law clerk Goodwin Liu, now a Justice of the California Supreme Court, has spoken of receiving voicemails from her at two or three in the morning, when she was at the height of her writing. From oral argument to majority opinion, she averaged 60 days, the fastest pace on her Bench. When she underwent surgery for colon cancer in 1999, and again for pancreatic cancer in 2009, she scheduled her procedures so as not to miss a single day on the Bench.

In India, the workload is no less demanding. Justice D.Y. Chandrachud, during his eight-year tenure in the Supreme Court, authored over 600 judgments and sat on more than 1,200 Benches before retiring as the 50th Chief Justice of India in November 2024. Few professions outside the Bench demand such sustained intellectual output year after year, and that too with little public recognition of the labour involved.

A judge's duty does not pause when courts close. It continues through late night drafting, early morning preparation, and constant engagement with the law

The mornings begin no easier. Long before court assembles, judges are reading voluminous case files, studying precedents and preparing for the day's hearings. By the time proceedings open, hours of unseen work have already gone in.

Judicial breaks, then, are not periods of rest but working windows. During these breaks, judges complete pending judgments, study lengthy case records and prepare for matters of constitutional importance. With case backlogs continuing to rise across courts, these are often the only stretches available for uninterrupted work.

Families bear much of the strain. Spouses and children of judges describe a familiar pattern: even on holidays, judges are occupied with their laptops, files or video calls with law clerks. The time supposed to be shared in company with their family is regularly interrupted by judicial work. Thus, judicial service is not only an individual commitment. It becomes a shared one for the household.

Not as lucrative

The economic side of the Bench is also not discussed often. While judges receive a structured and respectable salary, it is not comparable to what senior lawyers earn at the top end of the bar. A senior advocate may earn in a single hearing what a judge earns over several months. Judges, in turn, carry the greater burden of decision-making and accountability.

Many take the Bench after giving up lucrative practices, choosing service to the nation over personal financial gain.

The pressures do not end with the workload. Judicial decisions are scrutinised publicly and legally. Judges must remain neutral and detached, even when the cost of doing so is high.

The unseen cost

In his autobiography, *Neither Roses Nor Thorns*, Justice H.R. Khanna recalled the night before he delivered his lone dissent in the *ADM Jabalpur* case during the Emergency. Sitting in the moonlight in his compound with the Ganges flowing in front of them, he turned to his younger sister and said, "I have prepared a judgment which is going to cost me the Chief Justiceship of India." He was right. The following year he was superseded for the top post by Justice M.H. Beg, who had ruled with the majority, and resigned soon after.

His dissent, eventually vindicated when the Supreme Court overruled *ADM Jabalpur* in the *Puttaswamy* verdict of 2017, is now remembered as one of the bravest decisions in Indian judicial history.

The dedication asked of a judge does not end with retirement either. Lord Denning, whom Margaret Thatcher described as probably the greatest English judge of modern times, served on the Bench for 38 years and delivered around 2,000 reported judgments before retiring at 83. He continued writing books on the law till his 100th birthday.

Closer home, Justice V.R. Krishna Iyer kept producing books, articles and lectures on jurisprudence long after his retirement from the Supreme Court, almost until his death at 99 in 2014.

The debate on judicial holidays deserves a more informed footing. A judge's duty does not pause when courts close. It continues through late night drafting, early morning preparation, and constant engagement with the law.

Before questioning the system, it may help to first understand what it actually asks of those who serve in it.

04J6. Why judicial holidays are necessary
न्यायिक अवकाश क्यों आवश्यक हैं

- In his autobiography, **Neither Roses Nor Thorns**, Justice **H.R. Khanna** recalled the night before he delivered his lone dissent in the **ADM Jabalpur case** during the Emergency.
  अपनी आत्मकथा **Neither Roses Nor Thorns** में न्यायमूर्ति **एच.आर. खन्ना** ने उस रात का उल्लेख किया है जब उन्होंने आपातकाल के दौरान **एडीएम जबलपुर मामले** में अपना एकमात्र असहमति निर्णय देने से पूर्व समय बिताया था।

- The following year he was **superseded for the top post by Justice M.H. Beg**, who had ruled with the majority, and resigned soon after.
  अगले वर्ष बहुमत के पक्ष में निर्णय देने वाले न्यायमूर्ति **एम.एच. बेग** को उनसे ऊपर नियुक्त कर दिया गया और उसके तुरंत बाद उन्होंने इस्तीफा दे दिया।
- His dissent, eventually vindicated when the Supreme Court overruled **ADM Jabalpur** in the **Puttaswamy verdict of 2017**, is now remembered as one of the bravest decisions in Indian judicial history.
  उनकी असहमति, जिसे अंततः **2017 के पुट्टास्वामी निर्णय** में सर्वोच्च न्यायालय द्वारा **एडीएम जबलपुर** निर्णय को निरस्त किए जाने पर मान्यता मिली, आज भारतीय न्यायिक इतिहास के सबसे साहसिक निर्णयों में से एक मानी जाती है।
- Closer home, Justice **V.R. Krishna Iyer** kept producing books, articles and lectures on jurisprudence long after his retirement from the Supreme Court, almost until his death at **99** in 2014.
  भारत में न्यायमूर्ति **वी.आर. कृष्ण अय्यर** ने सर्वोच्च न्यायालय से सेवानिवृत्ति के बाद भी विधिशास्त्र पर पुस्तकें, लेख और व्याख्यान लिखना जारी रखा, लगभग अपनी **99 वर्ष** की आयु में 2014 में मृत्यु तक।

PATRIOTIC IAS

After a long wait, Tamil Nadu gets a regular DGP

GS II: Governance

S. Vijay Kumar
CHENNAI

After months of delay caused by litigation and repeated postponements, Tamil Nadu finally has a regular Director-General of Police and Head of the Police Force (DGP/HoPF).

On Wednesday, Mahesh Kumar Aggarwal, a 1994-batch IPS officer, assumed charge as the DGP, nearly 10 months after the vacancy arose.

Dr. Aggarwal was given a guard of honour at the DGP's office in Chennai. Later, he met Governor Rajendra Vishwanath Arlekar at the Lok Bhavan, and Chief Minister C. Joseph Vijay at the Secretariat.

Dr. Aggarwal was on Central government deputation, and was serving as Special Director-General of the Border Security Force. He had served in several important positions, including that of Chennai City Police Commissioner.

Mahesh Kumar Aggarwal

Prime focus

After assuming charge as the DGP, Dr. Aggarwal told the media that prime importance would be given to curbing the drug menace, preventing crimes against women and children, and maintaining law and order.

Dr. Aggarwal succeeds Sandeep Rai Rathore, who was appointed to the post by the Election Commission of India (EC) in the run-up to the Assembly election in April.

With about six years of service left, Dr. Aggarwal is the youngest police officer to occupy the top post, and will have a minimum tenure of two years under the Supreme Court's guidelines in the Prakash Singh case. There is, however, no bar on his continuing in the post until superannuation.

Protracted process

The appointment brings to a close a protracted process marked by administrative delays, legal challenges, and disagreements between the State government and the Union Public Service Commission (UPSC).

The post should have ideally been filled on September 1, 2025, following the retirement of the then DGP, Shankar Jiwal. However, the process was delayed for multiple reasons.

Going by the Supreme Court guidelines, the State government is required to initiate the selection process well in advance, and forward a list of eligible DGP-rank officers to the UPSC at least six months before the vacancy arises. In this case, the proposal was reportedly sent only a few days before Mr. Jiwal's retirement in the last week of August 2025.

04J6. After a long wait, Tamil Nadu gets a regular DGP

लंबे इंतजार के बाद तमिलनाडु को नियमित डीजीपी मिला

- With about **six years of service** left, Dr. **Aggarwal** is the youngest police officer to occupy the top post, and will have a minimum tenure of **two years** under the **Supreme Court's guidelines** in the **Prakash Singh case**.

लगभग **छह वर्ष की सेवा** शेष होने के साथ, डॉ. **अग्रवाल** इस शीर्ष पद पर पहुंचने वाले सबसे युवा पुलिस अधिकारी हैं और **प्रकाश सिंह मामले** में **सुप्रीम कोर्ट के दिशानिर्देशों** के अनुसार उनका न्यूनतम कार्यकाल **दो वर्ष** होगा।

- There is, however, no bar on his continuing in the post until **superannuation**.

हालाँकि, उनके **सेवानिवृत्ति** तक इस पद पर बने रहने पर कोई रोक नहीं है।

- Going by the **Supreme Court guidelines**, the State government is required to initiate the selection process well in advance, and forward a list of eligible **DGP-rank officers** to the **UPSC** at least six months before the vacancy arises.

सुप्रीम कोर्ट के दिशानिर्देशों के अनुसार, राज्य सरकार को चयन प्रक्रिया काफी पहले शुरू करनी होती है और रिक्ति उत्पन्न होने से कम से कम छह महीने पहले पात्र **डीजीपी रैंक अधिकारियों** की सूची **UPSC** को भेजनी होती है।

Is shoot-to-disable the new normal?

Why is Operation Langda a pragmatic strategy? Has a sporadic enforcement tactic become a routine practice? What makes it legally defensible? To what extent does the State endorse half-encounters? Is it a self-sustaining system? Why are piecemeal reforms insufficient?

GS II: Governance

EXPLAINER

G.S. Bajpai
Vibhuti Sharma

The story so far:

The "leg-shot" doctrine appears to have become the new normal in Uttar Pradesh, emerging as a genuine crime-control model that Herbert Packer advocated in 1968, in his work – *The Limits of the Criminal Sanction*. Between 2017 and 2025, the State Police recorded over 16,000 encounter operations. In about 97% of cases, the accused survived with a bullet wound to the leg. At this scale, the question is no longer whether something unusual happened, but what it means when the unusual becomes routine.

What is Operation Langda?

A motorcycle is intercepted on a highway. The accused attempts to flee. Shots are fired. He is injured, typically in the leg, and taken into custody. This sequence, which now recurs across the State, is now known as "Operation Langda", or "half-encounters", from the Hindi word *langda* (lame), a policing methodology cultivated by the Uttar Pradesh Police since 2017 under its "zero-tolerance" framework. What may initially have appeared as a sporadic enforcement tactic has, over time, acquired the characteristics of a routine practice governed by a dual logic of incapacitation and punishment.

Refined through repetition, encounters have evolved into a recognisable policing pattern marked by targeted leg injury, standardised reporting, official endorsement and overt punitive logic.

How are half-encounters structured?

A study by the Centre for Criminology and Victimology at National Law University Delhi, based on official U.P. Police data and 100 verified encounter cases (January 2025-May 2026), found that these incidents follow a near-identical sequence: intelligence received, suspect intercepted, alleged attempt to flee or fire, police response in self-defence, gunshot to the leg, arrest, and recovery of a locally made pistol. This seven-step sequence is the standardised operational template of Operation Langda, repeated across more than 30 districts over nearly a decade.

What distinguishes the practice is its focus on incapacitation rather than lethality. By visibly disabling accused persons, it functions as both a disciplinary mechanism and an assertion of state authority. The standardised language of police reports further normalises this extra-procedural punishment by presenting it as routine law enforcement. Nearly 80% of 100 cases in the micro-level dataset used either "retaliation" or "self-defence" as the major justificatory framing, no matter what the alleged offence is.

The consistency of this framing across widely different offences suggests a standardised narrative template rather than case-specific accounts. This helps reproduce the practice across districts as a recognisable policing methodology.

In most of the 100 cases examined, media reports reproduced the police version without critical scrutiny. Critical coverage emerged only when direct counter-evidence challenged the official narrative. As a result, these incidents entered the news cycle largely as routine law-and-order events, that functioned as transmission rather than scrutiny.

The emergence of this methodology must be understood against the institutional constraints faced by the Uttar Pradesh Police. Prior to 2017, conviction rates in several categories of violent crimes were below 20%, while investigative capacity lagged far behind caseloads. In this environment, 'half-encounters' present a pragmatic alternative.

Crucially, shooting to disable rather than kill makes the practice more legally defensible. The accused survives to be produced in court, the officer can claim self-defence, and the state records an arrest rather than a death. This distinguishes the U.P. model from the typical "fake encounter" tradition. It is also a reason why the practice continues to enjoy official support. State data show declines in crimes such as dacoity and robbery, but these gains do not address concerns over due process and the erosion of the rule of law.

Uttar Pradesh publicly treats encounter statistics as indicators of law-and-order achievements. Through official recognition and accelerated promotions, an exceptional tactic has become an accepted metric of policing performance. The incentive structure is reflected in the data: 2,739 encounter operations were recorded in 2025 alone – the highest annual figure in the dataset.

This official endorsement contrasts sharply with established judicial standards. In *People's Union for Civil Liberties v. State of Maharashtra (2014)*, the Supreme Court laid down sixteen principles and mandated an independent inquiry in every case. While these remain the legal benchmark, they have not been systematically applied in the State.

In January 2026, the Allahabad High Court observed that "half-encounter" practices were often driven by official rewards and promotions. The court reiterated that the power to punish belongs exclusively to the judiciary.

What makes reform so difficult?

The central problem is that "Operation Langda" is that it operates as a self-sustaining system. Political endorsement, professional incentives, media transmission and the chronic weaknesses of the criminal justice process do not merely tolerate the practice, they reproduce it. Piecemeal reforms will not be enough. What is most striking is how a practice that sits outside legal norms has, through routine and reward, become part of how the state governs. Any durable reform must dismantle the interlocking incentives and channels that produce it.

G.S. Bajpai is the Vice Chancellor of the National Law University, Delhi. Vibhuti Sharma is an Academic Fellow, NLU Delhi. Views are personal.

In Uttar Pradesh, encounters have evolved into a recognisable policing pattern marked by targeted leg injury, standardised reporting, official endorsement and overt punitive logic. PTI

THE GIST

- Encounters have evolved into a recognisable policing pattern marked by targeted leg injury, standardised reporting, official endorsement and overt punitive logic.
- The consistency of this framing across widely different offences suggests a standardised narrative template rather than case-specific accounts.
- The emergence of this methodology must be understood against the institutional constraints faced by the Uttar Pradesh Police.
- The central problem is that 'Operation Langda' it operates as a self-sustaining system.

04J6. Is shoot-to-disable the new normal?

क्या निष्क्रिय करने के लिए गोली चलाना नया सामान्य बन गया है?

- Between **2017 and 2025**, the State Police recorded over **16,000 encounter operations**.
  2017 से 2025 के बीच राज्य पुलिस ने **16,000 से अधिक मुठभेड़ अभियानों** का अभिलेखन किया।
- In about **97% of cases**, the accused survived with a bullet wound to the leg.
  लगभग **97 प्रतिशत मामलों** में आरोपी पैर में गोली लगने के बावजूद जीवित बच गए।
- At this scale, the question is no longer whether something unusual happened, but what it means when the unusual becomes routine.
  इस स्तर पर प्रश्न यह नहीं रह जाता कि कोई असामान्य घटना हुई या नहीं, बल्कि यह कि जब असामान्य घटनाएँ नियमित हो जाएँ तो उसका क्या अर्थ है।

What is Operation Langda?

ऑपरेशन लंगड़ा क्या है?

- Prior to **2017**, conviction rates in several categories of violent crimes were below **20%**, while investigative capacity lagged far behind caseloads.
  2017 से पूर्व अनेक प्रकार के हिंसक अपराधों में दोषसिद्धि दर **20 प्रतिशत** से कम थी, जबकि जाँच क्षमता मामलों की संख्या की तुलना में बहुत पीछे थी।
- In this environment, **'half-encounters'** present a pragmatic alternative.
  ऐसे वातावरण में **'हाफ-एनकाउंटर'** एक व्यावहारिक विकल्प के रूप में प्रस्तुत किए जाते हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- Crucially, shooting to disable rather than kill makes the practice more legally defensible.
  महत्वपूर्ण रूप से, मृत्यु कारित करने के बजाय आरोपी को अक्षम बनाने हेतु गोली चलाना इस पद्धति को विधिक दृष्टि से अधिक बचावयोग्य बनाता है।
- The accused survives to be produced in court, the officer can claim **self-defence**, and the state records an arrest rather than a death.
  आरोपी जीवित रहता है और उसे न्यायालय में प्रस्तुत किया जा सकता है, अधिकारी **आत्मरक्षा** का दावा कर सकता है तथा राज्य मृत्यु के बजाय गिरफ्तारी का अभिलेखन करता है।
- State data show declines in crimes such as **dacoity** and **robbery**, but these gains do not address concerns over **due process** and the erosion of the **rule of law**.
  राज्य के आँकड़े **डकैती** और **लूट** जैसे अपराधों में कमी दर्शाते हैं, किन्तु ये उपलब्धियाँ **विधिक प्रक्रिया** तथा **कानून के शासन** के क्षरण से संबंधित चिंताओं का समाधान नहीं करतीं।

Policing performance and judicial standards
पुलिस प्रदर्शन और न्यायिक मानदंड

- Uttar Pradesh publicly treats encounter statistics as indicators of law-and-order achievements.
  उत्तर प्रदेश सार्वजनिक रूप से मुठभेड़ संबंधी आँकड़ों को कानून-व्यवस्था की उपलब्धियों के संकेतक के रूप में प्रस्तुत करता है।
- In **People's Union for Civil Liberties v. State of Maharashtra (2014)**, the Supreme Court laid down **sixteen principles** and mandated an independent inquiry in every case.
  पीपुल्स यूनियन फॉर सिविल लिबर्टीज बनाम महाराष्ट्र राज्य (2014) मामले में सर्वोच्च न्यायालय ने **सोलह सिद्धांत** निर्धारित किए तथा प्रत्येक मामले में स्वतंत्र जाँच को अनिवार्य बनाया।
- While these remain the legal benchmark, they have not been systematically applied in the State.
  यद्यपि ये सिद्धांत अभी भी विधिक मानक बने हुए हैं, किन्तु राज्य में उनका व्यवस्थित रूप से अनुप्रयोग नहीं किया गया है।

U.S. moots 12.5% tariff on India for failure to enforce 'forced labour' regulations

GS III: Economy

T.C.A. Sharad Raghavan
WASHINGTON

The U.S. government has proposed to levy a tariff of 12.5% on imports from 54 countries, including India, that it says have "failed to impose and effectively enforce" prohibitions on the import of goods produced using forced labour.

In response, the Indian government has said it "remains engaged" with the U.S. government regarding this development as well as the finalisation of an Interim Agreement on trade.

The office of the U.S. Trade Representative (USTR) had, in March this year, launched an investigation under Section 301 of the U.S. Trade Act of 1974 to look into whether its trade partners were taking enough steps to stop the import of goods made using forced labour.

The latest tariff announcements, as part of this investigation, are not final as yet.

Countries, including India, can submit requests to take part in public hearings by June 22, submit written comments by July 6, and participate in the public hearings on July 7.

Tool to impose tariff

According to trade experts, investigations under Section 301 was seen as a tool for the U.S. to impose tariffs on its imports after the country's Supreme Court in February struck down the reciprocal tariffs – including the 50% levied on India – that had been imposed by U.S. President Donald Trump.

"The results of this investigation indicate that the acts, policies and practices of India related to the failure to impose and effectively enforce a forced labour import prohibition are unreasonable and burden or restrict U.S. commerce," the USTR report said.

The proposed tariffs put India in the same tariff bracket as several of its competitors, including Bangladesh, China, Malaysia, Thailand, and Vietnam.

The proposal by the USTR also includes a separate mechanism for textile and apparel products, under which a certain volume of imports from selected economies would be allowed to enter the U.S. at lower tariff rates.

According to Agneshwar Sen, trade policy leader at EY India, the impact of these tariffs on India could be multidimensional.

"In the near term, exporters in labour-intensive industries such as textiles, garments, carpets, leather products, and brassware could face at least an additional 10% levy under Section 301, adding to their existing tariff exposure," Mr. Sen said. "India should therefore submit detailed written representations by July 6 and participate proactively in the July 7 public hearing to challenge these conclusions," he added.

Govt. response

"India remains engaged with the U.S. on the matter as a part of Section 301 proceedings," the Ministry of Commerce and Industry said in a statement on Wednesday. "India is also parallelly engaged with the U.S. for finalisation of a framework agreement as was announced on February 2, 2026, and in accordance with the joint statement released on February 7, 2026," it added.

A negotiating team from the U.S. is currently in India on a three-day visit that will conclude on June 4.

According to the Ministry of Commerce and Industry, the purpose of the trip is to "finalise the details" pertaining to the Interim Agreement between the two countries and take forward the negotiations on a broader Bilateral Trade Agreement (BTA).

Blow-by-blow | A timeline of U.S. tariff-related events

- **Feb. 20, 2026:** U.S. Supreme Court scraps reciprocal tariffs. Trump imposes 10% 150-day tariffs on all imports
- **March 2026:** U.S. Trade Representative launches investigations on partners
- **June 1-4:** U.S. negotiators visit India to finalise trade deal
- **June 2:** USTR announces findings of investigtions related to forced labour

- **June 22:** Deadline to submit requests to take part in public hearings on the case
- **July 6:** Deadline to submit written comments
- **July 7:** Date of public hearings related to the investigation
- **July 24:** Expiry of 10% U.S. tariffs

04J6. U.S. moots 12.5% tariff on India for failure to enforce 'forced labour' regulations

भारत द्वारा 'जबरन श्रम' नियमों को प्रभावी ढंग से लागू न करने पर अमेरिका ने 12.5% टैरिफ का प्रस्ताव रखा

- The **U.S. government** has proposed to levy a **tariff of 12.5%** on imports from **54 countries**, including **India**, that it says have "failed to impose and effectively enforce" prohibitions on the import of goods produced using **forced labour**.

अमेरिकी सरकार ने **भारत** सहित **54 देशों** से आयात पर **12.5% टैरिफ** लगाने का प्रस्ताव दिया है, जिनके बारे में उसका कहना है कि वे **जबरन श्रम (Forced Labour)** से बने उत्पादों के आयात पर प्रतिबंधों को लागू करने और प्रभावी रूप से प्रवर्तित करने में विफल रहे हैं।

- The office of the **U.S. Trade Representative (USTR)** had, in **March** this year, launched an investigation under **Section 301 of the U.S. Trade Act of 1974** to look into whether its trade partners were taking enough steps to stop the import of goods made using **forced labour**.

यू.एस. ट्रेड रिप्रेजेंटेटिव (USTR) के कार्यालय ने इस वर्ष **मार्च** में **यू.एस. ट्रेड एक्ट, 1974 की धारा 301** के तहत यह जांच शुरू की थी कि उसके व्यापारिक साझेदार **जबरन श्रम** से बने उत्पादों के आयात को रोकने के लिए पर्याप्त कदम उठा रहे हैं या नहीं।

- According to trade experts, investigations under **Section 301** were seen

wer, Padleyganj Road, Gorakhpur
as.in
2488

as a tool for the U.S. to impose tariffs on its imports after the country's **Supreme Court** in **February** struck down the reciprocal tariffs — including the **50%** levied on India — that had been imposed by **U.S. President Donald Trump**.

व्यापार विशेषज्ञों के अनुसार, **धारा 301** के तहत जांच को अमेरिका द्वारा आयात पर टैरिफ लगाने के एक साधन के रूप में देखा गया, क्योंकि देश के **सर्वोच्च न्यायालय** ने **फरवरी** में **भारत पर लगाए गए 50% टैरिफ** सहित **डोनाल्ड ट्रंप** द्वारा लगाए गए पारस्परिक टैरिफ को निरस्त कर दिया था।

- The proposed tariffs put **India** in the same tariff bracket as several of its competitors, including **Bangladesh, China, Malaysia, Thailand, and Vietnam**.

प्रस्तावित टैरिफ **भारत** को उसके कई प्रतिस्पर्धी देशों जैसे **बांग्लादेश, चीन, मलेशिया, थाईलैंड और वियतनाम** के समान टैरिफ श्रेणी में रखता है।

- "In the near term, exporters in labour-intensive industries such as **textiles, garments, carpets, leather products, and brassware** could face at least an additional **10% levy** under Section 301, adding to their existing tariff exposure," Mr. Sen said.

श्री सेन ने कहा कि निकट भविष्य में **वस्त्र, परिधान, कालीन, चमड़ा उत्पाद और पीतल उद्योग** जैसे श्रम-प्रधान क्षेत्रों के निर्यातकों को धारा 301 के तहत कम से कम **10% अतिरिक्त शुल्क** का सामना करना पड़ सकता है, जिससे उनका वर्तमान टैरिफ बोझ और बढ़ जाएगा।

GS III: Economy

Base and framework

Industrial fundamentals have remained resilient, but are not broad-based

Earlier this week, the Ministry of Statistics and Programme Implementation released the latest Index of Industrial Production (IIP), a key barometer of India's industrial health. The April 2026 print assumes added significance as it is the first release under the new 2022-23 base series and the second full month following the U.S.-Israeli war on Iran. Industrial output grew 4.9% year-on-year in April. While direct comparisons with earlier data should be treated with caution given the extensive revisions to the index's basket, weights and methodology, the numbers suggest that India's industrial fundamentals have remained relatively resilient despite disruptions to global oil and gas supply chains. A granular reading, however, reveals that this resilience is far from broad-based. Capital goods output expanded by a robust 16% year-on-year, reflecting the continuing effects of elevated public capital expenditure and infrastructure spending. By contrast, consumer durables output grew only 4.3%, while consumer non-durables expanded by a modest 2.8%, suggesting that rising fuel and energy costs may be exerting pressure on household consumption.

More significant than the headline growth number, however, is the extensive overhaul of the IIP itself. The revised series seeks to better reflect the structure of a rapidly changing economy. New products and sectors have been incorporated and several obsolete items dropped. A fourth major sector – water supply, sewerage and waste management – has been introduced with a weight of 2.02%. The electricity category has been expanded into Electricity and Gas Supply, with its weight rising to 10.87% from 7.99% earlier. Manufacturing remains the dominant component of the index, though its weight has declined marginally to 76.06% from 77.63%. More notable is the reduction in the weight of mining and quarrying to 11.05% from 14.37%. These shifts suggest that the importance of value-added infrastructure and utility services in gauging industrial activity has expanded, while the relative significance of primary resource extraction has diminished. Together, these changes better capture India's emergence as a components and value-added manufacturing hub integrated into global supply chains. Most importantly, the government has indicated its intention to move towards a chain-linked framework with more frequent updates to sectoral weights. Such a system would allow official statistics to better keep pace with structural changes in the economy, making the IIP a more accurate and timely gauge of industrial health.

04J6. Base and framework
आधार और रूपरेखा

- Earlier this week, the **Ministry of Statistics and Programme Implementation** released the latest **Index of Industrial Production (IIP)**, a key barometer of India's industrial health.

इस सप्ताह के प्रारम्भ में **सांख्यिकी एवं कार्यक्रम कार्यान्वयन मंत्रालय** ने नवीनतम **औद्योगिक उत्पादन सूचकांक (IIP)** जारी किया, जो भारत के औद्योगिक स्वास्थ्य का एक प्रमुख संकेतक है।

- The April 2026 print assumes added significance as it is the first release under the new **2022-23 base series** and the second full month following the **U.S.-Israeli war on Iran**.

अप्रैल 2026 का आँकड़ा विशेष महत्व रखता है क्योंकि यह नई **2022-23 आधार श्रृंखला** के अंतर्गत पहला प्रकाशन है तथा **ईरान पर अमेरिका-इज़राइल युद्ध** के बाद का दूसरा पूर्ण माह भी है।

- **Capital goods** output expanded by a robust **16% year-on-year**, reflecting the continuing effects of elevated public capital expenditure and infrastructure spending.

पूँजीगत वस्तुओं के उत्पादन में **वर्ष-दर-वर्ष 16%** की मजबूत वृद्धि दर्ज की गई, जो उच्च सार्वजनिक पूँजीगत व्यय तथा अवसंरचना निवेश के निरंतर प्रभाव को दर्शाती है।

- By contrast, **consumer durables** output grew only **4.3%**, while **consumer non-durables** expanded by a modest **2.8%**, suggesting that rising fuel and energy costs may be exerting pressure on household consumption.

इसके विपरीत, **उपभोक्ता टिकाऊ वस्तुओं** के उत्पादन में केवल **4.3%** की वृद्धि हुई, जबकि **उपभोक्ता गैर-टिकाऊ वस्तुओं** में मात्र **2.8%** की वृद्धि

rd Floor, KV Tower, Padleyganj Road, Gorakhpur
nfo@patrioticias.in
mber : 9971932488
atrioticias.in

दर्ज की गई, जो यह संकेत देती है कि ईंधन एवं ऊर्जा लागत में वृद्धि घरेलू उपभोग पर दबाव डाल रही हो सकती है।

- New products and sectors have been incorporated and several obsolete items dropped.
  नई वस्तुओं और क्षेत्रों को इसमें सम्मिलित किया गया है तथा कई अप्रासंगिक मदों को हटा दिया गया है।
- A fourth major sector — **water supply, sewerage and waste management** — has been introduced with a weight of **2.02%**.
  एक चौथा प्रमुख क्षेत्र — **जलापूर्ति, सीवरेज एवं अपशिष्ट प्रबंधन** — को **2.02%** भार के साथ सम्मिलित किया गया है।
- The electricity category has been expanded into **Electricity and Gas Supply**, with its weight rising to **10.87%** from **7.99%** earlier.
  विद्युत श्रेणी का विस्तार कर उसे **विद्युत एवं गैस आपूर्ति** के रूप में शामिल किया गया है, जिसका भार पूर्व के **7.99%** से बढ़कर **10.87%** हो गया है।
- **Manufacturing** remains the dominant component of the index, though its weight has declined marginally to **76.06%** from **77.63%**.
  विनिर्माण क्षेत्र अभी भी सूचकांक का प्रमुख घटक बना हुआ है, यद्यपि इसका भार **77.63%** से घटकर **76.06%** हो गया है।
- More notable is the reduction in the weight of **mining and quarrying** to **11.05%** from **14.37%**.
  इससे भी अधिक उल्लेखनीय **खनन एवं उत्खनन** क्षेत्र के भार में कमी है, जो **14.37%** से घटकर **11.05%** हो गया है।
- These shifts suggest that the importance of value-added infrastructure and utility services in gauging industrial activity has expanded, while the relative significance of primary resource extraction has diminished.
  ये परिवर्तन संकेत देते हैं कि औद्योगिक गतिविधियों के आकलन में मूल्य-वर्धित अवसंरचना एवं उपयोगिता सेवाओं का महत्व बढ़ा है, जबकि प्राथमिक संसाधन निष्कर्षण का सापेक्ष महत्व घटा है।
- Together, these changes better capture India's emergence as a components and value-added manufacturing hub integrated into global supply chains.
  सामूहिक रूप से ये परिवर्तन भारत के वैश्विक आपूर्ति शृंखलाओं से एकीकृत घटक एवं मूल्य-वर्धित विनिर्माण केंद्र के रूप में उभरने को अधिक प्रभावी ढंग से प्रतिबिंबित करते हैं।
- Most importantly, the government has indicated its intention to move towards a **chain-linked framework** with more frequent updates to sectoral weights.
  सबसे महत्वपूर्ण बात यह है कि सरकार ने क्षेत्रीय भारों के अधिक नियमित अद्यतन के साथ **शृंखला-संबद्ध ढाँचे (Chain-linked Framework)** की ओर बढ़ने की अपनी मंशा व्यक्त की है।
- Such a system would allow official statistics to better keep pace with structural changes in the economy, making the IIP a more accurate and timely gauge of industrial health.
  ऐसी प्रणाली आधिकारिक आँकड़ों को अर्थव्यवस्था में होने वाले संरचनात्मक परिवर्तनों के साथ बेहतर सामंजस्य स्थापित करने में सक्षम बनाएगी, जिससे **IIP** औद्योगिक स्वास्थ्य का अधिक सटीक एवं समयोचित संकेतक बन सकेगा।

How India scaled its startup industry from 2016 to 2025

The Startup India scheme has been a success due to a supportive policy environment, robust startup growth, and a positive investment climate

GS III: Economy

DATA POINT

Thillai Rajan A.
Chinni Chaitanya
Vamika Perumal

The Indian startup economy has truly come of age in the 10 years since Prime Minister Narendra Modi gave the clarion call during his Independence Day address on August 15, 2015, to make India the "Number 1" country in startups, and thereby sowed the seeds of significant directional change.

The three traits that make startups different from conventional businesses are an emphasis on innovation, the use of technology, and market opportunity. To distinguish startups from other businesses, the Department for Promotion of Industry and Internal Trade (DPIIT) started recognising companies that aligned with government guidelines as startups. Despite DPIIT recognition not being mandatory for startups to operate, there has been a significant growth in startups applying for its recognition. From 288 in 2016, which was just 3% of the total startups functioning then, the DPIIT's coverage has increased to 77% in 2025. The growing willingness to join the formal startup ecosystem has been an important measure of success for India's startup story.

Another indicator of success has been the penetration of startup culture across the length and breadth of the country. There has been a remarkable shift in startup formation from Tier 1 cities to Tier 3 towns. In 2016, Tier 1 cities dominated the startup landscape, accounting for about 65% of the total startups set up that year, while Tier 3 towns accounted for only about 15%. In 2020, these shares changed to 49% and 27%, respectively. However, the biggest change happened in 2025, when Tier 1 cities accounted for just 18% of new startups, whereas Tier 3 towns made up for 71%. This shift highlights the spread of innovation beyond major urban hubs.

The age and gender distributions of startup founders reveal a strong presence of the youth. A substantial portion of founders across both genders (approximately 66% are male founders and 59% female founders) are under 40. The embrace of entrepreneurship early in one's career signals a favourable and supportive ecosystem for startups. The data shows that women embark on their entrepreneurial journeys relatively later and their proportion increases notably with age. While women account for about 21% of the founders in the under-30 age group, they account for 33% in the 50-plus age group. Creating a supportive environment for women to pursue entrepreneurship has been an important policy imperative. The Compound Annual Growth Rate (CAGR) of women founders stood at 20%, compared with 14% for men, underlining the strong trend of women increasingly pursuing entrepreneurship.

The funding landscape

A surge in the confidence to invest in Indian startups has been yet another defining feature of the 2016-25 period. In 2016, India had 10,000 startups, of which 2,000 were funded ventures. The numbers have increased dramatically in 2025 with a total of 2,50,000 startups, of which 75,000 are funded ventures. This is an increase of 25-fold and 38-fold respectively.

Trends indicate that a supportive policy environment, robust startup growth, and a positive investment climate in the first 10 years of the Startup India scheme have created several moments of success. The decade from 2016 to 2025 has firmly placed India among the top four in the league of startup nations.

Cabinet approves ₹10,000 cr. ATF price stabilisation fund

One-time budgetary support to oil companies is aimed at backing airlines in the backdrop of escalating jet fuel prices due to the West Asia conflict; fund to be offered as interest-free advances

GS III: Economy

The Hindu Bureau
NEW DELHI

Seeking to cushion airlines in the backdrop of escalating jet fuel prices due to the West Asia conflict, the Union Cabinet on Wednesday approved a one-time budgetary support of ₹10,000 crore to oil-marketing companies (OMCs) towards a price stabilisation fund.

The budgetary support would be made available to scheduled airlines in India for both domestic and international operations and would be provided in the form of interest-free advances to OMCs.

Union Petroleum Minister Hardeep Singh Puri said that the price stabilisation fund would help stabilise (aviation turbine fuel) ATF prices in the backdrop of the West Asia conflict.

"The fund will help stabilise ATF prices for scheduled Indian carriers and will prevent disruption of airline operations while protecting air passengers from fare spikes driven by the geopolitical conflict involving several energy producers," read his social media post.

The budgetary support would function like a self-sustaining revolving fund.

The Cabinet has sought that once the international ATF prices moderate, the differential amount shall be recovered from the oil-marketing companies (OMCs) and returned to the government exchequer.

It would be implemented through an MoU between OMCs and participating airlines and would mandate the latter to procure ATF only from OMCs - either for up to three years or until the advance amount is fully recovered.

Under-recovery

Officials at the Union Petroleum Ministry had informed on Monday that State-run OMCs were presently incurring an under-recovery of ₹30 on every litre of ATF meant for domestic scheduled carriers.

Further, the government observed that international ATF prices surged nearly 2.5 times from ₹60.5 per litre in March to ₹142 per litre in May.

ATF prices for domestic scheduled carriers were hiked 9% April 1 this year and have been kept unaltered since then.

In fact, Air India, along with its low-cost subsidiary Air India Express and Indigo, together cut down 250 daily domestic flights from June amid rising prices of jet fuel. The move was expected to further escalate airfares.

The government informed that to protect air commuters from a potential sudden price shock, it had capped the ATF prices at ₹75.6 per litre.

'No adequate cushion'

However, the continuing crisis did not offer adequate cushion.

"ATF accounts for nearly 40% of airline operating costs and during periods of extreme fuel volatility, can constitute up to 60% of total operating expenditure," it said.

Cushioning effect

Petroleum Minister Hardeep Singh Puri says the price stabilisation fund will prevent disruption of airline operations and protect air passengers from fare spikes

- The scheme will be implemented via an MoU between OMCs and participating airlines
- Airlines can procure ATF only from those OMCs — either for up to three years or until advance amount is fully recovered
- Once international ATF prices moderate, differential amount will be recovered from OMCs and returned to govt. exchequer
- The budgetary support would function like a self-sustaining revolving fund

Crude oil futures hit record high of ₹9,260 per barrel

NEW DELHI

Crude oil prices surged by ₹310 to a fresh record high of ₹9,260 per barrel in futures trade on Wednesday, tracking strong gains in global benchmarks amid the escalating tensions in West Asia. On the MCX, the most-active June crude oil contract climbed by ₹310, or 3.46%, to an all-time high of ₹9,260 per barrel. "Crude oil extended its rally for a third consecutive session on Wednesday as regional escalation intensified overnight," brokerage firm Kotak Neo said. PTI

Refined fuel exports fall to lowest since 2022

NEW DELHI

India's exports of refined petroleum products fell to about 9,30,000 bpd in May, their lowest level since October 2022, as refinery maintenance, changing production priorities and stronger domestic demand curtailed overseas shipments. Exports declined to around 9,30,000 bpd, down to levels last seen when shipments averaged 9,26,000 bpd in October 2022, reflecting a combination of lower refinery throughput and growing focus on supply to the domestic market, according to data analytics firm Kpler. PTI

04J6. Cabinet approves ₹10,000 cr. ATF price stabilisation fund
कैबिनेट ने ₹10,000 करोड़ के ATF मूल्य स्थिरीकरण कोष को मंजूरी दी

- **One-time budgetary support to oil companies is aimed at backing airlines in the backdrop of escalating jet fuel prices due to the West Asia conflict; fund to be offered**

as interest-free advances.

तेल कंपनियों को एकमुश्त बजटीय सहायता का उद्देश्य पश्चिम एशिया संघर्ष के कारण बढ़ती जेट ईंधन कीमतों की पृष्ठभूमि में एयरलाइनों को समर्थन देना है; यह कोष ब्याज-मुक्त अग्रिम के रूप में प्रदान किया जाएगा।

- Seeking to cushion airlines in the backdrop of escalating **jet fuel prices** due to the **West Asia conflict**, the **Union Cabinet** on Wednesday approved a one-time budgetary support of **₹10,000 crore** to oil-marketing companies (**OMCs**) towards a **price stabilisation fund**.

Wheat procurement surges 17% to 35 million tonnes, exceeds 2026-27 season goal

GS III: Economy

Press Trust of India
NEW DELHI

The government's wheat procurement rose 17% to over 35 million tonnes (MT) in the 2026-27 rabi marketing season, surpassing both the target of 34.5 MT and the previous year's procurement of 30 MT, a senior Food Ministry official said on Wednesday.

"Wheat procurement crossed 35 million tonnes so far this season. We have exceeded the target. Procurement in major producing states has been completed," the official said.

The Food Corporation of India (FCI) and State agencies procure wheat at the minimum support price (MSP) to meet the National Food Security Act and other welfare schemes' needs.

Bumper harvest: Procurement in major producing states has been completed, says a Food Ministry official. PTI

Lower mandi rates

Higher procurement was aided by mandi rates ruling below the MSP on robust domestic production of 120.65 MT, sustained despite localised crop damage from unseasonal rainfall and hailstorms.

State-wise, Punjab led procurement at 12.1 MT, up from 11.9 MT in the previous season. Madhya Pradesh showed a sharp jump to 10.4 MT from 7.8 MT. While wheat procurement season runs from April through March, much of the procurement is done in the first few months itself.

RBI debunks reports on gold sale, says reserves are 'steady at 880.52 tonnes'

GS III: Economy

Press Trust of India
MUMBAI

Debunking reports of gold sale, the Reserve Bank of India (RBI) said there is no change in the physical stock of gold, which remains unchanged at 880.52 tonne.

The clarification from the RBI comes following reports it may have sold gold amounting to approximately $12 billion to shield foreign-currency reserves from the impact of the ongoing conflict in West Asia.

"The RBI emphasises that these reports are not correct," the central bank said in a statement.

Members of the public are, therefore, advised to rely on official information published by the RBI from time to time in such matters, it said.

Clearing the air: The clarification comes amid reports that RBI may have sold gold worth $12 billion. REUTERS

Once considered among Asia's more stable currencies, the rupee has now become one of the worst-performing emerging market currencies this year, pressured by a toxic mix of expensive oil, capital outflows, widening trade deficits and a surging U.S. dollar. It has depreciated about 7% so far in 2026 and is down roughly 6% since the outbreak of the Iran conflict in late February.

India's forex reserves dropped $7.511 billion to $681.384 billion during the week ended May 22. India's forex reserve stood at $686.801 billion in the week to January 2, 2026.

S. America's stealthy ascent to key crude oil swing supplier

Beyond barriers: The region has delivered the largest increase in oil exports of any producing bloc. REUTERS

GS III: Economy

Reuters

LITTLETON, COLORADO

While oil markets fixate on the disruptions to West Asia exports and surging U.S. supply in 2026, South America is quietly emerging as a key new source of global crude flows.

Led by Brazil, Guyana and Venezuela, the region has delivered the largest increase in oil exports of any producing bloc so far this year, reshaping global trade patterns and reinforcing the Atlantic basin's role in global supply.

The shift has been gradual, dispersed and largely uncoordinated. But in aggregate, it is turning South America into a de facto swing supplier hiding in plain sight.

The collapse in crude exports from the Middle East so far this year has rightly dominated oil market attention. Producers in the region have accounted for around 43% of all seaborne oil exports over the past decade, data from commodities intelligence firm Kpler shows, anchoring global crude trade.

But the near-total closure of the Strait of Hormuz since March has slashed shipments from the region by more than a quarter during January to May compared to the year before,leaving a supply shortfall of roughly 675 million barrels.

That gap is too large for any single producer to quickly replace, forcing markets to lean heavily on inventories. It has also amplified the importance of rising supply elsewhere-notably from South America. Several exporters have lifted shipments this year, helping to offset part of the disruption. But nowhere has the increase been more pronounced than in South America, where total exports have posted their largest ever year-over-year gain, rising by around 155 million barrels to eclipse the growth of all other regions combined.

Rapid rise

Among the 10 nations to increase crude oil exports the most so far in 2026, the United States ranks top, registering a nearly 112-million-barrel increase during January to May compared to the same months in 2025, according to Kpler.

However, South America's contribution has been both broader and more structurally significant. Brazil, Guyana and Venezuela have posted the next largest annual increases in crude shipments this year, collectively adding around 145 million barrels.

Including a further 12 million barrels from Argentina, gains from those key nations exceed 157 million barrels compared to the year before.

Some small export volume declines this year from Colombia, Ecuador and Peru have curbed South America's total expansion to155 million barrels, but the total shipped out from the region from January to May remains a record 787 million barrels.

That compares to around 430 million barrels for the same period in 2021, and so marks an 84% increase over the past five years.

Two nations have been key drivers of that regional expansion: Brazil and Guyana.

- India's **forex reserve** stood at **$686.801 billion** in the week to **January 2, 2026**.

2 जनवरी 2026 को समाप्त सप्ताह में भारत का **विदेशी मुद्रा भंडार 686.801 अरब डॉलर** था।

04J6. S. America's stealthy ascent to key crude oil swing supplier

कच्चे तेल के प्रमुख संतुलनकारी आपूर्तिकर्ता के रूप में दक्षिण अमेरिका का शांत उदय

- Led by **Brazil, Guyana and Venezuela**, the region has delivered the largest increase in **oil exports** of any producing bloc so far this year, reshaping global trade patterns and reinforcing the **Atlantic basin's** role in global supply.

ब्राज़ील, गुयाना और वेनेजुएला के नेतृत्व में इस क्षेत्र ने इस वर्ष अब तक किसी भी उत्पादक समूह की तुलना में **तेल निर्यात** में सबसे अधिक वृद्धि दर्ज की है, जिससे वैश्विक व्यापार पैटर्न बदल रहे हैं और वैश्विक आपूर्ति में **अटलांटिक बेसिन** की भूमिका मजबूत हो रही है।

- But in aggregate, it is turning **South America** into a de facto **swing supplier** hiding in plain sight.

लेकिन समग्र रूप से यह **दक्षिण अमेरिका** को एक वास्तविक **संतुलनकारी आपूर्तिकर्ता (Swing Supplier)** में बदल रहा है।

- Among the 10 nations to increase **crude oil exports** the most so far in **2026**, the **United States** ranks top, registering a nearly **112-million-barrel increase** during January to May compared to the same months in **2025**, according to **Kpler**.

Kpler के अनुसार, **2026** में अब तक **कच्चे तेल के निर्यात** में सबसे अधिक वृद्धि करने वाले 10 देशों में **संयुक्त राज्य अमेरिका** शीर्ष पर है, जिसने **2025** की समान अवधि की तुलना में जनवरी से मई के दौरान लगभग **112 मिलियन बैरल** की वृद्धि दर्ज की।

- **Brazil, Guyana and Venezuela** have posted the next largest annual increases in crude shipments this year, collectively adding around **145 million barrels**.

ब्राज़ील, गुयाना और वेनेजुएला ने इस वर्ष कच्चे तेल की आपूर्ति में अगली सबसे बड़ी वार्षिक वृद्धि दर्ज की है, और संयुक्त रूप से लगभग **145 मिलियन बैरल** जोड़े हैं।

- Including a further **12 million barrels** from **Argentina**, gains from those key nations exceed **157 million barrels** compared to the year before.

अर्जेंटीना से अतिरिक्त **12 मिलियन बैरल** जोड़ने पर, इन प्रमुख देशों की कुल वृद्धि पिछले वर्ष की तुलना में **157 मिलियन बैरल** से अधिक हो जाती है।

- Some small export volume declines this year from **Colombia, Ecuador and Peru** have curbed South America's total expansion to **155 million barrels**, but the total shipped out from the region from January to May remains a record **787 million barrels**.

कोलंबिया, इक्वाडोर और पेरू से निर्यात में कुछ कमी ने दक्षिण अमेरिका की कुल वृद्धि को **155 मिलियन बैरल** तक सीमित किया है, फिर भी जनवरी से मई के बीच क्षेत्र का कुल निर्यात रिकॉर्ड **787 मिलियन बैरल** रहा।

AI unlikely to be the demand booster that copper bulls expect

GS III: Economy

Reuters
LONDON

From the Bronze Age to the AIage, copper is again at the heart of the latest big investment craze.

The rationale is simple. Data centers need a lot of wiring,cooling and power, which means they need a lot of copper. AI data centers need even more.

A crypto data center requires 21 metric tons of copper per megawatt installed, while an AI training data center in China has a copper intensity of 47 tons, according to S&P Global Market Intelligence.

The escalating global AI arms race will undoubtedly boost demand for copper. But by how much?

S&P Global forecasts usage in data centers and associated infrastructure will rise from 1.1 million tons in 2025 to 2.5million tons in 2040. There are, though, a lot of "buts" lurking in that forecast.

Demand could be as high as 2.7 million tons or as low as 1.7million, depending on the interaction of multiple fast-changing variables. As the authors of "Copper in the Age of AI" put it, the "wide span underscores both the uncertainty and the scale of the challenge ahead."

The delivery gap

One key variable in assessing likely copper demand is thescale of AI data center expansion. Many of the new megawatts of announced AI computing capacity are "bragawatts", according to a study released by the Oxford Smith School and financial broker Marex Group.

Wide span: Raw copper from Zambia awaits export in a warehouse at Newlyn Terminal at Bayhead at the port in Durban. REUTERS

While media and markets are expecting and pricing a rapid exponential ramp-up in AI infrastructure, the outcome is likely to be "a roll-out that is delayed, lumpy, and constrained by physical realities." The biggest hurdle is grid connectivity. A data center can be built in 18 to 24 months but the average U.S. waiting time for a grid connection was four years between 2018 and 2023.

That assumes there is enough power in the first place. Ireland built so many data centers that by 2021 the sector's share of national energy consumption had risen to over 20%,threatening to overwhelm the country's energy system.

The Irish grid operator imposed a de facto four-year moratorium on new applications, which has only just been lifted,albeit with strict new conditions.

Throw into the mix long lead times for essential equipment such as transformers and a shortage of specialized labour and there is a growing gap between announced and delivered AI computing capacity, according to the Smith study. Copper, it warns, is in danger of falling down that gap. Quantifying how much copper is used in data centers is also a fast-moving target.

The battle for AI supremacy is one of computing power, and as chips evolve, so must the architecture of rack design and wiring.

S&P Global notes there is already a shift underway from copper to fiber optics in the interconnect cabling between processor racks.

This could result in copper intensity in data centers falling by 4 or 5 tons per megawatt installed, not a trivial change given the overall 30- to 40-ton range deployed in non-crypto data centers.

More fundamentally, though, chip company Nvidia argues that even copper will be challenged to deliver the low latency and high bandwidth of next-generation AI centers.

Using traditional low voltages would necessitate "an unsustainable volume of copper cabling."

Nvidia is proposing a transition to 800 volts, which means the same wire gauge can carry 157% more power. A simpler set-up also means fewer copper conductors and smaller connectors.

Reducing copper usage is both a cost consideration and, the company argues, a critical pathway to ever-increasing rack power.

Material wars

Ardent copper bulls argue that such is the looming deficit in copper that the metal could itself become a bottleneck in the roll-out of AI capacity. That may be more true of some of the other metals that go into connecting physical and virtual worlds.

Data centers are a sink for all sorts of minerals, 60 to 70 tons of them per megawatt installed, according to the World Economic Forum.

There's copper, but also aluminium, cobalt, nickel, tin, gold, silver, germanium and gallium and, of course, a smattering of the increasingly ubiquitous rare earth metals.

Germanium and gallium are more likely to pose a materials bottleneck than copper. Western supply of both metals is acutely tight after China imposed export restrictions in 2023.

Big Tech is competing for limited supply with both the U.S. Pentagon and the EU, which is looking to build a strategic metals stockpile. It's by no means certain it will win.

Brazil takes a historic HDI leap with focused planning and public spending

UN report reveals the country's cash-transfer scheme has played a key role in raising its Human Development Index score from 0.744 in 2012 to 0.805 in 2024, on a scale from 0 to 1; as Brazil enters election cycle, the far-right narrative that the scheme discourages people from working draws backlash

GS III: Economy

NEWS ANALYSIS

Shobhan Saxena
SAO PAULO

Brazilian President Luiz Inacio Lula da Silva and First Lady Rosângela da Silva take part in an event via videoconference on the 20th anniversary of Bolsa Família programme in Brasilia in October 2023. AFP

Amid a heated debate about Brazil's flagship cash-transfer scheme last week, a United Nations report revealed that the country had made a giant leap on the Human Development Index (HDI) scale. The controversy erupted after a television presenter, Luciano Huck, said that Bolsa Família programme "discourages the poor from working". As Mr. Huck was being fact-checked on social media, the UN Development Programme report revealed that the scheme had played a key role in Brazil raising its HDI score from 0.744 in 2012 to 0.805 in 2024.

On the UN scale, which ranges from 0 to 1, the score of 0.805 places Brazil in the category of "very high human development." Among the Afro-Brazilians, the HDI grew by 10.3% over 12 years, almost twice the rate for the Whites. "Achieving this positive result is not by chance; it is the result of strong public policies and an inclusive national project focused on combating inequalities," said Guilherme Boulos, the Federal Minister for Social Development, at the launch of the report in Brasilia.

The index measures indicators related to health and longevity, education, and income generation, with results broken down by race, gender, and region at the municipal level across all 26 states of Brazil. When the UNDP began calculating the index 30 years ago, Brazil was in the category of low human development. The steady rise, according to the government, has been driven by sustained planning and public spending. "We have made progress in education. We have witnessed success because of an expansion of public healthcare system, income distribution, real increase in the minimum wages and programmes such as Bolsa Família," said the Minister.

Bolsa Família, launched in 2003 during President Lula da Silva's first term, has inspired similar schemes worldwide, including the National Rural Employment Guarantee Scheme in India in 2006. Walquiria Rego, a sociologist who has studied the programme for years, says its success stems from providing poor families with a regular income. "As families received money every month, their eating habits improved, hunger declined dramatically and Brazil was taken off the UN hunger map," she says.

Healthcare guarantee

From its launch in 2003 until 2023, Brazil has spent around US$ 81 billion on the scheme which has benefitted 49 million people. Extensive studies conducted by Prof. Rego show that the programme's impact goes beyond nutrition as, with a steady source of income, poor families were able to furnish their homes and live with dignity. "The changes have been profound: people became better nourished, healthier and more integrated into social and economic life," says Prof. Rego, whose book 'Voices from Bolsa Família' is considered a landmark work.

Besides cash assistance, Brazil's unified health system, or SUS, has played a crucial role in its HDI improvement. Brazil spends about 9.7% of its GDP of US$ 2.64 trillion on health, with SUS getting 4% of the amount. Guaranteed by the Constitution, Brazil's free and universal public healthcare system has been a major driver of rising life expectancy. Jorge Félix, a professor of gerontology at the University of São Paulo, says the system focused on child health in the early 1990s and eliminated the diseases like measles that were major causes of illness. "Access to healthcare has expanded across the country through a network of primary health centres. This is important because 75% of Brazilians depend on SUS," he says, adding that vaccination campaigns for children, adults, and access to treatments like cancer have improved life expectancy.

Both Bolsa Família and SUS had come under strain between 2018 and 2022 when the government of President Jair Bolsonaro imposed deep spending cuts. The weakening of the public health system, says Prof. Félix, proved catastrophic during the Covid-19 pandemic. "Beyond financing, strategic areas of SUS were also dismantled. As a result, Brazil entered the pandemic with reduced capacity to respond. Shortages of medicines and declining operational capacity left SUS significantly weakened just as Brazil confronted the biggest public health emergency," says the academic, whose book 'The Economics of Longevity' examines the healthcare challenges in Brazil.

In 2022, the last year of Bolsonaro presidency, the country's HDI had sunk low. In 2023, when Mr. Lula returned to the presidency for his third term, the government restored funding for SUS and Bolsa Família, bringing the momentum back into Brazil's social transformation. The gains have been particularly visible in the historically poorer Northeast region. "Bolsa Família stimulated commerce in small municipalities across the Northeast because the money circulated locally, generating jobs and creating opportunities for small businesses," says Prof. Rego.

A key reason for Bolsa Família's success is that payments are made directly to women, particularly mothers. This policy, says Prof. Rego, has made profound impact on families. "Women are now seen as the people responsible for food and healthcare for their children. It was not simply a cash-transfer plan to alleviate poverty. It also promoted citizenship and dignity for some of the poorest women in Brazil, thus making a significant contribution to human development and social justice," says Prof. Rego.

Election rhetoric

While Brazil's HDI figures are in sync with the country's commitments to the UN's 2030 goals, experts warn against complacency. "If the State stops assisting the vulnerable and investing in SUS, the risk of social regression remains high," says Prof. Felix.

As Brazil enters an election cycle, the far-right circles are spreading false stories about how Bolsa Família discourages people from working. Yet studies show that about 61% of people receiving Bolsa Família in 2014 had left the programme by 2025. Because of its positive impact on human development, Mr. Luciano Huck's remarks triggered a backlash, particularly in the politically-important Northeast, which has benefitted the most from the scheme.

With the UN report giving a timely boost to President Lula, the beneficiaries of social programmes are not in a mood to accept any argument against the policies which have lifted Brazil into the zone of very high human development.

A liver protein triggered by exercise reversed memory loss in mice

After exercise, small molecules called exerkines are released by the liver, skeletal muscles, heart, and brain into the bloodstream; these include peptides, lipids, and hormones and mediate the beneficial effects of exercise, promoting cardiovascular fitness and improving metabolism

GS III: S&T

Sheetal Potdar

Exercise affects different parts of the body simultaneously. STEVEN LELHAM/UNSPLASH

As we grow older, our cognitive abilities begin to wane. We forget names and places, lose trains of thought, and become creatures of habit. A key to overcoming these ageing-induced cognitive deficits may be exercise.

"Exercise improves cardiovascular fitness, glucose metabolism, insulin sensitivity, blood pressure, lipid profiles, sleep, mood, and immune function," Atefe Tari, a researcher studying exercise and brain health at the Norwegian University of Science and Technology and St. Olav's University Hospital, said.

"While all of these can influence brain health, exercise also affects the brain more directly by many different processes, including changes in signaling molecules."

A new study published in *Cell* has reported how a signal released by the liver after exercise reduces cognitive decline due to ageing and Alzheimer's disease in mice.

Exerkines to the rescue

After exercise, small molecules called exerkines are released by the liver, skeletal muscles, heart, and brain into the bloodstream. These include peptides, lipids, hormones, and nucleic acids. These exerkines mediate the beneficial effects of exercise, including promoting cardiovascular fitness and improving metabolism, throughout the body.

In the study, Gregor Bieri and colleagues at the University of California, San Francisco, examined the mechanism of action of one such exerkine produced by the liver: GPLD1.

The researchers increased the levels of GPLD1 in the livers of older mice that had exercised – voluntarily running on wheels, like a treadmill. Old mice that could not exercise because their wheels had been locked had lower levels of GPLD1 in their livers.

Next, the researchers tested the cognitive abilities of young and old mice. Young mice performed better at a spatial memory test compared to old mice. The test was to find a platform hidden in a pool of water. Young mice made fewer errors and found the platform sooner compared to their older peers. The young mice also preferred novel objects instead of familiar ones and would readily explore novel locations, while old mice showed no such preferences.

Importantly, these cognitive deficits were reduced in old mice whose livers were injected with GPLD1, showing that GPLD1 could mitigate ageing-induced cognitive decline.

Protective barrier

GPLD1 is an enzyme that breaks down hundreds of proteins on cell surfaces. Based on this function, the authors focused on the blood-brain barrier in mice - a network of blood vessels and specialised cells that surround the brain.

"The blood-brain barrier tightly regulates the signals and nutrients that get shuttled between the brain and blood," Dr. Bieri, the lead author of the study, explained.

As we age, the barrier accumulates proteins that make it leaky. The authors found one such protein, called TNAP, to be highly enriched in the blood-brain barriers of old mice, notably even around the hippocampus, the learning and memory centre of the brain.

"While we do not fully understand its role, we observed that TNAP drives inflammation and impairs the transport of factors from blood to brain," Dr. Bieri said.

He and his colleagues performed three experiments to tie the roles of TNAP and GPLD1. First, the scientists found that old mice that have more TNAP in their barriers also had leaky blood vessels. Next, young mice in which TNAP levels were artificially increased in the barrier surrounding the hippocampus showed leaky blood vessels and cognitive defects similar to old mice. Third, injecting GPLD1 in the livers of old mice, while also artificially increasing TNAP in the blood-brain barrier, nullified the beneficial effects of GPLD1 on cognitive function.

"A strength of this study is the combination of approaches that provides mechanistic evidence that TNAP is functionally involved in blood-brain barrier dysfunction and cognitive decline," Dr. Tari said.

Overall, these experiments showed that TNAP, which accumulates on the blood-brain barrier due to ageing, is broken down by GPLD1, an enzyme released by the liver after exercise.

Therapeutic potential for Alzheimer's

Given that ageing is a risk factor for neurodegenerative disorders like Alzheimer's disease and dementia, the authors next tested whether the GPLD1 intervention could reduce cognitive decline in a mouse model of Alzheimer's disease.

Dr. Tari, who was not involved in the study, exercised caution on this count, noting that "mouse models of Alzheimer's do not fully reproduce the complexity of the disease in humans, which develops over decades and involves vascular dysfunction, inflammation, metabolism, genetics, and lifestyle factors."

"When the blood-brain barrier becomes leaky, several things can happen that are relevant to Alzheimer's development," Dr. Tari said. "First, inflammatory molecules and other blood-derived factors can enter the brain more easily and activate immune responses. This causes chronic inflammation in the nerve cells which can accelerate disease processes."

"Secondly, if the blood-brain barrier function is impaired, the brain may become less efficient at clearing toxic proteins and maintaining its internal environment." Alzheimer's disease is characterised by the accumulation of toxic amyloid protein, which clump together to form plaques, leading to neurodegeneration and cognitive decline. These features are modelled in genetically modified mice by expressing human genes with multiple mutations that force the rapid buildup of amyloid protein.

The team allowed the Alzheimer's-modelled mice to run on wheels voluntarily for three months, after which their GPLD1 levels were higher, and their cognitive performance was notably improved, compared to Alzheimer's-modelled mice that did not exercise.

In another experiment, GPLD1 was injected into the livers of Alzheimer's-modelled mice. In these mice, TNAP levels in the blood-brain barrier were lower, the blood vessels were less leaky, there were fewer amyloid plaques, and cognitive dysfunction was reduced.

Experts said these results are encouraging and have clinical implications for Alzheimer's disease.

Dr. Bieri noted that "while a lot of research and potential therapeutic strategies have focused on the brain, recent antibody-based interventions are associated with side effects resulting from a breakdown of the blood-brain barrier. Thus, improving blood-brain barrier function could also improve the treatment efficacy of other therapeutic interventions."

"This study identifies a promising pathway that may become relevant for drug development or biomarker work," Dr. Tari added. "But it does not mean we are close to replacing exercise with a pill yet."

Parallel and convergent pathways

Exercise affects different parts of the body simultaneously. Brain function is also influenced by multiple factors. Recently, in another study, researchers from Seoul National University and the Korea Brain Research Institute found that exerkines secreted by skeletal muscles could improve cognitive performance by crossing the blood-brain barrier, unlike GPLD1. This exerkine was found to boost new neuron formation within the hippocampus. "The benefits of exercise are unlikely to be explained by a single molecule or pathway alone," Dr. Tari noted, adding that "the strength of exercise likely lies in its ability to trigger a coordinated, whole-body response."

Dr. Bieri said he sees clinical opportunity in the possibility of multiple exerkines working in tandem: "As potential new therapeutic strategies keep expanding, [the] discovery of complementary mechanisms will allow for a more personalised medicine approach. Future treatments will likely be combinatorial, tackling different cell types and hallmarks of ageing and disease."

- A key to overcoming these **ageing-induced cognitive deficits** may be **exercise**.
  इन **वृद्धावस्था-जनित संज्ञानात्मक कमियों** पर विजय पाने की एक महत्वपूर्ण कुंजी **व्यायाम** हो सकती है।
- "**Exercise** improves **cardiovascular fitness, glucose metabolism, insulin sensitivity, blood pressure, lipid profiles, sleep, mood, and immune function**," Atefe Tari, a researcher studying exercise and brain health at the Norwegian University of Science and Technology and St. Olav's University Hospital, said.
  "**व्यायाम हृदय-वाहिका स्वास्थ्य, ग्लूकोज़ उपापचय, इंसुलिन संवेदनशीलता, रक्तचाप, लिपिड प्रोफ़ाइल, नींद, मनोदशा तथा प्रतिरक्षा कार्य** में सुधार करता है," नॉर्वेजियन यूनिवर्सिटी ऑफ साइंस एंड टेक्नोलॉजी तथा सेंट ओलाव्स यूनिवर्सिटी हॉस्पिटल में व्यायाम एवं मस्तिष्क स्वास्थ्य का अध्ययन करने वाली शोधकर्ता एटेफे तारी ने कहा।
- These exerkines mediate the beneficial effects of exercise, including promoting cardiovascular fitness and improving metabolism, throughout the body.
  ये एक्सरकाइन्स शरीर में व्यायाम के लाभकारी प्रभावों का संचालन करते हैं, जिनमें हृदय-वाहिका स्वास्थ्य को बढ़ावा देना और उपापचय में सुधार करना शामिल है।
- In the study, Gregor Bieri and colleagues at the University of California, San Francisco, examined the mechanism of action of one such exerkine produced by the liver: **GPLD1**.
  अध्ययन में, यूनिवर्सिटी ऑफ कैलिफोर्निया, सैन फ्रांसिस्को के ग्रेगर बिएरी और उनके सहयोगियों ने यकृत द्वारा उत्पादित ऐसे ही एक एक्सरकाइन **GPLD1** की कार्यप्रणाली का परीक्षण किया।
- Old mice that could not exercise because their wheels had been locked had lower levels of GPLD1 in their livers.
  जिन वृद्ध चूहों के पहिए बंद कर दिए गए थे और जो व्यायाम नहीं कर सकते थे, उनके यकृत में GPLD1 का स्तर कम पाया गया।

Protective barrier
संरक्षक अवरोध

- GPLD1 is an enzyme that breaks down hundreds of proteins on cell surfaces.
  GPLD1 एक एंजाइम है जो कोशिकीय सतहों पर उपस्थित सैकड़ों प्रोटीनों को विघटित करता है।
- Based on this function, the authors focused on the **blood-brain barrier** in mice – a network of blood vessels and specialised cells that surround the brain.
  इस कार्य के आधार पर लेखकों ने चूहों में **रक्त-मस्तिष्क अवरोध** पर ध्यान केंद्रित किया, जो रक्त वाहिकाओं और विशेषीकृत कोशिकाओं का एक जाल है जो मस्तिष्क को घेरे रहता है।
- "The blood-brain barrier tightly regulates the signals and nutrients that get shuttled between the brain and blood," Dr. Bieri, the lead author of the study, explained.
  अध्ययन के प्रमुख लेखक डॉ. बिएरी ने बताया, "रक्त-मस्तिष्क अवरोध मस्तिष्क और रक्त के बीच स्थानांतरित होने वाले संकेतों और पोषक तत्वों को अत्यंत नियंत्रित रूप से संचालित करता है।"
- The authors found one such protein, called **TNAP**, to be highly enriched in the blood-brain barriers of old mice, notably even around the hippocampus, the learning and memory centre of the brain.
  लेखकों ने पाया कि **TNAP** नामक ऐसा ही एक प्रोटीन वृद्ध चूहों के रक्त-मस्तिष्क अवरोध में अत्यधिक मात्रा में उपस्थित था, विशेष रूप से मस्तिष्क के सीखने और स्मृति केंद्र **हिप्पोकैम्पस** के आसपास।

Therapeutic potential for Alzheimer's
अल्ज़ाइमर रोग के लिए चिकित्सीय संभावनाएँ

- Given that ageing is a risk factor for **neurodegenerative disorders** like **Alzheimer's disease** and **dementia**, the authors next tested whether the GPLD1 intervention could reduce cognitive decline in a mouse model of Alzheimer's disease.
  चूँकि वृद्धावस्था **अल्ज़ाइमर रोग** और **मनोभ्रंश (डिमेंशिया)** जैसे **तंत्रिका-अपक्षयी विकारों** के लिए एक जोखिम कारक है, इसलिए लेखकों ने आगे यह परीक्षण किया कि क्या GPLD1 हस्तक्षेप अल्ज़ाइमर रोग के चूहे मॉडल में संज्ञानात्मक गिरावट को कम कर सकता है।
- Dr. Tari, who was not involved in the study, exercised caution on this count, noting that "mouse models of Alzheimer's do not fully reproduce the complexity of the disease in humans, which develops over decades and involves vascular dysfunction, inflammation, metabolism, genetics, and lifestyle factors."
  डॉ. तारी, जो इस अध्ययन में शामिल नहीं थे, ने इस विषय पर सावधानी बरतने की सलाह देते हुए कहा कि "अल्ज़ाइमर के चूहे मॉडल मनुष्यों में पाए जाने वाले रोग की जटिलता को पूरी तरह पुनः प्रस्तुत नहीं करते, जो दशकों में विकसित होता है तथा जिसमें रक्तवाहिकीय विकार, सूजन, उपापचय, आनुवंशिकी और जीवनशैली संबंधी कारक शामिल होते हैं।"
- "This causes chronic inflammation in the nerve cells which can accelerate disease processes."
  "इसके परिणामस्वरूप तंत्रिका कोशिकाओं में दीर्घकालिक सूजन उत्पन्न होती है, जो रोग की प्रक्रियाओं को तीव्र कर सकती है।"
- **Alzheimer's disease** is characterised by the accumulation of toxic **amyloid protein**, which clump together to form plaques, leading to neurodegeneration and cognitive decline.
  अल्ज़ाइमर रोग की विशेषता विषैले **अमाइलॉइड प्रोटीन** के संचय से होती है, जो एकत्रित होकर प्लाक बनाते हैं और तंत्रिका-अपक्षय तथा संज्ञानात्मक गिरावट का कारण बनते हैं।
- This exerkine was found to boost new neuron formation within the **hippocampus**.
  यह पाया गया कि यह एक्सरकाइन हिप्पोकैम्पस में नई तंत्रिका कोशिकाओं के निर्माण को प्रोत्साहित करता है।

New result pushes bounds of how small a liquid can be

GS III: S&T [redacted]

Vasudevan Mukunth

Physicists have spent more than two decades studying one of the strangest forms of matter ever created in a laboratory: the quark-gluon plasma (QGP). Quarks and gluons are the smallest pieces of matter. A QGP existed in the first few millionths of a second after the Big Bang, before the quarks bound together to form the first protons and neutrons. Researchers routinely create small droplets of QGP by colliding heavy atomic nuclei at extremely high energies. These droplets are extraordinarily hot, reaching trillions of degrees centigrade. Their behaviour, however, has been more surprising: instead of acting like a gas, the QGP behaves like a fluid.

A new study in *Physical Review Letters* has now reported a new 'boundary' in this field. By smashing together oxygen nuclei at the Large Hadron Collider (LHC),

The new study addresses a different question: how small can a droplet of matter be and still have fluid-like behaviour

researchers have found the smallest dollop of QGP – so far – that still behaves like a fluid. Physicists have known for decades now that energising and colliding lead nuclei, which are much heavier than oxygen nuclei, produces QGP. The new study addresses a different question: how small can a droplet of matter be and still have fluid-like behaviour? The LHC usually smashes together protons. The researchers picked oxygen ions because they occupy a middle ground between the tiny clumps of energy and matter created by smushed protons and the massive ones formed by lead ions. A middle ground that could reveal the tipping point where subatomic matter starts to resemble a fluid. The research team analysed collisions between oxygen nuclei at the LHC, looking for fast-moving particles that emerged from the collision, and compared their numbers with what would be expected if no dense medium had formed. If no dense medium forms, physicists can predict how many such particles should appear. But if a medium is present, some of the energetic quarks and gluons should lose energy before they escape, reducing the number of energetic particles eventually reaching the detector.

The researchers have reported signs of such a suppression. It was less pronounced in collisions involving the oxygen ions, but it was noticeable. The finding suggests that oxygen-oxygen collisions can create a medium large enough to affect the motion of energetic quarks and gluons. The data "are also in better agreement with theoretical models that include quark-gluon energy loss than they are with models that omit it," *Physical Review Letters* associate editor Nikhil Karthik wrote in *Physics*. Properties like viscosity and flow are associated with fluids, and these fluids usually have an enormous number of particles. A droplet of water sliding down a wall has quadrillions of water molecules. A glob of honey big enough to show how slowly it slides has roughly a quintillion sugar molecules. Yet the QGP is much, much smaller – it has maybe thousands of quarks and gluons – but it is still a fluid. According to the new finding, a strongly interacting medium can emerge even in collisions involving relatively light nuclei. At the same time, it makes the mystery of where exactly the transition between a fluid-like medium and a gas of largely independent particles emerges more intriguing.

(mukunth.v@thehindu.co.in)

04J6. New result pushes bounds of how small a liquid can be

नया परिणाम इस सीमा को आगे बढ़ाता है कि कोई द्रव कितना छोटा हो सकता है

Quark-Gluon Plasma (QGP)
क्वार्क-ग्लूऑन प्लाज़्मा (QGP)

- Physicists have spent more than two decades studying one of the strangest forms of matter ever created in a laboratory: the **quark-gluon plasma (QGP)**.

भौतिकविदों ने प्रयोगशाला में अब तक निर्मित पदार्थ के सबसे विचित्र रूपों में से एक, **क्वार्क-ग्लूऑन प्लाज़्मा (QGP)**, का अध्ययन करने में दो दशकों से अधिक समय व्यतीत किया है।

- Quarks and gluons are the smallest pieces of matter.

क्वार्क और **ग्लूऑन** पदार्थ के सबसे छोटे घटक हैं।

- A QGP existed in the first few millionths of a second after the **Big Bang**, before the quarks bound together to form the first protons and neutrons.

बिग बैंग के बाद के प्रारम्भिक कुछ मिलियनवें सेकंड में QGP विद्यमान था, इससे पहले कि क्वार्क आपस में बंधकर प्रथम प्रोटॉन और न्यूट्रॉन का निर्माण करते।

- Researchers routinely create small droplets of QGP by colliding heavy atomic nuclei at extremely high energies.

शोधकर्ता अत्यधिक उच्च ऊर्जा पर भारी परमाणु नाभिकों की टक्कर कराकर नियमित रूप से QGP की छोटी बूंदों का निर्माण करते हैं।

- These droplets are extraordinarily hot, reaching trillions of degrees centigrade.

ये बूंदें अत्यंत गर्म होती हैं और इनका तापमान खरबों डिग्री सेल्सियस तक पहुँच जाता है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Website : patrioticias.in

- Their behaviour, however, has been more surprising: instead of acting like a gas, the QGP behaves like a fluid.
  हालाँकि, इनका व्यवहार अधिक आश्चर्यजनक रहा है; गैस की तरह व्यवहार करने के बजाय QGP एक **द्रव** की भाँति व्यवहार करता है।
- By smashing together oxygen nuclei at the **Large Hadron Collider (LHC)**, researchers have found the smallest dollop of QGP — so far — that still behaves like a fluid.
  लार्ज हैड्रॉन कोलाइडर (LHC) में ऑक्सीजन नाभिकों की टक्कर कराकर शोधकर्ताओं ने अब तक का सबसे छोटा QGP समूह खोजा है, जो अभी भी द्रव की तरह व्यवहार करता है।
- The new study addresses a different question: how small can a droplet of matter be and still have fluid-like behaviour?
  यह नया अध्ययन एक भिन्न प्रश्न का उत्तर खोजता है: पदार्थ की एक बूंद कितनी छोटी हो सकती है और फिर भी द्रव-सदृश व्यवहार प्रदर्शित कर सकती है?
- The LHC usually smashes together protons.
  LHC सामान्यतः प्रोटॉनों की टक्कर कराता है।
- The researchers picked oxygen ions because they occupy a middle ground between the tiny clumps of energy and matter created by smushed protons and the massive ones formed by lead ions.
  शोधकर्ताओं ने ऑक्सीजन आयनों का चयन इसलिए किया क्योंकि वे प्रोटॉनों की टक्कर से बनने वाले अत्यंत छोटे ऊर्जा-पदार्थ समूहों और सीसा आयनों से बनने वाले विशाल समूहों के बीच की स्थिति का प्रतिनिधित्व करते हैं।
- A middle ground that could reveal the tipping point where subatomic matter starts to resemble a fluid.
  यह एक ऐसी मध्यवर्ती अवस्था है जो उस निर्णायक बिंदु को उजागर कर सकती है जहाँ उप-परमाण्विक पदार्थ द्रव जैसा दिखाई देने लगता है।
- Properties like **viscosity** and **flow** are associated with fluids, and these fluids usually have an enormous number of particles.
  श्यानता (Viscosity) और **प्रवाह (Flow)** जैसे गुण द्रवों से संबंधित होते हैं, और ऐसे द्रवों में सामान्यतः अत्यधिक संख्या में कण होते हैं।
- A droplet of water sliding down a wall has quadrillions of water molecules.
  दीवार पर फिसलती हुई जल की एक बूंद में क्वाड्रिलियन संख्या में जल अणु होते हैं।

PATRIOTIC IAS

Is climate research being held back by local instrumentation?

What are India's biggest gaps in climate research? Why do prototypes fail to become products?

Jacob Koshy

The story so far:
A Mega Science Vision-2035 report on Climate Research is a roadmap prepared by the Indian climate research community with the Indian Institute of Science (IISc), Bengaluru, as the nodal institution, and submitted to the Office of the Principal Scientific Adviser (PSA) to the Government of India, was made public this week.

What is its central message?
The central message of the report is that India has effectively lost the ability to build its own scientific instruments. "Today, virtually no company in India manufactures quality scientific instruments for climate research," it states, adding that "billions of rupees have been spent and continue to be spent on procuring instruments manufactured elsewhere." Worse, imported instruments are often used "without knowing the principle of operation, the built-in assumptions... and their limitations," and left uncalibrated for years – producing, in the report's words, "incorrect data being reported in national and international journals, often leading to questions on the credibility of Indian science."

What is the Mega Science Vision exercise?
The Mega Science Vision exercise, historically used to plan large, long-horizon projects in nuclear and high-energy physics, was for the first time extended to climate research, ecology and astronomy, and facilitated by the PSA's office under Prof. Ajay K. Sood. A working group chaired by Prof. S.K. Satheesh, with former Indian National Centre for Ocean Information Services (INCOIS) director Dr. S.S.C. Shenoi, as member-secretary, drew on consultations with over 3,000 researchers. Crucially, the document calls itself "a Climate Research community document" of "hopes and aspirations" whose projects are "indicative" – it is neither a mandatory prescription nor a statement of government policy or funding.

Hasn't India built any of its own climate instruments?
It has built prototypes, but rarely products. The report notes that Indian engineers can design and demonstrate instruments, "some of which have already been demonstrated successfully," yet "they are not often translated into final industrial products." Examples include automatic profiling floats developed at the National Institute of Ocean Technologyfor ocean observation, and automatic weather stations by the India Meteorological Department and ISRO. Although transferred to industry, "most of them have not reached the market yet." Tellingly, the first phase of the proposed sensor programme is an audit to identify why such technologies fail to scale to production. The suggested remedy – mandating that most instruments be made in India, backed by assured procurement and pricing – sits uneasily with recent experience: the Government e-Marketplace (GeM) portal, made mandatory to support domestic vendors, was rolled back for scientific institutions in June 2025 after scientists found it hindered access to customised, high-quality equipment.

Why study uncontrolled renewables?
Although renewable energy seems to be the right solution to replace polluting sources, the report cautions that studies are needed to assess the long-term effects of uncontrolled tapping of natural resources – even as it insists renewables must remain a priority to sustain recent momentum. India, which has pledged 500 GW of non-fossil capacity by 2030, crossed the halfway mark in installed capacity in 2025. The report also calls for scientific methods to estimate the social cost of carbon, a "polluter pays" mechanism to prevent the atmosphere from becoming a dumping ground, and measures to offset the burden of carbon taxation on the poor.

What else in the report is of importance?
The report proposes a pan-India Climate and Health Observatory under a mega project on adaptation and resilience, reflecting how thinly India tracks climate-related health impacts. It outlines eight mega projects spanning observational networks, indigenous sensors, satellites, two strands of climate modelling, field campaigns, carbon-neutrality research and adaptation science, to be overseen by a high-level apex committee. On science, it enters contested ground, backing a dense Black Carbon observatory network despite disputed claims about its relative role in global warming. It flags India's thin paleoclimate networks as a gap in understanding the monsoon's deep past, and the risk of crossing tipping points such as ice-sheet collapse and shifts in ocean circulation. It also warns of limited trained manpower, including in environmental epidemiology.

04J6. Is climate research being held back by local instrumentation?
क्या स्थानीय उपकरणों की कमी जलवायु अनुसंधान को पीछे रोक रही है?

- A **Mega Science Vision-2035** report on **Climate Research** is a roadmap prepared by the Indian climate research community with the **Indian Institute of Science (IISc), Bengaluru**, as the nodal institution, and submitted to the **Office of the Principal Scientific Adviser (PSA)** to the Government of India, was made public this week.
  जलवायु अनुसंधान पर **मेगा साइंस विज़न-2035** रिपोर्ट भारतीय जलवायु अनुसंधान समुदाय द्वारा **भारतीय विज्ञान संस्थान (IISc), बेंगलुरु** को नोडल संस्था बनाकर तैयार किया गया एक रोडमैप है, जिसे भारत सरकार के **प्रधान वैज्ञानिक सलाहकार (PSA) कार्यालय** को प्रस्तुत किया गया था और इसे इस सप्ताह सार्वजनिक किया गया।

What is its central message?
इसका केंद्रीय संदेश क्या है?

- The central message of the report is that India has effectively lost the ability to build its own scientific instruments.
  रिपोर्ट का केंद्रीय संदेश यह है कि भारत प्रभावी रूप से अपने स्वयं के वैज्ञानिक उपकरण बनाने की क्षमता खो चुका है।
- "Today, virtually no company in India manufactures quality scientific instruments for climate research," it states, adding that "billions of rupees have been spent and continue to be spent on procuring instruments manufactured elsewhere."
  रिपोर्ट में कहा गया है कि "आज भारत में लगभग कोई भी कंपनी जलवायु अनुसंधान के लिए गुणवत्तापूर्ण वैज्ञानिक उपकरणों का निर्माण नहीं करती," और यह भी जोड़ा गया है कि "विदेशों में निर्मित उपकरणों की खरीद पर अरबों रुपये खर्च किए जा चुके हैं और अब भी किए जा रहे हैं।"
- Worse, imported instruments are often used "without knowing the principle of operation, the built-in assumptions… and their limitations," and left uncalibrated for years — producing, in the report's words, "incorrect data being reported in national and international journals, often leading to questions on the credibility of Indian science."
  इससे भी अधिक गंभीर बात यह है कि आयातित उपकरणों का उपयोग अक्सर "उनके संचालन सिद्धांत, अंतर्निहित मान्यताओं तथा सीमाओं को जाने बिना" किया जाता है और उन्हें वर्षों तक अंशांकित (कैलिब्रेट) नहीं किया जाता, जिसके परिणामस्वरूप रिपोर्ट के शब्दों में "राष्ट्रीय और अंतरराष्ट्रीय पत्रिकाओं में गलत आँकड़े प्रकाशित होते हैं, जिससे भारतीय विज्ञान की विश्वसनीयता पर प्रश्न उठते हैं।"

  मेगा साइंस विज़न अभ्यास, जिसका उपयोग ऐतिहासिक रूप से परमाणु और उच्च-ऊर्जा भौतिकी की दीर्घकालिक परियोजनाओं की योजना बनाने के लिए किया जाता था, पहली बार जलवायु अनुसंधान, पारिस्थितिकी और खगोल विज्ञान तक विस्तारित किया गया और इसे **प्रो. अजय के. सूद** के नेतृत्व वाले PSA कार्यालय द्वारा संचालित किया गया।
- A working group chaired by **Prof. S.K. Satheesh**, with former **Indian National Centre for Ocean Information Services (INCOIS)** director **Dr. S.S.C. Shenoi** as member-secretary, drew on consultations with over **3,000 researchers**.
  प्रो. एस.के. सतीश की अध्यक्षता वाले कार्य समूह तथा पूर्व **भारतीय राष्ट्रीय महासागर सूचना सेवा केंद्र (INCOIS)** के निदेशक **डॉ. एस.एस.सी. शेनॉय** के सदस्य-सचिवत्व में, **3,000 से अधिक शोधकर्ताओं** के साथ परामर्श किया गया।
- Crucially, the document calls itself "a Climate Research community document" of "hopes and aspirations" whose projects are "indicative" — it is neither a mandatory prescription nor a statement of government policy or funding.
  महत्वपूर्ण रूप से, यह दस्तावेज़ स्वयं को "आशाओं और आकांक्षाओं" का "जलवायु अनुसंधान समुदाय दस्तावेज़" कहता है, जिसकी परियोजनाएँ केवल "संकेतात्मक" हैं; यह न तो अनिवार्य निर्देश है और न ही सरकारी नीति अथवा वित्तपोषण का आधिकारिक वक्तव्य।

Hasn't India built any of its own climate instruments?
क्या भारत ने अपने स्वयं के जलवायु उपकरण विकसित नहीं किए हैं?

- The report notes that Indian engineers can design and demonstrate instruments, "some of which have already been demonstrated successfully," yet "they are not often translated into final industrial products."
  रिपोर्ट में कहा गया है कि भारतीय अभियंता उपकरणों का डिज़ाइन और प्रदर्शन करने में सक्षम हैं, "जिनमें से कुछ का सफल प्रदर्शन भी हो चुका है," किंतु "उन्हें प्रायः अंतिम औद्योगिक उत्पादों में परिवर्तित नहीं किया जाता।"
- Examples include **automatic profiling floats** developed at the **National Institute of Ocean Technology** for ocean observation, and **automatic weather stations** by the **India Meteorological Department** and **ISRO**.
  उदाहरणों में महासागरीय अवलोकन हेतु **राष्ट्रीय महासागर प्रौद्योगिकी संस्थान** द्वारा विकसित **स्वचालित प्रोफाइलिंग फ्लोट्स**, तथा **भारत मौसम विज्ञान विभाग** और **इसरो** द्वारा विकसित **स्वचालित मौसम केंद्र** शामिल हैं।
- Although transferred to industry, "most of them have not reached the market yet."
  यद्यपि इन तकनीकों को उद्योगों को हस्तांतरित किया गया है, फिर भी "इनमें से अधिकांश अभी तक बाज़ार तक नहीं पहुँच पाए हैं।"
- Tellingly, the first phase of the proposed sensor programme is an audit to identify why such technologies fail to scale to production.
  महत्वपूर्ण रूप से, प्रस्तावित सेंसर कार्यक्रम का पहला चरण यह जाँच करना है कि ऐसी प्रौद्योगिकियाँ बड़े पैमाने पर उत्पादन तक क्यों नहीं पहुँच पातीं।
- The suggested remedy — mandating that most instruments be made in India, backed by assured procurement and pricing — sits uneasily with recent experience.
  प्रस्तावित समाधान — अधिकांश उपकरणों का भारत में निर्माण सुनिश्चित करना तथा उन्हें गारंटीकृत खरीद और मूल्य समर्थन देना — हाल के अनुभवों के साथ पूरी तरह मेल नहीं खाता।

What Delhi HC's pathbreaking ruling on Google keyword advertising means

Justice Mini Pushkarna assessed if a company can buy another's registered trademark as a keyword on Google Ads to have their ads appear first in searches for that trademark; in 2013, Hindware Ltd. discovered that its rival companies had purchased the trademark 'Hindware' in such a manner

GS III: S&T

EXPLAINER

Soibam Rocky Singh
NEW DELHI

A recent ruling of the Delhi High Court in a long-running trademark dispute initiated by Hindware Limited could shape how Google handles keyword advertising, especially when trademarks are used in sponsored search results.

In a 163-page judgment delivered on May 22, Justice Mini Pushkarna examined whether a company can purchase another company's registered trademark as a keyword under Google Ads so that their advertisements appear on top of the list when users search for that trademark.

Word power: Google runs a programme 'Google AdWords', a form of keyword advertising that allows advertisers to place advertisements along with search results in their search engine. GETTY IMAGES/ISTOCK

The dispute

In early 2013, Hindware Limited, which is in the business of sanitaryware products, discovered that its rival sanitaryware companies, Grohe India Private Limited and Cera Sanitaryware Limited, had purchased the trademark 'Hindware' as a keyword through Google's AdWords programme.

The result was that whenever a consumer searched for the word 'Hindware' on the Google search engine, the first result that appeared was for the website of Cera. Also, when someone searched 'Hindware Sanitary' or 'Hindware Sanitaryware', the first result came from the website of Grohe.

Hindware argued that its registered and well-known trademark is being used by Google by offering or suggesting it to competitors or any other entity for the generation of advertisements. Hindware said this was being done without their prior consent or approval.

Subsequently, Cera and Grohe settled with Hindware, leaving the core legal battle to continue against Google India and Google LLC.

Keyword advertising

Google runs a programme known as 'Google AdWords', which is a form of keyword advertising that allows advertisers to place advertisements along with search results in their search engine, www.google.com.

Under Google AdWords, advertisers bid for words or phrases called 'keywords' that trigger or generate a sponsored advertisement when a user enters those terms into Google Search.

For example, if someone specifically searches for Nokia or Sony, another company could purchase the keywords 'Nokia' or 'Sony' in return for a fee earned by Google, so that instead of the organic result, i.e., websites of Nokia or Sony, the user would be shown the advertisement or websites of the ad purchaser.

> On our Ads policy on trademark keywords, we have a clear and stated policy that doesn't allow competitor advertisers to use trademarked terms in the ad-text

Hindware's objection

Hindware claimed that 'HINDWARE' is a registered and well-known trademark with substantial goodwill built over decades.

The company contended that the use of its trademark as a keyword for the display of advertisements clearly amounts to use of the trademark "in advertising" within the meaning of Section 29(6) of the Trade Marks Act.

It argued that if a consumer specifically searches the term 'Hindware', it is clear that he is specifically looking for their products. The fact that the first search result of another company is shown to the consumer is bound to cause confusion and divert potential customers to rival brands.

Until 2009, Google did not permit the use of trademarks as keywords in India, but the policy was changed post the year 2009. It said that the policy applicable in India is a deviation from the policy of Google followed for countries in the European Union (EU) and European Free Trade Association (EFTA).

Google's defence

Google argued keywords act as a backend trigger for displaying the advertisements in response to the search query entered by a user. Since users cannot see the keywords provided by the advertiser, such use of trademarks as keywords cannot be said to amount to 'use' under the Trade Marks Act.

When multiple advertisers seek to choose the same word as a keyword, including a trademarked term, Google conducts an auction or bidding on the trademarked term and earns a Cost-Per-Click amount as revenue.

On the question of confusion among users, Google argued that the inorganic or sponsored search results are labelled with a prefix 'ad' to distinguish them from organic search results, eliminating the likelihood of confusion among the users.

Judgment's importance

The case touches upon a growing global conflict between trademark law and digital advertising models.

Search engines earn revenue through keyword advertising systems. By auctioning the registered trademark to rivals, Google generates revenue from multiple competitors of the trademark owner.

The court ruled in favour of Hindware restraining Google from using the name 'Hindware' or any combination of related words as part of advertising keywords.

It observed that Google's conduct amounts to "free-riding" as it monetises the investments made by the trademark owner over the years. By actively suggesting, prompting and auctioning trademarks to third parties, the court said Google rides on the goodwill of the trademark's reputation, selling off the power of the mark in attracting consumers to other rivals in order to increase enrolment in its own AdWords Policy and earn more profits.

"In doing so, Google has attempted to sell something that it simply does not own."

Beyond the case

The decision is likely to influence trademark disputes involving online advertising in India. It could affect how freely companies can use competitors' brand names in online advertisements and search results.

"We duly respect and operate in accordance with all local laws, and in instances where the orders are overbroad or inconsistent with our policies, we work to explain our position as per the legal process in the country," Google said in a statement to *The Hindu*.

"Specifically on our Ads policy on trademark keywords, we have a clear and stated policy that does not allow competitor advertisers to use trademarked terms in the ad-text of an ad. This policy is consistently applied globally and is in accordance with the Indian trademark law."

The company has held that so-called backend use of a trademark keyword is permissible to allow for small firms to compete with established incumbents, and said that it therefore only bans the deceptive use of competing trademark keywords in the actual text of ads, and not in the bidding process.

04J6. What Delhi HC's pathbreaking ruling on Google keyword advertising means

गूगल कीवर्ड विज्ञापन पर दिल्ली हाईकोर्ट के ऐतिहासिक फैसले का क्या अर्थ है

- **Justice Mini Pushkarna** assessed if a company can buy another's registered trademark as a keyword on **Google Ads** to have their ads appear first in searches for that trademark.
  न्यायमूर्ति मिनी पुष्कर्णा ने यह जांच की कि क्या कोई कंपनी **Google Ads** पर किसी अन्य कंपनी के पंजीकृत ट्रेडमार्क को कीवर्ड के रूप में खरीद सकती है ताकि उस ट्रेडमार्क की खोज होने पर उसका विज्ञापन सबसे पहले दिखाई दे।

- In **2013**, **Hindware Ltd.** discovered that its rival companies had purchased the trademark **'Hindware'** in such a manner.
  2013 में **हिंदवेयर लिमिटेड** ने पाया कि उसकी प्रतिस्पर्धी कंपनियों ने **'Hindware'** ट्रेडमार्क को इसी प्रकार खरीदा था।

The dispute
विवाद

- In early **2013**, **Hindware Limited**, which is in the business of sanitaryware products, discovered that its rival sanitaryware companies, **Grohe India Private Limited** and **Cera Sanitaryware Limited**, had purchased the trademark **'Hindware'** as a keyword through Google's **AdWords** programme.
  2013 की शुरुआत में, सैनिटरीवेयर उत्पादों के व्यवसाय में लगी **हिंदवेयर लिमिटेड** ने पाया कि उसकी प्रतिद्वंद्वी कंपनियों **Grohe India Private Limited** और **Cera Sanitaryware Limited** ने गूगल के **AdWords** कार्यक्रम के माध्यम से **'Hindware'** ट्रेडमार्क को कीवर्ड के रूप में खरीदा था।
- The result was that whenever a consumer searched for the word **'Hindware'** on the Google search engine, the first result that appeared was for the website of **Cera**.
  परिणामस्वरूप, जब भी कोई उपभोक्ता गूगल सर्च इंजन पर **'Hindware'** शब्द खोजता था, तो सबसे पहला परिणाम **Cera** की वेबसाइट का दिखाई देता था।
- Also, when someone searched **'Hindware Sanitary'** or **'Hindware Sanitaryware'**, the first result came from the website of **Grohe**.
  इसी प्रकार, जब कोई **'Hindware Sanitary'** या **'Hindware Sanitaryware'** खोजता था, तो पहला परिणाम **Grohe** की वेबसाइट से आता था।
- Hindware argued that its registered and well-known trademark is being used by Google by offering or suggesting it to competitors or any other entity for the generation of advertisements.
  हिंदवेयर ने तर्क दिया कि उसके पंजीकृत और प्रसिद्ध ट्रेडमार्क का उपयोग गूगल द्वारा प्रतिस्पर्धियों या अन्य संस्थाओं को विज्ञापन उत्पन्न करने के लिए उपलब्ध कराकर किया जा रहा है।
- Hindware said this was being done without their prior consent or approval.
  हिंदवेयर ने कहा कि यह कार्य उनकी पूर्व अनुमति या स्वीकृति के बिना किया जा रहा था।
- Subsequently, **Cera** and **Grohe** settled with Hindware, leaving the core legal battle to continue against **Google India** and **Google LLC**.
  बाद में **Cera** और **Grohe** ने हिंदवेयर के साथ समझौता कर लिया, जिससे मुख्य कानूनी लड़ाई **Google India** और **Google LLC** के विरुद्ध जारी रही।

Keyword advertising
कीवर्ड विज्ञापन

- Google runs a programme known as **'Google AdWords'**, which is a form of keyword advertising that allows advertisers to place advertisements along with search results in their search engine, www.google.com.
  गूगल **'Google AdWords'** नामक एक कार्यक्रम चलाता है, जो कीवर्ड विज्ञापन का एक रूप है और विज्ञापनदाताओं को www.google.com पर खोज परिणामों के साथ अपने विज्ञापन प्रदर्शित करने की अनुमति देता है।
- Under Google AdWords, advertisers bid for words or phrases called **'keywords'** that trigger or generate a sponsored advertisement when a user enters those terms into Google Search.
  Google AdWords के अंतर्गत विज्ञापनदाता **'कीवर्ड्स'** कहलाने वाले शब्दों या वाक्यांशों पर बोली लगाते हैं, जो उपयोगकर्ता द्वारा गूगल सर्च में दर्ज किए जाने पर प्रायोजित विज्ञापन प्रदर्शित करते हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- For example, if someone specifically searches for **Nokia** or **Sony**, another company could purchase the keywords **'Nokia'** or **'Sony'** in return for a fee earned by Google, so that instead of the organic result, i.e., websites of Nokia or Sony, the user would be shown the advertisement or websites of the ad purchaser.
  उदाहरण के लिए, यदि कोई व्यक्ति **Nokia** या **Sony** खोजता है, तो कोई अन्य कंपनी **'Nokia'** या **'Sony'** कीवर्ड खरीद सकती है, जिसके बदले गूगल शुल्क प्राप्त करता है, और तब उपयोगकर्ता को Nokia या Sony की वेबसाइटों के बजाय विज्ञापन खरीदने वाली कंपनी का विज्ञापन या वेबसाइट दिखाई जाएगी।

Hindware's objection
हिंदवेयर की आपत्ति

- Hindware claimed that **'HINDWARE'** is a registered and well-known trademark with substantial goodwill built over decades.
  हिंदवेयर ने दावा किया कि **'HINDWARE'** एक पंजीकृत और प्रसिद्ध ट्रेडमार्क है, जिसकी प्रतिष्ठा कई दशकों में निर्मित हुई है।
- The company contended that the use of its trademark as a keyword for the display of advertisements clearly amounts to use of the trademark "in advertising" within the meaning of **Section 29(6) of the Trade Marks Act**.
  कंपनी ने तर्क दिया कि विज्ञापनों के प्रदर्शन हेतु उसके ट्रेडमार्क का कीवर्ड के रूप में उपयोग **Trade Marks Act की धारा 29(6)** के अंतर्गत "विज्ञापन में ट्रेडमार्क के उपयोग" के समान है।
- It argued that if a consumer specifically searches the term **'Hindware'**, it is clear that he is specifically looking for their products.
  कंपनी ने कहा कि यदि कोई उपभोक्ता विशेष रूप से **'Hindware'** खोजता है, तो स्पष्ट है कि वह हिंदवेयर के उत्पादों की तलाश कर रहा है।
- The fact that the first search result of another company is shown to the consumer is bound to cause confusion and divert potential customers to rival brands.
  ऐसी स्थिति में किसी अन्य कंपनी का पहला परिणाम दिखाया जाना उपभोक्ताओं में भ्रम उत्पन्न करेगा और संभावित ग्राहकों को प्रतिस्पर्धी ब्रांडों की ओर मोड़ देगा।
- Until **2009**, Google did not permit the use of trademarks as keywords in India, but the policy was changed post the year **2009**.
  2009 तक गूगल भारत में ट्रेडमार्क को कीवर्ड के रूप में उपयोग करने की अनुमति नहीं देता था, लेकिन **2009** के बाद यह नीति बदल दी गई।
- It said that the policy applicable in India is a deviation from the policy of Google followed for countries in the **European Union (EU)** and **European Free Trade Association (EFTA)**.
  हिंदवेयर ने कहा कि भारत में लागू नीति, **यूरोपीय संघ (EU)** और **European Free Trade Association (EFTA)** देशों में लागू गूगल की नीति से भिन्न है।

Google's defence
गूगल का पक्ष

- Google argued keywords act as a backend trigger for display of the advertisements in response to the search query entered by a user.
  गूगल ने तर्क दिया कि कीवर्ड केवल बैकएंड ट्रिगर के रूप में कार्य करते हैं, जो उपयोगकर्ता द्वारा दर्ज खोज प्रश्न के उत्तर में विज्ञापन प्रदर्शित करते हैं।
- Since users cannot see the keywords provided by the advertiser, such use of trademarks as keywords cannot be said to amount to 'use' under the **Trade Marks Act**.
  चूँकि उपयोगकर्ता विज्ञापनदाता द्वारा चुने गए कीवर्ड नहीं देख सकते, इसलिए ट्रेडमार्क का इस प्रकार उपयोग **Trade Marks Act** के अंतर्गत 'उपयोग' नहीं माना जा सकता।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- When multiple advertisers seek to choose the same word as a keyword, including a trademarked term, Google conducts an auction or bidding on the trademarked term and earns a **Cost-Per-Click** amount as revenue.
  जब कई विज्ञापनदाता एक ही शब्द या ट्रेडमार्क वाले शब्द को कीवर्ड बनाना चाहते हैं, तो गूगल उस पर नीलामी या बोली प्रक्रिया संचालित करता है और **Cost-Per-Click** के रूप में राजस्व अर्जित करता है।
- On the question of confusion among users, Google argued that the inorganic or sponsored search results are labelled with a prefix **'ad'** to distinguish them from organic search results, eliminating the likelihood of confusion among the users.
  उपयोगकर्ताओं में भ्रम की संभावना के प्रश्न पर गूगल ने कहा कि प्रायोजित परिणामों के साथ **'ad'** लिखा होता है, जिससे वे सामान्य खोज परिणामों से अलग पहचाने जा सकते हैं और भ्रम की संभावना समाप्त हो जाती है।

Judgment's importance
निर्णय का महत्व

- The case touches upon a growing global conflict between **trademark law** and **digital advertising models**.
  यह मामला **ट्रेडमार्क कानून** और **डिजिटल विज्ञापन मॉडल** के बीच बढ़ते वैश्विक संघर्ष से जुड़ा है।
- Search engines earn revenue through keyword advertising systems.
  सर्च इंजन कीवर्ड विज्ञापन प्रणाली के माध्यम से राजस्व अर्जित करते हैं।
- By auctioning the registered trademark to rivals, Google generates revenue from multiple competitors of the trademark owner.
  पंजीकृत ट्रेडमार्क को प्रतिस्पर्धियों के लिए नीलाम करके गूगल ट्रेडमार्क स्वामी के कई प्रतिस्पर्धियों से राजस्व प्राप्त करता है।
- The court ruled in favour of **Hindware**, restraining Google from using the name **'Hindware'** or any combination of related words as part of advertising keywords.
  अदालत ने **हिंदवेयर** के पक्ष में निर्णय देते हुए गूगल को **'Hindware'** नाम या उससे जुड़े शब्दों के संयोजन को विज्ञापन कीवर्ड के रूप में उपयोग करने से रोक दिया।
- It observed that Google's conduct amounts to **"free-riding"** as it monetises the investments made by the trademark owner over the years.
  अदालत ने कहा कि गूगल का यह व्यवहार **"फ्री-राइडिंग"** है क्योंकि वह ट्रेडमार्क स्वामी द्वारा वर्षों में किए गए निवेश से लाभ कमा रहा है।
- By actively suggesting, prompting and auctioning trademarks to third parties, the court said Google rides on the goodwill of the trademark's reputation, selling off the power of the mark in attracting consumers to other rivals in order to increase enrollment in its own **AdWords Policy** and earn more profits.
  अदालत ने कहा कि गूगल तीसरे पक्षों को ट्रेडमार्क सुझाकर और नीलाम करके उसकी प्रतिष्ठा और सद्भावना का लाभ उठाता है तथा उपभोक्ताओं को प्रतिस्पर्धियों की ओर आकर्षित करने की शक्ति को बेचकर अपनी **AdWords Policy** में अधिक भागीदारी और लाभ अर्जित करता है।
- "In doing so, Google has attempted to sell something that it simply does not own."
  "ऐसा करके गूगल ने ऐसी वस्तु बेचने का प्रयास किया है, जिसका वह स्वामी ही नहीं है।"

Beyond the case
मामले से आगे

- The decision is likely to influence trademark disputes involving online advertising in India.
  यह निर्णय भारत में ऑनलाइन विज्ञापन से जुड़े ट्रेडमार्क विवादों को प्रभावित कर सकता है।
- It could affect how freely companies can use competitors' brand names in online advertisements and search results.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

यह इस बात को प्रभावित करेगा कि कंपनियाँ ऑनलाइन विज्ञापनों और खोज परिणामों में प्रतिस्पर्धियों के ब्रांड नामों का कितनी स्वतंत्रता से उपयोग कर सकती हैं।

- "We duly respect and operate in accordance with all local laws, and in instances where the orders are overbroad or inconsistent with our policies, we work to explain our position as per the legal process in the country," Google said in a statement.
  गूगल ने अपने बयान में कहा, "हम सभी स्थानीय कानूनों का सम्मान करते हैं और उनका पालन करते हैं, तथा जहाँ आदेश अत्यधिक व्यापक हों या हमारी नीतियों से मेल न खाते हों, वहाँ हम कानूनी प्रक्रिया के अनुसार अपना पक्ष स्पष्ट करते हैं।"
- "Specifically on our Ads policy on trademark keywords, we have a clear and stated policy that does not allow competitor advertisers to use trademarked terms in the ad-text of an ad."
  "विशेष रूप से ट्रेडमार्क कीवर्ड से संबंधित हमारी विज्ञापन नीति स्पष्ट है और प्रतिस्पर्धी विज्ञापनदाताओं को विज्ञापन के पाठ में ट्रेडमार्क शब्दों के उपयोग की अनुमति नहीं देती।"
- "This policy is consistently applied globally and is in accordance with the Indian trademark law."
  "यह नीति वैश्विक स्तर पर समान रूप से लागू की जाती है और भारतीय ट्रेडमार्क कानून के अनुरूप है।"
- The company has held that so-called backend use of a trademark keyword is permissible to allow for small firms to compete with established incumbents, and said that it therefore only bans the deceptive use of competing trademark keywords in the actual text of ads, and not in the bidding process.
  कंपनी का मानना है कि ट्रेडमार्क कीवर्ड का तथाकथित बैकएंड उपयोग छोटी कंपनियों को स्थापित कंपनियों से प्रतिस्पर्धा करने का अवसर देता है, इसलिए वह केवल विज्ञापन के वास्तविक पाठ में प्रतिस्पर्धी ट्रेडमार्क के भ्रामक उपयोग पर प्रतिबंध लगाती है, न कि बोली प्रक्रिया में।

Reading for a warming world: books that rethink nature, development and survival

As heatwaves intensify and climate anxiety grows, a new set of books critiques the belief in technological fixes, highlights projects that risk ecological damage, and reimagines forests as spaces shaped by power, conflict and care, urging readers to rethink their relationship with nature and development

GS III: Environment

Soma Basu

The severe heatwave this year has pushed temperatures beyond normal highs across some regions. The warming caused by human activity is not surprising as scientists have warned about it for decades.

What is more concerning is the lack of adequate collective action to address this crisis. Since human minds tend to focus on immediate threats rather than future ones, it is important to recognise that climate change is impacting us faster than is projected. Therefore, appropriate individual and systemic actions need to be prioritised. World Environment Day reminds us of the responsibility, and this year's theme – "Inspired by Nature. For Climate. For Our Future. 2026" – is all about focusing on nature-based solutions to combat the climate crisis.

The man who planted trees

Some powerful books deepen our understanding of sustainability. *Ghosts on Peepal Trees: My Journey From Folk Tales to Forests* (Ebury Press, to be released on June 5) is the memoir of environmentalist Peepal Baba alias Swami Prem Parivartan.

The book evokes memories of shade and green spaces, clean rivers, forests and natural resources, singing birds, and fertile soil. It shows how these landscapes teach coexistence and help us understand the architecture of forests, the politics of ecosystem management, the economics of the environment, and even ecotheology. It urges us "to listen to the Earth and believe in our ability to care about the natural world."

For five decades, Peepal Baba worked towards restoring vegetation on 2,70,000 hectares by planting 26 million trees in 226 districts across 21 States in India. While rooted in the idea of individual and community action, his work also points to the need for broader ecological responsibility, where everyday practices – planting trees, composting waste, feeding birds, recycling, developing green patches or rooftop nurseries, and cycling – become part of a larger cultural and environmental shift. He urges others to act in whatever way they can.

Peepal Baba also expresses concern about the modern world's growing reliance on technological solutions – from synthetic DNA and genetic modification to crops that bypass pollinators and livestock that are raised entirely without natural conditions such as sunlight. He warns against government policies lacking courage.

Impacting nature and communities

It is a fact that every city today is a story of concretisation, forgotten rivers, and vanished greens. In his latest book, *Island on Edge: The Great Nicobar Crisis* (2026, Westland), Pankaj Sekhsaria lifts the veil off the ₹82,000 crore mega infrastructure development project planned for the Great Nicobar Island cautioning how it will irreversibly damage not only the fragile biodiversity of the region, but also the culture of indigenous communities and their languages.

The project, which includes the clearing of 130 sq. km of pristine tropical evergreen forest, is one of the many continued betrayals of the island. That is why, the author says, he has compiled this collection of research-based, data-driven articles to help readers understand the legal, ethical, and on-ground realities of Great Nicobar.

Echoing Peepal Baba's concerns about the "strange arrogance attached to development projects" and the belief that technology can overcome every obstacle, Sekhsaria critiques the pitfalls of building an airport, transshipment terminal, power plant, and new township on the island. Both authors point to actions detrimental to the environment and to culture. Instead of aligning with climate sensitivity, such development initiatives heavily deplete nature's ecological balance.

The changing face of forests

India's Forests: Revisiting Nature and History (Vintage Books, 2026), co-edited by Mahesh Rangarajan and Arupjyoti Saikia, is a reappraisal of forests as living contested spaces across the country. The authors refer to forests shaped by power, culture, and society, and redefined through conflict, negotiation, and care, and why they mean different things to different people.

The book is an interesting critique and also a tribute to Ramachandra Guha's 1989 study of colonial and post-colonial forestry, *The Unquiet Woods*, that establishes the centrality of forests in our lives.

The ten essays cover a wide range of forest-related issues, tracing the history of forest management from the past to the present while looking ahead to more just and sustainable uses of natural resources.

At its core, this series connects forests to various constituents of nature and human society and prompts us to ask what forests are for, especially at a time when our cities are gasping for oxygen. If we allow nature to govern half our spaces, the rest will flourish on its own because ecosystems are capable of self-regulation. The book revisits the Chipko movement and other environmental struggles, highlighting the need to balance the use and conservation of nature and to distinguish between necessity and greed. It reiterates that the overexploitation and destruction of natural resources is ultimately self-destructive.

The more forests belong to communities, the greater their protection will be. Afforestation is no longer a luxury or merely a government policy; it is a matter of survival and a way of making amends with nature. The future can be secured only if everyone participates in healing the soil and, in turn, the climate.

04J6. Reading for a warming world: books that rethink nature, development and survival

गर्म होती दुनिया को समझने के लिए पठन: ऐसी पुस्तकें जो प्रकृति, विकास और अस्तित्व पर पुनर्विचार करती हैं

- **World Environment Day** reminds us of the responsibility, and this year's theme — **"Inspired by Nature. For Climate. For Our Future. 2026"** — is all about focusing on **nature-based solutions** to combat the climate crisis.
  विश्व पर्यावरण दिवस हमें हमारी जिम्मेदारी की याद दिलाता है, और इस वर्ष की थीम — **"Inspired by Nature. For Climate. For Our Future. 2026"** — जलवायु संकट से निपटने के लिए **प्रकृति-आधारित समाधानों** पर केंद्रित है।

- The book revisits the **Chipko movement** and other environmental struggles, highlighting the need to balance the use and conservation of nature and to distinguish between necessity and greed.

Centre mulls policy to boost E85 fuel uptake

GS III: Environment

The Hindu Bureau
NEW DELHI

The government is actively examining supportive policy framework to accelerate affordable adoption of E85 fuel, said Union Minister for Petroleum and Natural Gas Hardeep Singh Puri.

Speaking at the launch of Hero MotoCorp's flex-fuel motorcycles on Wednesday, he said that E85 (85% blending of ethanol with gasoline), fuel would be "substantially cheaper than normal fuel [variant]".

"If 1% of annual petrol vehicle sales in India during ethanol supply year 2026-27 shifts to E85, over four crore litres of ethanol demand would be generated, [and] nearly ₹266 crore estimated payments would be made to distillers," he said, adding that about ₹195 crore would be earned in foreign exchange savings, approximately 0.28 lakh metric tonnes (LMT) of crude oil imports would be reduced, net CO_2 reduction of nearly 0.86 LMT will be achieved, and nearly ₹160 crore would go directly to farmers.

Hardeep Singh Puri

Sourav Ganguly's security cover downgraded

GS III: Internal Security

The Hindu Bureau
KOLKATA

The West Bengal government on Wednesday reduced the security cover for Sourav Ganguly, former captain of the Indian cricket team, from the Z-category to the Y-category.

The development was confirmed by officials of the West Bengal Police security wing as part of an "ongoing routine exercise" in reviewing the security cover of various prominent personalities in the State based on their threat assessments.

Under the new arrangement, he is expected to be provided with only three or four security personnel.

FAITH

GS IV: Ethics

Dharma remains a mystery

It is difficult to understand dharma, said Navalpakkam Vasudevachariar in a discourse. The meaning of dharma remains hidden. We can understand dharma only partly, not all of it. Just take the rule that we must speak the truth always – *satyam vada*. Is it always practical? Is it wise to always speak the truth? What if, because of our honesty, we hurt someone? In such circumstances, wouldn't a lie be better? Is it wrong to utter a lie to save a life? If a man is chased by someone who wants to murder him, and the villain asks you in which direction the man is running, would it be ethical to reveal the truth to the man with murderous intentions? Will it not lead to a man losing his life? In this case, it would be wrong to be truthful. Even Sita, who had such high ideals in life, had to lie. The occasion was the visit of Hanuman. Hanuman had met Sita with his reassuring message and had departed. The demonesses guarding Sita were curious about the monkey. They asked Sita whether she knew the monkey that had been there. Sita replied wisely that she didn't know who that monkey was.

In Ravana's rajya, demons assumed different forms and the monkey could be some demon, said Sita. If Sita had revealed Hanuman's identity, there might have been more trouble for her. Besides, what purpose would be served by being open about Hanuman's identity? When a truth serves no purpose, but a lie can protect us, isn't it better to conceal truth? So even in the matter of just one command relating to telling truth, there can be so many deviations. There can be deviations from other rules too, and these deviations too might not be *adharmic*. That is why dharma remains a mystery, and is not easily understood.

04J6. Dharma remains a mystery
धर्म एक रहस्य बना हुआ है

- It is difficult to understand **dharma**, said **Navalpakkam Vasudevachariar** in a discourse.
एक प्रवचन में **नावलपक्कम वासुदेवाचारियार** ने कहा कि **धर्म** को समझना कठिन है।
- The meaning of **dharma** remains hidden.
धर्म का अर्थ अब भी छिपा हुआ है।
- We can understand **dharma** only partly, not all of it.
हम **धर्म** को केवल आंशिक रूप से समझ सकते हैं, पूरी तरह नहीं।
- Just take the rule that we must speak the **truth** always — **satyam vada**.
केवल इस नियम को ही लें कि हमें सदैव **सत्य** बोलना चाहिए — **सत्यम् वद**।
- Is it always practical?
क्या यह हमेशा व्यावहारिक है?
- Is it wise to always speak the **truth**?
क्या हमेशा **सत्य** बोलना बुद्धिमानी है?
- What if, because of our honesty, we hurt someone?
यदि हमारी ईमानदारी के कारण किसी को कष्ट पहुँच जाए तो क्या होगा?
- In such circumstances, wouldn't a **lie** be better?
ऐसी परिस्थितियों में क्या **झूठ** बेहतर नहीं होगा?
- Is it wrong to utter a **lie** to save a life?
क्या किसी का जीवन बचाने के लिए **झूठ** बोलना गलत है?
- If a man is chased by someone who wants to murder him, and the villain asks you in which direction the man is running, would it be ethical to reveal the **truth** to the man with murderous intentions?
यदि किसी व्यक्ति का पीछा कोई हत्यारा कर रहा हो और वह आपसे पूछे कि वह व्यक्ति किस दिशा में भागा है, तो क्या उस हत्यारे को **सत्य** बताना नैतिक होगा?
- Will it not lead to a man losing his life?
क्या इससे एक व्यक्ति की जान नहीं चली जाएगी?
- In this case, it would be wrong to be truthful.
इस स्थिति में सत्य बोलना गलत होगा।
- Even **Sita**, who had such high ideals in life, had to lie.
यहाँ तक कि **सीता**, जिनके जीवन में इतने उच्च आदर्श थे, उन्हें भी झूठ बोलना पड़ा।
- The occasion was the visit of **Hanuman**.
यह प्रसंग **हनुमान** के आगमन का था।
- **Hanuman** had met **Sita** with his reassuring message and had departed.
हनुमान ने अपना सांत्वना देने वाला संदेश **सीता** को दिया और फिर वहाँ से चले गए।
- The demonesses guarding **Sita** were curious about the monkey.
सीता की रखवाली कर रही राक्षसियाँ उस वानर के बारे में जानने को उत्सुक थीं।
- They asked **Sita** whether she knew the monkey that had been there.
उन्होंने **सीता** से पूछा कि क्या वह उस वानर को जानती हैं जो वहाँ आया था।

PATRIOTIC IAS

- **Sita** replied wisely that she didn't know who that monkey was.
  सीता ने बुद्धिमानी से उत्तर दिया कि वह नहीं जानतीं कि वह वानर कौन था।
- In **Ravana's rajya**, demons assumed different forms and the monkey could be some demon, said **Sita**.
  सीता ने कहा कि **रावण के राज्य** में राक्षस विभिन्न रूप धारण करते हैं और वह वानर भी कोई राक्षस हो सकता है।
- If **Sita** had revealed **Hanuman's** identity, there might have been more trouble for her.
  यदि **सीता** ने **हनुमान** की पहचान बता दी होती, तो उनके लिए और अधिक परेशानी उत्पन्न हो सकती थी।
- Besides, what purpose would be served by being open about **Hanuman's** identity?
  इसके अतिरिक्त, **हनुमान** की पहचान उजागर करने से क्या उद्देश्य पूरा होता?
- When a **truth** serves no purpose, but a **lie** can protect us, isn't it better to conceal truth?
  जब **सत्य** किसी उद्देश्य की पूर्ति न करे, लेकिन **झूठ** हमारी रक्षा कर सकता हो, तो क्या सत्य को छिपाना बेहतर नहीं है?
- So even in the matter of just one command relating to telling **truth**, there can be so many deviations.
  इस प्रकार केवल **सत्य** बोलने के एक आदेश के विषय में भी अनेक अपवाद हो सकते हैं।
- There can be deviations from other rules too, and these deviations too might not be **adharmic**.
  अन्य नियमों में भी अपवाद हो सकते हैं, और वे अपवाद भी आवश्यक नहीं कि **अधार्मिक** हों।
- That is why **dharma** remains a mystery, and is not easily understood.
  इसीलिए **धर्म** एक रहस्य बना हुआ है और उसे आसानी से समझा नहीं जा सकता।

Overloading, long ride hours weighed heavy on Gulmarg Gondola

PCS

Peerzada Ashiq
SRINAGAR

Overloading, extended ride hours, and violation of standard operating procedures (SOPs) have made Asia's highest cable car, the Gulmarg Gondola, vulnerable to technical faults, according to officials.

Panic gripped the tourist hotspot in north Kashmir's Baramulla on May 25 after a snag left about 300 tourists stranded mid-air. The rescue operation lasted over six hours.

Set up in 1998, the gondola runs in two phases every day: Gulmarg to Kongdoori (10-minute ride) and Kongdoori to Apharwat (12-minute ride), with the highest point located at an altitude of 4,390 metres (14,403 feet). Official sources said 63 cabins, each with a carrying capacity of six persons, are operated in the first phase.

Efforts under way to rescue tourists stranded in Asia's highest cable car following a snag at Gulmarg, Jammu and Kashmir, on May 25. PTI

According to officials, the J&K Cable Car Corporation, which runs the gondola, started allowing 7,000 to 8,000 tourists to take the ride in the first phase this year against the approved upper limit of 4,000. The second phase, with a carrying capacity of 1,500 people in 33 cabins, started ferrying 3,000 tourists, officials said.

On May 25, about 3,000 tourists had taken the ride in the first phase up to 1 p.m., when the snag occurred. Another batch of about 3,000 could not take the ride. Official sources said if tourists were stranded in the second phase, then the "rescue operation would have been almost impossible, given the terrain and altitude".

While ₹810 is charged per person in the first phase, the price is ₹1,010 in the second. About a million tourists took the gondola in 2024, an average of 2,739 persons per day. The year saw revenue generation of ₹108 crore.

Besides overloading, the corporation also extended the operating time by four hours this year. Official sources said the cable car ran operations from 9 a.m. to 6 p.m. last year. However, this year, the ride would start at 7.30 a.m. and close by 8.30 p.m. Officials said running the cable car after sunset "is against the SOPs laid down in 1998 for the Gulmarg Gondola".

'Change in routine'

"The earlier maintenance routine stipulated that the cable car should rest every Monday for technicians to take a look. However, maintenance was shifted to night hours and Monday too was included to ferry tourists," an official said.

At present, there are six stations for the cable car ride and an open-air chair lift in Gulmarg. However, these stations are not manned by mandatory technical staff, which would include electrical and mechanical engineers, another official said.

The corporation has also failed to fill the technical posts that remained vacant after 2012, "significantly decreasing the technical staff", the backbone of the gondola, according to officials. The staff strength in the Electrical Department has fallen from eight to three this year, they said.

Meanwhile, the J&K Cable Car Corporation remains indecisive about reopening the ride. "No date has been fixed for reopening the facility. Refunds for tourists who had booked tickets between May 25 and June 3 are being processed," said Syed Qamar Sajjad, managing director of the corporation.

03J6. Overloading, long ride hours weighed heavy on Gulmarg Gondola
अधिक भार और लंबे संचालन समय ने गुलमर्ग गोंडोला पर डाला भारी दबाव

- Set up in **1998**, the gondola runs in two phases every day: **Gulmarg to Kongdoori** (10-minute ride) and **Kongdoori to Apharwat** (12-minute ride), with the highest point located at an altitude of **4,390 metres (14,403 feet)**.

  1998 में स्थापित यह गोंडोला प्रतिदिन दो चरणों में संचालित होता है: **गुलमर्ग से कोंगडूरी** (10 मिनट की यात्रा) और **कोंगडूरी से अफरवात** (12 मिनट की यात्रा), जिसका उच्चतम बिंदु **4,390 मीटर (14,403 फीट)** की ऊँचाई पर स्थित है।

TOP 5 HIGHEST AND LONGEST CABLE CAR SYSTEMS IN THE WORLD

Highest Cable Car Systems

1. Matterhorn Alpine Crossing

- Highest 3S cableway in the world.
- The system reaches Europe's highest cable-car station at about **3,883 m (12,739 ft)** above sea level.
- It connects Switzerland and Italy across the Alps.

2. Gulmarg Gondola

- Reaches approximately **3,980 m (13,058 ft)** at Apharwat Peak and is widely

recognized as one of the world's highest operating gondolas.

3. Mérida Cable Car

- The famous Mukumbarí system climbs to Pico Espejo in the Andes at around **4,765 m (15,633 ft)**, making it one of the highest cable-car systems ever built.

4. Tianmen Mountain Cableway

- Although not the highest by summit elevation, it rises dramatically over **1,279 m vertically**, one of the greatest elevation gains achieved by a passenger cableway.

5. Mi Teleférico

- The world's largest urban cable-car network operates at elevations exceeding **4,000 m**, making it one of the highest public transit systems on Earth.

Longest Passenger Cable Car Systems

1. Hon Thom Cable Car

- Length: **7.899 km**, Holds the Guinness record for the world's longest non-stop three-rope cable car over the sea.

Quick Comparison

Cable Car	Country	Approx. Length	Maximum Elevation
Hon Thom Cable Car	Vietnam	7.9 km	~175 m
Tochal Telecabin	Iran	7.5 km	~3,740 m
Tianmen Mountain Cableway	China	7.455 km	~1,519 m
Gulmarg Gondola	India	~5 km (two phases)	~3,980 m
Matterhorn Alpine Crossing	Switzerland–Italy	Multi-section	~3,883 m station
Wings of Tatev	Armenia	5.75 km	~320 m above gorge

PCS

Brand value

RCB helped IPL's latest edition build on previous successes

Derided for not matching potential with performance in the past, Royal Challengers Bengaluru (RCB) emphatically put those old ghosts to rest. Having won the Indian Premier League (IPL) title last year, RCB did one better this year, and retained the championship. A commanding display over Gujarat Titans in the final at Ahmedabad's Narendra Modi Stadium on Sunday ensured that RCB joined the likes of Chennai Super Kings (CSK) and Mumbai Indians, teams that have won the title for two consecutive years. Ever since the league's inception in 2008, the Bengaluru squad tended to flourish in spurts and then fade away. Three finals were made too prior to 2025, and in all those summit clashes, RCB choked. Last year, however, a turnaround was effected but as Rajat Patidar's men exulted, the moment turned tragic with 11 fans losing their lives in a stampede outside the M. Chinnaswamy Stadium in Bengaluru. In the latest edition, RCB maintained remarkable consistency and while Patidar marshalled his resources, Virat Kohli, Bhuvneshwar Kumar, Krunal Pandya and Josh Hazlewood chipped in. Fittingly, Patidar dedicated the triumph to the 11 fans who passed away. Meanwhile, Titans led by Shubman Gill, ran into a stronger outfit in the final and could not cash in on the advantage of playing at their home ground.

Having commenced on March 28, the IPL with 10 teams and 74 matches, had a bloated air and at times viewer interest dipped. The cricket, though, was from the top-drawer of T20 cricket as batters muscled sixes. The leading star was Vaibhav Sooryavanshi, who belied his 15 summers. The Rajasthan Royals' player is one for the future and there is talk of the selectors fast-tracking him into the national squad. Just as Sachin Tendulkar made his international debut at 16, Sooryavanshi too seems set to join that space of young talent pursuing higher glory. For now, a spot in T20I beckons even as the youngster is keen to play Tests too. Just as RCB, Titans, Sunrisers Hyderabad and Rajasthan Royals made it to the play-offs, legacy units such as CSK, Mumbai Indians and Kolkata Knight Riders fell by the wayside. A churn is on the cards and Rishabh Pant has already relinquished his captaincy with the Lucknow Super Giants. India, the reigning T20 champion, has enough talent as was evident through the IPL. The club against country debate too stirred up as England speedster Jofra Archer's IPL contract overlapped with the one that he has with The England and Wales Cricket Board. The IPL is a massive sporting brand but it should not cannibalise traditional cricket.

03J6. Brand value
ब्रांड मूल्य

- A commanding display over **Gujarat Titans** in the final at Ahmedabad's **Narendra Modi Stadium** on Sunday ensured that RCB joined the likes of **Chennai Super Kings (CSK)** and **Mumbai Indians**, teams that have won the title for two consecutive years.

रविवार को अहमदाबाद के **नरेंद्र मोदी स्टेडियम** में फाइनल में **गुजरात टाइटंस** पर शानदार प्रदर्शन ने सुनिश्चित किया कि RCB अब **चेन्नई सुपर किंग्स (CSK)** और **मुंबई इंडियंस** जैसी उन टीमों की श्रेणी में शामिल हो जाए, जिन्होंने लगातार दो वर्षों तक खिताब जीता है।

- Ever since the league's inception in **2008**, the Bengaluru squad tended to flourish in spurts and then fade away.

2008 में लीग की शुरुआत से ही बेंगलुरु की टीम बीच-बीच में शानदार प्रदर्शन करती थी, लेकिन बाद में उसका प्रदर्शन कमजोर पड़ जाता था।

- Last year, however, a turnaround was effected but as **Rajat Patidar's** men exulted, the moment turned tragic with 11 fans losing their lives in a stampede outside the **M. Chinnaswamy Stadium** in Bengaluru.

हालाँकि, पिछले वर्ष परिस्थितियाँ बदलीं, लेकिन जब **रजत पाटीदार** की टीम जीत का उत्सव मना रही थी, उसी समय बेंगलुरु के **एम. चिन्नास्वामी स्टेडियम** के बाहर भगदड़ में 11 प्रशंसकों की मृत्यु से यह क्षण दुखद बन गया।

- Having commenced on **March 28**, the IPL with 10 teams and 74 matches, had a bloated air and at times viewer interest dipped.

28 मार्च से शुरू हुए IPL में 10 टीमें और 74 मैच शामिल थे, जिसके कारण यह कुछ अधिक विस्तारित प्रतीत हुआ और कई बार दर्शकों की रुचि भी कम हुई।

- Just as **Sachin Tendulkar** made his international debut at 16, Sooryavanshi too seems set to join that space of young talent pursuing higher glory.

जिस प्रकार **सचिन तेंदुलकर** ने 16 वर्ष की आयु में अंतरराष्ट्रीय पदार्पण किया था, उसी प्रकार सूर्यवंशी भी युवा प्रतिभाओं की उस श्रेणी में शामिल होते दिखाई दे रहे हैं, जो उच्च उपलब्धियों की ओर अग्रसर हैं।

- Just as RCB, Titans, **Sunrisers Hyderabad** and **Rajasthan Royals** made it to the play-offs, legacy units such as CSK, Mumbai Indians and **Kolkata Knight Riders** fell by the wayside.

जहाँ RCB, टाइटंस, **सनराइजर्स हैदराबाद** और **राजस्थान रॉयल्स** प्ले-ऑफ में पहुँचे, वहीं पारंपरिक सफल टीमें जैसे CSK, मुंबई इंडियंस और **कोलकाता नाइट राइडर्स** पीछे रह गईं।

- The IPL is a massive sporting brand but it should not cannibalise traditional cricket.

IPL एक विशाल खेल ब्रांड है, लेकिन इसे पारंपरिक क्रिकेट को नुकसान पहुँचाने वाला नहीं बनना चाहिए।

PATRIOTIC IAS

The finish line is still far for Indian sprinting

Gurindervir Singh's national-record, 10.09s, ranks 524th on the all-time list; only 39 countries have broken the 10-second barrier

PCS

DATA POINT

Devyanshi Bihani

By the time the men's 100m final began at the Federation Cup in Ranchi on May 23, 2026, India's national record had already changed hands twice within that tournament – a first in Indian sprinting. A day earlier, Gurindervir Singh had lowered the national record to 10.17 seconds in the first semifinals. Minutes later, Animesh Kujur reclaimed it with 10.15 seconds in the second semi-final. Gurindervir seized the opportunity the final offered. His time of 10.09 seconds not only restored the record to his name but also made him the first Indian to break the 10.1-second barrier.

The achievement marked the latest chapter in a rivalry that is transforming Indian sprinting. Anil Kumar's national record of 10.21 seconds had remained unbeaten since 2000. By clocking 10.18 seconds, Animesh not only broke that in July 2025, but became the first Indian to cross the 10.2-second barrier.

While it took 25 years for Indian men's sprinting to breach the 10.2-second barrier, it has seen a dramatic leap forward since then. With Gurindervir's 10.09 seconds, followed by Animesh's 10.15 and 10.18 seconds, and Manikanta Hoblidhar's 10.19 seconds, four of the five fastest 100m sprints by Indian men have been recorded in the last two seasons. But where does India's fastest-ever sprinter stand in the global arena?

An analysis of World Athletics' all-time men's 100m lists shows both the significance of Gurindervir's breakthrough and how far India remains from sprinting's elite. On the global all-time list, Gurindervir's record ranks only 524th.

At the very top, the sport remains remarkably concentrated. Ten of the top 11 performances belong to sprinters from just two countries – Jamaica and the U.S. Jamaica's Usain Bolt holds the world record at 9.58 seconds. American Tyson Gay shares the second-fastest time in history at 9.69 seconds. The only exception is Kenya's Ferdinand Omanyala, whose 9.77-second run shares the 10th place **(Chart 1)**.

The sub-10-second barrier remains one of athletics' most exclusive benchmarks. More than half a century after electronic timing became the standard in 1968, only 39 countries have produced athletes with 100m runs recorded under 10 seconds **(Chart 2)**.

Martin Owens, Animesh's coach, told *The Hindu* that breaking that barrier requires far more than raw speed. "You need natural talent. You need good facilities. You need good recovery and medical backup. You need an intelligent programme," Mr. Owens said, adding that coaching from an early age, financial support and international exposure are also crucial.

When every country's fastest man ever is compared, India sits at around 65th among 182 nations. Several nations with populations under 1.5 crore rank ahead of India, including Trinidad and Tobago, Botswana and Namibia.

It is notable that the fastest sprint performances are usually recorded with a helping breeze. An analysis of the best performances from these 182 nations shows that 139 were achieved with tailwinds between 0.1 and 2 metres per second, while only 17 came while facing headwinds **(Chart 3)**. Even slight wind assistance matters in an event decided by hundredths of a second.

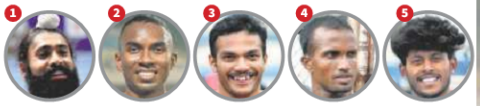
Four of India's top five performances, including Gurindervir's, were recorded with tailwinds. However, his national record came with a relatively modest breeze of 0.3 metres per second, indicating scope for faster performances under more favourable conditions.

Gurindervir, after setting the new record, told the media that the world would soon see Indians running below 10 seconds.

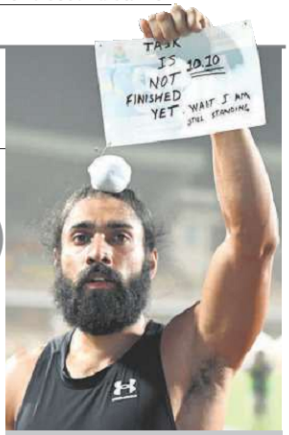
Off and running

The data for the charts were sourced from World Athletics, the international governing body for the sport of athletics

TABLE 1: The top five Indian men's 100m performances



India Rank	World Rank	Competitor	Time (in seconds)	Wind (in m/s)	Date of performance
1	524	Gurindervir Singh	10.09	0.3	May 23, 2026
2	878	Animesh Kujur	10.15	0.3	May 22, 2026
3	1180	Manikanta Hoblidhar	10.19	-0.6	September 28, 2025
4	1362	Anil Kumar	10.21	2	July 5, 2000
5	1480	Tamilarasu Senthilkumar	10.22	0.2	August 20, 2025



During his celebrations, Gurindervir Singh held up the back of his bib, which said, "Task is not finished yet." RITU RAJ KONWAR

CHART 1: The all-time top-700 men's 100m performances

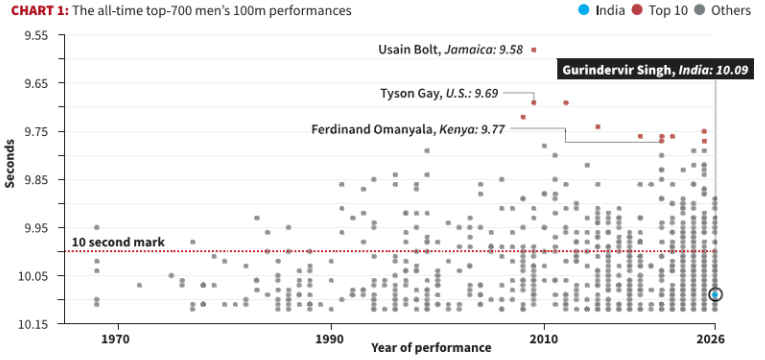


CHART 2: Fastest men's 100m performances of each country, grouped by continent and whether the 10-second barrier has been broken

- A day earlier, **Gurindervir Singh** had lowered the national record to **10.17 seconds** in the first semifinals.
  एक दिन पहले **गुरिंदरवीर सिंह** ने पहले सेमीफाइनल में राष्ट्रीय रिकॉर्ड को घटाकर **10.17 सेकंड** कर दिया था।
- His time of **10.09 seconds** not only restored the record to his name but also made him the first Indian to break the **10.1-second barrier**.
  उनका **10.09 सेकंड** का समय न केवल राष्ट्रीय रिकॉर्ड को पुनः उनके नाम कर गया, बल्कि उन्हें **10.1 सेकंड की बाधा** तोड़ने वाला पहला भारतीय भी बना दिया।
- **Anil Kumar's** national record of **10.21 seconds** had remained unbeaten since **2000**.
  अनिल कुमार का **10.21 सेकंड** का राष्ट्रीय रिकॉर्ड **2000** से अटूट बना हुआ था।
- By clocking **10.18 seconds**, Animesh not only broke that in **July 2025**, but became the first Indian to cross the **10.2-second barrier**.
  10.18 सेकंड का समय निकालकर अनिमेष ने **जुलाई 2025** में न केवल वह रिकॉर्ड तोड़ा, बल्कि **10.2 सेकंड की बाधा** पार करने वाले पहले भारतीय भी बने।
- On the global all-time list, Gurindervir's record ranks only **524th**.
  वैश्विक सर्वकालिक सूची में गुरिंदरवीर का रिकॉर्ड केवल **524वें** स्थान पर है।
- At the very top, the sport remains remarkably concentrated.
  शीर्ष स्तर पर यह खेल अब भी कुछ सीमित देशों के प्रभुत्व में केंद्रित है।
- Ten of the top 11 performances belong to sprinters from just two countries — **Jamaica** and the **U.S.**
  शीर्ष 11 प्रदर्शनों में से 10 केवल दो देशों — **जमैका** और **अमेरिका** — के धावकों के नाम हैं।
- Jamaica's **Usain Bolt** holds the world record at **9.58 seconds**.
  जमैका के **उसैन बोल्ट** के नाम **9.58 सेकंड** का विश्व रिकॉर्ड दर्ज है।
- American **Tyson Gay** shares the second-fastest time in history at **9.69 seconds**.
  अमेरिका के **टायसन गे** के नाम इतिहास का दूसरा सबसे तेज़ समय **9.69 सेकंड** दर्ज है।

Questions and Answers to the previous day's daily quiz: 1. Apart from Royal Challengers Bengaluru, these two teams have defended their crowns. **Ans: Chennai Super Kings and Mumbai Indians**
2. The only batter to have scored two tons. **Ans: CSK's Sanju Samson**
3. The Shaheed Veer Narayan Singh International Cricket Stadium and Rajiv Gandhi International Stadium are located in these State capitals. **Ans: Raipur and Hyderabad**
4. A unique factor about Match 38 played on April 26. **Ans: It was the only one to be decided by a Super Over where KKR prevailed over the host LSG**
5.The first player to win back-to-titles with two different teams. **Ans: Krunal Pandya (MI in 2019 & 20) and RCB (25 & 26)**
6. Teenage sensation Vaibhav Sooryavanshi won these official awards. **Ans: Most Valuable Player (₹15 lakh), Emerging player (₹10 lakh), Super Striker (Tata Sierra SUV) and Super Sixes (₹10 lakh)**
Visual: Name this bowler who was the only one to take five wickets in a match. **Ans: Mohsin Khan (LSG)**
Early birds: Elango P. | Amit Saxena

03J6. QUIZ: IPL

1. Teams That Successfully Defended Their IPL Titles

- Chennai Super Kings (CSK) and Mumbai Indians (MI)
- Royal Challengers Bengaluru (RCB) joined a very exclusive group of IPL teams by successfully defending their title in IPL 2026.
- Mumbai Indians defended their title in 2020 after winning in 2019, while Chennai Super Kings retained their crown in 2011 after winning in 2010.

2. The Only Batter to Score Two Centuries

- Sanju Samson emerged as the only batter to score **two centuries in IPL 2026**.
- His second hundred of the season made him the only player to achieve multiple centuries during the tournament.

3. Locations of Two Major IPL Stadiums

- The **Shaheed Veer Narayan Singh International Cricket Stadium** is located in **Raipur**.
- The **Rajiv Gandhi International Cricket Stadium** is situated in **Hyderabad**.

4. Unique Feature of Match 38 Played on April 26

- The match was decided by a Super Over, with KKR defeating LSG.
- Match 38 of IPL 2026 became memorable because it was the **only match of the season to be decided through a Super Over**.
- The contest between **Kolkata Knight Riders (KKR) and Lucknow Super Giants (LSG)** ended in a tie after both teams scored identical totals.

5. First Player to Win Back-to-Back IPL Titles with Two Different Teams

- Krunal Pandya created a unique IPL record by winning consecutive IPL titles with **different franchises**. He was part of **Mumbai Indians' championship-winning teams in 2019 and 2020**, and later became a member of **Royal Challengers Bengaluru's title-winning squads in 2025 and 2026**.

6. Awards Won by Vaibhav Sooryavanshi

- Teenage sensation **Vaibhav Sooryavanshi** enjoyed a breakthrough IPL 2026 season and received multiple official awards. He won the **Most Valuable Player (MVP)** award for his overall impact on matches.
- He was also named the **Emerging Player of the Season**, recognizing his exceptional performances at a young age.
- Additionally, he secured the **Super Striker Award** for maintaining an outstanding strike rate and the **Super Sixes Award** for hitting the highest number of sixes.
- His record-breaking performances established him as one of the brightest young talents in Indian cricket.

Pope picks first lay woman to head communications dept. at Vatican

I know I am not far away from the top

After quietly climbing to World No. 40, Chotrani has his eyes fixed on the Asian Games singles gold; the 24-year-old, who is the second highest-ranked men's player in the country, feels he can improve further by working on the mental and physical aspects of his game

INTERVIEW

Veer Chotrani

[redacted]

K. Keerthivasan

After taking up squash full-time following his graduation from Cornell University in the USA two years ago, Veer Chotrani has emerged as one of the players to watch out for on the PSA Tour.

The 24-year-old from Mumbai has quietly climbed the PSA rankings ladder to a career-high World No. 40, registering notable wins over top players. Chotrani has now set his sights on winning the Asian Games gold medal in singles, which offers direct qualification for the 2028 Los Angeles Olympics.

"If I win the Asian Games singles gold, I will clinch an Olympics berth. Nobody knows who will play in the individual events (at the Asian Games) because you have the mixed doubles event as well. But if I get a chance to play singles, it will be a pretty good opportunity," Chotrani told *The Hindu*.

He also spoke about competing full-time on the PSA Tour, the challenges a professional player faces, and his desire to perform better in Platinum events in the new season.

You are ranked 40th in the world. Are you satisfied with your season?

Yes, it was good. I've seen progress in every department of my game. I had some good wins. There were also a few matches where I didn't get the result, but I feel that my performances against some of the top players were really good. Overall, it was a positive season.

You registered some impressive wins over Abhay Singh and other higher-ranked players this season. Which performances would you consider the highlights?

I beat France's Baptiste Masotti, who was in the top 20, at the Squash on Fire Open in Washington. That was probably my biggest win... my first victory over a top-20 player. I beat Abhay twice (in the Indian Tour in Mumbai and the World championships in Giza) out of the three times we played each other. I played one of my best matches when I pushed top-10 player Joel Makin (Wales) to five games at the New Zealand Open in Christchurch. Reaching the quarterfinals of the Hamburg Open was great.

These kinds of performances have given me a lot of confidence and motivation to keep pushing. I know that I have the potential to get up there very soon. It's just a matter of time before I put together a consistent run of good results. Hopefully, that happens next season.

Which are the areas you think you need to work on?

My game has definitely improved, but I still think there is plenty of work to do, especially on the mental and physical aspects. That is what really separates players like me from the top guys. At this level, almost every player has the squash ability to compete at a very high standard. But who is willing to push themselves physically and mentally to the absolute limit to get over the line? That is what separates the top-10 players from those ranked in the 30s and 40s.

That is something I'm working on. The more exposure I got against the top-10 and top-20 players this season, the more I learnt. It gave me a much better understanding of what it takes to compete at the highest level, something I didn't fully have before this season. Being able to step on court with someone like Makin, who is among the top players in the world and one of the fittest on the Tour, and being able to stay with him and compete was a huge positive for me. In today's game, the physical and mental sides are everything, so those are areas I really want to focus on.

Do you take advice from your father Manish Chotrani, who is a former National champion?

We only talk squash; we love the sport way too much. It's our common language. He only wants me to get better every time I'm training or playing a tournament. All the time we're just discussing what the next step should be. It's good to have someone at home who keeps a check on me. He is someone who understands me very well. It's very good to have that kind of sporting, squash mind... someone who can analyse my game very well. He talks to my coach David Palmer and gets feedback from him. Whenever I'm in Mumbai, I'm with my dad on the court. He's the one who hits with me all the time.

All eight of your PSA titles have come at the Challenger class. Do you think you need to win Copper, Bronze and bigger World Tour events to improve your ranking further, especially with the Asian Games coming up in September-October?

Yes, all of them have been at the Challenger level, but I also made two finals (St. James Expression Open in Springfield, the USA, and the Indian Open, Mumbai) at the World Tour level this season. Obviously, the goal is to start winning World Tour titles, beginning with Copper events. I don't think that I'm too far away from that level.

There is intense competition for places in the Indian team for the Asian Games. You are the second highest-ranked men's player behind Abhay. With the rankings getting updated every week, how difficult is it to maintain your position on the tour?

Honestly, I'm not really thinking about the rankings. I just want to focus on my preparation and game. Ramit Tandon (47) and Velavan Senthilkumar (53) and I are extremely close in the standings, while Abhay (24) is ahead of us. But I believe that on any given day, all four of us are capable of beating each other. So, I'm not really thinking too much about all of that.

India now has four men in the world's top 60...

To be honest, even before COVID-19, we had a few players in the top 50. Saurav Ghosal was obviously far ahead of everyone at that point. We also had players like Ramit in the top 50. Harinderpal Singh Sandhu, Vikram Malhotra and Mahesh Mangaonkar... all of whom broke into the top 50 at different points of their careers. Maybe it wasn't as consistent then, but Indian squash has definitely had players capable of reaching that level. Right now, we have a very healthy rivalry among the four of us. Going into the Asian Games, there is a huge opportunity for us to defend our team gold. I genuinely think we have a much stronger team and a much better chance than last time.

Who could be India's toughest opponents at the Asian Games?

Traditionally, it has been Pakistan, Hong Kong and Malaysia. That has been the case for many years, and I don't think it will change this year either. Based on world rankings, I think we have the most consistent and solid team. That makes a huge difference in terms of depth. Hopefully, we go into the Games as the No. 1 seeded team. After that, it's all about delivering on the big stage at the right moment.

R. RAVINDRAN

In the past, you had balanced playing on the PSA Tour with college squash. How has the transition to professional squash been?

It's been great. I've been playing full-time since September 2024. I've been competing regularly and performing well on the PSA Tour, which is the reason for my rise in the rankings. I don't think there was much pressure on me when I started playing full-time. I planned my schedule well so that I had enough flexibility to train and recover. Physically, it wasn't too taxing, but mentally, it was tougher because of all the travelling – constantly moving from one country to another, flights, hotels and adapting to different conditions.

But honestly, I had zero pressure because I felt I had nothing to lose. It was my first full season, and my only goal was to play good squash and climb as high as possible in the rankings, especially since I hadn't played many PSA events before. I also wanted to enjoy the experience – travelling to different countries, competing at different venues, in different atmospheres and in front of different crowds. It was a lovely experience, and the exposure I gained in my first season is something I'll always cherish.

Of course, there were a lot of learnings as well. Last summer, I worked extremely hard on my physical conditioning, and I could clearly see the improvements this season. I know I need to keep doing that consistently every year, and that's going to remain a major focus for me going forward.

What is your next objective?

I would love to play in the individual event (singles) at the Asian Games. It is not just about winning an Asian Games gold; there is qualification for the 2028 Los Angeles Olympics, too. I would love to have a shot at that. I also aim to make it to the Platinum events next season. I need to be in the top 35 in the world to be able to get into those events. I'll be working towards that; I'm not far away.

Is there one eye on the Los Angeles Olympics?

Winning the singles title at the Asian Games is my major goal. If I win gold, I will clinch an Olympics berth. Nobody knows who will play in the individual events (at the Asian Games) because you have the mixed doubles event as well. But if I get a chance to play singles, it will be a pretty good opportunity.

Blue Moon

BIG SHOT

A blue moon, the second full moon in a calendar month, rises behind the ancient Greek temple of Poseidon at Cape Sounion south of Athens, on May 31. AFP

- A blue moon, the second full moon in a calendar month, rises behind the ancient Greek temple of Poseidonat Cape Sounion south of Athens, on May 31.
- A **Blue Moon** is a special term used for an unusually timed full moon. Despite its name, the Moon does **not actually appear blue** in most cases.

Monthly Blue Moon

- When **two full moons occur in the same calendar month**, the second full moon is called a Blue Moon.
- This happens because:
  - A full moon occurs roughly every **29.5 days**.
  - Some months are **31 days long**.
  - Therefore, occasionally a month can contain two full moons.
- Example: If a full moon occurs on **1st August and another on 31st August**, the second one is called a Blue Moon.
- This type of Blue Moon occurs roughly once every: **2.5 to 3 years**.

India losing ability to build its own instruments: climate science report

Use of imported equipment that remains uncalibrated leads to incorrect data being reported, marring credibility of Indian science; researchers also aim to study long-term impact of uncontrolled tapping of natural resources for renewable energy

GS I: Geography GS III: S&T

Jacob Koshy
NEW DELHI

A group of India's leading climate scientists has warned that the country has almost lost the ability to build its own scientific instruments, leaving its climate observations dependent on imported equipment that is often run uncalibrated for years. This has led to "incorrect data being reported in national and international journals, often leading to questions on the credibility of Indian science", they said.

The researchers also called for long-term studies to evaluate the climate consequences of the "uncontrolled" growth of renewable energy installations, warning that the effects of large solar and wind plants on the climate remain "poorly understood".

The warning appeared in the Mega Science Vision-2035 (MSV) report on Climate Research, a road map prepared by the Indian climate research community with the Indian Institute of Science, Bengaluru, as the nodal institution, and submitted to the Office of the Principal Scientific Adviser (PSA) to the Union government.

The report was made public earlier this week.

Heat is on: The warning lands at a time when India is already facing the harmful effects of the warming climate. SHIV KUMAR PUSHPAKAR

Atmanirbhar challenges

The warning on instruments sits awkwardly with the government's drive for "atmanirbhar" or self-reliance. To boost domestic manufacturing, the Government e-Marketplace (GeM) portal was made mandatory for public scientific institutions, requiring procurement from the lowest-bidding India-registered vendor.

As *The Hindu* has reported, scientists found this a stumbling block when they needed customised equipment built to high-quality standards, with GeM vendors often unable to meet such specifications and the alternative – a global tender – entailing long bureaucratic delays.

In June 2025, the Finance Ministry rolled back some of the rules amid complaints over sub-standard materials.

The warning also lands at a time when India is already facing the harmful effects of the warming climate, from intensifying heatwaves and erratic monsoons to accelerating Himalayan glacier melt – the very trends that reliable, well-calibrated observations are meant to track.

The MSV exercise, historically used to plan large, long-horizon projects in fields such as nuclear and high-energy physics, was for the first time extended to climate research, ecology and astronomy, and was facilitated by the PSA's office under Professor Ajay K. Sood.

On the energy transition, the report recommended devising "scientific methods to estimate the social cost of carbon [i.e., the cost of damages from an extra ton of CO2]" and a mechanism to implement the "polluter pays" principle to stop the atmosphere being used as "a dumping ground" for emissions, while seeking ways to "offset the effects of the carbon tax on the poor."

The scientists' justification for studying "uncontrolled" renewables is cautionary rather than sceptical. The report said that while "renewable energy seems to be the right solution to replace polluting energy sources, studies are needed to understand the long-term consequences of the uncontrolled tapping of natural resources."

India has pledged 500 GW of non-fossil capacity by 2030, and crossed the halfway mark on installed electricity capacity from non-fossil sources in 2025.

Mega projects

The report called for an indigenous Earth System Model built "from first principles", distinct from existing Indian models which have been "adapted from the U.S. or Europe."

It also proposed eight "mega projects" – spanning observatories, satellites, in-situ networks, field campaigns, indigenous sensors, carbon-neutrality research and adaptation science – phased across three roughly five-year blocks until 2035.

03J6. India losing ability to build its own instruments: climate science report

Bolides: fireballs going boom

GS I: Geography

Vasudevan Mukunth

On May 30, a meteor exploded over northeastern U.S. while producing loud booming noises. NASA scientists said the object broke apart around 64 km above the ground as it was falling at more than 1,20,000 km/hr. The energy the explosion released was estimated to be equivalent to around 300 tonnes of TNT.

Experts often call these objects bolides. A bolide is an exceptionally bright meteor that breaks apart or explodes in the earth's atmosphere. These objects are originally small pieces of rock or metal in space that, after a close encounter with the earth, enter the atmosphere as meteors. As such a meteor falls, the air in front becomes compressed and heated, causing it to glow and produce a bright streak of light across the sky.

Most meteors are very small and burn up completely before reaching the ground. However, larger ones can survive for longer. If they become bright enough, they become fireballs. And if they fragment violently and release a large amount of energy, astronomers often call them bolides.

The rock or metal is usually some small fragment left behind by asteroids or, less often, comets. They orbit the sun until their paths intersect with that of the earth. When they enter the atmosphere, they can travel tens of kilometres every second. The loud booms are the resulting shockwaves.

A frame grab of a video recorded by a dashboard camera shows the Chelyabinsk meteorite descending in February 2013. AP

A famous example is the Chelyabinsk bolide, which exploded over Russia in 2013, generating a powerful shockwave that damaged buildings and injured more than a thousand people.

03J6. Bolides: fireballs going boom
बोलाइड्स: विस्फोट करते अग्नि-पिंड

- On **May 30**, a meteor exploded over northeastern **U.S.** while producing loud booming noises.
  30 मई को उत्तर-पूर्वी **संयुक्त राज्य अमेरिका** के ऊपर एक उल्का विस्फोटित हुआ, जिससे तेज़ गूँजने वाली ध्वनियाँ उत्पन्न हुईं।
- **NASA** scientists said the object broke apart around **64 km** above the ground as it was falling at more than **1,20,000 km/hr**.
  नासा के वैज्ञानिकों ने कहा कि यह वस्तु पृथ्वी से लगभग **64 किलोमीटर** ऊपर टूट गई, जबकि यह **1,20,000 किमी/घंटा** से अधिक की गति से गिर रही थी।
- The energy the explosion released was estimated to be equivalent to around **300 tonnes of TNT**.
  इस विस्फोट से निकलने वाली ऊर्जा का अनुमान लगभग **300 टन टीएनटी** के बराबर लगाया गया।
- Experts often call these objects **bolides**.
  विशेषज्ञ इन वस्तुओं को प्रायः **बोलाइड** कहते हैं।
- A **bolide** is an exceptionally bright meteor that breaks apart or explodes in the earth's atmosphere.
  बोलाइड एक अत्यंत चमकीला उल्का होता है, जो पृथ्वी के वायुमंडल में टूट जाता है या विस्फोटित हो जाता है।
- These objects are originally small pieces of rock or metal in space that, after a close encounter with the earth, enter the atmosphere as meteors.
  ये वस्तुएँ मूल रूप से अंतरिक्ष में मौजूद चट्टान या धातु के छोटे टुकड़े होती हैं, जो पृथ्वी के निकट आने के बाद उल्का के रूप में वायुमंडल में प्रवेश करती हैं।

- As such a meteor falls, the air in front becomes compressed and heated, causing it to glow and produce a bright streak of light across the sky.
  जब ऐसा उल्का गिरता है, तो उसके सामने की वायु संकुचित और गर्म हो जाती है, जिससे वह चमकने लगता है और आकाश में प्रकाश की एक चमकीली रेखा उत्पन्न करता है।
- Most meteors are very small and burn up completely before reaching the ground.
  अधिकांश उल्काएँ बहुत छोटी होती हैं और पृथ्वी की सतह तक पहुँचने से पहले ही पूरी तरह जल जाती हैं।
- If they become bright enough, they become **fireballs**.
  यदि वे अत्यधिक चमकीली हो जाएँ, तो उन्हें **फायरबॉल** कहा जाता है।
- And if they fragment violently and release a large amount of energy, astronomers often call them **bolides**.
  और यदि वे तीव्रता से टूटकर अत्यधिक मात्रा में ऊर्जा छोड़ें, तो खगोलविद उन्हें प्रायः **बोलाइड** कहते हैं।
- The rock or metal is usually some small fragment left behind by **asteroids** or, less often, **comets**.
  यह चट्टान या धातु प्रायः **क्षुद्रग्रहों** अथवा कम मामलों में **धूमकेतुओं** के पीछे छूटे छोटे टुकड़े होते हैं।
- They orbit the sun until their paths intersect with that of the earth.
  वे सूर्य की परिक्रमा करते रहते हैं, जब तक कि उनका मार्ग पृथ्वी के मार्ग से न टकरा जाए।
- When they enter the atmosphere, they can travel tens of kilometres every second.
  जब वे वायुमंडल में प्रवेश करते हैं, तो वे प्रत्येक सेकंड में कई किलोमीटर की दूरी तय कर सकते हैं।
- The loud booms are the resulting shockwaves.
  तेज़ गूँजने वाली ध्वनियाँ उसी से उत्पन्न आघात तरंगें होती हैं।
- A famous example is the **Chelyabinsk bolide**, which exploded over **Russia** in **2013**, generating a powerful shockwave that damaged buildings and injured more than a thousand people.
  एक प्रसिद्ध उदाहरण **चेल्याबिंस्क बोलाइड** है, जो **2013** में **रूस** के ऊपर विस्फोटित हुआ था, जिससे उत्पन्न शक्तिशाली आघात तरंगों ने इमारतों को क्षतिग्रस्त कर दिया और एक हजार से अधिक लोग घायल हो गए।

Benin president visits Niger, a first since 2023 coup sparked tensions

GS I: Geography

Agence France-Presse
ABIDJAN

Benin's new leader was in Niger on Tuesday, state TV showed, the first such presidential visit to Niamey since a 2023 coup, in a sign of easing tensions between the neighbours.

Niger's military leaders, who broke off ties with traditional ally France, closed the border with Benin after accusing the country of harbouring "French bases" bent on destabilising Niger.

Junta chief Abdourahamane Tiani greeted Benin President Romuald Wadagni, who took over on May 24, Tele Sahel showed in its live coverage.

The two leaders are expected to discuss relaunching security cooperation between the countries, which are both battling jihadist violence.

Benin's newly elected President Romuald Wadagni during his inauguration ceremony in Cotonou on May 24. REUTERS

The visit "is part of the active neighbourhood diplomacy that President Wadagni intends to pursue with all the states bordering Benin", the Beninese presidency said in a statement.

In an initial sign of improving relations, Niger's Prime Minister Ali Lamine Zeine had attended Mr. Wadagni's inauguration in Cotonou where he spoke of "a new path".

Late on Monday, Niger state TV had broadcast reports praising "the age-old relations" between the "brotherly peoples of Niger and Benin" as well as a "desire to ease regional diplomatic tensions".

Main roads in Niamey on Tuesday were decorated with flags of the two countries and hundreds of Beninese gathered to greet the presidential convoy.

Niger is Mr. Wadagni's second foreign trip after he visited Nigeria on Monday.

Mr. Wadagni, the former Finance Minister and chosen successor of ex-President Patrice Talon, won the election with 94% of the vote.

A few days after his victory, Nigerien Interior Minister Mohamed Toumba said he was waiting for "goodwill gestures" from the new President, "for Benin to come out and say that it has nothing to do with France's interests, that Benin is not facilitating France's presence on its territory in order to attack its neighbours".

Niger regularly accuses Benin of harbouring French military bases which it says are training jihadists.

03J6. Benin president visits Niger, a first since 2023 coup sparked tensions

बेनिन के राष्ट्रपति ने नाइजर का दौरा किया, 2023 के तख्तापलट के बाद यह पहली यात्रा

- **Benin's** new leader was in **Niger** on Tuesday, state TV showed.
  राज्य टीवी के अनुसार, **बेनिन** के नए नेता मंगलवार को **नाइजर** पहुंचे।
- Niger's military leaders, who broke off ties with traditional ally **France**, closed the border with Benin.
  नाइजर के सैन्य नेताओं ने, जिन्होंने पारंपरिक सहयोगी **फ्रांस**

से संबंध तोड़ लिए थे, बेनिन के साथ सीमा बंद कर दी थी।

- After accusing the country of harbouring "**French bases**" bent on destabilising Niger.
  उन्होंने बेनिन पर नाइजर को अस्थिर करने के उद्देश्य से "**फ्रांसीसी सैन्य ठिकानों**" को शरण देने का आरोप लगाया था।
- "For Benin to come out and say that it has nothing to do with France's interests."
  "ताकि बेनिन स्पष्ट करे कि उसका फ्रांस के हितों से कोई संबंध नहीं है।"
- "That Benin is not facilitating France's presence on its territory in order to attack its neighbours."
  "और बेनिन अपने क्षेत्र में फ्रांस की मौजूदगी को अपने पड़ोसी देशों पर हमला करने के लिए सुविधा नहीं दे रहा है।"
- Niger regularly accuses Benin of harbouring **French military bases**.
  नाइजर नियमित रूप से बेनिन पर **फ्रांसीसी सैन्य अड्डों** को शरण देने का आरोप लगाता है।
- Which it says are training jihadists.
  नाइजर का कहना है कि ये अड्डे जिहादियों को प्रशिक्षण दे रहे हैं।

Can CBSE's marking system be reformed for transparency and credibility?

Portal glitches, blurred scans, and evaluation anomalies exposed weaknesses in the rollout of the OSM system. Robust SOPs, secure digital infrastructure, and free access to answer scripts can help restore accountability and public trust in the evaluation process

GS II: Governance

Rajeev Kumar

The Central Board of Secondary Education (CBSE), responding to long-standing demands for greater transparency in evaluation, introduced the on-screen marking (OSM) system to standardise answer-script assessment through digital technology. Under this framework, answer books are scanned into secure digital files and evaluated online through a cyber-secure platform enabling digital monitoring, random allocation of scripts, centralised moderation, and automated verification checks.

The initiative sought to improve transparency, accuracy, confidentiality, and uniformity in marking. However, it soon faced controversies over server failures, portal glitches, blurred or incomplete scanned scripts, unchecked responses, inconsistent step-marking, evaluation discrepancies, payment gateway issues, and concerns about the reliability and verifiability of the digital evaluation process.

Ironically, a system introduced to eliminate evaluation irregularities itself came under scrutiny for procedural, academic, and technological lapses. It also raises a fundamental question: why should students be charged to access and verify answer scripts that are largely their own intellectual work and have already been digitised as part of the evaluation process?

Evaluation is a crucial component of the Teaching–Learning–Evaluation framework since it directly influences students' academic progression. PTI

The evaluation system

Evaluation remains the most consequential component of the Teaching-Learning-Evaluation (TLE) framework because it directly influences students' academic progression, college admissions, scholarships, and career opportunities, particularly for Class XII students. After years of preparation and intense competition, students have a legitimate right to know how their answers were assessed, how step-marking was applied, and where marks were deducted.

Unlike multiple-choice-question (MCQ)-based examinations, where evaluation through optical mark recognition (OMR) sheets and answer keys is objective and machine-verifiable, descriptive examinations involve subjective assessment across multiple steps, methods, and interpretations. Different evaluators may award different marks for the same answer depending on reasoning, presentation, or methodology.

Given the massive scale of Board examinations involving millions of answer scripts, maintaining consistency in descriptive evaluation remains a major academic and technological challenge.

OSM rollout and challenges

CBSE's OSM system marked a significant shift from the conventional pen-and-paper (PnP) evaluation to digital assessment of scanned answer scripts. The system was expected to improve transparency, enable standardisation and centralised monitoring, and reduce manual evaluation errors. However, the rollout reportedly suffered from hurried implementation, weak digital infrastructure, poor-quality scanning systems, limited examiner training, and inadequate operational protocols. Complaints soon emerged.

The experience highlighted that digital evaluation is not merely a software transition but a complex academic and technological ecosystem that requires robust SOPs, secure infrastructure, examiner preparedness, audit mechanisms, and strong cybersecurity safeguards to ensure transparency, consistency, and accountability.

Scope for reforms in the OSM system

The Digital OSM framework should provide scanned answer books to all students free of cost, since scripts are already digitised before evaluation. CBSE should securely deliver encrypted digital copies within a fixed timeline through authenticated portals, email, or secure mobile platforms. Such a framework would make evaluation more transparent, traceable, scalable, and verifiable while reducing server congestion, manual intervention, and access-related disputes. The proposed system would, however, require a set of clearly defined standard operating procedures (SOP).

The CBSE should establish high-resolution scanning systems, encrypted archival and backup facilities, high-capacity cloud servers, and strong cybersecurity safeguards against unauthorised access or data manipulation. The complete workflow – including scanning, indexing, storage, evaluator access, digital delivery, and audit logging – should undergo repeated pilot testing and full-load simulations through local and pre-board examinations before nationwide rollout.

Evaluators, moderators, scanning staff, and administrators should undergo structured training in digital evaluation procedures, screen-based moderation, stepwise marking, and handling of scanned scripts. Students should use only black pens and standardised answer-writing formats to ensure clear scanning and readability of answer books and supplementary sheets.

Detailed subject-wise marking schemes, including step-marks and acceptable alternative methods, should be released within a week after the examinations. A short expert feedback window should be provided before Chief Examiners finalise marking schemes. This would help reduce ambiguities, improve standardisation, and minimise arbitrary variations in marking.

Additionally, within two to three weeks after examinations, encrypted digital answer scripts should be securely delivered to students and parents through authenticated portals, email, or registered mobile applications integrated with secure cloud and messaging APIs. Students or parents should confirm within 24 hours of receipt that the scripts are complete, readable, correctly indexed, and genuinely their own, including all supplementary sheets.

The evaluation should begin only after script verification is completed. Examiners must assess scripts strictly in accordance with approved stepwise marking schemes. Additional digital oversight tools, such as audit trails, online moderation, automated totaling checks, anomaly-detection systems, and random quality audits, should continuously monitor consistency, completeness, and adherence to SOPs.

Since students and parents would already possess both their answer scripts and official marking schemes, they can independently estimate their likely scores before the declaration of results. Significant deviations between self-estimated and officially awarded marks would help identify possible evaluation anomalies and enable targeted review or moderation.

Finally, re-checking and re-evaluation should continue as a safeguard mechanism with defined timelines and digital tracking. However, with the proposed SOPs already ensuring verified scripts and standardised marking schemes, grievances are expected to reduce substantially.

Such a framework would significantly strengthen transparency, accountability, and public trust in the evaluation process.

The way forward

A reliable Digital OSM system requires robust scanning infrastructure, secure archival systems, high-capacity servers, and strong cybersecurity safeguards. Given the scale of the CBSE examinations, repeated full-load testing and pilot runs are essential before nationwide implementation.

Structured training for examiners and scanning staff, along with standardised, stepwise marking schemes and disciplined digital evaluation protocols, are necessary to avoid blurred scans, unchecked answers, and inconsistent marking. With well-defined SOPs and secure implementation, digital OSM can improve the credibility, consistency, and accountability of large-scale examination evaluation in India.

Importantly, the same framework can be implemented even now, making the current crisis largely reversible within a few weeks at most. By proactively sharing scanned answer scripts with all students, enabling verification of script completeness and authenticity, ensuring transparent matching of awarded marks against approved marking schemes, and correcting evaluations where the prescribed marking scheme has not been properly followed, the CBSE can quickly restore confidence in the OSM process and regain much of the credibility lost during the rollout.

03J6. Can CBSE's marking system be reformed for transparency and credibility?

क्या पारदर्शिता और विश्वसनीयता के लिए CBSE की मूल्यांकन प्रणाली में सुधार किया जा सकता है?

- **Portal glitches**, blurred scans, and **evaluation anomalies** exposed weaknesses in the rollout of the **OSM system**.
  पोर्टल संबंधी त्रुटियों, धुंधली स्कैन प्रतियों और **मूल्यांकन संबंधी विसंगतियों** ने **ओएसएम प्रणाली** के कार्यान्वयन में कमजोरियों को उजागर किया।
- The **Central Board of Secondary Education (CBSE)**, responding to long-standing demands for greater transparency in evaluation, introduced the **on-screen marking (OSM) system** to standardise answer-script assessment through digital technology.
  केंद्रीय माध्यमिक शिक्षा बोर्ड (CBSE) ने मूल्यांकन में अधिक पारदर्शिता की लंबे समय से चली आ रही मांगों के प्रत्युत्तर में डिजिटल प्रौद्योगिकी के माध्यम से उत्तरपुस्तिकाओं के मूल्यांकन को मानकीकृत करने हेतु **ऑन-स्क्रीन मार्किंग (OSM) प्रणाली** प्रारंभ की।
- Under this framework, answer books are scanned into secure digital files and evaluated online through a cyber-secure platform enabling digital monitoring, random allocation of scripts, centralised moderation, and automated verification checks.
  इस व्यवस्था के अंतर्गत उत्तरपुस्तिकाओं को सुरक्षित डिजिटल फाइलों में स्कैन किया जाता है तथा साइबर-सुरक्षित प्लेटफॉर्म के माध्यम से ऑनलाइन मूल्यांकन किया जाता है, जिसमें डिजिटल निगरानी, उत्तरपुस्तिकाओं का यादृच्छिक आवंटन, केंद्रीकृत मॉडरेशन तथा स्वचालित सत्यापन जाँच जैसी सुविधाएँ शामिल हैं।
- The initiative sought to improve transparency, accuracy, confidentiality, and uniformity in marking.
  इस पहल का उद्देश्य मूल्यांकन में पारदर्शिता, शुद्धता, गोपनीयता और एकरूपता में सुधार करना था।
- However, it soon faced controversies over server failures, portal glitches, blurred or incomplete scanned scripts, unchecked responses, inconsistent step-marking, evaluation discrepancies, payment gateway issues, and concerns about the reliability and verifiability of the digital evaluation process.
  हालाँकि, शीघ्र ही इसे सर्वर विफलता, पोर्टल त्रुटियों, धुंधली अथवा अधूरी स्कैन की गई उत्तरपुस्तिकाओं, बिना जाँचे गए उत्तरों, असंगत चरणवार अंकन, मूल्यांकन विसंगतियों, भुगतान गेटवे संबंधी समस्याओं तथा डिजिटल मूल्यांकन प्रक्रिया की विश्वसनीयता और सत्यापन क्षमता को लेकर विवादों का सामना करना पड़ा।
- It also raises a fundamental question: why should students be charged to access and verify answer scripts that are largely their own intellectual work and have already been digitised as part of the evaluation process?
  यह एक मूलभूत प्रश्न भी उठाता है कि छात्रों से उन उत्तरपुस्तिकाओं तक पहुँच और सत्यापन के लिए शुल्क क्यों लिया जाए, जो मुख्यतः उनकी स्वयं की बौद्धिक संपत्ति हैं और जिन्हें मूल्यांकन प्रक्रिया के अंतर्गत पहले ही डिजिटीकृत किया जा चुका है?

The evaluation system
मूल्यांकन प्रणाली

- Evaluation remains the most consequential component of the **Teaching–Learning–Evaluation (TLE)** framework because it directly influences students' academic progression, college admissions, scholarships, and career opportunities, particularly for **Class XII** students.
  मूल्यांकन **शिक्षण–अधिगम–मूल्यांकन (TLE)** ढाँचे का सबसे महत्वपूर्ण घटक बना हुआ है, क्योंकि यह सीधे छात्रों की शैक्षणिक प्रगति, महाविद्यालय प्रवेश, छात्रवृत्तियों और करियर अवसरों को प्रभावित करता है, विशेषकर **कक्षा 12** के विद्यार्थियों के लिए।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- After years of preparation and intense competition, students have a legitimate right to know how their answers were assessed, how step-marking was applied, and where marks were deducted.
  वर्षों की तैयारी और तीव्र प्रतिस्पर्धा के बाद छात्रों को यह जानने का वैध अधिकार है कि उनके उत्तरों का मूल्यांकन कैसे किया गया, चरणवार अंकन कैसे लागू किया गया तथा अंक कहाँ काटे गए।
- Unlike multiple-choice-question (**MCQ**)-based examinations, where evaluation through optical mark recognition (**OMR**) sheets and answer keys is objective and machine-verifiable, descriptive examinations involve subjective assessment across multiple steps, methods, and interpretations.
  बहुविकल्पीय प्रश्न (**MCQ**) आधारित परीक्षाओं के विपरीत, जहाँ ऑप्टिकल मार्क रिकग्निशन (**OMR**) शीट और उत्तर कुंजी के माध्यम से मूल्यांकन वस्तुनिष्ठ तथा मशीन द्वारा सत्यापित होता है, वर्णनात्मक परीक्षाओं में विभिन्न चरणों, विधियों और व्याख्याओं पर आधारित व्यक्तिपरक मूल्यांकन शामिल होता है।

OSM rollout and challenges
OSM का क्रियान्वयन और चुनौतियाँ

- However, the rollout reportedly suffered from hurried implementation, weak digital infrastructure, poor-quality scanning systems, limited examiner training, and inadequate operational protocols.
  हालाँकि, रिपोर्टों के अनुसार इसका क्रियान्वयन जल्दबाजी में किया गया, जिसमें कमजोर डिजिटल अवसंरचना, निम्न गुणवत्ता वाली स्कैनिंग प्रणाली, सीमित परीक्षक प्रशिक्षण तथा अपर्याप्त संचालन प्रोटोकॉल जैसी समस्याएँ रहीं।
- The experience highlighted that digital evaluation is not merely a software transition but a complex academic and technological ecosystem that requires robust **SOPs**, secure infrastructure, examiner preparedness, audit mechanisms, and strong cybersecurity safeguards to ensure transparency, consistency, and accountability.
  इस अनुभव ने स्पष्ट किया कि डिजिटल मूल्यांकन केवल सॉफ्टवेयर परिवर्तन नहीं है, बल्कि एक जटिल शैक्षणिक और तकनीकी तंत्र है, जिसके लिए पारदर्शिता, एकरूपता और जवाबदेही सुनिश्चित करने हेतु मजबूत **SOPs**, सुरक्षित अवसंरचना, परीक्षकों की तैयारी, ऑडिट तंत्र और सशक्त साइबर सुरक्षा उपायों की आवश्यकता होती है।

Scope for reforms in the OSM system
OSM प्रणाली में सुधार की संभावनाएँ

- CBSE should securely deliver encrypted digital copies within a fixed timeline through authenticated portals, email, or secure mobile platforms.
  CBSE को प्रमाणीकृत पोर्टलों, ईमेल अथवा सुरक्षित मोबाइल प्लेटफॉर्म के माध्यम से निर्धारित समयसीमा के भीतर एन्क्रिप्टेड डिजिटल प्रतियाँ सुरक्षित रूप से उपलब्ध करानी चाहिए।
- Such a framework would make evaluation more transparent, traceable, scalable, and verifiable while reducing server congestion, manual intervention, and access-related disputes.
  ऐसा ढाँचा मूल्यांकन को अधिक पारदर्शी, अनुरेखणीय, विस्तार योग्य और सत्यापन योग्य बनाएगा, साथ ही सर्वर पर दबाव, मैनुअल हस्तक्षेप और पहुँच संबंधी विवादों को कम करेगा।
- The CBSE should establish high-resolution scanning systems, encrypted archival and backup facilities, high-capacity cloud servers, and strong cybersecurity safeguards against unauthorised access or data manipulation.
  CBSE को उच्च-रिज़ॉल्यूशन स्कैनिंग प्रणालियाँ, एन्क्रिप्टेड अभिलेखन और बैकअप सुविधाएँ, उच्च क्षमता वाले क्लाउड सर्वर तथा अनधिकृत पहुँच और डेटा में हेरफेर के विरुद्ध मजबूत साइबर सुरक्षा उपाय स्थापित करने चाहिए।
- The complete workflow — including scanning, indexing, storage, evaluator access, digital delivery, and audit logging — should undergo repeated pilot testing and full-load simulations

through local and pre-board examinations before nationwide rollout.
संपूर्ण कार्यप्रवाह — जिसमें स्कैनिंग, इंडेक्सिंग, भंडारण, परीक्षक पहुँच, डिजिटल वितरण और ऑडिट लॉगिंग शामिल हैं — को देशव्यापी क्रियान्वयन से पहले स्थानीय तथा प्री-बोर्ड परीक्षाओं के माध्यम से बार-बार पायलट परीक्षण और पूर्ण-लोड सिमुलेशन से गुजरना चाहिए।

- Evaluators, moderators, scanning staff, and administrators should undergo structured training in digital evaluation procedures, screen-based moderation, stepwise marking, and handling of scanned scripts.
मूल्यांकनकर्ताओं, मॉडरेटरों, स्कैनिंग कर्मचारियों और प्रशासकों को डिजिटल मूल्यांकन प्रक्रियाओं, स्क्रीन-आधारित मॉडरेशन, चरणवार अंकन तथा स्कैन की गई उत्तरपुस्तिकाओं के प्रबंधन में संरचित प्रशिक्षण दिया जाना चाहिए।
- Students should use only black pens and standardised answer-writing formats to ensure clear scanning and readability of answer books and supplementary sheets.
छात्रों को केवल काले पेन और मानकीकृत उत्तर-लेखन प्रारूप का उपयोग करना चाहिए, ताकि उत्तरपुस्तिकाओं और पूरक पृष्ठों की स्पष्ट स्कैनिंग तथा पठनीयता सुनिश्चित की जा सके।
- Detailed subject-wise marking schemes, including step-marks and acceptable alternative methods, should be released within a week after the examinations.
चरणवार अंकन और स्वीकार्य वैकल्पिक विधियों सहित विस्तृत विषयवार मूल्यांकन योजनाएँ परीक्षा के एक सप्ताह के भीतर जारी की जानी चाहिए।
- Additionally, within two to three weeks after examinations, encrypted digital answer scripts should be securely delivered to students and parents through authenticated portals, email, or registered mobile applications integrated with secure cloud and **messaging APIs**.
इसके अतिरिक्त, परीक्षाओं के दो से तीन सप्ताह के भीतर एन्क्रिप्टेड डिजिटल उत्तरपुस्तिकाएँ प्रमाणीकृत पोर्टलों, ईमेल अथवा सुरक्षित क्लाउड और मैसेजिंग APIs से एकीकृत पंजीकृत मोबाइल अनुप्रयोगों के माध्यम से छात्रों और अभिभावकों को सुरक्षित रूप से उपलब्ध कराई जानी चाहिए।
- Students or parents should confirm within 24 hours of receipt that the scripts are complete, readable, correctly indexed, and genuinely their own, including all supplementary sheets.
छात्रों अथवा अभिभावकों को प्राप्ति के 24 घंटे के भीतर यह पुष्टि करनी चाहिए कि उत्तरपुस्तिकाएँ पूर्ण, पठनीय, सही प्रकार से अनुक्रमित तथा वास्तव में उनकी अपनी हैं, जिनमें सभी पूरक पृष्ठ शामिल हों।
- The evaluation should begin only after script verification is completed.
उत्तरपुस्तिका सत्यापन पूर्ण होने के बाद ही मूल्यांकन प्रारंभ होना चाहिए।
- Examiners must assess scripts strictly in accordance with approved stepwise marking schemes.
परीक्षकों को स्वीकृत चरणवार मूल्यांकन योजनाओं के अनुसार ही उत्तरपुस्तिकाओं का मूल्यांकन करना चाहिए।
- Additional digital oversight tools, such as audit trails, online moderation, automated totaling checks, anomaly-detection systems, and random quality audits, should continuously monitor consistency, completeness, and adherence to SOPs.
ऑडिट ट्रेल, ऑनलाइन मॉडरेशन, स्वचालित योग-जाँच, विसंगति पहचान प्रणाली तथा यादृच्छिक गुणवत्ता ऑडिट जैसे अतिरिक्त डिजिटल निगरानी उपकरणों को निरंतर एकरूपता, पूर्णता और SOPs के अनुपालन की निगरानी करनी चाहिए।
- Since students and parents would already possess both their answer scripts and official marking schemes, they can independently estimate their likely scores before the declaration of results.
चूँकि छात्रों और अभिभावकों के पास उनकी उत्तरपुस्तिकाएँ तथा आधिकारिक मूल्यांकन योजनाएँ पहले से उपलब्ध होंगी, वे परिणाम घोषित होने से पहले अपने संभावित अंकों का स्वतंत्र रूप से अनुमान लगा सकेंगे।

The way forward
आगे की राह

The 'harvest' China wants is one India cannot afford

GS II: IR MQB

Ashok K. Kantha

Former Ambassador to China, Subhas Chandra Bose Chair Professor of International Relations, Chanakya University, and Distinguished Fellow with the Vivekananda International Foundation

When Luo Zhaohui, then China's Ambassador to India, revived the idea of an "early harvest" in India-China boundary negotiations in 2017, India responded with scepticism. The proposal – to settle the Sikkim boundary in isolation from the three other sectors – was an asymmetric concession dressed up in the language of progress. India has resisted it. There is now a gnawing doubt as to whether it can hold that position. The trigger for this piece is a former border negotiator's concern that India might "stumble" into a damaging course of action under Chinese pressure and driven by the temptation to project contrived progress. Diplomacy that trades long-term strategic interests for short-term optics is self-defeating.

New Delhi must be cautious

The readout issued by the Ministry of External Affairs (MEA) on the 24th round of the Special Representatives' Dialogue on the Boundary Question between India and China (on August 19, 2025) between National Security Adviser Ajit Doval and Chinese Foreign Minister Wang Yi recorded India's agreement to "set up an Expert Group ... to explore an early harvest in boundary delimitation in the India-China border areas". China's own readout was more pointed: it used the term "demarcation" rather than "delimitation" and spoke of "launching boundary demarcation negotiations in sectors where conditions are ripe."

The MEA press release on the 35th Meeting of the Working Mechanism for Consultation and Coordination on India-China Border Affairs, held in Beijing on May 27, 2026, mentions that the two sides "discussed issues pertaining to delimitation, border management, mechanism building and cross-border cooperation" and "agreed to work together to make substantive preparation" for the next SRs' meeting. The reference to 'delimitation' is significant as it suggests follow-up discussions on the understanding "to explore Early Harvest in boundary delimitation".

The cornerstone of Special Representative negotiations is the Agreement on Political Parameters and Guiding Principles, signed on April 11, 2005. Article III explicitly envisages "a package settlement" covering all sectors of the India-China boundary. It establishes a three-step process: first political parameters, then a framework for a final settlement, then delineation and demarcation. Demarcation – placing physical markers on the ground – comes last, not first. China's proposal to begin demarcation in a single "ripe" sector inverts this sequence and, in effect, asks India to abandon the package architecture in exchange for the appearance of progress. India should decline.

Why does the package settlement matter so much? Because the four sectors of the India-China boundary are strategically interlinked, requiring give and take across sectors. It also guards against China extracting concessions sector by sector. An early harvest in Sikkim, where India holds comparative geographical advantage, would let Beijing bank a settlement on its preferred terms while leaving the other three sectors unresolved.

Diplomatic optics must not dictate India's boundary negotiations with China

The Sikkim stakes

The Sikkim Sector boundary is not, as sometimes claimed, a simple matter. Clashes at Nathu La and Cho La in 1967, with heavy casualties, showed how sharp these differences are. Article I of the 1890 Great Britain-China Convention identifies "Mount Gipmochi on the Bhutan frontier" as the starting point of the Sikkim-Tibet boundary, but it is preceded by an assertion that the boundary "shall be the crest of the mountain range separating the waters flowing into the Sikkim Teesta and its affluents from the waters flowing into the Tibetan Mochu". China reads the article as placing the trijunction at Gipmochi. India and Bhutan hold that the trijunction lies at Batang La, some 6.5 kilometres to the north, on the watershed – which is the operative geographical principle in Article I.

Zompelri (or Jampheri) Ridge adjoining Geymochen commands a direct view of the Siliguri Corridor, the narrow strip connecting mainland India to its northeastern States. Any settlement implicitly endorsing the Gipmochi trijunction would hand China a legal instrument to press its claim to the very edge of the Himalayas, exposing the Corridor. The Chinese objective is to deepen and widen its Chumbi Valley and increase pressure on India's most acute territorial vulnerability.

The Doklam dimension reinforces this concern. Since 2017, China has systematically consolidated its position in western Bhutan – building roads and military facilities, constructing villages including Pangda on the Amo Chu river, and developing routes to the Jampheri Ridge that bypass the 2017 Doklam standoff site. A Sikkim settlement would immediately be leveraged by Beijing to step up pressure on a vulnerable Bhutan to settle its boundary with China. India and China have agreed that trijunction points must be finalised in trilateral consultation with all countries concerned. Even if the trijunction point is left out, China could force Bhutan to settle the rest of the disputed boundary on its own terms and present India with a *fait accompli* in Doklam.

Since the Eastern Ladakh transgressions of 2020, China has pursued multiple pressure tracks simultaneously: military consolidation along the Line of Actual Control (LAC), steady resurrection of the "Zangnan" (South Tibet) narrative to describe Arunachal Pradesh, renaming of places in Arunachal Pradesh, and expansion of "border defence villages" close to India-China LAC.

The resumption of Special Representative talks is welcome, but dialogue must be conducted with strategic clarity, not under diplomatic pressure or for the optics of progress. Three principles should guide India's approach.

First, hold the 2005 Agreement's framework firm. The Expert Group agreed upon in August 2025 must not become a vehicle for an early harvest in Sikkim. Agreeing to "explore" is not a commitment to accept. India should reject a standalone Sikkim delimitation or demarcation exercise.

Second, make peace and tranquillity on the LAC the non-negotiable condition of progress. China has periodically attempted to delink border management from the broader relationship; India has resisted this, and should continue to do so. Unilateral alterations to the LAC cannot be normalised. Indeed, the so-called "buffer zones" in Eastern Ladakh must not be allowed to persist.

Third, press for genuine political engagement on a comprehensive settlement. Decades of talks have shown that the respective narratives cannot be reconciled through legal arguments. The 2005 Agreement recognised this: it called for a political settlement that would "safeguard the vital interests of both countries" and set out principles such as the two sides "safeguard(ing) due interests of their settled populations in the border areas". Any breakthrough requires political will on both sides. India should press for meaningful boundary negotiations, not paper over the lack of progress with working groups. The test of China's seriousness will be whether it is prepared to engage on the framework for a comprehensive settlement – and whether it is prepared to hold the LAC stable while that engagement proceeds. Absent those conditions, the Special Representative process risks becoming what it has sometimes been before: a forum for managing appearances while China improves its position on the ground.

Stay the course

In boundary talks, China has a track-record of cherry-picking and resiling from formal commitments, as it did in the case of an explicit agreement to arrive at a common understanding of the LAC after exchanging maps showing the entire alignment. India must prevent the Agreement On the Political Parameters and Guiding Principles for the Settlement of the India-China Boundary Question from meeting a similar fate. If peace and tranquillity on the LAC is the foundation for rebuilding India-China relations, the 2005 Agreement is the road map for resolving the boundary question. India has nothing to gain from an early harvest limited to Sikkim and must maintain its negotiating space through a comprehensive negotiation. India cannot afford a shortcut to a destination that suits China.

03J6. The 'harvest' China wants is one India cannot afford
चीन जिस 'फसल' की अपेक्षा करता है, वह ऐसी है जिसे भारत वहन नहीं कर सकता

- Diplomacy that trades long-term strategic interests for short-term optics is self-defeating.
  ऐसी कूटनीति, जो अल्पकालिक दिखावे के लिए दीर्घकालिक रणनीतिक हितों का त्याग करती है, अंततः आत्मघाती सिद्ध होती है।

early harvest in boundary delimitation in the India-China border areas".
विदेश मंत्रालय (MEA) द्वारा **19 अगस्त 2025** को भारत और चीन के बीच **सीमा प्रश्न पर विशेष प्रतिनिधियों की वार्ता** के **24वें दौर** के संबंध में जारी विवरण में, **राष्ट्रीय सुरक्षा सलाहकार अजीत डोभाल** और चीन के विदेश मंत्री **वांग यी** के बीच हुई चर्चा के दौरान भारत की इस सहमति को दर्ज किया गया कि "भारत-चीन सीमा क्षेत्रों में सीमा निर्धारण में अर्ली हार्वेस्ट की संभावनाओं का पता लगाने के लिए एक विशेषज्ञ समूह का गठन किया जाए।"

- China's own readout was more pointed: it used the term "demarcation" rather than "delimitation" and spoke of "launching boundary demarcation negotiations in sectors where conditions are ripe."
  चीन द्वारा जारी विवरण अधिक स्पष्ट था: उसमें "delimitation" के स्थान पर "demarcation" शब्द का उपयोग किया गया तथा "उन क्षेत्रों में सीमा चिह्नांकन वार्ताएँ प्रारंभ करने" की बात कही गई, जहाँ परिस्थितियाँ अनुकूल हैं।
- The MEA press release on the **35th Meeting** of the **Working Mechanism for Consultation and Coordination on India-China Border Affairs**, held in **Beijing** on **May 27, 2026**, mentions that the two sides "discussed issues pertaining to delimitation, border management, mechanism building and cross-border cooperation" and "agreed to work together to make substantive preparation" for the next SRs' meeting.
  27 मई 2026 को **बीजिंग** में आयोजित **भारत-चीन सीमा मामलों पर परामर्श एवं समन्वय कार्य तंत्र** की **35वीं बैठक** पर जारी MEA प्रेस विज्ञप्ति में उल्लेख किया गया कि दोनों पक्षों ने "सीमा निर्धारण, सीमा प्रबंधन, तंत्र निर्माण तथा सीमा-पार सहयोग" से संबंधित मुद्दों पर चर्चा की तथा अगली विशेष प्रतिनिधि बैठक की "ठोस तैयारी के लिए साथ मिलकर कार्य करने" पर सहमति व्यक्त की।
- The cornerstone of **Special Representative negotiations** is the **Agreement on Political Parameters and Guiding Principles**, signed on **April 11, 2005**.
  विशेष प्रतिनिधि वार्ताओं की आधारशिला **11 अप्रैल 2005** को हस्ताक्षरित **राजनीतिक मानदंडों और मार्गदर्शक सिद्धांतों पर समझौता** है।
- Article III explicitly envisages "a package settlement" covering all sectors of the India-China boundary.
  अनुच्छेद III स्पष्ट रूप से भारत-चीन सीमा के सभी क्षेत्रों को सम्मिलित करने वाले "समग्र पैकेज समाधान" की परिकल्पना करता है।
- It establishes a three-step process: first political parameters, then a framework for a final settlement, then delineation and demarcation.
  यह तीन-चरणीय प्रक्रिया स्थापित करता है: पहले राजनीतिक मानदंड, फिर अंतिम समाधान के लिए ढाँचा, और उसके बाद सीमांकन तथा चिह्नांकन।
- Demarcation — placing physical markers on the ground — comes last, not first.
  चिह्नांकन — अर्थात भूमि पर भौतिक संकेतक स्थापित करना — अंतिम चरण है, प्रारंभिक नहीं।
- China's proposal to begin demarcation in a single "ripe" sector inverts this sequence and, in effect, asks India to abandon the package architecture in exchange for the appearance of progress.
  किसी एक "अनुकूल" क्षेत्र में चिह्नांकन प्रारंभ करने का चीन का प्रस्ताव इस क्रम को उलट देता है और वस्तुतः भारत से प्रगति के दिखावे के बदले समग्र समाधान की संरचना छोड़ने की अपेक्षा करता है।
- Because the four sectors of the India-China boundary are strategically interlinked, requiring give and take across sectors.
  क्योंकि भारत-चीन सीमा के चारों क्षेत्र रणनीतिक रूप से परस्पर जुड़े हुए हैं, जिनमें विभिन्न क्षेत्रों के बीच संतुलित समझौते की आवश्यकता होती है।
- It also guards against China extracting concessions sector by sector.
  यह चीन को क्षेत्र-दर-क्षेत्र रियायतें प्राप्त करने से भी रोकता है।
- An early harvest in **Sikkim**, where India holds comparative geographical advantage, would let **Beijing** bank a settlement on its preferred terms while leaving the other three sectors unresolved.

सिक्किम में अर्ली हार्वेस्ट, जहाँ भारत को तुलनात्मक भौगोलिक लाभ प्राप्त है, **बीजिंग** को अपनी पसंदीदा शर्तों पर समाधान प्राप्त करने का अवसर देगा, जबकि अन्य तीन क्षेत्रों को अनसुलझा छोड़ दिया जाएगा।

The Sikkim stakes
सिक्किम से जुड़े दांव

- The **Sikkim Sector boundary** is not, as sometimes claimed, a simple matter.
  सिक्किम सेक्टर सीमा उतनी सरल नहीं है, जैसा कभी-कभी दावा किया जाता है।
- Clashes at **Nathu La** and **Cho La** in **1967**, with heavy casualties, showed how sharp these differences are.
  1967 में **नाथू ला** और **चो ला** में हुए संघर्षों, जिनमें भारी जनहानि हुई थी, ने यह दिखाया कि ये मतभेद कितने गंभीर हैं।
- Article I of the **1890 Great Britain-China Convention** identifies "Mount Gipmochi on the Bhutan frontier" as the starting point of the Sikkim-Tibet boundary, but it is preceded by an assertion that the boundary "shall be the crest of the mountain range separating the waters flowing into the Sikkim Teesta and its affluents from the waters flowing into the Tibetan Mochu".
  1890 के ग्रेट ब्रिटेन-चीन सम्मेलन का अनुच्छेद I "भूटान सीमा पर स्थित माउंट गिपमोची" को सिक्किम-तिब्बत सीमा का प्रारंभिक बिंदु मानता है, किन्तु उससे पहले यह उल्लेख किया गया है कि सीमा "उस पर्वत श्रृंखला की चोटी होगी जो सिक्किम की तीस्ता और उसकी सहायक नदियों में बहने वाले जल को तिब्बती मोचू में बहने वाले जल से अलग करती है।"
- China reads the article as placing the trijunction at **Gipmochi**.
  चीन इस अनुच्छेद की व्याख्या त्रि-जंक्शन को **गिपमोची** पर स्थित मानकर करता है।
- India and **Bhutan** hold that the trijunction lies at **Batang La**, some **6.5 kilometres** to the north, on the watershed — which is the operative geographical principle in Article I.
  भारत और **भूटान** का मत है कि त्रि-जंक्शन उत्तर में लगभग **6.5 किलोमीटर** दूर स्थित **बाटांग ला** पर है, जो जल-विभाजक रेखा पर स्थित है — और यही अनुच्छेद I का वास्तविक भौगोलिक सिद्धांत है।
- **Zompelri (or Jampheri) Ridge** adjoining **Geymochen** commands a direct view of the **Siliguri Corridor**, the narrow strip connecting mainland India to its northeastern States.
  गेयमोचेन से सटी हुई **जोम्पेलरी (या जामफेरी) रिज** से **सिलीगुड़ी कॉरिडोर** का सीधा दृश्य प्राप्त होता है, जो मुख्य भारत को उसके उत्तर-पूर्वी राज्यों से जोड़ने वाली संकीर्ण पट्टी है।
- Any settlement implicitly endorsing the **Gipmochi trijunction** would hand China a legal instrument to press its claim to the very edge of the Himalayas, exposing the Corridor.
  ऐसा कोई भी समाधान जो अप्रत्यक्ष रूप से **गिपमोची त्रि-जंक्शन** को स्वीकार करता हो, चीन को हिमालय की सीमा तक अपने दावे को आगे बढ़ाने का कानूनी आधार प्रदान करेगा और इस प्रकार कॉरिडोर को असुरक्षित बना देगा।
- The Chinese objective is to deepen and widen its **Chumbi Valley** and increase pressure on India's most acute territorial vulnerability.
  चीन का उद्देश्य अपनी **चुम्बी घाटी** को अधिक गहरा और विस्तृत बनाना तथा भारत की सबसे संवेदनशील क्षेत्रीय कमजोरी पर दबाव बढ़ाना है।
- The **Doklam** dimension reinforces this concern.
  डोकलाम से जुड़ा आयाम इस चिंता को और अधिक मजबूत करता है।
- Since **2017**, China has systematically consolidated its position in western Bhutan — building roads and military facilities, constructing villages including **Pangda** on the **Amo Chu river**, and developing routes to the **Jampheri Ridge** that bypass the 2017 Doklam standoff site.
  2017 से चीन ने पश्चिमी भूटान में व्यवस्थित रूप से अपनी स्थिति मजबूत की है — सड़कों और सैन्य सुविधाओं का निर्माण किया है, **आमो चू नदी** पर स्थित **पांगदा** सहित गाँव बसाए हैं, तथा **जामफेरी रिज** तक ऐसे मार्ग विकसित किए हैं जो 2017 के डोकलाम गतिरोध स्थल को दरकिनार करते हैं।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

- A Sikkim settlement would immediately be leveraged by **Beijing** to step up pressure on a vulnerable Bhutan to settle its boundary with China.
  सिक्किम संबंधी किसी समाधान का उपयोग **बीजिंग** तुरंत भूटान पर चीन के साथ सीमा समझौता करने के लिए दबाव बढ़ाने हेतु करेगा।
- India and China have agreed that trijunction points must be finalised in trilateral consultation with all countries concerned.
  भारत और चीन इस बात पर सहमत हैं कि त्रि-जंक्शन बिंदुओं को सभी संबंधित देशों के साथ त्रिपक्षीय परामर्श द्वारा अंतिम रूप दिया जाना चाहिए।
- Since the **Eastern Ladakh transgressions** of **2020**, China has pursued multiple pressure tracks simultaneously: military consolidation along the **Line of Actual Control (LAC)**, steady resurrection of the "**Zangnan**" (South Tibet) narrative to describe **Arunachal Pradesh**, renaming of places in Arunachal Pradesh, and expansion of "border defence villages" close to India-China LAC.
  2020 में हुए **पूर्वी लद्दाख अतिक्रमणों** के बाद से चीन ने एक साथ कई प्रकार के दबाव के उपाय अपनाए हैं: **वास्तविक नियंत्रण रेखा (LAC)** के साथ सैन्य सुदृढ़ीकरण, **अरुणाचल प्रदेश** को "**जांगनान**" (दक्षिण तिब्बत) कहने की कथा को पुनर्जीवित करना, अरुणाचल प्रदेश में स्थानों के नाम बदलना, तथा भारत-चीन LAC के निकट "सीमा रक्षा गाँवों" का विस्तार करना।
- The **2005 Agreement** recognised this: it called for a political settlement that would "safeguard the vital interests of both countries" and set out principles such as the two sides "safeguard(ing) due interests of their settled populations in the border areas".
  2005 के समझौते ने इसे स्वीकार किया था: इसमें ऐसे राजनीतिक समाधान की बात कही गई थी जो "दोनों देशों के महत्वपूर्ण हितों की रक्षा" करे तथा यह सिद्धांत निर्धारित किया गया था कि दोनों पक्ष "सीमावर्ती क्षेत्रों में बसे लोगों के उचित हितों की रक्षा" करेंगे।

Euro zone inflation jump reinforces rate hike case

GS II: IR

NEWS ANALYSIS

Reuters
FRANKFURT

Euro zone inflation accelerated further last month, driven by energy and services,bolstering the already strong case for a small European Central Bank interest rate hike later this month, Eurostat data showed on Tuesday.

Consumer prices in the 21 nations sharing the euro accelerated to 3.2% in May from 3.0% a month earlier, well above the ECB's 2% target but in line with a *Reuters* poll.

The increase was driven by a 10.9% rise in energy costs and a unexpectedly large pickup in services inflation to 3.5% from3.0%.

In a development likely to worry policymakers, underlying inflation - which excludes volatile energy and food prices -accelerated more than expected to 2.5% from 2.2% on services and a small pickup in industrial goods inflation.

"The further increase in headline and particularly services inflation in May reinforces the case for the ECB to raise interest rates next week and suggests that upside risks to underlying inflation may be higher than we had anticipated,"Andrew Kenningham at Capital Economics said.

While the figures are closely watched by the ECB, they are unlikely to shift near-term policy expectations. Policymakers have already made clear higher inflation justifies a rise in borrowing costs.

More expensive: A shopper pays with a ten Euro bank note at a local market in Aix-en-Provence, France. REUTERS

Fully priced in

Financial markets have fully priced in a 25-basis-point rate hike on June 11, with one or two more expected in the autumn. Elevated energy prices risk seeping into the broader economy and triggering more persistent inflation pressures.

"While inflation risks have increased, a rate increase in June would be an insurance one, but not due to entrenched inflationary pressures," Finnish central bank chief Olli Rehn, a dovish voice on the ECB's Governing Council, said.

Even if the Iran war were to end soon, the argument goes,damage to energy infrastructure and corporate supply chains has already been done, making normalisation slow and keeping prices high well in to second half of the year.

Far less aggressive

Still, any tightening is expected to be modest - far less aggressive than the record series of rate hikes in 2022 - as weaker underlying growth limits firms' ability to pass on costs.

Indicators from PMI surveys to the ECB's own data point to growing pressure on the real economy, and further downgrades to already subdued growth forecasts look likely as the Iran war drags on and high energy prices weigh.

Europe is a net energy importer and its industrial sector -already hit by the loss of cheap Russian gas following Russia's invasion of Ukraine and by higher U.S. tariffs - is reeling.

Households are sitting on ample savings and could sustain spending, but past experience suggests consumers are quick to turn cautious when the news flow darkens.

Unlike during the 2022 inflation surge, the labour market is also softer, reinforcing that caution, economists say.

That suggests high energy prices may generate fewer second-round effects on inflation than four years ago, easing some pressure on the ECB to act aggressively. "Interest hike is becoming inevitable for the ECB," Commerzbank economist Vincent Stamer said. "Another rate hike in the third quarter is also likely to follow."

EU moves policy for deportations and detention centres in third countries

This will enable member nations to strike deal with countries outside EU to build deportation centres; the agreement struck by three institutions of the bloc will now head to EU lawmakers and heads of state for approval; activists decry the 'ICE-inspired' move over potential harm to human rights

GS II: IR

Associated Press
BRUSSELS

The European Union has moved forward with a vast overhaul of its migration policy, aiming to ramp up deportations and ink controversial deals to build detention centres abroad, in what rights groups compare to President Donald Trump administration's aggressive immigration policies in the U.S.

"The new regulation will speed up the return process and increase returns of persons who have no legal right to stay in the EU," said Nicholas Ioannides, Deputy Migration Minister for Cyprus, which holds the rotating presidency of the 27-nation bloc.

The deal was struck between the EU's three main institutions – the European Commission, the European Council, and the European Parliament – during a so-called "trilogue" on Monday.

Critics compared the regulation to the immigration strategy of the Trump administration, which has struck a series of secretive agreements with nations around the world to deport thousands of people to countries that are not their own. The United Kingdom also planned to deport migrants to Rwanda, but the plan was bogged down in legal red tape and the new government dropped the plan as soon as it came to power.

Seeking asylum: A file photo of refugees being temporarily taken to various emergency shelters in Ter Apel, Netherlands, in August 2022. REUTERS

"The Regulation is going to create a draconian detention and deportation machine," said Silvia Carter, spokesperson for the Brussels-based Platform for International Cooperation on Undocumented Migrants.

'Violence by ICE'

"Across the Atlantic, we see the violence and fear created by ICE's brutal immigration enforcement. Europe should be learning from the harms of that model, not building its own version of it."

The provisional agreement will now head to the EU lawmakers and heads of state, where approval will likely be swift.

EU member nations will soon be able to set up bilateral deals with countries outside the bloc to build deportation centres. At least five EU nations – Germany, Austria, the Netherlands, Denmark, and Greece – are already in talks with third countries, mostly in Africa, to host "return hubs" on the model of Italy's detention deal with Albania.

The EU has continually tightened migration policies after right-wing parties took power in some countries in 2024. European Commission President Ursula von der Leyen, from the centre-right European People's Party coalition, has said that the new measures will prevent a repeat of the 2015 crisis caused by Syria's civil war, when about one million people arrived to seek asylum.

Fueled by people fleeing conflict and poverty across Africa and West Asia, the 2015 refugee crisis and successive years of irregular migration to Europe have driven a rightward shift in the bloc's politics not unlike the anti-immigrant sentiment that buoyed a "red wave" in the 2024 election in the U.S.

Centre-right political groups allied with the far-right to overcome opposition from centrist and left-wing parties, said Mélissa Camara, a French lawmaker and member of the Greens who called the deal "a historic setback" for human rights in the bloc.

"The legalization of return hubs outside the European Union, the green light for the detention of minors, home visits inspired by ICE practices: the legal arsenal serving a xenophobic ideology is now complete," she said.

Setback to human rights

Activist groups warned the legislation would cut deep into the protections granted by the EU fundamental charter on human rights and expose people to risks outside the bloc.

"This deal will give governments much broader powers to detain and deport people," said Marta Welander, a spokesperson for the International Rescue Committee. "It looks set to normalize immigration raids, expand the use of detention in prison-like facilities outside EU territory that are essentially legal black holes, and increase the risk of people being deported to countries where they could face persecution, torture or worse."

How land pooling solves acquisition woes

GS III: Economy

Rajasthan has recently announced the State's first land pooling scheme. The government is optimistic that the scheme will help with land acquisition and deliver the land needed for roads, infrastructure, and development activities. Other States, too, are either actively thinking of implementing land pooling schemes. While States such as Gujarat and Maharashtra have found success, much will depend on localised innovation and institutional flexibility.

Urban infrastructure projects in India have historically relied on land acquisitions. This process has become increasingly complex and financially burdensome, particularly after the enactment of the Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013. The limitations of land acquisition are both structural and procedural. Even before the 2013 Act, acquisition processes were time-consuming and often contested. Post-2013, the inclusion of rehabilitation and resettlement provisions have further increased financial obligations, making large-scale acquisitions for urban infrastructure increasingly unviable. This has resulted in a growing gap between planned infrastructure and its implementation. Plans are often under-executed due to the inability to mobilise land.

On pooling land

While States have tried different solutions, land pooling mechanisms, especially Town Planning (TP) schemes, have emerged as a viable alternative. In a land pooling model, landowners voluntarily contribute land for infrastructure development and receive a portion of the serviced land in return. This method reduces the need for compulsory acquisition and distributes development benefits among stakeholders.

The TP scheme, widely implemented in Gujarat and Maharashtra, is among the most successful land-pooling models in India. Under this model, landowners voluntarily contribute about 25-40% of their land to provide infrastructure such as roads, parks, public amenities, and housing for economically weaker sections. The remaining land (60-75%) is returned to them as reconstituted plots that are better shaped, serviced, and more valuable. This method integrates land assembly, infrastructure provisions, and cost recovery.

Amit Gotecha

An urban planner advising various State governments on town planning schemes

Compared with land acquisitions, town planning schemes reduce displacement, ensure equitable benefit-sharing, and enable faster urban development

A key strength of the TP scheme is its participatory, people-centric approach. It is also financially self-sustaining, as incremental charges from landowners are recovered during development rather than up front. Compared with land acquisitions, TP schemes reduce displacement, ensure equitable benefit-sharing, and enable faster urban development while preserving environmentally sensitive areas. Recognising its potential, the Government of India has promoted TP schemes since 2019.

Land pooling is, however, not a new idea. For instance, in Gujarat, it was introduced almost 100 years back and formalised under the Gujarat Town Planning and Urban Development Act, 1976. And over time, in Gujarat, more than 1,000 sq. km across Ahmedabad, Surat, Rajkot, Vadodara, and Gandhinagar have been planned through TP schemes.

But unlike Gujarat, Maharashtra failed to update its statutory provisions for enabling TP schemes over time. However, Pune and the Mumbai Metropolitan Region Development Authority have recently adopted this model again to provide infrastructure and serviced land in the city's peripheral areas.

Exemplary model

While other States have tried to implement the model, it has not been easy. For example, in Guwahati, even though the Guwahati Metropolitan Development Authority Act, 1985 included provisions for the preparation and implementation of development schemes, it lacked clarity on critical aspects, including the percentages for land appropriation and institutional roles. An equally significant challenge was the absence of digitised land records; land records in Guwahati were maintained manually. Additionally, discrepancies were observed between revenue records and ground conditions.

To address this, rather than conducting time-consuming joint measurement surveys, the existing map was retained as is, and final plot allocations were based on the land areas specified in the revenue records. This significantly reduced the time required to prepare the scheme. Reducing landowners' contribution was another key decision to make the scheme more acceptable. Private landowners were asked to contribute only 12-15% of their land, compared with the usual 35-45%. This was primarily used for road infrastructure.

In Rajasthan, land pooling had already been recognised in statutory provisions since 2016. However, they were handicapped by a lack of experience. Now, modifications are being made to the land-value calculations in the State to ensure that the financial burden on landowners remains manageable. The government has absorbed a portion of the cost, making the scheme more equitable and attractive.

States that are just about to venture into land pooling, such as Tamil Nadu, Madhya Pradesh, and Delhi, also have to go beyond conventional approaches. Their challenge is to first convince landholders, communicate the benefits, and contextualise the approaches. Particularly, factors such as legislation on land-pooling requirements, adjusted land-contribution mechanisms, and equitable financial models will collectively determine the success of TP schemes.

03J6. ' How land pooling solves acquisition woes
भूमि समेकन किस प्रकार अधिग्रहण संबंधी समस्याओं का समाधान करता है

- **Rajasthan** has recently announced the State's first **land pooling scheme**.
  राजस्थान ने हाल ही में राज्य की पहली **भूमि पूलिंग योजना** की घोषणा की है।
- The government is optimistic that the scheme will help with land acquisition and deliver the land needed for roads, infrastructure, and development activities.
  सरकार को आशा है कि यह योजना भूमि अधिग्रहण में सहायता करेगी तथा सड़कों, अवसंरचना और विकास गतिविधियों के लिए आवश्यक भूमि उपलब्ध कराएगी।
- This process has become increasingly complex and financially burdensome, particularly after the enactment of the **Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013**.
  यह प्रक्रिया विशेष रूप से **भूमि अधिग्रहण, पुनर्वास एवं पुनर्स्थापन में उचित प्रतिकर और पारदर्शिता अधिकार अधिनियम, 2013** के लागू होने के बाद अधिक जटिल और आर्थिक रूप से बोझिल हो गई है।
- The limitations of land acquisition are both structural and procedural.
  भूमि अधिग्रहण की सीमाएँ संरचनात्मक और प्रक्रियात्मक दोनों प्रकार की हैं।
- Even before the **2013 Act**, acquisition processes were time-consuming and often contested.
  2013 के अधिनियम से पहले भी भूमि अधिग्रहण की प्रक्रियाएँ समय लेने वाली और अक्सर विवादित होती थीं।
- Post-2013, the inclusion of rehabilitation and resettlement provisions have further increased financial obligations, making large-scale acquisitions for urban infrastructure increasingly unviable.
  2013 के बाद पुनर्वास और पुनर्स्थापन प्रावधानों के शामिल होने से आर्थिक दायित्व और बढ़ गए, जिससे शहरी अवसंरचना के लिए बड़े पैमाने पर भूमि अधिग्रहण कम व्यवहार्य हो गया।

On pooling land
भूमि पूलिंग पर

- While States have tried different solutions, land pooling mechanisms, especially **Town Planning (TP) schemes**, have emerged as a viable alternative.
  यद्यपि राज्यों ने विभिन्न समाधान अपनाने का प्रयास किया है, फिर भी भूमि पूलिंग तंत्र, विशेषकर **टाउन प्लानिंग (TP) योजनाएँ**, एक व्यवहारिक विकल्प के रूप में उभरी हैं।
- The **TP scheme**, widely implemented in Gujarat and Maharashtra, is among the most successful land-pooling models in India.
  TP योजना, जिसे गुजरात और महाराष्ट्र में व्यापक रूप से लागू किया गया है, भारत के सबसे सफल भूमि पूलिंग मॉडलों में से एक है।
- Under this model, landowners voluntarily contribute about **25-40%** of their land to provide infrastructure such as roads, parks, public amenities, and housing for economically weaker sections.
  इस मॉडल के अंतर्गत भू-स्वामी स्वेच्छा से अपनी लगभग **25-40%** भूमि सड़कों, पार्कों, सार्वजनिक सुविधाओं तथा आर्थिक रूप से कमजोर वर्गों के लिए आवास जैसी अवसंरचना उपलब्ध कराने हेतु देते हैं।
- The remaining land (**60-75%**) is returned to them as reconstituted plots that are better shaped, serviced, and more valuable.
  शेष भूमि (**60-75%**) उन्हें पुनर्गठित भूखंडों के रूप में वापस दी जाती है, जो बेहतर आकार वाले, सुविधायुक्त तथा अधिक मूल्यवान होते हैं।
- This method integrates land assembly, infrastructure provisions, and cost recovery.
  यह पद्धति भूमि एकत्रीकरण, अवसंरचना प्रावधान और लागत वसूली को एकीकृत करती है।
- A key strength of the **TP scheme** is its participatory, people-centric approach.
  TP योजना की एक प्रमुख विशेषता इसका सहभागी और जन-केंद्रित दृष्टिकोण है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- It is also financially self-sustaining, as incremental charges from landowners are recovered during development rather than up front.
  यह आर्थिक रूप से आत्मनिर्भर भी है, क्योंकि भू-स्वामियों से अतिरिक्त शुल्क विकास प्रक्रिया के दौरान वसूले जाते हैं, न कि प्रारंभ में।
- In **Rajasthan**, land pooling had already been recognised in statutory provisions since **2016**.
  राजस्थान में भूमि पूलिंग को **2016** से ही वैधानिक प्रावधानों में मान्यता प्राप्त थी।
- However, they were handicapped by a lack of experience.
  हालाँकि, अनुभव की कमी के कारण इन प्रावधानों के प्रभावी क्रियान्वयन में बाधाएँ थीं।
- Now, modifications are being made to the land-value calculations in the State to ensure that the financial burden on landowners remains manageable.
  अब राज्य में भूमि मूल्यांकन की गणनाओं में संशोधन किए जा रहे हैं ताकि भूमि स्वामियों पर आर्थिक बोझ प्रबंधनीय बना रहे।

The future of India's chip industry

A new NITI Aayog report says India's semiconductor ecosystem is not yet equipped to fully meet domestic demand, while stressing the need to strengthen local manufacturing, as geopolitical pressures could potentially disrupt the electronics supply chain

GS III: Economy

EXPLAINER

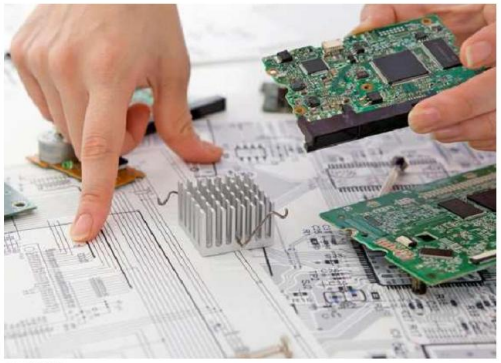
Aroon Deep

NITI Aayog's Frontier Tech Hub released a report last week that had two main messages: first, that India faces steep challenges in developing world-class semiconductor manufacturing capabilities, and second, that national interest necessitated pursuing this field doggedly regardless of those difficulties.

The Union government has made chipmaking a priority, since semiconductors are a part of nearly all electronics, from consumer gadgets to defence gear. Yet, India does not have a single fabrication unit, with the first expected to open in Dholera, Gujarat by 2028, with a total of ten in various stages of development. Multiple semiconductor packaging and testing facilities have been generously subsidised and supported by the Union government (as well as some State governments), through initiatives like the India Semiconductor Mission (ISM).

The ISM is a ₹76,000 crore corpus, and it is almost fully earmarked to projects across semiconductor fabs, incentives for component manufacturing, and bulk subscriptions to industry-grade semiconductor design applications for students and academia. While the most cutting edge and ambitious projects – fabs – have received capital subsidies of upwards of 50%, other projects have received production- or output-linked incentives.

The report, titled 'Future of India's Semiconductor Industry', reiterates that these are yet early days for the semiconductor industry, since even chips used in domestic electronics assembly operations are largely sourced from outside the country. "India's local ecosystem is not ready to fully meet domestic demand for semiconductors," the report said. But it insisted that there was still a need to manufacture locally, as geopolitical pressures like a disaster in Taiwan could massively disrupt the electronics supply chain. "As many semiconductor parts used in defence systems are produced outside India, deploying them in our aerospace and defence programmes is increasing threats to national security," the report adds.



GETTY IMAGES

The sector "requires sustained, mission-mode commitment over a decade or more," the report said.

Fab gestation

The report points to several challenges in this indigenisation process, not least of which is the time involved. "Typically, fab units require four to five years before commencing production," the report points out. "During the gestation phase, these units need to invest in purchasing more than 50 specialised equipment from global players. Even after the production is over, processes like yield optimisation and reliability test take several quarters before chips reach the market." Developing talent to work in these fabs is also, as a result, time consuming, the report says.

The report urges the government to work on "building sovereign design and research capabilities, R&D excellence and harnessing agentic AI for semiconductor engineering," since "building deep capabilities" in materials sciences and silicon designing will "move India from a services-led design base to a creator of differentiated IP, architectures and integration technologies that define next generation systems."

Capital investment

While the details on the second phase of the India Semiconductor Mission are yet to be revealed, the report pegs the necessary capital expenditure from the state at $45-60 billion over a period of ten years. This amount should, however, be spent on projects where the risk is less and "bankability" can assure returns to investors, the report warns. This translates to a shift away from directing public funds towards frontier chips, whose transistors are the smallest – 3 to 7 nanometres – and towards "mature, advanced–aligned with strategic relevance–as well as compound nodes," the report says.

The report is key in understanding the potential scope of ISM 2.0, since its ambition is defined and largely stays out of big-ticket frontier fab projects. It advocates, for instance, "selective depth, capital efficiency and system-level differentiation, rather than attempting to replicate the full global manufacturing spectrum."

For instance, packaging, which is among the last steps of a chipmaking process, and less expensive and complex than fabrication, is identified as a "core production pillar, not a downstream activity" in the report. The report calls for "[r]apid import substitution in high volume domestic segments".

Trusted partners

The report implies that China is an adversary in chipmaking in spite of the recent thaw in relations. In a list of "priority partners," the report highlights the U.S., Japan, the European Union, and South Korea as partners with whom to work to get "access to critical tools, equipment servicing and lifecycle support," and to take advantage of "India's market scale, talent base and packaging capacity."

"With sustained commitment and strategic clarity, India can build a competitive semiconductor ecosystem that strengthens economic resilience and positions the nation as a key player in the future of advanced technology," the report concludes. IT Secretary S. Krishnan welcomed the report as a "structured, actionable framework," and said in a foreword that, "India is well positioned to convert its semiconductor ambition into enduring industrial and strategic reality".

THE GIST

- The Union government has made semiconductor manufacturing a priority, but India does not yet have a fabrication unit. A recent report by NITI Aayog's Frontier Tech Hub underscores the need to bolster local manufacturing.
- The report urges the government to work on 'building sovereign design and research capabilities, R&D excellence and harnessing agentic AI for semiconductor engineering'.

03J6. 'The future of India's chip industry
भारत के चिप उद्योग का भविष्य

- A new **NITI Aayog** report says India's **semiconductor ecosystem** is not yet equipped to fully meet domestic demand, while stressing the need to strengthen local manufacturing, as **geopolitical pressures** could potentially disrupt the electronics supply chain.
  नीति आयोग की एक नई रिपोर्ट के अनुसार भारत का **सेमीकंडक्टर पारितंत्र** अभी घरेलू मांग को पूरी तरह पूरा करने के लिए सक्षम नहीं है, साथ ही स्थानीय विनिर्माण को सुदृढ़ करने की आवश्यकता पर बल दिया गया है, क्योंकि **भूराजनैतिक दबाव** संभावित रूप से इलेक्ट्रॉनिक्स आपूर्ति श्रृंखला को बाधित कर सकते हैं।

- **NITI Aayog's Frontier Tech Hub** released a report last week that had two main messages: first, that India faces steep challenges in developing world-class semiconductor manufacturing capabilities, and second, that national interest necessitated pursuing this field doggedly regardless of those difficulties.
  नीति आयोग के फ्रंटियर टेक हब ने पिछले सप्ताह एक रिपोर्ट जारी की, जिसमें दो मुख्य संदेश दिए गए: पहला, कि भारत को विश्वस्तरीय सेमीकंडक्टर विनिर्माण क्षमताएँ विकसित करने में गंभीर चुनौतियों का सामना करना पड़ रहा है, और दूसरा, कि राष्ट्रीय हित इन कठिनाइयों के बावजूद इस क्षेत्र में निरंतर प्रयास करने की मांग करता है।
- Yet, India does not have a single fabrication unit, with the first expected to open in **Dholera, Gujarat** by **2028**, with a total of ten in various stages of development.
  फिर भी भारत में अभी तक एक भी फैब्रिकेशन यूनिट नहीं है, जबकि पहली इकाई **गुजरात के धोलेरा** में **2028** तक शुरू होने की संभावना है, और कुल दस परियोजनाएँ विभिन्न विकास चरणों में हैं।
- Multiple semiconductor packaging and testing facilities have been generously subsidised and supported by the Union government (as well as some State governments), through initiatives like the **India Semiconductor Mission (ISM)**.
  इंडिया सेमीकंडक्टर मिशन (ISM) जैसी पहलों के माध्यम से कई सेमीकंडक्टर पैकेजिंग और परीक्षण सुविधाओं को केंद्र सरकार तथा कुछ राज्य सरकारों द्वारा उदारतापूर्वक अनुदान और समर्थन प्रदान किया गया है।
- The **ISM** is a **₹76,000 crore** corpus, and it is almost fully earmarked to projects across semiconductor fabs, incentives for component manufacturing, and bulk subscriptions to industry-grade semiconductor design applications for students and academia.
  ISM एक **₹76,000 करोड़** का कोष है, जिसे लगभग पूर्ण रूप से सेमीकंडक्टर फैब परियोजनाओं, घटक निर्माण के लिए प्रोत्साहनों तथा छात्रों और शैक्षणिक संस्थानों के लिए उद्योग-स्तरीय सेमीकंडक्टर डिजाइन अनुप्रयोगों की सामूहिक सदस्यताओं हेतु निर्धारित किया गया है।
- While the most cutting edge and ambitious projects — fabs — have received capital subsidies of upwards of **50%**, other projects have received production- or output-linked incentives.
  जहाँ सबसे उन्नत और महत्वाकांक्षी परियोजनाओं — फैब्स — को **50%** से अधिक की पूंजीगत सब्सिडी प्राप्त हुई है, वहीं अन्य परियोजनाओं को उत्पादन अथवा आउटपुट-आधारित प्रोत्साहन दिए गए हैं।
- "India's local ecosystem is not ready to fully meet domestic demand for semiconductors," the report said.
  रिपोर्ट में कहा गया है, "भारत का स्थानीय तंत्र अभी सेमीकंडक्टर की घरेलू मांग को पूरी तरह पूरा करने के लिए तैयार नहीं है।"
- But it insisted that there was still a need to manufacture locally, as geopolitical pressures like a disaster in **Taiwan** could massively disrupt the electronics supply chain.
  किन्तु रिपोर्ट ने इस बात पर बल दिया कि स्थानीय स्तर पर निर्माण आवश्यक है, क्योंकि **ताइवान** जैसी जगह पर किसी आपदा के कारण भू-राजनीतिक दबाव इलेक्ट्रॉनिक्स आपूर्ति श्रृंखला को गंभीर रूप से बाधित कर सकते हैं।
- "As many semiconductor parts used in defence systems are produced outside India, deploying them in our aerospace and defence programmes is increasing threats to national security," the report adds.
  रिपोर्ट में आगे कहा गया है, "चूँकि रक्षा प्रणालियों में प्रयुक्त अनेक सेमीकंडक्टर घटक भारत के बाहर निर्मित होते हैं, इसलिए उन्हें हमारे एयरोस्पेस और रक्षा कार्यक्रमों में उपयोग करना राष्ट्रीय सुरक्षा के लिए बढ़ते खतरे उत्पन्न कर रहा है।"

Fab gestation
फैब की विकास अवधि

- "Typically, fab units require four to five years before commencing production," the report points out.

रिपोर्ट में कहा गया है, "सामान्यतः फैब इकाइयों को उत्पादन प्रारंभ करने से पहले चार से पाँच वर्ष का समय लगता है।"

- "During the gestation phase, these units need to invest in purchasing more than 50 specialised equipment from global players. Even after the production is over, processes like yield optimisation and reliability test take several quarters before chips reach the market."
"विकास अवधि के दौरान इन इकाइयों को वैश्विक कंपनियों से 50 से अधिक विशेष उपकरण खरीदने में निवेश करना पड़ता है। उत्पादन शुरू होने के बाद भी, यील्ड अनुकूलन और विश्वसनीयता परीक्षण जैसी प्रक्रियाओं में कई तिमाहियाँ लगती हैं, तब जाकर चिप्स बाजार तक पहुँचते हैं।"
- The report urges the government to work on "building sovereign design and research capabilities, R&D excellence and harnessing agentic AI for semiconductor engineering," since "building deep capabilities" in materials sciences and silicon designing will "move India from a services-led design base to a creator of differentiated IP, architectures and integration technologies that define next generation systems."
रिपोर्ट सरकार से "स्वायत्त डिजाइन और अनुसंधान क्षमताओं, अनुसंधान एवं विकास उत्कृष्टता तथा सेमीकंडक्टर इंजीनियरिंग हेतु एजेंटिक AI के उपयोग" पर कार्य करने का आग्रह करती है, क्योंकि पदार्थ विज्ञान और सिलिकॉन डिजाइनिंग में "गहरी क्षमताओं" का निर्माण भारत को "सेवाओं-आधारित डिजाइन केंद्र से विशिष्ट बौद्धिक संपदा, आर्किटेक्चर और एकीकरण प्रौद्योगिकियों के निर्माता" में परिवर्तित करेगा, जो अगली पीढ़ी की प्रणालियों को परिभाषित करेंग

Capital investment
पूंजी निवेश

- While the details on the second phase of the **India Semiconductor Mission** are yet to be revealed, the report pegs the necessary capital expenditure from the state at **$45-60 billion** over a period of ten years.
यद्यपि **इंडिया सेमीकंडक्टर मिशन** के दूसरे चरण का विवरण अभी सामने नहीं आया है, रिपोर्ट के अनुसार अगले दस वर्षों में सरकार को लगभग **45-60 अरब डॉलर** का पूंजीगत व्यय करना होगा।
- This amount should, however, be spent on projects where the risk is less and "bankability" can assure returns to investors, the report warns.
हालाँकि, रिपोर्ट चेतावनी देती है कि यह राशि केवल उन परियोजनाओं पर खर्च की जानी चाहिए जहाँ जोखिम कम हो तथा "बैंकबिलिटी" निवेशकों को प्रतिफल सुनिश्चित कर सके।
- This translates to a shift away from directing public funds towards frontier chips, whose transistors are the smallest — **3 to 7 nanometres** — and towards "mature, advanced—aligned with strategic relevance—as well as compound nodes," the report says.
रिपोर्ट के अनुसार इसका अर्थ यह है कि सार्वजनिक धन को अत्याधुनिक चिप्स, जिनके ट्रांजिस्टर आकार **3 से 7 नैनोमीटर** तक होते हैं, से हटाकर "परिपक्व, उन्नत—रणनीतिक महत्व के अनुरूप—तथा कंपाउंड नोड्स" की ओर केंद्रित किया जाए।
- It advocates, for instance, "selective depth, capital efficiency and system-level differentiation, rather than attempting to replicate the full global manufacturing spectrum."
उदाहरण के लिए, यह "पूर्ण वैश्विक विनिर्माण ढाँचे की नकल करने के बजाय चयनात्मक गहराई, पूंजी दक्षता और प्रणाली-स्तरीय भिन्नता" का समर्थन करती है।
- For instance, packaging, which is among the last steps of a chipmaking process, and less expensive and complex than fabrication, is identified as a "core production pillar, not a downstream activity" in the report.
उदाहरणस्वरूप, पैकेजिंग, जो चिप निर्माण प्रक्रिया के अंतिम चरणों में से एक है तथा फैब्रिकेशन की तुलना में कम महंगी और कम जटिल है, रिपोर्ट में "मुख्य उत्पादन स्तंभ, न कि केवल डाउनस्ट्रीम गतिविधि" के रूप में पहचानी गई है।

Trusted partners
विश्वसनीय साझेदार

- In a list of "priority partners," the report highlights the **U.S., Japan, the European Union, and South Korea** as partners with whom to work to get "access to critical tools, equipment servicing and lifecycle support," and to take advantage of "India's market scale, talent base and packaging capacity."
"प्राथमिक साझेदारों" की सूची में रिपोर्ट ने **अमेरिका, जापान, यूरोपीय संघ और दक्षिण कोरिया** को ऐसे भागीदारों के रूप में चिह्नित किया है, जिनके साथ मिलकर "महत्वपूर्ण उपकरणों, उपकरण सेवाओं और जीवनचक्र समर्थन तक पहुँच" प्राप्त की जा सकती है तथा "भारत के विशाल बाजार, प्रतिभा आधार और पैकेजिंग क्षमता" का लाभ उठाया जा सकता है।

The need for strengthening India's EV supply chains

As EV adoption gathers pace, there is a greater need to focus on reducing vulnerability to external shocks

GS III: Economy

Jaideep Saraswat
Akanksha Golchha

India's electrification of road transport has entered a decisive growth phase. Around 2.5 million vehicles were sold in FY26, a significant increase from FY25. This momentum reflects the effectiveness of policy support from both the Centre and the States, including upfront purchase incentives, road tax exemptions and other demand-side interventions. These measures helped create the initial market, reduce consumer hesitation, and establish electric vehicles (EVs) as a credible and tested technology.

Import dependence

The next phase of EV adoption demands a different policy and industrial logic. As the sector scales, India is moving away from imported fossil fuels, only to find itself becoming increasingly dependent on imported lithium-ion batteries. The challenge is no longer how quickly India can electrify transport, but how it can do so without creating a new strategic vulnerability. EV growth must now be judged by three additional metrics: supply chain resilience, strategic autonomy, and long-term sustainability.

India's domestic cell manufacturing is still far below the scale needed to alter import dependence meaningfully. Under the ACC Battery Production Linked Incentive scheme, 40 GWh of capacity has been awarded, but only about 1 GWh has been installed so far. Meanwhile, passenger EVs sold in India are sourcing batteries from 14 global manufacturers, with 7,987 MWh imported in 2025. Of this, a significant share came from Chinese manufacturers, highlighting that increasing EV sales are tightly correlated with increasing imports from China.

This concentration creates a structural risk for Indian EV OEMs (original equipment manufacturers). Battery supply is increasingly exposed to a single-country ecosystem that is shaped by policy, geopolitics, and industrial strategy outside India's control. Several developments in China are influencing pricing and availability, like tighter technology restrictions, prioritisation of domestic demand, withdrawal of VAT exemptions on battery exports, and more. Additionally, the West Asia conflict has compounded the pressure through higher raw material costs, elevated manufacturing expenses in China, and rising transport and risk premiums.

The consequences extend beyond OEM balance sheets. Battery inflation delays price parity with internal combustion engine (ICE) vehicles and slows the shift from early adopters to mass-market buyers. In a market as price-sensitive as India's, rising cell costs can confine EVs to premium segments and place national adoption targets at risk if the situation persists and OEMs are forced to pass on higher costs to consumers.

This requires a holistic situational assessment and identifying key interventions in the short to medium term. The near-term response must be pragmatic. Many OEMs already talk of a "China + 1" sourcing strategy, but actual supplier diversity varies widely by segment. Higher-end EVs are increasingly paired with non-Chinese NMC batteries, while cost-sensitive mass-market models continue to rely on cheaper Chinese LFP cells. True diversification, across suppliers, chemistries, and geographies, may raise costs initially; but it significantly lowers the risk of strategic disruption over time.

Product modifications

The cost shock should also drive product-level discipline. OEMs need to design EVs around efficiency, lighter architectures, more effective drivetrains, smarter software calibration, and battery right-sizing aligned with actual usage rather than aspirational range. India's market may ultimately reward lean, purpose-built electrification over oversized vehicles designed around imported battery economics.

Software-defined battery platforms that support multiple chemistries without hardware redesign would further improve flexibility as the cell market evolves. Moreover, Indian manufacturers should begin type-testing vehicles across emerging chemistries, including sodium-ion batteries. Sodium-ion is not yet a full substitute for lithium-ion across all use cases, but it could serve as a meaningful hedge as production scales domestically, broadening the technology base and reducing dependence on any single chemistry or supplier.

Further, India's path forward lies in building a structured 'EV supply chain alliance' with trusted partners, one that spans minerals, manufacturing, technology, and standards. Such an alliance would distribute risk across geographies, deepen domestic capability over time, and ensure that no single external disruption can stall India's electrification agenda.

The EV transition is no longer straightforward and the recent disruptions underscore the need for a more resilient approach. India has already demonstrated that it can create demand for clean mobility. The next test is whether it can build the industrial depth to sustain that demand without becoming dependent on a single external bottleneck.

(Jaideep Saraswat is the Associate Director of the Clean Power, Electric Mobility & Emerging Technologies vertical at Vasudha Foundation. Akanksha Golchha is Senior Associate (non-resident) with the Chair on India & Emerging Asia Economics at Center for Strategic and International Studies.)

03J6. ' The need for strengthening India's EV supply chains
भारत की ईवी आपूर्ति शृंखलाओं को सुदृढ़ करने की आवश्यकता

- Around **2.5 million vehicles** were sold in **FY26**, a significant increase from **FY25**.
वित्तीय वर्ष 2026 में लगभग **25 लाख वाहन** बेचे गए, जो **वित्तीय वर्ष 2025** की तुलना में उल्लेखनीय वृद्धि है।
- As the sector scales, India is moving away from imported fossil fuels, only to find itself becoming increasingly dependent on imported lithium-ion batteries.
जैसे-जैसे यह क्षेत्र विस्तृत हो रहा है, भारत आयातित जीवाश्म ईंधनों से दूर जा रहा है, किन्तु साथ ही आयातित लिथियम-आयन बैटरियों पर उसकी निर्भरता बढ़ती जा रही है।
- EV growth must now be judged by three additional metrics: supply chain resilience, strategic autonomy, and long-term sustainability.
अब EV क्षेत्र की वृद्धि का आकलन तीन अतिरिक्त मानकों — आपूर्ति श्रृंखला की स्थिरता, रणनीतिक स्वायत्तता और दीर्घकालिक स्थिरता — के आधार पर किया जाना चाहिए।
- Under the **ACC Battery Production Linked Incentive scheme**, **40 GWh** of capacity has been awarded, but only about **1 GWh** has been installed so far.

उत्पाद संशोधन

- Further, India's path forward lies in building a structured '**EV supply chain alliance**' with trusted partners, one that spans minerals, manufacturing, technology, and standards.
इसके अतिरिक्त, भारत का भविष्य विश्वसनीय साझेदारों के साथ एक संगठित '**EV सप्लाई चेन गठबंधन**' बनाने में निहित है, जो खनिज, विनिर्माण, प्रौद्योगिकी और मानकों तक विस्तृत हो।

Govt. to replace WPI with Producer Price Index, new series from June 15

GS III: Economy

Press Trust of India
NEW DELHI

DPIIT will release a new series with three indices – Output PPI, Trial Input PPI, Services PPI

The Centre will phase out the Wholesale Price Index (WPI) over the next five years while simultaneously introducing a more detailed Producer Price Index (PPI), covering output, input and services prices, in a bid to offer a more realistic assessment of inflationary trends in the economy.

Speaking with reporters, Praveen Mahto, Principal Economic Adviser in the Commerce and Industry Ministry, said that the Department for Promotion of Industry and Internal Trade (DPIIT) will release the revised series of WPI with new base year 2022-23 on June 15, which would replace the existing series with base year 2011-12.

In addition, the department would release a new series of PPI from June 15. It will have three indices – Output PPI, Trial Input PPI and Services PPI.

Initially, services PPI will have seven services – Banking, Securities Transaction, Insurance, Management of Pension Funds, Railways, Air (Passenger), and Telecom.

"Considering the wide usage of WPI in price escalation clauses, this index will be released for five years from the date of release of the revised series along with PPI and will be discontinued thereafter," the ministry said in a statement. The five-year period would give users sufficient time to switch from WPI to PPI. Mr. Mahto said that after five years, the PPI is expected to replace WPI.

The transition from WPI to PPI aligns with global best practices adopted by advanced economies and the recommendations of the International Monetary Fund (IMF).

The availability of both Output PPI and Input PPI provides a better understanding of the price movements of output items vis-à-vis the input items used in an industry.

It also explains how inflation experienced by producers of input items is passed through to the output they produce.

Mr. Mahto said that the Service PPIs for seven services have been compiled in the first phase based on the availability of data from administrative sources/agencies. More services are planned to be added to the PPI basket of services in subsequent phases, subject to data availability.

The DPIIT informed that WPI and Output PPI are being compiled on a monthly basis and will be available for May 2026 (Provisional) along with the back series from April 2023 to April 2026 on June 15.

03J6. ' Govt. to replace WPI with Producer Price Index, new series from June 15
सरकार WPI की जगह प्रोड्यूसर प्राइस इंडेक्स लाएगी, नई श्रृंखला 15 जून से

- The Centre will phase out the **Wholesale Price Index (WPI)** over the next five years.

केंद्र सरकार अगले पाँच वर्षों में **थोक मूल्य सूचकांक (WPI)** को चरणबद्ध तरीके से समाप्त करेगी।

- While simultaneously introducing a more detailed **Producer Price Index (PPI)**, covering output, input and services prices.

साथ ही अधिक विस्तृत **प्रोड्यूसर प्राइस इंडेक्स (PPI)** लागू करेगी, जिसमें उत्पादन, इनपुट और सेवाओं की कीमतें शामिल होंगी।

- In a bid to offer a more realistic assessment of inflationary trends in the economy.

इसका उद्देश्य अर्थव्यवस्था में मुद्रास्फीति के रुझानों का अधिक यथार्थवादी आकलन प्रदान करना है।

- Speaking with reporters, **Praveen Mahto**, Principal Economic Adviser in the **Commerce and Industry Ministry**, said that the **Department for Promotion of Industry and Internal Trade (DPIIT)** will release the revised series of WPI with new base year **2022-23** on **June 15**.

वाणिज्य एवं उद्योग मंत्रालय के प्रधान आर्थिक सलाहकार **प्रवीण महतो** ने पत्रकारों से बातचीत में कहा कि **उद्योग और आंतरिक व्यापार संवर्धन विभाग (DPIIT)** 15 जून को **2022-23** को नया आधार वर्ष बनाकर WPI की संशोधित श्रृंखला जारी करेगा।

- Which would replace the existing series with base year **2011-12**.

यह वर्तमान **2011-12** आधार वर्ष वाली श्रृंखला का स्थान लेगी।

- In addition, the department would release a new series of **PPI** from June 15.

इसके अतिरिक्त विभाग 15 जून से **PPI** की नई श्रृंखला भी जारी करेगा।

- It will have three indices — **Output PPI, Trial Input PPI and Services PPI**.

इसमें तीन सूचकांक होंगे — **आउटपुट PPI, ट्रायल इनपुट PPI और सर्विसेज PPI**।

- Initially, **Services PPI** will have seven services — **Banking, Securities Transaction, Insurance,**

Management of Pension Funds, Railways, Air (Passenger), and Telecom.

प्रारंभ में **सर्विसेज PPI** में सात सेवाएँ शामिल होंगी — **बैंकिंग, सिक्योरिटीज ट्रांजैक्शन, बीमा, पेंशन फंड प्रबंधन, रेलवे, हवाई यात्री सेवा और दूरसंचार**।

- "Considering the wide usage of WPI in price escalation clauses, this index will be released for five years from the date of release of the revised series along with PPI and will be discontinued thereafter," the ministry said in a statement.

  मंत्रालय ने बयान में कहा, "मूल्य वृद्धि संबंधी प्रावधानों में WPI के व्यापक उपयोग को देखते हुए, संशोधित श्रृंखला जारी होने की तिथि से अगले पाँच वर्षों तक इसे PPI के साथ जारी रखा जाएगा और उसके बाद इसे बंद कर दिया जाएगा।"
- The transition from **WPI** to **PPI** aligns with global best practices adopted by advanced economies and the recommendations of the **International Monetary Fund (IMF)**.

  WPI से **PPI** की ओर यह बदलाव विकसित अर्थव्यवस्थाओं द्वारा अपनाई गई वैश्विक सर्वोत्तम प्रथाओं और **अंतरराष्ट्रीय मुद्रा कोष (IMF)** की सिफारिशों के अनुरूप है।
- The availability of both **Output PPI** and **Input PPI** provides a better understanding of the price movements of output items vis-à-vis the input items used in an industry.

  आउटपुट PPI और **इनपुट PPI** दोनों की उपलब्धता उद्योगों में उपयोग होने वाले इनपुट और उत्पादित वस्तुओं की कीमतों में बदलाव को बेहतर ढंग से समझने में मदद करेगी।
- It also explains how inflation experienced by producers of input items is passed through to the output they produce.

  यह यह भी स्पष्ट करेगा कि इनपुट उत्पादकों द्वारा अनुभव की गई मुद्रास्फीति अंतिम उत्पादों की कीमतों में कैसे स्थानांतरित होती है।
- Mr. Mahto said that the **Service PPIs** for seven services have been compiled in the first phase based on the availability of data from administrative sources/agencies.

  श्री महतो ने कहा कि पहले चरण में सात सेवाओं के लिए **सर्विस PPI** प्रशासनिक स्रोतों और एजेंसियों से उपलब्ध आंकड़ों के आधार पर तैयार किए गए हैं।
- More services are planned to be added to the **PPI basket of services** in subsequent phases, subject to data availability.

  आंकड़ों की उपलब्धता के अनुसार आगे के चरणों में **PPI सेवा बास्केट** में और सेवाएँ जोड़ी जाएँगी।
- The **DPIIT** informed that **WPI** and **Output PPI** are being compiled on a monthly basis.

  DPIIT ने जानकारी दी कि **WPI** और **आउटपुट PPI** को मासिक आधार पर संकलित किया जा रहा है।

Extreme heat tests India's record milk production

GS III: Economy

NEWS ANALYSIS

Reuters
NEW DELHI

During a summer of extreme heat with temperature topping 40 degrees Celsius last year, much like northern India is currently experiencing, dairy farmer Neeraj Bharadwaj watched one of his cows deliver a calf months early.

The newborn was tiny and almost hairless. People said it would not survive, but Bharadwaj bottle fed it milk until it slowly recovered.

Scientists say such premature births are part of a wider pattern of increasingly intense summers linked to climate change.

Heat stress reduces feed intake and diverts cows' energy.

Bharadwaj's small farm of six cows near Delhi is typical of millions in India, the world's biggest dairy producer responsible for almost a quarter of global supply where most milk comes from farms with between 2-5 animals.

5% of GDP

Dairy sector accounts for about 5% of India's GDP and supports more than 80 million farmers. Rising incomes and population level mean demand for dairy is set to grow - the government estimates it could almost double by 2050.

But extreme heat means cows eat less, make less milk, struggle to conceive and produce fewer live offspring, experts say, while farmers spend more trying to keep animals cool and fertile. "Milk production falls by nearly 30% during extreme heat," Bharadwaj said.

Record output

India's milk production reached a record 239 million tonne in the 2023-24 fiscal year, up nearly 64% in a decade, according to government data.

But researchers, dairy experts and farmers say rising heat is quietly exposing the vulnerabilities of that model. Scientists at the National Dairy Research Institute said heat stress reduces feed intake and diverts cows' energy away from milk production and reproduction.

Bharadwaj spent some ₹2 lakh modifying cattle sheds with tarpaulin covers and ventilation systems to cut heat stress while yearly maintenance added another ₹50,000.

Pankaj Navani, a dairy entrepreneur, said larger organised dairy operators adapted more quickly because they treat dairy as a commercial business, investing in cooling systems, ventilation and feed management. But such investment is hard for most dairy farmers operating with only a handful of cattle and limited capital.

'Formalising supply chain integrity a huge challenge for circularity'

GS III: Economy

Vinaya Deshpande Pandit
MUMBAI

Formalising supply chain integrity in manufacturing is a challenge for circular economy in India, industry leaders opined. At the Maharashtra Circular Economy Conclave held here, large Indian firms spoke about the efforts being taken towards circular economy, the regulatory framework and the push and pull factors towards circularity.

"There are two challenges at present. We need to have supply chain integrity. In India, we have an informal way of managing circularity. How to formalise it is a challenge. The second challenge is transparency and traceability in the system that the material is really good and is going to get recycled back into the system," said Prabodha Acharya, CSO of JSW Steel.

Prabodha Acharya, CSO of JSW Steel. said JSW Steel was able to use 99.99% of its waste as byproduct. REPRESENTATIONAL PHOTO

A panel discussion with the representatives of firms such as Mahindra Group, Tata Group, Aditya Birla Group and JSW Steel explored three broad themes on why circular economy mattered to large businesses, how conglomerates can shape systems beyond own operations to suppliers and what the next phase of circular business transformation in Maharashtra and India could look like. They also discussed the significance of resource security at a time of geopolitical instability, which has become a major factor leading to circularity.

Push and pull factors

Deeksha Vats, chief sustainability officer of Aditya Birla Group, emphasised on the impact of push and pull factors in creating circularity. "The regulations are the push factors. The pull factor is when the customers ask for greener products. Currently, the need for resource security is what is leading to bigger strides in circular economy," she said.

Mr. Acharya said JSW Steel was able to use 99.99% of its waste as by-product. "We created JSW cement to create another business. It is one of the most low-carbon businesses. Everything which comes out must be reused. Every energy which comes out, we trap and use. We do waste-gas recycling. [As much as] 40-50% of our energy needs are met out of it. We use everything that comes out of it," he said.

The event organised by the Consulate General of Finland in Mumbai, Embassy of Finland in India, MMRDA, Finnish Innovation Fund Sitra and FICCI was the official side event of World Circular Economy Forum 2026, to be hosted in Asia for the first time this year in September.

Tigress Zeenat gives birth to four cubs in Odisha's Similipal

The translocation effort aimed at enhancing the genetic diversity of tigers in Odisha's Similipal Tiger Reserve has received a major boost, with tigress Zeenat, brought from Maharashtra, giving birth to four cubs. Photographs of Zeenat gently carrying her cubs in her mouth have since gone viral. "Today, a proud chapter has been added to Odisha's natural resources and wildlife conservation efforts," Chief Minister Mohan Majhi said in a post on X on Tuesday. The event assumes significant importance for the State Forest Department, especially after an earlier experiment to introduce tigers in Satkosia Tiger Reserve had failed.

India vulnerable to chronic aircraft noise thanks to regulatory gaps

Researchers have said the health effects of noise depend on how loud it is as well as on how often it occurs, how long it continues for, whether people have enough time to recover before the next exposure – especially as they sleep at night – and cumulative long-term exposure

GS III: Environment

Rohan Singh
Kushagra Rajendra
Argha Kamal Guha

Every few minutes, aircraft descend over densely populated neighbourhoods near India's major airports. For the people here, the noise has been almost constant for years, often even continuing through the night. India's aviation and environmental regulations require airports to map the aircraft noise exposure using decibel contours – maps showing how the air pressure varies around the airport. Official assessments have also identified high-noise zones extending into residential areas.

But even as India's airports monitor sound with increasing technical precision, they have paid far less attention to what years of repeated exposure may be doing to people. Research on the long-term biological effects of chronic aircraft noise in India is also limited. Some emerging research has pointed to inflammation, stress-related changes, and even cognitive effects. The fact remains, however, that the gap between regulatory noise monitoring and understanding biological risk is widening.

The standard metrics designed for steady industrial noise don't capture the intermittent, burst-like nature of the noise from aircraft. PASCAL MEIER/UNSPLASH

THE GIST

- Even as India's airports monitor sound with increasing technical precision, they have paid far less attention to what years of repeated exposure may be doing to people
- Research on the long-term biological effects of chronic aircraft noise in India is also limited
- Some emerging research has pointed to inflammation, stress-related changes, and even cognitive effects
- The fact remains, however, that the gap between regulatory noise monitoring and understanding biological risk is widening

Aircraft noise, biological stress

The limited research available, often confined to high-intensity occupational settings such as aviation personnel, nevertheless suggests aircraft noise may have effects far beyond hearing loss alone.

One 2025 study led by Manish Shukla, a scientist at the Defence Institute of Physiology and Allied Sciences, a laboratory under the Defence Research and Development Organisation in New Delhi, checked 621 Air Force personnel who were chronically exposed to aircraft noise. The researchers found elevated levels of systemic inflammation and oxidative stress and lower heart-rate variability.

These personnel also showed subclinical cochlear and neural damage. While their standard hearing tests were normal, they had inner-ear and auditory nerve dysfunction.

Together, the findings suggested aircraft noise may be a chronic biological stressor affecting both auditory and cardiovascular systems. Dr. Shukla noted that even lower urban noise levels, when experienced over long periods, could potentially trigger similar stress-related pathways in the body.

He added that current aircraft noise assessment frameworks may underestimate broader public health risks because they remain largely centered on hearing damage and decibel thresholds. He noted that emerging evidence increasingly links chronic noise exposure to stress-related inflammation and cardiovascular effects, even at lower exposure levels.

The current approaches to monitoring also fall short of addressing cumulative biological stress, Dr. Shukla said.

Unequal risk

The gap between monitoring noise and understanding risk requires technical but also social solutions because of how the options of the people at risk are constrained. Not all people living near airports can afford to move elsewhere or fully proof their homes from the vibrations and noise.

Rajeev Kariya, who has lived near Delhi airport flight paths for decades now, said aircraft noise has become more intense over the years as flights have become larger and more frequent and airports have extended runway operations. He said the continuous noise regularly disrupts sleep and irritates him throughout the day. He installed expensive double-glazed windows but they did little to keep the noise out. His neighbourhood, he said, is suffused with it.

Researchers have said the health effects of noise depend on how loud it is as well as on how often it occurs, how long it continues for, whether people have enough time to recover before the next exposure – especially as they sleep at night – and cumulative long-term exposure.

Both World Health Organization and International Civil Aviation Organization guidelines have acknowledged these factors.

The standard acoustic metrics are designed for steady industrial noise. They do not capture the intermittent, burst-like nature of the noise from aircraft flying overhead. That is, each takeoff produces sudden sound peaks and that can trigger disproportionate psychological responses.

Markandeya Tiwari, a former faculty member of the Department of Civil Engineering at IIT-Banaras Hindu University, said relying only on averaged indicators, such as L_{eq} and L_{DN}, is insufficient to understand aircraft noise exposure. He added that additional metrics such as L_{10}, L_{50}, and L_{90} are required to capture fluctuations, peak exposure periods, and intermittent noise.

L_{eq} is the average acoustic energy. L_{DN} is a variant of Leq over 24 hours plus 10 dB added to all nighttime noise. L_{10}, L_{50}, and L_{90} are the sound levels exceeded for 10%, 50%, and 90% of the time.

Activist Anil Sood, who has been involved in legal disputes over airport noise for nearly 17 years, has disputed whether averaged indicators can capture repeated noise peaks, night-time disturbances, and long-term exposure linked to health risks. Using RTI applications and court proceedings, Mr. Sood has questioned official monitoring methodologies and airport-noise assessments.

According to him, while the Central Pollution Control Board (CPCB) is formally responsible for monitoring aviation noise, most of the compliance is handled by airport operators and the Directorate General of Civil Aviation (DGCA).

Former CPCB regional director D.K. Soni said the current regulations do not adequately address the long-term public-health implications of chronic noise. Cumulative exposure assessment, he said, remains a low regulatory priority.

CSIR-National Environment Engineering Research Institute senior technical officer Satish K. Lokhande said India's aircraft noise monitoring needs substantial improvements.

"Currently, monitoring is largely limited to regulatory compliance rather than long-term health-based assessments," he said, recommending real-time noise monitoring networks around residential and hospital zones with public dashboards.

Beyond decibels

According to Dr. Tiwari, acoustic monitoring that is mindful of fluctuations in sound levels could help identify when peak exposure occurs. That then could allow doctors and hospitals, urban planners, and architects to develop more targeted ways to mitigate noise and health-based standards for affected populations.

Taken together, the challenge now is not that data is unavailable – it exists – but that health-based evidence of harm is linked in a very limited way to aviation regulations. Until that changes, India may continue to measure aircraft noise with great precision even as it knows less and less about the noise's long-term impact.

The Hindu Bureau
NEW DELHI

DRDO and the IAF flight-tests RudraM-II missile from an airborne platform on Tuesday. ANI/MINISTRY OF DEFENCE

The Defence Research and Development Organisation (DRDO) and the Indian Air Force (IAF) have successfully conducted flight-tests of the indigenous RudraM-II air-to-surface missile, marking a significant milestone in India's efforts to strengthen its precision strike capabilities and advance self-reliance in defence technology.

According to the Defence Ministry, the missile was test-fired from an airborne platform under extreme release conditions, with the trials designed to validate the performance of all critical subsystems and flight parameters.

Data captured through a network of tracking and monitoring instruments deployed by the Integrated Test Range (ITR), Chandipur, confirmed the missile's performance and the success of the trials.

RudraM-II was developed by Research Centre Imarat (RCI), Hyderabad, the nodal DRDO laboratory for the programme, in collaboration with other DRDO establishments, including Defence Research and Development Laboratory (DRDL), High Energy Materials Research Laboratory (HEMRL), Armament Research & Development Establishment (ARDE), and ITR.

The programme also received significant support from development-cum-production partners, along with agencies such as Hindustan Aeronautics Limited, Regional Centre for Military Airworthiness, Missile System Quality Assurance Agency, and a number of Indian defence industries.

Defence Minister Rajnath Singh congratulated the DRDO, the IAF, defence public sector undertakings (DPSUs), industry partners and all stakeholders.

The silken voice of Hindi cinema that touched hearts falls silent

OBITUARY

PCS

Anuj Kumar

SUMAN KALYANPUR (1937-2026)

Suman Kalyanpur, who touched the deepest corners of our hearts with her silken voice, passed away in Mumbai on Sunday night after a brief illness. Like a gentle wind bearing the fragrance of first rain, Kalyanpur's voice possessed a luminous clarity that spoke directly to the listener. It never knocked on the door of the heart – it felt like it was already nestled within, like a long-lost memory waiting to be remembered. Her understated and intimate expressions made her songs feel like quiet confessions.

In Hindi cinema's golden age, when competition was not always fair, and musical giants carried huge egos, Kalyanpur viewed singing not as a vehicle for fame but as a pure, spiritual extension of her early love for the fine arts. Underappreciated even after delivering massive chartbusters, she remained remarkably soft-spoken, media-shy, and genuinely embarrassed by extravagant praise.

Born on January 28, 1937, in Dhaka to Shankar Rao Hemmady, a noted banker, she relocated to Bombay with her family in 1943. Music was not her first choice. As a teenager, she was passionate about the visual arts. After completing her schooling at Mumbai's St. Columba High School, she enrolled at the prestigious Sir J.J. School of Art to pursue painting.

Her musical quest began when family members noticed her natural talent while she sang Noor Jehan songs at home, prompting her to pursue formal vocal training under family friend and composer Pandit Keshav Rao Bhole.

Later, maestro Khan Abdul Rehman Khan of Kirana gharana gave her a grounding in Hindustani classical music, followed by a stint with Master Navrang.

Finds a footing

Meanwhile, in 1953, when Kalyanpur sang at a college function, she impressed the legendary Talat Mahmood with her rendition of Noor Jehan classics. Mahmood recommended her name to the recording label HMV, and Kalayanpur found a footing in an extremely competitive industry led by the Mangeshkar sisters.

In a career spanning three decades, the Padma Bhushan sang in around 100 films in different languages. Her definitive masterpieces include *Na Tum Hamein Jano (Baat Ek Raat Ki)*, a masterclass in romantic yearning with Hemant Kumar, where her voice floats like moonlight over a minimalist arrangement by S.D. Burman. In Shankar Jaikishen's pulsating *Aaj Kal Tere Mere Pyar Ke Charche (Brahmachari)* and Kalyanji Anandji's teasing love song *Na Na Karte Pyar Tumhin Se Karte (Jab Jab Phool Khile*, 1965) with Rafi, Kalyanpur exudes her playful energy and mischievous tone without losing vocal control, while Naushad's tender *Mera Pyar Bhi Tu Hai* (*Saathi*,1968) with Mukesh is a perfect example of Kalyanpur's soft, romantic, caressing vocal style.

Comparison with Lata

Though a section of the industry saw Kalyanpur as an alternative to Lata Mangeshkar, and radio announcers inadvertently credited her songs to Mangeshkar, a close look reveals the difference in their sonic signatures. The discerning always appreciated Suman's softer, slightly rounder texture, which lent itself beautifully to intimate settings.

One of the abiding links with the golden era of Hindi film music, Kalyanpur will live on through melodies that continue to resonate across generations, a soothing voice that made ordinary love stories feel poetic and eternal.

  तीन दशकों के करियर में **पद्म भूषण** से सम्मानित सुमन कल्याणपुर ने विभिन्न भाषाओं की लगभग 100 फिल्मों में गीत गाए।

Divyanshi is youngest Indian to win WTT Feeder women's title

PCS

Sports Bureau

Divyanshi... the champion.

Fifteen-year-old Divyanshi Bhowmick produced a dream performance at Prishtina in Kosovo as she became the youngest Indian to win a WTT Feeder women's singles title.

The World No. 211 Divyanshi stunned Chinese Taipei's Yeh Yi-Tian, placed 38 in the chart, with a 8-11, 11-8, 11-5, 7-11, 11-7 victory. According to the Table Tennis Federation of India, she is the second-youngest player in the world to capture a WTT Feeder women's crown. Divyanshi also clinched the women's doubles top prize alongside fellow Indian teenager Syndrela Das. The pair defeated Japan's Sachi Aoki and Cocona Muramatsu 7-11, 14-12, 12-14, 11-8, 11-7.

In WTT Youth Contender Sandefjord, M. Ananya bagged the girls' u-17 singles trophy, beating Tushti Sood 14-12, 11-3, 12-10.

A tribute to Satwik and Chirag's resilience

Celebration time: Satwik and Chirag are delighted after ending their title drought. BADMINTON PHOTO

PCS

Devyanshi Bihani

For nearly two years, Satwiksairaj Rankireddy and Chirag Shetty were forced to watch title opportunities slip away amid injuries, setbacks and frustrating near-misses.

On Sunday, however, India's premier men's doubles pair ended the drought by becoming the first Indian duo to win the Singapore Open after defeating Indonesia's Fajar Alfian and Muhammad Shohibul Fikri 18-21, 21-17, 21-16 in the Super 750 final.

The triumph marked Satwik and Chirag's first BWF World Tour title since 2024 and capped a week in which they also snapped the 34-match winning streak of World champions Kim Won-ho and Seo Seung-jae in the semifinals.

"I think the last week has been really, really good. It's been almost two years since we had won a title, so that makes it even more special. Especially in a tournament like the Singapore Open, where historically we haven't done as well," Chirag said during a virtual press conference on Monday.

The title run was built on resilience, with four of the Indians' five matches going the distance. They were tested again in the final as the Indonesians edged a tight opening game after drawing level at 18. But Satwik and Chirag stayed composed.

"We'll accept if we lose, but we'll give everything and lose. The attitude was pretty calm. Even when we were down, we wanted to fight back," Satwik said.

The second game saw the Indians increase the pace of the exchanges and force errors from their opponents to force the decider.

The Indians entered the third game determined to seize control. Satwik's attacking game began to click while Chirag dominated the forecourt, helping the pair build a crucial cushion. Although Fajar and Fikri briefly narrowed the gap, the Indians remained in command and closed out the contest in 72 minutes.

With a long-awaited title finally secured, Satwik and Chirag head into this week's Indonesia Open with renewed confidence and momentum ahead of the World Championships and Asian Games later this year.

विश्व रैंकिंग में 211वें स्थान पर मौजूद दिव्यांशी ने रैंकिंग में 38वें स्थान पर काबिज **चीनी ताइपे की येह यी-तियान** को 8-11, 11-8, 11-5, 7-11, 11-7 से हराकर चौंका दिया।

- According to the **Table Tennis Federation of India**, she is the second-youngest player in the world to capture a **WTT Feeder women's crown**.

टेबल टेनिस फेडरेशन ऑफ इंडिया के अनुसार, वह **WTT फीडर महिला खिताब** जीतने वाली दुनिया की दूसरी सबसे युवा खिलाड़ी हैं।

02J6. A tribute to Satwik and Chirag's resilience
सात्विक और चिराग के संघर्ष व जज़्बे को सलाम

- For nearly two years, **Satwiksairaj Rankireddy** and **Chirag Shetty** were forced to watch title opportunities slip away amid injuries, setbacks and frustrating near-misses.

लगभग दो वर्षों तक **सात्विकसाईराज रंकीरेड्डी** और **चिराग शेट्टी** को चोटों, असफलताओं और निराशाजनक करीबी हारों के बीच खिताब जीतने के मौके हाथ से निकलते हुए देखने पड़े।

- On Sunday, however, India's premier men's doubles pair ended the drought by becoming the first Indian duo to win the **Singapore Open** after defeating Indonesia's **Fajar Alfian** and **Muhammad Shohibul Fikri** 18-21, 21-17, 21-16 in the **Super 750 final**.

हालाँकि रविवार को भारत की शीर्ष पुरुष युगल जोड़ी ने इस सूखे को समाप्त करते हुए **सिंगापुर ओपन** जीतने वाली पहली भारतीय जोड़ी बनने का गौरव हासिल किया। उन्होंने इंडोनेशिया के **फजार अल्फियान** और **मुहम्मद सोहिबुल फिक्री** को **सुपर 750 फाइनल** में 18-21, 21-17, 21-16 से हराया।

How red moved through empires, trade networks, and industrial factories

Red emerges from a vast global system of dyes made from insects raised in the Americas, plants cultivated in Asia, and shellfish harvested along Mediterranean coasts; it moves through empires, trade networks, and factories, shifting from living organisms to laboratory production

GS I: History

Satwik Gade

In 1799, during the storming of the fortress of Seringapatam, British troops broke through the defences of Srirangapatna and killed Tipu Sultan, the ruler of Mysore. The palace inventories compiled in the aftermath record jewels, weapons, manuscripts and textiles of startling colour. Officers wrote with particular fascination about the intensity of the dyed fabrics stored in the royal workshops.

At the same moment, the soldiers themselves wore uniforms dyed in equally vivid scarlet. The British redcoat marching through the palace and the Mysorean textile he admired were both products of a vast global system of dyes – insects raised in the Americas, plants cultivated in Asia, shellfish harvested along Mediterranean coasts.

Global red trade

In the Mediterranean world, the most famous red-purple dye was extracted from marine snails harvested along Levantine shores. Classical writers such as Pliny the Elder describe vats of crushed shells fermenting under the sun, releasing a colour so rare that Roman law eventually reserved it for imperial robes. The value of the dye lay not merely in its hue but in the difficulty of its production: thousands of mollusks sacrificed to colour a single garment. In the Americas,

As pigments entered circuits of factories and markets, meanings attached to red began to shift: from sacrifice to revolution, warning, and mass politics

Indigenous farmers raised the cochineal insect on cactus paddles, harvesting the tiny bodies and drying them into a powder that produced a red of extraordinary intensity. A pound of red from these insects could produce enough red colour to run an entire factory. When Spanish ships began exporting cochineal to Europe in the sixteenth century, the dye rapidly became one of the most valuable commodities of the Atlantic world, rivaling silver in price and strategic importance.

Elsewhere, especially across Eurasia, dyers cultivated the roots of the madder plant, whose alizarin compounds could produce deep crimson lakes. These biological reds travelled astonishing distances. A single crimson cloak worn in London or Istanbul might contain colour drawn from insects cultivated in Oaxaca, plants grown in Central Asia, or mollusks harvested from Mediterranean shores. Colour, therefore, linked distant ecologies into networks of exchange long before industrial globalisation. Each red carried with it a geography.

Military power depended on these networks. By the eighteenth century, the scarlet coats of European regiments required reliable supplies of imported dyes. On battlefields clouded with gunpowder smoke, vivid uniforms helped commanders identify their troops and maintain order. The siege of Seringapatam unfolded within this global colour economy. Mysore's textile workshops produced fabrics dyed through Indian Ocean trade networks that connected Persian, Southeast Asian and South Asian markets. British officers entering the palace encountered not simply decorative cloth but the material traces of a rival commercial system. Empires fought not only for territory but also for control of the commodities that coloured the world.

Imperial cloth

Yet even as imperial armies marched in crimson, the foundations of the dye trade were beginning to shift. For centuries, every brilliant red had depended on living organisms, whether it was roots pulled from soil, or insects harvested from cacti, or shellfish gathered along rocky coasts. In 1856, the English chemist William Henry Perkin inadvertently altered this relationship. While attempting to synthesise quinine in an experiment, he produced a purple residue that dyed silk with remarkable intensity. The compound, later marketed as mauveine, inaugurated the modern synthetic dye industry. Within a few decades, chemists learned to reproduce the molecular structures responsible for many natural colours. In 1869, industrial chemists succeeded in synthesising alizarin, which is the key red component of madder, making centuries of agricultural cultivation suddenly unnecessary.

The implications were profound. Madder fields across Europe collapsed almost overnight. Cochineal plantations faced competition from cheaper laboratory pigments. What had once required soil, insects, seasons and skilled cultivation could now be produced in factories wherever coal, glassware and chemical knowledge were available.

Red was becoming abstract. Red moved from earth, to organism, to laboratory – from ritual substance to industrial commodity. And as pigments entered the circuits of factories, markets and empires, the meanings attached to red also began to shift: from sacrifice and sovereignty to revolution, warning, and mass politics.

Synthetic shift

The colour remained the same to the eye, but the world that produced it, and the world that would perceive red as a phenomenon, had both fundamentally changed.

(Satwik Gade is a Chennai-based writer and illustrator. This article is part of a series on the history and development of colours)

02J6. How red moved through empires, trade networks, and industrial factories

लाल रंग किस प्रकार साम्राज्यों, व्यापारिक नेटवर्कों और औद्योगिक कारखानों के माध्यम से आगे बढ़ा।

- In 1799, during the storming of the fortress of **Seringapatam**, British troops broke through the defences of **Srirangapatna** and killed **Tipu Sultan**, the ruler of **Mysore**.
  वर्ष 1799 में, **सेरिंगपट्टम** के किले पर आक्रमण के दौरान ब्रिटिश सैनिकों ने **श्रीरंगपट्टन** की रक्षा पंक्तियों को भेद दिया और **मैसूर** के शासक **टीपू सुल्तान** की हत्या कर दी।
- Officers wrote with particular fascination about the intensity of the dyed fabrics stored in the royal workshops.
  अधिकारियों ने विशेष आकर्षण के साथ राजकीय कार्यशालाओं में संग्रहित रंगे हुए वस्त्रों की गहन रंगत का वर्णन किया।

Global red trade
वैश्विक लाल रंग व्यापार

- In the Mediterranean world, the most famous red-purple dye was extracted from marine snails harvested along Levantine shores.

भूमध्यसागरीय विश्व में सबसे प्रसिद्ध लाल-बैंगनी रंग लेवांत के तटों से एकत्रित समुद्री घोंघों से प्राप्त किया जाता था।

- In the Americas, Indigenous farmers raised the **cochineal insect on cactus paddles**, harvesting the tiny bodies and drying them into a powder that produced a red of extraordinary intensity.
  अमेरिका में स्थानीय कृषक कैक्टस पर **कोचिनियल** नामक कीटों का पालन करते थे, उनके छोटे शरीरों को एकत्र कर सुखाकर ऐसा चूर्ण बनाते थे जो अत्यंत गहरे लाल रंग का उत्पादन करता था।
- When Spanish ships began exporting cochineal to Europe in the sixteenth century, the dye rapidly became one of the most valuable commodities of the Atlantic world, rivaling silver in price and strategic importance.
  जब सोलहवीं शताब्दी में स्पेनी जहाजों ने कोचिनियल को यूरोप निर्यात करना प्रारंभ किया, तब यह रंग शीघ्र ही अटलांटिक विश्व की सबसे मूल्यवान वस्तुओं में से एक बन गया और मूल्य तथा रणनीतिक महत्व में चाँदी की बराबरी करने लगा।
- Elsewhere, especially across **Eurasia, dyers cultivated the roots of the madder plant, whose alizarin compounds could produce deep crimson lakes**.
  अन्य स्थानों पर, विशेषकर यूरेशिया में, रंगरेज़ मैडर पौधे की जड़ों की खेती करते थे, जिनके अलिज़ारिन यौगिक गहरे लाल रंग उत्पन्न कर सकते थे।
- A single crimson cloak worn in **London** or **Istanbul** might contain colour drawn from insects cultivated in **Oaxaca**, plants grown in **Central Asia**, or mollusks harvested from Mediterranean shores.
  लंदन या **इस्तांबुल** में पहना गया एक लाल चोगा संभवतः **ओआहाका** में पाले गए कीटों, **मध्य एशिया** में उगाए गए पौधों या भूमध्यसागरीय तटों से प्राप्त मोलस्क जीवों के रंग से निर्मित होता था।
- The siege of **Seringapatam** unfolded within this global colour economy.
  सेरिंगपट्टम की घेराबंदी इसी वैश्विक रंग अर्थव्यवस्था के भीतर हुई।
- For centuries, every brilliant red had depended on living organisms, whether it was roots pulled from soil, or insects harvested from cacti, or shellfish gathered along rocky coasts.
  सदियों तक प्रत्येक चमकीला लाल रंग जीवित जीवों पर निर्भर था, चाहे वे मिट्टी से निकाली गई जड़ें हों, कैक्टस से प्राप्त कीट हों या पथरीले तटों से एकत्रित शंख-जीव।
- In 1856, the English chemist **William Henry Perkin** inadvertently altered this relationship.
  वर्ष 1856 में अंग्रेज रसायनशास्त्री **विलियम हेनरी पर्किन** ने अनजाने में इस संबंध को बदल दिया।
- While attempting to synthesise quinine in an experiment, he produced a purple residue that dyed silk with remarkable intensity.
  क्विनीन संश्लेषित करने के एक प्रयोग के दौरान उन्होंने एक बैंगनी अवशेष उत्पन्न किया जिसने रेशम को अत्यंत गहरे रंग में रंग दिया।
- The compound, later marketed as **mauveine**, inaugurated the modern synthetic dye industry.
  यह यौगिक, जिसे बाद में **मॉवीन** के नाम से बाज़ार में प्रस्तुत किया गया, आधुनिक कृत्रिम रंग उद्योग की शुरुआत बना।
- In 1869, industrial chemists succeeded in synthesising **alizarin**, which is the key red component of **madder,** making centuries of agricultural cultivation suddenly unnecessary.
  वर्ष 1869 में औद्योगिक रसायनज्ञों ने **अलिज़ारिन** का संश्लेषण करने में सफलता प्राप्त की, जो मैडर का मुख्य लाल घटक है, और इससे सदियों पुरानी कृषि आधारित खेती अचानक अनावश्यक हो गई।
- **Madder fields across Europe** collapsed almost overnight.
  यूरोप भर में मैडर के खेत लगभग रातोंरात समाप्त हो गए।
- Cochineal plantations faced competition from cheaper laboratory pigments.
  कोचिनियल बागानों को सस्ते प्रयोगशाला-निर्मित रंगों से प्रतिस्पर्धा का सामना करना पड़ा।
- What had once required soil, insects, seasons and skilled cultivation could now be produced in factories wherever coal, glassware and chemical knowledge were available.

जो कार्य पहले मिट्टी, कीट, मौसम और कुशल खेती पर निर्भर था, अब वह कोयला, काँच उपकरण और रासायनिक ज्ञान उपलब्ध होने पर कारखानों में उत्पादित किया जा सकता था।

- Red moved from earth, to organism, to laboratory — from ritual substance to industrial commodity.
  लाल रंग पृथ्वी से जीवों तक और फिर प्रयोगशाला तक पहुँच गया — एक अनुष्ठानिक पदार्थ से औद्योगिक वस्तु में परिवर्तित हो गया।

Questions and Answers to the previous day's daily quiz: 1. In which year did Goa attain statehood, and from which State was it separated? **Ans: 1987 and Daman and Diu**
2. On what date does Goa celebrate its Liberation Day? **Ans: December 19, 1961**
3. Goa attained statehood on May 30, and it became the .... State of India. Fill in the blanks. **Ans: 25**
4. Who owned Goa before India, and when was it annexed to India? **Ans: Portugal and 1961**
5. "Little Russia" in Goa refers to which place? **Ans: Morjim Beach**
6. What was the name of Goa before it was changed to the present name? **Ans: Gomantak, Govapuri, Gopakapattanna and Aparanta**
Visual: This place is famous for its "Blue Lagoon" — a stunning, emerald-green freshwater lagoon situated in South Goa. What is this place? **Ans: Cola Beach**
Early Birds: K.N. Viswanathan | Tom Alan Faith | Tito Shiladitya | Tamanjit Bisla | Sumana Dutta

02J6. QUIZ: Goa Statehood

1. Goa attained statehood in 1987 and was separated from Daman and Diu

- Goa was granted full **statehood** on **May 30, 1987** through the **Goa, Daman and Diu Reorganisation Act, 1987**. Before this, Goa, Daman and Diu functioned as a single Union Territory after their liberation from Portuguese rule in 1961.
- With statehood, Goa became the **25th State of India**, while Daman and Diu continued as a Union Territory.

2. Goa celebrates its Liberation Day on December 19, 1961

- **Goa Liberation Day** is observed every year on **December 19** to commemorate the end of Portuguese colonial rule in Goa.
- On this day in **1961**, the Indian Armed Forces launched **Operation Vijay**, leading to the successful integration of Goa, Daman, and Diu into India.
- Portuguese rule in Goa had continued for nearly **451 years**.

3. Goa became the 25th State of India

- The inclusion of **Konkani in the Eighth Schedule** of the Constitution in 1992 further strengthened Goa's linguistic recognition at the national level.

4. Goa was owned by Portugal and annexed to India in 1961

- Before joining India, Goa was under the control of **Portugal**, which had established colonial rule there in **1510** under Afonso de Albuquerque.

5. "Little Russia" in Goa refers to Morjim Beach

- The term **"Little Russia"** is popularly associated with **Morjim Beach** in North Goa.
- The area gained this nickname because of the large number of Russian tourists and expatriates who began visiting and residing there from the late 1990s onward.
- Russian restaurants, signboards, cultural influence, and businesses became common in the locality.
- Morjim is also ecologically significant because it serves as a nesting site for the protected **Olive Ridley turtles**, attracting both tourists and conservationists.

6. Goa was earlier known by names such as Gomantak and Govapuri

- Historically, Goa was known by several ancient names including **Gomantak, Govapuri, Gopakapattana, and Aparanta**.

- These names are found in ancient Indian texts, Puranas, and historical records. "Gomantak" is often interpreted as "fertile land" or "land of cows."
- During different historical periods, Goa was ruled by the Kadambas, Bahmani Sultanate, Vijayanagara Empire, and the Portuguese.

GS Paper 1: Geography	02 June 2026
TOPICS COVERED	
02J6	Fearsome dinosaur-era reptile was T. rex of the sea भयावह डायनासोर-युग का सरीसृप समुद्र का टी. रेक्स था।

Fearsome dinosaur-era reptile was T. rex of the sea

GS I: Geography

Reuters

Tyrannosaurus rex was a huge land predator during the twilight of the age of dinosaurs. But it was not the only *T. rex* that terrorised the Cretaceous Period. There also was a marine reptile named *Tylosaurus rex* – the *T. rex* of the sea – that rivalled its land counterpart in size and ferocity.

Scientists say they have identified *Tylosaurus rex* as a distinct species after a wide-ranging examination of previously discovered fossils. They made the judgment based on its enormous size, fine serrations along the edges of its teeth to cut flesh more efficiently, heavy-duty musculature of the jaws and neck for subduing large prey, and certain other anatomical nuances. Roughly 66 million years ago, *Tyrannosaurus rex* roamed the land in Western North America.

The seagoing T. rex with a streamlined body, elongated snout with large teeth, four large paddle-like flippers, and a powerful tail, rivalling its land counterpart in size and ferocity

Approximately 80 million years ago, *Tylosaurus rex* prowled an inland sea that at the time split North America in two. The seagoing *T. rex* had a streamlined body, elongated snout with large teeth, four large paddle-like flippers, and a powerful tail. The genus 'Tylosaurus' has been known since fossils were first unearthed during the 19th century. A handful of species are recognised, including *Tylosaurus proriger*. A genus is a grouping of closely related species sharing similar characteristics. For example, lions and tigers are from the same genus but represent different species.

The largest *Tyrannosaurus rex* specimen, nicknamed Sue and held at the Field Museum in Chicago, is about 12.2 m long. The largest *Tylosaurus rex* specimen, nicknamed Bunker and held at the University of Kansas Biodiversity Institute and Natural History Museum, is about 13.2 m long. Bunker previously had been identified as *Tylosaurus proriger*, but possessed the suite of traits that assigned it to *Tylosaurus rex*, the researchers said. "The skull alone is as long as I am tall – 5-foot-7 inches (1.7 m)," said palaeontologist Amelia Zietlow of the History Museum at the Castle in Appleton, Wisconsin, lead author of the study published in the *Bulletin of the American Museum of Natural History*.

Tylosaurus rex is a member of a group of marine reptiles with a global distribution called mosasaurs that evolved from land-living lizards to become apex marine predators during the final roughly 30 million years of the age of dinosaurs. Today's monitor lizards, including the Komodo dragon – the largest present-day lizard at up to 3 m long – are perhaps among the closest living relatives of *Tylosaurus rex*. Most of the fossils identified as *Tylosaurus rex* come from north and central Texas, though Bunker came from Kansas. The holotype specimen – the fossil used to formally name a species – is at the Perot Museum.

The new species name, meaning "king of the tylosaurs," was a nod to *Tyrannosaurus rex* – "an incredible animal itself, obviously," Ms. Zietlow said. The two *T. rexes* were not contemporaries, though forerunners of the giant dinosaur lived at the same time as the giant mosasaur. *Tylosaurus rex* was among the largest of the mosasaurs, alongside the likes of *Mosasaurus hoffmanni*.

02J6. Fearsome dinosaur-era reptile was T. rex of the sea
भयावह डायनासोर-युग का सरीसृप समुद्र का टी. रेक्स था।

एक समुद्री सरीसृप **टायलोसॉरस रेक्स** भी था — समुद्र का टी. रेक्स — जो आकार और उग्रता में अपने स्थलीय समकक्ष की बराबरी करता था।

- Roughly 66 million years ago, **Tyrannosaurus rex** roamed the land in **Western North America.**

लगभग 6.6 करोड़ वर्ष पूर्व **टायरैनोसॉरस रेक्स** पश्चिमी उत्तरी अमेरिका की भूमि पर विचरण करता था।

- The largest **Tylosaurus rex** specimen, nicknamed **Bunker** and held at the **University of Kansas Biodiversity Institute and Natural History Museum**, is about 13.2 m long.

टायलोसॉरस रेक्स का सबसे बड़ा नमूना, जिसे **बंकर** नाम दिया गया है और जो **यूनिवर्सिटी ऑफ कंसास बायोडायवर्सिटी इंस्टिट्यूट एंड नेचुरल हिस्ट्री म्यूज़ियम** में रखा गया है, लगभग 13.2 मीटर लंबा है।

- **Tylosaurus rex** is a member of a group of marine reptiles with a global distribution called **mosasaurs** that evolved from land-living lizards to become apex marine predators during the • nal roughly 30 million years of the age of dinosaurs.

टायलोसॉरस रेक्स समुद्री सरीसृपों के एक वैश्विक समूह **मोसासॉर्स** का सदस्य है, जो स्थलीय छिपकलियों से विकसित होकर डायनासोरों के युग के अंतिम लगभग 3 करोड़ वर्षों के दौरान समुद्र के शीर्ष शिकारी बन गए।

- Today's monitor lizards, including the **Komodo dragon** — the largest present-day lizard at up to 3 m long — are perhaps among the closest living relatives of **Tylosaurus rex**.
  वर्तमान समय की मॉनिटर छिपकलियाँ, जिनमें **कोमोडो ड्रैगन** भी शामिल है — जो लगभग 3 मीटर लंबाई वाली आज की सबसे बड़ी छिपकली है — संभवतः **टायलोसॉरस रेक्स** के सबसे निकट जीवित संबंधियों में से हैं।
- The two T. rexes were not contemporaries, though forerunners of the giant dinosaur lived at the same time as the giant mosasaur.
  दोनों टी. रेक्स एक ही समय के जीव नहीं थे, यद्यपि विशाल डायनासोर के पूर्वज उसी काल में जीवित थे जब विशाल मोसासॉर मौजूद था।
- **Tylosaurus rex** was among the largest of the mosasaurs, alongside the likes of **Mosasaurus hoffmanni**.
  टायलोसॉरस रेक्स, **मोसासॉरस हॉफमानी** जैसे मोसासॉर्स के साथ, सबसे बड़े मोसासॉर्स में से एक था।

Centre clears five new judges for SC; strength rises to 37

GS II: Polity

The Hindu Bureau
NEW DELHI

The Centre on Monday cleared the appointment of five judges to the Supreme Court, taking the court's strength to 37, close to its revised sanctioned strength of 38.

In a post on X, Minister of State for Law and Justice Arjun Ram Meghwal said the President had approved the appointments under Article 124(2) of the Constitution.

Those appointed are Justice Sheel Nagu, Chief Justice of the Punjab and Haryana High Court; Justice Shree Chandrashekhar, Chief Justice of the Bombay High Court; Justice Sanjeev Sachdeva, Chief Justice of the Madhya Pradesh High Court; Justice Arun Palli, Chief Justice of the High Court of Jammu and Kashmir and Ladakh; and senior advocate V. Mohana.

Ms. Mohana was one of the leading counsels in a series of cases highlighting structural career inequalities for women officers in the armed forces. Currently, the Supreme Court has only one woman judge, Justice B.V. Nagarathna, who is also part of the Supreme Court Collegium. Justice Nagarathna was appointed to the Supreme Court in August 2021.

V. Mohana

The appointments follow the Collegium's recommendation on May 27, 2026.

The development comes weeks after the Centre, on May 5, increased the sanctioned strength of the Supreme Court from 34 to 38 judges through the Supreme Court (Number of Judges) Amendment Ordinance, 2026.

Delhi HC recognises 'right to be forgotten', lays down rules for de-indexing judicial records

GS II: Polity

The Hindu Bureau

NEW DELHI

The Delhi High Court has held that the "right to be forgotten" flows from the constitutional right to privacy under Article 21 and enables individuals to seek removal of personal information from public digital accessibility when it no longer serves a legitimate public purpose.

Justice Sachin Datta, in a 144-page judgment delivered on Friday, laid down a framework governing de-indexing of judicial records from search engines and masking of personal identifiers from publicly accessible court records.

"India presently lacks a comprehensive statutory framework explicitly governing the right to be forgotten. However, the absence of specific legislation does not preclude constitutional courts from recognising and enforcing this right," the High Court remarked.

Petitioners sought removal of personal information from digital public domain

The court's decision came while hearing over 30 petitions filed by a diverse group of individuals, including persons who had been acquitted of criminal charges, parties to matrimonial disputes, persons whose proceedings had been quashed or settled, and individuals whose names appeared incidentally in judicial records.

'Harm to reputation'

The petitioners shared a common grievance that the continued availability and name-based searchability of judicial records bearing their names in the digital public domain causes "disproportionate and continuing harm to their reputations, dignity, and life prospects".

Giving them relief, the court directed search engines, legal database platforms and other intermediaries to de-index specified judgments, orders and related reportage from name-based search results.

02J6. Delhi HC recognises 'right to be forgotten', lays down rules for de-indexing judicial records

दिल्ली हाई कोर्ट ने 'भूल जाने के अधिकार' को मान्यता दी, न्यायिक अभिलेखों को डी-इंडेक्स करने के नियम तय किए

- The **Delhi High Court** has held that the "**right to be forgotten**" flows from the constitutional right to privacy under **Article 21** and enables individuals to seek removal of personal information from public digital accessibility when it no longer serves a legitimate public purpose.

दिल्ली हाई कोर्ट ने कहा है कि "**भूल जाने का अधिकार**" संविधान के **अनुच्छेद 21** के तहत निजता के अधिकार से उत्पन्न होता है और यह

व्यक्तियों को सार्वजनिक डिजिटल पहुंच से अपनी व्यक्तिगत जानकारी हटाने का अधिकार देता है, जब उसका कोई वैध सार्वजनिक उद्देश्य नहीं रह जाता।

- Justice **Sachin Datta**, in a 144-page judgment delivered on Friday, laid down a framework governing de-indexing of judicial records from search engines and masking of personal identifiers from publicly accessible court records.
  न्यायमूर्ति **सचिन दत्ता** ने शुक्रवार को दिए गए 144 पृष्ठों के फैसले में सर्च इंजनों से न्यायिक रिकॉर्ड को डी-इंडेक्स करने और सार्वजनिक रूप से उपलब्ध अदालत रिकॉर्ड से व्यक्तिगत पहचान संबंधी जानकारी छिपाने के लिए एक रूपरेखा तय की।
- "India presently lacks **a comprehensive statutory framework explicitly governing the right to be forgotten**. However, the absence of specific legislation does not preclude constitutional courts from recognising and enforcing this right," the High Court remarked.
  हाई कोर्ट ने कहा, "भारत में वर्तमान में 'भूल जाने के अधिकार' को स्पष्ट रूप से नियंत्रित करने वाला कोई व्यापक वैधानिक ढांचा नहीं है। हालांकि, विशेष कानून की अनुपस्थिति संवैधानिक अदालतों को इस अधिकार को मान्यता देने और लागू करने से नहीं रोकती।"
- The court's decision came while hearing over 30 petitions filed by a diverse group of individuals, including persons who had been acquitted of criminal charges, parties to matrimonial disputes, persons whose proceedings had been quashed or settled, and individuals whose names appeared incidentally in judicial records.
  अदालत का यह फैसला 30 से अधिक याचिकाओं की सुनवाई के दौरान आया, जिन्हें विभिन्न लोगों ने दायर किया था, जिनमें आपराधिक मामलों से बरी हुए लोग, वैवाहिक विवादों के पक्षकार, जिनके मामले रद्द या सुलझा दिए गए थे, और वे लोग शामिल थे जिनके नाम न्यायिक रिकॉर्ड में संयोगवश दर्ज हो गए थे।

'Harm to reputation'
'प्रतिष्ठा को नुकसान'

- The petitioners shared a common grievance that the continued availability and name-based searchability of judicial records bearing their names in the digital public domain causes "disproportionate and continuing harm to their reputations, dignity, and life prospects".
  याचिकाकर्ताओं की साझा शिकायत थी कि डिजिटल सार्वजनिक क्षेत्र में उनके नाम वाले न्यायिक रिकॉर्ड की निरंतर उपलब्धता और नाम के आधार पर खोजे जाने की सुविधा उनकी "प्रतिष्ठा, गरिमा और जीवन की संभावनाओं को असंगत और निरंतर नुकसान" पहुंचाती है।
- Giving them relief, the court directed search engines, legal database platforms and other intermediaries to de-index specified judgments, orders and related reportage from name-based search results.
  उन्हें राहत देते हुए अदालत ने सर्च इंजनों, कानूनी डेटाबेस प्लेटफॉर्मों और अन्य मध्यस्थों को निर्देश दिया कि वे निर्दिष्ट फैसलों, आदेशों और संबंधित रिपोर्टों को नाम-आधारित खोज परिणामों से डी-इंडेक्स करें।

Joy and pain

Health gains from NFHS-6 are significant, but unaddressed needs exist

When triumph and disaster arrive at the same time, it is important to celebrate, but also, to take stock, assess, and pivot to address the lacuna. The recently released National Family Health Survey (NFHS)-6 data offer such an opportunity. The data for 2023-24 revealed some remarkable gains for India, but also exposed some unguarded pathways that will become disastrous if not attended to. The greatest of the gains came in the sector of child health – stunting is down by 17%; severe wasting is down 32%; institutional deliveries are at over 90%; and full immunisation coverage for children aged 12-23 months rose to over 87%. Additionally, the figures show that India's Total Fertility Rate (TFR) had stabilised at 2.0, below the replacement level of 2.1 Unequivocally, these are gains; ones that India has been working on for decades. It is an encouraging sign that the needle has finally moved, in these crucial sectors. These gains will have to be built upon, without any drop in service delivery, while remaining uncompromising on access or quality of services in the public sector. However, health managers need to heed the other side of the paradigm as well. NFHS-6 indicates a 'dual public health burden' – obesity (in three years, it had grown from 22.9% to 27.3% among men, while among women, from 24% to 30.7%) remains problematic while some level of malnutrition continues, besides the onslaught of lifestyle diseases. The survey also showed a decline in exclusive breastfeeding among children under six months, from 63.7% in NFHS-5 to 55.8% in NFHS-6. Breast feeding is essential to prevent infant malnutrition.

The NFHS, one of the largest cross-sectional household surveys in the world, could easily be considered the primary tool to define public policy, and evidence-based governance, besides tracking development indicators. The data it generates are crucial. Other India-level data from similar periods indicate similar trends; the SRS and the National Health Accounts Survey reveal the lack of focus or funds for lifestyle diseases, and metabolic disorders. The danger of letting this continue will be known sooner rather than later, as India progresses through a demographic transition to a greyer nation. At this stage, transformations are still possible. Setting up comprehensive screening programmes for NCDs, stressing on nation-wide behaviour change communication on diet and exercise, and ensuring higher taxes on sugared beverages and packaged foods are all techniques that will help reduce, and limit the burden, of NCDs. Bolstering health systems to tackle these NCDs, once they set in, at every level – village, town and city – is also critical.

02J6. Joy and pain
खुशी और पीड़ा

- The greatest of the gains came in the sector of child health — stunting is down by 17%; severe wasting is down 32%; institutional deliveries are at over 90%; and full immunisation coverage for children aged 12-23 months rose to over 87%.

सबसे बड़ी उपलब्धियाँ बाल स्वास्थ्य के क्षेत्र में प्राप्त हुईं — अवरुद्ध वृद्धि में 17% की कमी आई; गंभीर क्षीणता में 32% की कमी हुई; संस्थागत प्रसव 90% से अधिक हो गए; तथा 12-23 माह आयु के बच्चों के लिए पूर्ण टीकाकरण कवरेज 87% से अधिक हो गया।

- Additionally, the gures show that India's**Total Fertility Rate (TFR)** had stabilised at 2.0, below the replacement level of 2.1.

इसके अतिरिक्त, आँकड़े दर्शाते हैं कि भारत की **कुल प्रजनन दर (TFR)** 2.0 पर स्थिर हो गई है, जो प्रतिस्थापन स्तर 2.1 से नीचे है।

- **NFHS-6** indicates a 'dual public health burden' — obesity (in three years, it had grown from 22.9% to 27.3% among men, while among women, from 24% to 30.7%) remains problematic while some level of malnutrition continues, besides the onslaught of lifestyle diseases.

NFHS-6 एक 'द्वैध सार्वजनिक स्वास्थ्य बोझ' को इंगित करता है — मोटापा (तीन वर्षों में पुरुषों में 22.9% से बढ़कर 27.3% तथा महिलाओं में 24% से बढ़कर 30.7%) अभी भी गंभीर समस्या बना हुआ है, जबकि जीवनशैली संबंधी रोगों के बढ़ते प्रभाव के साथ कुछ स्तर का कुपोषण भी जारी है।

- The survey also showed a decline in exclusive breastfeeding among children under six months, from 63.7% in **NFHS-5** to 55.8% in **NFHS-6**.

सर्वेक्षण में यह भी पाया गया कि छह माह से कम आयु के बच्चों में केवल स्तनपान की दर **NFHS-5** में 63.7% से घटकर **NFHS-6** में 55.8% रह गई।

- Breast feeding is essential to prevent infant malnutrition.

शिशु कुपोषण को रोकने के लिए स्तनपान अत्यंत आवश्यक है।

- The **NFHS**, one of the largest cross-sectional household surveys in the world, could easily be considered the primary tool to de• ne public policy, and evidence-based governance, besides tracking development indicators.

NFHS, जो विश्व के सबसे बड़े क्रॉस-सेक्शनल घरेलू सर्वेक्षणों में से एक है, विकास संकेतकों की निगरानी के साथ-साथ सार्वजनिक नीति निर्धारण और साक्ष्य-आधारित शासन का प्रमुख उपकरण माना जा सकता है।

- The data it generates are crucial.

इसके द्वारा उत्पन्न आँकड़े अत्यंत महत्वपूर्ण हैं।

- Setting up comprehensive screening programmes for **NCDs**, stressing on nation-wide behaviour change communication on diet and exercise, and ensuring higher taxes on sugared beverages and packaged foods are all techniques that will help reduce, and limit the burden, of **NCDs**.

गैर-संचारी रोगों (NCDs) के लिए व्यापक स्क्रीनिंग कार्यक्रम स्थापित करना, आहार और व्यायाम के संबंध में राष्ट्रव्यापी व्यवहार परिवर्तन संचार पर बल देना, तथा मीठे पेय पदार्थों और पैकेज्ड खाद्य पदार्थों पर अधिक कर सुनिश्चित करना — ये सभी उपाय **NCDs** के बोझ को कम और सीमित करने में सहायक होंगे।

No room for anti-India elements in Myanmar, says visiting President

[redacted]
Kallol Bhattacherjee
NEW DELHI

Visiting Myanmar President Min Aung Hlaing has assured India that he will not allow use of his country's territory by groups that pose a security threat to Indian interests. The concern was raised by Prime Minister Narendra Modi, who held broad-spectrum conversations with Mr. Hlaing on Monday, including calls for dialogue between the junta-backed government and the pro-democracy Opposition in Myanmar. Foreign Secretary Vikram Misri said the discussion included the issue of detention of former leader and Nobel laureate Aung San Suu Kyi.

"The President reiterated Myanmar's assurance that its territory would not be permitted to be used against India's security interests. The Prime Minister affirmed that India... remained committed to deepening security cooperation between the two countries," a joint statement issued at the end of the discussion mentioned.

Mr. Misri later said that the issue of presence of insurgents from India's Northeast in Myanmar territory was raised by Mr. Modi during the talks.

'Pragmatic step'

The visit of Mr. Hlaing is being viewed as a pragmatic engagement of Myanmar by India despite the conflict situation that prevails in that country since the February 2021 coup that deposed the National League for Democracy (NLD) government of Ms. Suu Kyi. Speaking to the media after the discussion, Mr. Misri mentioned that a detailed discussion was held during the talks to "find a way" out of the civil conflict, saying that India believes in "sustained dialogue" among all the stakeholders to deal with the conflict in Myanmar. He added that India does not believe in "disengagement" when it comes to Myanmar.

Promising talks: PM Narendra Modi with Myanmar President Min Aung Hlaing in New Delhi on Monday. SHIV KUMAR PUSHPAKAR

"I should underline that our engagement with Myanmar is not intended to be a commentary on the internal political arrangement in that country. The Prime Minister raised the issue that there is a need for an enduring peace as Myanmar finds its way back to democracy," said Mr. Misri, explaining that the Indian concerns on continued detention of Ms. Suu Kyi was raised during a "free-wheeling" talk.

He further informed that the two sides discussed infrastructure projects like the Kaladan Multimodal Transit Transport Project and the trilateral Moreh-Mae Tsot highway that was to connect India's northeast with Myanmar via Thailand – both of which have been "delayed" by the conflict in Myanmar. "Right now, the obstacle that faces both of these projects is the security situation in Myanmar," said Mr. Misri, adding that there are "active hostilities" currently under way in the Kaladan highway between the Myanmar Army and the ethnic armed organisations in the Rakhine State.

Defence cooperation

Mr. Misri further said that the two sides discussed defence cooperation that will cover training of Myanmar troops for United Nations peacekeeping. "This is something that has been in focus for several years now. Defence cooperation with Myanmar focuses on training, capacity building, institution building and a very important part of the training is also UN peace keeping." Mr. Misri also said that the defence cooperation also included concerns related to security and safety of the India-Myanmar border spanning 1,643 km.

He also informed that the discussion covered critical minerals as Myanmar has major deposits in the Kachin State that borders both India and China. The discussion also included the issue of existence of cyber scam centres in southeast Myanmar bordering Thailand. Mr. Misri recollected that India has airlifted at least 2,411 workers from cyber scam compounds in Myanmar so far.

Mr. Hlaing's visit has also drawn criticism from Myanmar's exiled Opposition and especially the exiled National Unity Government (NUG), which has urged India not to grant legitimacy to his junta-backed government.

02J6. No room for anti-India elements in Myanmar, says visiting President

म्यांमार में भारत-विरोधी तत्वों के लिए कोई जगह नहीं, दौरे पर आए राष्ट्रपति ने कहा

- Visiting Myanmar President **Min Aung Hlaing** has assured India that he will not allow use of his country's territory by groups that pose a security threat to Indian interests.

दौरे पर आए म्यांमार के राष्ट्रपति **मिन आंग ह्लाइंग** ने भारत को आश्वासन दिया है कि वह अपने देश की भूमि का उपयोग उन समूहों द्वारा नहीं होने देंगे जो भारत के हितों के लिए सुरक्षा खतरा पैदा करते हैं।

- Foreign Secretary **Vikram Misri** said the discussion included the issue of detention of former leader and Nobel laureate **Aung San Suu Kyi**.

विदेश सचिव **विक्रम मिस्री** ने कहा कि चर्चा में पूर्व नेता और नोबेल पुरस्कार विजेता **आंग सान सू ची** की हिरासत का मुद्दा भी शामिल था।

- The visit of Mr. Hlaing is being viewed as a pragmatic engagement of Myanmar by India despite the conflict situation that prevails in that country since the February 2021 coup that deposed the National League for Democracy (**NLD**) government of Ms. Suu Kyi.

श्री ह्लाइंग की यात्रा को भारत द्वारा म्यांमार के साथ एक व्यावहारिक जुड़ाव के रूप में देखा जा रहा है, जबकि फरवरी 2021 के तख्तापलट के बाद से वहां संघर्ष की स्थिति बनी हुई है, जिसने सुश्री सू ची की **नेशनल लीग फॉर डेमोक्रेसी (NLD)** सरकार को हटा दिया था।

- He further informed that the two sides discussed infrastructure projects like the **Kaladan Multimodal Transit Transport Project** and the trilateral **Moreh-Mae Sot highway** that was to connect India's northeast with Myanmar via Thailand – both of which have been "delayed" by the conflict in Myanmar.

उन्होंने आगे बताया कि दोनों पक्षों ने **कलादान मल्टीमॉडल ट्रांजिट ट्रांसपोर्ट प्रोजेक्ट** और त्रिपक्षीय **मोरेह-माए सॉट राजमार्ग** जैसे अवसंरचना परियोजनाओं पर चर्चा की, जो भारत के पूर्वोत्तर को थाईलैंड के माध्यम से म्यांमार से जोड़ने वाली थीं — और दोनों ही परियोजनाएं म्यांमार के संघर्ष के कारण "विलंबित" हो गई हैं।

- "Right now, the obstacle that faces both of these projects is the security situation in Myanmar," said Mr. Misri, adding that there are "active hostilities" currently under way in the Kaladan highway between the Myanmar Army and the ethnic armed organisations in the **Rakhine State**.

"इस समय इन दोनों परियोजनाओं के सामने सबसे बड़ी बाधा म्यांमार की सुरक्षा स्थिति है," श्री मिस्री ने कहा। उन्होंने बताया कि **राखाइन राज्य** में कलादान राजमार्ग पर म्यांमार सेना और जातीय सशस्त्र संगठनों के बीच वर्तमान में "सक्रिय संघर्ष" चल रहा है।

Defence cooperation
रक्षा सहयोग

- Mr. Misri further said that the two sides discussed defence cooperation that will cover training of Myanmar troops for **United Nations peacekeeping**.
  श्री मिस्री ने आगे कहा कि दोनों पक्षों ने रक्षा सहयोग पर चर्चा की जिसमें **संयुक्त राष्ट्र शांति स्थापना** के लिए म्यांमार के सैनिकों का प्रशिक्षण शामिल होगा।
- Mr. Misri also said that the defence cooperation also included concerns related to security and safety of the **India-Myanmar border** spanning **1,643 km**.
  श्री मिस्री ने यह भी कहा कि रक्षा सहयोग में **भारत-म्यांमार सीमा** की सुरक्षा और संरक्षा से जुड़ी चिंताएं भी शामिल थीं, जिसकी लंबाई **1,643 किमी** है।
- He also informed that the discussion covered **critical minerals** as Myanmar has major deposits in the **Kachin State** that borders both India and China.
  उन्होंने यह भी बताया कि चर्चा में **महत्वपूर्ण खनिजों** का मुद्दा भी शामिल था क्योंकि म्यांमार के **काचिन राज्य** में बड़े भंडार हैं, जिसकी सीमा भारत और चीन दोनों से लगती है।
- The discussion also included the issue of the existence of **cyber scam centres** in southeast Myanmar bordering Thailand.
  चर्चा में थाईलैंड से लगते दक्षिण-पूर्वी म्यांमार में मौजूद **साइबर धोखाधड़ी केंद्रों** का मुद्दा भी शामिल था।
- Mr. Misri recollected that India has airlifted at least **2,411 workers** from cyber scam compounds in Myanmar so far.
  श्री मिस्री ने बताया कि भारत अब तक म्यांमार के साइबर धोखाधड़ी परिसरों से कम से कम **2,411 श्रमिकों** को एयरलिफ्ट कर चुका है।

Ethical use of AI in cultural space to be a key focus area at BRICS culture meetings

GS II: IR

NEW DELHI

Varanasi is set to host 2nd Culture Working Group Meeting after the 1st CWG, which was held virtually

The ethical use of artificial intelligence in the cultural space will be one of the focus areas for discussion during the BRICS culture working group meetings beginning from Thursday, the Union Culture Ministry said on Monday.

Creative economy, culture climate and sustainable development and cultural and creative industries are some of the other areas of deliberation, Union Culture Secretary Vivek Agrawal said at a press conference in which he unveiled the comprehensive road map and calendar for the 2026 BRICS Culture Track.

He said that there was a line-up of major cultural events around the BRICS summit scheduled across the country over the coming months. Varanasi is set to host second Culture Working Group Meeting, following the successful completion of the 1st Culture Working Group (CWG) meeting held virtually on April 29-30.

"As one of the world's oldest living cities, Varanasi will serve as the backdrop for five critical thematic panel discussions aimed at shaping the final outcome document," Mr. Agrawal said.

The five themes are: creative economy and people-to-people cooperation, copyright and ethical AI in the creative economy, cultural heritage protection and return of cultural property, collaborative approaches to safeguarding shared heritage and culture as a driver of sustainable development.

The culture track will feature a total of four official meetings alongside major public festivals, bringing together the 11 member nations (Brazil, Russia, India, China, South Africa, Egypt, Ethiopia, Iran, Saudi Arabia, the UAE, and Indonesia) along with 10 newly joined partner countries. After Varanasi, the third BRICS CWG meeting would be held in Bhopal followed by the BRICS Culture Festival and the BRICS Culture Minister's meeting. A BRICS theatre festival would be held in Delhi in October.

02J6. Ethical use of AI in cultural space to be a key focus area at BRICS culture meetings
ब्रिक्स संस्कृति बैठकों में सांस्कृतिक क्षेत्र में AI के नैतिक उपयोग पर रहेगा विशेष फोकस

- The ethical use of **artificial intelligence** in the cultural space will be one of the focus areas for discussion during the **BRICS culture working group meetings** beginning from Thursday, the Union Culture Ministry said on Monday.

केंद्रीय संस्कृति मंत्रालय ने सोमवार को कहा कि गुरुवार से शुरू होने वाली **ब्रिक्स संस्कृति कार्य समूह बैठकों** में सांस्कृतिक क्षेत्र में **कृत्रिम बुद्धिमत्ता (AI)** के नैतिक उपयोग पर विशेष चर्चा की जाएगी।

- **Creative economy**, culture climate and sustainable development and

cultural and creative industries are some of the other areas of deliberation, Union Culture Secretary **Vivek Agrawal** said at a press conference in which he unveiled the comprehensive road map and calendar for the **2026 BRICS Culture Track**.

केंद्रीय संस्कृति सचिव **विवेक अग्रवाल** ने एक प्रेस कॉन्फ्रेंस में कहा कि **रचनात्मक अर्थव्यवस्था**, संस्कृति, जलवायु एवं सतत विकास तथा सांस्कृतिक और रचनात्मक उद्योग भी चर्चा के अन्य प्रमुख विषय होंगे। इस दौरान उन्होंने **2026 ब्रिक्स कल्चर ट्रैक** का व्यापक रोडमैप और कैलेंडर जारी किया।

- **Varanasi** is set to host second **Culture Working Group Meeting**, following the successful completion of the 1st Culture Working Group (CWG) meeting held virtually on April 29–30.
  29–30 अप्रैल को वर्चुअल माध्यम से आयोजित पहली **कल्चर वर्किंग ग्रुप (CWG)** बैठक की सफलता के बाद अब दूसरी **कल्चर वर्किंग ग्रुप बैठक** की मेजबानी **वाराणसी** करेगा।
- "As one of the world's oldest living cities, Varanasi will serve as the backdrop for five critical thematic panel discussions aimed at shaping the final outcome document," Mr. Agrawal said.
  श्री अग्रवाल ने कहा, "दुनिया के सबसे प्राचीन जीवित शहरों में से एक **वाराणसी** पाँच महत्वपूर्ण विषयगत पैनल चर्चाओं की पृष्ठभूमि बनेगा, जिनका उद्देश्य अंतिम परिणाम दस्तावेज़ को तैयार करना है।"
- The five themes are: creative economy and people-to-people cooperation.
  पाँच विषयों में पहला है: रचनात्मक अर्थव्यवस्था और लोगों के बीच सहयोग।
- Copyright and ethical AI in the creative economy.
  रचनात्मक अर्थव्यवस्था में कॉपीराइट और नैतिक AI।
- Cultural heritage protection and return of cultural property.
  सांस्कृतिक विरासत की सुरक्षा और सांस्कृतिक संपत्तियों की वापसी।
- Collaborative approaches to safeguarding shared heritage.
  साझा विरासत की सुरक्षा के लिए सहयोगात्मक दृष्टिकोण।
- And culture as a driver of sustainable development.
  और सतत विकास को बढ़ावा देने में संस्कृति की भूमिका।
- The culture track will feature a total of four official meetings alongside major public festivals, bringing together the 11 member nations (**Brazil, Russia, India, China, South Africa, Egypt, Ethiopia, Iran, Saudi Arabia, the UAE, and Indonesia**) along with 10 newly joined partner countries.
  कल्चर ट्रैक के अंतर्गत चार आधिकारिक बैठकों के साथ प्रमुख सार्वजनिक उत्सव भी आयोजित होंगे, जिनमें 11 सदस्य देश (**ब्राज़ील, रूस, भारत, चीन, दक्षिण अफ्रीका, मिस्र, इथियोपिया, ईरान, सऊदी अरब, यूएई और इंडोनेशिया**) तथा 10 नए साझेदार देश भाग लेंगे।
- After **Varanasi**, the third BRICS CWG meeting would be held in **Bhopal** followed by the **BRICS Culture Festival** and the **BRICS Culture Minister's meeting**.
  वाराणसी के बाद तीसरी ब्रिक्स CWG बैठक **भोपाल** में आयोजित होगी, जिसके बाद **ब्रिक्स कल्चर फेस्टिवल** और **ब्रिक्स संस्कृति मंत्रियों की बैठक** होगी।
- A **BRICS theatre festival** would be held in **Delhi** in October.
  अक्टूबर में **दिल्ली** में एक **ब्रिक्स थिएटर फेस्टिवल** आयोजित किया जाएगा।

PATRIOTIC IAS

IMEC is caught between commerce and geopolitics

GS II: IR

The ongoing war in Iran has shattered many myths and brought to light realities that expose the structural vulnerabilities of the existing world order. Iran, which was no match for the combined military might and technological superiority of Israel and the United States, has not only withstood the military onslaught but has also retaliated in ways that were neither expected nor planned for. Nearly three months into the conflict, although a fragile ceasefire is holding, there appears to be no immediate solution to end the war or achieve the politico-military objectives that Israel and the U.S. set at its outset. While Iran has suffered major losses to its leadership, infrastructure and military assets, the American military has also incurred unprecedented losses.

Lessons from the Iran conflict

A recent U.S. Congressional Research Service report has noted that 42 U.S. aircraft have been lost or damaged so far during "Operation Epic Fury" – the war with Iran – which includes fifth generation stealth fighters such as the F-35. Plus, the ability to intercept Iranian missiles and drones has been severely degraded as more than half the total inventory of Patriot, Tomahawk and Terminal High Altitude Area Defense (THAAD) missiles have been expended. With more than 240 American targets reportedly hit by Iran, the conflict has shattered the myth that military superiority alone will guarantee an outright victory. Several of the asymmetric tactics employed by Iran have caught the U.S. and Israel on the back foot.

Another reality check underscored by this war is the critical importance of global choke points and how their blockade can severely disrupt the global economy. Iran, by imposing a blockade on the Strait of Hormuz early in the conflict, has virtually brought the global economy to its knees. Nearly 20 million barrels of crude oil, accounting for about a third of global oil supplies, pass through this narrow sea passage every day. India is among the countries most affected, as it imports nearly 88% of its crude oil requirements, amounting to about 1.8 billion barrels annually. While the world grapples with the blockade and works to diversify its energy sources, one thing is clear: there is an urgent need to explore and develop alternative connectivity options beyond existing trade routes, particularly maritime routes. New routes and corridors must be developed that avoid the two 'C's – conflict zones and choke points.

However, this realisation is neither new nor have countries been idle in pursuing solutions. Transnational connectivity projects such as the International North-South Transport Corridor (INSTC) and the Belt and Road Initiative (BRI) were conceived precisely for this purpose. The INSTC was designed to bypass the Suez Canal choke point, while the overland component of the BRI across Asia and Europe seeks to reduce dependence on both the Malacca Strait and the Suez Canal. Another major connectivity project is the India-Middle East-Europe Economic Corridor (IMEC). Unlike the other initiatives, IMEC traverses parts of West Asia, a region that has been significantly affected by the current conflict.

Rajeev Agarwal

Retired colonel, a Senior Research Consultant at CRF, Delhi, and the author of 'Between Tehran and Tel Aviv – Gaza's Story of Unending War'

The Iran conflict strengthens the case for the India-Middle East-Europe Economic Corridor (IMEC) while simultaneously complicating its execution

The IMEC framework

What is IMEC? The IMEC is a transformative and ambitious connectivity initiative that was officially announced at the G-20 Summit in New Delhi in September 2023. It seeks to connect India with Europe across the Arabian Peninsula, bypassing the traditional choke point of the Suez Canal. The project envisions a multimodal economic corridor integrating railways, ports, highways, energy networks and digital infrastructure to enhance trade, investment and connectivity. Unlike conventional transport corridors, IMEC is conceived as a holistic and multidimensional infrastructure project encompassing sea routes, rail networks, pipelines, undersea high-speed data links, green hydrogen corridors and transnational energy transmission grids.

The proposed structure has three distinct sections. The eastern section links India with West Asia through sealinks to the United Arab Emirates (UAE). The central section consists of an overland route across West Asia, traversing the UAE, Saudi Arabia, Jordan and Israel, and culminating at the port of Haifa on Israel's Mediterranean coast. The western leg of the corridor is sea-based, connecting Haifa to various European ports, beyond which the continent's extensive transportation network takes over.

What has happened due to the war? Soon after IMEC was announced, the war in Gaza broke out on October 7, 2023, placing the project on the back burner. Major areas of the originally envisioned corridor, particularly those involving Israel and the port of Haifa, were directly affected by the conflict.

Soon after the Iran-Israel '12-Day War' in June 2025, there was a concerted effort to move the project forward. However, the ongoing conflict involving Iran has once again thrown a spanner into its execution. Key ports in the UAE, particularly Jebel Ali and Fujairah, have been repeatedly targeted by Iran, while disruptions in the Strait of Hormuz have exposed the geographical vulnerabilities of these ports.

Another critical fault line exposed by the war is the deep faultlines and divergence in the positions adopted by Saudi Arabia and the UAE in the war. Both countries are key partners in IMEC, and any adversarial posture between them could prove to be a major setback for the corridor, whose success depends on smooth coordination and seamless connectivity across the region. The UAE's April 2026 announcement that it was opting out of the global oil grouping, the Organization of the Petroleum Exporting Countries (OPEC) and reports of its growing strategic coordination with Israel, including the deployment of Israeli defence systems such as the Iron Beam, risk widening differences between Riyadh and Abu Dhabi. Such developments are unlikely to augur well for either regional stability or the future of IMEC.

Navigating the challenges

The war in Iran has highlighted two important issues for both West Asia and IMEC. First, there is an urgent need for projects such as IMEC that can bypass conflict zones and choke points. However, for such initiatives to succeed, they must also navigate the region's geopolitical complexities, including the rapidly evolving dynamics among key partners such as Saudi Arabia and the UAE.

To address the first challenge, IMEC must evolve into a broader and more flexible framework while keeping open the possibility of reverting to the originally envisioned alignment once the conflict subsides. To this end, the option of developing key ports in Oman – such as Salalah, Duqm and Muscat – as eastern entry points could be explored, as they are located well away from the conflict-prone Strait of Hormuz. Similarly, on the western end, until the port of Haifa becomes a secure transit hub, a western spur passing through Egypt and terminating at one of its major Mediterranean ports could offer a viable alternative. Egypt already possesses the logistics ecosystem required to support IMEC, including the Suez Canal Economic Zone, six operational ports and four industrial zones specialising in green hydrogen, liquefied natural gas, shipbuilding and other future-oriented sectors.

To address the second challenge, countries such as India, which enjoy close relations and the trust of both Saudi Arabia and the UAE, will have to navigate a delicate but critical diplomatic terrain. European countries such as Italy and France, which are positioning themselves as key champions of IMEC in Europe, will also need to play an active role. The growing recognition of IMEC's strategic importance was evident during Prime Minister Narendra Modi's visit to Europe in May 2026. While elevating their bilateral ties to a Special Strategic Partnership, India and Italy reaffirmed their commitment to cooperate on IMEC, recognising its transformative potential to reshape and promote global trade, connectivity and prosperity.

The bottom line is clear. The war in Iran has underscored the need for transnational connectivity projects such as IMEC that can bypass conflict zones and strategic choke points. However, for such initiatives to succeed, they must overcome the geopolitical complexities in West Asia.

02J6.IMEC is caught between commerce and geopolitics
IMEC वाणिज्य और भूराजनीति के बीच फँस गया है।

- A recent **U.S. Congressional Research Service** report has noted that 42 U.S. aircraft have been lost or damaged so far during "**Operation Epic Fury**" — the war with Iran — which includes fifth generation stealth fighters such as the **F-35**.
  हाल ही में जारी **अमेरिकी कांग्रेसनल रिसर्च सर्विस** की एक रिपोर्ट में उल्लेख किया गया है कि ईरान के साथ युद्ध, जिसे "**ऑपरेशन एपिक फ्यूरी**" कहा गया, के दौरान अब तक 42 अमेरिकी विमान नष्ट या क्षतिग्रस्त हो चुके हैं, जिनमें **F-35** जैसे पाँचवीं पीढ़ी के स्टील्थ लड़ाकू विमान भी शामिल हैं।
- Plus, the ability to intercept Iranian missiles and drones has been severely degraded as more than half the total inventory of **Patriot, Tomahawk and Terminal High Altitude Area Defense (THAAD)** missiles have been expended.

इसके अतिरिक्त, ईरानी मिसाइलों और ड्रोन को रोकने की क्षमता भी गंभीर रूप से कमजोर हो गई है, क्योंकि **पैट्रियट, टॉमहॉक और टर्मिनल हाई एल्टीट्यूड एरिया डिफेंस (THAAD)** मिसाइलों के कुल भंडार का आधे से अधिक हिस्सा खर्च हो चुका है।

- New routes and corridors must be developed that avoid the two 'C's — conflict zones and choke points.
  ऐसे नए मार्ग और गलियारे विकसित किए जाने चाहिए जो दो 'C' — संघर्ष क्षेत्र और चोक प्वाइंट्स — से बच सकें।
- However, this realisation is neither new nor have countries been idle in pursuing solutions.
  हालाँकि, यह समझ नई नहीं है और न ही देश इसके समाधान खोजने में निष्क्रिय रहे हैं।
- Transnational connectivity projects such as the **International North-South Transport Corridor (INSTC)** and the **Belt and Road Initiative (BRI)** were conceived precisely for this purpose.
  अंतरराष्ट्रीय उत्तर-दक्षिण परिवहन गलियारा (INSTC) और **बेल्ट एंड रोड इनिशिएटिव (BRI)** जैसी अंतरराष्ट्रीय संपर्क परियोजनाएँ इसी उद्देश्य से परिकल्पित की गई थीं।
- The **INSTC** was designed to bypass the **Suez Canal** choke point, while the overland component of the **BRI** across Asia and Europe seeks to reduce dependence on both the **Malacca Strait** and the **Suez Canal**.
  INSTC को **स्वेज नहर** के चोक प्वाइंट को दरकिनार करने के लिए तैयार किया गया था, जबकि एशिया और यूरोप में फैला **BRI** का स्थलीय घटक **मलक्का जलडमरूमध्य** और **स्वेज नहर** दोनों पर निर्भरता कम करने का प्रयास करता है।
- Another major connectivity project is the **India-Middle East-Europe Economic Corridor (IMEC)**.
  एक अन्य प्रमुख संपर्क परियोजना **भारत-मध्य पूर्व-यूरोप आर्थिक गलियारा (IMEC)** है।

- What is **IMEC**?
  आईएमईसी क्या है?
- The **IMEC** is a transformative and ambitious connectivity initiative that was officially announced at the **G-20 Summit** in **New Delhi** in September 2023.
  आईएमईसी एक परिवर्तनकारी और महत्वाकांक्षी संपर्क पहल है जिसकी आधिकारिक घोषणा सितंबर 2023 में **नई दिल्ली** में आयोजित **जी-20 शिखर सम्मेलन** में की गई थी।
- It seeks to connect **India** with **Europe** across the Arabian Peninsula, bypassing the traditional choke point of the **Suez Canal**.
  इसका उद्देश्य **भारत** को अरब प्रायद्वीप के माध्यम से **यूरोप** से जोड़ना है, जबकि पारंपरिक चोक प्वाइंट **स्वेज नहर** को दरकिनार करना है।
- The project envisions a multimodal economic corridor integrating railways, ports, highways, energy networks and digital infrastructure to enhance trade, investment and connectivity.
  यह परियोजना व्यापार, निवेश और संपर्क को बढ़ावा देने हेतु रेलमार्गों, बंदरगाहों, राजमार्गों, ऊर्जा नेटवर्क और डिजिटल अवसंरचना को एकीकृत करने वाले बहु-माध्यमीय आर्थिक गलियारे की परिकल्पना करती है।
- Unlike conventional transport corridors, **IMEC** is conceived as a holistic and multidimensional infrastructure project encompassing sea routes, rail networks, pipelines, undersea high-speed data links, green hydrogen corridors and transnational energy transmission grids.
  पारंपरिक परिवहन गलियारों के विपरीत, **IMEC** को एक समग्र और बहुआयामी अवसंरचना परियोजना के रूप में परिकल्पित किया गया है, जिसमें समुद्री मार्ग, रेल नेटवर्क, पाइपलाइनें, समुद्र के नीचे उच्च गति डेटा लिंक, हरित हाइड्रोजन गलियारे और अंतरराष्ट्रीय ऊर्जा संचरण ग्रिड शामिल हैं।
- The central section consists of an overland route across **West Asia**, traversing the **UAE, Saudi Arabia, Jordan and Israel**, and culminating at the port of **Haifa** on Israel's Mediterranean coast.

केंद्रीय भाग **पश्चिम एशिया** में एक स्थलीय मार्ग से बना है, जो **UAE, सऊदी अरब, जॉर्डन और इज़राइल** से होकर गुजरता है तथा इज़राइल के भूमध्यसागरीय तट पर स्थित **हाइफ़ा** बंदरगाह पर समाप्त होता है।

- The western leg of the corridor is sea-based, connecting **Haifa** to various European ports, beyond which the continent's extensive transportation network takes over.
  गलियारे का पश्चिमी भाग समुद्र आधारित है, जो **हाइफ़ा** को विभिन्न यूरोपीय बंदरगाहों से जोड़ता है, जिसके बाद यूरोप का विस्तृत परिवहन नेटवर्क आगे की संपर्क व्यवस्था संभालता है।
- What has happened due to the war?
  युद्ध के कारण क्या हुआ है?
- Major areas of the originally envisioned corridor, particularly those involving **Israel** and the port of **Haifa**, were directly affected by the conflict.
  मूल रूप से परिकल्पित गलियारे के प्रमुख क्षेत्र, विशेषकर **इज़राइल** और **हाइफ़ा** बंदरगाह से जुड़े भाग, सीधे संघर्ष से प्रभावित हुए।
- Key ports in the **UAE**, particularly **Jebel Ali** and **Fujairah**, have been repeatedly targeted by Iran, while disruptions in the **Strait of Hormuz** have exposed the geographical vulnerabilities of these ports.
  UAE के प्रमुख बंदरगाह, विशेषकर **जेबेल अली** और **फुजैराह**, बार-बार ईरान के निशाने पर रहे हैं, जबकि **हॉर्मुज़ जलडमरूमध्य** में व्यवधानों ने इन बंदरगाहों की भौगोलिक कमजोरियों को उजागर कर दिया है।
- **Saudi Arabia** and the **UAE** in the war both countries are key partners in **IMEC**, and any adversarial posture between them could prove to be a major setback for the corridor, whose success depends on smooth coordination and seamless connectivity across the region.
  दोनों देश **IMEC** के प्रमुख साझेदार हैं, और उनके बीच किसी भी प्रकार की विरोधात्मक स्थिति गलियारे के लिए बड़ा झटका सिद्ध हो सकती है, जिसकी सफलता क्षेत्रीय समन्वय और निर्बाध संपर्क पर निर्भर करती है।
- The **UAE's** April 2026 announcement that it was opting out of the global oil grouping, the **Organization of the Petroleum Exporting Countries (OPEC)**, and reports of its growing strategic coordination with **Israel**, including the deployment of Israeli defence systems such as the **Iron Beam**, risk widening differences between **Riyadh** and **Abu Dhabi**.
  अप्रैल 2026 में **UAE** द्वारा वैश्विक तेल संगठन **पेट्रोलियम निर्यातक देशों के संगठन (OPEC)** से बाहर होने की घोषणा, तथा **इज़राइल** के साथ उसकी बढ़ती रणनीतिक साझेदारी — जिसमें **Iron Beam** जैसे इज़राइली रक्षा प्रणालियों की तैनाती भी शामिल है — ने **रियाद** और **अबू धाबी** के बीच मतभेदों को और बढ़ाने का जोखिम उत्पन्न कर दिया है।
- However, for such initiatives to succeed, they must also navigate the region's geopolitical complexities, including the rapidly evolving dynamics among key partners such as **Saudi Arabia** and the **UAE**.
  किन्तु ऐसी पहलों की सफलता के लिए उन्हें क्षेत्र की भू-राजनीतिक जटिलताओं का भी सामना करना होगा, जिनमें **सऊदी अरब** और **UAE** जैसे प्रमुख साझेदारों के बीच तेजी से बदलते संबंध शामिल हैं।
- To this end, the option of developing key ports in **Oman** — such as **Salalah, Duqm and Muscat** — as eastern entry points could be explored, as they are located well away from the conflict-prone **Strait of Hormuz**.
  इस उद्देश्य से **ओमान** के प्रमुख बंदरगाहों — जैसे **सलालाह, दुक्म और मस्कट** — को पूर्वी प्रवेश बिंदुओं के रूप में विकसित करने के विकल्प पर विचार किया जा सकता है, क्योंकि वे संघर्ष-प्रवण **हॉर्मुज़ जलडमरूमध्य** से काफी दूर स्थित हैं।
- Similarly, on the western end, until the port of **Haifa** becomes a secure transit hub, a western spur passing through **Egypt** and terminating at one of its major Mediterranean ports could offer a viable alternative.
  इसी प्रकार, पश्चिमी छोर पर जब तक **हाइफ़ा** बंदरगाह एक सुरक्षित पारगमन केंद्र नहीं बन जाता, तब तक **मिस्र** से होकर गुजरने वाला और उसके किसी प्रमुख भूमध्यसागरीय बंदरगाह पर समाप्त होने वाला पश्चिमी मार्ग एक व्यवहारिक विकल्प प्रदान कर सकता है।
- **Egypt** already possesses the logistics ecosystem required to support **IMEC**, including the **Suez Canal Economic Zone**, six operational ports and four industrial zones specialising in

green hydrogen, lique• ed natural gas, shipbuilding and other future-oriented sectors.
मिस्र के पास पहले से ही **IMEC** को समर्थन देने हेतु आवश्यक लॉजिस्टिक तंत्र मौजूद है, जिसमें **स्वेज नहर आर्थिक क्षेत्र**, छह संचालित बंदरगाह और चार औद्योगिक क्षेत्र शामिल हैं, जो हरित हाइड्रोजन, द्रवीकृत प्राकृतिक गैस, जहाज निर्माण तथा अन्य भविष्य उन्मुख क्षेत्रों में विशेषज्ञता रखते हैं।

- European countries such as **Italy** and **France**, which are positioning themselves as key champions of **IMEC** in Europe, will also need to play an active role.
इटली और **फ्रांस** जैसे यूरोपीय देशों को, जो स्वयं को यूरोप में **IMEC** के प्रमुख समर्थकों के रूप में स्थापित कर रहे हैं, भी सक्रिय भूमिका निभानी होगी।
- While elevating their bilateral ties to a **Special Strategic Partnership**, **India** and **Italy** reaffirmed their commitment to cooperate on **IMEC**, recognising its transformative potential to reshape and promote global trade, connectivity and prosperity.
अपने द्विपक्षीय संबंधों को **विशेष रणनीतिक साझेदारी** के स्तर तक बढ़ाते हुए, **भारत** और **इटली** ने **IMEC** पर सहयोग की अपनी प्रतिबद्धता को पुनः पुष्टि की तथा वैश्विक व्यापार, संपर्क और समृद्धि को पुनर्परिभाषित और प्रोत्साहित करने की इसकी परिवर्तनकारी क्षमता को स्वीकार किया।

EU's engagement with West Balkan countries is real: Costa

GS II: IR

Associated Press
SARAJEVO

EU has sought to encourage reform in the candidate nations fearing growing influence of Russia and China

European Council President António Costa said on Monday that this week's European Union summit with Western Balkan candidate nations aims to show that the opportunity for enlargement is real.

Speaking in Bosnia at the start of a pre-summit tour of the Western Balkans, Mr. Costa said that amid global geopolitical uncertainty and economic instability, "enlargement is a geostrategic interest for Europe."

"It (enlargement) is an investment in the peace, stability and security of our continent," Mr. Costa added. "This tour is a clear sign that the commitment of the European Union to the Western Balkans is real. As real as the opportunity for enlargement."

Mr. Costa will co-chair the summit in Montenegro on Friday that will gather EU leaders and top officials from Albania, Bosnia-Herzegovina, North Macedonia, Kosovo, Serbia and Montenegro.

The six nations are each at a different stage of the accession process with Montenegro and Albania leading the way. The EU has recently sought to encourage reform in the candidate nations fearing growing influence of Russia and China.

Ukraine and Moldova are also among about ten countries aspiring to join the bloc.

Candidate countries must bring their laws into line in 35 policy areas, or "chapters," ranging from justice standards to farm and fishing rules. All 27 EU members must agree before each chapter can be opened, and then again for it to be closed.

Friday's event in the Adriatic Sea resort of Tivat will be "a clear demonstration of our determination to bring forward our cooperation and build on the momentum of the European Union's enlargement," Mr. Costa said.

Bosnia has lagged behind, still deeply divided along ethnic lines long after the 1992-95 war that killed more than 100,000 people and displaced millions.

02J6. EU's engagement with West Balkan countries is real: Costa
पश्चिम बाल्कन देशों के साथ EU की भागीदारी वास्तविक है: कोस्टा

- **European Council President António Costa** said on Monday that this week's **European Union summit** with **Western Balkan** candidate nations aims to show that the opportunity for enlargement is real.
यूरोपीय परिषद के अध्यक्ष एंटोनियो कोस्टा ने सोमवार को कहा कि इस सप्ताह **यूरोपीय संघ शिखर सम्मेलन** का उद्देश्य **पश्चिम बाल्कन** उम्मीदवार देशों को यह दिखाना है कि विस्तार का अवसर वास्तविक है।
- "This tour is a clear sign that the commitment of the **European Union** to the **Western Balkans** is real."
"यह दौरा इस बात का स्पष्ट संकेत है कि **यूरोपीय संघ** की **पश्चिम बाल्कन** के प्रति प्रतिबद्धता वास्तविक है।"
- "As real as the opportunity for enlargement."
"उतनी ही वास्तविक जितना विस्तार का अवसर।"
- Mr. Costa will co-chair the summit in **Montenegro** on Friday that will gather EU leaders and top officials from **Albania, Bosnia-Herzegovina, North Macedonia, Kosovo, Serbia and Montenegro**.
श्री कोस्टा शुक्रवार को **मोंटेनेग्रो** में आयोजित शिखर सम्मेलन की सह-अध्यक्षता करेंगे, जिसमें EU नेताओं और **अल्बानिया, बोस्निया-हर्जेगोविना, उत्तर मैसेडोनिया, कोसोवो, सर्बिया और मोंटेनेग्रो** के शीर्ष अधिकारी शामिल होंगे।
- The six nations are each at a different stage of the accession process with **Montenegro** and **Albania** leading the way.
ये छह देश सदस्यता प्रक्रिया के अलग-अलग चरणों में हैं, जिनमें **मोंटेनेग्रो** और **अल्बानिया** सबसे आगे हैं।

- The EU has recently sought to encourage reform in the candidate nations fearing growing influence of **Russia** and **China**.
  EU ने हाल ही में उम्मीदवार देशों में सुधारों को प्रोत्साहित करने का प्रयास किया है, क्योंकि उसे **रूस** और **चीन** के बढ़ते प्रभाव की चिंता है।
- **Ukraine** and **Moldova** are also among about ten countries aspiring to join the bloc.
  यूक्रेन और **मोल्दोवा** भी उन लगभग दस देशों में शामिल हैं जो इस समूह में शामिल होना चाहते हैं।
- Candidate countries must bring their laws into line in **35 policy areas**, or "chapters," ranging from justice standards to farm and fishing rules.
  उम्मीदवार देशों को न्यायिक मानकों से लेकर कृषि और मत्स्य पालन नियमों तक **35 नीतिगत क्षेत्रों** या "अध्यायों" में अपने कानूनों को EU मानकों के अनुरूप बनाना होगा।
- All **27 EU members** must agree before each chapter can be opened, and then again for it to be closed.
  प्रत्येक अध्याय को खोलने और बाद में बंद करने से पहले सभी **27 EU सदस्य देशों** की सहमति आवश्यक होती है।
- Friday's event in the **Adriatic Sea** resort of **Tivat** will be "a clear demonstration of our determination to bring forward our cooperation and build on the momentum of the European Union's enlargement," Mr. Costa said.
  श्री कोस्टा ने कहा कि शुक्रवार को **एड्रियाटिक सागर** के रिसॉर्ट शहर **टिवाट** में होने वाला कार्यक्रम "हमारे सहयोग को आगे बढ़ाने और यूरोपीय संघ के विस्तार की गति को मजबूत करने के हमारे संकल्प का स्पष्ट प्रदर्शन" होगा।
- **Bosnia** has lagged behind, still deeply divided along ethnic lines long after the **1992-95 war** that killed more than **100,000 people** and displaced millions.
  बोस्निया अभी भी पीछे है और **1992-95 के युद्ध** के लंबे समय बाद भी जातीय आधार पर गहराई से विभाजित है, जिसमें **1 लाख से अधिक लोग** मारे गए थे और लाखों विस्थापित हुए थे।

Court rejects Rwanda's £100 mn claim against U.K. over migrant deal

GS II: IR

Agence France-Presse
THE HAGUE

An international court on Monday rejected a claim by Rwanda for Britain to pay more than £100 million it said London still owed from a scrapped deal to deport migrants.

Judges from the Permanent Court of Arbitration (PCA) in The Hague ruled that Britain was not liable for two years of outstanding costs from the scheme that was shelved in 2024.

In 2022, former U.K. Prime Minister Boris Johnson sealed a deal with Kigali to send to Rwanda migrants arriving in Britain via "dangerous or illegal journeys" in small boats or lorries.

A file photo of a protest against the British government's plans to deport asylum seekers to Rwanda in London. REUTERS

But the scheme hit legal and political obstacles from the start, with the U.K. Supreme Court eventually ruling it illegal.

When Keir Starmer became British Prime Minister in July 2024, he declared the plan "dead and buried" on his first full day in office, dismissing it as a "gimmick".

'Waste of tax money'

Then Interior Minister Yvette Cooper called it "the most shocking waste of taxpayers' money I have ever seen".

During the two years before the scheme was scrapped, only four people actually went to Rwanda, all voluntarily, according to the current U.K. government.

According to the U.K. government website, about £290 million has already been paid to Rwanda, but Kigali argued in its pre-hearing submissions to the PCA that two annual payments of £50m were still outstanding.

But the PCA, set up in 1899 to settle contractual disputes between nations, rejected by majority a £50m claim for one year and unanimously rejected the same amount for the second.

02J6. Court rejects Rwanda's £100 mn claim against U.K. over migrant deal

प्रवासी समझौते पर अदालत ने ब्रिटेन के खिलाफ रवांडा के £100 मिलियन दावे को खारिज किया

- An international court on Monday rejected a claim by **Rwanda** for **Britain** to pay more than **£100 million** it said London still owed from a scrapped deal to deport migrants.

एक अंतरराष्ट्रीय अदालत ने सोमवार को **रवांडा** के उस दावे को खारिज कर दिया, जिसमें उसने कहा था कि

प्रवासियों को निर्वासित करने के रद्द किए गए समझौते के तहत **ब्रिटेन** पर अभी भी **£100 मिलियन** से अधिक बकाया है।

- Judges from the **Permanent Court of Arbitration (PCA)** in **The Hague** ruled that Britain was not liable for two years of outstanding costs from the scheme that was shelved in 2024.
  द हेग स्थित **स्थायी मध्यस्थता न्यायालय (PCA)** के न्यायाधीशों ने फैसला दिया कि 2024 में बंद की गई इस योजना के दो वर्षों के बकाया खर्च के लिए ब्रिटेन जिम्मेदार नहीं है।
- In 2022, former U.K. Prime Minister **Boris Johnson** sealed a deal with **Kigali** to send to Rwanda migrants arriving in Britain via "dangerous or illegal journeys" in small boats or lorries.
  2022 में ब्रिटेन के पूर्व प्रधानमंत्री **बोरिस जॉनसन** ने **किगाली** के साथ एक समझौता किया था, जिसके तहत छोटी नावों या ट्रकों से "खतरनाक या अवैध यात्राओं" के जरिए ब्रिटेन पहुंचने वाले प्रवासियों को रवांडा भेजा जाना था।
- But Kigali argued in its pre-hearing submissions to the PCA that two annual payments of **£50 million** were still outstanding.
  लेकिन किगाली ने PCA में सुनवाई से पहले अपने प्रस्तुतिकरण में कहा कि **£50 मिलियन** की दो वार्षिक किस्तें अभी भी बकाया हैं।
- But the **PCA**, set up in 1899 to settle contractual disputes between nations, rejected by majority a **£50 million** claim for one year and unanimously rejected the same amount for the second.
  लेकिन देशों के बीच संविदात्मक विवादों को सुलझाने के लिए 1899 में स्थापित **PCA** ने बहुमत से एक वर्ष के लिए किए गए **£50 मिलियन** के दावे को खारिज कर दिया और दूसरे वर्ष के लिए समान राशि के दावे को सर्वसम्मति से अस्वीकार कर दिया।

Vizag data centre is a major challenge

If India needs Google's hyperscale hub, it is not yet ready for the facility

GS III: Economy: Infrastructure

STATE OF PLAY

Vasudevan Mukunth

The Google Cloud India AI Hub, for which the technology giant and Andhra Pradesh recently broke ground in Visakhapatnam, is a sign that India is finally moving from providing information technology services and coding to owning infrastructure. While the facility is part of a larger digital infrastructure push in Visakhapatnam, expected to involve investments running to ₹1.25 lakh crore, there are also numerous second-order gains in the offing. The facility could strengthen downstream demand for high-end computing hardware, augmenting India's efforts to build semiconductor capacity under Production Linked Incentive (PLI) schemes, even if manufacturing viability will still depend on broader ecosystem factors.

The project has been integrated into the America-India Connect initiative, as part of which multiple international subsea cables will land in Visakhapatnam, creating India's second major gateway on the eastern seaboard. As a result, Indian data will have a direct connection from the east coast to South Africa and thereon to the U.S. without first being backhauled to Cochin, that too on Google's high-capacity cables. Likewise, in the east, data from Visakhapatnam can reach the U.S. via Singapore and Australia, no longer restricted to the Chennai-Singapore connection and thereafter to the U.S. on third-party cables. As a result, India's dependence on geopolitical stability in the Red Sea – through which cables from Mumbai pass before reaching Europe – will reduce. Similarly, within India, the Hub's location could move high-value technological activity away from expensive metropolitan cities, potentially redistributing growth.

Infrastructure problem

The Hub is an integrated complex with computational infrastructure and high-capacity data connectivity, and large power requirements. Its expected power demand of 1 GW makes it a so-called hyperscale hub, with the ability to run powerful artificial intelligence (AI) models.

But that is also a gateway to consider the not-inconsiderable challenges the project poses. For example, the Hub could attract firms handling sensitive data, especially in sectors where legal or regulatory preferences favour keeping data in India. However, while Google will thus lower costs for Indian firms, it will increase dependence on a single foreign provider's proprietary stack. As a result, India could become a site for "sovereign AI" – as Google Cloud CEO Thomas Kurian said – only in name.

Second, even though AI GPU workloads are among the world's most power-guzzling uses of computing infrastructure, the Hub suggests AI is now an infrastructure problem: power, land, and water are the bottlenecks. The power demand may strain the local grid and result in knock-on effects for local residents and industries. While Google has pledged 100% use of renewable energy, the Hub will still feature a fleet of backup diesel generators, which will affect local air quality and microclimate.

If Google aspires to maintain its global average power usage effectiveness of 1.1 in Visakhapatnam's humid weather, it may need evaporative cooling, which is water-intensive. The district is periodically vulnerable to water stress, especially in summer. It depends heavily on inter-basin water transfers to meet its needs. In fact, it has the lowest groundwater levels for domestic, agricultural or industrial use in the State, as per the Water Resources and Information Management System. Facilities worldwide similar to the Hub are known to consume over 2 million litres per day per 100 MW. At 1 GW, the indicated demand is an eye-watering 20 million litres per day.

Rights groups have alleged that the State government assigned the project to a category that allowed it to sidestep a full environmental impact assessment and public hearings – measures that have forced Google, et al. in other countries to redesign data centres to be more sustainable. India still struggles to harmonise State-level incentives. Andhra Pradesh offers aggressive tax holidays and power subsidies yet they have not come with environmental benchmarks or 'green' capacity targets. A Central single-window could standardise public hearings and resource accounting. If India does not codify these safeguards, its climb up the digital stack will come at the cost of its environmental and democratic foundations.

mukunth.v@thehindu.co.in

02J6. Vizag data centre is a major challenge

विजाग डेटा सेंटर एक बड़ी चुनौती है।

- If India needs Google's **hyperscale hub**, it is not yet ready for the facility

यदि भारत को **Google** का **हाइपरस्केल हब** चाहिए, तो वह अभी इस सुविधा के लिए तैयार नहीं है।

- **The Google Cloud India AI Hub**, for which the technology giant and **Andhra Pradesh** recently broke ground in **Visakhapatnam**, is a sign that **India** is finally moving from providing information technology services and coding to owning infrastructure.

गूगल क्लाउड इंडिया एआई हब, जिसके लिए प्रौद्योगिकी कंपनी और **आंध्र प्रदेश** ने हाल ही में **विशाखापट्टनम** में आधारशिला रखी, इस बात का संकेत है कि **भारत** अब केवल सूचना प्रौद्योगिकी सेवाएँ और कोडिंग प्रदान करने से आगे बढ़कर अवसंरचना का स्वामित्व प्राप्त करने की दिशा में अग्रसर है।

- While the facility is part of a larger digital infrastructure push in **Visakhapatnam**, expected to involve investments running to ₹1.25 lakh crore.

यद्यपि यह सुविधा **विशाखापट्टनम** में व्यापक डिजिटल अवसंरचना विस्तार का हिस्सा है, जिसमें ₹1.25 लाख करोड़ तक के निवेश की संभावना है, इसके अतिरिक्त भी अनेक अप्रत्यक्ष लाभ सामने आने की संभावना है।

- The facility could strengthen downstream demand for high-end computing hardware, augmenting India's efforts to build semiconductor capacity under **Production Linked Incentive (PLI)** schemes, even if manufacturing viability will still depend on broader ecosystem factors.

यह सुविधा उच्च स्तरीय कंप्यूटिंग हार्डवेयर की मांग को बढ़ा सकती है, जिससे **उत्पादन आधारित प्रोत्साहन (PLI)** योजनाओं के अंतर्गत भारत के सेमीकंडक्टर क्षमता निर्माण प्रयासों को बल मिलेगा, यद्यपि विनिर्माण की व्यवहार्यता अब भी व्यापक पारिस्थितिक तंत्र पर निर्भर करेगी।

- The project has been integrated into the **America-India Connect initiative**, as part of which multiple international subsea cables will land in **Visakhapatnam**, creating India's second major gateway on the eastern seaboard.

इस परियोजना को **अमेरिका-इंडिया कनेक्ट पहल** में सम्मिलित किया गया है, जिसके अंतर्गत अनेक अंतरराष्ट्रीय समुद्रतलीय केबल **विशाखापट्टनम** में उतरेंगी, जिससे भारत के पूर्वी तट पर दूसरा प्रमुख प्रवेश द्वार विकसित होगा।

- As a result, Indian data will have a direct connection from the east coast to **South Africa** and thereon to the **U.S.** without first being backhauled to **Cochin**, that too on **Google's** high-capacity cables.
  इसके परिणामस्वरूप भारतीय डेटा को पूर्वी तट से सीधे **दक्षिण अफ्रीका** और वहाँ से **अमेरिका** तक सीधा संपर्क प्राप्त होगा, बिना पहले **कोच्चि** तक वापस भेजे, और वह भी **गूगल** की उच्च क्षमता वाली केबलों के माध्यम से।
- Likewise, in the east, data from **Visakhapatnam** can reach the **U.S.** via **Singapore** and **Australia**, no longer restricted to the **Chennai-Singapore** connection and thereafter to the U.S. on third-party cables.
  इसी प्रकार, पूर्वी दिशा में **विशाखापट्टनम** से डेटा **सिंगापुर** और **ऑस्ट्रेलिया** के माध्यम से सीधे **अमेरिका** पहुँच सकेगा, और अब वह केवल **चेन्नई-सिंगापुर** संपर्क तथा उसके बाद तीसरे पक्ष की केबलों तक सीमित नहीं रहेगा।
- As a result, India's dependence on geopolitical stability in the **Red Sea** — through which cables from **Mumbai** pass before reaching **Europe** — will reduce.
  इसके परिणामस्वरूप **भारत** की **लाल सागर** क्षेत्र की भू-राजनीतिक स्थिरता पर निर्भरता कम होगी, जहाँ से होकर **मुंबई** से जाने वाली केबलें **यूरोप** तक पहुँचती हैं।
- Its expected power demand of 1 GW makes it a so-called hyperscale hub, with the ability to run powerful artificial intelligence (**AI**) models.
  इसकी अनुमानित 1 गीगावाट विद्युत मांग इसे तथाकथित हाइपरस्केल हब बनाती है, जिसमें शक्तिशाली कृत्रिम बुद्धिमत्ता (**AI**) मॉडल संचालित करने की क्षमता होगी।

PATRIOTIC IAS

Remittances anchor the rupee, India's external balances

Despite doing the heavy lifting in tackling the pressure on the rupee, remittances are ignored in discussions due to overemphasis on FDI and FPI flows

GS III: Economy

DATA POINT

Puneet Bhasin

The Indian rupee has lost nearly 12% of its value against the U.S. dollar since May 2025. Several analysts have noted the consistent decline in net Foreign Direct Investment (FDI) and net Foreign Portfolio Investment (FPI) flows as a cause.

The ebbing of net FDI and FPI flows notably began much before the current energy crisis due to the war in West Asia. A declining trend in net FDI began in the second quarter (Q2) of 2021-2022. As of Q3 of 2025-26, net FDI was negative **(Chart 1)**. The declining trend in net FPI, which is also at a negative, started in Q4 of 2023-24 **(Chart 2)**.

It is commonly understood that a downward (depreciation) pressure is structurally inherent upon the rupee because of India's persistent Current Account (CA) deficit, which in turn stems from India's persistent trade deficit. Consequently, buoyant net positive FDI and FPI flows, recorded in the Financial Account (FA), are considered crucial to not only finance the CA Deficit (CAD), but to countervail the downward pressure on the rupee. However, there is an overemphasis on these two, at the cost of the other important flow for India, namely, remittances, recorded in the CA, which does the heavy lifting for both the financing of the CAD and in tackling the pressure on the rupee. Not accounting for remittances risks non-mitigation of a major external vulnerability: the ebbing of remittance flows that is also likely.

The CA primarily consists of three component flows: the trade deficit, the Net Primary Income (NPI) deficit and the Net Secondary Income (NSI) surplus **(Chart 3)**. The NPI mainly reflects the net negative balance of investment income earned by Indian residents on foreign assets and paid on India's external liabilities held by foreign counterparts. The NSI essentially accounts for its huge net positive remittance flows. India attracts the highest remittances (in $) by a wide margin. In 2024, India saw $138 billion in remittances.

They matter significantly for India's CAD and the rupee. Firstly, since mid-2013, remittances have on an average financed more than the entirety of India's trade deficit **(Chart 4)**. As a result, the CAD financed by the FA flows of FDI and FPI is a residual of the two persistent deficits in the CA, leftover after the remittances have financed their bulk. If not for India's high net remittances, its CAD would be much larger and the financing demands on the FA also higher.

Secondly, net remittances, averaging about 3% of the Gross Domestic Product (GDP), are much higher than the net FDI and FPI flows. Thirdly, unlike, say FPI, remittances are not given to sudden halts, for they are largely driven by the income and savings decisions of the Indian diaspora and their respective familial needs back home. Fourthly, unlike FDI and FPI, remittances are transfers and not claims. Hence, they do not generate future liability outflows. Lastly, remittances have low transaction costs.

A lot rides on remittances now because the more the rupee slips, the more diaspora remitters are likely to wait till it bottoms out. Concomitantly, with the trade deficit likely to increase due to costlier energy imports, a wide gap can emerge in the remittances' ability to cover this deficit. This will in turn increase the CAD and its financing demands on the FA, at a time when net FDI and FPI flows are negative. Yet, despite their importance, analyses of remittances pale in comparison to those of FDI and FPI flows. It is perhaps because remittances are largely the result of small financial decisions by thousands of working-class Indians abroad, who do not animate globalised elites in the same way as talks of FDI and FPI do.

Merits of remittances

The data for the charts were sourced from the Reserve bank of India's Database on Indian Economy. The author is with the Center for the Study of the Indian Economy (CSIE) at Azim Premji University in Bengaluru. With inputs from Anshuman Singh, also at CSIE

CHART 1: Quarterly net Foreign Direct Investment in $ million ( ) and as a % share of GDP ( )

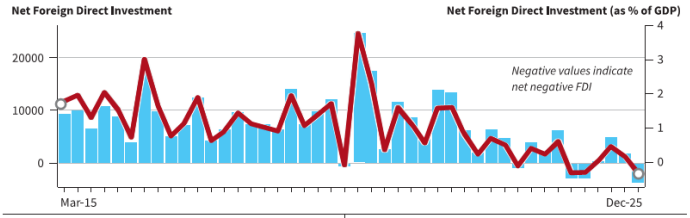

CHART 2: Quarterly net Foreign Portfolio Investment (as % of GDP). Negative values indicate net negative FPI

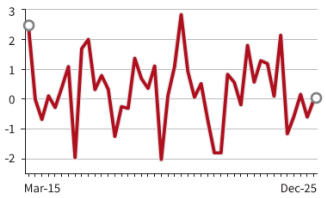

CHART 4: Quarterly net remittances as % of trade deficit. The two blue bars in June and September 2020 indicate trade surplus. All other quarters saw trade deficits

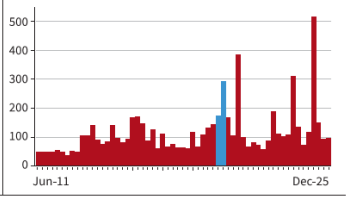

CHART 3: Decomposition of current account (% of GDP, quarterly)

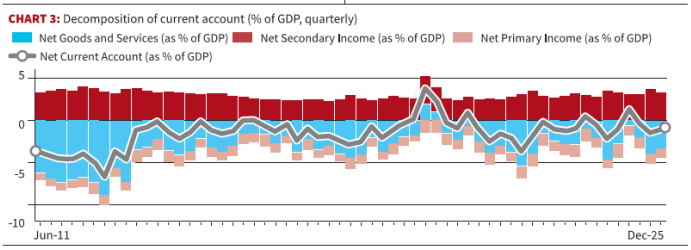

02J6. Remittances anchor the rupee, India's external balances

प्रेषण राशि रुपये तथा भारत के बाह्य संतुलनों को स्थिरता प्रदान करती है।

- The CA primarily consists of three component • ows: the trade de• cit, the **Net Primary Income (NPI)** de• cit and the **Net Secondary Income (NSI)** surplus.
  चालू खाते में मुख्यतः तीन घटक प्रवाह शामिल होते हैं: व्यापार घाटा, **शुद्ध प्राथमिक आय (NPI)** घाटा और **शुद्ध द्वितीयक आय (NSI)** अधिशेष।
- The NPI mainly re• ects the net negative balance of investment income earned by Indian residents on foreign assets and paid on India's external liabilities held by foreign counterparts.
  NPI मुख्यतः विदेशी परिसंपत्तियों पर भारतीय निवासियों द्वारा अर्जित निवेश आय और विदेशी पक्षों के पास मौजूद भारत की बाह्य देनदारियों पर भुगतान की गई आय के शुद्ध नकारात्मक संतुलन को दर्शाता है।
- The NSI essentially accounts for its huge net positive remittance • ows.
  NSI मुख्यतः भारत के विशाल सकारात्मक शुद्ध रेमिटेंस प्रवाह को दर्शाता है।
- Secondly, net remittances, averaging about 3% of the **Gross Domestic Product (GDP)**, are much higher than the net FDI and FPI • ows.

  बैंकों ने **पश्चिम एशिया संघर्ष** से प्रभावित **MSMEs** और उद्योगों को **इमरजेंसी क्रेडिट लाइन गारंटी योजना (ECLGS)** के तहत **₹35,000 करोड़** के ऋण स्वीकृत किए हैं।
- The scheme aimed at providing additional credit flow of **₹2.55 lakh crore** for airlines hit by the ongoing geopolitical crisis.
  इस योजना का उद्देश्य जारी भू-राजनीतिक संकट से प्रभावित एयरलाइनों को **₹2.55 लाख करोड़** की अतिरिक्त ऋण सहायता प्रदान करना था।

02J6. AI debt sales reshape global corporate bond markets

AI ऋण बिक्री वैश्विक कॉरपोरेट बॉन्ड बाजारों को नया रूप दे रही है

- **Google-parent Alphabet** is already one of the biggest outstanding borrowers in the sterling and Swiss franc corporate bond markets.
  गूगल की मूल कंपनी अल्फाबेट पहले से ही स्टर्लिंग और स्विस फ्रैंक कॉरपोरेट बॉन्ड बाजारों में सबसे बड़े उधारकर्ताओं में से एक है।
- Debt issues by so-called "**hyperscalers**" or Big Tech companies outside the **United States** are part of a push to diversify their funding early on, bankers said.
  बैंकरों के अनुसार, **संयुक्त राज्य अमेरिका** के बाहर तथाकथित "**हाइपरस्केलर्स**" या बड़ी टेक कंपनियों द्वारा ऋण जारी करना उनके वित्तपोषण स्रोतों में शुरुआती स्तर पर विविधता लाने की रणनीति का हिस्सा है।

As rare earths become strategic assets, China trains youth with specialised courses

GS III: Economy

Reuters

BEIJING

Every year, several hundred young adults head to the steppes of northern China to learn about rare earths at schools like the Inner Mongolia University of Science and Technology.

After completing undergraduate study, they may venture a few kilometres up the six-lane Rare Earths Street in Baotou, where they can work for state-owned refiners that convert the critical minerals into magnets that power jet engines, electric vehicles and wind turbines. Or, the graduates may pursue further studies at the nearby Baotou Rare Earth Research Institute - roughly 150 km from the world's largest rare earths mine.

U.S. President Donald Trump and other Western leaders have pledged billions of dollars in investments to break China's chokehold on rare earths refining – a powerful lever Beijing has wielded in its trade war with the U.S. But China still holds a significant advantage in the pipeline of talent that it has developed over decades in places like Baotou.

40 specialist labs

China has created an ecosystem of more than 40 specialist rare-earth laboratories that produce cutting-edge research, supplemented by at least 11 universities and technical colleges that collectively enrol more than 500 students annually in rare earths degree programmes, a Reuters examination has found. That accumulated expertise sustains Beijing's grip on global supplies of refined rare earths.

Several U.S. institutions have begun incorporating more of a focus on rare earths in their curriculum, though Reuters could not identify a school outside China that offers a specific undergraduate degree. U.S. institutions awarded just over 200 generalist undergraduate mining and metallurgical engineering degrees in 2023, the latest year with nationwide figures available, according to data compiled by the Colorado-based Society for Mining, Metallurgy and Exploration.

"In China, I used to hire kids right out of university and they're immediately productive," said Constantine Karayannopoulos, former chief executive of rare earths companies Neo Performance Materials and Molycorp. "Anywhere else I need to train them for three years."

Baotou Research Institute of Rare Earths in China's rare earth industry hub of Baotou, Inner Mongolia. REUTERS

Beijing is now tightly guarding this expertise: It has over the years increased restrictions on exports of rare earths technology and equipment. China has also limited contact between industry professionals and foreigners, with some technicians having been ordered to surrender their passports, according to three people familiar with the matter. They did not identify the government entity that confiscated the travel documents but said the crackdown intensified after Trump's "Liberation Day" tariffs in April 2025.

U.S. Department of Energy spokesperson Olivia Tinari said in response to questions about Washington's rare earths rivalry with Beijing that the agency was "investing in American workers, scaling innovation, and expanding domestic production of critical materials."

Academia-industry ties

Billions of federal dollars have flowed into U.S. mining schools, research programmes and other related areas since 2024 as the country seeks to rebuild mining expertise. The U.S. Congress is also considering legislation that would fund international cooperation in mining education.

China's rare earth industry benefited in the 1980s and 1990s from generous tax incentives and an abundant supply of cheap labour. The government and affiliated entities continue to fund research institutes, and state lenders have offered financing on preferential terms to firms that mine critical minerals.

By the 1990s, the processing industry was "wiped out" in the West, said Ed Richardson, chief executive of U.S. magnet producer Thomas & Skinner. "Therefore, the schools have not been educating mining students for this task."

In contrast, researchers, universities, and industry continue to collaborate closely in China. Scientists at the National Engineering Research Center for Rare Earths in Beijing developed a new technology, which state-owned Gansu Rare Earth New Materials adopted in 2023 at a refining facility that can churn out 50,000 metric tonnes of highly processed rare earths annually.

That is five times what Australia's Lynas Rare Earths, the largest rare earths company outside China, produced in the 2025 fiscal year.

China produces over 90% of the world's processed rare earths and rare earth magnets.

David Parker, a rare earths expert at Britain's Durham University who reviewed the Chinese institute's course outline for Reuters, described it as "highly specialized" and reflective of the "pre-eminent position of China in rare earth science and engineering."

02J6. As rare earths become strategic assets, China trains youth with specialised courses

दुर्लभ मृदा तत्व रणनीतिक संपत्ति बनते जा रहे हैं, चीन विशेष पाठ्यक्रमों से युवाओं को प्रशिक्षित कर रहा है

- Every year, several hundred young adults head to the steppes of northern **China** to learn about **rare earths** at schools like the **Inner Mongolia University of Science and Technology**.
  हर वर्ष सैकड़ों युवा उत्तरी **चीन** के घास के मैदानों की ओर जाते हैं ताकि वे **इनर मंगोलिया यूनिवर्सिटी ऑफ साइंस एंड टेक्नोलॉजी** जैसे संस्थानों में **दुर्लभ मृदा तत्वों (Rare Earths)** के बारे में अध्ययन कर सकें।
- After completing undergraduate study, they may venture a few kilometres up the six-lane **Rare Earths Street** in **Baotou**, where they can work for state-owned refiners that convert the critical minerals into magnets that power jet engines, electric vehicles and wind turbines.
  स्नातक अध्ययन पूरा करने के बाद वे **बाओतौ** की छह लेन वाली **रेयर अर्थ्स स्ट्रीट** तक जाते हैं, जहाँ वे सरकारी रिफाइनरियों में काम कर सकते हैं, जो इन महत्वपूर्ण खनिजों को जेट इंजन, इलेक्ट्रिक वाहन और पवन टर्बाइनों को चलाने वाले मैग्नेट में बदलती हैं।
- Or, the graduates may pursue further studies at the nearby **Baotou Rare Earth Research Institute** roughly 150 km from the world's largest rare earths mine.
  या फिर छात्र दुनिया की सबसे बड़ी दुर्लभ मृदा खदान से लगभग 150 किमी दूर स्थित **बाओतौ रेयर अर्थ रिसर्च इंस्टीट्यूट** में आगे की पढ़ाई कर सकते हैं।

40 specialist labs
40 विशेष प्रयोगशालाएँ

The genie of synthetic biology is out, and with it comes power and peril

The quest to understand the universe releases the genie from the lamp kept inside. it is of no use and leashes human thought and creativity; released but unregulated, it risks creating new and unforeseen problems released and used wisely, the applications are many and valuable

K. VijayRaghavan

For the first time in about four billion years of life on the earth, one species is learning not just to read the book of life but to write new versions.

Humans' quest to understand and explain the natural world has always carried a double consequence: every success also enhances our ability to change the world. By understanding how diseases act, we create drugs and vaccines that change the prevalence of infectious agents. The elimination of smallpox is one example. Understanding the basis of some hereditary disorders has meant that dietary management can help those affected to live full lives. Phenylketonuria, a condition in which the body cannot process a common amino acid, phenylalanine, is one such example.

Verbosity in genes

At the core of our efforts to understand and explain the extraordinary diversity of forms and functions of life lies one molecule: deoxyribonucleic acid, popularly known by its abbreviation, DNA. DNA resides in cells, the unit of construction of our bodies – indeed of any organism – and we humans are made up of trillions of cells.

The DNA in a cell is called its genome. The linear thread of DNA that makes up the genome has an alphabet of four molecules, denoted by the letters 'A', 'T', 'G', and 'C'. A genome can have thousands of genes, and through the specific ordering of these letters, each gene can encode a specific protein. Proteins in their various forms make up, or help manufacture, all that is needed for each cell to perform its unique function.

If we were to look simultaneously at a bacterium, a fruit fly, a mouse, and a human, and think about their varying complexity, we would be tempted to hypothesise that the human has many thousands of times more genes than the fly or the bacterium. After all, we are a far more complex organism than a tiny, unicellular bacterium.

However, the commonly studied bacterium *Escherichia coli* has about 4,300 genes. The fruit fly, about 17,000. The mouse, about 21,000. And the human, about 22,000. There is only a fivefold difference in gene number between a bacterium and a human. The mouse has more protein-coding genes than us, and a water flea, *Daphnia*, has about 31,000 genes, more than either us or the mouse.

Verbosity in genes, as in conversation, is not a measure of complexity. Just as one can convey something complex and information-dense in a short, non-redundant paragraph, it is how, when, how much, and where in the cell gene products are expressed that determines complexity. While genes encode proteins, they also have DNA sequences involved in regulating when, where, and to what extent genes are expressed. These regulatory regions are locations where other specific proteins, called transcription factors bind, to turn genes 'on' and 'off'. These regulatory proteins are themselves encoded by genes.

Three extraordinary insights

The decreasing cost and increasing speed of DNA sequencing means that we can, today, sequence the genome of any organism we choose. At the start of the Human Genome Project, sequencing a human genome took more than a decade, cost close to $3 billion, and involved thousands of scientists across about 20 countries. Today this is possible in a few hours, at a cost of a few hundred dollars, in a small laboratory. As our computational capacity also increases, so does our ability to study the genomes we have sequenced. The growing bank of genome sequences across organisms offers three extraordinary insights into all life on the earth.

First, genome sequences taken together give us a history of life on the planet, the relatedness of organisms, and how the tree of life branched in different ways. The exquisite detail that genomes provide complements the fossil record where it is available – but it also tells us the history of life where no fossil record exists. No social history of humans can provide this degree of precision and accuracy over such an extended period.

Second, when we examine genomes in the context of how an organism (bacterium, plant or animal) functions in its environment, we learn how they are adapted. Genes, famously described as selfish, ensure their own propagation by using their host organism's survival as a vehicle for their transmission. By studying variations in genes, we learn how mutations are selected as organisms adapt to their environments. Human populations that today carry genes predisposing them to type II diabetes are typically descended from groups that lived in environments where food supply rose and fell cyclically over long intervals. In today's environment of abundant food, this genetic inheritance leads to disease.

Third, just as with DNA sequencing, we are rapidly accumulating detailed information on all aspects of the cellular environment across a variety of organisms – which genes are expressed, where their products are localised, what they do, and so on. When taken together, this detailed 'cell map' can give us a picture of all the complexity within a cell in each organism we study. When gathered over the entire life of a cell or organism – and we are far from this stage of data collection – the volume and complexity of data to be analysed is mind-boggling. Yet the tools for storing, analysing, and interrogating such 'big data' are also growing.

While scepticism remains, this may therefore not only be a feasible project in theory, but also one in practice. We already see early glimpses of such comprehensive pictures appearing from diverse attempts around the world. From all of this, one can expect a substantial advance in our understanding of how life in all its diversity came about, how organisms are made, and how they work. New hypotheses will be formed and tested, and new fundamental knowledge and applications will appear.

Never before seen

With this knowledge will come expanded power in synthetic biology. Our understanding of how genes, cells, and environments collaborate to make organisms has already enabled us to

With access to computing power and memory that AI provides, it is possible to analyse cellular and environmental information and design sections of genomes or entire genomes with the desired properties on our computers

engineer nature in many ways. But what we can currently do with genetic engineering is modest compared to the potential from new avenues now opening. Engineering cells and organisms not just at the level of one or a few genes, but on a genome-wide scale, is becoming possible. These technologies will become more accurate, less expensive, and more accessible.

With access to computing power and memory that AI provides, it is possible to analyse cellular and environmental information and design sections of genomes or entire genomes, with the desired properties on our computers.

Today, the predictability of what happens when such designs are implemented still remains low: cells and organisms are notorious for resisting simplistic *in silico* predictions. But this too will change, through a combination of analytical and experimental work. Designer cells that make chemicals, drugs, materials, and fuels are already with us but they will become ubiquitous and far broader in their uses than what we see today.

It is not only cells for biotechnological applications that will be created, often making products never before seen in nature. Creating complex new forms of multicellular organisms, plants or animals, is also a real possibility. Replacing the genome of a cell with one designed and manufactured by humans is now feasible for small genomes and will soon be possible for larger ones.

In 2010, American scientist J. Craig Venter (1946-2026) and his team chemically synthesised a complete bacterial genome and introduced it into a bacterial cell whose native DNA had been removed. This was, at a first approximation, digitally created life. They watermarked their creation by encoding three quotations into non-coding regions of the synthetic DNA – a biological 'cipher' in which letters were mapped to codons: James Joyce, from *A Portrait of the Artist as a Young Man*: "To live, to err, to fall, to triumph, to recreate life out of life"; Richard Feynman: "What I cannot build, I do not understand"; and J. Robert Oppenheimer: "See things not as they are, but as they might be."

While we are currently limited by the speed and cost of genome-wide synthesis, this will change. It will then be possible to create large genomes, introduce them into defined cellular environments we construct, or into bacterial cells whose own genomes have been removed.

With great power

Complementing this top-down approach, which draws on billions of years of genomic history to create new forms of life, there is a bottom-up alternative. Pioneered by Jack Szostak and others, this approach aims to synthesise a primordial cell from scratch, modelling what the earliest living systems may have looked like before the first genome was ever written. Mr. Szostak's laboratory at the University of Chicago builds protocells – fatty-acid vesicles that can spontaneously form closed membranes, encapsulate RNA, and, in the right conditions, copy that RNA and divide. The aim is to solve the great mystery of how life first originated from non-living chemistry. In working towards this, we too will develop the power to create new and complex self-replicating biological systems.

All of this raises the 'genie conundrum' that humanity has grappled with across the centuries. Our quest to understand the universe releases the genie from the lamp. Kept inside, the genie is of no use and, more relevant, we leash human thought and creativity. Released but unregulated, we risk creating new and unforeseen problems. Released and used wisely, the applications are many and valuable.

These are challenges that regulators face not only in biology but in other domains too: how does one regulate chemistry or nuclear power, for example? But the engineering of life has a feature that the engineering of a spaceship or a nuclear plant does not: the ability to convert information into a self-replicating product. Here, we must 'see things not as they are, but as they might be'. Both for what must be done, and for what we must refrain from doing.

  जैसे-जैसे हमारी संगणनात्मक क्षमता बढ़ रही है, वैसे-वैसे अनुक्रमित जीनोमों का अध्ययन करने की हमारी क्षमता भी बढ़ रही है।
- The growing bank of genome sequences across organisms offers three extraordinary insights into all life on the earth.
  विभिन्न जीवों के जीनोम अनुक्रमों का बढ़ता भंडार पृथ्वी पर समस्त जीवन के संबंध में तीन असाधारण अंतर्दृष्टियाँ प्रदान करता है।
- First, genome sequences taken together give us a history of life on the planet, the relatedness of organisms, and how the tree of life branched in different ways.
  प्रथम, जीनोम अनुक्रम सामूहिक रूप से हमें पृथ्वी पर जीवन का इतिहास, जीवों की पारस्परिक संबंधता, तथा जीवन-वृक्ष किस प्रकार विभिन्न दिशाओं में विभाजित हुआ, इसकी जानकारी देते हैं।
- The exquisite detail that genomes provide complements the fossil record where it is available — but it also tells us the history of life where no fossil record exists.
  जीनोम द्वारा प्रदान किया गया सूक्ष्म विवरण वहाँ जीवाश्म अभिलेखों का पूरक बनता है जहाँ वे उपलब्ध हैं — किंतु यह हमें वहाँ के जीवन का इतिहास भी बताता है जहाँ कोई जीवाश्म अभिलेख मौजूद नहीं है।
- No social history of humans can provide this degree of precision and accuracy over such an extended period.
  मानवों का कोई सामाजिक इतिहास इतने विस्तृत कालखंड के लिए इस स्तर की परिशुद्धता और सटीकता प्रदान नहीं कर सकता।
- Second, when we examine genomes in the context of how an organism (bacterium, plant or animal) functions in its environment, we learn how they are adapted.
  द्वितीय, जब हम जीनोम का अध्ययन इस संदर्भ में करते हैं कि कोई जीव (जीवाणु, पौधा अथवा प्राणी) अपने पर्यावरण में किस प्रकार कार्य करता है, तब हम यह समझते हैं कि वे किस प्रकार अनुकूलित हुए हैं।
- Genes, famously described as selfish, ensure their own propagation by using their host organism's survival as a vehicle for their transmission.
  जीन, जिन्हें प्रसिद्ध रूप से स्वार्थी कहा गया है, अपने वाहक जीव के अस्तित्व को अपने संचरण के माध्यम के रूप में उपयोग करके अपने स्वयं के प्रसार को सुनिश्चित करते हैं।
- By studying variations in genes, we learn how mutations are selected as organisms adapt to their environments.
  जीनों में विविधताओं का अध्ययन करके हम यह समझते हैं कि जीव अपने पर्यावरण के अनुरूप ढलते समय उत्परिवर्तन किस प्रकार चयनित होते हैं।
- Human populations that today carry genes predisposing them to **type II diabetes** are typically descended from groups that lived in environments where food supply rose and fell cyclically over long intervals.
  वे मानव जनसंख्या समूह जो आज **टाइप-II मधुमेह** की प्रवृत्ति वाले जीन धारण करते हैं, सामान्यतः उन समूहों के वंशज हैं जो ऐसे वातावरण में रहते थे जहाँ लंबे अंतरालों में खाद्य आपूर्ति चक्रीय रूप से घटती-बढ़ती रहती थी।

PATRIOTIC IAS

- In today's environment of abundant food, this genetic inheritance leads to disease.
  आज के प्रचुर खाद्य उपलब्धता वाले वातावरण में यही आनुवंशिक विरासत रोग का कारण बनती है।
- Third, just as with DNA sequencing, we are rapidly accumulating detailed information on all aspects of the cellular environment across a variety of organisms — which genes are expressed, where their products are localised, what they do, and so on.
  तृतीय, ठीक डीएनए अनुक्रमण की तरह, हम विभिन्न जीवों में कोशिकीय वातावरण के सभी पहलुओं से संबंधित विस्तृत जानकारी तीव्र गति से एकत्र कर रहे हैं — कौन-से जीन अभिव्यक्त होते हैं, उनके उत्पाद कहाँ स्थित होते हैं, वे क्या कार्य करते हैं, आदि।
- When taken together, this detailed 'cell map' can give us a picture of all the complexity within a cell in each organism we study.
  सामूहिक रूप से देखा जाए तो यह विस्तृत 'कोशिका मानचित्र' हमें प्रत्येक अध्ययन किए गए जीव की कोशिका के भीतर विद्यमान समस्त जटिलताओं का चित्र प्रदान कर सकता है।
- From all of this, one can expect a substantial advance in our understanding of how life in all its diversity came about, how organisms are made, and how they work.
  इन सभी प्रयासों से यह अपेक्षा की जा सकती है कि जीवन अपनी समस्त विविधताओं सहित कैसे उत्पन्न हुआ, जीवों का निर्माण कैसे हुआ, और वे किस प्रकार कार्य करते हैं — इस संबंध में हमारी समझ में महत्वपूर्ण प्रगति होगी।

- With this knowledge will come expanded power in **synthetic biology**.
  इस ज्ञान के साथ **सिंथेटिक बायोलॉजी** में विस्तारित शक्ति भी आएगी।
- Our understanding of how genes, cells, and environments collaborate to make organisms has already enabled us to engineer nature in many ways.
  जीन, कोशिकाएँ और पर्यावरण किस प्रकार मिलकर जीवों का निर्माण करते हैं, इसकी हमारी समझ ने हमें पहले ही अनेक प्रकार से प्रकृति का अभियांत्रिकीकरण करने में सक्षम बना दिया है।
- Engineering cells and organisms not just at the level of one or a few genes, but on a genome-wide scale, is becoming possible.
  केवल एक या कुछ जीनों के स्तर पर ही नहीं, बल्कि संपूर्ण जीनोम स्तर पर कोशिकाओं और जीवों का अभियांत्रिकीकरण अब संभव होता जा रहा है।
- These technologies will become more accurate, less expensive, and more accessible.
  ये प्रौद्योगिकियाँ अधिक सटीक, कम महंगी और अधिक सुलभ बनेंगी।
- With access to computing power and memory that **AI** provides, it is possible to analyse cellular and environmental information and design sections of genomes or entire genomes, with the desired properties on our computers.
  एआई द्वारा उपलब्ध कराई गई संगणनात्मक शक्ति और स्मृति तक पहुँच के माध्यम से कोशिकीय एवं पर्यावरणीय जानकारी का विश्लेषण करना तथा इच्छित गुणों वाले जीनोम के भागों अथवा संपूर्ण जीनोम का कंप्यूटर पर डिज़ाइन तैयार करना संभव है।
- Designer cells that make chemicals, drugs, materials, and fuels are already with us but they will become ubiquitous and far broader in their uses than what we see today.
  रसायन, औषधियाँ, पदार्थ और ईंधन बनाने वाली डिज़ाइनर कोशिकाएँ पहले से ही हमारे बीच मौजूद हैं, किन्तु भविष्य में वे सर्वव्यापी होंगी और उनके उपयोग आज की तुलना में कहीं अधिक व्यापक होंगे।
- Creating complex new forms of multicellular organisms, plants or animals, is also a real possibility.
  बहुकोशिकीय जीवों, पौधों अथवा प्राणियों के जटिल नए रूपों का निर्माण भी एक वास्तविक संभावना है।
- Replacing the genome of a cell with one designed and manufactured by humans is now feasible for small genomes and will soon be possible for larger ones.
  किसी कोशिका के जीनोम को मनुष्यों द्वारा डिज़ाइन और निर्मित जीनोम से प्रतिस्थापित करना अब छोटे जीनोमों के लिए संभव है और शीघ्र ही बड़े जीनोमों के लिए भी संभव होगा।
- In 2010, American scientist **J. Craig Venter** (1946-2026) and his team chemically synthesised a complete bacterial genome and introduced it into a bacterial cell whose native

DNA had been removed.

वर्ष 2010 में अमेरिकी वैज्ञानिक **जे. क्रेग वेंटर** (1946-2026) और उनकी टीम ने रासायनिक रूप से एक पूर्ण जीवाणु जीनोम का संश्लेषण किया और उसे एक ऐसी जीवाणु कोशिका में प्रविष्ट कराया जिसका मूल डीएनए हटा दिया गया था।

Orbital rivalry — the challenge of China's space power

GS III: S&T

GS III: Internal Security

China's expanding counter-space capabilities are a cause for concern. While no conflict has ever been fought in space, the incentive to influence activities on earth by controlling outer space remains a potential trigger for future confrontation. Beijing's development of anti-satellite missiles and co-orbital systems blurs the line between routine space operations and counter-space activities.

The key question is how Beijing views its space ambitions and control of outer space, and what India can do to safeguard its vital interests in this domain.

Beijing's space ambitions

While the Chinese space programme emphasises the peaceful use of space, evidence suggests that China is preparing for an orbital war.

In January 2007, it targeted its own satellite from earth. In October 2015, China tested an exo-atmospheric vehicle designed to strike a hostile satellite. In 2022, China used a robotic spacecraft to push a defunct satellite into the graveyard orbit. In 2024, it demonstrated an orbital dog-fight. There is a clear research and developmental push for fielding offensive capabilities in space.

China's space ambitions operate at two levels. First, it seeks to remain competitive in the emerging space race, both technologically and numerically. China has around 1,900 satellites in orbit, compared to more than 8,000 American satellites, including the SpaceX satellites.

Second, it recognises the military and economic implications of the weaponisation of space. A single strike could disrupt communications, power grids, navigation systems, financial markets, and military command-and-control (C2) and intelligence, surveillance and reconnaissance (ISR) networks.

Accordingly, China aims to land on the moon by 2036, launch a nuclear-powered shuttle by 2040, and establish a solar power system by 2050. Chinese start-ups such as LandSpace, iSpace and OneSpace are challenging rivals such as SpaceX and Blue Origin. China is also exploring lunar and asteroid mining for energy and critical minerals. The growing demand for energy-efficient data centres is likely to further intensify the space race.

Harinder Singh
Former corps commander

China's counter-space rise demands stronger resilience and deterrence from India

China is seeking to assert control over outer space in two distinct ways. First, by leveraging space-based assets to safeguard its military and economic systems. Second, by competing with its rivals – both numerically and technologically – to maintain space superiority. Its most immediate competition is with Starlink in low-earth orbit (LEO). China plans to deploy more than 36,000 LEO satellites by 2030. This rivalry could intensify if China were to become the first to establish a presence on the far side of the moon or demonstrate a particular interest in exploiting asteroid resources. Such developments could create an escalatory dynamic in an environment that lacks a comprehensive regulatory framework.

Consequently, China's capabilities are evolving in three key areas. First, kinetic attack systems such as the DN-3 and SC-19 missiles, which can physically destroy satellites. Second, laser-based systems that can dazzle or blind satellites, disrupting navigation and communications. Third, co-orbital satellites, such as the SJ and TJS series, designed to interfere with or dislodge other satellites from orbit. Together, these capabilities could enable the People's Liberation Army (PLA) to cripple Intelligence, Surveillance, and Reconnaissance (ISR), GPS and communication networks, shaping the battlespace during the first 24 to 48 hours of a conflict.

Implications for India

If a contingency arises in Taiwan, the PLA is likely to first blind ISR and communication networks before resorting to hard-kill attacks. This would give Beijing time to shape the narrative, whereas a hard kill could trigger immediate escalation.

The U.S. would then have to assess China's military objectives, and, if an invasion proceeds, neutralise its counter-space capabilities. While both sides may lose assets, the U.S. would likely retain an advantage due to its greater redundancy and resilience. The Taiwan scenario applies to India albeit on a lesser scale. India has around 60 operational satellites as against 400-plus Chinese military satellites alone, which implies lesser redundancy. Losing five to six satellites will hurt India more.

Hypothetically, China could strike at the CARTOSAT/RISAT series, which could lead to loss of tactical-level imagery for hours, if not days. Instead, if it only choose to lase as these satellites as they pass over the Line of Actual Control, it could lead to temporary blind spots. They could even deploy jammers to disable India's NavIC system.

The key strategic takeaway is that while China can conduct peacetime harassment using lasers and jammers, or temporarily blind a few satellites during a border crisis, it cannot inflict crippling damage without destroying a large number of Indian satellites and risking severe Kessler Syndrome consequences. While Mission Shakti has strengthened India's deterrence posture, its utility remains restricted. Moreover, a single successful test does not guarantee operational reliability, and India still lacks co-orbital capabilities to counter satellites such as the SJ and TJS series.

Safeguarding India's interests

A few measures are pertinent. First, India must expand its space industry beyond the Indian Space Research Organisation to increase satellite production and launch capacity. Greater capacity translates into greater redundancy. Second, it should disaggregate large satellite programmes, such as GSAT, into smaller constellations, which are more resilient and survivable. Third, India must strengthen the protection of its ground space assets to mitigate the impact of hard-kill attacks. Fourth, it should enhance data-sharing arrangements with strategic partners so that, in the event of satellite losses, critical services can be restored through commercial or partner networks within hours.

Besides, India should also clearly define its red lines and the scope of a proportionate response to ensure that China fully understands the potential escalation ladder.

  चीन की योजना 2030 तक 36,000 से अधिक LEO उपग्रह तैनात करने की है।
- First, kinetic attack systems such as the **DN-3** and **SC-19** missiles, which can physically destroy satellites.
  पहला, **DN-3** और **SC-19** जैसी गतिज आक्रमण प्रणालियाँ, जो उपग्रहों को भौतिक रूप से नष्ट कर सकती हैं।
- Second, laser-based systems that can dazzle or blind satellites, disrupting navigation and communications.
  दूसरा, लेज़र-आधारित प्रणालियाँ, जो उपग्रहों को चकाचौंध या अंधा कर सकती हैं तथा नेविगेशन और संचार को बाधित कर सकती हैं।
- Third, co-orbital satellites, such as the **SJ** and **TJS** series, designed to interfere with or dislodge other satellites from orbit.
  तीसरा, **SJ** और **TJS** श्रृंखला जैसे सह-कक्षीय उपग्रह, जिन्हें अन्य उपग्रहों में हस्तक्षेप करने अथवा उन्हें कक्षा से हटाने के लिए डिज़ाइन किया गया है।
- India has around 60 operational satellites as against 400-plus Chinese military satellites alone, which implies lesser redundancy.
  भारत के पास लगभग 60 परिचालन उपग्रह हैं, जबकि केवल चीन के सैन्य उपग्रहों की संख्या ही 400 से अधिक है, जो भारत की कम वैकल्पिक क्षमता को दर्शाता है।
- Losing • ve to six satellites will hurt India more.
  पाँच से छह उपग्रहों की क्षति भारत को अधिक प्रभावित करेगी।
- Hypothetically, China could strike at the **CARTOSAT/RISAT** series, which could lead to loss of tactical-level imagery for hours, if not days.
  काल्पनिक रूप से, चीन **CARTOSAT/RISAT** श्रृंखला को निशाना बना सकता है, जिससे कई घंटों, यदि दिनों तक नहीं, सामरिक स्तर की चित्रात्मक जानकारी का नुकसान हो सकता है।
- They could even deploy jammers to disable India's **NavIC** system.
  वे भारत की **NavIC** प्रणाली को निष्क्रिय करने के लिए जैमर भी तैनात कर सकते हैं।
- The key strategic takeaway is that while China can conduct peacetime harassment using lasers and jammers, or temporarily blind a few satellites during a border crisis, it cannot inflict

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

crippling damage without destroying a large number of Indian satellites and risking severe **Kessler Syndrome** consequences.
मुख्य रणनीतिक निष्कर्ष यह है कि यद्यपि चीन शांति काल में लेज़र और जैमर का उपयोग कर उत्पीड़न कर सकता है अथवा सीमा संकट के दौरान कुछ उपग्रहों को अस्थायी रूप से अंधा कर सकता है, किन्तु वह बड़ी संख्या में भारतीय उपग्रहों को नष्ट किए बिना और गंभीर **केसलर सिंड्रोम** के जोखिम उठाए बिना विनाशकारी क्षति नहीं पहुँचा सकता।

- While **Mission Shakti** has strengthened India's deterrence posture, its utility remains restricted.
  यद्यपि **मिशन शक्ति** ने भारत की प्रतिरोधक क्षमता को सुदृढ़ किया है, फिर भी इसकी उपयोगिता सीमित बनी हुई है।
- Moreover, a single successful test does not guarantee operational reliability, and India still lacks co-orbital capabilities to counter satellites such as the **SJ** and **TJS** series.
  इसके अतिरिक्त, एक सफल परीक्षण परिचालन विश्वसनीयता की गारंटी नहीं देता, और भारत के पास अभी भी **SJ** और **TJS** श्रृंखला जैसे उपग्रहों का मुकाबला करने हेतु सह-कक्षीय क्षमताओं का अभाव है।

Safeguarding India's interests
भारत के हितों की सुरक्षा

- Second, it should disaggregate large satellite programmes, such as **GSAT**, into smaller constellations, which are more resilient and survivable.
  दूसरा, भारत को **GSAT** जैसे बड़े उपग्रह कार्यक्रमों को छोटे उपग्रह समूहों में विभाजित करना चाहिए, जो अधिक लचीले और सुरक्षित होते हैं।
- Third, India must strengthen the protection of its ground space assets to mitigate the impact of hard-kill attacks.
  तीसरा, भारत को कठोर विनाशकारी हमलों के प्रभाव को कम करने हेतु अपने भू-आधारित अंतरिक्ष संसाधनों की सुरक्षा को सुदृढ़ करना होगा।
- Fourth, it should enhance data-sharing arrangements with strategic partners so that, in the event of satellite losses, critical services can be restored through commercial or partner networks within hours.
  चौथा, भारत को अपने रणनीतिक साझेदारों के साथ डेटा-साझाकरण व्यवस्थाओं को मजबूत करना चाहिए ताकि उपग्रह क्षति की स्थिति में कुछ ही घंटों के भीतर व्यावसायिक अथवा साझेदार नेटवर्कों के माध्यम से महत्वपूर्ण सेवाओं को पुनर्स्थापित किया जा सके।

PATRIOTIC IAS

The FemTech industry's approach to PMOS

GS III: S&T

The global decision to rename Polycystic Ovary Syndrome (PCOS) as Polyendocrine Metabolic Ovarian Syndrome (PMOS) is a culmination of a decade-long collaboration between doctors, researchers, and patient groups. Led by Professor Helena Teede, Director of the Monash Centre for Health Research and Implementation in Melbourne, the rationale for the change was published in *The Lancet* last month. At the heart of the renaming was a growing recognition that the term PCOS could not capture the condition's complexity, and reduced it to a reproductive disorder centred on the ovaries. It is a long overdue acknowledgement of the condition's multisystem nature as PMOS manifests through a wide range of endocrine, metabolic, reproductive, psychological, and dermatological symptoms.

India's FemTech response

Yet, even as the formal medical renaming to PMOS is enforced, India's FemTech (female technology) industry had already begun treating PCOS as a multisystem condition. A paper published in 2024 by the authors of this article titled, "Platforming PCOS Treatment Online: FemTech Logics of Care," showed how FemTech platforms curated integrated care packages that brought together general practitioners, diabetologists, endocrinologists, gynaecologists, dermatologists, nutritionists, fitness trainers, and psychologists to treat PCOS.

Backed by venture capital funding, FemTech platforms conducted extensive market research to identify the gaps in conventional healthcare systems that stymied the long-term management of PCOS. Several platform founders were themselves women who had struggled to navigate gynaecological care that centred fertility and weight loss as the individual responsibility of patients. Their experiences shaped the emergence of platforms that framed PCOS as requiring coordinated and long-term care. Platforms also sought to improve doctor-patient interactions by training gynaecologists to avoid prejudiced language around marital status, fertility, and body weight. Since many aspects of PMOS management could be coordinated remotely, digital consultations also offered women greater privacy and flexibility in a culture that stigmatises unmarried women visiting gynaecologists unchaperoned.

PMOS often first appears through irregular menstrual cycles. The underlying hormonal and metabolic imbalances can remain poorly understood for years delaying treatment. In both families and clinical settings, it is viewed primarily through the lens of fertility and weight loss, generating shame and anxiety around marriage prospects and hostility within marriages itself.

FemTech platforms positioned themselves as offering an integrated and non-judgemental approach to PCOS care. They foregrounded its multifaceted nature, and as of 2025, India's FemTech market was estimated to be worth $1.48 billion.

Limits of privatised care

However, reliance on FemTech platforms creates new vulnerabilities for long-term healthcare delivery. First, access to these platforms depends on the ability to afford uninterrupted internet connectivity and recurring subscription costs. As a result, these services cater disproportionately to urban, digitally savvy women. For most people, gynaecologists in conventional healthcare systems are usually the first point of contact when they start showing PMOS symptoms. Strengthening these systems is therefore essential to public health.

Second, as start-ups, FemTech platforms are vulnerable to market volatility. They are dependent on investor confidence. None of the platform founders who were interviewed had secured funding beyond the preliminary 'Series A round' and one of the platforms had to cease operations stranding patients. In the absence of regulatory safeguards, these issues weaken FemTech platforms' claim of being robust alternatives to conventional healthcare systems.

Third, while platforms attempt to improve gynaecologist-patient interactions, scaling such interventions is challenging without broader reforms in medical education and clinical training. The shortage of gynaecologists in India, particularly in rural regions, further intensifies this challenge.

The larger healthcare crisis

Therefore, while FemTech platforms address a real and underserved need, they equally reflect deeper infrastructural failures. The long-term solution to conditions such as PMOS requires investment in public healthcare infrastructure and medical education that move beyond a narrow, fertility-first framework. Doctor-patient interactions must become more inclusive and respectful to women. At the same time, it is important to recognise the strain under which gynaecologists work, particularly in public hospitals. Overcrowded conditions, high patient volumes, and inadequate infrastructure leave little room for privacy and counselling. While FemTech platforms may ease some pressures by coordinating care digitally, they cannot substitute public healthcare.

Moreover, discussions around PMOS rarely engage with broader environmental factors such as adulterated food, pollution, chronic stress, and toxins. If the shift from PCOS to PMOS is to be meaningful, it should encourage a deeper reconsideration of how chronic women's health conditions are understood, prevented, and cared for in India.

PATRIOTIC IAS

Why do cities get polluted in summer?

How is summer air pollution different from that in winter? Why does ozone rise in hot weather? What drives PM10 spikes in Indian cities? How do dust storms affect air quality? How do human activities worsen summer air pollution? What can cities do to combat summer air pollution?

EXPLAINER

Mohammad Rafiuddin
Sneha Maria Ignatious

The story so far:

In March, the Commission for Air Quality Management in the National Capital Region and Adjoining Areas (CAQM) revoked all curbs under the Graded Response Action Plan (GRAP), signalling the end of the winter air pollution in Delhi.

A month later, as temperatures rose, it reimposed Stage 1 of the GRAP to combat summer air pollution. It was briefly revoked and reimposed again in May, while North India was reeling under heatwaves.

Why are cities witnessing pollution episodes during summer?

Delhi and the Indo-Gangetic plain are known for winter smog because low temperatures, low wind speeds, and their basin-like topography trap pollutants close to the ground.

Summer brings stronger winds, occasional thunderstorms that wash out pollutants, and warmer temperatures that allow pollutants to mix higher in the atmosphere. Despite such meteorological favours, Delhi has already witnessed 54 days between 1 April and 31 May 2026 where daily average PM10 levels exceeded the 24-hour National Ambient Air Quality Standard (NAAQS) of 100 ug/m3. At the same time, on 40 days, at least one Continuous Ambient Air Quality Monitoring Station (CAAQMS) in the city recorded a breach in the hourly ozone standard of 180 ug/m3.

Unlike most headlines, this is not the story of Delhi alone. Other large cities like Mumbai, Chennai, Hyderabad, Bengaluru, and Kolkata also recorded pollution spikes in the same period this summer, with PM10 and ozone levels going above the national standards to varying degrees. These spikes were shaped by local sources such as vehicular emissions, road dust, construction activity, industrial emissions, and dust from local storms. Mumbai, for instance, has been recording high PM10 and ozone levels over the last few years due to construction activity, dust, and traffic. While Chennai's PM10 breaches are occasional, its high vehicular density and hot weather also make it an ozone hotspot.

How is summer air pollution different from that in winter?

While winter pollution is dominated by finer PM2.5 particles, summer air pollution is driven by the coarser PM10 and ozone.

Vehicles, industries, waste burning, agricultural residue burning, construction sites, and broken roads remain year-round sources of pollution. Winter adds biomass burning for heating. Summer brings in dust storms that hike PM10 levels, while heat and sunlight catalyse ozone formation.

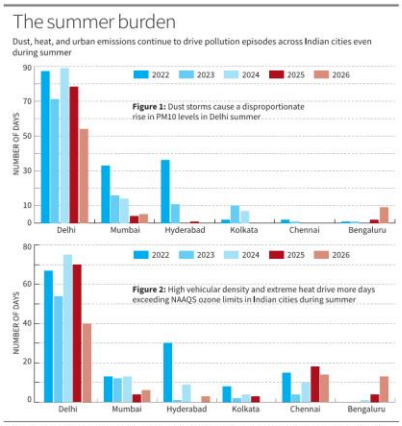
Why does ozone rise in hot weather?

Ozone is not emitted directly from a tailpipe or chimney. It forms when nitrogen oxides (NOx), largely from vehicles and volatile organic compounds (VOCs) from industrial emissions, vehicle exhaust, paints, and other sources, react under strong sunlight. Hotter, sunnier days therefore create favourable conditions for ozone formation, which, along with particulate matter, could cause respiratory illnesses.

Summer brings in dust storms that hike PM10 levels, while heat and sunlight catalyse ozone formation. PTI

THE GIST

- Summer air pollution is driven largely by PM10 and ozone, with several Indian cities recording repeated breaches of national standards.
- Dust storms, construction activity, road dust, vehicular emissions and industrial pollution contribute to pollution episodes during the hotter months.
- Heat and strong sunlight promote ozone formation, underlining the need for year-round air quality management rather than a focus on winter smog alone



What causes India's PM10 to spike?

Hot conditions over the Indian subcontinent create a low-pressure area that extends towards Iran. Its interaction with surrounding high-pressure areas produces hot, windy conditions. These winds could stir up dust storms, including hot winds called loo, which carry dust from West Asia and the Thar Desert across India towards the Bay of Bengal. Such episodes could elevate PM10 levels for days, as seen during the severe North Indian dust storms of 2018.

The Indian subcontinent also experiences shorter, localised dust storms known as 'andhi' that usually subside within hours. These form when strong downward-moving air associated with thunderstorms hits the ground, lifts loose dust, and carries it at high speed. While loo-type dust storms are common in North India, cities like Mumbai and Hyderabad generally face dusty episodes due to local thunderstorms.

Human activity worsens this natural dust load. Construction and demolition work often resumes after the more stringent winter GRAP restrictions are lifted. Without adequate site-level dust control, these activities add to PM10 levels. Vehicles moving over broken roads also further resuspend loose, dry dust into the air in the dry summer months.

What can cities do to combat summer air pollution?

While natural sources of dust cannot be controlled, they can be predicted. Delhi's Air Quality Early Warning System (AQEWS) was created in response to severe dust storms in 2018 and smog episodes of the previous years, and now runs year-round. It has since been extended to other cities such as Jaipur and Mumbai, and provides forecasts of multiple pollutants several days in advance. Its bulletin provides detailed weather information for Delhi and three-day Air Quality Index forecasts for 140 Indian cities.

The India Meteorological Department (IMD) also publishes national weather forecast bulletins several times a day. Authorities should use these systems to issue local alerts on dust storms, ozone, and poor air quality so citizens can reduce exposure.

For controllable non-natural sources, enforcement matters. Construction sites need active dust management even outside winter.

A study by the Council on Energy, Environment and Water (CEEW) found that simply reducing heavy-vehicle movement at construction sites can lower local particulate matter levels. The Brihanmumbai Municipal Corporation (BMC)'s Air Quality Decision Support System (AQDSS), also developed with CEEW, for example, assists in monitoring construction sites. It has already helped authorities take measures against more than 1,000 sites since October 2025 in Mumbai.

Reducing ozone requires cutting NOx and VOC emissions from vehicles and industries through cleaner transport, better compliance, and attention to solvents, paints, and fuel combustion. Even simple behavioural measures, like the 'Red Light On, Gaadi Off' campaign of the Delhi government that urges drivers to switch vehicles off while waiting at junctions to reduce idling emissions, can reduce ozone formation. But Indian cities need more sustained action.

Delhi has had a summer action plan since 2022. Other cities need similar plans that combine forecasting, public health advisories, construction dust control, road dust management, and action on ozone-forming emissions. Summer may disperse some pollutants better than winter, but heat and sunlight create their own pollution chemistry. Indian cities must plan for both seasons, treating them with equal seriousness.

(Mohammad Rafiuddin is Programme Lead and Sneha Maria Ignatious is Programme Associate at the Council on Energy, Environment and Water)

02J6. Why do cities get polluted in summer?
गर्मियों में शहर प्रदूषित क्यों हो जाते हैं?

- In March, the **Commission for Air Quality Management in the National Capital Region and Adjoining Areas (CAQM)** revoked all curbs under the **Graded Response Action Plan (GRAP)**, signalling the end of the winter air pollution in **Delhi**.
  मार्च में, **राष्ट्रीय राजधानी क्षेत्र और आस-पास के क्षेत्रों में वायु गुणवत्ता प्रबंधन आयोग (CAQM)** ने **ग्रेडेड रिस्पॉन्स एक्शन प्लान (GRAP)** के अंतर्गत लगाए गए सभी प्रतिबंध हटा दिए, जिससे **दिल्ली** में शीतकालीन वायु प्रदूषण के अंत का संकेत मिला।
- A month later, as temperatures rose, it reimposed Stage 1 of the **GRAP** to combat summer air pollution.
  एक माह बाद, तापमान बढ़ने के साथ, ग्रीष्मकालीन वायु प्रदूषण से निपटने हेतु **GRAP** के चरण 1 को पुनः लागू किया गया।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur

Contact Number : 9971932488
Website : patrioticias.in

- **Delhi** and the **Indo-Gangetic plain** are known for winter smog because low temperatures, low wind speeds, and their basin-like topography trap pollutants close to the ground.
  दिल्ली और **इंडो-गंगेटिक मैदान** शीतकालीन धुंध के लिए प्रसिद्ध हैं क्योंकि निम्न तापमान, कम पवन गति और उनकी बेसिन जैसी स्थलाकृति प्रदूषकों को भूमि के निकट फँसा देती है।
- Summer brings stronger winds, occasional thunderstorms that wash out pollutants, and warmer temperatures that allow pollutants to mix higher in the atmosphere.
  ग्रीष्म ऋतु में तेज हवाएँ, कभी-कभी आने वाले आंधी-तूफान जो प्रदूषकों को साफ कर देते हैं, तथा अधिक तापमान होता है, जिससे प्रदूषक वायुमंडल में अधिक ऊँचाई तक मिश्रित हो जाते हैं।
- Despite such meteorological favours, Delhi has already witnessed 54 days between 1 April and 31 May 2026 where daily average **PM10** levels exceeded the 24-hour **National Ambient Air Quality Standard (NAAQS)** of 100 ug/m3.
  ऐसी अनुकूल मौसमीय परिस्थितियों के बावजूद, **दिल्ली** में 1 अप्रैल से 31 मई 2026 के बीच 54 दिनों तक दैनिक औसत **PM10** स्तर 24 घंटे के **राष्ट्रीय परिवेशी वायु गुणवत्ता मानक (NAAQS)** 100 ug/m3 से अधिक रहा।
- At the same time, on 40 days, at least one **Continuous Ambient Air Quality Monitoring Station (CAAQMS)** in the city recorded a breach in the hourly ozone standard of 180 ug/m3.
  इसी अवधि में 40 दिनों तक शहर के कम-से-कम एक **सतत परिवेशी वायु गुणवत्ता निगरानी स्टेशन (CAAQMS)** ने प्रति घंटे के ओजोन मानक 180 ug/m3 के उल्लंघन को दर्ज किया।
- Unlike most headlines, this is not the story of Delhi alone.
  अधिकांश समाचारों के विपरीत, यह केवल दिल्ली की कहानी नहीं है।
- Other large cities like **Mumbai, Chennai, Hyderabad, Bengaluru, and Kolkata** also recorded pollution spikes in the same period this summer, with **PM10** and ozone levels going above the national standards to varying degrees.
  मुंबई, चेन्नई, हैदराबाद, बेंगलुरु और कोलकाता जैसे अन्य बड़े शहरों में भी इसी अवधि के दौरान प्रदूषण स्तर में वृद्धि दर्ज की गई, जहाँ **PM10** और ओजोन स्तर विभिन्न स्तरों पर राष्ट्रीय मानकों से ऊपर पहुँचे।
- These spikes were shaped by local sources such as vehicular emissions, road dust, construction activity, industrial emissions, and dust from local storms.
  इन प्रदूषण वृद्धि घटनाओं के पीछे स्थानीय स्रोत जैसे वाहन उत्सर्जन, सड़क की धूल, निर्माण गतिविधियाँ, औद्योगिक उत्सर्जन तथा स्थानीय आंधियों से उत्पन्न धूल जिम्मेदार रहे।
- While winter pollution is dominated by • ner **PM2.5** particles, summer air pollution is driven by the coarser **PM10** and ozone.
  जहाँ शीतकालीन प्रदूषण मुख्यतः सूक्ष्म **PM2.5** कणों से प्रभावित होता है, वहीं ग्रीष्मकालीन वायु प्रदूषण का प्रमुख कारण अपेक्षाकृत बड़े **PM10** कण और ओजोन होते हैं।
- Vehicles, industries, waste burning, agricultural residue burning, construction sites, and broken roads remain year-round sources of pollution.
  वाहन, उद्योग, कचरा जलाना, कृषि अवशेषों का दहन, निर्माण स्थल तथा टूटी हुई सड़कें वर्षभर प्रदूषण के स्रोत बने रहते हैं।
- Winter adds biomass burning for heating.
  शीतकाल में ताप प्राप्त करने हेतु बायोमास जलाना अतिरिक्त प्रदूषण का कारण बनता है।
- Summer brings in dust storms that hike **PM10** levels, while heat and sunlight catalyse ozone formation.
  ग्रीष्म ऋतु धूल भरी आँधियाँ लेकर आती है, जो **PM10** स्तर को बढ़ाती हैं, जबकि गर्मी और सूर्यप्रकाश ओजोन निर्माण को उत्प्रेरित करते हैं।

Why does ozone rise in hot weather?
गर्म मौसम में ओजोन का स्तर क्यों बढ़ता है?

- Ozone is not emitted directly from a tailpipe or chimney.
  ओजोन सीधे वाहन के एग्जॉस्ट पाइप या चिमनी से उत्सर्जित नहीं होती है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- It forms when nitrogen oxides (**NOx**), largely from vehicles and volatile organic compounds (**VOCs**) from industrial emissions, vehicle exhaust, paints, and other sources, react under strong sunlight.
  यह तब बनती है जब नाइट्रोजन ऑक्साइड (**NOx**), जो मुख्यतः वाहनों से निकलते हैं, तथा वाष्पशील कार्बनिक यौगिक (**VOCs**), जो औद्योगिक उत्सर्जन, वाहन धुएँ, पेंट और अन्य स्रोतों से उत्पन्न होते हैं, तीव्र सूर्यप्रकाश में परस्पर अभिक्रिया करते हैं।
- Hotter, sunnier days therefore create favourable conditions for ozone formation, which, along with particulate matter, could cause respiratory illnesses.
  अतः अधिक गर्म और धूप वाले दिन ओजोन निर्माण के लिए अनुकूल परिस्थितियाँ उत्पन्न करते हैं, जो कणीय पदार्थों के साथ मिलकर श्वसन संबंधी रोग उत्पन्न कर सकते हैं।

What causes India's PM10 to spike?
भारत में PM10 स्तर में वृद्धि का कारण क्या है?

- Hot conditions over the Indian subcontinent create a low-pressure area that extends towards **Iran**.
  भारतीय उपमहाद्वीप के ऊपर की गर्म परिस्थितियाँ एक निम्न दाब क्षेत्र उत्पन्न करती हैं, जो **ईरान** की ओर विस्तारित होता है।
- Its interaction with surrounding high-pressure areas produces hot, windy conditions.
  इसके आसपास के उच्च दाब क्षेत्रों के साथ संपर्क से गर्म और तेज हवाओं वाली परिस्थितियाँ उत्पन्न होती हैं।
- These winds could stir up dust storms, including hot winds called **loo**, which carry dust from **West Asia** and the **Thar Desert** across India towards the **Bay of Bengal**.
  ये हवाएँ धूल भरी आँधियाँ उत्पन्न कर सकती हैं, जिनमें **लू** नामक गर्म हवाएँ भी शामिल हैं, जो **पश्चिम एशिया** और **थार मरुस्थल** की धूल को भारत के पार **बंगाल की खाड़ी** की ओर ले जाती हैं।
- localised dust storms known as '**andhi**' that usually subside within hours forms when strong downward-moving air associated with thunderstorms hits the ground, lifts loose dust, and carries it at high speed.
  ये तब बनते हैं जब आंधी-तूफान से जुड़ी तीव्र नीचे की ओर चलने वाली हवा भूमि से टकराती है, ढीली धूल को उठाती है और उसे तेज गति से ले जाती है।

What can cities do to combat summer air pollution?
ग्रीष्मकालीन वायु प्रदूषण से निपटने के लिए शहर क्या कर सकते हैं?

- Delhi's **Air Quality Early Warning System (AQEWS)** was created in response to severe dust storms in 2018 and smog episodes of the previous years, and now runs year-round.
  दिल्ली की **वायु गुणवत्ता प्रारंभिक चेतावनी प्रणाली (AQEWS)** वर्ष 2018 के गंभीर धूल तूफानों और पूर्ववर्ती वर्षों के धुंध प्रदूषण की घटनाओं के उत्तर में विकसित की गई थी और अब यह पूरे वर्ष कार्य करती है।
- Its bulletin provides detailed weather information for **Delhi** and three-day **Air Quality Index** forecasts for 140 Indian cities.
  इसका बुलेटिन **दिल्ली** के लिए विस्तृत मौसम संबंधी जानकारी तथा 140 भारतीय शहरों के लिए तीन-दिवसीय **वायु गुणवत्ता सूचकांक** पूर्वानुमान प्रदान करता है।
- The **India Meteorological Department (IMD)** also publishes national weather forecast bulletins several times a day.
  भारत मौसम विज्ञान विभाग (IMD) भी प्रतिदिन कई बार राष्ट्रीय मौसम पूर्वानुमान बुलेटिन जारी करता है।
- Authorities should use these systems to issue local alerts on dust storms, ozone, and poor air quality so citizens can reduce exposure.
  प्राधिकरणों को इन प्रणालियों का उपयोग धूल तूफान, ओजोन और खराब वायु गुणवत्ता के संबंध में स्थानीय चेतावनी जारी करने हेतु करना चाहिए ताकि नागरिक अपने जोखिम को कम कर सकें।

PATRIOTIC IAS

- Reducing ozone requires cutting **NOx** and **VOC** emissions from vehicles and industries through cleaner transport, better compliance, and attention to solvents, paints, and fuel combustion.
  ओजोन स्तर कम करने के लिए वाहनों और उद्योगों से निकलने वाले **NOx** और **VOC** उत्सर्जन में कमी लाना आवश्यक है, जिसके लिए स्वच्छ परिवहन, बेहतर अनुपालन तथा सॉल्वेंट, पेंट और ईंधन दहन पर ध्यान देना होगा।
- Even simple behavioural measures, like the '**Red Light On, Gaadi Off**' campaign of the **Delhi government** that urges drivers to switch vehicles off while waiting at junctions to reduce idling emissions, can reduce ozone formation.
  यहाँ तक कि सरल व्यवहारिक उपाय, जैसे **दिल्ली सरकार** का '**रेड लाइट ऑन, गाड़ी ऑफ**' अभियान, जो चालकों को चौराहों पर प्रतीक्षा के दौरान वाहन बंद रखने के लिए प्रेरित करता है, भी ओजोन निर्माण को कम कर सकते हैं।

Operation Mule Hunt exposes cyberfraud network; 638 held

In one of Gujarat's largest crackdowns on cybercrime-linked financial networks, the State police have uncovered cyberfraud worth ₹2,289 crore and taken action against 913 mule bank accounts during a special operation aimed at dismantling the financial infrastructure used by cybercriminals. The crackdown, titled Operation Mule Hunt 1.0, led to the registration of 565 FIRs and the arrest of 638 accused, according to details shared by the State on Monday. The drive was conducted by the Gujarat Police and the Cyber Centre of Excellence under the supervision of Deputy Chief Minister Harsh Sanghavi as part of the government's broader effort to combat cybercrime, officials said.

- In one of **Gujarat's** largest crackdowns on cybercrime-linked financial networks, the State police have uncovered cyberfraud worth **₹2,289 crore** and taken action against **913 mule bank accounts** during a special operation aimed at dismantling the financial infrastructure used by cybercriminals.

गुजरात में साइबर अपराध से जुड़े वित्तीय नेटवर्क पर की गई सबसे बड़ी कार्रवाई में से एक के दौरान राज्य पुलिस ने **₹2,289 करोड़** की साइबर धोखाधड़ी का खुलासा किया और साइबर अपराधियों द्वारा इस्तेमाल किए जा रहे वित्तीय ढांचे को ध्वस्त करने के उद्देश्य से चलाए गए विशेष अभियान में **913 म्यूल बैंक खातों** के खिलाफ कार्रवाई की।

Mummy homecoming: People of the Kolla indigenous community participate in a ceremony following the return of the so-called **'Child of Chani'**, an Inca-era child mummy found frozen in 1905 at nearly 5,900 m on a mountain, in Jujuy province, Argentina on May 28. The mummy had been in a Buenos Aires museum for around 120 years.

CHILD OF CHANI

- The Kolla People, an Indigenous community living mainly in the **Andes Mountains of Argentina and Bolivia**. They participated in a ceremony after the return of an ancient Inca child mummy known as the **"Child of Chani."**
- The mummy was discovered in **1905** near the summit of **Mount Chani** in Argentina at an altitude of nearly **5,900 metres** above sea level. The child belonged to the Inca Civilization, which flourished in South America before the arrival of the Spanish in the 16th century.
- The child's body remained naturally preserved for centuries because of the extreme cold temperatures high in the Andes. Such preserved bodies are called **mummies**.
- Unlike Egyptian mummies, which were artificially preserved using chemicals and wrapping, these Andean mummies were preserved naturally by freezing conditions, similar to food being preserved in a freezer.
- Historians believe that some Inca children were part of a ritual called **Capacocha**. In this ritual, children considered pure or special were ceremonially offered to mountain gods.
- Mountains were sacred in Inca belief because they were thought to control weather, water, and fertility.
- The **Inca civilization** developed in the Andes Mountains region of western South America, mainly in present-day Peru, during the **13th to 16th centuries**.
- The capital of the **Inca Empire was Cusco**, which was considered the political and cultural center of the empire.
- The Incas built a vast empire called the "Tawantinsuyu," meaning "Land of Four Regions." At its peak, the empire extended across modern Peru, Ecuador, Bolivia, Chile, and parts of Argentina and Colombia. The ruler of the empire was called the

"Sapa Inca," who was treated as the son of the Sun God. The Incas mainly worshipped the Sun God, known as "Inti."

- The civilization is famous for its advanced engineering and architecture.
- Despite lacking modern tools, iron technology, or wheeled transport, the Incas built strong roads, bridges, terraces, and stone buildings.
- Their road network stretched thousands of kilometers across mountains. One of the best examples of Inca architecture is Machu Picchu, a magnificent hilltop city built with precisely cut stones that fit together without cement.

Mann Ki Baat: PM praises athletes, changemakers

He praised Indian sprinters Gurindervir Singh and Animesh Kujur; lauded mango farmers for reaching global markets; shared story of educator Girija Amma for raising funds for soldiers

PCS

Saurabh Trivedi
NEW DELHI

Prime Minister Narendra Modi, in the 134th episode of *Mann Ki Baat* on Sunday, highlighted India's achievements in sports, environmental conservation, cultural heritage, and scientific learning, while urging citizens to continue contributing towards nation-building through innovation, community participation, and social responsibility.

A major highlight of the address was the Prime Minister's praise for Indian sprinters Gurindervir Singh and Animesh Kujur, who delivered historic performances at the Federation Cup in Ranchi.

During a telephone interaction with the athletes, Mr. Modi lauded their dedication and the spirit of healthy competition that has helped elevate Indian athletics.

Mr. Singh recently became India's fastest man after clocking a remarkable 10.09 seconds in the 100-metre sprint, becoming the first Indian athlete to break the 10.10-second barrier.

> Today, through *Mann Ki Baat*, I want to praise my farmer brothers and sisters involved in mango cultivation. You are not just ordinary farmers; you are playing a significant role in strengthening the nation's agricultural economy
> **NARENDRA MODI**
> Prime Minister

Praising mango farmers

Speaking about the summer season, Mr. Modi said mangoes remain an inseparable part of Indian households and culture. He praised farmers engaged in mango cultivation and highlighted how Indian mangoes are increasingly reaching global markets.

"Today, through *Mann Ki Baat*, I want to praise my farmer brothers and sisters involved in mango cultivation. You are not just ordinary farmers; you are playing a significant role in strengthening the nation's agricultural economy," the Prime Minister said.

Reflecting on his recent visit to the Netherlands, the Prime Minister described it as a significant step in strengthening India's international partnerships. He also spoke about the return of rare Chola-era copper plates by the country, describing them as invaluable historical treasures that offer insights into the maritime strength, governance, and international relations of the Chola empire.

Mr. Modi also underlined the importance of environmental conservation and highlighted efforts to protect the endangered Ganga river dolphin.

He called upon citizens to actively participate in preserving biodiversity and natural ecosystems.

The Prime Minister urged people and local administrations to remain vigilant during heatwaves and work collectively to minimise their impact.

He also appreciated grassroots initiatives such as the work of Saji Valasheril in Kerala, who has trained thousands of people, including children with disabilities, through swimming programmes.

Astronomy initiatives

Encouraging scientific curiosity among young people, Mr. Modi highlighted astronomy outreach initiatives by organisations such as Astro Kerala, the Bangalore Astronomical Society, and the Big Bang Astronomy Club of Rajkot.

He said astronomy has long fascinated Indians and can inspire the next generation of scientists and innovators.

The Prime Minister concluded by sharing the inspiring story of educator Girija Amma, whose initiative of collecting one rupee daily from students for soldiers raised nearly ₹40 lakh, calling it a shining example of patriotism and collective responsibility towards the nation.

  उन्होंने देश द्वारा दुर्लभ **चोल कालीन ताम्रपत्रों** की वापसी का भी उल्लेख किया और उन्हें अमूल्य ऐतिहासिक धरोहर बताया, जो **चोल साम्राज्य** की समुद्री शक्ति, शासन व्यवस्था और अंतरराष्ट्रीय संबंधों की जानकारी देते हैं।
- Mr. Modi also underlined the importance of environmental conservation and highlighted efforts to protect the endangered **Ganga river dolphin**.
  श्री मोदी ने पर्यावरण संरक्षण के महत्व पर भी जोर दिया और संकटग्रस्त **गंगा नदी डॉल्फिन** की सुरक्षा के प्रयासों को रेखांकित किया।
- He also appreciated grassroots initiatives such as the work of **Saji Valasheril** in **Kerala**, who has trained thousands of people, including children with disabilities, through swimming programmes.
  उन्होंने **केरल** में **साजी वलाशेरिल** जैसे जमीनी स्तर के प्रयासों की भी सराहना की, जिन्होंने तैराकी कार्यक्रमों के माध्यम से दिव्यांग बच्चों सहित हजारों लोगों को प्रशिक्षण दिया है।

Astronomy initiatives
खगोल विज्ञान पहल

- Encouraging scientific curiosity among young people, Mr. Modi highlighted astronomy outreach initiatives by organisations such as **Astro Kerala**, the **Bangalore Astronomical**

Society, and the **Big Bang Astronomy Club of Rajkot**.

युवाओं में वैज्ञानिक जिज्ञासा को प्रोत्साहित करते हुए श्री मोदी ने **एस्ट्रो केरल**, **बैंगलोर एस्ट्रोनॉमिकल सोसाइटी**, और **राजकोट के बिग बैंग एस्ट्रोनॉमी क्लब** जैसी संस्थाओं की खगोल विज्ञान संबंधी पहलों को रेखांकित किया।

- The Prime Minister concluded by sharing the inspiring story of educator **Girija Amma**, whose initiative of collecting one rupee daily from students for soldiers raised nearly **₹40 lakh**, calling it a shining example of patriotism and collective responsibility towards the nation.

प्रधानमंत्री ने शिक्षिका **गिरिजा अम्मा** की प्रेरणादायक कहानी साझा करते हुए कार्यक्रम का समापन किया, जिनकी सैनिकों के लिए छात्रों से प्रतिदिन एक रुपया एकत्र करने की पहल से लगभग **₹40 लाख** जुटाए गए। उन्होंने इसे देश के प्रति देशभक्ति और सामूहिक जिम्मेदारी का उज्ज्वल उदाहरण बताया।

01J6. The Voice of Hind Rajab likely to get 'A' certificate
'द वॉयस ऑफ हिंद रजब' को 'A' प्रमाणपत्र मिलने की संभावना

The Voice of Hind Rajab likely to get 'A' certificate

PCS

The Hindu Bureau
NEW DELHI

The Voice of Hind Rajab, the critically acclaimed 2025 film on the killing of the eponymous Palestinian five-year-old by Israeli forces, is set to be cleared by the Central Board of Film Certification (CBFC) with an 'A' certificate, say official sources.

This comes weeks after the Kaouther Ben Hania directorial was rejected for supposedly being detrimental to India-Israel relations.

The misgivings of the initial advisory panel drew censure from film-makers, actors, activists and the Opposition.

For the film to release, the CBFC will have to issue the certificate on its website (a step yet to be completed), and hand over the certificate to the film distributor.

- **The Voice of Hind Rajab**, the critically acclaimed 2025 film on the killing of the eponymous Palestinian five-year-old by Israeli forces, is set to be cleared by the **Central Board of Film Certification (CBFC)** with an 'A' certificate, official sources say.

द वॉयस ऑफ हिंद रजब, जो 2025 की समीक्षकों द्वारा प्रशंसित फिल्म है और इजरायली बलों द्वारा उसी नाम की पांच वर्षीय फिलिस्तीनी बच्ची की हत्या पर आधारित है, उसे **केंद्रीय फिल्म प्रमाणन बोर्ड (CBFC)** द्वारा 'A' प्रमाणपत्र दिए जाने की संभावना है, ऐसा आधिकारिक सूत्रों ने कहा।

- For the film to release, the **CBFC** will have to issue the certificate on its website (a step yet to be completed), and hand over the certificate to the film distributor.

फिल्म की रिलीज के लिए **CBFC** को अपनी वेबसाइट पर प्रमाणपत्र जारी करना होगा (जो प्रक्रिया अभी पूरी नहीं हुई है) और फिल्म वितरक को प्रमाणपत्र सौंपना होगा।

Royal Challengers retain title with a regal display

Kohli takes the Bengaluru side home with an unbeaten 75; the bowlers restrict Titans to 155 for eight after Patidar asks them to take first strike; Washington wages a lone battle for Gill's men

IPL-19

Ashwin Achal
AHMEDABAD

Royal Challengers Bengaluru crowned a dominant IPL 2026 campaign with a crushing five-wicket victory over Gujarat Titans in the final here on Sunday, sealing the title with the same authority it had shown through the season.

RCB had set the standard from the opening weeks of the tournament, and reserved its best for the biggest night.

For a side considered favourite, the season ended in fitting fashion – as champion for the second successive year.

The RCB bowlers set the tone early at the Narendra Modi Stadium, relentlessly hitting hard lengths to strangle GT. A sub-par 155 for eight was never likely to be enough to seriously test a power-packed RCB batting line-up.

Stark contrast

That gulf in intent was evident when Virat Kohli (75 n.o., 42b, 9x4, 3x6) and Venkatesh Iyer (32, 16b, 4x4, 2x6) came out attacking, in stark contrast to GT's muddled innings. The pair took on Mohammed Siraj and Kagiso Rabada, powering RCB to 70 for two in the PowerPlay.

With the required rate dropping to 6.14, GT was left to play catch up.

Rashid Khan briefly raised hopes when he dismissed Rajat Patidar and Krunal Pandya in the ninth over, but with Kohli still around, RCB remained in control.

RCB capped a memorable campaign in emphatic fashion, crossing the line with 12 balls to spare. The 90,000-odd crowd, with RCB jerseys in the majority, erupted as Kohli launched Arshad Khan into the sky.

Patidar's decision to field first was vindicated, as GT never quite found room to breathe.

After the RCB pacers struck early, left-arm spinner Krunal tightened the grip with subtle changes of pace and trajectory.

Only Washington Sundar escaped the chokehold. His unbeaten 50 (37b, 5x4) was an innings of resistance, but it was a lone hand in a line-up that never settled.

Shubman Gill's men appeared wary of RCB's pace attack from the outset. Intent gave way to preservation, and preservation soon became paralysis.

Introduced in the third over, Josh Hazlewood removed Gill with a length ball. Sai Sudharsan followed soon after, miscuing while attempting to hook Bhuvneshwar Kumar. With its two premier batters back in the pavilion inside four overs, GT retreated.

The promotion of Nishant Sindhu to No. 3 underlined the mood. Tasked with blunting the new ball, Sindhu could not shift momentum, and the move only strengthened RCB's control.

GT went nearly seven overs after the PowerPlay without a boundary. Jos Buttler, usually quick to change gears, crawled at under a run-a-ball. When he finally tried to accelerate, Krunal outfoxed him with a quicker delivery and Jitesh Sharma did the rest.

Even the death overs brought little relief. Washington alone kept the scoreboard moving.

Lucky break

Dropped by substitute Jordan Cox on four, he dragged GT to a total that kept faint hope alive.

That hope vanished quickly once Kohli and Venkatesh came out to bat.

Delivering on the big night: Rasikh was the most successful RCB bowler while Hazlewood picked up a couple before the RCB openers Venkatesh and Kohli came out swinging. K.R. DEEPAK & VIJAY SONEJI

SCOREBOARD

GUJARAT TITANS
Sai Sudharsan c Jitesh b Bhuvneshwar 12 (12b, 2x4), Shubman Gill c Patidar b Hazlewood 10 (8b, 2x4), Nishant Sindhu c Padikkal b Rasikh 20 (18b, 3x4), Jos Buttler st. ROYAL CHALLENGERS
Venkatesh Iyer **(Impact Player for Duffy)** c Rabada b Siraj 32 *(16b, 4x4, 2x6)*, Virat Kohli (not out) 75 *(42b, 9x4, 3x6)*, Devdutt Padikkal c Arshad b Rabada 1 *(4b)*, Rajat Patidar c Rabada b Rashid 15 *(13b, 1x4, 1x6)*, Krunal Pandya lbw b Rashid 1 *(2b)*, Tim David c Buttler b Arshad 24 *(17b, 3x4, 1x6)*, Jitesh Sharma (not out) 11 *(14b, 1x4)*; Extras (lb-1, w-1): 2; Total (for five wkts. in 18 overs): 161.

FALL OF WICKETS
1-62 (Venkatesh, 4.3), 2-63 (Padikkal, 5.1), 3-89 (Patidar, 8.2), 4-91 (Krunal, 8.5), 5-132 (David, 13.6).

TITANS BOWLING
Siraj 4-0-36-1, Rabada 3-0-44-1, Holder 2-0-16-0, Rashid 4-0-25-2, Arshad 4-0-32-1, Prasidh **(Impact Player for Tewatia)** 1-0-7-0.

Toss: RCB; **PoM:** Kohli.
RCB won by five wickets with two overs to spare.

Impact Index

- 3 RCB is the third team, after CSK and MI, to successfully defend its title
- 3 Kohli has the most scores of 75 or more in T20 finals
- 3.3 RCB's 50 is the fastest in a final. CSK (4 overs in 2023) held the previous record
- 4 Rabada (2020, 2026) is the fourth player to win the Purple Cap twice after Bravo (2013, 2015), Bhuvneshwar (2016, 2017) and Harshal (2021, 2024)
- 4 Patidar is the fourth skipper to win two or more titles after Dhoni (5), Rohit (5) and Gambhir (2)
- 9 For the ninth consecutive season, the winner of Qualifier 1 has gone on to lift the title. Overall, the record is 13 (out of 16) since the playoffs format was introduced in 2011
- 25 Kohli's quickest half-century (by balls faced) in the IPL
- 28 Patidar has taken the least matches by a captain to win two crowns (Rohit 44, Dhoni 59, Gambhir 79)
- 75 Kohli's is the second highest unbeaten score in a successful run chase in a final after Watson's 117 n.o. vs. SRH in 2018

Compiled by ANIRUDH VELAMURI

Composure of the guys just shone through: Kohli

Ashwin Achal
AHMEDABAD

At this very venue last year, Virat Kohli sunk to the ground and held back tears when Royal Challengers Bengaluru broke a long drought to clinch its maiden IPL trophy.

On Sunday, Kohli was far less emotional when RCB successfully defended the title. There was no novelty to celebrate this year, just the satisfaction of a thorough professional getting the job done.

Kohli was clinical with the bat, striking an unbeaten 42-ball 75 to lead the RCB chase.

His confidence reflected the feeling in a team which stayed ahead of the pack right from the early phase of the competition.

"It doesn't feel like the same pressure as last year. We knew what kind of ability we have in the group. We topped the table. There's a reason why we got here first. The skill sets we have, the maturity, the composure of the guys just shone through again tonight," Kohli said after the win.

RCB's excellent campaign had hinged on handy contributions from several members of the squad, a shift from the star-driven ethos in past teams.

"We have a group of guys where you don't need to be the one to step up every time. There are guys behind you, around you, who can win games. We have so many 'Player-of-the-Match' awards spread throughout the group. I feel so happy to play in a group where we have balance. We are an all-round strong team, and that is why we have confidence on the field," Kohli said.

Satwik-Chirag win Singapore Open, end their two-year title drought

The premier Indian men's doubles team bounces back to defeat Indonesia's Alfian and Fikri for its first crown since the 2024 Thailand Open

SINGAPORE

Satwiksairaj Rankireddy and Chirag Shetty fought back from a game down to clinch their maiden Singapore Open title, defeating Indonesia's Fajar Alfian and Muhammad Shohibul Fikri in the men's doubles final of the BWF Super 750 badminton tournament, here on Sunday.

The Asian Games and Commonwealth Games champions produced a gritty comeback to secure their first title in two years and their ninth career World Tour crown, besides claiming a third Super 750 title, with a tense 18-21, 21-17, 21-16 win in 73 minutes.

The victory was particularly significant for the World No. 4 Indian duo, who became the first Indians to win the doubles title at the Singapore Open.

Satwik and Chirag had last lifted a trophy at the Thailand Open in 2024. Since then, they had reached four finals but finished runner-up on each occasion before finally breaking the drought here.

The Indians had entered the final trailing 1-2 in their head-to-head record against the Indonesian pair, with their most recent defeat coming in the Malaysia Open quarterfinals in January.

After dropping a closely-fought opening game, Satwik and Chirag raised their intensity and dominated the longer rallies to turn the contest around against the World No. 3 Indonesians.

The triumph capped an impressive week for the Indian pair, who had stunned reigning World champions and top seeds Kim Won Ho and Seo Seung Jae of South Korea in the semifinals.

As the winning point was sealed, Satwik and Chirag lay flat on the court in celebration. Satwik followed it up with a baby-themed celebration, while an ecstatic Chirag let out a loud roar before leaping onto his partner.

The duo later danced on court as they savoured a long-awaited return to the top step on the podium.

"Two years... we knew for a fact that eventually the win will come. We had that belief and it was just a matter of time and finally we got it," said Chirag.

Other results (finals):

Men: Alex Lanier (Fra) bt Loh Kean Yew (Sgp) 17-21, 21-15, 21-14.

Women: An Se-young (Kor) bt Akane Yamaguchi (Jpn) 21-11, 17-21, 21-19.

Doubles: Jia Yifan & Zhang Shuxian (Chn) bt Liu Shengshu & Tan Ning (Chn) 22-20, 21-19.

Mixed doubles: Mathias Christiansen & Alexandra Boje (Den) bt Yuichi Shimogami & Sayaka Hobara 17-21, 21-12, 21-12.

Victory dance: Satwik and Chirag are over the moon after their comeback win. BWF/BADMINTON PHOTO

India ended the Asian under-20 Athletics Championships in Hong Kong with another gold as its women's 4x400m relay team set a meet record on the final day on Sunday.

The quartet of Bhumika Sanjay Nehate, Tahura Khatun, Sehnoor Bawa and Neeru Pathak clocked 3:38.07 to finish ahead of Kazakhstan, which took silver in 3:43.63.

Host Hong Kong claimed bronze in 3:49.94.

India added another relay medal soon after, with the men's 4x400m team of Piyush Raj, Sayed Sabeer, Ranjith Kumar S. and Mohammed Ashfaq taking bronze in 3:05.54.

China won gold in 3:04.88, while Qatar finished second in 3:05.06.

Earlier in the day, Venkatram Reddy Mogali won gold in the men's 800m with a personal best of 1:48.27.

Muskan had also topped the women's 5000m in 16:53.08, while Nishchay claimed silver in the men's discus throw with a personal best of 60.10m.

The final-day medals capped a strong campaign for the Indian contingent at the continental junior meet.

The majoritarian shadow over Adivasi identity, faith

GS I: History GS I: Society

Brinda Karat
Senior leader of the CPI(M)

Majoritarian politics seeks to reshape Adivasi identity and rights

Last week, the Janjati Suraksha Manch (JSM) and Vanvasi Kalyan Ashram, both Rashtriya Swayamsewak Sangh (RSS) progeny, held a conclave in Delhi – "Janjati Sanskritik Samagam" – attended by thousands of Adivasis from across the country The stated occasion was the 150th anniversary of legendary hero Birsa Munda. In the vote of thanks, the organisers acknowledged the extensive official machinery behind the gathering – from the Railway Ministry to Union Ministers, Chief Ministers, and senior officials. With Union Home Minister Amit Shah as the chief guest, the event was effectively semi-official. This is precisely why the speeches, demands raised, and the Home Minister's response deserve far closer scrutiny than an ostensibly cultural gathering would normally invite.

The JSM's core agenda against Christian conversions is well known, its main demand being the delisting of all Adivasi communities that have converted to Christianity and the stripping of their constitutional and legal protections on the grounds that they no longer subscribe to Adivasi beliefs. The organisation has run violent campaigns in several States in central India, particularly Chhattisgarh, targeting Adivasi families who have converted to Christianity – campaigns that have gone so far as the forcible exhumation of bodies from graves on privately owned land belonging to Christian Adivasis in tribal villages. In February this year, in a case pending before the Supreme Court of India, the Court issued interim orders restraining such exhumations. Yet, these incidents continue under the patronage of Bharatiya Janata Party State governments.

A foundational distinction

At the conclave, the demand for delisting was framed with reference to the recent Court judgment upholding the Presidential Order of 1950, which holds that persons belonging to Scheduled Castes (SC) who profess a religion "other than Hinduism" do not qualify for constitutional or legal benefits meant for SCs. The JSM's demand is that this principle be extended to Scheduled Tribes (ST) – a move that would require removing what one of its leaders described as "a weakness in the Constitution." What the JSM considers a weakness is, in fact, a foundational distinction: unlike in the case of SCs, neither the Constitution of India nor the law links the identity of STs to religion.

On the conclave stage, alongside portraits of Birsa Munda and a Hinduised image of "Bharat Mata", was a portrait of the late Kartik Oraon – a Congress Member of Parliament who once filed a petition challenging the candidature of two members of the Oraon community from an ST-reserved seat on the grounds that they were Christians. The Patna High Court, in its ruling in 1963, rejected his petition categorically, holding that "tribal identity is not religion-based," that it rests on ethnic and community kinship ties, and that "an Oraon remains an Oraon" regardless of whether he is Hindu, Christian, or Buddhist. The High Court further observed that, by and large, converted Adivasis continued to participate in community festivals and celebrations, and joined others in raising concerns common to all Adivasi communities. This judgment remains the governing legal precedent. The JSM seeks to overturn it, and its method for doing so is chillingly cruel: isolating converted families, forcibly preventing them from attending community festivals, and then using that coercively imposed exclusion as proof that converts have abandoned Adivasi culture, promoting their expulsion from traditional gram sabhas. Exclusion is engineered, then presented as evidence.

A campaign of cooption

Simultaneously, the JSM has been pushing the assertion that Adivasis belong to the broader "sanatan parivar". At the conclave, the organisation's national convenor declared: "They say Adivasis are not Hindus. What is this game? We are Ram's children – this is a conspiracy against us." Another leader proclaimed that "Adivasis exist in the shade of the great tree of Sanatan". The nature of the JSM's *"ghar wapasi* (homecoming") for converts is unambiguous – functions marked not with Adivasi symbols but those of Hindutva. In the JSM's worldview, Adivasis are "*vanvasis*" – forest dwellers defined by their service to Lord Ram, subordinate to upper-caste deities, and redeemable only through their blessings. The building of temples with Hindu idols in tribal villages, the rebranding of local deities as forms of Vishnu, Shiva or Durga, and the installation of Hanuman idols at village entry points are all part of this hegemonic cooption campaign.

Adivasis are fully entitled to choose their religion under Article 25 of the Constitution, which guarantees freedom of conscience and religion. There are laws, some quite draconian, to deal with conversions which are "fraudulent". Adivasis may choose to be Hindu, Christian, or of any other faith. But whether an Adivasi worships Ram or Jesus has no bearing on their identity as an Adivasi; this is a fundamental constitutional principle. What cannot be accepted is the distortion of this principle to suggest that an Adivasi who worships Ram is expressing Adivasi culture, while one who worships Jesus is betraying it. Adivasis have long demanded formal recognition of the distinctiveness of their beliefs, of their worship of nature, their animist traditions and practices. The Jharkhand Legislative Assembly, for instance, adopted a resolution calling for a separate column in the Census enumeration of religion for Adivasis to register their own beliefs, a demand reiterated by Adivasi intellectuals and numerous organisations across the country. But this has been unfairly ignored by the government, insulting Adivasi faith.

The urgent issues Adivasis face

It is this majoritarian agenda that Mr. Amit Shah endorsed going even further by describing the JSM's campaign as a contemporary "Ulgulan". Birsa Munda's Ulgulan was a revolt against colonial rule – and notably, he broke with Christian missionaries precisely because he saw them as instruments of that rule. Mr. Shah's political lineage, by contrast, never fought the British – it compromised with them. To invoke hero Birsa's name and the historic Ulgalan to legitimise a sectarian campaign against converted Adivasis is a grave betrayal of his legacy. Mr. Shah also declared that sanatanis too are nature worshippers, and that *jal*, *jangal*, *pahad* (water, forests, mountains) "is the centre of our beliefs".

His words ring hollow. Even as Mr. Shah spoke, tribal communities in Sijimali and Rayagada in Odisha were fighting to save their sacred mountain from bauxite mining operations approved by his own government. In the Hasdeo region of Chhattisgarh, thousands of Adivasis have spent years fighting against their forests being handed over to private mining companies – forests that were previously declared a "no-go zone," until the current regime decided otherwise. Lakhs of trees have been felled against the decisions of the gram sabhas, among them the *sal* and *karam*, the sacred trees around which Adivasi festivals and rituals are organised. The nature worshippers in Delhi have been remarkably efficient destroyers of nature.

The urgent issues before Adivasis are the sabotage of the Forest Rights Act, the virtual elimination of the rights of the gram sabha, the subversion of the Panchayat (Extension to Scheduled Areas), or PESA, the huge backlog in employment in reserved posts, the pathetic condition of Adivasi student hostels and arrears in scholarship payments, and the continuing lack of civic and health facilities in Adivasi areas, to name a few. And through all of this – not once, not in a single instance – has the JSM raised its voice in defence of Adivasi rights against government-enabled corporate takeovers of *jal*, *jangal*, and *zameen*. On the contrary, by splitting Adivasi communities along religious lines, it has served the interests of the very companies that are dispossessing them. Dividing the dispossessed is, after all, the oldest trick in the book.

For those committed to the defence of Adivasi rights, the JSM gathering and the Home Minister's endorsement are indications of the challenges ahead, which can and must be met by the united will of Adivasi resistance and democratic forces in the spirit of the great Adivasi heroes.

01J6. The majoritarian shadow over Adivasi identity, faith
आदिवासी पहचान और आस्था पर बहुसंख्यकवाद की छाया

- **Last week, the Janjati Suraksha Manch (JSM) and Vanvasi Kalyan Ashram, both Rashtriya Swayamsewak Sangh (RSS) progeny, held a conclave in Delhi — "Janjati Sanskritik Samagam" — attended by thousands of Adivasis from across the country.**
  पिछले सप्ताह, जनजाति सुरक्षा मंच (JSM) और वनवासी कल्याण आश्रम, जो दोनों राष्ट्रीय स्वयंसेवक संघ (RSS) से संबद्ध संगठन हैं, ने दिल्ली में "जनजाति सांस्कृतिक समागम" नामक एक सम्मेलन आयोजित किया, जिसमें देशभर से हजारों आदिवासियों ने भाग लिया।
- The stated occasion was the **150th anniversary** of legendary hero **Birsa Munda**.
  इस आयोजन का घोषित अवसर महानायक **बिरसा मुंडा** की **150वीं जयंती** था।
- The **JSM's** core agenda against Christian conversions is well known, its main demand being the delisting of all Adivasi communities that have converted to Christianity and the stripping of their constitutional and legal protections on the grounds that they no longer subscribe to Adivasi beliefs.
  JSM का ईसाई धर्मांतरण के विरुद्ध मुख्य एजेंडा सर्वविदित है, जिसकी प्रमुख माँग यह है कि ईसाई धर्म अपनाने वाले सभी आदिवासी समुदायों को सूचीबद्ध जनजातियों की श्रेणी से बाहर किया जाए तथा यह कहते हुए उनके संवैधानिक और कानूनी संरक्षण समाप्त किए जाएँ कि वे अब आदिवासी मान्यताओं का पालन नहीं करते।
- The organisation has run violent campaigns in several States in central India, particularly **Chhattisgarh**, targeting Adivasi families who have converted to Christianity — campaigns that have gone so far as the forcible exhumation of bodies from graves on privately owned land belonging to Christian Adivasis in tribal villages.
  इस संगठन ने मध्य भारत के अनेक राज्यों, विशेषकर **छत्तीसगढ़**, में ईसाई धर्म अपनाने वाले आदिवासी परिवारों के विरुद्ध हिंसक अभियान चलाए हैं — जो आदिवासी गाँवों में ईसाई आदिवासियों की निजी भूमि पर स्थित कब्रों से शवों को जबरन निकालने तक पहुँच गए हैं।

A foundational distinction
एक मूलभूत भेद

- At the conclave, the demand for delisting was framed with reference to the recent Court judgment upholding the **Presidential Order of 1950**, which holds that persons belonging to **Scheduled Castes (SC)** who profess a religion "other than Hinduism" do not qualify for constitutional or legal benefits meant for SCs.
  सम्मेलन में सूची से हटाने की माँग को हाल ही के उस न्यायिक निर्णय के संदर्भ में प्रस्तुत किया गया, जिसमें **1950 के राष्ट्रपति आदेश** को बरकरार रखा गया था। इस आदेश के अनुसार, **अनुसूचित जाति (SC)** से संबंधित वे व्यक्ति जो "हिंदू धर्म के अतिरिक्त" किसी अन्य धर्म को मानते हैं, अनुसूचित जातियों हेतु निर्धारित संवैधानिक या कानूनी लाभों के पात्र नहीं होंगे।
- The **JSM's** demand is that this principle be extended to **Scheduled Tribes (ST)** — a move that would require removing what one of its leaders described as "a weakness in the Constitution."
  JSM की माँग है कि इस सिद्धांत को **अनुसूचित जनजातियों (ST)** पर भी लागू किया जाए — एक ऐसा कदम, जिसके लिए उनके एक नेता द्वारा "संविधान की कमजोरी" कहे गए प्रावधान को हटाना आवश्यक होगा।
- What the **JSM** considers a weakness is, in fact, a foundational distinction: unlike in the case of **SCs**, neither the **Constitution of India** nor the law links the identity of **STs** to religion.
  जिसे **JSM** कमजोरी मानता है, वह वास्तव में एक मूलभूत भेद है: **SCs** के मामले के विपरीत, न तो **भारतीय संविधान** और न ही कानून, **STs** की पहचान को धर्म से जोड़ता है।

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- On the conclave stage, alongside portraits of **Birsa Munda** and a Hinduised image of "**Bharat Mata**", was a portrait of the late **Kartik Oraon** — a Congress Member of Parliament who once filed a petition challenging the candidature of two members of the **Oraon** community from an ST-reserved seat on the grounds that they were Christians.
  सम्मेलन के मंच पर **बिरसा मुंडा** और "**भारत माता**" की हिंदूकरण की गई छवि के साथ दिवंगत **कार्तिक उराँव** का चित्र भी था — जो कांग्रेस के सांसद थे और जिन्होंने कभी **उराँव** समुदाय के दो ईसाई उम्मीदवारों की ST-आरक्षित सीट से उम्मीदवारी को चुनौती देते हुए याचिका दायर की थी।
- The **Patna High Court**, in its ruling in **1963**, rejected his petition categorically, holding that "tribal identity is not religion-based," that it rests on ethnic and community kinship ties, and that "an Oraon remains an Oraon" regardless of whether he is Hindu, Christian, or Buddhist.
  पटना उच्च न्यायालय ने अपने **1963** के निर्णय में उनकी याचिका को स्पष्ट रूप से अस्वीकार करते हुए कहा था कि "जनजातीय पहचान धर्म आधारित नहीं होती," बल्कि यह जातीय और सामुदायिक संबंधों पर आधारित होती है, तथा "एक उराँव, उराँव ही रहता है," चाहे वह हिंदू हो, ईसाई हो या बौद्ध।
- The High Court further observed that, by and large, converted Adivasis continued to participate in community festivals and celebrations, and joined others in raising concerns common to all Adivasi communities.
  उच्च न्यायालय ने आगे यह भी कहा कि सामान्यतः धर्मांतरित आदिवासी सामुदायिक उत्सवों और आयोजनों में भाग लेते रहे तथा सभी आदिवासी समुदायों से संबंधित सामान्य मुद्दों को उठाने में अन्य लोगों के साथ शामिल रहे।

A campaign of cooption
समावेशन के माध्यम से आत्मसात करने का अभियान

- Adivasis are fully entitled to choose their religion under **Article 25** of the Constitution, which guarantees freedom of conscience and religion.
  आदिवासियों को संविधान के **अनुच्छेद 25** के अंतर्गत अपना धर्म चुनने का पूर्ण अधिकार प्राप्त है, जो अंतःकरण और धर्म की स्वतंत्रता की गारंटी देता है।

The urgent issues Adivasis face
आदिवासियों के समक्ष उपस्थित तात्कालिक समस्याएँ

- **Birsa Munda's Ulgulan** was a revolt against colonial rule — and notably, he broke with Christian missionaries precisely because he saw them as instruments of that rule.
  बिरसा मुंडा का उलगुलान औपनिवेशिक शासन के विरुद्ध विद्रोह था — और विशेष रूप से उन्होंने ईसाई मिशनरियों से संबंध इसलिए तोड़ लिया था क्योंकि वे उन्हें औपनिवेशिक शासन का उपकरण मानते थे।
- The urgent issues before Adivasis are the sabotage of the **Forest Rights Act**, the virtual elimination of the rights of the gram sabha, the subversion of the **Panchayat (Extension to Scheduled Areas), or PESA**, the huge backlog in employment in reserved posts, the pathetic condition of Adivasi student hostels and arrears in scholarship payments, and the continuing lack of civic and health facilities in Adivasi areas, to name a few.
  आदिवासियों के समक्ष तात्कालिक समस्याओं में **वन अधिकार अधिनियम** को निष्प्रभावी बनाना, ग्राम सभा के अधिकारों का लगभग समाप्त कर दिया जाना, **पंचायत (अनुसूचित क्षेत्रों तक विस्तार) अधिनियम अर्थात् PESA** को कमजोर करना, आरक्षित पदों में रोजगार का भारी बैकलॉग, आदिवासी छात्रावासों की दयनीय स्थिति, छात्रवृत्ति भुगतान में बकाया राशि तथा आदिवासी क्षेत्रों में नागरिक एवं स्वास्थ्य सुविधाओं की निरंतर कमी जैसी समस्याएँ शामिल हैं।

01J6	Towards a dialogue on adolescent sexuality किशोर यौनिकता पर संवाद की ओर

Towards a dialogue on adolescent sexuality

GS I: Society

A recent judgment of the Supreme Court of India, allowing the medical termination of pregnancy at 28 weeks, has received significant media attention. Much of this attention stems from the arguments advanced on behalf of the All India Institute of Medical Sciences (AIIMS), which has sought for a reconsideration of the judgment.

Doctors at AIIMS argued that what the court described as a medical termination of pregnancy would, in reality, involve delivering a living child at 28 weeks, one likely to be born with serious medical complications, long-term co-morbidities and disabilities. They asked that the delivery be pushed by six weeks to improve the child's chances of survival. These arguments were rejected by the court in rather strong terms.

A doctor's ethical burden

The nature of the doctors' argument is not inherently distinct from claims about a (much younger) foetus' interest in being carried to term. In both cases, more time in the womb increases the chances of survival outside it. However, since a 28-week foetus is at a more advanced stage of gestation, two things change about the claim.

First, doctors are better able to predict both the foetus' chances of survival and the medical complications it may face, making concerns about neo-natal care and future health more concrete. Second, and not unrelatedly, the ethical burden of the doctor who must perform the delivery increases significantly. Where a foetus is not viable, the doctor's sole obligation is to the pregnant woman. But where a living child may be delivered, the doctor's obligations extend to that child as well. A doctor may, therefore, experience the procedure not merely as an abortion, but as a medically induced premature delivery that immediately creates an obligation to preserve life.

Shraddha Chaudhary

Assistant Professor, School of Law, BML Munjal University

Policies such as the ban on condom advertisements between 6.00 a.m. and 10.00 p.m., and a generally repressive culture around sex brush questions of sex and sexuality under the carpet

While the court's order protects her from legal action, it does not extinguish her ethical and moral obligations as a doctor and as a human being.

None of this necessarily undermines the court's decision. Faced with an unwed minor who had reportedly attempted suicide twice, the court understandably prioritised her reproductive autonomy and well-being. But the doctors' objections, though framed as concern for the unborn child, also reflect a potent anxiety: the ethical burden placed on medical professionals asked to perform such procedures at the edge of foetal viability. This burden need not change how we think about the outcome of the case, but it deserves to be acknowledged for the ethical tensions underlining it.

On adolescent sexual activity

These ethical tensions are not accidental or anomalous. The immense trauma endured by the unwed minor, the predicament of the unborn but viable foetus, and the ethical burden of the doctors are all symptomatic of a deeper structural issue. Cases like these arise because of a serious and largely unnoticed failure of the state to deal appropriately with the phenomenon of teenage sex. In this case, a de-facto consensual sexual relationship between a 15-year-old girl and her 17-year-old partner resulted in pregnancy. The pregnancy went unnoticed until the minor's mother reportedly observed 'an unusual heaviness' in her abdomen, by which time it was already too advanced to terminate without court intervention. This is because the Medical Termination of Pregnancy Act, as amended in 2021, does not allow abortions beyond 24 weeks even in exceptional circumstances.

The Indian state's approach to the issue has largely been one of blanket criminalisation: all sexual activity involving minors is treated as a criminal offence, regardless of whether it involves coercion, exploitation, or de-facto consensual sexual activity between adolescents. Studies from the U.S. have shown that abstinence-only policies fail to prevent adolescents from having sex. Empirical studies on the Protection of Children from Sexual Offences Act, 2012 (POCSO) in India have also repeatedly shown that nearly 10-15% of all cases before the POCSO special courts involve de-facto consensual relationships, and there is nothing to suggest that the law manages to deter such sex amongst adolescents.

If anything, this criminalisation works in tandem with the absence of adequate and comprehensive sex education in educational institutions.

Policies such as the ban on condom advertisements between 6.00 a.m. and 10.00 p.m., and a generally repressive culture around sex brush questions of sex and sexuality under the carpet. Instead of teaching adolescents the essentials of safe sex, menstruation, sexually transmitted diseases and pregnancy, the answer to all questions around sex and sexuality is reduced to a simplistic "don't do it". However, preventing cases such as this is more likely to require comprehensive sex education and an emphasis on safe sexual practices.

The way forward

Such policies require a more nuanced conversation around adolescent sexuality, in which we are willing to acknowledge that de-facto consensual sexual interactions involving adolescents exist and should not be conflated with instances of child rape and exploitation. They also require a commitment to steady long-term measures, which may not provide short-term rhetorical gains.

Thus, if our concern is truly the well-being of adolescents, the solution is not a refusal to acknowledge their sexuality but a commitment to engage with it honestly and meaningfully.

01J6. Towards a dialogue on adolescent sexuality
किशोर यौनिकता पर संवाद की ओर

- **A recent judgment of the Supreme Court of India, allowing the medical termination of pregnancy at 28 weeks, has received significant media attention.**
  भारत के सर्वोच्च न्यायालय के एक हालिया निर्णय, जिसमें 28 सप्ताह पर गर्भसमापन की अनुमति दी गई, ने व्यापक मीडिया ध्यान आकर्षित किया है।
- However, since a **28-week foetus** is at a more advanced stage of gestation, two things change about the claim.
  किन्तु चूँकि **28 सप्ताह का भ्रूण** गर्भावस्था के अधिक विकसित चरण में होता है, इसलिए इस दावे के संबंध में दो महत्वपूर्ण परिवर्तन उत्पन्न होते हैं।
- First, doctors are better able to predict both the foetus' chances of survival and the medical complications it may face, making concerns about neo-natal care and future health more concrete.
  पहला, चिकित्सक भ्रूण के जीवित रहने की संभावना तथा संभावित चिकित्सीय जटिलताओं का अधिक सटीक अनुमान लगाने में सक्षम होते हैं, जिससे नवजात देखभाल और भविष्य के स्वास्थ्य संबंधी चिंताएँ अधिक वास्तविक और स्पष्ट हो जाती हैं।
- The immense trauma endured by the unwed minor, the predicament of the unborn but viable foetus, and the ethical burden of the doctors are all symptomatic of a deeper structural issue.
  अविवाहित नाबालिग द्वारा झेला गया गहरा आघात, अजन्मे किंतु जीवित रहने में सक्षम भ्रूण की स्थिति, तथा चिकित्सकों पर पड़ा नैतिक दायित्व — ये सभी एक गहरे संरचनात्मक संकट के लक्षण हैं।
- This is because the **Medical Termination of Pregnancy Act**, as amended in 2021, does not allow abortions beyond 24 weeks even in exceptional circumstances.
  ऐसा इसलिए है क्योंकि 2021 में संशोधित **गर्भसमापन चिकित्सा अधिनियम (Medical Termination of Pregnancy Act)** असाधारण परिस्थितियों में भी 24 सप्ताह के बाद गर्भपात की अनुमति नहीं देता।
- Studies from the **U.S.** have shown that abstinence-only policies fail to prevent adolescents from having sex.
  अमेरिका के अध्ययनों से यह स्पष्ट हुआ है कि केवल संयम आधारित नीतियाँ किशोरों को यौन संबंध बनाने से रोकने में असफल रहती हैं।
- Empirical studies on the **Protection of Children from Sexual Offences Act, 2012 (POCSO)** in India have also repeatedly shown that nearly 10-15% of all cases before the POCSO special courts involve de-facto consensual relationships, and there is nothing to suggest that the law manages to deter such sex amongst adolescents.
  भारत में **बाल यौन अपराध संरक्षण अधिनियम, 2012 (POCSO)** पर किए गए अनुभवजन्य अध्ययनों ने बार-बार यह दर्शाया है कि POCSO विशेष न्यायालयों के समक्ष आने वाले लगभग 10-15% मामलों में वास्तविक सहमति पर आधारित संबंध शामिल होते हैं, और ऐसा कोई प्रमाण नहीं है जिससे यह संकेत मिले कि यह कानून किशोरों के बीच ऐसे संबंधों को रोकने में सफल रहा है।
- Policies such as the ban on condom advertisements between 6.00 a.m. and 10.00 p.m., and a generally repressive culture around sex brush questions of sex and sexuality under the carpet.
  सुबह 6 बजे से रात 10 बजे तक कंडोम विज्ञापनों पर प्रतिबंध जैसी नीतियाँ तथा यौन विषयों के प्रति दमनकारी सामाजिक संस्कृति, यौन संबंधी प्रश्नों और यौनिकता को दबाने का कार्य करती हैं।
- Instead of teaching adolescents the essentials of safe sex, menstruation, sexually transmitted diseases and pregnancy, the answer to all questions around sex and sexuality is reduced to a simplistic "don't do it".
  किशोरों को सुरक्षित यौन संबंध, मासिक धर्म, यौन संचारित रोगों और गर्भधारण की मूलभूत जानकारी देने के

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in

Website : patrioticias.in

स्थान पर, यौन और यौनिकता से जुड़े सभी प्रश्नों का उत्तर केवल एक सरल "यह मत करो" तक सीमित कर दिया गया है।

- However, preventing cases such as this is more likely to require comprehensive sex education and an emphasis on safe sexual practices.
  किन्तु इस प्रकार के मामलों की रोकथाम के लिए व्यापक यौन शिक्षा और सुरक्षित यौन व्यवहार पर बल देना अधिक आवश्यक प्रतीत होता है।

The way forward
आगे की राह

- Such policies require a more nuanced conversation around adolescent sexuality, in which we are willing to acknowledge that de-facto consensual sexual interactions involving adolescents exist and should not be conflated with instances of child rape and exploitation.
  ऐसी नीतियों के लिए किशोर यौनिकता पर अधिक संतुलित और सूक्ष्म संवाद की आवश्यकता है, जिसमें हम यह स्वीकार करने के लिए तैयार हों कि किशोरों के बीच वास्तविक सहमति पर आधारित यौन संबंध अस्तित्व में हैं और उन्हें बाल बलात्कार तथा शोषण की घटनाओं के साथ मिश्रित नहीं किया जाना चाहिए।

Padma Barrage: another barrier

GS I: Geography

Vasudevan Mukunth

Bangladesh has approved a large river engineering project called the Padma barrage, on the Padma river, which is Bangladesh's stretch of the Ganga, in Rajbari district. It is Bangladesh's attempt to partially re-engineer the hydrology of its southwest region, which has become prone to drought after decades of reduced seasonal flows linked to the Farakka barrage upstream in India.

The barrage will be 2.1-km-long and have 78 spillway gates, undersluices, navigation locks, fish passages, and associated embankments. It will impound roughly 2.9 billion cubic metres of water and includes 113 MW of hydropower generation. According to Bangladesh, the project will affect roughly 37% of the country's land area and irrigate around 2.88 million ha of farmland.

While the barrage's supporters see a long-delayed national water security project in the Padma barrage, critics have said mega-barrages often underperform, alter sediment flows in unpredictable ways, and can create new ecological problems, such as water-logging and damage to fisheries. Some environmental groups have also criticised the speed of approval and called for greater public scrutiny.

As Mehebub Sahana at the University of Manchester and Bayes Ahmed at University College London have argued, the project highlights how South Asian countries are building more barriers to rivers rather than removing them. The regional turn towards unilateral river engineering is at odds with Europe and North America tearing down obsolete dams and culverts to restore rivers' free flow. In 2025 alone, 21 European countries removed a record 603 barriers.

Boats on the Padma river in 1860. PUBLIC DOMAIN

01J6. Padma Barrage: another barrier
पद्मा बैराज: एक और अवरोध

- **Bangladesh has approved a large river engineering project called the Padma barrage, on the Padma river, which is Bangladesh's stretch of the Ganga, in Rajbari district.**

बांग्लादेश ने राजबाड़ी ज़िले में स्थित पद्मा नदी, जो गंगा का बांग्लादेशी भाग है, पर पद्मा बैराज नामक एक विशाल नदी अभियांत्रिकी परियोजना को स्वीकृति प्रदान की है।

- The barrage will be **2.1-km-long** and have **78 spillway gates**, undersluices, navigation locks, fish passages, and associated embankments.

यह बैराज **2.1 किलोमीटर लंबा** होगा तथा इसमें **78 स्पिलवे द्वार**, अंडरस्लुइस, नौवहन लॉक, मछली मार्ग तथा संबंधित तटबंध होंगे।

- According to Bangladesh, the project will affect roughly **37%** of the country's land area and irrigate around **2.88 million ha** of farmland.

बांग्लादेश के अनुसार, यह परियोजना देश के लगभग **37%** भू-क्षेत्र को प्रभावित करेगी तथा लगभग **2.88 मिलियन हेक्टेयर** कृषि भूमि की सिंचाई करेगी।

- While the barrage's supporters see a long-delayed national water security project in the **Padma barrage**, critics have said mega-barrages often underperform, alter sediment flows in unpredictable ways, and can create new ecological problems, such as water-logging and damage to fisheries.

जहाँ बैराज के समर्थक **पद्मा बैराज** को लंबे समय से लंबित राष्ट्रीय जल सुरक्षा परियोजना के रूप में देखते हैं, वहीं आलोचकों का कहना है कि विशाल बैराज अक्सर अपेक्षित प्रदर्शन नहीं कर पाते, तलछट प्रवाह को अप्रत्याशित रूप से बदल देते हैं तथा जलभराव और मत्स्य संसाधनों को क्षति जैसी नई पारिस्थितिक समस्याएँ उत्पन्न कर सकते हैं।

- As **Mehebub Sahana** at the **University of Manchester** and **Bayes Ahmed** at **University College London** have argued, the project highlights how South Asian countries are building more barriers to rivers rather than removing them.

जैसा कि **यूनिवर्सिटी ऑफ मैनचेस्टर** के **मेहेबुब सहाना** तथा **यूनिवर्सिटी कॉलेज लंदन** के **बेयस अहमद** ने तर्क दिया है, यह परियोजना दर्शाती है कि दक्षिण एशियाई देश नदियों पर अवरोध हटाने के बजाय अधिक अवरोध निर्मित कर रहे हैं।

- The regional turn towards unilateral river engineering is at odds with **Europe** and **North America** tearing down obsolete dams and culverts to restore rivers' free flow.

एकपक्षीय नदी अभियांत्रिकी की दिशा में यह क्षेत्रीय परिवर्तन **यूरोप** और **उत्तरी अमेरिका** की उस प्रवृत्ति के विपरीत है, जहाँ नदियों के मुक्त प्रवाह को पुनर्स्थापित करने के लिए अप्रचलित बाँधों और कल्वर्टों को हटाया जा रहा है।

- In **2025** alone, **21 European countries** removed a record **603 barriers**.

केवल **2025** में ही **21 यूरोपीय देशों** ने रिकॉर्ड **603 अवरोधों** को हटाया।

Questions and Answers to the previous day's daily quiz: 1. Tibetans and Sherpas call Mt Everest Chomolungma. What does that mean? **Ans: Mother Goddess of the Earth**
2. This is a perilous area on Mt Everest where most mountaineers struggle to carry on because the air contains only about one-third of the oxygen available at sea level. What is it called? **Ans: The death zone**
3. Before the Great Trigonometrical Survey of India, which peak was considered the highest peak in the world? Also, which State government bans mountaineering expeditions from its side on this mountain, which is believed to be sacred? **Ans: Kanchenjunga, Sikkim**
4. She was the first woman to summit Mt Everest. A mountain range on Pluto is named after her. Name her. **Ans: Junko Tabei**
5. Humanity has littered the entire planet, from the peak of Mt Everest to the deepest point on earth. In both places, microplastics have been found. Name the deepest point. **Ans: Mariana Trench**
Visual: This man served as Surveyor General of India. He never saw the Everest but he is associated with it. Name him. **Ans: George Everest**
Early Birds: Utsav Kaushal | Suchit Narottam | K.N. Viswanathan | Dodo Jayaditya | Sukdev Shet

01J6. QUIZ: Mount Everest

1. Chomolungma — Mother Goddess of the Earth

- Tibetans and Sherpas traditionally call **Mount Everest** "Chomolungma" or "Qomolangma".
- The term means **"Mother Goddess of the Earth"** in the Tibetan language.
- The name reflects the spiritual and sacred significance of the mountain in Himalayan Buddhist culture.
- Sherpa communities living in Nepal and Tibet worship the mountain as a divine entity and perform rituals before expeditions.
- In Nepal, Mount Everest is also known as **Sagarmatha**, meaning "Forehead of the Sky".

The mountain lies in the **Mahalangur Himal** sub-range of the Himalayas on the Nepal–China border.
According to the latest Nepal-China joint announcement of 2020, Everest's official height is **8,848.86 metres**.

2. The Death Zone

- The "**Death Zone**" refers to altitudes above approximately **8,000 metres** on mountains such as Mount Everest.
- At this height, atmospheric oxygen levels are extremely low, containing nearly one-third of the oxygen available at sea level.
- Human bodies cannot acclimatise permanently under such conditions.
- Climbers experience severe risks such as hypoxia, cerebral oedema, pulmonary oedema, frostbite, and exhaustion.

3. Kanchenjunga and Sikkim's Ban on Expeditions

- Before the **Great Trigonometrical Survey of India**, many geographers considered **Kanchenjunga** the highest mountain in the world.
- **Kanchenjunga has a height of 8,586 metres and is currently the third-highest mountain globally**.
- It is located on the border between **India's Sikkim State and Nepal**.
- The Great Trigonometrical Survey later scientifically established **Mount Everest** as the world's highest peak.
- Kanchenjunga is considered sacred by the people of Sikkim, especially the Lepcha and Buddhist communities.
- Because of its religious importance, the **Government of Sikkim** prohibits mountaineers from stepping on the actual summit from the Indian side.
- Climbers traditionally stop a few feet below the peak to respect local beliefs.
- The Kanchenjunga landscape is also protected through the **Khangchendzonga National Park**, a UNESCO World Heritage Site.

4. Junko Tabei — First Woman to Summit Everest

- **Junko Tabei** of Japan became the first woman to successfully summit Mount Everest on **May 16, 1975**.
- Junko Tabei later climbed the highest peaks on all seven continents, completing the "Seven Summits".

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- A mountain range on the dwarf planet **Pluto** has been named "Tabei Montes" in her honour by the International Astronomical Union.

5. Mariana Trench — Deepest Point on Earth

- The **Mariana Trench** is the deepest known point on Earth's oceans.
- It is located in the western Pacific Ocean near the Mariana Islands.
- Its deepest section is called the **Challenger Deep**, which reaches nearly **10,900 to 11,000 metres** below sea level according to modern oceanographic studies.
- Scientific expeditions have discovered microplastics and human-generated pollutants even at this extreme depth.
- Studies published in marine science journals show that plastic contamination has spread across the entire planet.
- Microplastics have also been found on Mount Everest, proving the global reach of pollution.
- The Mariana Trench was formed due to the subduction of the Pacific Plate beneath the Mariana Plate.

6. George Everest — Surveyor General of India

- **Sir George Everest** served as the **Surveyor General of India** from 1830 to 1843.

- He played an important role in the **Great Trigonometrical Survey of India**, one of the most ambitious scientific surveys of the nineteenth century.
- The survey aimed to accurately measure the Indian subcontinent and Himalayan peaks.
- Interestingly, George Everest himself never saw Mount Everest.
- After his tenure, the mountain known earlier as "Peak XV" was identified as the world's highest peak by surveyor **Radhanath Sikdar** in 1852.
- In 1865, the Royal Geographical Society officially named the mountain "Mount Everest" in George Everest's honour.
- Modern satellite and GPS technology have greatly improved mountain measurements compared to nineteenth-century survey methods.

Ukraine hits Russian energy sites, denies striking nuclear plant

GS I: Geography

Associated Press

KYIV

Ukraine denied Moscow's claims on Sunday that a Ukrainian drone struck the Russian-controlled Zaporizhzhia nuclear plant, as Kyiv launched fresh strikes overnight on Russian energy sites.

Ukraine's General Staff on Sunday said Ukrainian drones had struck the Saratov oil refinery in southwestern Russia, causing a "large-scale fire". It said the extent of the damage was being clarified, and claimed the refinery has been supplying Moscow's war effort.

Kyiv denied a Russian claim that a Ukrainian drone struck the Zaporizhzhia nuclear plant, Europe's largest.

The Zaporizhzhia nuclear power plant in Russian-held southern Ukraine. AFP

Russia's state nuclear energy company, Rosatom, said on Saturday that the drone exploded after tearing a hole in the wall of a turbine hall, and accused Ukraine of a "deliberate" attack.

01J6. Ukraine hits Russian energy sites, denies striking nuclear plant

यूक्रेन ने रूसी ऊर्जा स्थलों पर हमला किया, परमाणु संयंत्र पर हमले से किया इनकार

- Kyiv denied a Russian claim that a Ukrainian drone struck the **Zaporizhzhia nuclear plant**, Europe's largest.

कीव ने रूस के उस दावे को खारिज कर दिया कि एक यूक्रेनी ड्रोन ने यूरोप के सबसे बड़े **जापोरिज्झिया परमाणु संयंत्र** पर हमला किया।

- Russia's state nuclear energy company, **Rosatom**.

रूस की सरकारी परमाणु ऊर्जा कंपनी **रोसाटॉम** ने शनिवार को कहा कि ड्रोन टरबाइन हॉल की दीवार में छेद करने के बाद विस्फोट हुआ और उसने यूक्रेन पर "जानबूझकर" हमला करने का आरोप लगाया।

The apex court rings its own chain

The Supreme Court's reliance on *suo motu* cognisance has turned a once 'rare but highly visible' jurisdiction into a recurring instrument shaped by primetime attention and media reports; while it keeps 'ringing' its own chain through televised listings and supervision, the trial courts below it continue doing the work

GS II: Polity

LETTER & SPIRIT

V. Venkatesan

In 1605, on his accession, the Mughal Emperor Jahangir fastened a chain outside his palace. Any subject denied justice by his administration could pull the chain and reach the emperor directly. The chain was, in conception, a remedy against the bureaucracy. The Indian Supreme Court is now, in its *suo motu* cognisance of individual criminal cases, the bureaucracy itself, ringing its own version of the chain. Each televised listing is the sound of the apex court calling attention to itself.

Media and motive

The latest instance is the court's *suo motu* cognisance of Twisha Sharma's death, registered under the title 'In Re Alleged Institutional Bias and Procedural Discrepancies in the Unnatural Death of a Young Girl at Her Matrimonial Home'. The title prejudges its own inquiry. Institutional bias has not been judicially established at any level. The apex court's own office report, signed by the Assistant Registrar on May 23, records the basis of registration. The case was registered, the document says, 'based on media reports and other attending circumstances'. Two days later, the same bench appealed to the media to refrain from recording statements of witnesses. A court that acts on press reports while admonishing the journalists who filed them is, at the same moment, both consumer and critic of the same source.

The ground on which the apex court arrived was not vacant. A magistrate in Bhopal had remanded the husband, a practising advocate, to seven days of police custody. The Madhya Pradesh High Court had directed a second autopsy by an AIIMS Delhi team. The Bar Council of India had suspended the husband's licence. The State government had proposed transferring the investigation to the Central Bureau of Investigation (CBI) before the apex listing. The institutions whose bias the apex title alleges had been moving against the accused for nearly a fortnight.

Marc Galanter and Vasujith Ram put the central question to this reflex with care. Their study appears in A Qualified Hope (Cambridge University Press, 2019). Why does the response of the higher judiciary to executive or police failure take 'the form of these singular heroic interventions rather than promoting some institutional shake-up, some initiative to empower and equip courts lower in the judicial hierarchy'? Their diagnosis was unsparing. The reflex carries, they wrote, 'an echo of the disdain with which higher courts in India frequently treat the efforts of the lower judiciary'.

Easier path

Suo motu cognisance, in matters of this kind, is the easier of the two paths open to the apex court. The harder path is the slow, unspectacular work of reforming the judiciary it heads. The first requires only the bench's decision to list the matter. The second requires sustained cooperation: with the High Courts on case management and supervision under Article 235 (control over subordinate courts), with State governments on funding trial-court infrastructure, with the executive on judicial appointments, and with the National Judicial Academy on training. The asymmetry between the energies devoted to the two paths is what produces the diagnosis Galanter and Ram named.

Where the easier path is taken, the court chooses persuasion over compulsion. The apex bench has, in *Sahara India Real Estate Corporation v. SEBI* (2012), a five-judge Constitution Bench authority on media trial. Sahara permits a court to issue a postponement order against media publication. The test is a real and substantial risk of prejudice to the administration of justice. The order is available only where no less restrictive means will work. The doctrine is settled. In the Twisha matter, the bench had every occasion to invoke it. It chose instead to request the media not to record statements of potential witnesses. A request from the apex court carries moral weight. But it is not the legal instrument it has at hand for this very problem.

The post-2019 record is unkind to the pro-*suo-motu* case. In the R.G. Kar matter, the Supreme Court registered cognisance on August 18, 2024. Sanjay Roy had been arrested by the Kolkata Police eight days earlier. The Calcutta High Court had handed the probe to the CBI on August 13, 2024. The Sealdah trial court convicted Roy in January 2025 and sentenced him to life imprisonment. The trial judge did the work. Apex monitoring of CBI status reports did not.

Hathras is closer to the Bhopal facts and more instructive. The Lucknow bench of the Allahabad High Court registered the case *suo motu* in October 2020. The Supreme Court, after entertaining transfer petitions, handed monitoring back to the High Court within weeks. That earlier bench saw the architectural point: the High Court was already in motion, and the apex role was supervisory. In July 2024, following the Hathras Satsang stampede that claimed 121 lives, the court declined a PIL. The bench said that the High Court was equipped to deal with the case. The same principle applies in Bhopal too.

Scarce attention

Lakhimpur Kheri sharpens the matter. The apex court took cognisance in October 2021 and, in April 2022, set aside the High Court's bail order for the main accused, Ashish Mishra. It then eased him back into liberty. Interim bail came in 2023. Regular bail followed in 2024. As of early 2026, the trial court had examined only 44 of 131 witnesses. In Manipur, the *suo motu* case over the viral video from July 2023 has yet to produce a conviction. Apex supervision has not been the route to faster justice.

A second observation runs alongside. In 2019, Galanter and Ram called *suo motu* 'rare but highly visible'. The first half of that description has lapsed. What was once a residual jurisdiction is now a recurring instrument. A trigger sequence has begun to repeat. Sustained primetime attention is followed by cognisance. The Solicitor General has now confirmed the sequence in open court. Appearing for the Union in the Twisha matter, he told the bench that 'it is also because of this media intervention that a lot of progress has happened'.

The numbers since the chapter, authored by Galanter and Ram, went to press confirm the rule. The Supreme Court Observer, working from the apex court's own Case Status records, counts 35 *suo motu* matters in the five years from 2020 to 2024.

The preceding fifteen years had seen only 31 in total. The annual figures, excluding contempt, were 10 in 2020, eight in 2021, one in 2022, four in 2023, and 12 in 2024. The trend continues. In 2025, the court's numbering reached 10 civil *suo motu* writs and three criminal matters. Nine of the 10 civil matters are publicly listed. By May 25 this year, the count already stood at four civil and four criminal matters. Both totals exclude *suo motu* transfer and contempt, which exercise distinct constitutional powers. The criminal count, in particular, has risen sharply. Four months and three weeks have already exceeded the criminal count for all of 2025.

Judicial attention is a scarce resource. The National Crime Records Bureau recorded 6,450 dowry deaths in 2022, with convictions in only 11 to 17 per cent of cases. The court has the capacity to list one. The criterion of selection is, on the present record, temporal rather than legal. Galanter and Ram closed their chapter with a question. They asked whether *suo motu* was 'an instance of effective use of the scarce resource of judicial attention'. The seven years since they wrote have not produced an easier answer.

None of this is to deny the seriousness of the Twisha Sharma matter. The accused's mother is a retired judge. The husband is a lawyer. The family of the deceased has reason to fear local proximity. The constitutional response to that fear is independent investigation under judicial supervision, conducted promptly. The court, however, disposed of the matter on the first day after taking note of the "narrative" in the media that a fair investigation was being denied on account of the involvement of the judiciary.

The chain Jahangir hung was a remedy against an unaccountable bureaucracy. The apex court is now that bureaucracy. Each televised listing is the sound it makes to draw attention to a failure it has the power, and the constitutional duty, to repair. Until the harder of its two paths is walked with the energy now devoted to the easier one, the chain will keep ringing. The trial courts below it will keep doing the work.

(V. Venkatesan is a journalist and legal researcher.)

GETTY IMAGES

THE GIST

- The ground on which the apex court arrived was not vacant, with the magistrate, the High Court, the Bar Council of India and the State government already acting in the Twisha Sharma case.
- The harder path before the apex court is the slow, unspectacular work of reforming the judiciary through better case management, trial-court infrastructure, appointments and training.
- Judicial attention is a scarce resource, but sustained primetime attention is increasingly followed by cognisance, raising questions about the use of that attention.

GS II: Governance

Language decorum

School education should not be the site of a cultural battle

The Supreme Court of India has issued notices to the Union Government, the CBSE, and the NCERT, directing them to file a comprehensive report on their logistical preparedness to implement a three-language formula in all CBSE schools for Class 9 students from July 1, 2026. On May 27, while hearing petitioners challenging the CBSE move, the Court declined to grant an immediate stay on the policy but acknowledged that concerns over "hardship and inconvenience" warranted review. The Court will hear arguments on July 15 and 16. The casual manner in which the government is using the CBSE to enforce its contentious language policy once again shows complete disregard for students, teachers, and parents. On May 15, the CBSE had issued a circular mandating the study of three languages for Class 9 students from July 1, citing alignment with the NEP 2020 and the National Curriculum Framework for School Education 2023. At least two of the three must be native Indian languages. Foreign languages such as French or German could only be taken as a third language if the first two were Indian, or alternatively as an optional fourth subject. In a meagre effort to camouflage the hardship unleashed on the students, the CBSE exempted the third language from the Class 10 Board examination, which would instead be assessed through school-based internal evaluations, though the marks would still appear on the final certificate.

Barely weeks earlier, the CBSE had stated that the third-language requirement would be deferred until the 2029-30 academic year. The abrupt turnabout can only be explained as a political decision. The move is being challenged in the Court on multiple grounds, including constitutional ones. The petitioners argue that language is a matter of personal choice and cannot be imposed by the state. It is also being pointed out that the NEP 2020, in whose name the mandate is being enforced, promises flexibility and guarantees that no language shall be imposed on any student or State. The petitioners also argue that the CBSE, as an executive body, lacks the authority to impose such a sweeping educational mandate without backing from parliamentary legislation, regardless of what the NEP says, being an executive policy intent and not a statute. Parents and teachers are alarmed about the added pressure on students just before their Board examinations. School administrators have flagged a shortage of trained language teachers and the unavailability of appropriate textbooks. Turning school education into a cultural battleground is not helping India's ambition to become a global reservoir of advanced human resources. The Centre should course-correct before the Court takes up the case again.

01J6. Language decorum
भाषाई मर्यादा

School education should not be the site of a cultural battle.

विद्यालयी शिक्षा को सांस्कृतिक संघर्ष का क्षेत्र नहीं बनाया जाना चाहिए।

- The **Supreme Court of India** has issued notices to the Union Government, the **CBSE**, and the **NCERT**, directing them to file a comprehensive report on their logistical preparedness to implement a **three-language formula** in all CBSE schools for Class 9 students from July 1, 2026.

भारत के सर्वोच्च न्यायालय ने केंद्र सरकार, **CBSE** और **NCERT** को नोटिस जारी करते हुए निर्देश दिया है कि वे 1 जुलाई 2026 से कक्षा 9 के विद्यार्थियों के लिए सभी CBSE विद्यालयों में **त्रिभाषा सूत्र** लागू करने संबंधी अपनी व्यवस्थागत तैयारी पर विस्तृत रिपोर्ट प्रस्तुत करें।

- On May 15, the **CBSE** had issued a circular mandating the study of three languages for Class 9 students from July 1, citing alignment with the **NEP 2020** and the **National Curriculum Framework for School Education 2023**.

15 मई को **CBSE** ने एक परिपत्र जारी कर 1 जुलाई से कक्षा 9 के विद्यार्थियों के लिए तीन भाषाओं का अध्ययन अनिवार्य कर दिया था, जिसका आधार **राष्ट्रीय शिक्षा नीति 2020 (NEP 2020)** तथा **राष्ट्रीय पाठ्यचर्या रूपरेखा 2023** के साथ सामंजस्य बताया गया।

- At least two of the three must be native Indian languages.

तीन भाषाओं में से कम-से-कम दो भारतीय भाषाएँ होना अनिवार्य होगा।

- Foreign languages such as French or German could only be taken as a third language if the first two were Indian, or alternatively as an optional fourth subject.

फ्रेंच या जर्मन जैसी विदेशी भाषाएँ केवल तभी तीसरी भाषा के रूप में ली जा सकती हैं, जब पहली दो भाषाएँ भारतीय हों, अथवा इन्हें वैकल्पिक चौथे विषय के रूप में चुना जा सकता है।

- In a meagre effort to camouflage the hardship unleashed on the students, the **CBSE** exempted the third language from the Class 10 Board examination, which would instead be assessed through school-based internal evaluations, though the marks would still appear on the final certificate.

विद्यार्थियों पर पड़ने वाले अतिरिक्त बोझ को छिपाने के एक सीमित प्रयास के रूप में **CBSE** ने तीसरी भाषा को कक्षा 10 बोर्ड परीक्षा से बाहर रखा, जिसका मूल्यांकन विद्यालय आधारित आंतरिक परीक्षाओं द्वारा किया जाएगा, यद्यपि उसके अंक अंतिम प्रमाणपत्र में अंकित रहेंगे।

- The petitioners argue that language is a matter of personal choice and cannot be imposed by the state.

याचिकाकर्ताओं का तर्क है कि भाषा व्यक्तिगत चयन का विषय है और इसे राज्य द्वारा थोप नहीं जा सकता।

- It is also being pointed out that the **NEP 2020**, in whose name the mandate is being enforced, promises flexibility and guarantees that no language shall be imposed on any student or State.
  यह भी इंगित किया जा रहा है कि **NEP 2020**, जिसके नाम पर यह अनिवार्यता लागू की जा रही है, लचीलापन प्रदान करने तथा किसी भी विद्यार्थी या राज्य पर कोई भाषा न थोपने की गारंटी देता है।
- The petitioners also argue that the **CBSE**, as an executive body, lacks the authority to impose such a sweeping educational mandate without backing from parliamentary legislation, regardless of what the **NEP** says, being an executive policy intent and not a statute.
  याचिकाकर्ताओं का यह भी तर्क है कि **CBSE**, एक कार्यपालिका निकाय होने के नाते, संसदीय कानून के समर्थन के बिना इतनी व्यापक शैक्षिक अनिवार्यता लागू करने का अधिकार नहीं रखता, चाहे **NEP** में कुछ भी कहा गया हो, क्योंकि वह केवल एक कार्यकारी नीति है, कोई विधिक अधिनियम नहीं।
- School administrators have flagged a shortage of trained language teachers and the unavailability of appropriate textbooks.
  विद्यालय प्रशासन ने प्रशिक्षित भाषा शिक्षकों की कमी तथा उपयुक्त पाठ्यपुस्तकों की अनुपलब्धता की ओर ध्यान आकर्षित किया है।

Nepal PM sparks row, says his country has encroached upon Indian territory

GS II: IR

Sanjeev Satgainya
KATHMANDU

Nepal Prime Minister Balendra Shah said on Sunday that Nepal too had encroached upon Indian territory, in what is considered to be the first such public statement by a head of government of the neighbouring country.

Mr. Shah was responding to a question in Parliament regarding the Kalapani region, which remains disputed between Nepal and India.

"You might find it strange, but I also learned only recently – after becoming Prime Minister – that it is not just India but Nepal too has encroached upon Indian territories in many places," Mr. Shah said, prompting an uproar in Parliament as the Opposition objected to the statement.

Kailash Yatra

Nepal and India have a long-pending boundary dispute over Lipulekh, Limpiyadhura, and Kalapani and the dispute resurfaced recently when India announced the revival of the Kailash Manasarovar Yatra pilgrimage via the Lipulekh route. Nepal then sent diplomatic notes to both India and China. India maintains that the territories are part of Uttarakhand.

Lawmakers from the Nepali Congress and the Nepali Communist Party demanded that Mr. Shah clarify where exactly Nepal has encroached upon Indian territory and sought the removal of his remarks from the record. "The Prime Minister said Nepal has encroached upon Indian territory," Nepali Congress Chief Whip Basana Thapa said. "Where exactly has this happened? The Prime Minister must make the House aware of this. This is a serious and objectionable statement."

Nepal Communist Party lawmaker Ramesh Malla said Mr. Shah's remarks could damage national integrity.

Sunday's address to Parliament was the first by Mr. Shah of the Rastriya Swatantra Party (RSP) since he took office on March 27 following the election held earlier that month, the first since the Gen Z protests in September last year.

He had previously faced criticism for his reluctance to address Parliament and his absence from House sessions.

Shaping the next chapter in India-Canada relations

GS II: IR

Chandrajit Banerjee
Director General, Confederation of Indian Industry

Trade, technology and trust mark a revitalised partnership

India and Canada are turning the page together, opening a vibrant new chapter as two democratic, multicultural, and innovation-driven nations. Both governments are signalling a fresh resolve to deepen cooperation and pursue common goals. Canadian Prime Minister Mark Carney's recent trip to India (February 27-March 2, 2026) and the just-concluded visit of India's Commerce and Industry Minister, Piyush Goyal, to Canada highlight the importance both nations attach to their relationship in an evolving global order. These engagements reflect the growing strategic depth of the India-Canada bilateral partnership, built around four strategic pillars - economic cooperation, technological collaboration, energy security, and people-to-people connectivity.

The economic promise of a stronger India-Canada partnership has never been brighter. Mr. Carney's visit also reignited talks for a Comprehensive Economic Partnership Agreement (CEPA), and both nations' determination to finalise it by the end of 2026, along with the ambitious target of reaching $50 billion in bilateral trade by 2030, signals a new era of economic confidence.

The view from Ottawa

For Canada, India represents not only a vast consumer market but also a cornerstone in its Indo-Pacific diversification ambitions. As shifting supply chains and global uncertainties reshape trade, India offers Canada a gateway to new opportunities and a chance to deepen ties with a vibrant economy. India's surging appetite for energy, infrastructure, technology, and advanced manufacturing dovetails with Canada's expertise in natural resources, clean energy, critical minerals, agriculture, and innovation. Moreover, India's rapid ascent as a global growth engine pairs strongly with Canada's wealth of resources, cutting-edge technologies, world-class universities, and robust investment capital. The ongoing talks on uranium, critical minerals, clean energy, and resilient supply chains further highlight just how strategically vital this partnership has become.

To this end, Mr. Goyal's visit to Canada comes at a particularly significant juncture in the bilateral economic relationship. Accompanied by a delegation of over 100 Indian industry leaders, the visit signals a renewed intent on both sides to strengthen economic engagement and impart fresh momentum to the CEPA negotiations. Equally important, it seeks to deepen business-to-business linkages, enhance investor confidence, and encourage industry on both sides to translate strategic intent into tangible commercial partnerships and long-term economic collaboration.

India is fast becoming a driving force in Canada's future prosperity. Indian companies have invested significantly in Canada and created thousands of jobs across the country, in sectors ranging from technology and life sciences to manufacturing and mining, highlighting the depth and diversification of bilateral business relations. This two-way business presence is an important marker of trust and long-term commercial confidence.

The diaspora link

The Indian diaspora stands as a living bridge between the two nations. Indian-origin entrepreneurs, professionals, academics, students, and community leaders have left an incredible mark on Canada's economic and social landscape. Their achievements reflect the spirit of entrepreneurship, innovation, and multiculturalism that both countries hold dear. The diaspora should be recognised as a strategic asset, ready to drive trade, investment, innovation, talent exchange and cultural understanding.

Meanwhile, Canadian pension funds are supporting India's growth story, investing in everything from infrastructure and logistics to clean energy, financial services, and digital ventures. This vibrant two-way investment proves that when these economies engage, both nations reap the rewards of growth, innovation, and opportunity.

Strengthening Indo-Pacific cooperation

The India-Canada partnership resonates far beyond their borders, carrying weight across the Indo-Pacific. Canada's Indo-Pacific strategy places India at its heart, recognising its economic potential, youthful population, and strategic clout. Both nations champion a free, open, inclusive, and rules-based region. By joining forces in maritime security, advanced technologies, artificial intelligence, clean energy, resilient supply chains, and climate action, they can drive prosperity at home and stability throughout the region.

The path ahead calls for steady engagement, trust, and a relentless focus on real-world outcomes. The most resilient economic partnerships are built on lasting commercial interests and vibrant people-to-people connections. The momentum from the recent high-level visits shows that both countries are eager to invest in a shared future. The partnership must also become more inclusive for small and medium enterprises on both sides. As the backbone of their respective economies, these enterprises hold immense untapped potential to drive bilateral trade and investment.

India and Canada are natural allies, innovation collaborators, and pivotal players in shaping the Indo-Pacific's future. India's drive for growth, energy transformation, and manufacturing expansion opens a wealth of opportunities for Canadian businesses and investors. This is the moment to transform goodwill into action and promise into partnership. With shared vision and determination, these two nations can forge one of the decade's most influential economic alliances.

01J6. Shaping the next chapter in India-Canada relations
भारत-कनाडा संबंधों के अगले अध्याय को आकार देना

- **India and Canada are turning the page together, opening a vibrant new chapter as two democratic, multicultural, and innovation-driven nations.**
  भारत और कनाडा साथ मिलकर एक नया अध्याय आरंभ कर रहे हैं, जो दो लोकतांत्रिक, बहुसांस्कृतिक और नवाचार-प्रेरित राष्ट्रों के रूप में एक सशक्त नई शुरुआत का प्रतीक है।
- Both governments are signalling a fresh resolve to deepen cooperation and pursue common goals.
  दोनों सरकारें सहयोग को और गहरा करने तथा साझा लक्ष्यों की प्राप्ति के लिए नई प्रतिबद्धता का संकेत दे रही हैं।
- Canadian Prime Minister **Mark Carney's** recent trip to India (February 27-March 2, 2026) and the just-concluded visit of India's Commerce and Industry Minister, **Piyush Goyal**, to Canada highlight the importance both nations attach to their relationship in an evolving global order.
  कनाडा के प्रधानमंत्री **मार्क कार्नी** की हाल की भारत यात्रा (27 फरवरी-2 मार्च, 2026) तथा भारत के वाणिज्य एवं उद्योग मंत्री **पीयूष गोयल** की हाल ही में संपन्न कनाडा यात्रा इस बात को रेखांकित करती है कि बदलती वैश्विक व्यवस्था में दोनों देश अपने संबंधों को कितना महत्व देते हैं।
- Mr. Carney's visit also reignited talks for a **Comprehensive Economic Partnership Agreement (CEPA)**, and both nations' determination to finalise it by the end of 2026, along with the ambitious target of reaching **$50 billion** in bilateral trade by 2030, signals a new era of economic confidence.
  श्री कार्नी की यात्रा ने **व्यापक आर्थिक साझेदारी समझौते (CEPA)** पर वार्ता को पुनः गति प्रदान की, और 2026 के अंत तक इसे अंतिम रूप देने तथा 2030 तक द्विपक्षीय व्यापार को **50 अरब डॉलर** तक पहुँचाने के महत्वाकांक्षी लक्ष्य ने आर्थिक विश्वास के एक नए युग का संकेत दिया है।

The view from Ottawa
ओटावा का दृष्टिकोण

- Equally important, it seeks to deepen business-to-business linkages, enhance investor confidence, and encourage industry on both sides to translate strategic intent into tangible commercial partnerships and long-term economic collaboration.
  समान रूप से महत्वपूर्ण यह है कि यह यात्रा व्यापार-से-व्यापार संबंधों को और गहरा करने, निवेशकों के विश्वास को बढ़ाने तथा दोनों पक्षों के उद्योगों को रणनीतिक उद्देश्यों को ठोस व्यावसायिक साझेदारियों और दीर्घकालिक आर्थिक सहयोग में परिवर्तित करने के लिए प्रोत्साहित करती है।
- Indian companies have invested significantly in Canada and created thousands of jobs across the country, in sectors ranging from technology and life sciences to manufacturing and mining, highlighting the depth and diversification of bilateral business relations.
  भारतीय कंपनियों ने कनाडा में महत्वपूर्ण निवेश किया है तथा प्रौद्योगिकी, जीवन विज्ञान, विनिर्माण और खनन जैसे क्षेत्रों में देशभर में हजारों रोजगार सृजित किए हैं, जो द्विपक्षीय व्यापारिक संबंधों की गहराई और विविधता को दर्शाते हैं।

Israel captures Beaufort castle in Lebanon in its deepest incursion

Defence Minister Katz says Israel will hold the site while targeting 'thousands more homes' and Hezbollah infrastructure in southern Lebanon; the 12th century Crusader-built castle overlooks Litani river and has long-standing strategic importance

GS II: IR

Associated Press
BEIRUT

Israeli troops have captured a strategic mountain topped with a Crusader-built castle in southern Lebanon in the deepest incursion into the country in more than a quarter-century, the military said on Sunday.

The capture of Beaufort castle, near the city of Nabatiyeh, came after days of air strikes and intense fighting in nearby villages where Israeli troops fought Hezbollah members in the rugged area.

Its capture marks a major development in the latest Israel-Hezbollah war, which began on March 2 when Hezbollah fired rockets into northern Israel two days after the U.S. and Israel attacked its main backer, Iran.

Holding down the fort: Israeli soldiers operate at Beaufort Ridge in southern Lebanon on Sunday. REUTERS

"The occupation of Beaufort is a dramatic stage and a dramatic shift in the policies we are leading," Israeli Prime Minister Benjamin Netanyahu said.

Defence Minister Israel Katz wrote on X that they raised an Israeli flag over the castle. Israeli troops previously captured the castle in 1982 and held it until they withdrew from Lebanon in 2000.

"Twenty six years after the withdrawal from the security zone in Lebanon, the Israeli flag has returned to fly on the peaks that overlook the Galilee towns," Mr. Katz said at a memorial ceremony for Israeli soldiers killed in its previous occupation of southern Lebanon.

Mr. Katz said Israel intends to hold the castle as its troops work to destroy thousands more homes that he says were used by Hezbollah and other military infrastructure in southern Lebanon.

The Beaufort fortress, perched high atop Lebanon's rolling green hills and overlooking the Litani River, has been a strategic military asset for centuries.

Built as a Crusader castle around the 12th century on top of previous fortifications, it has also been used by Saladin's Jerusalem army, Mamluks, Ottomans, the French mandate, the Palestine Liberation Organisation and the Israeli military until 2000, when it was partially restored and opened to visitors.

Russia may use Belarus as launchpad for new Ukrainian offensive: experts

Ukrainian President Zelenskyy warns of an attack from Belarus; military cooperation between Moscow and Minsk increasingly worries Kyiv's allies; Lukashenko has backed Putin's war effort by hosting Russia's nuclear weapons, as well as producing munitions, and microchips for ballistic missiles

GS II: IR

Associated Press
TALLINN

An Iskander missile launched by a Belarusian crew from a firing range in Russia during joint nuclear drills (left); Alexander Lukashenko with Vladimir Putin during their meet earlier this month. AP

Over four years ago, Belarusian President Alexander Lukashenko allowed longtime ally Russia to use his territory to invade Ukraine. Now officials in Kyiv are warning that Mr. Lukashenko could again allow his land to serve as a launchpad for more attacks by the Kremlin's forces.

While Belarus has not contributed troops to battle, Mr. Lukashenko has backed President Vladimir Putin's war effort by hosting Russia's nuclear weapons and military infrastructure, as well as producing components for Moscow's military industries. Earlier this month, the countries held joint drills of nuclear forces involving Russian weapons deployed in Belarus.

Military cooperation between Moscow and Minsk is increasingly worrying Ukraine's allies.

When Mr. Putin began the full-scale invasion of Ukraine in 2022, Russian troops that gathered in Belarus under the guise of drills dashed toward Kyiv, only about 90 kilometres south of the border. The Russian leader's hope of capturing Kyiv quickly was shattered by staunch Ukrainian resistance.

A little over a month after the invasion, Russian troops that suffered heavy losses and struggled to maintain their supply lines pulled back from Kyiv and other areas they captured in northeastern Ukraine in what the Kremlin cast as a "goodwill gesture."

When Moscow tried to negotiate a quick end to the conflict weeks after its start, Belarus hosted the first talks between Russian and Ukrainian delegations. The talks moved to Istanbul but failed to produce a deal.

As the conflict became a war of attrition, Belarus has played a key role in supporting Moscow's war effort. Belarusian plants have produced important components, including microchips and other electronics, optical guidance systems, artillery munitions and heavy trucks that carry Russian ballistic missiles.

Kremlin's war machine

BELPOL, a group of former military and law enforcement officers who oppose Mr. Lukashenko, said the Belarusian industries have integrated into the Kremlin's war machine. It says that over 500 Belarusian plants are involved in manufacturing weapons and ammunition, repairing military equipment and providing logistics.

In the Gomel region that borders Ukraine, construction has begun of a big firing range and barracks for large numbers of troops, BELPOL head Uladzimir Zhyhar said.

Belarus, which also borders NATO members Latvia, Lithuania and Poland, has hosted some of Russia's tactical nuclear weapons. In December, Russia announced that its latest intermediate range nuclear-capable Oreshnik missile system entered service in Belarus.

Russia has used a conventionally armed version of the Oreshnik to strike facilities in Ukraine three times – in November 2024 and then again in January and earlier this month.

Ukraine's presidential envoy on sanctions policy, Vladyslav Vlasiuk, said fragments of the missile that Russia fired at Ukraine on May 24 contained microchips from Belarus. He urged Western allies to tighten sanctions enforcement against Belarus.

Nuclear doctrine

In 2024, the Kremlin revised its nuclear doctrine, placing Belarus under the Russian nuclear umbrella. Mr. Putin has said that Moscow will retain control of its nuclear weapons deployed in Belarus but would allow its ally to select the targets in case of conflict.

Earlier this month, Russia and Belarus held massive drills that included the delivery of nuclear warheads to missile units and launch preparations. As part of the exercise, a Belarusian missile crew test-fired a nuclear-capable Iskander missile from a range in southern Russia.

"Belarus lacks military sovereignty, and as soon as Moscow sees it as necessary for its strategy, Moscow will naturally use Belarus as a launchpad for a new invasion of Ukraine or some kind of armed conflict with NATO countries," Mr. Zhyhar said.

Last week, Ukrainian President Volodymyr Zelenskyy said his intelligence services had learned Moscow recently stepped-up efforts to "draw Belarus much deeper into the war and launch additional aggressive operations precisely from Belarusian territory." He said the target could be along the Chernihiv-Kyiv area or against a NATO country bordering Belarus.

Mr. Zelenskyy said he ordered the military and security agencies to prepare a response and strengthen northern defences. Mr. Lukashenko has denied any aggressive plans, declaring Belarus will not enter the conflict unless attacked.

Sergei Shoigu, Russia's former Defence Minister and now secretary of its Security Council, also rejected Mr. Zelenskyy's claim, describing it as a scare tactic to attract more Western aid for Kyiv.

But in a sign of growing Western concern, French President Emmanuel Macron spoke to Mr. Lukashenko on May 24 to underscore the risks for Belarus of being dragged into the war, their first call since the invasion began.

Belarus' Opposition leader-in-exile, Sviatlana Tsikhanouskaya, visited Kyiv last week and emphasised that "Belarus must never again become a springboard for aggression."

According to official data, Belarus' armed forces have 48,600 troops, a tiny force compared with Russia's 1.5 million. In case of war, Belarus is prepared to mobilise 290,000, but they would need weapons and training to become combat-ready.

'Carrot extract can make fake ghee dodge quality test'

GS III: S&T

Rahul Karmakar
GUWAHATI

The red-orange pigment from carrots can make fake ghee dodge a popular quality test to pass off as a premium product sourced from cows, a new study has found.

Researchers from the Indian Institute of Technology (Banaras Hindu University) in Varanasi, Uttar Pradesh, have demonstrated that non-dairy fats, such as palm oil and lard or rendered pig fat, can be engineered to mimic the Raman spectral signature of authentic cow ghee simply by adding a beta-carotene-rich carrot extract.

Cow ghee naturally contains beta-carotene, responsible for its yellowish colour. The researchers are Vineet Sharma, Ajay Kumar Bind, Shreyans K. Jain, and Venkatanarayan Ramanathan. Their study has been published in the latest issue of the *Journal of Raman Spectroscopy*.

The findings, although based on a small sample size, raise concerns about fraud in India's premium dairy market. They also challenge the efficacy of Raman spectroscopy, a rapid testing technique widely used by food regulators and laboratories.

Named after Nobel laureate C.V. Raman, Raman spectroscopy is considered a powerful analytical quality test. It acts as a molecular fingerprint to verify the exact chemical composition, crystalline structure, and purity of a substance.

The IIT (BHU) team investigated whether the characteristic Raman signatures associated with cow ghee could be artificially recreated with other fats. Previous studies have treated three Raman spectral peaks of beta-carotene – at 1,006, 1,157, and 1,520 cm^{-1} – as reliable markers for authenticating cow ghee. These peaks are often absent in non-dairy fats.

To test the robustness of these markers, the researchers fortified samples of lard and palm oil with carotenoids extracted from carrots. Both lard and palm oil displayed the same Raman peaks attributed to cow ghee. The fortified fats also acquired the yellow-orange colour similar to cow ghee, making them resemble the dairy product in appearance and spectroscopic profile.

01J6. 'Carrot extract can make fake ghee dodge quality test'

'गाजर का अर्क नकली घी को गुणवत्ता परीक्षण से बचा सकता है'

- The **red-orange pigment** from carrots can make fake ghee dodge a popular quality test to pass off as a premium product sourced from cows, a new study has found.

गाजर से मिलने वाला **लाल-नारंगी रंगद्रव्य** नकली घी को एक लोकप्रिय गुणवत्ता परीक्षण से बचाकर उसे गाय से प्राप्त प्रीमियम उत्पाद के रूप में पेश कर सकता है, यह एक नए अध्ययन में पाया गया है।

- Researchers from the **Indian Institute of Technology (Banaras Hindu University)** in Varanasi, Uttar Pradesh, have demonstrated that non-dairy fats, such as palm oil and lard or rendered pig fat, can be engineered to mimic the **Raman spectral signature** of authentic cow ghee simply by adding a **beta-carotene-rich carrot extract**.

उत्तर प्रदेश के वाराणसी स्थित **भारतीय प्रौद्योगिकी संस्थान (बनारस हिंदू विश्वविद्यालय)** के शोधकर्ताओं ने प्रदर्शित किया है कि पाम ऑयल और लार्ड या पिघली हुई सूअर की चर्बी जैसे गैर-डेयरी वसा को केवल **बीटा-कैरोटीन युक्त गाजर के अर्क** को मिलाकर असली गाय के घी के **रमन स्पेक्ट्रल सिग्नेचर** जैसा बनाया जा सकता है।

- Cow ghee naturally contains **beta-carotene**, responsible for its yellowish colour.

गाय के घी में प्राकृतिक रूप से **बीटा-कैरोटीन** होता है, जो उसके पीले रंग के लिए जिम्मेदार होता है।

- They also challenge the efficacy of **Raman spectroscopy**, a rapid testing technique widely used by food regulators and laboratories.

Webb telescope captures weather on exoplanet 700 lightyears away

As state-of-the-art instruments like the Extremely Large Telescope, which Europe is currently building in northern Chile, become operational, astronomers could discove many exoplanet nurseries around distant stars, increasing manifold the possibility of finding more extra-solar earth-like planets and, who knows, even a true earth twin

GS III: S&T

Prakash Chandra
KOCHI

"Cloudy with a chance of rain" – imagine astronomers turning into meteorologists and issuing weather reports like this, but for alien planets.

According to a new study published in *Science* on May 21, scientists were able to use the NASA James Webb Space Telescope (JWST) to peer closely at an exoplanet nearly 700 lightyears away, and deciphered the weather patterns on it.

Named WASP-94A b, this exoplanet is almost twice as large as Jupiter but with only half the mass. It orbits very close to its parent star – so close that it takes just four days to complete a whole revolution.

Extreme worlds

Gas giants like WASP-94A b with scorching atmospheric temperatures are called 'hot Jupiters' and have their orbits tidally locked, meaning their rotation is synchronised with their revolution. As a result, the same side of the planet always faces the host star, much like the moon's tidally locked orbit keeps one side always facing the earth.

WASP-94A b's dayside is thus a sweltering desert with temperatures hot enough to melt rock while its nightside is perennially dark and frozen as temperatures dip to nearly absolute zero.

Astronomers have always been intrigued by the bizarre weather patterns on the 6,000 or so exoplanets they have found so far. But in the absence of a sufficiently powerful telescope, they have had no way to study these far-flung bodies.

NASA's launch of the James Webb Space Telescope (JWST) in December 2021 was the gamechanger. The unprecedented sensitivity of its instruments – which allow the telescope to discern the details on a small coin from a distance of 50 km – has helped scientists study exoplanets' atmospheres like never before. Many of these worlds have turned out to be rocky; some are even almost earth-like. But on some other exoplanets, scientists have found extreme temperatures and pressures producing rain of molten metal and vaporised rock. Still others have downpours of molten glass pushed by supersonic winds. Some gaseous exoplanets even have crystallised carbon raining down as diamonds.

'A world far beyond'

Hot Jupiters though are the most studied exoplanets. The latest JWST discovery has found that WASP-94A b in particular has a dynamic weather system: its mornings are blanketed in clouds of magnesium silicate, iron, and magnesium sulphide while the evenings sport clear skies.

An artistic rendering of WASP-94A b, a gas giant around 700 lightyears away. On this exoplanet, clouds build as air flows over the night side of the planet, reaching a large swell by daybreak. They dissipate on the dayside, leaving clear skies in the early evening. HANNAH ROBBINS/JOHNS HOPKINS UNIVERSITY

"The clouds appear to form on the cooler night side of the planet, sweep across the globe with extremely fast winds, and then disappear as they reach the hotter dayside," Sagnick Mukherjee, lead author of the study and a postdoctoral fellow at Arizona State University, said. "This is a direct measurement of an extreme weather cycle unfolding on a world far beyond our Solar System." Astronomers characterise the atmospheres of distant exoplanets using spectroscopy: light is split up into its various wavelengths, followed by measuring the intensity of each one. If the planet has an atmosphere, it will absorb some of the light. This will create a gap in the set of wavelengths arriving at the spectrometer. Since each molecule absorbs light of fixed wavelengths, it is easy to identify the compounds present in the atmosphere.

Slow transit

"To do that, we need some way to distinguish the planet's light from the stars," Bruce Macintosh, director of the University of California Observatories and professor of astronomy and astrophysics, said.

Prof. Macintosh, who was not part of the research team, said the astronomers used the transit method for their discovery. "As the planet passes in front of the star, its atmosphere absorbs starlight. By studying exactly how that absorption changes with time, you can see the evidence that one side is cloudy and not the other. And by studying different wavelengths you can understand composition," he explained.

According to University of Göttingen astrophysicist Lisa Nortmann, the researchers seemed to have studied the transit when the exoplanet passed slowly in front of its star.

"Therefore, at different times of observation, different parts of the planet are in front of the star. This effect was used in this study to 'scan' the planet's atmosphere at different locations and this revealed that the atmospheric signal was different for morning and evening sides," Dr. Nortmann, who was also not part of the study, said.

A major challenge in studying exoplanets, according to Dr. Mukherjee, is that clouds can obscure what their atmospheres are really made of.

"By separating the cloudy and clear sides of WASP-94A b, we show that earlier estimates of its composition can be strongly biased," he said. "More broadly, the study demonstrates that understanding weather patterns on distant worlds is essential for learning how planets across a wide range of sizes (from earth-like rocky planets to Neptune-like gas worlds and gas giants) form, evolve, and differ from planets in our own solar system."

History of formation

Research like this could help astronomers learn about the planetary architectures of 4.6 billion years ago when the protoplanetary disk of gas and dust around the Sun started evolving into this Solar System. "The discs of material around a young star form planets. Different parts of that disc have different compositions – ice, gas, dust particles, etc.," Prof. Macintosh said. By measuring the composition, you can tell something about the history of the formation (did it form out of solid material first or gas?) and even the location (did it form somewhere too hot for ice?). And then you can try and understand if the same process that made a big hot Jupiter like this could also make a smaller planet like the earth."

As state-of-the-art instruments like the Extremely Large Telescope, which Europe is currently building in northern Chile, become operational, astronomers could discover many exoplanet nurseries around distant stars, increasing manifold the possibility of finding more extra-solar earth-like planets and, who knows, even a true earth twin.

21 मई को **साइंस** पत्रिका में प्रकाशित एक नए अध्ययन के अनुसार, वैज्ञानिकों ने **नासा जेम्स वेब स्पेस टेलीस्कोप (JWST)** का उपयोग करके लगभग 700 प्रकाश-वर्ष दूर स्थित एक बाह्यग्रह का सूक्ष्म अवलोकन किया तथा वहाँ के मौसमीय पैटर्न को समझा।

- Named **WASP-94A b**, this exoplanet is almost twice as large as Jupiter but with only half the mass.
  WASP-94A b नामक यह बाह्यग्रह आकार में बृहस्पति से लगभग दोगुना है, किंतु इसका द्रव्यमान केवल आधा है।
- It orbits very close to its parent star — so close that it takes just four days to complete a whole revolution.
  यह अपने मूल तारे के अत्यंत निकट परिक्रमा करता है — इतना निकट कि इसे एक पूर्ण परिक्रमा करने में केवल चार दिन लगते हैं।

Extreme worlds
चरम संसार

- Gas giants like **WASP-94A b** with scorching atmospheric temperatures are called '**hot Jupiters**' and have their **orbits tidally locked**, meaning their rotation is synchronised with their revolution.
  WASP-94A b जैसे अत्यधिक उष्ण वायुमंडलीय तापमान वाले गैसीय विशाल ग्रहों को '**हॉट ज्यूपिटर्स**' कहा जाता है तथा उनकी कक्षाएँ ज्वारीय रूप से आबद्ध होती हैं, अर्थात् उनका घूर्णन उनकी परिक्रमा के साथ समकालिक होता है।
- As a result, the same side of the planet always faces the host star, much like the **moon's tidally locked orbit** keeps one side always facing the earth.
  इसके परिणामस्वरूप ग्रह का वही भाग सदैव अपने मूल तारे की ओर रहता है, ठीक उसी प्रकार जैसे चंद्रमा की ज्वारीय आबद्ध कक्षा के कारण उसका एक ही भाग सदैव पृथ्वी की ओर रहता है।
- **WASP-94A b's** dayside is thus a sweltering desert with temperatures hot enough to melt rock while its nightside is perennially dark and frozen as temperatures dip to nearly absolute zero.
  इस प्रकार **WASP-94A b** का दिन वाला भाग अत्यंत तप्त मरुस्थल जैसा है, जहाँ तापमान चट्टानों को पिघलाने जितना अधिक है, जबकि इसका रात्रिकालीन भाग सदैव अंधकारमय और जमे हुए रूप में रहता है क्योंकि तापमान लगभग परम शून्य तक गिर जाता है।
- Many of these worlds have turned out to be rocky; **some are even almost earth-like**.
  इनमें से अनेक संसार पथरीले पाए गए हैं; कुछ तो लगभग पृथ्वी-सदृश भी हैं।
- But on some other exoplanets, scientists have found extreme temperatures and pressures producing rain of molten metal and vaporised rock.
  किंतु कुछ अन्य बाह्यग्रहों पर वैज्ञानिकों ने अत्यधिक तापमान एवं दाब की ऐसी परिस्थितियाँ पाई हैं जहाँ पिघली हुई धातु और वाष्पीकृत चट्टानों की वर्षा होती है।
- Still others have downpours of molten glass pushed by supersonic winds.
  कुछ अन्य ग्रहों पर अतिध्वनिक पवनों द्वारा संचालित पिघले हुए काँच की वर्षा होती है।
- Some gaseous exoplanets even have crystallised carbon raining down as diamonds.
  कुछ गैसीय बाह्यग्रहों पर तो क्रिस्टलीकृत कार्बन हीरों के रूप में वर्षा करता है।

'A world far beyond'
'एक अत्यंत दूरस्थ संसार'

- **Hot Jupiters** though are the most studied exoplanets.
  हालाँकि **हॉट ज्यूपिटर्स** सर्वाधिक अध्ययन किए गए बाह्यग्रह हैं।
- The latest **JWST** discovery has found that **WASP-94A b** in particular has a dynamic weather system: its mornings are blanketed in clouds of magnesium silicate, iron, and magnesium

sulphide while the evenings sport clear skies.
नवीनतम **JWST** खोज में पाया गया है कि विशेष रूप से **WASP-94A b** पर एक गतिशील मौसम तंत्र विद्यमान है: वहाँ की सुबहें मैग्नीशियम सिलिकेट, लौह तथा मैग्नीशियम सल्फाइड के बादलों से आच्छादित रहती हैं, जबकि शाम के समय आकाश स्वच्छ रहता है।

- "The clouds appear to form on the cooler night side of the planet, sweep across the globe with extremely fast winds, and then disappear as they reach the hotter dayside," **Sagnick Mukherjee**, lead author of the study and a postdoctoral fellow at **Arizona State University**, said.
अध्ययन के प्रमुख लेखक तथा **एरिज़ोना स्टेट यूनिवर्सिटी** में पोस्टडॉक्टोरल फेलो **साग्निक मुखर्जी** ने कहा, "ऐसा प्रतीत होता है कि बादल ग्रह के अपेक्षाकृत शीतल रात्रिकालीन भाग में बनते हैं, अत्यंत तीव्र पवनों के साथ पूरे ग्रह पर फैलते हैं और फिर अधिक उष्ण दिन वाले भाग तक पहुँचने पर विलुप्त हो जाते हैं।"
- Astronomers characterise the atmospheres of distant exoplanets using **spectroscopy**: light is split up into its various wavelengths, followed by measuring the intensity of each one.
खगोलविद दूरस्थ बाह्यग्रहों के वायुमंडल का विश्लेषण **स्पेक्ट्रोस्कोपी** के माध्यम से करते हैं: इसमें प्रकाश को उसकी विभिन्न तरंगदैर्घ्यों में विभाजित किया जाता है तथा प्रत्येक की तीव्रता मापी जाती है।
- If the planet has an atmosphere, it will absorb some of the light.
यदि ग्रह के पास वायुमंडल होता है, तो वह कुछ प्रकाश को अवशोषित कर लेता है।
- This will create a gap in the set of wavelengths arriving at the spectrometer.
इसके परिणामस्वरूप स्पेक्ट्रोमीटर तक पहुँचने वाली तरंगदैर्घ्यों के समूह में एक अंतर उत्पन्न हो जाता है।
- Since each molecule absorbs light of fixed wavelengths, it is easy to identify the compounds present in the atmosphere.
चूँकि प्रत्येक अणु निश्चित तरंगदैर्घ्य के प्रकाश को अवशोषित करता है, इसलिए वायुमंडल में उपस्थित यौगिकों की पहचान करना सरल हो जाता है।

Slow transit
धीमा पारगमन

- "To do that, we need some way to distinguish the planet's light from the stars," **Bruce Macintosh**, director of the **University of California Observatories** and professor of astronomy and astrophysics, said.
"ऐसा करने के लिए हमें ग्रह के प्रकाश को तारों के प्रकाश से अलग पहचानने का कोई तरीका चाहिए," **यूनिवर्सिटी ऑफ कैलिफ़ोर्निया ऑब्ज़र्वेटरीज़** के निदेशक तथा खगोल विज्ञान एवं खगोल भौतिकी के प्रोफेसर **ब्रूस मैकिन्टॉश** ने कहा।
- "As the planet passes in front of the star, its atmosphere absorbs starlight."
"जब ग्रह तारे के सामने से गुजरता है, तब उसका वायुमंडल तारों के प्रकाश को अवशोषित करता है।"
- "By studying exactly how that absorption changes with time, you can see the evidence that one side is cloudy and not the other."
"समय के साथ उस अवशोषण में होने वाले परिवर्तनों का सटीक अध्ययन करके यह देखा जा सकता है कि ग्रह का एक भाग बादलों से घिरा है जबकि दूसरा नहीं।"
- "And by studying different wavelengths you can understand composition," he explained.
"और विभिन्न तरंगदैर्घ्यों का अध्ययन करके उसकी संरचना को समझा जा सकता है," उन्होंने स्पष्ट किया।
- According to **University of Göttingen** astrophysicist **Lisa Nortmann**, the researchers seemed to have studied the transit when the exoplanet passed slowly in front of its star.
यूनिवर्सिटी ऑफ गॉटिंगेन की खगोल भौतिकविद् **लीसा नॉर्टमैन** के अनुसार, शोधकर्ताओं ने उस समय पारगमन का अध्ययन किया जब बाह्यग्रह अपने तारे के सामने से धीरे-धीरे गुजर रहा था।
- "Therefore, at different times of observation, different parts of the planet are in front of the star."
"इसलिए, अवलोकन के विभिन्न समयों पर ग्रह के अलग-अलग भाग तारे के सामने होते हैं।"

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

- "This effect was used in this study to 'scan' the planet's atmosphere at different locations and this revealed that the atmospheric signal was different for morning and evening sides," Dr. Nortmann, who was also not part of the study, said.
  "इस प्रभाव का उपयोग इस अध्ययन में ग्रह के वायुमंडल को विभिन्न स्थानों पर 'स्कैन' करने के लिए किया गया और इससे यह पता चला कि सुबह और शाम वाले भागों के लिए वायुमंडलीय संकेत अलग-अलग थे," डॉ. नॉर्टमैन, जो इस अध्ययन का हिस्सा भी नहीं थीं, ने कहा।

History of formation
निर्माण का इतिहास

- Research like this could help astronomers learn about the planetary architectures of 4.6 billion years ago when the **protoplanetary disk** of gas and dust around the Sun started evolving into this **Solar System**.
  इस प्रकार का शोध खगोलविदों को 4.6 अरब वर्ष पूर्व की ग्रह संरचनाओं के बारे में जानने में सहायता कर सकता है, जब सूर्य के चारों ओर गैस और धूल की **प्रोटोप्लैनेटरी डिस्क** विकसित होकर इस **सौरमंडल** का निर्माण करने लगी थी।
- "The discs of material around a young star form planets."
  "एक युवा तारे के चारों ओर स्थित पदार्थ की डिस्कें ग्रहों का निर्माण करती हैं।"
- "Different parts of that disc have different compositions — ice, gas, dust particles, etc.," Prof. Macintosh said.
  "उस डिस्क के विभिन्न भागों की संरचना अलग-अलग होती है — जैसे बर्फ, गैस, धूल कण आदि," प्रोफेसर मैकिन्टॉश ने कहा।
- As state-of-the-art instruments like the **Extremely Large Telescope**, which Europe is currently building in northern Chile, become operational, astronomers could discover many **exoplanet nurseries** around distant stars, increasing manifold the possibility of finding more extra-solar earth-like planets and, who knows, even a true earth twin.
  जैसे-जैसे यूरोप द्वारा उत्तरी चिली में निर्मित की जा रही **एक्स्ट्रीमली लार्ज टेलीस्कोप** जैसी अत्याधुनिक उपकरण कार्यशील होंगे, खगोलविद दूरस्थ तारों के आसपास अनेक **बाह्यग्रह जन्मस्थलों** की खोज कर सकते हैं, जिससे अधिक पृथ्वी-सदृश बाह्य-सौर ग्रहों तथा संभवतः वास्तविक पृथ्वी-जुड़वाँ ग्रह मिलने की संभावना कई गुना बढ़ जाएगी।

PATRIOTIC IAS

From students to authors, users turn to AI detectors despite questions over accuracy

AI text detectors are used to identify AI-generated writing, but concerns persist over their accuracy as they can produce false positives and false negatives; cases involving authors accused of using AI have triggered debate over whether these tools are reliable enough to determine authenticity

GS III: S&T

Sahana Venugopal

The story so far:

Since OpenAI's ChatGPT debuted in 2022, users have been experimenting with AI to write and publish human-sounding content at scale. According to a May 2026 report by digital consulting firm Graphite, the number of "primarily AI-generated" articles published on the internet equals the number written by humans.

While the research methodology is debatable, its findings point to a growing need for transparency in authorship as readers want to know whether government circulars, work emails, social media captions, academic papers, text messages, news articles, and even books were written by humans or chatbots.

AI-detection toolmakers claim their products are dependable and that readers who want to know whether something was written using AI or not can use them to confirm the authenticity of content. But how accurate are these tools in spotting AI generated text?

How are AI text detectors used?

Popular AI text detection tools are easy to access online, catering to a wide variety of users such as students, educators, social media managers, business experts, and content creators.

They tout high accuracy rates and training standards. Some of these platforms offer free trials or limited checks where the user can paste a short text passage and have it analysed for signs of AI-generated or AI-assisted content. In order to evaluate longer drafts or get help in editing AI text, users will have to sign up for a paid plan.

Multiple AI text detectors also offer plagiarism checking features, or "humanisers" that claim to make AI-generated content look more natural, so as to evade detection by other AI text detectors.

As frontier AI models from companies such as OpenAI, Google, and Anthropic continue to mature and produce more human-sounding text with fewer machine-generated "tells," these AI text detection tools must evolve in tandem or risk throwing out inaccurate results.

Some popular AI text detection tools include Pangram, Quillbot, ZeroGPT, Grammarly, and Turnitin.

Can AI text detectors be trusted?

This is the billion-dollar question – literally speaking. As Generative AI tools become accessible to just about anyone with an internet connection, people worldwide are looking for ways to detect AI-generated writing. Meanwhile, many writers want to hide their reliance on AI models for reputational reasons.

AI text detectors are still prone to producing false negatives, where they classify AI-generated work as being human-made, or false positives, where they classify original human work as being partially or wholly AI-generated. The latter is an urgent problem, as it can lead to disciplinary action being taken against students and academics, even if they developed their work through honest means. False positives can also lead to social media trolling and career-impacting consequences.

Turnitin, in particular, has seen several such cases and admitted to the potential for false positives. The company noted that it was a "powerful tool" but "not infallible."

More worryingly, the company's website noted that "literary flair or a scholarly voice that strays from the norm can throw Turnitin for a loop," leading to confusion when assessing the uniqueness of writing.

When *The Hindu* ran 186 words of a 2010 Pulitzer prize-winning foreign journalism feature through several trending AI detection platforms, the results varied wildly: Pangram and Quillbot both classified the text as being 100% human written, while ZeroGPT said that it was 49.9% AI.

Pangram is often cited as a trusted AI text detector on social media; it claims to detect AI-generated content with 99.98% accuracy, and stated it was reviewed positively by third parties including the University of Maryland and the University of Chicago.

Pangram's popularity is also due to efforts by CEO and co-founder Max Spero, who actively promotes the tool on X (formerly Twitter) and cites its results to claim outright that trending pieces were generated with AI. On the flip side, Pangram has also stated that for text under 75 words, the results may be less accurate.

This brings up another problem: how much trust can everyday users place in the accuracy of commercial AI text detectors when their very business models depend on users signing up to paid plans in order to access AI text "humanisers" and other rewriting tools?

Have AI text detectors been used to accuse authors?

In March 2026, American author Mia Ballard's horror novel *Shy Girl* was cancelled by publisher Hachette over allegations of AI writing, while Ms. Ballard was trolled online. Two months later, the Commonwealth Foundation defended its judging process after a few regional winners of its 2026 Commonwealth Short Story Prize were hit with AI accusations – namely the Trinidadian writer of East Indian heritage, Jamir Nazir, whose story *The Serpent in the Grove* was one of the five shortlisted winners.

In both cases, many social media users cited the results of AI text detectors in order to claim that the works of authors Mia Ballard and Jamir Nazir showed signs of being AI-generated. Specifically, Pangram was used to accuse both Ms. Ballard and Mr. Nazir of submitting AI writing. Though some users feel that being flagged by AI text detectors was clear evidence of creative dishonesty, others fear these still-experimental AI tools could wrongly damage the careers of authors and academics.

Razmi Farook, Director-General of the Commonwealth Foundation, stated that AI checkers were not used in the 2026 short story judging process. She was concerned about the ethical implications of submitting "unpublished original work" to an AI checker.

Ms. Farook further expressed disappointment at how the work of other feted writers and winners had faced scrutiny; Pangram AI published results claiming that it found more stories showing signs of AI use among the 2026 and 2025 Commonwealth short story prize winners.

All the shortlisted writers this year had personally stated that no AI was used, according to Ms. Farook, who highlighted that AI detection tools were "not unfailing or infallible," and that the competition had to operate on the principle of trust until a reliable detection process was available.

01J6. From students to authors, users turn to AI detectors despite questions over accuracy

सटीकता पर प्रश्नों के बावजूद विद्यार्थी से लेकर लेखक तक AI डिटेक्टरों की ओर रुख कर रहे हैं

- **AI text detectors are used to identify AI-generated writing, but concerns persist over their accuracy as they can produce false positives and false negatives; cases involving authors accused of using AI have triggered debate over whether these tools are reliable enough to determine authenticity.**

  AI टेक्स्ट डिटेक्टरों का उपयोग AI-जनित लेखन की पहचान करने के लिए किया जाता है, किंतु उनकी सटीकता को लेकर चिंताएँ बनी हुई हैं क्योंकि वे गलत सकारात्मक और गलत नकारात्मक परिणाम दे सकते हैं; AI के उपयोग के आरोपों से जुड़े लेखकों के मामलों ने इस बात पर बहस को जन्म दिया है कि क्या ये उपकरण प्रामाणिकता निर्धारित करने के लिए पर्याप्त रूप से विश्वसनीय हैं।

- Since **OpenAI's ChatGPT** debuted in 2022, users have been experimenting with AI to write and publish human-sounding content at scale.

  2022 में **OpenAI के ChatGPT** के पदार्पण के बाद से उपयोगकर्ता AI का प्रयोग बड़े पैमाने पर मानव-सदृश सामग्री लिखने और प्रकाशित करने के लिए कर रहे हैं।

- According to a May 2026 report by digital consulting firm **Graphite**, the number of "primarily AI-generated" articles published on the internet equals the number written by humans.

  डिजिटल परामर्श कंपनी **ग्रेफाइट** की मई 2026 की रिपोर्ट के अनुसार, इंटरनेट पर प्रकाशित "मुख्यतः AI-जनित" लेखों की संख्या मानवों द्वारा लिखे गए लेखों के बराबर हो चुकी है।

Website : patrioticias.in

- Some popular AI text detection tools include **Pangram, Quillbot, ZeroGPT, Grammarly, and Turnitin**.
  कुछ लोकप्रिय AI टेक्स्ट डिटेक्शन उपकरणों में **Pangram, Quillbot, ZeroGPT, Grammarly और Turnitin** शामिल हैं।

- The latter is an urgent problem, as it can lead to disciplinary action being taken against students and academics, even if they developed their work through honest means.
  दूसरी स्थिति एक गंभीर समस्या है, क्योंकि इसके कारण विद्यार्थियों और शिक्षाविदों के विरुद्ध अनुशासनात्मक कार्रवाई हो सकती है, भले ही उन्होंने अपना कार्य ईमानदार तरीकों से तैयार किया हो।
- False positives can also lead to social media trolling and career-impacting consequences.
  गलत सकारात्मक परिणाम सोशल मीडिया ट्रोलिंग तथा करियर को प्रभावित करने वाले दुष्परिणामों का कारण भी बन सकते हैं।
- When **The Hindu** ran 186 words of a 2010 **Pulitzer prize-winning** foreign journalism feature through several trending AI detection platforms, the results varied wildly: **Pangram** and **Quillbot** both classified the text as being 100% human written, while **ZeroGPT** said that it was 49.9% AI.
  जब **द हिंदू** ने 2010 के **पुलित्जर पुरस्कार विजेता** विदेशी पत्रकारिता लेख के 186 शब्दों को कई लोकप्रिय AI डिटेक्शन प्लेटफॉर्म पर जाँच के लिए प्रस्तुत किया, तो परिणाम अत्यधिक भिन्न रहे: **Pangram** और **Quillbot** ने इसे 100% मानव-लिखित बताया, जबकि **ZeroGPT** ने इसे 49.9% AI-जनित घोषित किया।
- Pangram's popularity is also due to efforts by CEO and co-founder **Max Spero**, who actively promotes the tool on **X** (formerly Twitter) and cites its results to claim outright that trending pieces were generated with AI.
  Pangram की लोकप्रियता उसके CEO और सह-संस्थापक **मैक्स स्पेरो** के प्रयासों के कारण भी है, जो **X** (पूर्व में ट्विटर) पर इस उपकरण का सक्रिय प्रचार करते हैं और इसके परिणामों का उपयोग यह दावा करने के लिए करते हैं कि चर्चित सामग्री AI द्वारा तैयार की गई है।
- Specifically, **Pangram** was used to accuse both Ms. Ballard and Mr. Nazir of submitting AI writing.
  विशेष रूप से **Pangram** का उपयोग सुश्री बैलार्ड और श्री नज़ीर दोनों पर AI-जनित लेखन प्रस्तुत करने का आरोप लगाने के लिए किया गया।
- She was concerned about the ethical implications of submitting "unpublished original work" to an AI checker.
  उन्हें "अप्रकाशित मौलिक रचनाओं" को AI जाँच उपकरणों में प्रस्तुत करने के नैतिक प्रभावों को लेकर चिंता थी।
- Ms. Farook further expressed disappointment at how the work of other feted writers and winners had faced scrutiny; **Pangram AI** published results claiming that it found more stories showing signs of AI use among the 2026 and 2025 Commonwealth short story prize winners.
  सुश्री फारूक ने इस बात पर भी निराशा व्यक्त की कि अन्य प्रतिष्ठित लेखकों और विजेताओं की रचनाएँ भी संदेह के घेरे में आ गईं; **Pangram AI** ने ऐसे परिणाम प्रकाशित किए जिनमें दावा किया गया कि 2026 और 2025 के कॉमनवेल्थ लघुकथा पुरस्कार विजेताओं में AI उपयोग के संकेत वाली और अधिक कहानियाँ पाई गईं।

Conflict in West Asia spurs interest in European-made sustainable aviation fuels

GS III: S&T, Environment

Agence France-Presse
BRUSSELS

At a plant near Frankfurt, in Germany, hydrogen and carbon dioxide sourced from a chlorine factory and a biogas facility nearby are piped into a reactor, and after a few more steps turned into jet fuel.

Interest in such synthetic propellants is growing as the U.S.-Israeli war on Iran pushes Europe to reassess its dependencies, raising hopes of a turnaround for the struggling sector, according to industry experts.

The conflict "made the business case for e-SAF much stronger," said Mariano Berkenwald, head of strategy at Ineratec, the firm operating the Frankfurt facility.

'Climate friendly'

Before the war squeezed Europe's jet fuel supplies, electro-Sustainable Aviation Fuel (e-SAF), was largely touted for its climate friendly credentials.

Doing away with oil, it can reduce by 90% planet warming emissions from aviation – itself responsible for up to 4% of all greenhouse gases released in the European Union, proponents say.

Brussels has made it a key component of a push to green up transport, mandating fuel suppliers to blend at least 1.2% of the stuff into the kerosene made available at EU airports by 2030 and 35% by 2050. But the sector has struggled to take off, bogged down by high costs and low investments.

Founded 10 years ago, Ineratec launched production last year, and its small German facility is currently the only one in Europe making the propellant.

About 40 more projects under development are stuck in a rut, unable to secure the funding needed to start production plants, said Camille Mutrelle of advocacy group Transport & Environment (T&E).

Europe needs roughly nine more bigger factories to meet the 2030 target but "we still have zero", she said.

Ineratec's plant churns out some 2,500 tonnes of fuel a year, enough to power only about 50 transatlantic flights.

Brussels has mandated fuel suppliers to blend 1.2% of the synthetic propellant into kerosene made available at EU airports by 2030. AP

With the clock ticking, Brussels, which recently scaled down the ambition of other climate goals, notably for cars, has been under pressure to scrap the target or at least the hefty fines suppliers would face for not meeting it. The industry was braced for a review of the mandate due next year.

It now believes the war in West Asia and the resulting closure of the Strait of Hormuz, a key shipping lane for global gas and oil, might have changed the momentum.

Defence interest

Since its key ingredients can be sourced entirely in Europe, e-SAF has drawn attention from military forces, which worry about the ready availability of fuel to power fighter jets, helicopters and other vehicles – and could pay a premium for it, according to Matteo Mirolo, an aviation consultant specialising in sustainable fuels.

E-SAF costs about 10 times more than kerosene and even supporters concede it is unlikely to ever match the price of its fossil fuel-based rival.

Germany's armed forces recently tested Ineratec's fuel. And other governments are known to have expressed interest in building capacity, said Ms. Mutrelle.

"The current crisis is a wake-up call regarding Europe's energy independence," said Ourania Georgoutsakou, managing director of Airlines for Europe, a civil aviation lobby group.

Making sustainable fuels cheaper and more readily available should be "an urgent strategic priority", she added.

Doubts over the sector and low prospective returns meant that energy majors have so far largely stayed away, preferring to invest in biofuels, said Ms. Mutrelle.

Derived from waste, these propellants are also part of the EU's climate plans.

But production often relies on waste oil and fat imports from China, which makes them less palatable from a security of supply perspective.

The European Commission said it was considering the establishment of an EU financing mechanism for e-SAF to support development. "We need homegrown energy, including fuels and aviation fuels," a commission spokesperson said.

01J6. Conflict in West Asia spurs interest in European-made sustainable aviation fuels

पश्चिम एशिया के संघर्ष ने यूरोप में बने टिकाऊ विमानन ईंधनों में रुचि बढ़ाई

- At a plant near **Frankfurt**, in **Germany**, hydrogen and carbon dioxide sourced from a chlorine factory and a biogas facility nearby are piped into a reactor, and after a few more steps turned into jet fuel.
  जर्मनी के **फ्रैंकफर्ट** के पास स्थित एक संयंत्र में क्लोरीन फैक्ट्री और पास की बायोगैस सुविधा से प्राप्त हाइड्रोजन और कार्बन डाइऑक्साइड को रिएक्टर में भेजा जाता है और कुछ प्रक्रियाओं के बाद उसे जेट ईंधन में बदल दिया जाता है।
- Interest in such synthetic propellants is growing as the **U.S.-Israeli** war on **Iran** pushes Europe to reassess its dependencies, raising hopes of a turnaround for the struggling sector, according to industry experts.
  उद्योग विशेषज्ञों के अनुसार **ईरान** पर **अमेरिका-इज़राइल** युद्ध ने यूरोप को अपनी निर्भरताओं का पुनर्मूल्यांकन करने के लिए प्रेरित किया है, जिससे ऐसे कृत्रिम ईंधनों में रुचि बढ़ रही है और संघर्ष कर रहे इस क्षेत्र में सुधार की उम्मीद जगी है।
- The conflict "made the business case for **e-SAF** much stronger," said **Mariano Berkenwald**, head of strategy at **Ineratec**, the firm operating the Frankfurt facility.
  फ्रैंकफर्ट संयंत्र संचालित करने वाली कंपनी **इनरेटेक** के रणनीति प्रमुख **मरियानो बेरकेनवाल्ड** ने कहा कि इस संघर्ष ने "**e-SAF** के व्यावसायिक महत्व को बहुत मजबूत बना दिया है।"

'Climate friendly'
'जलवायु अनुकूल'

- Before the war squeezed Europe's jet fuel supplies, electro-**Sustainable Aviation Fuel (e-SAF)**, was largely touted for its climate friendly credentials.
  युद्ध से पहले जब यूरोप की जेट ईंधन आपूर्ति प्रभावित नहीं हुई थी, तब इलेक्ट्रो-**सस्टेनेबल एविएशन फ्यूल (e-SAF)** को मुख्य रूप से उसके जलवायु अनुकूल गुणों के लिए प्रचारित किया जाता था।
- Doing away with oil, it can reduce by 90% planet warming emissions from aviation — itself responsible for up to 4% of all greenhouse gases released in the **European Union**, proponents say.
  समर्थकों का कहना है कि तेल का उपयोग समाप्त करके यह विमानन से होने वाले वैश्विक ताप वृद्धि उत्सर्जन को 90% तक कम कर सकता है, जबकि विमानन स्वयं **यूरोपीय संघ** में उत्सर्जित कुल ग्रीनहाउस गैसों का लगभग 4% हिस्सा है।

Website : patrioticias.in

- **Brussels** has made it a key component of a push to green up transport, mandating fuel suppliers to blend at least 1.2% of the stuff into the kerosene made available at EU airports by 2030 and 35% by 2050.
  ब्रसेल्स ने इसे परिवहन को हरित बनाने की अपनी योजना का प्रमुख हिस्सा बनाया है और ईंधन आपूर्तिकर्ताओं को 2030 तक EU हवाईअड्डों पर उपलब्ध केरोसिन में कम से कम 1.2% और 2050 तक 35% e-SAF मिलाने का निर्देश दिया है।
- But the sector has struggled to take off, bogged down by high costs and low investments.
  लेकिन यह क्षेत्र उच्च लागत और कम निवेश के कारण आगे नहीं बढ़ पाया है।
- Founded 10 years ago, **Ineratec** launched production last year, and its small German facility is currently the only one in Europe making the propellant.
  10 वर्ष पहले स्थापित **इनरेटेक** ने पिछले वर्ष उत्पादन शुरू किया और उसका छोटा जर्मन संयंत्र वर्तमान में यूरोप का एकमात्र ऐसा संयंत्र है जो यह ईंधन बना रहा है।
- About 40 more projects under development are stuck in a rut, unable to secure the funding needed to start production plants, said **Camille Mutrelle** of advocacy group **Transport & Environment (T&E)**.
  एडवोकेसी समूह **ट्रांसपोर्ट एंड एनवायरनमेंट (T&E)** की **कैमिल म्यूट्रेल** ने कहा कि विकासाधीन लगभग 40 अन्य परियोजनाएं वित्तीय सहायता के अभाव में अटकी हुई हैं।
- Europe needs roughly nine more bigger factories to meet the 2030 target but “we still have zero”, she said.
  उन्होंने कहा कि 2030 के लक्ष्य को पूरा करने के लिए यूरोप को लगभग नौ बड़े कारखानों की आवश्यकता है, लेकिन “अभी भी हमारे पास एक भी नहीं है।”
- Ineratec’s plant churns out some 2,500 tonnes of fuel a year, enough to power only about 50 transatlantic flights.
  इनरेटेक का संयंत्र प्रतिवर्ष लगभग 2,500 टन ईंधन बनाता है, जो केवल लगभग 50 ट्रांस-अटलांटिक उड़ानों के लिए पर्याप्त है।
- With the clock ticking, Brussels, which recently scaled down the ambition of other climate goals, notably for cars, has been under pressure to scrap the target or at least the hefty fines suppliers would face for not meeting it.
  समय तेजी से बीतने के साथ ब्रसेल्स, जिसने हाल ही में कारों से जुड़े अन्य जलवायु लक्ष्यों को कम किया है, पर इस लक्ष्य को हटाने या कम से कम इसे पूरा न करने पर लगने वाले भारी जुर्मानों को कम करने का दबाव बढ़ रहा है।
- The industry was braced for a review of the mandate due next year.
  उद्योग अगले वर्ष होने वाली इस नीति की समीक्षा के लिए तैयार था।
- It now believes the war in **West Asia** and the resulting closure of the **Strait of Hormuz**, a key shipping lane for global gas and oil, might have changed the momentum.
  अब उद्योग को विश्वास है कि **पश्चिम एशिया** के युद्ध और वैश्विक तेल एवं गैस के प्रमुख समुद्री मार्ग **हॉर्मुज जलडमरूमध्य** के बंद होने से परिस्थितियां बदल गई हैं।

Defence interest
रक्षा क्षेत्र की रुचि

- Since its key ingredients can be sourced entirely in Europe, **e-SAF** has drawn attention from military forces, which worry about the ready availability of fuel to power fighter jets, helicopters and other vehicles.
  क्योंकि इसके प्रमुख घटक पूरी तरह यूरोप में उपलब्ध हो सकते हैं, इसलिए **e-SAF** ने सैन्य बलों का ध्यान आकर्षित किया है, जिन्हें लड़ाकू विमानों, हेलीकॉप्टरों और अन्य वाहनों के लिए ईंधन की उपलब्धता की चिंता है।
- And could pay a premium for it, according to **Matteo Mirolo**, an aviation consultant specialising in sustainable fuels.

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

टिकाऊ ईंधनों के विशेषज्ञ विमानन सलाहकार **माटेओ मिरोलो** के अनुसार सैन्य बल इसके लिए अधिक कीमत चुकाने को भी तैयार हो सकते हैं।

- E-SAF costs about 10 times more than kerosene and even supporters concede it is unlikely to ever match the price of its fossil fuel-based rival.
  e-SAF की लागत केरोसिन से लगभग 10 गुना अधिक है और इसके समर्थक भी मानते हैं कि यह शायद कभी जीवाश्म ईंधन आधारित विकल्प की कीमत तक नहीं पहुंच पाएगा।
- Germany's armed forces recently tested Ineratec's fuel.
  जर्मनी की सेना ने हाल ही में इनरेटेक के ईंधन का परीक्षण किया।
- And other governments are known to have expressed interest in building capacity, said Ms. Mutrelle.
  सुश्री म्यूट्रेल ने कहा कि अन्य सरकारों ने भी उत्पादन क्षमता विकसित करने में रुचि दिखाई है।
- "The current crisis is a wake-up call regarding Europe's energy independence," said **Ourania Georgoutsakou**, managing director of **Airlines for Europe**, a civil aviation lobby group.
  नागरिक विमानन लॉबी समूह **एयरलाइंस फॉर यूरोप** की प्रबंध निदेशक **ओरानिया जॉर्जाउत्साकोउ** ने कहा, "वर्तमान संकट यूरोप की ऊर्जा स्वतंत्रता के लिए चेतावनी है।"
- Making sustainable fuels cheaper and more readily available should be "an urgent strategic priority", she added.
  उन्होंने कहा कि टिकाऊ ईंधनों को सस्ता और अधिक उपलब्ध बनाना "एक तात्कालिक रणनीतिक प्राथमिकता" होनी चाहिए।
- Doubts over the sector and low prospective returns meant that energy majors have so far largely stayed away, preferring to invest in biofuels, said Ms. Mutrelle.
  सुश्री म्यूट्रेल ने कहा कि इस क्षेत्र को लेकर संदेह और कम संभावित लाभ के कारण बड़ी ऊर्जा कंपनियां अब तक इससे दूर रही हैं और जैव ईंधनों में निवेश को प्राथमिकता दे रही हैं।
- Derived from waste, these propellants are also part of the **EU's** climate plans.
  कचरे से बने ये ईंधन भी **EU** की जलवायु योजनाओं का हिस्सा हैं।
- But production often relies on waste oil and fat imports from **China**, which makes them less palatable from a security of supply perspective.
  लेकिन इनका उत्पादन अक्सर **चीन** से आयातित अपशिष्ट तेल और वसा पर निर्भर करता है, जिससे आपूर्ति सुरक्षा के दृष्टिकोण से यह कम उपयुक्त हो जाता है।
- The **European Commission** said it was considering the establishment of an EU financing mechanism for e-SAF to support development.
  यूरोपीय आयोग ने कहा कि वह e-SAF के विकास के समर्थन के लिए EU वित्तपोषण तंत्र स्थापित करने पर विचार कर रहा है।
- "We need homegrown energy, including fuels and aviation fuels," a commission spokesperson said.
  आयोग के प्रवक्ता ने कहा, "हमें घरेलू स्तर पर विकसित ऊर्जा की आवश्यकता है, जिसमें ईंधन और विमानन ईंधन भी शामिल हैं।"

General Subramani takes charge as CDS; lays emphasis on 'JAI'

GS III: Internal Security: Defence

NEW DELHI

General N.S. Raja Subramani on Sunday assumed charge as India's third Chief of Defence Staff (CDS) and Secretary, Department of Military Affairs.

Soon after assuming office, General Subramani paid tribute to fallen soldiers by laying a wreath at the National War Memorial in New Delhi. He was later accorded a ceremonial Tri-Services Guard of Honour at South Block.

Addressing reporters, the new CDS expressed gratitude for the trust reposed in the armed forces and reaffirmed his commitment to strengthening national security through greater integration among the services. "The Indian Army, Navy, Air Force, Ministry of Defence, strategic institutions and all stakeholders stand united as part of the Whole of Nation approach to strengthen India's security," he said.

He said the armed forces would work towards implementing Prime Minister Narendra Modi's vision of "JAI" – Jointness, *Atma Nirbharta* (self-sufficiency), and Innovation. He said organisational reforms aimed at enhancing synergy, integration, and operational effectiveness among the three services would remain a key focus area. "*Atma Nirbharta* is a central pillar of our national security. We will accelerate the development, induction, and integration of indigenous weapons in our armed forces," he said, while stressing the need for innovation in thought and action.

Gen. N.S. Raja Subramani

A highly decorated officer with more than four decades of service, General Subramani was commissioned into the Garhwal Rifles in December 1985. He has held several key command and staff appointments, including General Officer Commanding 2 Corps, GOC-in-C Central Command, and Vice Chief of the Army Staff.

01J6. General Subramani takes charge as CDS; lays emphasis on 'JAI'

जनरल सुब्रमणि ने CDS का पदभार संभाला; 'JAI' पर दिया जोर

- **General N.S. Raja Subramani** on Sunday assumed charge as India's third **Chief of Defence Staff (CDS)** and Secretary, **Department of Military Affairs**.

जनरल एन.एस. राजा सुब्रमणि ने रविवार को भारत के तीसरे **चीफ ऑफ डिफेंस स्टाफ (CDS)** तथा **सैन्य मामलों के विभाग** के सचिव के रूप में पदभार संभाला।

- Soon after assuming office, General Subramani paid tribute to fallen soldiers by laying a wreath at the **National War Memorial** in **New Delhi**.

पदभार संभालने के तुरंत बाद जनरल सुब्रमणि ने **नई दिल्ली** स्थित **राष्ट्रीय युद्ध स्मारक** पर पुष्पचक्र अर्पित कर शहीद सैनिकों को श्रद्धांजलि दी।

- He was later accorded a ceremonial **Tri-Services Guard of Honour** at **South Block**.

इसके बाद उन्हें **साउथ ब्लॉक** में औपचारिक **त्रि-सेवा गार्ड ऑफ ऑनर** प्रदान किया गया।

- Addressing reporters, the new CDS expressed gratitude for the trust reposed in the armed forces and reaffirmed his commitment to strengthening national security through greater integration among the services.

पत्रकारों को संबोधित करते हुए नए CDS ने सशस्त्र बलों पर जताए गए विश्वास के लिए आभार व्यक्त किया और सेवाओं के बीच अधिक एकीकरण के माध्यम से राष्ट्रीय सुरक्षा को मजबूत करने की अपनी प्रतिबद्धता दोहराई।

- "The **Indian Army, Navy, Air Force, Ministry of Defence, strategic institutions** and all stakeholders stand united as part of the **Whole of Nation approach** to strengthen India's security," he said.

उन्होंने कहा, "**भारतीय सेना, नौसेना, वायुसेना, रक्षा मंत्रालय, रणनीतिक संस्थान** और सभी हितधारक भारत की सुरक्षा को मजबूत करने के लिए **Whole of Nation approach** के तहत एकजुट हैं।"

- He said the armed forces would work towards implementing Prime Minister **Narendra Modi's** vision of "**JAI**" — **Jointness, Atma Nirbharta (self-sufficiency), and Innovation**.

उन्होंने कहा कि सशस्त्र बल प्रधानमंत्री **नरेंद्र मोदी** के "**JAI**" — **जॉइंटनेस, आत्मनिर्भरता और नवाचार** — के दृष्टिकोण को लागू करने की दिशा में कार्य करेंगे।

- He said organisational reforms aimed at enhancing synergy, integration, and operational effectiveness among the three services would remain a key focus area.

उन्होंने कहा कि तीनों सेनाओं के बीच तालमेल, एकीकरण और परिचालन प्रभावशीलता बढ़ाने के उद्देश्य से किए जाने वाले संगठनात्मक सुधार प्रमुख फोकस क्षेत्र बने रहेंगे।

- "**Atma Nirbharta** is a central pillar of our national security. We will accelerate the development, induction, and integration of indigenous weapons in our armed forces," he said, while stressing the need for innovation in thought and action.
उन्होंने कहा, "**आत्मनिर्भरता** हमारी राष्ट्रीय सुरक्षा का एक केंद्रीय स्तंभ है। हम अपने सशस्त्र बलों में स्वदेशी हथियारों के विकास, शामिल किए जाने और एकीकरण की प्रक्रिया को तेज करेंगे," साथ ही उन्होंने विचार और कार्य में नवाचार की आवश्यकता पर जोर दिया।
- A highly decorated officer with more than four decades of service, General Subramani was commissioned into the **Garhwal Rifles** in December 1985.
चार दशकों से अधिक की सेवा वाले अत्यधिक सम्मानित अधिकारी जनरल सुब्रमणि को दिसंबर 1985 में **गढ़वाल राइफल्स** में कमीशन मिला था।
- He has held several key command and staff appointments, including **General Officer Commanding 2 Corps, GOC-in-C Central Command, and Vice Chief of the Army Staff**.
उन्होंने कई महत्वपूर्ण कमांड और स्टाफ पदों पर कार्य किया है, जिनमें **जनरल ऑफिसर कमांडिंग 2 कॉर्प्स, जीओसी-इन-सी सेंट्रल कमांड, और वाइस चीफ ऑफ आर्मी स्टाफ** शामिल हैं।

Admiral Swaminathan takes charge as 27th chief of Navy

GS III: Internal Security: Defence

NEW DELHI

Admiral Krishna Swaminathan on Sunday assumed charge as the 27th Chief of the Naval Staff (CNS) of the Indian Navy, succeeding Admiral Dinesh Kumar Tripathi, who retired after over 41 years of service.

Soon after taking over the command of the maritime force, Admiral Swaminathan reaffirmed the Navy's commitment to protecting national and economic interests amid an increasingly complex regional security environment. Speaking to reporters on the occasion, the new Navy chief said he was honoured to lead the force at a time when maritime security challenges continue to evolve.

"I'm extremely grateful to have this opportunity to serve the Indian Navy and the nation in this capacity. The Indian Navy stands vigilant to protect national interests and is actively deployed in a regional security environment that remains challenging, complex, unpredictable and uncertain," he said.

Adm. Krishna Swaminathan with outgoing Navy chief Adm. Dinesh Kumar Tripathi in New Delhi. SHIV KUMAR PUSHPAKAR

Highlighting his priorities as the Chief of the Naval Staff, Admiral Swaminathan stressed the importance of maintaining the highest standards of operational readiness and combat effectiveness. He said the Navy would continue its ongoing modernisation drive while accelerating the induction of niche and emerging technologies to strengthen its operational capabilities. "The Indian Navy is well set on a course of capability enhancement and modernisation. It shall be my endeavour to sustain the growth momentum, consolidate ongoing programmes and sharpen our operational capabilities," he added.

Commissioned into the Indian Navy on July 1, 1987, Admiral Swaminathan is a Communication and Electronic Warfare specialist with nearly four decades of distinguished service.

During his career, he has held several key operational and staff appointments, including Commander of Western Fleet, Vice Chief of Naval Staff and Flag Officer Commanding-in-Chief of Western Naval Command, a position he held prior to becoming the Navy chief.

01J6. Admiral Swaminathan takes charge as 27th chief of Navy
एडमिरल स्वामीनाथन ने नौसेना के 27वें प्रमुख के रूप में पदभार संभाला

- **Admiral Krishna Swaminathan** on Sunday assumed charge as the 27th **Chief of the Naval Staff (CNS)** of the Indian Navy, succeeding **Admiral Dinesh Kumar Tripathi**, who retired after over 41 years of service.
  एडमिरल कृष्णा स्वामीनाथन ने रविवार को भारतीय नौसेना के 27वें **चीफ ऑफ द नेवल स्टाफ (CNS)** के रूप में पदभार संभाला। उन्होंने **एडमिरल दिनेश कुमार त्रिपाठी** का स्थान लिया, जो 41 वर्षों से अधिक की सेवा के बाद सेवानिवृत्त हुए।
- Soon after taking over the command of the maritime force, Admiral Swaminathan reaffirmed the Navy's commitment to protecting national and economic interests amid an increasingly complex regional security environment.
  समुद्री बल की कमान संभालने के तुरंत बाद एडमिरल स्वामीनाथन ने लगातार जटिल होते क्षेत्रीय सुरक्षा वातावरण के बीच राष्ट्रीय और आर्थिक हितों की रक्षा के लिए नौसेना की प्रतिबद्धता दोहराई।
- Speaking to reporters on the occasion, the new Navy chief said he was honoured to lead the force at a time when maritime security challenges continue to evolve.
  इस अवसर पर पत्रकारों से बातचीत करते हुए नए नौसेना प्रमुख ने कहा कि ऐसे समय में बल का नेतृत्व करना उनके लिए सम्मान की बात है, जब समुद्री सुरक्षा चुनौतियाँ लगातार बदल रही हैं।
- "I'm extremely grateful to have this opportunity to serve the **Indian Navy** and the nation in this capacity.
  "मैं इस भूमिका में **भारतीय नौसेना** और राष्ट्र की सेवा करने का अवसर मिलने के लिए अत्यंत आभारी हूँ।
- The Indian Navy stands vigilant to protect national interests and is actively deployed in a regional security environment that remains challenging, complex, unpredictable and uncertain," he said.
  उन्होंने कहा, "भारतीय नौसेना राष्ट्रीय हितों की रक्षा के लिए सतर्क है और ऐसे क्षेत्रीय सुरक्षा वातावरण में सक्रिय रूप से तैनात है, जो चुनौतीपूर्ण, जटिल, अप्रत्याशित और अनिश्चित बना हुआ है।"
- Highlighting his priorities as the **Chief of the Naval Staff**, Admiral Swaminathan stressed the importance of maintaining the highest standards of operational readiness and combat effectiveness.
  चीफ ऑफ द नेवल स्टाफ के रूप में अपनी प्राथमिकताओं को रेखांकित करते हुए एडमिरल स्वामीनाथन ने परिचालन तैयारी और युद्धक क्षमता के उच्चतम मानकों को बनाए रखने के महत्व पर जोर दिया।
- He said the Navy would continue its ongoing modernisation drive while accelerating the induction of niche and emerging technologies to strengthen its operational capabilities.
  उन्होंने कहा कि नौसेना अपनी परिचालन क्षमताओं को मजबूत करने के लिए आधुनिकरण अभियान को जारी रखेगी और विशेष तथा उभरती प्रौद्योगिकियों को तेजी से शामिल करेगी।
- "The Indian Navy is well set on a course of capability enhancement and modernisation.
  "भारतीय नौसेना क्षमता वृद्धि और आधुनिकीकरण के मार्ग पर अच्छी तरह आगे बढ़ रही है।
- It shall be my endeavour to sustain the growth momentum, consolidate ongoing programmes and sharpen our operational capabilities," he added.
  उन्होंने कहा, "मेरा प्रयास रहेगा कि विकास की गति को बनाए रखा जाए, चल रहे कार्यक्रमों को मजबूत किया जाए और हमारी परिचालन क्षमताओं को और तेज किया जाए।"
- Commissioned into the **Indian Navy** on July 1, 1987, Admiral Swaminathan is a **Communication and Electronic Warfare specialist** with nearly four decades of distinguished service.
  1 जुलाई 1987 को **भारतीय नौसेना** में कमीशन प्राप्त करने वाले एडमिरल स्वामीनाथन लगभग चार दशकों की विशिष्ट सेवा वाले **संचार और इलेक्ट्रॉनिक युद्ध विशेषज्ञ** हैं।
- During his career, he has held several key operational and staff appointments, including **Commander of Western Fleet, Vice Chief of Naval Staff and Flag Officer Commanding-in-Chief of Western Naval Command**, a position he held prior to becoming the Navy chief.

अपने करियर के दौरान उन्होंने कई महत्वपूर्ण परिचालन और स्टाफ पदों पर कार्य किया है, जिनमें **कमांडर ऑफ वेस्टर्न फ्लीट, वाइस चीफ ऑफ नेवल स्टाफ और फ्लैग ऑफिसर कमांडिंग-इन-चीफ ऑफ वेस्टर्न नेवल कमांड** शामिल हैं। नौसेना प्रमुख बनने से पहले वे इसी पद पर कार्यरत थे।

The prisoner who builds his own cell

Cave grows grander, yet Man Midas does not realise he is wearing golden handcuffs; he earns, spends more; in the endless game of lifestyle upgrades, he stops living, begins merely maintaining

GS IV: Ethics Essay

GOLDEN HANDCUFFS

Vaishali R. Venkat

Days pass, but Man Midas never finds peace. The cave's grandeur that once was his pride, fills him with dread. What was once a dream has transformed into a burden he can no longer carry easily. Every possession needs upkeep, every upgrade adds another brick to the invisible walls trapping him inside and every sunrise carries an anxiety: what if it all collapses? Midas runs harder simply to stand in the same place.

After observing Midas in silence, Alien Aurum turns to Monk Moneywise and murmurs, "Midas no longer builds a life. He looks like a prisoner, trapped inside the very cage he built."

Monk Moneywise nods, "True Aurum, the trap begins when humans expand standard of living, blurring the line between need and luxury. Extravagance becomes ordinary and options necessities. A cycle turns into a bike which evolves into a small car to finally mature as a sedan."

"With each upgrade, fuel cost, insurance premia and EMIs multiply quietly. Bigger homes turn bigger EMIs, posh schools bring higher fee, club memberships bills, household help is the norm, foreign holidays are rituals. Comfort slowly hardens into financial obligation. Though Midas' income rises, even one interruption in earnings now threatens the entire life built around it."

> "Humans often stay trapped in lives that no longer bring joy because leaving feels like erasing every sacrifice once made to build them"

Alien Aurum asks in bewilderment, "Mr. Moneywise, if a family of two needs just a small place to eat and sleep, why do they spend entire lives paying for four or five big rooms?"

Imagined future

Gazing towards the distant human dwellings, Monk Moneywise whispers, "Homes disclose some of the deepest truths about human life. Humans build houses not just for today, but for imagined futures: visiting relatives, children who may settle abroad, grandchildren who may never arrive, prestige and the deep fear of appearing small before the society. The tragedy is rarely the size of the house, but the weight of the imagined future they purchase along with it."

Alien Aurum interrupts, "Weight of the imagined future?"

Nodding gently, the monk explains, "Humans spend decades buying a house believing one day they will finally be relieved of monthly rental burdens. Yet, the irony shows itself years later. For instance, in the gated communities.

> "Whether apartment is lived in or empty sans tenants, maintenance costs keep rising every month, often running into several thousands."

Even after fully owning the flat, charges never truly stop. Whether the apartment is lived in, locked for months, or empty without tenants for years, maintenance charges continue arriving month on month, often running into several thousands. The tragedy deepens further with age."

Alien Aurum cuts in and asks Monk Moneywise, "The tragedy deepens with age? How?"

Mr. Moneywise continues, "Aurum, many elderly residents no longer regularly use the swimming pools, clubhouses or luxury amenities they once proudly paid for, yet the maintenance charges never disappear. During salaried years, these costs appear harmless. But after retirement, the shock slowly emerges. They now have to keep paying significant money monthly simply to continue living inside a house they already fully own but not fully use."

Buried exhaustion

Years of buried exhaustion suddenly erupt through Midas. "Enough of your theories and sermons! It's been years of struggle and do you know what all I have sacrificed to build all these? Missed family moments, sleepless nights, health slowly breaking down, dreams postponed and what not. It's easy for you to mock me. But how can I simply walk away? If I let go of this life, then what is all that pain even for? Every sleepless night and every sacrifice goes into bins? We cannot bleed for something our entire lives and then simply let it go."

Now Master Time interrupts saying, "That pain you cannot let go of, Midas, has a name. Behavioural economists call it the sunk-cost fallacy: humans often stay trapped in lives that no longer bring joy because leaving feels like erasing every sacrifice once made to build them."

Crucial questions

Time's voice echoes across the silent valley, "Before every upgrade ask yourself: Can I sustain this if my income falls? Will this matter to me ten years from now? Am I buying this for need or status? What are the recurring charges even after the excitement fades? Am I buying for the present life or the imagined future? Am I here because I want this life, or because leaving it now feels too costly? If Midas had asked these questions before every purchase, he would have built a life not a cage and the golden handcuffs would never have found a wrist to bind itself upon."

01J6. The prisoner who builds his own cell
वह कैदी जो अपनी ही कोठरी बनाता है

- Cave grows grander, yet **Man Midas** does not realise he is wearing golden handcuffs.
  गुफा भव्य होती जाती है, फिर भी **मैन मिडास** यह नहीं समझ पाता कि उसने सोने की हथकड़ियां पहन रखी हैं।
- He earns, spends more; in the endless game of lifestyle upgrades, he stops living, begins merely maintaining.
  वह अधिक कमाता है, अधिक खर्च करता है; जीवनशैली को लगातार बेहतर बनाने के अंतहीन खेल में वह जीना छोड़ देता है और केवल बनाए रखने में लग जाता है।
- Days pass, but **Man Midas** never finds peace.
  दिन बीतते जाते हैं, लेकिन **मैन मिडास** को कभी शांति नहीं मिलती।
- The cave's grandeur that once was his pride, fills him with dread.
  गुफा की भव्यता, जो कभी उसका गर्व थी, अब उसे भय से भर देती है।
- What was once a dream has transformed into a burden he can no longer carry easily.
  जो कभी एक सपना था, वह अब ऐसा बोझ बन गया है जिसे वह आसानी से उठा नहीं सकता।
- Every possession needs upkeep, every upgrade adds another brick to the invisible walls trapping him inside and every sunrise carries an anxiety: what if it all collapses?
  हर वस्तु को देखभाल की आवश्यकता होती है, हर नया उन्नयन उसे कैद करने वाली अदृश्य दीवारों में एक और ईंट जोड़ देता है और हर सूर्योदय एक चिंता लेकर आता है: अगर यह सब ढह गया तो क्या होगा?
- Midas runs harder simply to stand in the same place.
  मिडास केवल उसी स्थान पर बने रहने के लिए और तेज भागता है।
- After observing Midas in silence, **Alien Aurum** turns to **Monk Moneywise** and murmurs, "Midas no longer builds a life. He looks like a prisoner, trapped inside the very cage he built."
  मिडास को चुपचाप देखने के बाद **एलियन ऑरम** ने **मोंक मनीवाइज** की ओर मुड़कर कहा, "मिडास अब जीवन नहीं बना रहा। वह एक कैदी जैसा दिखता है, जो उसी पिंजरे में फंसा है जिसे उसने स्वयं बनाया है।"
- Monk Moneywise nods, "True Aurum, the trap begins when humans expand standard of living, blurring the line between need and luxury."
  मोंक मनीवाइज ने सिर हिलाते हुए कहा, "सही कहा ऑरम, जाल तब शुरू होता है जब इंसान जीवन स्तर बढ़ाते हुए जरूरत और विलासिता के बीच की रेखा धुंधली कर देता है।"
- Extravagance becomes ordinary and options necessities.
  फिजूलखर्ची सामान्य बन जाती है और विकल्प आवश्यकताएं बन जाते हैं।
- A cycle turns into a bike which evolves into a small car to finally mature as a sedan."
  साइकिल बाइक में बदलती है, फिर छोटी कार बनती है और अंततः सेडान में परिवर्तित हो जाती है।"
- "With each upgrade, fuel cost, insurance premia and EMIs multiply quietly."
  "हर उन्नयन के साथ ईंधन खर्च, बीमा प्रीमियम और ईएमआई चुपचाप बढ़ते जाते हैं।"
- "Bigger homes turn bigger EMIs, posh schools bring higher fee, club memberships bills, household help is the norm, foreign holidays are rituals."
  "बड़े घर बड़ी ईएमआई में बदल जाते हैं, महंगे स्कूल अधिक फीस लाते हैं, क्लब सदस्यता बिल बन जाती है, घरेलू मदद सामान्य हो जाती है और विदेशी छुट्टियां एक परंपरा बन जाती हैं।"
- "Comfort slowly hardens into financial obligation."
  "सुविधा धीरे-धीरे आर्थिक बाध्यता में बदल जाती है।"
- "Though Midas' income rises, even one interruption in earnings now threatens the entire life built around it."
  "हालांकि मिडास की आय बढ़ती है, लेकिन अब कमाई में एक छोटी रुकावट भी उसके पूरे जीवन को खतरे में डाल देती है।"

- Alien Aurum asks in bewilderment, "Mr. Moneywise, if a family of two needs just a small place to eat and sleep, why do they spend entire lives paying for four or five big rooms?"
  एलियन ऑरम ने आश्चर्य से पूछा, "मिस्टर मनीवाइज, यदि दो लोगों के परिवार को केवल खाने और सोने के लिए एक छोटी जगह चाहिए, तो वे चार या पांच बड़े कमरों के लिए पूरी जिंदगी भुगतान क्यों करते हैं?"

Imagined future
कल्पित भविष्य

- Gazing towards the distant human dwellings, **Monk Moneywise** whispers, "Homes disclose some of the deepest truths about human life."
  दूर स्थित मानव आवासों की ओर देखते हुए **मोंक मनीवाइज** ने फुसफुसाते हुए कहा, "घर मानव जीवन के कुछ सबसे गहरे सत्य प्रकट करते हैं।"
- "Humans build houses not just for today, but for imagined futures."
  "मनुष्य घर केवल आज के लिए नहीं बल्कि कल्पित भविष्य के लिए बनाते हैं।"
- "Visiting relatives, children who may settle abroad, grandchildren who may never arrive, prestige and the deep fear of appearing small before the society."
  "आने वाले रिश्तेदार, विदेश में बसने वाले बच्चे, शायद कभी न आने वाले पोते-पोतियां, प्रतिष्ठा और समाज के सामने छोटा दिखने का गहरा भय।"
- "The tragedy is rarely the size of the house, but the weight of the imagined future they purchase along with it."
  "त्रासदी शायद ही कभी घर के आकार में होती है, बल्कि उस कल्पित भविष्य के बोझ में होती है जिसे वे उसके साथ खरीदते हैं।"
- Alien Aurum interrupts, "Weight of the imagined future?"
  एलियन ऑरम बीच में बोल पड़ा, "कल्पित भविष्य का बोझ?"
- Nodding gently, the monk explains, "Humans spend decades buying a house believing one day they will finally be relieved of monthly rental burdens."
  धीरे से सिर हिलाते हुए मोंक ने समझाया, "मनुष्य यह सोचकर दशकों तक घर खरीदते हैं कि एक दिन वे मासिक किराए के बोझ से मुक्त हो जाएंगे।"
- "Yet, the irony shows itself years later."
  "लेकिन वर्षों बाद विडंबना सामने आती है।"
- "For instance, in the gated communities."
  "उदाहरण के लिए, गेटेड कम्युनिटीज में।"
- "Even after fully owning the flat, charges never truly stop."
  "फ्लैट का पूर्ण स्वामित्व मिलने के बाद भी खर्च वास्तव में कभी समाप्त नहीं होते।"
- "Whether the apartment is lived in, locked for months, or empty without tenants for years, maintenance charges continue arriving month on month, often running into several thousands."
  "चाहे अपार्टमेंट में लोग रहें, महीनों तक बंद रहे या वर्षों तक बिना किरायेदार के खाली रहे, मेंटेनेंस शुल्क हर महीने आता रहता है, जो अक्सर हजारों रुपये तक पहुंच जाता है।"
- "The tragedy deepens further with age."
  "उम्र बढ़ने के साथ यह त्रासदी और गहरी हो जाती है।"
- Alien Aurum cuts in and asks **Monk Moneywise**, "The tragedy deepens with age? How?"
  एलियन ऑरम ने बीच में टोकते हुए **मोंक मनीवाइज** से पूछा, "उम्र के साथ त्रासदी और गहरी हो जाती है? कैसे?"
- Mr. Moneywise continues, "Aurum, many elderly residents no longer regularly use the swimming pools, clubhouses or luxury amenities they once proudly paid for, yet the maintenance charges never disappear."
  मिस्टर मनीवाइज ने आगे कहा, "ऑरम, कई बुजुर्ग निवासी अब उन स्विमिंग पूलों, क्लब हाउसों या

विलासितापूर्ण सुविधाओं का उपयोग नियमित रूप से नहीं करते जिनके लिए उन्होंने कभी गर्व से भुगतान किया था, फिर भी मेंटेनेंस शुल्क कभी समाप्त नहीं होते।"

- "During salaried years, these costs appear harmless."
  "नौकरी के वर्षों में ये खर्च मामूली लगते हैं।"
- "But after retirement, the shock slowly emerges."
  "लेकिन सेवानिवृत्ति के बाद धीरे-धीरे झटका सामने आता है।"
- "They now have to keep paying significant money monthly simply to continue living inside a house they already fully own but not fully use."
  "अब उन्हें हर महीने बड़ी राशि केवल उस घर में रहने के लिए चुकानी पड़ती है, जिसका वे पूर्ण स्वामित्व रखते हैं लेकिन पूरी तरह उपयोग नहीं करते।"

Buried exhaustion
दबी हुई थकान

- Years of buried exhaustion suddenly erupt through Midas.
  वर्षों की दबी हुई थकान अचानक मिडास के भीतर से फूट पड़ती है।
- "Enough of your theories and sermons!"
  "तुम्हारे सिद्धांतों और उपदेशों से अब बहुत हो गया!"
- "It's been years of struggle and do you know what all I have sacrificed to build all these?"
  "यह वर्षों का संघर्ष है और क्या तुम जानते हो कि यह सब बनाने के लिए मैंने क्या-क्या बलिदान दिए हैं?"
- "Missed family moments, sleepless nights, health slowly breaking down, dreams postponed and what not."
  "परिवार के साथ छूटे पल, बिना नींद की रातें, धीरे-धीरे बिगड़ती सेहत, टलते सपने और न जाने क्या-क्या।"
- "It's easy for you to mock me."
  "तुम्हारे लिए मेरा मजाक उड़ाना आसान है।"
- "But how can I simply walk away?"
  "लेकिन मैं यह सब छोड़कर कैसे चला जाऊं?"
- "If I let go of this life, then what is all that pain even for?"
  "अगर मैं इस जीवन को छोड़ दूं, तो फिर उस सारे दर्द का क्या अर्थ रह जाएगा?"
- "Every sleepless night and every sacrifice goes into bins?"
  "क्या हर जागी हुई रात और हर बलिदान बेकार हो जाएगा?"
- "We cannot bleed for something our entire lives and then simply let it go."
  "हम पूरी जिंदगी किसी चीज के लिए संघर्ष करें और फिर उसे यूं ही छोड़ दें, यह संभव नहीं है।"
- Now **Master Time** interrupts saying, "That pain you cannot let go of, Midas, has a name."
  अब **मास्टर टाइम** बीच में बोलते हुए कहते हैं, "मिडास, उस दर्द का एक नाम है जिसे तुम छोड़ नहीं पा रहे हो।"
- "Behavioural economists call it the sunk-cost fallacy: humans often stay trapped in lives that no longer bring joy because leaving feels like erasing every sacrifice once made to build them."
  "व्यवहारिक अर्थशास्त्री इसे 'संक-कॉस्ट फॉलसी' कहते हैं: इंसान अक्सर ऐसे जीवन में फंसे रहते हैं जो अब खुशी नहीं देता, क्योंकि उसे छोड़ना उन सभी बलिदानों को मिटा देने जैसा लगता है जो उसे बनाने में किए गए थे।"

Crucial questions
महत्वपूर्ण प्रश्न

- Time's voice echoes across the silent valley, "Before every upgrade ask yourself: Can I sustain this if my income falls?"

Address : 3rd Floor, KV Tower, Padleyganj Road, Gorakhpur
Email Id : info@patrioticias.in
Contact Number : 9971932488
Website : patrioticias.in

शांत घाटी में टाइम की आवाज गूंजती है, "हर उन्नयन से पहले स्वयं से पूछो: यदि मेरी आय कम हो जाए तो क्या मैं इसे बनाए रख सकता हूं?"

- "Will this matter to me ten years from now?"
  "क्या यह दस साल बाद भी मेरे लिए मायने रखेगा?"
- "Am I buying this for need or status?"
  "क्या मैं इसे जरूरत के लिए खरीद रहा हूं या प्रतिष्ठा के लिए?"
- "What are the recurring charges even after the excitement fades?"
  "उत्साह खत्म होने के बाद भी बार-बार आने वाले खर्च क्या हैं?"
- "Am I buying for the present life or the imagined future?"
  "क्या मैं वर्तमान जीवन के लिए खरीद रहा हूं या कल्पित भविष्य के लिए?"
- "Am I here because I want this life, or because leaving it now feels too costly?"
  "क्या मैं यहां इसलिए हूं क्योंकि मैं यह जीवन चाहता हूं, या इसलिए क्योंकि अब इसे छोड़ना बहुत महंगा लगता है?"
- "If Midas had asked these questions before every purchase, he would have built a life not a cage and the golden handcuffs would never have found a wrist to bind itself upon."
  "यदि मिडास ने हर खरीदारी से पहले ये प्रश्न पूछे होते, तो वह एक जीवन बनाता, पिंजरा नहीं, और सोने की हथकड़ियों को कभी कोई कलाई नहीं मिलती जिस पर वे खुद को बांध सकें।"
